

WisdomTree Trust  
 Form 497K  
 August 21, 2012

**WisdomTree Europe Hedged Equity Fund** **HEDJ** (NYSE Arca Ticker)

(Formerly, WisdomTree International Hedged Equity Fund)

**SUMMARY PROSPECTUS** July 30, 2012, as revised August 29, 2012

Before you invest in the WisdomTree Europe Hedged Equity Fund (formerly, WisdomTree International Hedged Equity Fund) (the Fund), you may want to review the Fund's prospectus and statement of additional information, which contain more information about the Fund and the risks of investing in the Fund. The Fund's current prospectus and statement of additional information are incorporated by reference into this summary prospectus. You can find the Fund's prospectus and statement of additional information, as well as other information about the Fund, online at [www.wisdomtree.com/prospectus](http://www.wisdomtree.com/prospectus). You may also obtain this information at no charge by calling 1-866-909-9473 or by sending an e-mail request to [getinfo@wisdomtree.com](mailto:getinfo@wisdomtree.com).

**Investment Objective**

The Fund seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Europe Hedged Equity Index.

**Fees and Expenses of the Fund**

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund's average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.58%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses*</b>	0.58%

\* Expense information in the table has been restated to reflect current fees. On June 29, 2012, shareholders of the Fund approved a new Management Fee of 0.58%.

**Example**

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. It also does not include transaction fees on purchases and redemptions of Creation Units because these fees will not be imposed on retail investors. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

## Edgar Filing: WisdomTree Trust - Form 497K

	1 Year	3 Years	5 Years	10 Years
	\$59	\$186	\$324	\$726

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 42% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares.

### Principal Investment Strategies of the Fund

The Fund employs a passive management or indexing investment approach designed to track the performance of the WisdomTree Europe Hedged Equity Index. The Fund attempts to invest substantially all of its assets in the common stocks that make up the Index. The Fund generally uses a Representative Sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole.

The WisdomTree Europe Hedged Equity Index is a dividend weighted index designed to provide exposure to European equity securities, particularly shares of European exporters, while at the same time neutralizing exposure to fluctuations between the value of the U.S. dollar and the euro. The Fund invests in stocks of European companies with significant revenue from exports. These companies stand to benefit from weakness in the value of the euro as this decreases the relative cost of the goods and services they are exporting. The Index and the Fund will consist of dividend paying companies that are domiciled in Europe and traded in euros, have at least \$1 billion in market capitalization, and derive at least 50% of their revenue from countries outside of Europe. Securities are weighted in the Index based on annual cash dividends paid; companies that pay more dividends are more heavily weighted. At the time of the Index's annual rebalance, the maximum weight of any single security in the Index is capped at 5% and the maximum weight of any one sector and any one country in the Index is capped at 25%. In response to market conditions, security, sector and country weights may fluctuate above the specified cap between annual Index rebalance dates.

WisdomTree Investments, Inc., as index provider, currently uses Standard & Poor's Global Industry Classification Standards ( S&P GICS ) to define companies in each sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries.

The Index hedges against fluctuations in the relative value of the euro against the U.S. dollar. The Index is designed to have higher returns than an equivalent non-currency hedged investment when the U.S. dollar is going up in value relative to the euro. Conversely, the Index is designed to have lower returns than an equivalent non-currency hedged investment when the U.S. dollar is falling in value relative to the euro.

Forward currency contracts or futures contracts are used to offset the Fund's exposure to the euro. A forward currency contract is a contract between two parties to buy or sell a specific currency in the future at an agreed-upon rate. A currency futures contract is a contract to exchange one currency for another at a specified date in the future at an agreed upon exchange rate. The amount of forward contracts and futures contracts in the Fund is based on the aggregate exposure of the Fund and Index to the euro. While this approach is designed to minimize the impact of currency fluctuations on Fund returns, it does not necessarily eliminate exposure to all currency fluctuations. The return of the forward currency contracts and currency futures contracts may not perfectly offset the actual fluctuations of the euro relative to the U.S. dollar.

The Fund will normally invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in the types of investments suggested by its name. The Fund also may invest its assets in cash and cash equivalents, as well as in shares of other investment companies, forward contracts, futures contracts, options on futures contracts, options, and swaps. WisdomTree Asset Management, Inc. expects that, over time, the correlation between the Fund's performance and that of its Index, before fees and expenses, will be 95% or better.

To the extent the Fund's Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as its Index.

### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ( NAV ), trading price, yield, total return and/or its ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund's prospectus titled Additional Investment Objective, Strategy and Risk Information.

n **Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

n **Market Risk.** The trading prices of equity securities, fixed income securities, currencies, commodities and other instruments fluctuate in response to a variety of factors. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

n **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ( ETFs ), Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of the Fund will approximate the Fund's NAV, there may be times when the market price of the shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount). This risk is heightened in times of market volatility or periods of steep market declines.

n

## Edgar Filing: WisdomTree Trust - Form 497K

**Cash Redemption Risk.** The Fund's investment strategy will require it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds. The Fund may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

- n **Consumer Discretionary Investing.** The Fund may invest in companies in the consumer discretionary sector. This sector consists of, for example, automobile, retail and media companies. The consumer discretionary sector of the economy can be significantly affected by, among other things, economic growth, worldwide demand and consumers' disposable income levels and propensity to spend.
- n **Consumer Staples Investing.** The Fund may invest in companies in the consumer staples sector. This sector can be significantly affected by, among other things, changes in price and availability of underlying commodities, rising energy prices and global and economic conditions.
- n **Currency Exchange Rate Risk.** The Fund uses various strategies to attempt to minimize the impact of changes in the value of the euro against the U.S. dollar. These strategies may not be successful. In order to minimize transaction costs, or for other reasons, the Fund's exposure to the euro may not be fully hedged at all times. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in a Fund may also go up or down quickly and unpredictably and investors may lose money.
- n **Derivatives Investment Risk.** The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

- n **Fiscal Policy Risk.** Any repeal of or failure to extend the current U.S. federal tax treatment of qualified dividend income could make certain dividend-paying securities less appealing to investors and could have a negative impact on the performance of the Fund.
  
- n **Foreign Securities Risk.** Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.
  
- n **Geographic Concentration in Europe.** Because the Fund invests primarily in the securities of companies in Europe, the Fund's performance is expected to be closely tied to social, political, and economic conditions within Europe and to be more volatile than the performance of more geographically diversified funds. Most developed countries in Western Europe are members of the European Union (EU), and many are also members of the European Monetary Union (EMU), which requires compliance with restrictions on inflation rates, deficits, and debt levels. Unemployment in certain European nations is historically high and several countries face significant debt problems. These conditions can significantly affect every country in Europe. The Fund currently invests a significant portion of its assets in companies organized in Germany, France and the Netherlands.
  
- n **Industrial Investing.** The Fund may invest in companies in the industrial sector. The industrial sector can be significantly affected by, among other things, worldwide economy growth, supply and demand for specific products and services, rapid technological developments, and government regulation.
  
- n **Investment Style Risk.** The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to its Index.
  
- n **Issuer-Specific Risk.** Issuer-specific events, including changes in the financial condition of an issuer, can have a negative impact on the value of the Fund.
  
- n **Large-Capitalization Investing.** The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion.
  
- n **Mid-Capitalization Investing.** The Fund may invest in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of smaller companies are often more vulnerable to market volatility than securities of larger companies.

n

## Edgar Filing: WisdomTree Trust - Form 497K

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

n **Non-Diversification Risk.** Although the Fund intends to invest in a variety of securities and instruments, the Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

### **Fund Performance**

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the WisdomTree DEFA International Hedged Equity Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

The Fund's name and objective changed effective August 29, 2012. Fund performance below reflects the investment objective of the Fund when it was the WisdomTree International Hedged Equity Fund and tracked the performance, before fees and expenses, of the WisdomTree DEFA International Hedged Equity Index.

The Fund's year-to-date total return as of June 29, 2012 was 3.67%.

**WisdomTree Trust** Prospectus 3

**Best and Worst Quarter Returns (for the period reflected in the bar chart above)**

	Return	Quarter/Year
Highest Return	7.68%	3Q/2010
Lowest Return	(14.16)%	3Q/2011

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

**Average Annual Total Returns for the periods ending December 31, 2011**

		Since Inception
	1 Year	(12/31/2009)
<b>WisdomTree Europe Hedged Equity Fund*</b>		
Return Before Taxes Based on NAV	(9.30)%	(3.29)%
Return After Taxes on Distributions	(10.29)%	(4.44)%
Return After Taxes on Distributions and Sale of Fund Shares	(6.01)%	(3.41)%
MSCI EAFE Local Currency Index (reflects no deduction for fees, expenses or taxes)	(12.15)%	(4.05)%
WisdomTree DEFA International Hedged Equity Index (reflects no deduction for fees, expenses or taxes)	(9.06)%	(2.67)%

\* The Fund's objective changed effective August 29, 2012. Prior to that date, the Fund sought to track the price and yield performance, before fees and expenses, of the WisdomTree DEFA International Hedged Equity Index. As of August 29, 2012, the Fund seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Europe Hedged Equity Index.

**Management****Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation serves as sub-adviser to the Fund.

**Portfolio Managers**

Karen Q. Wong, CFA, a Managing Director, Equity Index Strategies, has been a portfolio manager of the Fund since December 2009.

Richard A. Brown, CFA, a Director, Equity Portfolio Management, has been a portfolio manager of the Fund since December 2009.

Thomas J. Durante, CFA, a Director, Senior Portfolio Manager, Equity, has been a portfolio manager of the Fund since December 2009.

**Buying and Selling Fund Shares**

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

## Edgar Filing: WisdomTree Trust - Form 497K

The Fund issues and redeems shares at NAV only in large blocks of shares ( Creation Units ), which only institutions or large investors may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 50,000 shares. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund and/or a designated amount of U.S. cash.

### **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income or capital gains.
