**Item 2.02. Results of Operations and Financial Condition.**

On May 8, 2014, Golub Capital BDC, Inc. hosted a conference call to discuss its financial results for the second fiscal quarter ended March 31, 2014. In connection therewith, Golub Capital BDC, Inc. provided an investor presentation on its website at <http://www.golubcapitalbdc.com>. A copy of the investor presentation is attached hereto as Exhibit 99.1.

The information in Item 2.02 of this Current Report on Form 8-K, including Exhibit 99.1 furnished herewith, is being furnished and shall not be deemed “filed” for any purpose of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or otherwise subject to the liabilities of such Section. The information in this Current Report on Form 8-K shall not be deemed to be incorporated by reference into any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such filing.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**JUNE 30, 2012**

**(unaudited)**

**1. Description of Business**

ChemoCentryx, Inc. (the Company) commenced operations in 1997. The Company is a clinical-stage biopharmaceutical company focused on discovering, developing and commercializing orally administered chemokine-based therapeutics to treat autoimmune diseases, inflammatory disorders and cancer. The Company's principal operations are in the United States and it operates in one segment.

**Unaudited Interim Financial Information**

The financial information filed is unaudited. The Condensed Consolidated Financial Statements included in this report reflect all adjustments (consisting only of normal recurring adjustments) that the Company considers necessary for the fair statement of the results of operations for the interim periods covered and of the financial condition of the Company at the date of the interim balance sheet. The December 31, 2011 Condensed Consolidated Balance Sheet was derived from audited financial statements, but does not include all disclosures required by generally accepted accounting principles in the United States of America (GAAP). The results for interim periods are not necessarily indicative of the results for the entire year or any other interim period. The Condensed Consolidated Financial Statements should be read in conjunction with the Company's financial statements and the notes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2011 filed with the Securities and Exchange Commission, or SEC, on March 30, 2012.

**Initial Public Offering**

In February 2012, the Company completed its initial public offering, or IPO, pursuant to which the Company issued 5,175,000 shares of common stock, including the exercise of the underwriters' over-allotment option and received (a) net proceeds of \$45.0 million, after underwriting discounts, commissions and offering expenses; and (b) gross proceeds of \$12.0 million in concurrent private placements of 1,200,000 shares of common stock at the IPO price of \$10.00 per share. In addition, in connection with the completion of the Company's IPO, all convertible preferred stock converted into common stock.

**2. Summary of Significant Accounting Policies**

We describe our significant accounting policies in Note 2 to the consolidated financial statements in Item 8 of our Annual Report on Form 10-K for the year ended December 31, 2011. There have been no changes to our significant accounting policies during the six months ended June 30, 2012.

**Use of Estimates**

The financial statements are prepared in conformity with GAAP. The Company has made estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

**Stock Split**

In January 2012, the board of directors of the Company approved a one-for-two reverse stock split. All information in this report relating to the number of shares, price per share and per share amounts of common stock gives retroactive effect to the January 2012 one-for-two reverse stock split of the Company's common stock.

**Net Loss Per Share**

## Edgar Filing: Golub Capital BDC, Inc. - Form 8-K

Basic and diluted net loss per common share is computed by dividing net loss by the weighted-average number of vested common shares outstanding during the period. The convertible preferred stock contained certain participation rights. Participating securities are included in the computation of basic income per share using the two-class method. The calculation of diluted net loss per share excludes potential common stock because its effect is antidilutive. Potential common stock consists of incremental common shares issuable upon the exercise of stock options and warrants, upon the conversion of convertible preferred stock and upon the conversion of the Company's convertible loans.

**Table of Contents**

For the six months ended June 30, 2012 and 2011, the Company's potential common stock includes the following shares, all of which have been excluded from the computation of diluted net loss per share because their impact is antidilutive:

	Six Months Ended	
	June 30,	
	2012	2011
Convertible preferred stock		24,332,196
Options to purchase common stock	4,393,070	3,876,056
Warrants to purchase common stock	309,500	159,500
Common stock subject to repurchase	700	
	4,703,270	28,367,752

**3. Cash Equivalents and Investments**

The amortized cost and fair value of cash and cash equivalents at June 30, 2012 were as follows (unaudited, in thousands):

	Amortized Cost	Gross Unrealized Gains      Losses		Fair Value
Money market funds	\$ 6,699	\$	\$ (2)	\$ 6,697
Government-sponsored agencies	7,777	1		7,778
Commercial paper	42,873	1		42,874
Corporate debt securities	78,016	14	(44)	77,986
<b>Total available-for-sale securities</b>	<b>\$ 135,365</b>	<b>\$ 16</b>	<b>\$ (46)</b>	<b>\$ 135,335</b>
Classified as:				
Cash equivalents				\$ 975
Short-term investments				128,821
Long-term investments				5,539
<b>Total available-for-sale securities</b>				<b>\$ 135,335</b>

The amortized cost and fair value of cash and cash equivalents at December 31, 2011 were as follows (in thousands):

	Amortized Cost	Gross Unrealized Gains      Losses		Fair Value
Money market funds	\$ 41,266	\$	\$	\$ 41,266
Government-sponsored agencies	9,042	2		9,044
Commercial paper	12,540	1		12,541
Corporate debt securities	32,528	9	(43)	32,494
<b>Total available-for-sale securities</b>	<b>\$ 95,376</b>	<b>\$ 12</b>	<b>\$ (43)</b>	<b>\$ 95,345</b>
Classified as:				
Cash equivalents				\$ 39,414

## Edgar Filing: Golub Capital BDC, Inc. - Form 8-K

Short-term investments	49,335
Long-term investments	6,596
Total available-for-sale securities	\$ 95,345

All available-for-sale securities held as of June 30, 2012, had contractual maturities of less than two years. There have been no significant realized gains or losses on available-for-sale securities for the periods presented. No available-for-sale securities held as of June 30, 2012, have been in a continuous unrealized loss position for more than 12 months. As of June 30, 2012, unrealized losses on available-for-sale investments are not attributed to credit risk and are considered to be temporary. The Company believes that it is more-likely-than-not that investments in an unrealized loss position will be held until maturity or the recovery of the cost basis of the investment. To date, the Company has not recorded any impairment charges on marketable securities related to other-than-temporary declines in market value.

**Table of Contents****4. Fair Value Measurements**

The Company determines the fair value of financial assets and liabilities using three levels of inputs as follows:

Level 1 Inputs which include quoted prices in active markets for identical assets and liabilities.

Level 2 Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The Company's financial assets and liabilities subject to fair value measurements on a recurring basis and the level of inputs used in such measurements are as follows as of June 30, 2012 and December 31, 2011 (in thousands):

Description	June 30, 2012			Total
	Level 1	Level 2	Level 3	
Money market fund	\$ 6,697	\$	\$	\$ 6,697
Government-sponsored agencies		7,778		7,778
Commercial paper		42,874		42,874
Corporate debt securities		77,986		77,986
<b>Total assets</b>	<b>\$ 6,697</b>	<b>\$ 128,638</b>	<b>\$</b>	<b>\$ 135,335</b>

Description	December 31, 2011			Total
	Level 1	Level 2	Level 3	
Money market fund	\$ 41,266	\$	\$	\$ 41,266
Government-sponsored agencies		9,044		9,044
Commercial paper		12,541		12,541
Corporate debt securities		32,494		32,494
<b>Total assets</b>	<b>\$ 41,266</b>	<b>\$ 54,079</b>	<b>\$</b>	<b>\$ 95,345</b>
Convertible debt from related party	\$	\$	\$ 10,472	\$ 10,472
<b>Total liabilities</b>	<b>\$</b>	<b>\$</b>	<b>\$ 10,472</b>	<b>\$ 10,472</b>

When the Company uses observable market prices for identical securities that are traded in less active markets, the Company classifies its marketable debt instruments as Level 2. When observable market prices for identical securities are not available, the Company prices its marketable debt instruments using non-binding market consensus prices that are corroborated with observable market data; quoted market prices for similar instruments; or pricing models, such as a discounted cash flow model, with all significant inputs derived from or corroborated with observable market data. Non-binding market consensus prices are based on the proprietary valuation models of pricing providers or brokers. These valuation models incorporate a number of inputs, including non-binding and binding broker quotes; observable market prices for identical or similar securities; and the internal assumptions of pricing providers or brokers that use observable market inputs and, to a lesser degree, unobservable market inputs. The Company corroborates non-binding market consensus prices with observable market data using statistical models when observable market data exists. The discounted cash flow model uses observable market inputs, such as LIBOR-based yield curves, currency spot and forward rates, and credit ratings.

**Table of Contents**

The Company recorded its convertible debt as a liability at fair value, which was estimated at the issuance date using the Probability-Weighted Expected Returns model (PWERM). The PWERM requires inputs such as the expected term of the debt, share price volatility, risk-free interest rate and the likelihood and timing of future equity financing. These assumptions are reviewed each reporting period and changes in the estimated fair value of the convertible note are recognized in interest expense. As of December 31, 2011, the Company estimated the fair value of its convertible debt at approximately \$10.5 million. In February 2012, following the completion of the Company's IPO, all outstanding principal and accrued interest relating to this debt automatically converted into 1,021,490 shares of common stock. The following table shows the change in fair market value of the Company's liabilities during the six months ended June 30, 2012 (in thousands):

	Fair Market Value
Convertible debt from related party	
Balance as of December 31, 2011	\$ 10,472
Change in fair market value prior to conversion	794
Balance upon conversion	11,266
Balance as of June 30, 2012	\$

**5. Convertible Preferred Stock**

The authorized, issued, and outstanding shares of convertible preferred stock at December 31, 2011 were as follows:

Series	Authorized Shares	Shares Issued and Outstanding	Aggregate Liquidation Preference (in thousands)
Series A convertible preferred stock	5,000,000	5,000,000	\$ 5,000
Series B convertible preferred stock	24,390,790	24,071,790	62,586
Series C convertible preferred stock	5,048,469	5,048,469	17,670
Series D convertible preferred stock	7,750,655	7,750,655	29,840
Series E convertible preferred stock	6,800,000	6,793,478	50,000
	48,989,914	48,664,392	\$ 165,096

**Conversion**

In connection with the completion of the Company's IPO in February 2012, all convertible preferred stock converted into 24,332,186 shares of common stock.

**Warrants to Purchase Convertible Preferred Stock***Series B Convertible Preferred Stock*

In February 2012, in connection with the IPO, all outstanding warrants to purchase Series B convertible preferred stock converted into 159,500 warrants to purchase common stock at \$5.20 per share, expiring in 2012 through 2014.

**6. Related-Party Transactions**  
**Glaxo Group Limited**

## Edgar Filing: Golub Capital BDC, Inc. - Form 8-K

In August 2006, the Company entered into a product development and commercialization agreement with Glaxo Group Limited (GSK). The Company recognized the following revenues from GSK during the three and six months ended June 30, 2012 and 2011 (in thousands):

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b>2012</b>	<b>2011</b>	<b>2012</b>	<b>2011</b>
<b>GSK:</b>				
Contract revenue	\$	\$ 325	\$	\$ 2,366
Recognition of up-front payments	1,128	907	2,146	1,814
Total revenues	\$ 1,128	\$ 1,232	\$ 2,146	\$ 4,180

---

**Table of Contents**

In February 2012, based on unblinded data from a recently completed Phase I clinical trial of CCX832, the Company and GSK determined not to further advance the development of CCX832 or its two designated back-up compounds. Under the agreement, all rights to CCX832 remain with the Company. At June 30, 2012 and December 31, 2011, the Company had an accounts receivable balance due from GSK of \$377,000 and \$507,000, respectively.

**Techne**

In September 2011, the Company entered into a convertible note loan agreement with Techne Corporation, or Techne, one of its principal stockholders, pursuant to which the Company issued a convertible note to Techne with a principal amount of \$10 million and bearing interest at a rate of 5.0% per annum and a maturity date in September 2021. In February 2012, the Company completed its IPO, and as such, all outstanding principal and accrued and unpaid interest automatically converted into 1,021,490 shares of common stock at a conversion price equal to the IPO price of \$10.00 per share. Upon the conversion of the note in connection with the IPO, Techne received a warrant with a ten-year term to purchase 150,000 shares of the Company's common stock at an exercise price per share equal to \$20.00 per share, or 200% of the IPO price of its common stock. In addition, pursuant to the terms of the convertible note loan agreement, concurrent with the IPO, Techne purchased \$5.0 million of the Company's common stock in a private placement at \$10.00 per share.

**7. Equity Incentive Plans**

In May 2002, the stockholders approved the Amended and Restated 1997 Stock Option/Stock Issuance Plan (the 1997 Plan), in September 2002, the stockholders approved the 2002 Equity Incentive Plan (the 2002 Plan, and collectively with the 1997 Plan, the Prior Plans), and in February 2012, the stockholders approved the 2012 Equity Incentive Award Plan (the 2012 Plan, and together with the Prior Plans, the Stock Plans). As of February 8, 2012, the effective date of the 2012 Plan, no further award grants will be made under the Prior Plans.

As of June 30, 2012, the total number of shares available for issuance under the 2012 Plan was 2,615,353, which consists of (a) 3,000,000 shares of the Company's common stock initially reserved for issuance under the 2012 Plan, (b) 52,576 shares of common stock available for issuance under the Prior Plans as of the effective date of the 2012 Plan and (c) 3,459 shares of common stock subject to outstanding awards under the Prior Plans that were forfeited or lapsed unexercised between the effective date of the 2012 Plan and June 30, 2012, less 440,682 shares of common stock granted under the 2012 Plan between February 8, 2012 and June 30, 2012. The number of shares available for issuance under the 2012 Plan will be annually increased by an amount equal to the lesser of: 2,000,000 shares; or, 4% of the outstanding shares of the Company's common stock as of the last day of the Company's immediately preceding fiscal year; or, an amount determined by our Board of Directors. As of June 30, 2012, a total of 440,682 shares of common stock were subject to outstanding awards under the 2012 Plan.

Under the 2012 Plan, incentive stock options may be granted by the Board of Directors to employees, and nonstatutory options may be granted by the Board of Directors to employees, officers, directors and consultants, at exercise prices of not less than 100% of the fair value at the date of grant. Under the 2012 Plan, options may be granted with different vesting terms from time to time, but not to exceed 10 years from the date of grant. Outstanding options generally vest over four years, with 25% of the total grant vesting on the first anniversary of the option grant date and 1/36th of the remaining grant vesting each month thereafter.

In February 2012, the stockholders approved the 2012 Employee Stock Purchase Plan, (the ESPP), which plan became effective as of February 8, 2012. A total of 300,000 shares of the Company's common stock have been reserved for issuance under the ESPP. In addition, the number of shares available for issuance under the ESPP will be annually increased on the first day of each fiscal year during the term of the ESPP, beginning with the 2013 fiscal year, by an amount equal to the lesser of: 300,000 shares; 1% of outstanding shares of the Company's common stock; or, an amount determined by its Board of Directors. The ESPP provides for an aggregate limit of 3,300,000 shares of common stock that may be issued under the ESPP during the term of the ESPP. As of June 30, 2012, no shares of common stock have been issued to employees under the ESPP.

**Table of Contents**

As of June 30, 2012, the Company had the following option activity under its Stock Plans:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Options outstanding at December 31, 2011	4,016,393	\$ 4.89		
Granted	440,682	11.45		
Exercised	(56,480)	3.46		
Cancelled	(7,525)	6.46		
Options outstanding at June 30, 2012	4,393,070	\$ 5.56	6.42 years	\$ 41,494,851

**Stock-based Compensation**

During the three and six months ended June 30, 2012, the Company granted to employees options to purchase 125,000 shares and 440,682 shares of common stock, respectively under the 2012 Plan. As of June 30, 2012, \$5.9 million of total unrecognized compensation expense related to employee stock options was expected to be recognized over a weighted-average period of 2.31 years. The fair values of the employee stock options granted under the Company's Stock Plans were estimated at the date of grant using the Black-Scholes option-pricing model. Since implementing the ESPP in 2012, the Company has recorded approximately \$39,000 in stock compensation expense relating to the ESPP.

### **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

*The following discussion and analysis should be read in conjunction with our financial statements and accompanying notes included in this Quarterly Report on Form 10-Q and the financial statements and accompanying notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, filed with the Securities and Exchange Commission, or SEC, on March 30, 2012.*

#### **Forward-Looking Statements**

This Quarterly Report on Form 10-Q contains forward-looking statements that involve risks and uncertainties. All statements other than statements of historical facts contained in this Quarterly Report on Form 10-Q are forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as may, could, will, would, should, expect, plan, anticipate, believe, estimate, seek, contemplate, potential or continue or the negative of these terms or other comparable terminology. These forward-looking statements include, but are not limited to, statements about:

the initiation, timing, progress and results of our preclinical studies and clinical trials, and our research and development programs;

our ability to advance drug candidates into, and successfully complete, clinical trials;

our collaborator's exercise of its license option;

the commercialization of our drug candidates;

the implementation of our business model, strategic plans for our business, drug candidates and technology;

the scope of protection we are able to establish and maintain for intellectual property rights covering our drug candidates and technology;

estimates of our expenses, future revenues, capital requirements and our needs for additional financing;

the timing or likelihood of regulatory filings and approvals;

our ability to maintain and establish collaborations or obtain additional government grant funding;

our financial performance; and

developments relating to our competitors and our industry.

These statements relate to future events or to our future financial performance and involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. Factors that may cause actual results to differ materially from current

## Edgar Filing: Golub Capital BDC, Inc. - Form 8-K

expectations include, among other things, those included in Item 1A. Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, filed with the SEC on March 30, 2012.

Any forward-looking statement in this Quarterly Report on Form 10-Q reflects our current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to our operations, results of operations, industry and future growth. Given these uncertainties, you should not place undue reliance on these forward-looking statements. For all forward-looking statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. Except as required by law, we assume no obligation to update or revise these forward-looking statements for any reason, even if new information becomes available in the future.

## Table of Contents

### Overview

ChemoCentryx is a biopharmaceutical company focused on discovering, developing and commercializing orally-administered therapeutics to treat autoimmune diseases, inflammatory disorders and cancer. We currently have four drug candidates in clinical development, and expect to advance at least one additional drug candidate into clinical development in 2012. Our drug candidates include:

Traficet-EN (CCX282, GSK 786 or recent USAN accepted name - vercirnon), our most advanced drug candidate, currently in four pivotal Phase III clinical trials being conducted by our partner Glaxo Group Limited, or GSK, an affiliate of GlaxoSmithKline, for the treatment of patients with moderate-to-severe Crohn's disease;

CCX140, our lead independent drug candidate, which successfully completed a Phase II clinical trial in type 2 diabetics and is currently in two Phase II clinical trials in patients with diabetic nephropathy, a form of kidney disease;

CCX354, which successfully completed a Phase II proof-of-concept clinical trial for the treatment of rheumatoid arthritis, or RA;

CCX168, currently in a Phase II proof-of-concept clinical trial for the treatment of anti-neutrophil cytoplasmic antibody, or ANCA, associated vasculitis;

CCX872, our independent next generation CCR2 inhibitor for the treatment of metabolic diseases;

CCX507, our independent next generation CCR9 inhibitor for the treatment of inflammatory bowel disease (either CCX872 or CCX507 are currently expected to enter a Phase I clinical trial in the second half of 2012); and

CCX662, our independent drug candidate for the treatment of glioblastoma multiforme, or GBM, and other cancers, which is expected to enter a Phase I clinical trial in 2013.

CCX140, CCX872, CCX507 and CCX662 are wholly owned and are being developed independently by us, while Traficet-EN, CCX354 and CCX168 are subject to our collaboration agreement with GSK. In December 2009 and November 2011, GSK exercised its options to obtain exclusive licenses for the further development and commercialization of Traficet-EN and CCX354, respectively. Upon exercise of these options, GSK assumed sole responsibility for the further development and commercialization of these drug candidates and each of their two respective back-up compounds. We are also advancing several additional independent drug candidates through preclinical development. In addition, our strategy has been to identify next generation compounds related to our drug candidates. All of our drug candidates, including those under our collaboration agreement with GSK, have been internally discovered.

In August 2006, we entered into our strategic alliance with GSK. We have received over \$250 million from GSK, of which approximately \$82 million was in the form of equity investments, and the balance from up-front and milestone payments, research funding and option exercise fees. Under the terms of our agreement with GSK, we are responsible for the discovery and development of small molecule antagonists targeting four defined chemokine and chemo-attractant receptor targets (CCR9, CCR1, C5aR and ChemR23) and for advancing them through clinical proof-of-concept. If we demonstrate successful clinical proof-of-concept, GSK is entitled to options to exclusively license drug candidates that are subject to the collaboration and two defined back-up compounds for each drug candidate for further development and commercialization on a worldwide basis. Upon exercising any of its options to drug candidates under the collaboration, GSK is solely responsible for all further clinical development and commercialization expenditures worldwide with respect to that drug candidate and its two designated back-up compounds. In exchange for the rights granted to GSK upon the exercise of its options, we are also entitled to receive regulatory and commercial milestone payments, as earned under the terms of our agreement, and royalties on the net sales of licensed drugs. The agreement contemplated up to six drug options, each of which covers a drug candidate against the four defined targets, including Traficet-EN (CCR9), CCX354 (CCR1), CCX168 (C5aR) and CCX832 (ChemR23), and their associated back-up compounds. The other two drug options were for second generation drug candidates and their associated back-up compounds. However, we and GSK chose not to nominate second generation drug candidates

## Edgar Filing: Golub Capital BDC, Inc. - Form 8-K

against any of the four defined targets during the agreement's research term, which has expired. In addition, based on unblinded data from a recently completed Phase I clinical trial of CCX832, in February 2012, we and GSK determined not to further advance the development of CCX832 or its two designated back-up compounds. CCX832 was our drug candidate that we intended to develop for certain skin inflammatory diseases. GSK has already exercised its options to Traficet-EN and CCX354 and each of their two respective defined back-up compounds. Thus, GSK's only remaining option is to CCX168 and its associated back-up compounds. If GSK does not exercise its option to CCX168, we will evaluate our alternatives for further development of this drug candidate, which may entail internally developing it or identifying other collaboration partners for its development.

Since commencing our operations in 1997, our efforts have focused on research, development and the advancement of our drug candidates into and through clinical trials. As a result, we have incurred significant losses. We have funded our operations primarily through the sale of convertible preferred and common stock, contract revenue under our collaborations, government contracts and grants and borrowings under equipment financing arrangements. In February 2012, we completed our initial public offering, or IPO, pursuant to which we received net proceeds of \$45.0 million, after underwriting discounts, commissions and offering expenses. We

**Table of Contents**

also received gross proceeds of \$12.0 million from concurrent private placements of common stock at the IPO price of \$10.00 per share. In addition, the outstanding principal amount of \$10.0 million and accrued interest under a convertible note we had issued to Techne Corporation, or Techne, one of our principal stockholders, automatically converted into shares of our common stock in connection with our IPO at a conversion price equal to the IPO price. As of June 30, 2012, we had an accumulated deficit of \$114.3 million. We expect to continue to incur net losses as we develop our drug candidates, expand clinical trials for our drug candidates currently in clinical development, expand our research and development activities, expand our systems and facilities, seek regulatory approvals and engage in commercialization preparation activities in anticipation of Food and Drug Administration, or FDA, approval of our drug candidates. In addition, if a product is approved for commercialization, we will need to expand our organization. Significant capital is required to launch a product and many expenses are incurred before revenues are received. We are unable to predict the extent of any future losses or when we will become profitable, if at all.

**Critical Accounting Policies and Significant Judgments and Estimates**

There has been no material changes in our critical accounting policies during the six months ended June 30, 2012, as compared to those disclosed in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Significant Judgments and Estimates in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, filed with the SEC on March 30, 2012.

**JOBS Act**

In April 2012, the JOBS Act was enacted. Section 107 of the JOBS Act provides that an emerging growth company can utilize the extended transition period provided in Section 7(a)(2)(B) of the Securities Act for implementing new or revised accounting standards. In other words, an emerging growth company can delay the adoption of certain accounting standards until those standards would otherwise apply to private companies. We have elected to delay such adoption of new or revised accounting standards, and as a result, we may not implement new or revised accounting standards on the relevant dates on which adoption of such standards is required for other companies.

Subject to certain conditions set forth in the JOBS Act, as an emerging growth company, we intend to rely on certain of these exemptions, including without limitation, providing an auditor's attestation report on our system of internal controls over financial reporting pursuant to Section 404 and implementing any requirement that may be adopted regarding mandatory audit firm rotation or a supplement to the auditor's report providing additional information about the audit and the financial statements (auditor discussion and analysis). These exemptions will apply for a period of five years following the completion of our initial public offering although if the market value of our common stock that is held by nonaffiliates exceeds \$700 million as of any June 30 before that time, we would cease to be an emerging growth company as of the following December 31.

**Results of Operations****Revenue**

We have not generated any revenue from product sales. For the three and six months ended June 30, 2012, our revenue was derived from the recognition of up-front payments received from GSK. Total revenues for the period, as compared to the same period in the prior year, were as follows (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2012	2011	2012	2011
<b>GSK:</b>				
Contract revenue	\$	\$ 325		\$ 2,366
Recognition of up-front payments	1,128	907	2,146	1,814
Total revenues	\$ 1,128	\$ 1,232	\$ 2,146	\$ 4,180
Dollar decrease	\$ (104)		\$ (2,034)	
Percentage decrease	(8)%		(49)%	

**Table of Contents**

The decreases in revenue from 2011 to 2012 for both the three and six month periods were primarily due to lower funding of clinical support from GSK for CCX354 and CCX168 partially offset by a slight increase in revenue relating to the upfront payment from GSK following our decision not to advance CCX832, thereby shortening the term of our performance obligation.

**Research and development expenses**

Research and development expenses represent costs incurred to conduct basic research, such as the discovery and development of our understanding of the chemokine system; the discovery and development of novel small molecule therapeutics, such as Traficet-EN and CCX140; the development of our suite of proprietary drug discovery technologies, known collectively as EnabaLink, which includes our proprietary Reverse Activation of Migration, or RAM, screening technology and preclinical studies and clinical trials of our drug candidates. We expense all research and development expenses as they are incurred. These expenses consist primarily of salaries and related benefits, including stock-based compensation, third-party contract costs relating to research, formulation, manufacturing, preclinical study and clinical trial activities, laboratory consumables, and allocated facility costs. Total research and development expenses for the period, as compared to the same period in the prior year, were as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Research and development expenses	\$ 9,694	\$ 7,273	\$ 16,603	\$ 14,593
Dollar increase	\$ 2,421		\$ 2,010	
Percentage increase	33%		14%	

The increases in expense from 2011 to 2012 for both the three and six month periods were primarily due to an increase in expenses relating to patient enrollment in our Phase II trials of CCX140 in diabetic nephropathy and an increase in expenses associated with advancing our independent next-generation drug candidates into the clinic. These increases were partially offset by a decrease in expense associated with the completion of our Phase II clinical trial of CCX354 in rheumatoid arthritis in 2011 and the subsequent transfer of CCX354 to GSK following GSK's exercise of its option to CCX354 in November 2011. We track specific project expenses that are directly attributable to our clinical development candidates and preclinical candidates that have been nominated and selected for further development. Such project specific expenses include third-party contract costs relating to formulation, manufacturing, preclinical studies and clinical trial activities. Unlike with respect to our early stage research and drug discovery programs, we allocate research and development salaries, benefits or indirect costs to our development candidates and we have included such costs in the project specific expenses. All remaining research and development expenses are reflected in Other which represents early stage drug discovery programs. Such expenses include allocated employee salaries and related benefits, stock-based compensation, consulting and contracted services to supplement our in-house laboratory activities, laboratory consumables and allocated facility costs associated with these earlier stage programs.

At any given time, we typically have several active early stage research and drug discovery projects. Our internal resources, employees and infrastructure are not directly tied to any individual research or drug discovery project and are typically deployed across multiple projects. As such, we do not maintain information regarding these costs incurred for our early stage research and drug discovery programs on a project specific basis. The following table summarizes our research and development expenses by project (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Development Candidate (Target)				
CCX140 (CCR2)	\$ 3,692	\$ 1,514	\$ 6,334	\$ 2,977
CCX872 (CCR2)	1,248		1,855	
CCX507 (CCR9)	1,513		2,247	
CCX662 (CXCR7)	1,162	249	2,204	579
CCX168 (C5aR)	387	1,849	783	2,249
CCX354 (CCR1)		541	109	2,727
CCX832 (ChemR23) <sup>(1)</sup>	54	563	145	1,072
Other (CCR6, CCR4, CXCR6, other)	1,638	2,557	2,926	4,989
Total research and development	\$ 9,694	\$ 7,273	\$ 16,603	\$ 14,593

- (1) In February 2012, we and GSK determined not to further advance the development of CCX832 or its two designated back-up compounds.

**Table of Contents**

We expect our research and development expenses to increase as we advance our development programs further and increase the number and size of our clinical trials. The process of conducting preclinical studies and clinical trials necessary to obtain regulatory approval is costly and time consuming. We or our partners may never succeed in achieving marketing approval for any of our drug candidates. The probability of success for each drug candidate may be affected by numerous factors, including preclinical data, clinical data, competition, manufacturing capability and commercial viability. For the remaining product option covered under our strategic alliance with GSK, for which we receive milestone payments, we are responsible for development through clinical proof-of-concept, after which time GSK has an option to an exclusive license on a compound by compound basis. Our strategy includes entering into additional partnerships with third parties for the development and commercialization of some of our independent drug candidates that are not subject to our alliance with GSK.

Most of our product development programs are at an early-to-mid-stage; therefore the successful development of our drug candidates is highly uncertain and may not result in approved products. Completion dates and completion costs can vary significantly for each drug candidate and are difficult to predict for each product. Given the uncertainty associated with clinical trial enrollments and the risks inherent in the development process, we are unable to determine the duration and completion costs of the current or future clinical trials of our drug candidates or if, or to what extent, we will generate revenues from the commercialization and sale of any of our drug candidates. We anticipate we will make determinations as to which programs to pursue and how much funding to direct to each program on an ongoing basis in response to the scientific and clinical success of each drug candidate, as well as ongoing assessment as to each drug candidate's commercial potential. We will need to raise additional capital or may seek additional strategic alliances in the future in order to complete the development and commercialization of our drug candidates, including CCX140, our lead independent drug candidate.

**General and administrative expenses**

Total general and administrative expenses were as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
General and administrative expenses	\$ 2,473	\$ 1,941	\$ 5,035	\$ 3,949
Dollar increase	532		1,086	
Percentage increase	27%		28%	

General and administrative expenses consist primarily of salaries and related benefits, including stock-based compensation and travel expenses, in executive, finance, business and corporate development and other administrative functions. Other general and administrative expenses include allocated facility-related costs not otherwise included in research and development expenses, legal costs of pursuing patent protection of our intellectual property, and professional fees for accounting, tax, and legal services.

The increases from 2011 to 2012 for both the three and six month periods were primarily due to increased stock based compensation expense for 2012 stock option grants in addition to higher professional service fees relating to fulfilling our reporting obligations as a public company. We expect that general and administrative expenses will increase in the future as we expand our operating activities and incur additional costs associated with being a public company. These public company related increases will likely include legal fees, accounting fees, directors' and officers' liability insurance premiums and investor relations related fees.

**Table of Contents****Interest income (expense)**

Interest income (expense), primarily consists of interest income earned on our marketable securities and interest expense incurred on our equipment financing obligations and convertible note. Total interest income (expense), net, as compared to prior years was as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Interest income	\$ 167	\$ 105	\$ 270	\$ 224
Interest expense	(21)	(26)	(756)	(53)
<b>Total interest income (expense), net</b>	<b>\$ 146</b>	<b>\$ 79</b>	<b>\$ (486)</b>	<b>\$ 171</b>

Interest expense for the three months ended June 30, 2012 was primarily related to our interest expense due on our equipment lines of credit. Interest expense increased from 2011 to 2012 for the six month period primarily due to the change in fair value of the convertible note we issued to Techne in September 2011 which was automatically converted into common stock as a result of our IPO in February 2012. In addition, interest income increased for both the three and six month periods ended June 30, 2012 due to increased cash and investment balances following our IPO in February 2012.

**Liquidity and Capital Resources**

As of June 30, 2012, we had approximately \$137.1 million in cash, cash equivalents and investments. The following table shows a summary of our cash flows for the six months ended June 30, 2012 and 2011 (in thousands).

	Six Months Ended June 30,	
	2012	2011
Cash provided by (used in)		
Operating activities	\$ (15,844)	\$ (4,412)
Investing activities	(78,497)	1,098
Financing activities	56,942	1,592

*Operating activities.* Net cash used in operating activities was \$15.8 million for the six months ended June 30, 2012, compared to net cash used of \$4.4 million for the same period in 2011. This change was primarily due to receipt of a \$10.0 million milestone payment from GSK, earned in 2010 and received in 2011. No such payments were received in 2012. The net cash used in operating activities of \$15.8 million for the six months ended June 30, 2012 was primarily attributed to our net loss from operations, offset by changes in asset accounts following our IPO and non-cash charges for stock-based compensation in addition to the interest expense relating to the convertible note issued to Techne.

*Investing activities.* Net cash used in or provided by investing activities for periods presented primarily relate to the purchase, sale and maturity of investments used to fund the day-to-day needs of our business. Following our February 2012 IPO, we invested the majority of our net proceeds received in short and long term investments. We finance property and equipment purchases through equipment financing facilities. Proceeds from collaboration agreements and common stock issuances are used for general working capital purposes, such as research and development activities and other general corporate purposes.

*Financing activities.* Net cash provided by financing activities was \$56.9 million for the six months ended June 30, 2012, compared to \$1.6 million for the same period in 2011. This increase was primarily due to \$57.0 million in net proceeds from the issuance of a common stock as a result of our IPO and concurrent private placements in February 2012.

We believe that our existing cash, cash equivalents and investments as of June 30, 2012 will be sufficient to meet our anticipated cash requirements for at least the next 12 months. However, our forecast of the period of time through which our financial resources will be adequate

## Edgar Filing: Golub Capital BDC, Inc. - Form 8-K

to support our operations is a forward-looking statement that involves risks and uncertainties, and actual results could vary materially.

Our future capital requirements are difficult to forecast and will depend on many factors, including:

the achievement of milestones under our agreement with GSK;

the terms and timing of any other collaborative, licensing and other arrangements that we may establish;

the initiation, progress, timing and completion of preclinical studies and clinical trials for our drug candidates and potential drug candidates;

the number and characteristics of drug candidates that we pursue;

the progress, costs and results of our clinical trials;

**Table of Contents**

the outcome, timing and cost of regulatory approvals;

delays that may be caused by changing regulatory approvals;

the cost and timing of hiring new employees to support continued growth;

the costs involved in filing and prosecuting patent applications and enforcing and defending patent claims;

the cost and timing of procuring clinical and commercial supplies of our drug candidates;

the cost and timing of establishing sales, marketing and distribution capabilities; and

the extent to which we acquire or invest in businesses, products or technologies.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Our market risks at June 30, 2012 have not changed significantly from those discussed in Item 7A. Quantitative and Qualitative Disclosures About Market Risk of our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, filed with the SEC on March 30, 2012.

**Item 4. Controls and Procedures**

**Conclusions Regarding the Effectiveness of Disclosure Controls and Procedures**

As of June 30, 2012, management, with the participation of our Disclosure Committee, performed an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Our disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosures.

Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objective. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2012, the design and operation of our disclosure controls and procedures were effective.

**Changes in Internal Control Over Financial Reporting**

There has been no change in our internal control over financial reporting during the six month period ended June 30, 2012, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**Table of Contents**

**PART II. OTHER INFORMATION**

**Item 1. Legal Proceedings**

Not Applicable.

**Item 1A. Risk Factors**

There have been no material changes to the risk factors included in Item 1A. Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, filed with the SEC on March 30, 2012, other than as previously disclosed in our quarterly report on Form 10-Q for the quarter ended March 31, 2012, filed with the SEC on May 10, 2012.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

**Unregistered Sales of Equity Securities**

None.

**Use of Proceeds**

On February 8, 2012, our registration statement on Form S-1 (File No. 333-177332), which registered an aggregate amount of up to \$73.6 million of our common stock, was declared effective by the SEC for our initial public offering, or IPO, pursuant to which we sold 5,175,000 shares of common stock at an IPO price of \$10.00 per share, including the exercise of the underwriters' over-allotment option. As a result of the IPO, we received gross proceeds of approximately \$51.8 million, which resulted in net proceeds to us of approximately \$45.0 million, after underwriting expenses of approximately \$6.8 million (comprising \$3.6 million in underwriting discounts and commissions and \$3.2 million in other offering expenses). None of the expenses associated with the IPO were paid to directors, officers, persons owning ten percent or more of any class of equity securities, or to their associates, or to our affiliates. On February 13, 2012, following the sale of the 5,175,000 shares of common stock, the offering terminated.

We intend to use the net offering proceeds to advance our independent drug candidates through the clinic and for working capital and general corporate purposes. Through June 30, 2012, the net proceeds have been applied as follows: \$5.8 million to further develop CCX140, \$2.8 million to advance CCX168 and CCX662 and \$2.7 million to fund other research and drug discovery programs.
