Forward-Looking Information

The information included in this Form 10-Q contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements may relate to Popular, Inc. (the Corporation, Popular, we, us, our) financial condition, results of operations, plans, objectives, future performance and business, including, but not limited to, statements with respect to the adequacy of the allowance for loan losses, delinquency trends, market risk and the impact of interest rate changes, capital markets conditions, capital adequacy and liquidity, and the effect of legal proceedings and new accounting standards on the Corporation's financial condition and results of operations. All statements contained herein that are not clearly historical in nature are forward-looking, and the words anticipate, believe, continues, expect, estimate, intend, project and similar expressions and future or conditional verbs such as will, would, should, could, may, or similar expressions are generally intended to identify forward-looking statements.

These statements are not guarantees of future performance and involve certain risks, uncertainties, estimates and assumptions by management that are difficult to predict.

Various factors, some of which are beyond Popular's control, could cause actual results to differ materially from those expressed in, or implied by, such forward-looking statements. Factors that might cause such a difference include, but are not limited to:

the rate of growth in the economy and employment levels, as well as general business and economic conditions;

changes in interest rates, as well as the magnitude of such changes;

the fiscal and monetary policies of the federal government and its agencies;

changes in federal bank regulatory and supervisory policies, including required levels of capital and the impact of proposed capital standards on our capital ratios;

the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) on our businesses, business practices and cost of operations;

regulatory approvals that may be necessary to undertake certain actions or consummate strategic transactions such as acquisitions and dispositions;

the relative strength or weakness of the consumer and commercial credit sectors and of the real estate markets in Puerto Rico and the other markets in which borrowers are located;

the performance of the stock and bond markets;

competition in the financial services industry;

additional Federal Deposit Insurance Corporation (FDIC) assessments; and

Edgar Filing: POPULAR INC - Form 10-Q

possible legislative, tax or regulatory changes.

Other possible events or factors that could cause results or performance to differ materially from those expressed in these forward-looking statements include the following: negative economic conditions that adversely affect the general economy, housing prices, the job market, consumer confidence and spending habits which may affect, among other things, the level of non-performing assets, charge-offs and provision expense; changes in interest rates and market liquidity which may reduce interest margins, impact funding sources and affect our ability to originate and distribute financial products in the primary and secondary markets; adverse movements and volatility in debt and equity capital markets; changes in market rates and prices which may adversely impact the value of financial assets and liabilities; liabilities resulting from litigation and regulatory investigations; changes in accounting standards, rules and interpretations; increased competition; our ability to grow our core businesses; decisions to downsize, sell or close units or otherwise change our business mix; and management's ability to identify and manage these and other risks. Moreover, the outcome of legal proceedings, as discussed in Part II, Item I. Legal Proceedings, is inherently uncertain and depends on judicial interpretations of law and the findings of regulators, judges and juries. Investors should refer to the Corporation's Annual Report on Form 10-K for the year ended December 31, 2011 as well as Part II, Item 1A of this Form 10-Q for a discussion of such factors and certain risks and uncertainties to which the Corporation is subject.

All forward-looking statements included in this document are based upon information available to the Corporation as of the date of this document, and other than as required by law, including the requirements of applicable securities laws, we assume no obligation to update or revise any such forward-looking statements to reflect occurrences or unanticipated events or circumstances after the date of such statements.

Note 1 Organization, consolidation and basis of presentation

Nature of Operations

Popular, Inc. (the Corporation) is a diversified, publicly-owned financial holding company subject to the supervision and regulation of the Board of Governors of the Federal Reserve System. The Corporation has operations in Puerto Rico, the United States, the Caribbean and Latin America. In Puerto Rico, the Corporation provides retail and commercial banking services through its principal banking subsidiary, Banco Popular de Puerto Rico (BPPR), as well as mortgage banking, investment banking, broker-dealer, auto and equipment leasing and financing, and insurance services through specialized subsidiaries. In the U.S. mainland, the Corporation operates Banco Popular North America (BPNA), including its wholly-owned subsidiary E-LOAN. BPNA focuses efforts and resources on the core community banking business. BPNA operates branches in New York, California, Illinois, New Jersey and Florida. E-LOAN markets deposit accounts under its name for the benefit of BPNA. The BPNA branches operate under the name of Popular Community Bank. Note 31 to the consolidated financial statements presents information about the Corporation's business segments.

Principles of Consolidation and Basis of Presentation

The consolidated interim financial statements have been prepared without audit. The consolidated statement of financial condition data at December 31, 2011 was derived from audited financial statements. The unaudited interim financial statements are, in the opinion of management, a fair statement of the results for the periods reported and include all necessary adjustments, all of a normal recurring nature, for a fair statement of such results.

Certain reclassifications have been made to the 2011 consolidated financial statements and notes to the financial statements to conform with the 2012 presentation.

On May 29, 2012, the Corporation effected a 1-for-10 reverse split of its common stock. The reverse split is described further in Note 16 to these consolidated financial statements. All share and per share information in the consolidated financial statements and accompanying notes have been adjusted to retroactively reflect the 1-for-10 reverse stock split.

Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted from the unaudited financial statements pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, these financial statements should be read in conjunction with the audited consolidated financial statements of the Corporation for the year ended December 31, 2011, included in the Corporation's 2011 Annual Report (the 2011 Annual Report). Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Table of Contents**Note 2 New accounting pronouncements**

FASB Accounting Standards Update 2012-06, Business Combinations (Topic 805): Subsequent Accounting for an Indemnification Asset Recognized at the Acquisition Date as a Result of a Government-Assisted Acquisition of a Financial Institution (ASU 2012-06)

The FASB issued ASU 2012-06 in October 2012. ASU 2012-06 addresses the diversity in practice about how to interpret the terms on the same basis and contractual limitations when subsequently measuring an indemnification asset recognized in a government-assisted (Federal Deposit Insurance Corporation) acquisition of a financial institution that includes a loss-sharing agreement (indemnification agreement). When a reporting entity recognizes an indemnification asset as a result of a government-assisted acquisition of a financial institution and subsequently the cash flows expected to be collected on the indemnification asset changes, as a result of a change in cash flows expected to be collected on the assets subject to indemnification, the reporting entity should subsequently account for the change in the measurement of the indemnification asset on the same basis as the change in the assets subject to indemnification. Any amortization of changes in value should be limited to the contractual term of the indemnification agreement, that is, the lesser of the term of the indemnification agreement and the remaining life of the indemnified assets.

ASU 2012-06 is effective for fiscal years and interim periods within those years, beginning on or after December 15, 2012. Early adoption is permitted.

The adoption of this guidance is not expected to have a material effect on the Corporation's consolidated financial statements.

FASB Accounting Standards Update 2012-02, Intangibles-Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment (ASU 2012-02)

The FASB issued ASU 2012-02 in July 2012. ASU 2012-02 is intended to simplify how entities test indefinite-lived intangible assets, other than goodwill, for impairment. ASU 2012-02 permits an entity the option to first assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with ASC Subtopic 350-30, *Intangibles-Goodwill and Other-General Intangibles Other than Goodwill*. The more-likely-than-not threshold is defined as having a likelihood of more than 50%. This guidance results in guidance that is similar to the goodwill impairment testing guidance in ASU 2011-08. The previous guidance under ASC Subtopic 350-30 required an entity to test indefinite-lived intangible assets for impairment on at least an annual basis by comparing an asset's fair value with its carrying amount and recording an impairment loss for an amount equal to the excess of the asset's carrying amount over its fair value. Under the amendments in this ASU, an entity is not required to calculate the fair value of an indefinite-lived intangible asset if the entity determines that it is not more likely than not that the asset is impaired. In addition the new qualitative indicators replace those currently used to determine whether indefinite-lived intangible assets should be tested for impairment on an interim basis.

ASU 2012-12 is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted, including for annual or interim impairment tests performed as of a date before July 27, 2012, as long as the financial statements have not yet been issued. The Corporation did not elect to adopt early the provisions of this ASU.

The provisions of this guidance simplify how entities test for indefinite-lived assets impairment and will not have an impact on the Corporation's consolidated financial statements.

FASB Accounting Standards Update 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income (ASU 2011-05) and FASB Accounting Standards Update 2011-12, Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05 (ASU 2011-12)

The FASB issued ASU 2011-05 in June 2011. The amendment of this ASU allows an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. ASU 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments to the Codification in this ASU do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. This ASU also does not change the option for an entity to present components of other comprehensive income either net of related tax effects or before related tax effects, with one amount shown for the aggregate income tax expense or benefit related to the total of other comprehensive income items.

Table of Contents

In December 2011, the FASB issued ASU 2011-12, which defers indefinitely the new requirement in ASU 2011-05 to present components of reclassification adjustments out of accumulated other comprehensive income on the face of the income statement by income statement line item.

The Corporation adopted the provisions of these two guidance in the first quarter of 2012. The guidance impacts presentation disclosure only and did not have an impact on the Corporation's financial condition or results of operations.

FASB Accounting Standards Update 2011-11, Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities (ASU 2011-11)

The FASB issued ASU 2011-11 in December 2011. The amendments in this ASU require an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. To meet this objective, entities with financial instruments and derivatives that are either offset on the balance sheet or subject to a master netting arrangement or similar arrangement shall disclose the following quantitative information separately for assets and liabilities in tabular format: a) gross amounts of recognized assets and liabilities; b) amounts offset to determine the net amount presented in the balance sheet; c) net amounts presented in the balance sheet; d) amounts subject to an enforceable master netting agreement or similar arrangement not otherwise included in (b), including: amounts related to recognized financial instruments and other derivatives instruments if either management makes an accounting election not to offset or the amounts do not meet the guidance in ASC Section 210-20-45 or ASC Section 815-10-45, and also amounts related to financial collateral (including cash collateral); and e) the net amount after deducting the amounts in (d) from the amounts in (c).

In addition to these tabular disclosures, entities are required to provide a description of the setoff rights associated with assets and liabilities subject to an enforceable master netting arrangement.

An entity is required to apply the amendments for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented.

The provisions of this guidance impact presentation disclosure only and will not have an impact on the Corporation's financial condition or results of operations.

FASB Accounting Standards Update 2011-10, Property, Plant, and Equipment (Topic 360): Derecognition of in Substance Real Estate—a Scope Clarification (ASU 2011-10)

The FASB issued ASU 2011-10 in December 2011. The objective of this ASU is to resolve the diversity in practice about whether the guidance in ASC Subtopic 360-20, Property, Plant, and Equipment Real Estate Sales applies to a parent that ceases to have a controlling financial interest in a subsidiary that is in substance real estate as a result of default on the subsidiary's nonrecourse debt. ASU 2011-10 provides that when a parent (reporting entity) ceases to have a controlling financial interest in a subsidiary that is in substance real estate as a result of default on the subsidiary's nonrecourse debt, the reporting entity should apply the guidance in ASC Subtopic 360-20 to determine whether it should derecognize the in substance real estate. Generally, a reporting entity would not satisfy the requirements to derecognize the in substance real estate before the legal transfer of the real estate to the lender and the extinguishment of the related nonrecourse indebtedness. That is, even if the reporting entity ceases to have a controlling financial interest under ASC Subtopic 810-10, the reporting entity would continue to include the real estate, debt, and the results of the subsidiary's operations in its consolidated financial statements until legal title to the real estate is transferred to legally satisfy the debt.

ASU 2011-10 should be applied on a prospective basis to deconsolidation events occurring after the effective date; with prior periods not adjusted even if the reporting entity has continuing involvement with previously derecognized in substance real estate entities. For public entities, ASU 2011-10 is effective for fiscal years, and interim periods within those years, beginning on or after June 15, 2012. Early adoption is permitted; however, the Corporation is not early adopting this ASU.

The adoption of this guidance is not expected to have a material effect on the Corporation's consolidated financial statements.

FASB Accounting Standards Update 2011-08, Intangibles-Goodwill and Other (Topic 350): Testing Goodwill for Impairment (ASU 2011-08)

Table of Contents

The FASB issued ASU No. 2011-08 in September 2011. ASU 2011-08 is intended to simplify how entities test goodwill for impairment. ASU 2011-08 permits an entity the option to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in ASC Topic 350, *Intangibles-Goodwill and Other*. The more-likely-than-not threshold is defined as having a likelihood of more than 50%. The previous guidance under ASC Topic 350 required an entity to test goodwill for impairment, on at least an annual basis, by comparing the fair value of a reporting unit with its carrying amount, including goodwill (step one). If the fair value of a reporting unit is less than its carrying amount, then the second step of the test must be performed to measure the amount of the impairment loss, if any. Under the amendments in this ASU, an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount.

This ASU also removes the guidance that permitted the entities to carry forward the calculation of the fair value of the reporting unit from one year to the next if certain conditions are met. In addition, the new qualitative indicators replace those currently used to determine whether an interim goodwill impairment test is required. These indicators are also applicable for assessing whether to perform step two for reporting units with zero or negative carrying amounts.

ASU 2011-08 was effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption was permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if an entity's financial statements for the most recent annual or interim period had not yet been issued. The Corporation did not elect to adopt early the provisions of this ASU.

The Corporation adopted this guidance on January 1, 2012. The provisions of this guidance simplify how entities test for goodwill impairment and it has not impacted the Corporation's consolidated financial statements as of September 30, 2012.

FASB Accounting Standards Update 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS (ASU 2011-04)

The FASB issued ASU 2011-04 in May 2011. The amendment of this ASU provides a consistent definition of fair value between U.S. GAAP and International Financial Reporting Standards (IFRS). The ASU modifies some fair value measurement principles and disclosure requirements including the application of the highest and best use and valuation premise concepts, measuring the fair value of an instrument classified in a reporting entity's shareholders' equity, measuring the fair value of financial instruments that are managed within a portfolio, application of premiums and discounts in a fair value measurement, disclosing quantitative information about unobservable inputs used in Level 3 fair value measurements, and other additional disclosures about fair value measurements.

The new guidance was effective for interim or annual periods beginning on or after December 15, 2011. The guidance should be applied prospectively and early application was not permitted.

The Corporation adopted this guidance on the first quarter of 2012. It has not had a material impact on the Corporation's consolidated financial statements as of September 30, 2012. Refer to Notes 22 and 23 for additional fair value disclosures included for the quarter and nine months ended September 30, 2012.

FASB Accounting Standards Update 2011-03, Transfers and Servicing (Topic 860): Reconsideration of Effective Control for Repurchase Agreements (ASU 2011-03)

The FASB issued ASU 2011-03 in April 2011. The amendment of this ASU affects all entities that enter into agreements to transfer financial assets that both entitle and obligate the transferor to repurchase or redeem the financial assets before their maturity. The ASU modifies the criteria for determining when these transactions would be accounted for as financings (secured borrowings / lending agreements) as opposed to sales (purchases) with commitments to repurchase (resell). This ASU does not affect other transfers of financial assets. ASC Topic 860 prescribes when an entity may or may not recognize a sale upon the transfer of financial assets subject to repurchase agreements. That determination is based, in part, on whether the entity has maintained effective control over transferred financial assets.

Specifically, the amendments in this ASU remove from the assessment of effective control (1) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (2) the requirement to demonstrate that the transferor possesses adequate collateral to fund substantially all the cost of purchasing replacement financial assets.

Table of Contents

The new guidance was effective for interim or annual periods beginning on or after December 15, 2011. The guidance should be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. Early application was not permitted.

The Corporation adopted this guidance on January 1, 2012. It has not had an impact on the Corporation's consolidated financial statements as of September 30, 2012.

Table of Contents

Note 3 Restrictions on cash and due from banks and certain securities

The Corporation's banking subsidiaries, BPPR and BPNA, are required by federal and state regulatory agencies to maintain average reserve balances with the Federal Reserve Bank of New York (the "Fed") or other banks. Those required average reserve balances amounted to \$900 million at September 30, 2012 (December 31, 2011 \$838 million). Cash and due from banks, as well as other short-term, highly liquid securities, are used to cover the required average reserve balances.

At September 30, 2012, the Corporation held \$38 million in restricted assets in the form of cash and funds deposited in money market accounts (December 31, 2011 \$36 million).

Table of Contents**Note 4 Pledged assets**

Certain securities and loans were pledged to secure public and trust deposits, assets sold under agreements to repurchase, other borrowings and credit facilities available, derivative positions, and loan servicing agreements. The classification and carrying amount of the Corporation's pledged assets, in which the secured parties are not permitted to sell or repledge the collateral, were as follows:

(In thousands)	September 30, 2012	December 31, 2011
Investment securities available-for-sale, at fair value	\$ 1,757,309	\$ 1,894,651
Investment securities held-to-maturity, at amortized cost	25,000	25,000
Loans held-for-sale measured at lower of cost or fair value	132	5,286
Loans held-in-portfolio covered under loss sharing agreements with the FDIC	476,061	
Loans held-in-portfolio not covered under loss sharing agreements with the FDIC	8,544,687	8,571,268
Total pledged assets	\$ 10,803,189	\$ 10,496,205

Pledged securities and loans that the creditor has the right by custom or contract to repledge are presented separately on the consolidated statements of financial condition.

At September 30, 2012, the Corporation had \$ 1.3 billion in investment securities available-for-sale and \$ 0.3 billion in loans that served as collateral to secure public funds (December 31, 2011 \$ 1.4 billion and \$ 0.4 billion, respectively).

At September 30, 2012, the Corporation's banking subsidiaries had short-term and long-term credit facilities authorized with the Federal Home Loan Bank system (the FHLB) aggregating to \$2.8 billion (December 31, 2011 \$2.0 billion). Refer to Note 14 to the consolidated financial statements for borrowings outstanding under these credit facilities. At September 30, 2012, the credit facilities authorized with the FHLB were collateralized by \$ 4.0 billion in loans held-in-portfolio (December 31, 2011 \$ 3.2 billion). Also, the Corporation's banking subsidiaries had a borrowing capacity at the Federal Reserve (Fed) discount window of \$4.4 billion (December 31, 2011 \$2.6 billion), which remained unused as of such date. The amount available under these credit facilities with the Fed is dependent upon the balance of loans and securities pledged as collateral. At September 30, 2012, the credit facilities with the Fed discount window were collateralized by \$ 4.7 billion in loans held-in-portfolio (December 31, 2011 \$ 4.0 billion). These pledged assets are included in the above table and were not reclassified and separately reported in the consolidated statements of financial condition.

In addition, at September 30, 2012 trades receivables from brokers and counterparties amounting to \$267 million were pledged to secure repurchase agreements (December 31, 2011 \$68 million).

Table of Contents**Note 5 Investment securities available-for-sale**

The following tables present the amortized cost, gross unrealized gains and losses, approximate fair value, weighted average yield and contractual maturities of investment securities available-for-sale.

Edgar Filing: POPULAR INC - Form 10-Q

The weighted average yield on investment securities available-for-sale is based on amortized cost; therefore, it does not give effect to changes in fair value.

Securities not due on a single contractual maturity date, such as mortgage-backed securities and collateralized mortgage obligations, are classified in the period of final contractual maturity. The expected maturities of collateralized mortgage obligations, mortgage-backed securities and certain other securities may differ from their contractual maturities because they may be subject to prepayments or may be called by the issuer.

Proceeds from the sale of investment securities available-for-sale for the nine months ended September 30, 2012 were \$ 8.0 million (September 30, 2011 \$ 35.1 million). Gross realized gains and losses on the sale of investment securities available-for-sale were as follows:

(In thousands)	For the quarter ended September 30,		Nine months ended September 30,	
	2012	2011	2012	2011
Gross realized gains	\$ 65	\$ 8,508	\$ 65	\$ 8,514
Gross realized losses	(1)	(34)	(350)	(130)
Net realized gains (losses) on sale of investment securities available-for-sale	\$ 64	\$ 8,474	\$ (285)	\$ 8,384

Table of Contents

Management evaluates investment securities for other-than-temporary (OTTI) declines in fair value on a quarterly basis. Once a decline in value is determined to be other-than-temporary, the value of a debt security is reduced and a corresponding charge to earnings is recognized for anticipated credit losses. Also, for equity securities that are considered other-than-temporarily impaired, the excess of the security's carrying value over its fair value at the evaluation date is accounted for as a loss in the results of operations. The OTTI analysis requires management to consider various factors, which include, but are not limited to: (1) the length of time and the extent to which fair value has been less than the amortized cost basis, (2) the financial condition of the issuer or issuers, (3) actual collateral attributes, (4) the payment structure of the debt security and the likelihood of the issuer being able to make payments, (5) any rating changes by a rating agency, (6) adverse conditions specifically related to the security, industry, or a geographic area, and (7) management's intent to sell the debt security or whether it is more likely than not that the Corporation would be required to sell the debt security before a forecasted recovery occurs.

At September 30, 2012, management performed its quarterly analysis of all debt securities in an unrealized loss position. Based on the analyses performed, management concluded that no individual debt security was other-than-temporarily impaired as of such date. At September 30, 2012, the Corporation did not have the intent to sell debt securities in an unrealized loss position and it is not more likely than not that the Corporation will have to sell the investment securities prior to recovery of their amortized cost basis. Also, management evaluated the Corporation's portfolio of equity securities at September 30, 2012. No other-than-temporary impairment losses on equity securities were recorded during the quarter and nine months ended September 30, 2012 (\$340 thousand recorded during the quarter and nine months ended September 30, 2011). Management has the intent and ability to hold the investments in equity securities that are at a loss position at September 30, 2012, for a reasonable period of time for a forecasted recovery of fair value up to (or beyond) the cost of these investments.

Table of Contents

The unrealized losses associated with Collateralized mortgage obligations private label (private-label CMO) are primarily related to securities backed by residential mortgages. In addition to verifying the credit ratings for the private-label CMOs, management analyzed the underlying mortgage loan collateral for these bonds. Various statistics or metrics were reviewed for each private-label CMO, including among others, the weighted average loan-to-value, FICO score, and delinquency and foreclosure rates of the underlying assets in the securities. At September 30, 2012, there were no sub-prime securities in the Corporation's private-label CMOs portfolios. For private-label CMOs with unrealized losses at September 30, 2012, credit impairment was assessed using a cash flow model that estimates the cash flows on the underlying mortgages, using the security-specific collateral and transaction structure. The model estimates cash flows from the underlying mortgage loans and distributes those cash flows to various tranches of securities, considering the transaction structure and any subordination and credit enhancements that exist in that structure. The cash flow model incorporates actual cash flows through the current period and then projects the expected cash flows using a number of assumptions, including default rates, loss severity and prepayment rates. Management's assessment also considered tests using more stressful parameters. Based on the assessments, management concluded that the tranches of the private-label CMOs held by the Corporation were not other-than-temporarily impaired at September 30, 2012, thus management expects to recover the amortized cost basis of the securities.

The following table states the name of issuers, and the aggregate amortized cost and fair value of the securities of such issuer (includes available-for-sale and held-to-maturity securities), in which the aggregate amortized cost of such securities exceeds 10% of stockholders' equity. This information excludes securities backed by the full faith and credit of the U.S. Government. Investments in obligations issued by a state of the U.S. and its political subdivisions and agencies, which are payable and secured by the same source of revenue or taxing authority, other than the U.S. Government, are considered securities of a single issuer.

Total investment securities held-to-maturity in an unrealized loss position	\$ 10,323	\$ 92	\$ 31,213	\$ 862	\$ 41,536	\$ 954

As indicated in Note 5 to these consolidated financial statements, management evaluates investment securities for OTTI declines in fair value on a quarterly basis.

The Obligations of Puerto Rico, States and political subdivisions classified as held-to-maturity at September 30, 2012 are primarily associated with securities issued by municipalities of Puerto Rico and are generally not rated by a credit rating agency. The Corporation performs periodic credit quality reviews on these issuers. The decline in fair value at September 30, 2012 was attributable to changes in interest rates and not credit quality, thus no other-than-temporary decline in value was necessary to be recorded in these held-to-maturity securities at September 30, 2012. At September 30, 2012, the Corporation does not have the intent to sell securities held-to-maturity and it is not more likely than not that the Corporation will have to sell these investment securities prior to recovery of their amortized cost basis.

Table of Contents**Note 7 Loans**

Covered loans acquired in the Westernbank FDIC-assisted transaction, except for lines of credit with revolving privileges, are accounted for by the Corporation in accordance with ASC Subtopic 310-30. Under ASC Subtopic 310-30, the acquired loans were aggregated into pools based on similar characteristics. Each loan pool is accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. The covered loans which are accounted for under ASC Subtopic 310-30 by the Corporation are not considered non-performing and will continue to have an accretible yield as long as there is a reasonable expectation about the timing and amount of cash flows expected to be collected. The Corporation measures additional losses for this portfolio when it is probable the Corporation will be unable to collect all cash flows expected at acquisition plus additional cash flows expected to be collected arising from changes in estimates after acquisition. Lines of credit with revolving privileges that were acquired as part of the Westernbank FDIC-assisted transaction are accounted for under the guidance of ASC Subtopic 310-20, which requires that any differences between the contractually required loan payment receivable in excess of the Corporation's initial investment in the loans be accreted into interest income. Loans accounted for under ASC Subtopic 310-20 are placed in non-accrual status when past due in accordance with the Corporation's non-accrual policy and any accretion of discount is discontinued.

The risks on loans acquired in the FDIC-assisted transaction are significantly different from the risks on loans not covered under the FDIC loss sharing agreements because of the loss protection provided by the FDIC. Accordingly, the Corporation presents loans subject to the loss sharing agreements as covered loans in the information below and loans that are not subject to the FDIC loss sharing agreements as non-covered loans.

For a summary of the accounting policy related to loans, interest recognition and allowance for loan losses refer to the summary of significant accounting policies included in Note 2 to the consolidated financial statements included in the 2011 Annual Report. Also, refer to Note 8 for a description of enhancements to the Corporation's methodology for determining the allowance for loan losses which were effective on March 31, 2012.

The following table presents the composition of non-covered loans held-in-portfolio (HIP), net of unearned income, at September 30, 2012 and December 31, 2011.

(In thousands)	Non-covered loans HIP at September 30, 2012	Non-covered loans HIP at December 31, 2011

The following table provides a breakdown of loans held-for-sale (LHFS) at September 30, 2012 and December 31, 2011 by main categories.

(In thousands)	Non-covered loans	
	September 30, 2012	December 31, 2011
Commercial	\$ 17,696	\$ 25,730
Construction	88,030	236,045
Legacy	3,107	468
Mortgage	228,216	100,850
Total	\$ 337,049	\$ 363,093

During the quarter and nine months ended September 30, 2012, the Corporation recorded purchases (including repurchases) of mortgage loans amounting to \$453 million and \$1.1 billion, respectively (September 30, 2011 \$177 million and \$1.1 billion, respectively). Also, the Corporation recorded purchases of \$230 million in consumer loans during the nine months ended September 30, 2012 (September 30, 2011 \$130 million). In addition, during the quarter and nine months ended September 30, 2012, the Corporation recorded purchases of construction loans amounting to \$0.1 million and \$1 million, respectively, and none during 2011. There were no purchases of commercial loans during the quarter and nine months ended September 30, 2012 and 2011.

The Corporation performed whole-loan sales involving approximately \$94 million and \$238 million of residential mortgage loans during the quarter and nine months ended September 30, 2012, respectively (September 30, 2011- \$39 million and \$309 million, respectively). Also, the Corporation securitized approximately \$ 181 million and \$ 576 million of mortgage loans into Government National Mortgage Association (GNMA) mortgage-backed securities during the quarter and nine months ended September 30, 2012, respectively (September 30, 2011 \$ 194 million and \$ 667 million, respectively). Furthermore, the Corporation securitized approximately \$ 107 million and \$ 238 million of mortgage loans into Federal National Mortgage Association (FNMA) mortgage-backed securities during the quarter and nine months ended September 30, 2012, respectively (September 30, 2011- \$ 42 million and \$ 163 million, respectively). Also, the Corporation securitized approximately \$ 20 million of mortgage loans into Federal Home Loan Mortgage Corporation (FHLMC) mortgage-backed securities during the quarter and nine months ended September 30, 2012. There were no securitizations into FHLMC for the quarter and nine months ended September 30, 2011. The Corporation sold commercial and construction loans with a book value of approximately \$9 million and \$48 million during the quarter and nine months ended September 30, 2012, respectively (September 30, 2011- \$13 million and \$27 million, respectively). In addition, during the third quarter of 2011, other construction and commercial loans held-for-sale with a combined book value of \$128 million were sold to a joint venture in which the Corporation holds minority interest.

Non-covered loans

The following tables present non-covered loans held-in-portfolio by loan class that are in non-performing status or are accruing interest but are past due 90 days or more at September 30, 2012 and December 31, 2011. Accruing loans past due 90 days or more consist primarily of credit cards, FHA / VA and other insured mortgage loans, and delinquent mortgage loans which are included in the Corporation's financial statements pursuant to GNMA's buy-back option program. Servicers of loans underlying GNMA mortgage-backed securities must report as their own assets the defaulted loans that they have the option (but not the obligation) to repurchase, even when they elect not to exercise that option. Also, accruing loans past due 90 days or more include

Table of Contents

residential conventional loans purchased from another financial institution that, although delinquent, the Corporation has received timely payment from the seller / servicer, and, in some instances, have partial guarantees under recourse agreements. However, residential conventional loans purchased from another financial institution, which are in the process of foreclosure, are classified as non-performing mortgage loans.

[1] Covered loans accounted for under ASC Subtopic 310-30 are excluded from the above table as they are considered to be performing due to the application of the accretion method, in which these loans will accrete interest income over the remaining life of the loans using estimated cash flow analyses.

The following tables present loans by past due status at September 30, 2012 and December 31, 2011 for covered loans held-in-portfolio. The information considers covered loans accounted for under ASC Subtopic 310-20 and ASC Subtopic 310-30.

Table of Contents

The carrying amount of the covered loans consisted of loans determined to be impaired at the time of acquisition, which are accounted for in accordance with ASC Subtopic 310-30 (credit impaired loans), and loans that were considered to be performing at the acquisition date, accounted for by analogy to ASC Subtopic 310-30 (non-credit impaired loans), as detailed in the following table.

(In thousands)	September 30, 2012			December 31, 2011		
	Covered loans ASC 310-30			Covered loans ASC 310-30		
	Non-credit impaired loans	Credit impaired loans	Total	Non-credit impaired loans	Credit impaired loans	Total

Allowance for loan losses	(64,015)	(39,532)	(103,547)	(62,951)	(20,526)	(83,477)
Carrying amount, net of allowance	\$ 3,092,899	\$ 430,763	\$ 3,523,662	\$ 3,383,500	\$ 569,494	\$ 3,952,994

The outstanding principal balance of covered loans accounted pursuant to ASC Subtopic 310-30, including amounts charged off by the Corporation, amounted to \$5.1 billion at September 30, 2012 (December 31, 2011 \$6.0 billion). At September 30, 2012, none of the acquired loans from the Westernbank FDIC-assisted transaction accounted for under ASC Subtopic 310-30 were considered non-performing loans. Therefore, interest income, through accretion of the difference between the carrying amount of the loans and the expected cash flows, was recognized on all acquired loans.

Changes in the carrying amount and the accretible yield for the covered loans accounted pursuant to the ASC Subtopic 310-30, for the quarters ended September 30, 2012 and 2011, were as follows:

(In thousands)	Activity in the accretible discount Covered loans ASC 310-30

The Corporation accounts for lines of credit with revolving privileges under the accounting guidance of ASC Subtopic 310-20. Covered loans accounted for under ASC Subtopic 310-20 amounted to \$0.3 billion at September 30, 2012 (September 30, 2011 \$0.4 billion).

Table of Contents
Note 8 Allowance for loan losses

The Corporation's assessment of the allowance for loan losses is determined in accordance with the guidance of loss contingencies in ASC Subtopic 450-20 and loan impairment guidance in ASC Section 310-10-35.

The accounting guidance provides for the recognition of a loss allowance for groups of homogeneous loans. The determination for general reserves of the allowance for loan losses includes the following principal factors:

Historical net loss rates (including losses from impaired loans) by loan type and by legal entity adjusted for recent net charge-off trends and environmental factors. The base net loss rates are based on the moving average of annualized net charge-offs computed over a 36-month historical loss window for the commercial, construction and legacy loan portfolios, and an 18-month period for the consumer and mortgage loan portfolios.

Net charge-off trend factors are applied to adjust the base loss rates based on recent loss trends. The Corporation applies a trend factor when base losses are below recent loss trends. Currently, the trend factor is based on the last 12 months of losses for the commercial, construction and legacy loan portfolios and 6 months of losses for the consumer and mortgage loan portfolios. The trend factor accounts for inherent imprecision and the lagging perspective in base loss rates. The trend factor replaces the base-loss period when it is higher than base loss up to a determined cap.

Environmental factors, which include credit and macroeconomic indicators such as employment, price index and construction permits, were adopted to account for current market conditions that are likely to cause estimated credit losses to differ from historical losses. The Corporation reflects the effect of these environmental factors on each loan group as an adjustment that, as appropriate, increases or decreases the historical loss rate applied to each group. Environmental factors provide updated perspective on credit and economic conditions. Correlation and regression analyses are used to select and weight these indicators.

During the first quarter of 2012, in order to better reflect current market conditions, management revised the estimation process for evaluating the adequacy of the general reserve component of the allowance for loan losses for the Corporation's commercial and construction loan portfolios. The change in the methodology is described in the paragraphs below. The net effect of these changes amounted to a \$24.8 million reduction in the Corporation's allowance for loan losses, resulting from a reduction of \$40.5 million due to the enhancements to the allowance for loan losses methodology, offset in part by a \$15.7 million increase in environmental factor reserves due to the Corporation's decision to monitor recent trends in its commercial loan portfolio at the BPPR reportable segment that although improving, continue to warrant additional scrutiny.

Management made the following principal changes to the methodology during the first quarter of 2012:

Established a more granular stratification of the commercial loan portfolios to enhance the homogeneity of the loan classes.

Previously, the Corporation used loan groupings for commercial loan portfolios based on business lines and collateral types (secured / unsecured loans). As part of the loan segregation, management evaluated the risk profiles of the loan portfolio, recent and historical credit and loss trends, current and expected portfolio behavior and economic indicators. The revised groupings consider product types (construction, commercial multifamily, commercial & industrial, non-owner occupied commercial real estate (CRE) and owner occupied CRE) and business lines for each of the Corporation's reportable segments, BPPR and BPNA. In addition, the Corporation established a legacy portfolio at the BPNA reportable segment, comprised of commercial loans, construction loans and commercial lease financings related to certain lending products exited by the Corporation as part of restructuring efforts carried out in prior years. The refinement in the loan groupings resulted in a decrease to the allowance for loan losses of \$7.9 million at March 31, 2012, which consisted of a \$9.7 million reduction related to the BPNA reportable segment, partially offset by an increase of \$1.8 million related to the BPPR reportable segment.

Increased the historical look-back period for determining the loss trend factor. The Corporation increased the look-back period for assessing recent trends applicable to the determination of commercial, construction and legacy loan net charge-offs from 6 months to

Edgar Filing: POPULAR INC - Form 10-Q

12 months.

Previously, the Corporation used a trend factor based on 6 months of net charge-offs as it aligned the estimation of inherent losses for the Corporation's commercial and construction loan portfolios with deteriorating trends.

Given the current overall commercial and construction credit quality improvements noted on recent periods in terms of loss trends, non-performing loan balances and non-performing loan inflows, management concluded that a 12-month look-back period for the trend factor aligns the Corporation's allowance for loan losses methodology to current credit quality trends.

Table of Contents

The increase in the historical look-back period for determining the loss trend factor resulted in a decrease to the allowance for loan losses of \$28.1 million at March 31, 2012, of which \$24.0 million related to the BPPR reportable segment and \$4.1 million to the BPNA reportable segment.

There were additional enhancements to the allowance for loan losses methodology which accounted for a reduction to the allowance for loan losses of \$4.5 million at March 31, 2012, of which \$3.9 million related to the BPNA reportable segment and \$0.6 million to the BPPR reportable segment. This reduction related to loan portfolios with minimal or zero loss history.

There were no changes in the methodology for environmental factor reserves. There were no changes to the allowance for loan losses methodology for the Corporation's consumer and mortgage loan portfolios during the first quarter of 2012.

The following tables present the activity in the allowance for loan losses by portfolio segment for the quarters and nine months ended September 30, 2012 and 2011.

Modifications

Troubled debt restructurings related to non-covered loan portfolios amounted to \$1.0 billion at September 30, 2012 (December 31, 2011 \$881 million). The amount of outstanding commitments to lend additional funds to debtors owing receivables whose terms have been modified in troubled debt restructurings amounted to \$21 thousand related to the construction loan portfolio and \$3 million related to the commercial loan portfolio at September 30, 2012 (December 31, 2011 \$152 thousand and \$3 million, respectively).

A modification of a loan constitutes a troubled debt restructuring (TDR) when a borrower is experiencing financial difficulty and the modification constitutes a concession.

Edgar Filing: POPULAR INC - Form 10-Q

Commercial and industrial loans modified in a TDR often involve temporary interest-only payments, term extensions, and converting evergreen revolving credit lines to long-term loans. Commercial real estate (CRE), which includes multifamily, owner-occupied and non-owner occupied CRE, and construction loans modified in a TDR often involve reducing the interest rate for a limited period of time or the remaining term of the loan, extending the maturity date at an interest rate lower than the current market rate for new debt with similar risk, or reductions in the payment plan. Construction loans modified in a TDR may also involve extending the interest-only payment period.

Table of Contents

Residential mortgage loans modified in a TDR are primarily comprised of loans where monthly payments are lowered to accommodate the borrowers' financial needs for a period of time, normally five years to ten years. After the lowered monthly payment period ends, the borrower reverts back to paying principal and interest per the original terms with the maturity date adjusted accordingly.

Home equity modifications are made infrequently and are not offered if the Corporation also holds the first mortgage. Home equity modifications are uniquely designed to meet the specific needs of each borrower. Automobile loans modified in a TDR are primarily comprised of loans where the Corporation has lowered monthly payments by extending the term. Credit cards modified in a TDR are primarily comprised of loans where monthly payments are lowered to accommodate the borrowers' financial needs for a period of time, normally up to 24 months.

Loans modified in a TDR that are not accounted pursuant to ASC 310-30 are typically already in non-accrual status at the time of the modification and partial charge-offs have in some cases already been taken against the outstanding loan balance. The TDR loan continues in non-accrual status until the borrower has demonstrated a willingness and ability to make the restructured loan payments (generally at least six months of sustained performance after the modification (or one year for loans providing for quarterly or semi-annual payments)) and management has concluded that it is probable that the borrower would not be in payment default in the foreseeable future.

Loans modified in a TDR may have the financial effect to the Corporation of increasing the specific allowance for loan losses associated with the loan. Consumer and residential mortgage loans modified under the Corporation's loss mitigation programs that are determined to be TDRs are individually evaluated for impairment based on an analysis of discounted cash flows.

For consumer and mortgage loans that are modified with regard to payment terms and which constitute TDRs, the discounted cash flow value method is used as the impairment valuation is more appropriately calculated based on the ongoing cash flow from the individuals rather than the liquidation of the asset. The computations give consideration to probability of defaults and loss-given-foreclosure on the related estimated cash flows.

Commercial and construction loans that have been modified as part of loss mitigation efforts are evaluated individually for impairment. The vast majority of the Corporation's modified commercial loans are measured for impairment using the estimated fair value of the collateral, as these are normally considered as collateral dependent loans. In very few instances, the Corporation measures modified commercial loans at their estimated realizable values determined by discounting the expected future cash flows. Construction loans that have been modified are also accounted for as collateral dependent loans. The Corporation determines the fair value measurement dependent upon its exit strategy for the particular asset(s) acquired in foreclosure.

The following tables present the loan count by type of modification for those loans modified in a TDR during the quarter and nine months ended September 30, 2012 and 2011.

Four loans comprising a recorded investment of approximately \$27 million were restructured into multiple notes (Note A / B split) during the quarter ended September 30, 2012. The Corporation recorded approximately \$7.0 million in loan charge-offs as part of the loan restructurings. The renegotiations of these loans were made after analyzing the borrowers' capacity to repay the debt, collateral and ability to perform under the modified terms. The recorded investment on these commercial TDRs amounted to approximately \$21 million at September 30, 2012 with a related allowance for loan losses amounting to approximately \$357 thousand.

The following tables present by class, TDRs that were subject to payment default and that had been modified as a TDR during the twelve months preceding the default date. Payment default is defined as a restructured loan becoming 90 days past due after being modified, foreclosed or charged-off, whichever occurs first. The recorded investment at September 30, 2012 is inclusive of all partial paydowns and charge-offs since modification date. Loans modified as a TDR that were fully paid down, charged-off or foreclosed upon by period end are not reported.

Commercial, consumer and mortgage loans modified in a TDR are closely monitored for delinquency as an early indicator of possible future default. If loans modified in a TDR subsequently default, the Corporation evaluates the loan for possible further impairment. The allowance for loan losses may be increased or partial charge-offs may be taken to further write-down the carrying value of the loan.

Credit Quality

The Corporation has defined a dual risk rating system to assign a rating to all credit exposures, particularly for the commercial and construction loan portfolios. Risk ratings in the aggregate provide the Corporation's management the asset quality profile for the loan portfolio. The dual risk rating system provides for the assignment of ratings at the obligor level based on the financial condition of the borrower, and at the credit facility level based on the collateral supporting the transaction. The Corporation's consumer and mortgage loans are not subject to the dual risk rating system. Consumer and mortgage loans are classified substandard or loss based on their delinquency status. All other consumer and mortgage loans that are not classified as substandard or loss would be considered unrated.

The Corporation's obligor risk rating scales range from rating 1 (Excellent) to rating 14 (Loss). The obligor risk rating reflects the risk of payment default of a borrower in the ordinary course of business.

Pass Credit Classifications:

Edgar Filing: POPULAR INC - Form 10-Q

Pass (Scales 1 through 8) Loans classified as pass have a well defined primary source of repayment very likely to be sufficient, with no apparent risk, strong financial position, minimal operating risk, profitability, liquidity and capitalization better than industry standards.

Watch (Scale 9) Loans classified as watch have acceptable business credit, but borrower's operations, cash flow or financial condition evidence more than average risk, requires above average levels of supervision and attention from Loan Officers.

Special Mention (Scale 10) Loans classified as special mention have potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the Corporation's credit position at some future date.

Table of ContentsAdversely Classified Classifications:

Substandard (Scales 11 and 12) Loans classified as substandard are deemed to be inadequately protected by the current net worth and payment capacity of the obligor or of the collateral pledged, if any. Loans classified as such have well-defined weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful (Scale 13) Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the additional characteristic that the weaknesses make the collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loss (Scale 14) Uncollectible and of such little value that continuance as a bankable asset is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this asset even though partial recovery may be effected in the future.

Risk ratings scales 10 through 14 conform to regulatory ratings. The assignment of the obligor risk rating is based on relevant information about the ability of borrowers to service their debts such as current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors.

The Corporation periodically reviews loans classified as watch list or worse, to evaluate if they are properly classified, and to determine impairment, if any. The frequency of these reviews will depend on the amount of the aggregate outstanding debt, and the risk rating classification of the obligor. In addition, during the renewal process of applicable credit facilities, the Corporation evaluates the corresponding loan grades.

Loans classified as pass credits are excluded from the scope of the review process described above until: (a) they become past due; (b) management becomes aware of deterioration in the creditworthiness of the borrower; or (c) the customer contacts the Corporation for a modification. In these circumstances, the credit facilities are specifically evaluated to assign the appropriate risk rating classification.

The Corporation has a Credit Process Review Group within the Corporate Credit Risk Management Division (CCRMD), which performs annual comprehensive credit process reviews of several middle markets, construction, asset-based and corporate banking lending groups in BPPR. This group evaluates the credit risk profile of each originating unit along with each unit's credit administration effectiveness, including the assessment of the risk rating representative of the current credit quality of the loans, and the evaluation of collateral documentation. The monitoring performed by this group contributes to assess compliance with credit policies and underwriting standards, determine the current level of credit risk, evaluate the effectiveness of the credit management process and identify control deficiencies that may arise in the credit-granting process. Based on its findings, the Credit Process Review Group recommends corrective actions, if necessary, that help in maintaining a sound credit process. CCRMD has contracted an outside loan review firm to perform the credit process reviews for the portfolios of commercial and construction loans in the U.S. mainland operations. The CCRMD participates in defining the review plan with the outside loan review firm and actively participates in the discussions of the results of the loan reviews with the business units. The CCRMD may periodically review the work performed by the outside loan review firm. CCRMD reports the results of the credit process reviews to the Risk Management Committee of the Corporation's Board of Directors.

The following table presents the outstanding balance, net of unearned income, of non-covered loans held-in-portfolio based on the Corporation's assignment of obligor risk ratings as defined at September 30, 2012 and December 31, 2011.

Total Commercial	11.35	6.99
Construction	11.78	7.52
Legacy	11.45	7.47

[1] Excludes covered loans acquired in the Westernbank FDIC-assisted transaction.

Table of Contents**Note 9 FDIC loss share asset and true-up payment obligation**

In connection with the Westernbank FDIC-assisted transaction, BPPR entered into loss share agreements with the FDIC with respect to the covered loans and other real estate owned. Pursuant to the terms of the loss share agreements, the FDIC's obligation to reimburse BPPR for losses with respect to covered assets begins with the first dollar of loss incurred. The FDIC reimburses BPPR for 80% of losses with respect to covered assets, and BPPR reimburses the FDIC for 80% of recoveries with respect to losses for which the FDIC paid BPPR 80% reimbursement under the loss share agreements. The loss share agreement applicable to single-family residential mortgage loans provides for FDIC loss and recoveries sharing for ten years expiring in April 2020. The loss share agreement applicable to commercial (including construction) and consumer loans provides for FDIC loss sharing for five years expiring in April 2015 and BPPR reimbursement to the FDIC for eight years expiring in April 2018, in each case, on the same terms and conditions as described above.

The following table sets forth the activity in the FDIC loss share asset for the periods presented.

(In thousands)	Nine months ended September 30,	
	2012	2011
Balance at beginning of year	\$ 1,915,128	\$ 2,410,219
(Amortization) accretion of loss share indemnification asset, net	(95,972)	13,361
Credit impairment losses to be covered under loss sharing agreements	60,943	71,787
Decrease due to reciprocal accounting on the discount accretion for loans and unfunded commitments accounted for under ASC Subtopic 310-20	(744)	(32,919)
Payments received from FDIC under loss sharing agreements	(327,739)	(561,111)
Other adjustments attributable to FDIC loss sharing agreements	7,441	(6,278)
Balance at end of period	\$ 1,559,057	\$ 1,895,059

As part of the loss share agreements, BPPR has to make a true-up payment to the FDIC on the date that is 45 days following the last day (such day, the true-up measurement date) of the final shared-loss month, or upon the final disposition of all covered assets under the loss share agreements, in the event losses on the loss share agreements fail to reach expected levels. The estimated fair value of such true-up payment obligation is recorded as contingent consideration, which is included in the caption of other liabilities in the consolidated statements of financial condition. Under the loss sharing agreements, BPPR will pay to the FDIC 50% of the excess, if any, of: (i) 20% of the intrinsic loss estimate of \$4.6 billion (or \$925 million) (as determined by the FDIC) less (ii) the sum of: (A) 25% of the asset discount (per bid) (or \$1.1 billion); plus (B) 25% of the cumulative shared-loss payments (defined as the aggregate of all of the payments made or payable to BPPR minus the aggregate of all of the payments made or payable to the FDIC); plus (C) the sum of the period servicing amounts for every consecutive twelve-month period prior to and ending on the true-up measurement date in respect of each of the loss sharing agreements during which the loss sharing provisions of the applicable loss sharing agreement is in effect (defined as the product of the simple average of the principal amount of shared loss loans and shared loss assets at the beginning and end of such period times 1%).

The following table provides the fair value and the undiscounted amount of the true-up payment obligation at September 30, 2012 and December 31, 2011.

(In thousands)	September 30, 2012	December 31, 2011
Carrying amount (fair value)	\$ 103,189	\$ 98,340
Undiscounted amount ¹¹	\$ 171,654	\$ 170,973

Edgar Filing: POPULAR INC - Form 10-Q

[1] Increase from December 31, 2011 was due to changes in expected cash flows on the covered assets.

The loss share agreements contain specific terms and conditions regarding the management of the covered assets that BPPR must follow in order to receive reimbursement on losses from the FDIC. Under the loss share agreements, BPPR must:

manage and administer the covered assets and collect and effect charge-offs and recoveries with respect to such covered assets in a manner consistent with its usual and prudent business and banking practices and, with respect to single family shared-loss loans, the procedures (including collection procedures) customarily employed by BPPR in servicing and administering mortgage loans for its own account and the servicing procedures established by FNMA or the Federal Home Loan Mortgage Corporation (FHLMC), as in effect from time to time, and in accordance with accepted mortgage servicing practices of prudent lending institutions;

Table of Contents

exercise its best judgment in managing, administering and collecting amounts on covered assets and effecting charge-offs with respect to the covered assets;

use commercially reasonable efforts to maximize recoveries with respect to losses on single family shared-loss assets and best efforts to maximize collections with respect to commercial shared-loss assets;

retain sufficient staff to perform the duties under the loss share agreements;

adopt and implement accounting, reporting, record-keeping and similar systems with respect to the commercial shared-loss assets;

comply with the terms of the modification guidelines approved by the FDIC or another federal agency for any single-family shared-loss loan;

provide notice with respect to proposed transactions pursuant to which a third party or affiliate will manage, administer or collect any commercial shared-loss assets;

file monthly and quarterly certificates with the FDIC specifying the amount of losses, charge-offs and recoveries; and

maintain books and records sufficient to ensure and document compliance with the terms of the loss share agreements.

Note 10 Transfers of financial assets and mortgage servicing assets

The Corporation typically transfers conforming residential mortgage loans in conjunction with GNMA, FNMA and FHLMC securitization transactions whereby the loans are exchanged for cash or securities and servicing rights. The securities issued through these transactions are guaranteed by the corresponding agency and, as such, under seller/service agreements the Corporation is required to service the loans in accordance with the agencies' servicing guidelines and standards. Substantially all mortgage loans securitized by the Corporation in GNMA, FNMA and FHLMC securities have fixed rates and represent conforming loans. As seller, the Corporation has made certain representations and warranties with respect to the originally transferred loans and, in some instances, has sold loans with credit recourse to a government-sponsored entity, namely FNMA. Refer to Note 18 to the consolidated financial statements for a description of such arrangements.

No liabilities were incurred as a result of these securitizations during the quarters and nine months ended September 30, 2012 and 2011 because they did not contain any credit recourse arrangements. During the quarter ended September 30, 2012, the Corporation recorded a net gain \$18.0 million (September 30, 2011 \$1.6 million) related to the residential mortgage loans securitized. During the nine months ended September 30, 2012, the Corporation recorded a net gain \$45.6 million (September 30, 2011 \$12.0 million) related to the residential mortgage loans securitized.

The following tables present the initial fair value of the assets obtained as proceeds from residential mortgage loans securitized during the quarters and nine months ended September 30, 2012 and 2011:

During the nine months ended September 30, 2012, the Corporation retained servicing rights on whole loan sales involving approximately \$196 million in principal balance outstanding (September 30, 2011 \$84 million), with realized gains of approximately \$8.9 million (September 30, 2011 gains of \$1.7 million). All loan sales performed during the nine months ended September 30, 2012 and 2011 were without credit recourse agreements.

The Corporation recognizes as assets the rights to service loans for others, whether these rights are purchased or result from asset transfers such as sales and securitizations.

Classes of mortgage servicing rights were determined based on the different markets or types of assets being serviced. The Corporation recognizes the servicing rights of its banking subsidiaries that are related to residential mortgage loans as a class of servicing rights. These mortgage servicing rights (MSRs) are measured at fair value. Fair value determination is performed on a subsidiary basis, with assumptions varying in accordance with the types of assets or markets served.

The Corporation uses a discounted cash flow model to estimate the fair value of MSRs. The discounted cash flow model incorporates assumptions that market participants would use in estimating future net servicing income, including estimates of prepayment speeds, discount rate, cost to service, escrow account earnings, contractual servicing fee income, prepayment and late fees, among other considerations. Prepayment speeds are adjusted for the Corporation's loan characteristics and portfolio behavior.

The following table presents the changes in MSRs measured using the fair value method for the nine months ended September 30, 2012 and 2011.

Table of Contents

(In thousands)	Residential MSR	
	September 30, 2012	September 30, 2011
Fair value at beginning of period	\$ 151,323	\$ 166,907
Purchases	1,620	1,251
Servicing from securitizations or asset transfers	12,842	15,651
Sale of servicing assets	(103)	
Changes due to payments on loans ^[1]	(14,262)	(9,770)
Reduction due to loan repurchases	(3,961)	(2,727)
Changes in fair value due to changes in valuation model inputs or assumptions	11,006	(13,876)
Other disposals	(98)	(210)
Fair value at end of period	\$ 158,367	\$ 157,226

[1] Represents the change due to collection / realization of expected cash flow over time.

Residential mortgage loans serviced for others were \$16.8 billion at September 30, 2012 (December 31, 2011 \$17.3 billion; September 30, 2011 \$17.4 billion).

Net mortgage servicing fees, a component of other service fees in the consolidated statements of operations, include the changes from period to period in the fair value of the MSR, including changes due to collection / realization of expected cash flows. Mortgage servicing fees, excluding fair value adjustments, for the quarter and nine months ended September 30, 2012 amounted to \$12.2 million and \$36.3 million, respectively (September 30, 2011 \$12.2 million and \$37.0 million, respectively). The banking subsidiaries receive servicing fees based on a percentage of the outstanding loan balance. At September 30, 2012, those weighted average mortgage servicing fees were 0.28% (September 30, 2011 0.27%). Under these servicing agreements, the banking subsidiaries do not generally earn significant prepayment penalty fees on the underlying loans serviced.

The section below includes information on assumptions used in the valuation model of the MSR, originated and purchased.

Key economic assumptions used in measuring the servicing rights derived from loans securitized or sold by the Corporation during the quarters and nine months ended September 30, 2012 and 2011 were as follows:

	Quarter ended		Nine months ended	
	September 30, 2012	September 30, 2011	September 30, 2012	September 30, 2011
Prepayment speed	6.4 %	6.3 %	6.2 %	5.4 %
Weighted average life	15.6 years	15.8 years	16.2 years	18.6 years
Discount rate (annual rate)	11.3 %	11.6 %	11.4 %	11.5 %

Key economic assumptions used to estimate the fair value of MSR derived from sales and securitizations of mortgage loans performed by the banking subsidiaries and the sensitivity to immediate changes in those assumptions were as follows as of the end of the periods reported:

(In thousands)	Originated MSR		
	September 30, 2012	December 31, 2011	September 30, 2011
Fair value of servicing rights	\$ 105,836	\$ 99,280	\$ 99,901
Weighted average life	11.3 years	13.0 years	10.6 years
Weighted average prepayment speed (annual rate)	8.9 %	7.7 %	9.4 %
Impact on fair value of 10% adverse change	\$ (3,206)	\$ (2,744)	\$ (3,724)
	\$ (6,634)	\$ (5,800)	\$ (7,331)

Edgar Filing: POPULAR INC - Form 10-Q

Impact on fair value of 20% adverse change				
Weighted average discount rate (annual rate)	12.4 %	12.6 %	12.6 %	
Impact on fair value of 10% adverse change	\$ (4,255)	\$ (3,913)	\$ (4,177)	
Impact on fair value of 20% adverse change	\$ (8,654)	\$ (7,948)	\$ (8,123)	

Table of Contents

The banking subsidiaries also own servicing rights purchased from other financial institutions. The fair value of purchased MSR's, their related valuation assumptions and the sensitivity to immediate changes in those assumptions were as follows as of the end of the periods reported:

(In thousands)	Purchased MSR's		
	September 30, 2012	December 31, 2011	September 30, 2011
Fair value of servicing rights	\$ 52,531	\$ 52,043	\$ 57,325
Weighted average life	12.0 years	14.6 years	10.9 years
Weighted average prepayment speed (annual rate)	8.3 %	6.9 %	9.2 %
Impact on fair value of 10% adverse change	\$ (2,027)	\$ (1,887)	\$ (2,458)
Impact on fair value of 20% adverse change	\$ (3,624)	\$ (3,303)	\$ (4,401)
Weighted average discount rate (annual rate)	11.4 %	11.4 %	11.4 %
Impact on fair value of 10% adverse change	\$ (2,349)	\$ (2,376)	\$ (2,550)
Impact on fair value of 20% adverse change	\$ (4,214)	\$ (4,214)	\$ (4,552)

The sensitivity analyses presented in the tables above for servicing rights are hypothetical and should be used with caution. As the figures indicate, changes in fair value based on a 10 and 20 percent variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in the sensitivity tables included herein, the effect of a variation in a particular assumption on the fair value of the retained interest is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

At September 30, 2012, the Corporation serviced \$3.1 billion (December 31, 2011 \$3.5 billion; September 30, 2011 \$3.6 billion) in residential mortgage loans with credit recourse to the Corporation.

Under the GNMA securitizations, the Corporation, as servicer, has the right to repurchase (but not the obligation), at its option and without GNMA's prior authorization, any loan that is collateral for a GNMA guaranteed mortgage-backed security when certain delinquency criteria are met. At the time that individual loans meet GNMA's specified delinquency criteria and are eligible for repurchase, the Corporation is deemed to have regained effective control over these loans if the Corporation was the pool issuer. At September 30, 2012, the Corporation had recorded \$70 million in mortgage loans on its consolidated statements of financial condition related to this buy-back option program (December 31, 2011 \$180 million; September 30, 2011 \$163 million). As long as the Corporation continues to service the loans that continue to be collateral in a GNMA guaranteed mortgage-backed security, the MSR is recognized by the Corporation. During the quarter ended September 30, 2012, the Corporation repurchased approximately \$184 million of mortgage loans under the GNMA buy-back option program. The determination to repurchase these loans was based on the economic benefits of the transaction, which results in a reduction of the servicing costs for these severely delinquent loans, mostly related to principal and interest advances. Furthermore, due to their guaranteed nature, the risk associated with the loans is minimal. The Corporation places these loans under its loss mitigation programs and once brought back to current status, these may be either retained in portfolio or re-sold in the secondary market.

Table of Contents**Note 11 Other assets**

The caption of other assets in the consolidated statements of financial condition consists of the following major categories:

(In thousands)	September 30, 2012	December 31, 2011
Net deferred tax assets (net of valuation allowance)	\$ 545,859	\$ 429,691
Investments under the equity method	218,045	313,152
Bank-owned life insurance program	232,499	238,077
Prepaid FDIC insurance assessment	30,053	58,082
Prepaid taxes	99,500	17,441
Other prepaid expenses	60,841	59,894
Derivative assets	49,879	61,886
Trades receivables from brokers and counterparties	287,322	69,535
Others	200,929	214,635
Total other assets	\$ 1,724,927	\$ 1,462,393

Note 12 Goodwill and other intangible assets

The changes in the carrying amount of goodwill for the nine months ended September 30, 2012 and 2011, allocated by reportable segments, were as follows (refer to Note 31 for the definition of the Corporation's reportable segments):

(In thousands)	2012				Balance at September 30, 2012
	Balance at January 1, 2012	Goodwill on acquisition	Purchase accounting adjustments	Other	
Banco Popular de Puerto Rico	\$ 246,272	\$	\$ (439)	\$ (154)	\$ 245,679
Banco Popular North America	402,078				402,078
Total Popular, Inc.	\$ 648,350	\$	\$ (439)	\$ (154)	\$ 647,757

(In thousands)	2011				Balance at September 30, 2011
	Balance at January 1, 2011	Goodwill on acquisition	Purchase accounting adjustments	Other	
Banco Popular de Puerto Rico	\$ 245,309	\$ 1,035	\$ (69)	\$	\$ 246,275
Banco Popular North America	402,078				402,078
Total Popular, Inc.	\$ 647,387	\$ 1,035	\$ (69)	\$	\$ 648,353

Purchase accounting adjustments consists of adjustments to the value of the assets acquired and liabilities assumed resulting from the completion of appraisals or other valuations, adjustments to initial estimates recorded for transaction costs, if any, and contingent consideration paid during a contractual contingency period.

The following table presents the gross amount of goodwill and accumulated impairment losses by reportable segments.

Edgar Filing: POPULAR INC - Form 10-Q

At September 30, 2012 and December 31, 2011, the Corporation had \$ 6 million of identifiable intangible assets, with indefinite useful lives, mostly associated with E-LOAN s trademark.

The following table reflects the components of other intangible assets subject to amortization:

(In thousands)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Value
September 30, 2012			
Core deposits	\$ 77,885	\$ 41,599	\$ 36,286
Other customer relationships	16,835	2,542	14,293
Other intangibles	135	65	70
Total other intangible assets	\$ 94,855	\$ 44,206	\$ 50,649
December 31, 2011			
Core deposits	\$ 80,591	\$ 38,199	\$ 42,392
Other customer relationships	19,953	4,643	15,310
Other intangibles	242	103	139
Total other intangible assets	\$ 100,786	\$ 42,945	\$ 57,841

Certain core deposits and other customer relationships intangibles with a gross amount of \$3 million and \$4 million, respectively, became fully amortized during the nine months ended September 30, 2012, and, as such, their gross amount and accumulated amortization were eliminated from the tabular disclosure presented above.

During the quarter ended September 30, 2012, the Corporation recognized \$ 2.5 million in amortization expense related to other intangible assets with definite useful lives (September 30, 2011 \$ 2.5 million). During the nine months ended September 30, 2012, the Corporation recognized \$ 7.6 million in amortization related to other intangible assets with definite useful lives (September 30, 2011 \$ 7.0 million).

Table of Contents

The following table presents the estimated amortization of the intangible assets with definite useful lives for each of the following periods:

(In thousands)	
Remaining 2012	\$ 2,468
Year 2013	9,871
Year 2014	9,227
Year 2015	7,084
Year 2016	6,799
Year 2017	4,050

Results of the Goodwill Impairment Test

The Corporation's goodwill and other identifiable intangible assets having an indefinite useful life are tested for impairment. Intangibles with indefinite lives are evaluated for impairment at least annually and on a more frequent basis if events or circumstances indicate impairment could have taken place. Such events could include, among others, a significant adverse change in the business climate, an adverse action by a regulator, an unanticipated change in the competitive environment and a decision to change the operations or dispose of a reporting unit.

Under applicable accounting standards, goodwill impairment analysis is a two-step test. The first step of the goodwill impairment test involves comparing the fair value of the reporting unit with its carrying amount, including goodwill. If the fair value of the reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not impaired; however, if the carrying amount of the reporting unit exceeds its fair value, the second step must be performed. The second step involves calculating an implied fair value of goodwill for each reporting unit for which the first step indicated possible impairment. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination, which is the excess of the fair value of the reporting unit, as determined in the first step, over the aggregate fair values of the individual assets, liabilities and identifiable intangibles (including any unrecognized intangible assets, such as unrecognized core deposits and trademark) as if the reporting unit was being acquired in a business combination and the fair value of the reporting unit was the price paid to acquire the reporting unit. The Corporation estimates the fair values of the assets and liabilities of a reporting unit, consistent with the requirements of the fair value measurements accounting standard, which defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of the assets and liabilities reflects market conditions, thus volatility in prices could have a material impact on the determination of the implied fair value of the reporting unit goodwill at the impairment test date. The adjustments to measure the assets, liabilities and intangibles at fair value are for the purpose of measuring the implied fair value of goodwill and such adjustments are not reflected in the consolidated statement of condition. If the implied fair value of goodwill exceeds the goodwill assigned to the reporting unit, there is no impairment. If the goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment charge is recorded for the excess. An impairment loss recognized cannot exceed the amount of goodwill assigned to a reporting unit, and the loss establishes a new basis in the goodwill. Subsequent reversal of goodwill impairment losses is not permitted under applicable accounting standards.

The Corporation performed the annual goodwill impairment evaluation for the entire organization during the third quarter of 2012 using July 31, 2012 as the annual evaluation date. The reporting units utilized for this evaluation were those that are one level below the business segments, which are the legal entities within the reportable segment. The Corporation follows push-down accounting, as such all goodwill is assigned to the reporting units when carrying out a business combination.

In determining the fair value of a reporting unit, the Corporation generally uses a combination of methods, including market price multiples of comparable companies and transactions, as well as discounted cash flow analysis. Management evaluates the particular circumstances of each reporting unit in order to determine the most appropriate valuation methodology. The Corporation evaluates the results obtained under each valuation methodology to identify and understand the key value drivers in order to ascertain that the results obtained are reasonable and appropriate under the circumstances. Elements considered include current market and economic conditions, developments in specific lines of business, and any particular features in the individual reporting units.

Table of Contents

The computations require management to make estimates and assumptions. Critical assumptions that are used as part of these evaluations include:

a selection of comparable publicly traded companies, based on nature of business, location and size;

a selection of comparable acquisition and capital raising transactions;

the discount rate applied to future earnings, based on an estimate of the cost of equity;

the potential future earnings of the reporting unit; and

the market growth and new business assumptions.

For purposes of the market comparable approach, valuations were determined by calculating average price multiples of relevant value drivers from a group of companies that are comparable to the reporting unit being analyzed and applying those price multiples to the value drivers of the reporting unit. Multiples used are minority based multiples and thus, no control premium adjustment is made to the comparable companies market multiples. While the market price multiple is not an assumption, a presumption that it provides an indicator of the value of the reporting unit is inherent in the valuation. The determination of the market comparables also involves a degree of judgment.

For purposes of the discounted cash flows (DCF) approach, the valuation is based on estimated future cash flows. The financial projections used in the DCF valuation analysis for each reporting unit are based on the most recent (as of the valuation date) financial projections presented to the Corporation's Asset / Liability Management Committee (ALCO). The growth assumptions included in these projections are based on management's expectations for each reporting unit's financial prospects considering economic and industry conditions as well as particular plans of each entity (i.e. restructuring plans, de-leveraging, etc.). The cost of equity used to discount the cash flows was calculated using the Ibbotson Build-Up Method and ranged from 11.93% to 18.38% for the 2012 analysis. The Ibbotson Build-Up Method builds up a cost of equity starting with the rate of return of a risk-free asset (20-year U.S. Treasury note) and adds to it additional risk elements such as equity risk premium, size premium and industry risk premium. The resulting discount rates were analyzed in terms of reasonability given the current market conditions and adjustments were made when necessary.

For BPNA, the only reporting unit that failed Step 1, the Corporation determined the fair value of Step 1 utilizing a DCF approach and a market value approach. The market value approach is based on a combination of price multiples from comparable companies and multiples from capital raising transactions of comparable companies. The market multiples used included price to book and price to tangible book. The Step 1 fair value for BPNA under both valuation approaches (market and DCF) was below the carrying amount of its equity book value as of the valuation date (July 31), requiring the completion of Step 2. In accordance with accounting standards, the Corporation performed a valuation of all assets and liabilities of BPNA, including any recognized and unrecognized intangible assets, to determine the fair value of BPNA's net assets. To complete Step 2, the Corporation subtracted from BPNA's Step 1 fair value the determined fair value of the net assets to arrive at the implied fair value of goodwill. The results of the Step 2 indicated that the implied fair value of goodwill exceeded the goodwill carrying value of \$402 million at July 31, 2012, resulting in no goodwill impairment. The reduction in BPNA's Step 1 fair value was offset by a reduction in the fair value of its net assets, resulting in an implied fair value of goodwill that exceeds the recorded book value of goodwill.

The analysis of the results for Step 2 indicates that the reduction in the fair value of the reporting unit was mainly attributed to the deteriorated fair value of the loan portfolios and not to the fair value of the reporting unit as a going concern. The current negative performance of the reporting unit is principally related to deteriorated credit quality in its loan portfolio, which is consistent with the results of the Step 2 analysis. The fair value determined for BPNA's loan portfolio in the July 31, 2012 annual test represented a discount of 18.2%, compared with 28.0% at July 31, 2011. The discount is mainly attributed to market participant's expected rate of returns, which affected the market discount on the commercial and construction loan portfolios of BPNA.

If the Step 1 fair value of BPNA declines further in the future without a corresponding decrease in the fair value of its net assets or if loan discounts improve without a corresponding increase in the Step 1 fair value, the Corporation may be required to record a goodwill impairment charge. The Corporation engaged a third-party valuator to assist management in the annual evaluation of BPNA's goodwill (including Step 1 and

Edgar Filing: POPULAR INC - Form 10-Q

Step 2) as well as BPNA's loan portfolios as of the July 31, 2012 valuation date. Management discussed the methodologies, assumptions and results supporting the relevant values for conclusions and determined they were reasonable.

Table of Contents

For the BPPR reporting unit, the average estimated fair value calculated in Step 1 using all valuation methodologies exceeded BPPR's equity value by approximately \$222 million in the July 31, 2012 annual test as compared with approximately \$472 million at July 31, 2011. This results indicates there would be no indication of impairment on the goodwill recorded in BPPR at July 31, 2012. For the BPNA reporting unit, the estimated implied fair value of goodwill calculated in Step 2 exceeded BPNA's goodwill carrying value by approximately \$338 million as compared to approximately \$701 million at July 31, 2011. The reduction in the excess of the implied fair value of goodwill over its carrying amount for BPNA is due to the improved credit quality of its loan portfolio. The goodwill balance of BPPR and BPNA, as legal entities, represented approximately 97% of the Corporation's total goodwill balance as of the July 31, 2012 valuation date.

Furthermore, as part of the analyses, management performed a reconciliation of the aggregate fair values determined for the reporting units to the market capitalization of Popular, Inc. concluding that the fair value results determined for the reporting units in the July 31, 2012 annual assessment were reasonable.

The goodwill impairment evaluation process requires the Corporation to make estimates and assumptions with regard to the fair value of the reporting units. Actual values may differ significantly from these estimates. Such differences could result in future impairment of goodwill that would, in turn, negatively impact the Corporation's results of operations and the reporting units where the goodwill is recorded. Declines in the Corporation's market capitalization could increase the risk of goodwill impairment in the future.

Management monitors events or changes in circumstances between annual tests to determine if these events or changes in circumstances would more likely than not reduce the fair value of a reporting unit below its carrying amount.

Table of Contents**Note 13 Deposits**

Total interest bearing deposits as of the end of the periods presented consisted of:

(In thousands)	September 30, 2012	December 31, 2011
Savings accounts	\$ 6,603,072	\$ 6,473,215
NOW, money market and other interest bearing demand deposits	5,585,761	5,103,398
Total savings, NOW, money market and other interest bearing demand deposits	12,188,833	11,576,613
Certificates of deposit:		
Under \$100,000	5,696,243	6,473,095
\$100,000 and over	3,029,953	4,236,945
Total certificates of deposit	8,726,196	10,710,040
Total interest bearing deposits	\$ 20,915,029	\$ 22,286,653

A summary of certificates of deposit by maturity at September 30, 2012, follows:

(In thousands)	
2012	\$ 2,388,162
2013	3,305,147
2014	1,130,284
2015	957,870
2016	481,365
2017 and thereafter	463,368
Total certificates of deposit	\$ 8,726,196

At September 30, 2012, the Corporation had brokered deposits amounting to \$ 2.6 billion (December 31, 2011 \$ 3.4 billion).

The aggregate amount of overdrafts in demand deposit accounts that were reclassified to loans was \$18 million at September 30, 2012 (December 31, 2011 \$13 million).

Table of Contents**Note 14 Borrowings**

Assets sold under agreements to repurchase as of the end of the periods presented were as follows:

(In thousands)	September 30, 2012	December 31, 2011
Assets sold under agreements to repurchase	\$ 1,944,564	\$ 2,141,097

The repurchase agreements outstanding at September 30, 2012 were collateralized by \$ 1.5 billion (December 31, 2011 \$ 1.8 billion) in investment securities available-for-sale, \$181 million (December 31, 2011 \$403 million) in trading securities and \$ 267 million (December 31, 2011 \$ 68 million) in trading receivables from brokers and counterparties that are classified in other assets. It is the Corporation's policy to maintain effective control over assets sold under agreements to repurchase; accordingly, such securities continue to be carried on the consolidated statements of financial condition.

In addition, there were repurchase agreements outstanding collateralized by \$ 251 million in securities purchased under agreements to resell to which the Corporation has the right to repledge the securities (December 31, 2011 \$ 274 million). It is the Corporation's policy to take possession of securities purchased under agreements to resell. However, the counterparties to such agreements maintain effective control over such securities; accordingly, these securities are not reflected in the Corporation's consolidated statements of financial condition.

Other short-term borrowings as of the end of the periods presented consisted of:

(In thousands)	September 30, 2012	December 31, 2011
Advances with the FHLB paying interest at maturity, at fixed rates ranging from 0.34% to 0.42%	\$ 1,205,000	\$ 295,000
Others	1,200	1,200
Total other short-term borrowings	\$ 1,206,200	\$ 296,200

Note: Refer to the Corporation's 2011 Annual Report for rates information corresponding to the short-term borrowings outstanding at December 31, 2011.

Table of Contents

Notes payable as of the end of the periods reported consisted of:

(In thousands)	September 30, 2012	December 31, 2011
Advances with the FHLB with maturities ranging from 2012 through 2021 paying interest at monthly fixed rates ranging from 0.63% to 4.93% (December 31, 2011- ranging from 0.66% to 4.95%)	\$ 631,898	\$ 642,568
Term notes with maturities ranging from 2012 to 2016 paying interest semiannually at fixed rates ranging from 5.25% to 7.86%	278,393	278,309
Term notes with maturities ranging from 2012 to 2014 paying interest monthly at a floating rate of 3.00% over the 10-year U.S. Treasury note rate	251	588
Junior subordinated deferrable interest debentures (related to trust preferred securities) with maturities ranging from 2027 to 2034 with fixed interest rates ranging from 6.125% to 8.327% (Refer to Note 15)	439,800	439,800
Junior subordinated deferrable interest debentures (related to trust preferred securities) (\$936,000 less discount of \$444,338 at September 30, 2012 and \$465,963 at December 31, 2011), with no stated maturity and a fixed interest rate of 5.00% until, but excluding December 5, 2013 and 9.00% thereafter (Refer to Note 15) ^[1]	491,662	470,037
Others	24,373	25,070
Total notes payable	\$ 1,866,377	\$ 1,856,372

Note: The 10-year U.S. Treasury note key index rate at September 30, 2012 and December 31, 2011 was 1.63% and 1.88%, respectively.

- [1] The debentures are perpetual and may be redeemed by the Corporation at any time, subject to the consent of the Board of Governors of the Federal Reserve System. The discount on the debentures is being amortized over an estimated 30-year term that started in August 2009. The effective interest rate, including the discount accretion, was approximately 16% at September 30, 2012 and December 31, 2011. A breakdown of borrowings by contractual maturities at September 30, 2012 is included in the table below.

(In thousands)	Assets sold under agreements to repurchase	Short-term borrowings	Notes payable	Total
Year				
2012	\$ 1,201,161	\$ 1,206,200	\$ 147,075	\$ 2,554,436
2013	1,206		98,834	100,040

Note 15 Trust preferred securities

At September 30, 2012 and December 31, 2011, four statutory trusts established by the Corporation (BanPonce Trust I, Popular Capital Trust I, Popular North America Capital Trust I and Popular Capital Trust II) had issued trust preferred securities (also referred to as capital securities) to the public. The proceeds from such issuances, together with the proceeds of the related issuances of common securities of the trusts (the common securities), were used by the trusts to purchase junior subordinated deferrable interest debentures (the junior subordinated debentures) issued by the Corporation. In August 2009, the Corporation established the Popular Capital Trust III for the purpose of exchanging the shares of Series C preferred stock held by the U.S. Treasury at the time for trust preferred securities issued by this trust. In connection with this exchange, the trust used the Series C preferred stock, together with the proceeds of issuance and sale of common securities of the trust, to purchase junior subordinated debentures issued by the Corporation.

The sole assets of the five trusts consisted of the junior subordinated debentures of the Corporation and the related accrued interest receivable. These trusts are not consolidated by the Corporation pursuant to accounting principles generally accepted in the United States of America.

The junior subordinated debentures are included by the Corporation as notes payable in the consolidated statements of financial condition, while the common securities issued by the issuer trusts are included as other investment securities. The common securities of each trust are wholly-owned, or indirectly wholly-owned, by the Corporation.

The following table presents financial data pertaining to the different trusts at September 30, 2012 and December 31, 2011.

(Dollars in thousands)

Issuer	BanPonce Trust I	Popular Capital Trust I	Popular North America Capital Trust I	Popular Capital Trust II	Popular Capital Trust III
Capital securities	\$ 52,865	\$ 181,063	\$ 91,651	\$ 101,023	\$ 935,000
Distribution rate	8.327%	6.700%	6.564%	6.125%	5.000% until, but excluding December 5, 2013 and 9.000% thereafter
Common securities	\$ 1,637	\$ 5,601	\$ 2,835	\$ 3,125	\$ 1,000
Junior subordinated debentures aggregate liquidation amount	\$ 54,502	\$ 186,664	\$ 94,486	\$ 104,148	\$ 936,000
Stated maturity date	February 2027	November 2033	September 2034	December 2034	Perpetual
Reference notes	[1],[3],[6]	[2],[4],[5]	[1],[3],[5]	[2],[4],[5]	[2],[4],[7],[8]

[1] Statutory business trust that is wholly-owned by Popular North America and indirectly wholly-owned by the Corporation.

[2] Statutory business trust that is wholly-owned by the Corporation.

[3] The obligations of PNA under the junior subordinated debentures and its guarantees of the capital securities under the trust are fully and unconditionally guaranteed on a subordinated basis by the Corporation to the extent set forth in the applicable guarantee agreement.

Edgar Filing: POPULAR INC - Form 10-Q

- [4] These capital securities are fully and unconditionally guaranteed on a subordinated basis by the Corporation to the extent set forth in the applicable guarantee agreement.
- [5] The Corporation has the right, subject to any required prior approval from the Federal Reserve, to redeem after certain dates or upon the occurrence of certain events mentioned below, the junior subordinated debentures at a redemption price equal to 100% of the principal amount, plus accrued and unpaid interest to the date of redemption. The maturity of the junior subordinated debentures may be shortened at the option of the Corporation prior to their stated maturity dates (i) on or after the stated optional redemption dates stipulated in the agreements, in whole at any time or in part from time to time, or (ii) in whole, but not in part, at any time within 90 days following the occurrence and during the continuation of a tax event, an investment company event or a capital treatment event as set forth in the indentures relating to the capital securities, in each case subject to regulatory approval.
- [6] Same as [5] above, except that the investment company event does not apply for early redemption.
- [7] The debentures are perpetual and may be redeemed by Popular at any time, subject to the consent of the Board of Governors of the Federal Reserve System.
- [8] Carrying value of junior subordinated debentures of \$ 492 million at September 30, 2012 (\$ 936 million aggregate liquidation amount, net of \$ 444 million discount) and \$ 470 million at December 31, 2011 (\$ 936 million aggregate liquidation amount, net of \$ 466 million discount).

Table of Contents

In accordance with the Federal Reserve Board guidance, the trust preferred securities represent restricted core capital elements and qualify as Tier 1 capital, subject to certain quantitative limits. The aggregate amount of restricted core capital elements that may be included in the Tier 1 capital of a banking organization must not exceed 25% of the sum of all core capital elements (including cumulative perpetual preferred stock and trust preferred securities). At September 30, 2012 and December 31, 2011, the Corporation's restricted core capital elements did not exceed the 25% limitation. Thus, all trust preferred securities were allowed as Tier 1 capital. Amounts of restricted core capital elements in excess of this limit generally may be included in Tier 2 capital, subject to further limitations. Effective March 31, 2011, the Federal Reserve Board revised the quantitative limit which would limit restricted core capital elements included in the Tier 1 capital of a bank holding company to 25% of the sum of core capital elements (including restricted core capital elements), net of goodwill less any associated deferred tax liability. Furthermore, the Dodd-Frank Act, enacted in July 2010, has a provision to effectively phase out the use of trust preferred securities issued before May 19, 2010 as Tier 1 capital over a 3-year period commencing on January 1, 2013. Trust preferred securities issued on or after May 19, 2010 no longer qualify as Tier 1 capital. At September 30, 2012, the Corporation had \$ 427 million in trust preferred securities (capital securities) that are subject to the phase-out. The Corporation has not issued any trust preferred securities since May 19, 2010. At September 30, 2012, the remaining \$935 million of trust preferred securities corresponded to capital securities issued to the U.S. Treasury pursuant to the Emergency Economic Stabilization Act of 2008, which are exempt from the phase-out provision.

Table of Contents

Note 16 Stockholders equity

Reverse stock split

On May 29, 2012, the Corporation effected a 1-for-10 reverse split of its common stock previously approved by the Corporation's stockholders on April 27, 2012. Upon the effectiveness of the reverse split, each 10 shares of authorized and outstanding common stock were reclassified and combined into one new share of common stock. Popular, Inc.'s common stock began trading on a split-adjusted basis on May 30, 2012. All share and per share information in the consolidated financial statements and accompanying notes have been retroactively adjusted to reflect the 1-for-10 reverse stock split.

In connection with the reverse stock split, the Corporation amended its Restated Certificate of Incorporation to reduce the number of shares of its authorized common stock from 1,700,000,000 to 170,000,000.

The reverse stock split did not affect the par value of a share of the Corporation's common stock.

At the effective date of the reverse stock split, the stated capital attributable to common stock on the Corporation's consolidated statement of financial condition was reduced by dividing the amount of the stated capital prior to the reverse stock split by 10, and the additional paid-in capital (surplus) was credited with the amount by which the stated capital was reduced. This was also reflected retroactively for prior periods presented in the financial statements.

BPPR statutory reserve

The Banking Act of the Commonwealth of Puerto Rico requires that a minimum of 10% of BPPR's net income for the year be transferred to a statutory reserve account until such statutory reserve equals the total of paid-in capital on common and preferred stock. Any losses incurred by a bank must first be charged to retained earnings and then to the reserve fund. Amounts credited to the reserve fund may not be used to pay dividends without the prior consent of the Puerto Rico Commissioner of Financial Institutions. The failure to maintain sufficient statutory reserves would preclude BPPR from paying dividends. BPPR's statutory reserve fund amounted to \$415 million at September 30, 2012 (December 31, 2011 \$415 million). There were no transfers between the statutory reserve account and the retained earnings account during the nine months ended September 30, 2012 and September 30, 2011.

Table of Contents**Note 17 Accumulated other comprehensive loss**

The following table presents accumulated other comprehensive loss by component at September 30, 2012 and December 31, 2011.

(In thousands)	September 30, 2012	December 31, 2011
Foreign currency translation adjustment	\$ (29,895)	\$ (28,829)
Underfunding of pension and postretirement benefit plans	(314,569)	(333,287)
Tax effect	112,054	117,229

Unrealized holding gains on securities available-for-sale	198,009	230,746
Tax effect	(22,240)	(27,668)
Net of tax amount	175,769	203,078
Unrealized net losses on cash flow hedges	(3,992)	(1,057)
Tax effect	1,198	318
Net of tax amount	(2,794)	(739)
Accumulated other comprehensive loss	\$ (59,435)	\$ (42,548)

Note 18 Guarantees

At September 30, 2012 the Corporation recorded a liability of \$0.7 million (December 31, 2011 \$0.5 million), which represents the unamortized balance of the obligations undertaken in issuing the guarantees under the standby letters of credit. Management does not anticipate any material losses related to these instruments.

From time to time, the Corporation securitized mortgage loans into guaranteed mortgage-backed securities subject to limited, and in certain instances, lifetime credit recourse on the loans that serve as collateral for the mortgage-backed securities. The Corporation has not sold any mortgage loans subject to credit recourse since 2009. Also, from time to time, the Corporation may sell, in bulk sale transactions, residential mortgage loans and Small Business Administration (SBA) commercial loans subject to certain representations and warranties from the Corporation to the purchaser. These representations and warranties may relate, for example, to borrower creditworthiness, loan documentation, collateral, prepayment and early payment defaults. The Corporation may be required to repurchase the loans under the credit recourse agreements or representation and warranties.

At September 30, 2012 the Corporation serviced \$ 3.1 billion (December 31, 2011 \$ 3.5 billion) in residential mortgage loans subject to credit recourse provisions, principally loans associated with FNMA and FHLMC residential mortgage loan securitization programs. In the event of any customer default, pursuant to the credit recourse provided, the Corporation is required to repurchase the loan or reimburse the third party investor for the incurred loss. The maximum potential amount of future payments that the Corporation would be required to make under the recourse arrangements in the event of nonperformance by the borrowers is equivalent to the total outstanding balance of the residential mortgage loans serviced with recourse and interest, if applicable. During the quarter and nine months ended September 30, 2012, the Corporation repurchased approximately \$ 33 million and \$ 115 million, respectively, of unpaid principal balance in mortgage loans subject to the credit recourse provisions (September 30, 2011 \$ 53 million for the quarter and \$ 168 million for nine-months period). In the event of nonperformance by the borrower, the Corporation has rights to the underlying collateral securing the mortgage loan. The Corporation suffers ultimate losses on these loans when the proceeds from a foreclosure sale of the property underlying a defaulted mortgage loan are less than the outstanding principal balance of the loan plus any uncollected interest advanced and the costs of holding and disposing the related property. At September 30, 2012 the Corporation's liability established to cover the estimated credit loss exposure related to loans sold or serviced with credit recourse amounted to \$ 56 million (December 31, 2011 \$ 59 million).

Table of Contents

The following table shows the changes in the Corporation's liability of estimated losses related to loans serviced with credit recourse provisions during the quarter and nine-month periods ended September 30, 2012 and 2011.

(In thousands)	Quarters ended September 30,		Nine months ended September 30,	
	2012	2011	2012	2011
Balance as of beginning of period	\$ 55,783	\$ 55,327	\$ 58,659	\$ 53,729
Additions for new sales				
Provision for recourse liability	5,576	10,285	15,138	30,109
Net charge-offs / terminations	(5,068)	(10,055)	(17,506)	(28,281)
Balance as of end of period	\$ 56,291	\$ 55,557	\$ 56,291	\$ 55,557

The estimated losses to be absorbed under the credit recourse arrangements are recorded as a liability when the loans are sold or credit recourse is assumed as part of acquired servicing rights, and are updated by accruing or reversing expense (categorized in the line item adjustments (expense) to indemnity reserves on loans sold in the consolidated statements of operations) throughout the life of the loan, as necessary, when additional relevant information becomes available. The methodology used to estimate the recourse liability is a function of the recourse arrangements given and considers a variety of factors, which include actual defaults and historical loss experience, foreclosure rate, estimated future defaults and the probability that a loan would be delinquent. Statistical methods are used to estimate the recourse liability. Expected loss rates are applied to different loan segmentations. The expected loss, which represents the amount expected to be lost on a given loan, considers the probability of default and loss severity. The probability of default represents the probability that a loan in good standing would become 90 days delinquent within the following twelve-month period. Regression analysis quantifies the relationship between the default event and loan-specific characteristics, including credit scores, loan-to-value ratios, and loan aging, among others.

When the Corporation sells or securitizes mortgage loans, it generally makes customary representations and warranties regarding the characteristics of the loans sold. The Corporation's mortgage operations in Puerto Rico group conforming mortgage loans into pools which are exchanged for FNMA and GNMA mortgage-backed securities, which are generally sold to private investors, or are sold directly to FNMA or other private investors for cash. As required under the government agency programs, quality review procedures are performed by the Corporation to ensure that asset guideline qualifications are met. To the extent the loans do not meet specified characteristics, the Corporation may be required to repurchase such loans or indemnify for losses and bear any subsequent loss related to the loans. Repurchases under representation and warranty arrangements in which the Corporation's Puerto Rico banking subsidiaries were required to repurchase the loans approximated \$ 3.1 million in unpaid principal balance with losses amounting to \$ 0.5 million during the nine-month period ended September 30, 2012 (September 30, 2011 \$ 21.0 million and \$ 2.3 million, respectively). A substantial amount of these loans reinstate to performing status or have mortgage insurance, and thus the ultimate losses on the loans are not deemed significant.

During the quarter ended June 30, 2011, the Corporation's banking subsidiary, BPPR, reached an agreement (the June 2011 agreement) with the FDIC, as receiver for a local Puerto Rico institution, and the financial institution with respect to a loan servicing portfolio that BPPR services since 2008, related to FHLMC and GNMA pools. The loans were originated and sold by the financial institution and the servicing rights were transferred to BPPR in 2008. As part of the 2008 servicing agreement, the financial institution was required to repurchase from BPPR any loans that BPPR, as servicer, was required to repurchase from the investors under representation and warranty obligations. As part of the June 2011 agreement, the Corporation received cash to discharge the financial institution from any repurchase obligation and other claims over the serviced portfolio. At September 30, 2012, the related representation and warranty reserve amounted to \$ 8.0 million, and the related serviced portfolio approximated \$3 billion (December 31, 2011 \$ 8.5 million and \$3.5 billion, respectively).

Servicing agreements relating to the mortgage-backed securities programs of FNMA and GNMA, and to mortgage loans sold or serviced to certain other investors, including FHLMC, require the Corporation to advance funds to make scheduled payments of principal, interest, taxes and insurance, if such payments have not been received from the borrowers. At September 30, 2012, the Corporation serviced \$ 16.8 billion in mortgage loans for third-parties, including the loans serviced with credit recourse (December 31, 2011 \$ 17.3 billion). The Corporation generally recovers funds advanced pursuant to these arrangements from the mortgage owner, from liquidation proceeds when the mortgage loan is foreclosed or, in the case of FHA/VA loans, under the applicable FHA and VA insurance and guarantees programs. However, in the meantime, the Corporation must absorb the cost of the funds it advances during the time the advance is outstanding. The Corporation must also bear the costs of attempting to collect on

Table of Contents

delinquent and defaulted mortgage loans. In addition, if a defaulted loan is not cured, the mortgage loan would be canceled as part of the foreclosure proceedings and the Corporation would not receive any future servicing income with respect to that loan. At September 30, 2012, the outstanding balance of funds advanced by the Corporation under such mortgage loan servicing agreements was approximately \$30 million (December 31, 2011 \$32 million). To the extent the mortgage loans underlying the Corporation's servicing portfolio experience increased delinquencies, the Corporation would be required to dedicate additional cash resources to comply with its obligation to advance funds as well as incur additional administrative costs related to increases in collection efforts.

At September 30, 2012, the Corporation has reserves for customary representation and warranties related to loans sold by its U.S. subsidiary E-LOAN prior to 2009. These loans were sold to investors on a servicing released basis subject to certain representation and warranties. Although the risk of loss or default was generally assumed by the investors, the Corporation made certain representations relating to borrower creditworthiness, loan documentation and collateral, which if not correct, may result in requiring the Corporation to repurchase the loans or indemnify investors for any related losses associated with these loans. At September 30, 2012, the Corporation's reserve for estimated losses from such representation and warranty arrangements amounted to \$ 8 million, which was included as part of other liabilities in the consolidated statement of financial condition (December 31, 2011 \$ 11 million). E-LOAN is no longer originating and selling loans since the subsidiary ceased these activities in 2008 and most of the outstanding agreements with major counterparties were settled during 2010 and 2011. On a quarterly basis, the Corporation reassesses its estimate for expected losses associated with E-LOAN's customary representation and warranty arrangements. The analysis incorporates expectations on future disbursements based on quarterly repurchases and make-whole events. The analysis also considers factors such as the average length-time between the loan's funding date and the loan repurchase date, as observed in the historical loan data. Make-whole events are typically defaulted cases in which the investor attempts to recover by collateral or guarantees, and the seller is obligated to cover any impaired or unrecovered portion of the loan. Claims have been predominantly for first mortgage agency loans and principally consist of underwriting errors related to undisclosed debt or missing documentation. The following table presents the changes in the Corporation's liability for estimated losses associated with customary representations and warranties related to loans sold by E-LOAN for the quarters and nine-month period ended September 30, 2012 and 2011.

(In thousands)	Quarters ended September 30,		Nine months ended September 30,	
	2012	2011	2012	2011
Balance as of beginning of period	\$ 10,131	\$ 29,016	\$ 10,625	\$ 30,659
Additions for new sales				
(Reversal) provision for representation and warranties	(1,841)		(1,841)	(522)
Net charge-offs / terminations	(1)	(807)	(495)	(1,928)
Balance as of end of period	\$ 8,289	\$ 28,209	\$ 8,289	\$ 28,209

Popular, Inc. Holding Company (PIHC) fully and unconditionally guarantees certain borrowing obligations issued by certain of its wholly-owned consolidated subsidiaries amounting to \$ 0.6 billion at September 30, 2012 (December 31, 2011 \$ 0.7 billion). In addition, at September 30, 2012 and December 31, 2011, PIHC fully and unconditionally guaranteed on a subordinated basis \$ 1.4 billion of capital securities (trust preferred securities) issued by wholly-owned issuing trust entities to the extent set forth in the applicable guarantee agreement. Refer to Note 15 to the consolidated financial statements for further information on the trust preferred securities.

Table of Contents**Note 19 Commitments and contingencies***Off-balance sheet risk*

The Corporation is a party to financial instruments with off-balance sheet credit risk in the normal course of business to meet the financial needs of its customers. These financial instruments include loan commitments, letters of credit, and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated statements of financial condition.

The Corporation's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit, standby letters of credit and financial guarantees written is represented by the contractual notional amounts of those instruments. The Corporation uses the same credit policies in making these commitments and conditional obligations as it does for those reflected on the consolidated statements of financial condition.

Financial instruments with off-balance sheet credit risk, whose contract amounts represent potential credit risk as of the end of the periods presented were as follows:

(In thousands)	September 30, 2012	December 31, 2011
Commitments to extend credit:		
Credit card lines	\$ 4,381,528	\$ 4,297,755
Commercial lines of credit	2,585,109	2,039,629
Other unused credit commitments	361,228	358,572
Commercial letters of credit	25,448	11,632
Standby letters of credit	129,297	124,709
Commitments to originate mortgage loans	72,280	53,323

At September 30, 2012, the Corporation maintained a reserve of approximately \$7 million for potential losses associated with unfunded loan commitments related to commercial and consumer lines of credit (December 31, 2011 \$15 million).

Other commitments

At September 30, 2012, the Corporation also maintained other non-credit commitments for \$10 million, primarily for the acquisition of other investments (December 31, 2011 \$10 million).

Business concentration

Since the Corporation's business activities are currently concentrated primarily in Puerto Rico, its results of operations and financial condition are dependent upon the general trends of the Puerto Rico economy and, in particular, the residential and commercial real estate markets. The concentration of the Corporation's operations in Puerto Rico exposes it to greater risk than other banking companies with a wider geographic base. Its asset and revenue composition by geographical area is presented in Note 31 to the consolidated financial statements.

The Corporation's loan portfolio is diversified by loan category. However, approximately \$12.8 billion, or 62% of the Corporation's loan portfolio not covered under the FDIC loss sharing agreements, excluding loans held-for-sale, at September 30, 2012, consisted of real estate related loans, including residential mortgage loans, construction loans and commercial loans secured by commercial real estate (December 31, 2011 \$12.5 billion, or 61%).

Except for the Corporation's exposure to the Puerto Rico Government sector, no individual or single group of related accounts is considered material in relation to the Corporation's total assets or deposits, or in relation to the Corporation's overall business. At September 30, 2012, the Corporation had approximately \$1.5 billion of credit facilities granted to or guaranteed by the Puerto Rico Government, its municipalities and public corporations, of which \$215 million were uncommitted lines of credit (December 31, 2011 \$1.3 billion and \$140 million, respectively). Of the total credit facilities granted, \$777 million was outstanding at September 30, 2012 (December 31, 2011 \$1.2 billion). Furthermore, at September 30, 2012, the Corporation had \$145 million in obligations issued or guaranteed by the Puerto Rico Government, its municipalities and public corporations as part of its investment securities portfolio (December 31, 2011 \$154 million).

Table of Contents*Other contingencies*

As indicated in Note 9 to the consolidated financial statements, as part of the loss sharing agreements related to the Westernbank FDIC-assisted transaction, the Corporation agreed to make a true-up payment to the FDIC on the date that is 45 days following the last day of the final shared loss month, or upon the final disposition of all covered assets under the loss sharing agreements in the event losses on the loss sharing agreements fail to reach expected levels. The fair value of the true-up payment obligation was estimated at \$103 million at September 30, 2012 (December 31, 2011 \$98 million).

Legal Proceedings

The nature of Popular's business ordinarily results in a certain number of claims, litigation, investigations, and legal and administrative cases and proceedings. When the Corporation determines it has meritorious defenses to the claims asserted, it vigorously defends itself. The Corporation will consider the settlement of cases (including cases where it has meritorious defenses) when, in management's judgment, it is in the best interest of both the Corporation and its shareholders to do so.

On at least a quarterly basis, Popular assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. For matters where it is probable that the Corporation will incur a material loss and the amount can be reasonably estimated, the Corporation establishes an accrual for the loss. Once established, the accrual is adjusted on at least a quarterly basis as appropriate to reflect any relevant developments. For matters where a material loss is not probable or the amount of the loss cannot be estimated, no accrual is established.

In certain cases, exposure to loss exists in excess of the accrual to the extent such loss is reasonably possible, but not probable. Management believes and estimates that the aggregate range of reasonably possible losses (with respect to those matters where such limits may be determined, in excess of amounts accrued), for current legal proceedings ranges from \$0 to approximately \$16.9 million as of September 30, 2012. For certain other cases, management cannot reasonably estimate the possible loss at this time. Any estimate involves significant judgment, given the varying stages of the proceedings (including the fact that many of them are currently in preliminary stages), the existence of multiple defendants in several of the current proceedings whose share of liability has yet to be determined, the numerous unresolved issues in many of the proceedings, and the inherent uncertainty of the various potential outcomes of such proceedings. Accordingly, management's estimate will change from time-to-time, and actual losses may be more or less than the current estimate.

While the final outcome of legal proceedings is inherently uncertain, based on information currently available, advice of counsel, and available insurance coverage, management believes that the amount it has already accrued is adequate and any incremental liability arising from the Corporation's legal proceedings will not have a material adverse effect on the Corporation's consolidated financial position as a whole. However, in the event of unexpected future developments, it is possible that the ultimate resolution of these matters, if unfavorable, may be material to the Corporation's consolidated financial position in a particular period.

Ongoing Class Action Litigation

Banco Popular is currently a defendant in two class action lawsuits arising from its consumer banking and trust-related activities:

The Overdraft Fee Litigation

On October 7, 2010, a putative class action for breach of contract and damages captioned *Almeyda-Santiago v. Banco Popular de Puerto Rico*, was filed in the Puerto Rico Court of First Instance against Banco Popular. The complaint essentially asserts that plaintiff and others similarly situated who plaintiff purports to represent have suffered damages because of Banco Popular's allegedly fraudulent overdraft fee practices in connection with debit card transactions. Such practices allegedly consist of: (a) the reorganization of electronic debit transactions in high-to-low order so as to multiply the number of overdraft fees assessed on its customers; (b) the assessment of overdraft fees even when clients have not overdrawn their accounts; (c) the failure to disclose, or to adequately disclose, its overdraft policy to its customers; and (d) the provision of false and fraudulent information regarding its clients' account balances at point of sale transactions and on its website. Plaintiff seeks damages, restitution and provisional remedies against Banco Popular for breach of contract, abuse of trust, illegal conversion and unjust enrichment. On January 13, 2011, Banco Popular submitted a motion to dismiss the complaint.

In January 2012, the parties to the *Almeyda* action entered into a memorandum of understanding. Under the terms of this memorandum of understanding, subject to certain customary conditions, including court approval of a final settlement agreement, and in consideration for the full and final settlement and release of all defendants, the parties agreed that the amount of \$0.4 million will be paid by defendants, which amount,

Edgar Filing: POPULAR INC - Form 10-Q

net of attorneys' fees, shall be donated to one or more non-profit consumer financial counseling services organizations based in Puerto Rico. A settlement stipulation and a joint motion for preliminary approval of such settlement were filed on July 3, 2012 and approved by the Court on September 6, 2012. A final settlement hearing has been set for January 16, 2013.

Table of Contents**The Bank-as-Trustee Litigation**

On December 13, 2010, Popular was served with a class action complaint captioned *García Lamadrid, et al. v. Banco Popular de Puerto Rico, et al.*, filed in the Puerto Rico Court of First Instance. The complaint generally seeks damages against Banco Popular de Puerto Rico, other defendants and their respective insurance companies for their alleged breach of certain fiduciary duties, breach of contract, and alleged violations of local tort law. Plaintiffs seek in excess of \$600 million in damages, plus costs and attorneys fees.

More specifically, plaintiffs Guillermo García Lamadrid and Benito del Cueto Figueras are suing Defendant BPPR for the losses they (and others) experienced through their investment in the RG Financial Corporation-backed Conservation Trust Fund securities. Plaintiffs essentially claim that Banco Popular allegedly breached its purported fiduciary duty to keep all relevant parties informed of any developments that could affect the Conservation Trust notes or that could become an event of default under the relevant trust agreements; and that in so doing, it acted imprudently, unreasonably and with gross negligence. Popular and the other defendants submitted separate motions to dismiss on or about February 28, 2011. Plaintiffs submitted a consolidated opposition thereto on April 15, 2011. The parties were allowed to submit replies and surreplies to such motions and the motions have now been deemed submitted by the Court and are pending resolution. An argumentative hearing on this motion was held on July 3, 2012. At the hearing, the Court requested supplemental briefs on the matters at issue. Such motions were submitted on August 8, 2012.

Note 20 Non-consolidated variable interest entities

The Corporation is involved with four statutory trusts which it established to issue trust preferred securities to the public. Also, it established Popular Capital Trust III for the purpose of exchanging Series C preferred stock shares held by the U.S. Treasury for trust preferred securities issued by this trust. These trusts are deemed to be variable interest entities (VIEs) since the equity investors at risk have no substantial decision-making rights. The Corporation does not hold any variable interest in the trusts, and therefore, cannot be the trusts' primary beneficiary. Furthermore, the Corporation concluded that it did not hold a controlling financial interest in these trusts since the decisions of the trusts are predetermined through the trust documents and the guarantee of the trust preferred securities is irrelevant since in substance the sponsor is guaranteeing its own debt.

Also, the Corporation is involved with various special purpose entities mainly in guaranteed mortgage securitization transactions, including GNMA, FNMA and FHLMC. These special purpose entities are deemed to be VIEs since they lack equity investments at risk. The Corporation's continuing involvement in these guaranteed loan securitizations includes owning certain beneficial interests in the form of securities as well as the servicing rights retained. The Corporation is not required to provide additional financial support to any of the variable interest entities to which it has transferred the financial assets. The mortgage-backed securities, to the extent retained, are classified in the Corporation's consolidated statements of financial condition as available-for-sale or trading securities. The Corporation concluded that, essentially, these entities (FNMA, GNMA, and FHLMC) control the design of their respective VIEs, dictate the quality and nature of the collateral, require the underlying insurance, set the servicing standards via the servicing guides and can change them at will, and can remove a primary servicer with cause, and without cause in the case of FNMA and FHLMC. Moreover, through their guarantee obligations, agencies (FNMA, GNMA, and FHLMC) have the obligation to absorb losses that could be potentially significant to the VIE.

ASU 2009-17 requires that an ongoing primary beneficiary assessment should be made to determine whether the Corporation is the primary beneficiary of any of the VIEs it is involved with. The conclusion on the assessment of these trusts and guaranteed mortgage securitization transactions has not changed since their initial evaluation. The Corporation concluded that it is still not the primary beneficiary of these VIEs, and therefore, these VIEs are not required to be consolidated in the Corporation's financial statements at September 30, 2012.

The Corporation holds variable interests in these VIEs in the form of agency mortgage-backed securities and collateralized mortgage obligations, including those securities originated by the Corporation and those acquired from third parties. Additionally, the Corporation holds agency mortgage-backed securities, agency collateralized mortgage obligations and private label collateralized mortgage obligations issued by third party VIEs in which it has no other form of continuing involvement. Refer to Note 22 to the consolidated financial statements for additional information on the debt securities outstanding at September 30, 2012 and December 31, 2011, which are classified as available-for-sale and trading securities in the Corporation's consolidated statements of financial condition. In addition, the Corporation may retain the right to service the transferred loans in those government-sponsored special purpose entities (SPEs) and may also purchase the right to service loans in other government-sponsored SPEs that were transferred to those SPEs by a third-party. Pursuant to ASC Subtopic 810-10, the servicing fees that the Corporation receives for its servicing role are considered variable interests in the VIEs since the servicing fees are subordinated to the principal and interest that first needs to be paid to the mortgage-backed securities' investors and to the guaranty fees that need to be paid to the federal agencies.

Table of Contents

The following table presents the carrying amount and classification of the assets related to the Corporation's variable interests in non-consolidated VIEs and the maximum exposure to loss as a result of the Corporation's involvement as servicer with non-consolidated VIEs at September 30, 2012 and December 31, 2011.

(In thousands)	September 30, 2012	December 31, 2011
Assets		
Servicing assets:		
Mortgage servicing rights	\$ 128,637	\$ 101,511
 Total servicing assets	 \$ 128,637	 \$ 101,511
Other assets:		
Servicing advances	\$ 1,799	\$ 3,027
 Total other assets	 \$ 1,799	 \$ 3,027
 Total	 \$ 130,436	 \$ 104,538
 Maximum exposure to loss	 \$ 130,436	 \$ 104,538

The size of the non-consolidated VIEs, in which the Corporation has a variable interest in the form of servicing fees, measured as the total unpaid principal balance of the loans, amounted to \$10.8 billion at September 30, 2012 (December 31, 2011 - \$9.4 billion).

Maximum exposure to loss represents the maximum loss, under a worst case scenario, that would be incurred by the Corporation, as servicer for the VIEs, assuming all loans serviced are delinquent and that the value of the Corporation's interests and any associated collateral declines to zero, without any consideration of recovery. The Corporation determined that the maximum exposure to loss includes the fair value of the MSRs and the assumption that the servicing advances at September 30, 2012 and December 31, 2011, will not be recovered. The agency debt securities are not included as part of the maximum exposure to loss since they are guaranteed by the related agencies.

In September of 2011, BPPR sold construction and commercial real estate loans with a fair value of \$148 million, and most of which were non-performing, to a newly created joint venture, PRLP 2011 Holdings, LLC. The joint venture is majority owned by Caribbean Property Group (CPG), Goldman Sachs & Co. and East Rock Capital LLC. The joint venture was created for the limited purpose of acquiring the loans from BPPR; servicing the loans through a third-party servicer; ultimately working out, resolving and/or foreclosing the loans; and indirectly owning, operating, constructing, developing, leasing and selling any real properties acquired by the joint venture through deed in lieu of foreclosure, foreclosure, or by resolution of any loan.

BPPR provided financing to the joint venture for the acquisition of the loans in an amount equal to the sum of 57% of the purchase price of the loans, or \$84 million, and \$2 million of closing costs, for a total acquisition loan of \$86 million (the acquisition loan). The acquisition loan has a 5-year maturity and bears a variable interest at 30-day LIBOR plus 300 basis points and is secured by a pledge of all of the acquiring entity's assets. In addition, BPPR provided the joint venture with a non-revolving advance facility (the advance facility) of \$68.5 million to cover unfunded commitments and costs-to-complete related to certain construction projects, and a revolving working capital line (the working capital line) of \$20 million to fund certain operating expenses of the joint venture. Cash proceeds received by the joint venture are first used to cover debt service payments for the acquisition loan, advance facility, and the working capital line described above which must be paid in full before proceeds can be used for other purposes. The distributable cash proceeds are determined based on a pro-rata basis in accordance with the respective equity ownership percentages. BPPR's equity interest in the joint venture ranks pari-passu with those of other parties involved. As part of the transaction executed in September 2011, BPPR received \$48 million in cash and a 24.9% equity interest in the joint venture. The Corporation is not required to provide any other financial support to the joint venture.

BPPR accounted for this transaction as a true sale pursuant to ASC Subtopic 860-10 and thus recognized the cash received, its equity investment in the joint venture, and the acquisition loan provided to the joint venture and derecognized the loans sold.

Table of Contents

The Corporation has determined that PRLP 2011 Holdings, LLC is a VIE but the Corporation is not the primary beneficiary. All decisions are made by CPG (or an affiliate thereof) (the Manager), except for certain limited material decisions which would require the unanimous consent of all members. The Manager is authorized to execute and deliver on behalf of the joint venture any and all documents, contracts, certificates, agreements and instruments, and to take any action deemed necessary in the benefit of the joint venture. Also, the Manager delegates the day-to-day management and servicing of the loans to CPG Island Servicing, LLC, an affiliate of CPG, which contracted Archon, an affiliate of Goldman Sachs, to act as servicer, but it has the responsibility to oversee such servicing responsibilities.

The Corporation holds variable interests in this VIE in the form of the 24.9% equity interest (the Investment in PRLP 2011 Holdings, LLC) and the financing provided to the joint venture. The equity interest is accounted for under the equity method of accounting pursuant to ASC Subtopic 323-10.

The following table presents the carrying amount and classification of the assets and liabilities, net of eliminations, related to the Corporation's variable interests in the non-consolidated VIE, PRLP 2011 Holdings, LLC and its maximum exposure to loss at September 30, 2012 and December 31, 2011.

(In thousands)	September 30, 2012	December 31, 2011
Assets		
Loans held-in-portfolio:		
Acquisition loan	\$ 45,504	\$ 64,711
Advances under the working capital line	538	
Advances under the advance facility	4,835	
 Total loans held-in-portfolio	 \$ 50,877	 \$ 64,711
Accrued interest receivable	\$ 138	\$
Other assets:		
Investment in PRLP 2011 Holdings LLC	\$ 38,209	\$ 37,561
 Total other assets	 \$ 38,209	 \$ 37,561
 Total assets	 \$ 89,224	 \$ 102,272
 Deposits	 \$ (4,781)	 \$ (48)
 Total liabilities	 \$ (4,781)	 \$ (48)
 Total net assets	 \$ 84,443	 \$ 102,224
 Maximum exposure to loss	 \$ 84,443	 \$ 102,224

The Corporation determined that the maximum exposure to loss under a worst case scenario at September 30, 2012 would be not recovering the carrying amount of the acquisition loan, the advances on the advance facility and working capital line, and the equity interest held by the Corporation, net of the deposits.

Table of Contents**Note 21 Related party transactions with affiliated company / joint venture**

On September 30, 2010, the Corporation completed the sale of a 51% majority interest in EVERTEC, Inc. (EVERTEC) to an unrelated third-party, including the Corporation's merchant acquiring and processing and technology businesses (the EVERTEC transaction), and retained a 49% ownership interest in Carib Holdings, the holding company of EVERTEC. EVERTEC continues to provide various processing and information technology services to the Corporation and its subsidiaries and gives BPPR access to the ATH network owned and operated by EVERTEC. The investment in EVERTEC is accounted for under the equity method and is evaluated for impairment if events or circumstances indicate that a decrease in value of the investment has occurred that is other than temporary. Refer to Note 25 Related party transactions to the consolidated financial statements included in the Corporation's 2011 Annual Report for details on this sale to an unrelated third-party. As of September 30, 2012, the Corporation holds a 48.5% interest in the holding company of EVERTEC.

The Corporation's equity in EVERTEC, including the impact of intra-entity eliminations, is presented in the table which follows and is included as part of other assets in the consolidated statements of financial condition. During the nine months ended September 30, 2012, the Corporation received a \$131 million cash dividend from its investments in EVERTEC's holding company. The Corporation did not receive any capital distributions from EVERTEC during the year ended December 31, 2011.

(In thousands)	September 30, 2012	December 31, 2011
Equity investment in EVERTEC	\$ 61,953	\$ 191,072
Intra-company eliminations (detailed in next table)	15,679	11,944
Equity investment in EVERTEC, considering intra-company eliminations	\$ 77,632	\$ 203,016

The Corporation had the following financial condition accounts outstanding with EVERTEC at September 30, 2012 and December 31, 2011. The 51.5% majority interest represents the share of transactions with the affiliate that is not eliminated in the consolidation of the Corporation's statements of financial condition at September 30, 2012 (December 31, 2011 51%).

(In thousands)	At September 30, 2012			At December 31, 2011		
	100%	Popular's 48.5% interest (eliminations)	51.5% majority interest	100%	Popular's 49% interest (eliminations)	51% majority interest
Loans	\$ 53,493	\$ 25,933	\$ 27,560	\$ 53,215	\$ 26,075	\$ 27,140

Total	\$ 32,342	\$ 15,679	\$ 16,663	\$ 24,375	\$ 11,944	\$ 12,431

Table of Contents

The Corporation's proportionate share of income or loss from EVERTEC is included in other operating income in the consolidated statements of operations since October 1, 2010. The following table presents the Corporation's proportionate share of income (loss) from EVERTEC for the quarter and nine months ended September 30, 2012 and 2011. The unfavorable impact of the elimination in non-interest income presented in the table is principally offset by the elimination of 48.5% of the professional fees (operating expenses) paid by the Corporation to EVERTEC during the quarter and nine months ended September 30, 2012 (September 30, 2011 - 49%).

(In thousands)	Quarter ended September 30, 2012	Nine months ended September 30, 2012
Share of income from the equity investment in EVERTEC	\$ 29	\$ 1,714
Intra-company eliminations considered in other operating income (detailed in next table)	(12,793)	(39,067)
Share of loss from equity investment in EVERTEC, net of eliminations	\$ (12,764)	\$ (37,353)

(In thousands)	Quarter ended September 30, 2011	Nine months ended September 30, 2011
Share of (loss) income from the equity investment in EVERTEC	\$ (1,426)	\$ 11,069
Intra-company eliminations considered in other operating income (detailed in next table)	(12,288)	(38,747)
Share of loss from equity investment in EVERTEC, net of eliminations	\$ (13,714)	\$ (27,678)

The following tables present the impact of transactions and service payments between the Corporation and EVERTEC (as an affiliate) and their impact on the results of operations for the quarters and nine months ended September 30, 2012 and 2011. Items that represent expenses to the Corporation are presented with parenthesis. For consolidation purposes, for the quarters and nine months ended September 30, 2012, the Corporation eliminates 48.5% of the income (expense) between EVERTEC and the Corporation from the corresponding categories in the consolidated statements of operations and the net effect of all items at 48.5% is eliminated against other operating income, which is the category used to record the Corporation's share of income (loss) as part of its equity method investment in EVERTEC (September 30, 2011 - 49%). The 51.5% majority interest in the table that follows represents the share of transactions with the affiliate that is not eliminated in the consolidation of the Corporation's results of operations for the quarters and nine months ended September 30, 2012 (September 30, 2011 - 51%).

EVERTEC has certain performance bonds outstanding, which are guaranteed by the Corporation under a general indemnity agreement between the Corporation and the insurance companies issuing the bonds. EVERTEC's performance bonds guaranteed by the Corporation amounted to approximately \$ 7.7 million at September 30, 2012 (December 31, 2011 \$15.0 million). Also, EVERTEC has a letter of credit issued by BPPR, for an amount of \$2.9 million at September 30, 2012 and December 31, 2011. As part of the merger agreement, the Corporation also agreed to maintain outstanding this letter of credit for a 5-year period. EVERTEC and the Corporation entered into a Reimbursement Agreement, in which EVERTEC will reimburse the Corporation for any losses incurred by the Corporation in connection with the performance bonds and the letter of credit. Possible losses resulting from these agreements are considered insignificant.

As indicated in Note 20 to the consolidated financial statements, the Corporation holds a 24.9% equity interest in PRLP 2011 Holdings LLC and currently provides certain financing to the joint venture as well as holds certain deposits from the entity.

The following table presents transactions between the Corporation and PRLP 2011 Holdings, LLC and their impact on the Corporation's results of operations for the quarter and nine months ended September 30, 2012.

(In thousands)	Quarter ended September 30, 2012			Nine months ended September 30, 2012			Category
	100%	Popular s 24.9% interest (eliminations)	75.1% majority interest	100%	Popular s 24.9% interest (eliminations)	75.1% majority interest

Note 22 Fair value measurement

ASC Subtopic 820-10 Fair Value Measurements and Disclosures establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels in order to increase consistency and comparability in fair value measurements and disclosures. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities that the Corporation has the ability to access at the measurement date. Valuation on these instruments does not necessitate a significant degree of judgment since valuations are based on quoted prices that are readily available in an active market.

Level 2 Quoted prices other than those included in Level 1 that are observable either directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or that can be corroborated by observable market data for substantially the full term of the financial instrument.

Level 3 Inputs are unobservable and significant to the fair value measurement. Unobservable inputs reflect the Corporation's own assumptions about assumptions that market participants would use in pricing the asset or liability.

The Corporation maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. Fair value is based upon quoted market prices when available. If listed prices or quotes are not available, the Corporation employs internally-developed models that primarily use market-based inputs including yield curves, interest rates, volatilities, and credit curves, among others. Valuation adjustments are limited to those necessary to ensure that the financial instrument's fair value is adequately representative of the price that would be received or paid in the marketplace. These adjustments include amounts that reflect counterparty credit quality, the Corporation's credit standing, constraints on liquidity and unobservable parameters that are applied consistently.

The estimated fair value may be subjective in nature and may involve uncertainties and matters of significant judgment for certain financial instruments. Changes in the underlying assumptions used in calculating fair value could significantly affect the results.

Table of Contents*Fair Value on a Recurring and Nonrecurring Basis*

The following fair value hierarchy tables present information about the Corporation's assets and liabilities measured at fair value on a recurring basis at September 30, 2012 and December 31, 2011 and on a nonrecurring basis in periods subsequent to initial recognition for the nine months ended September 30, 2012 and 2011:

[1] Relates mostly to certain impaired collateral dependent loans. The impairment was measured based on the fair value of the collateral, which is derived from appraisals that take into consideration prices in observed transactions involving similar assets in similar locations, in accordance with the provisions of ASC Section 310-10-35.

[2] Relates to lower of cost or fair value adjustments on loans held-for-sale and loans transferred from loans held-in-portfolio to loans held-for-sale.

[3] Represents the fair value of foreclosed real estate and other collateral owned that were written down to their fair value. Costs to sell excluded from the reported fair value amount were \$6 million at September 30, 2012.

[4] Represents the fair value of long-lived assets held-for-sale that were written down to their fair value.

There were no transfers in and/or out of Level 3 for financial instruments measured at fair value on a recurring basis during the quarters ended September 30, 2012 and 2011. There were \$ 2 million in transfers from Level 2 to Level 3 and \$ 7 million in transfers from Level 3 to Level 2 for financial instruments measured at fair value on a recurring basis during the nine months ended September 30, 2012. The transfers from Level 2 to Level 3 of trading mortgage-backed securities were the result of a change in valuation technique to a matrix pricing model, based on indicative prices provided by brokers. The transfers from Level 3 to Level 2 of trading mortgage-backed securities resulted from observable market data becoming available for these securities. Pursuant to the Corporation's policy, these transfers were recognized as of the end of the reporting period. There were no transfers in and/or out of Level 3 for financial instruments measured at fair value on a recurring basis during the nine months ended September 30, 2011. There were no transfers in and/or out of Level 1 during the quarters and nine months ended September 30, 2012 and 2011.

Gains and losses (realized and unrealized) included in earnings for the quarter and nine months ended September 30, 2012 and 2011 for Level 3 assets and liabilities included in the previous tables are reported in the consolidated statement of operations as follows:

Other operating income (loss)	(17)	(17)	(57)	(57)
Total	\$ (12,022)	\$ (7,823)	\$ (30,638)	\$ (17,847)

The following table includes quantitative information about significant unobservable inputs used to derive the fair value of Level 3 instruments, excluding those instruments for which the unobservable inputs were not developed by the Corporation such as prices of prior transactions and/or unadjusted third-party pricing sources.

(In thousands)	Fair Value at September 30, 2012	Valuation Technique	Unobservable Inputs	Weighted Average (Range)
Collateralized mortgage obligations trading	\$ 2,634	Discounted cash flow model	Weighted average life	2.7 years (0.4 - 6.7 years)
			Yield	3.7% (0.8% - 4.7%)
			Constant prepayment rate	23.4% (18.0% - 28.8%)
Other trading	\$ 1,245	Discounted cash flow model	Weighted average life	5.7 years
			Yield	12.8%
			Constant prepayment rate	9.0%
Mortgage servicing rights	\$ 158,367	Discounted cash flow model	Prepayment speed	8.7% (2.1% - 26.5%)
			Weighted average life	11.5 years (3.8 - 47.3 years)
			Discount rate	12.0% (10.0 - 15.5%)
Contingent consideration	\$ (103,688)	Discounted cash flow model	Credit loss rate on covered loans	23.2% (0.0% - 100.0%)
			Risk premium component of discount rate	5.3%
			Haircut applied on external appraisals	19.9% (5.0% - 30.0%)
Loans held-in-portfolio	\$ 11,887	External Appraisal	Weighted average life	2.0 years
Loans held-for-sale	\$ 102,092	Discounted cash flow model	Net loss rate	49.6%
			External Appraisal	Haircut applied on external appraisals
Other real estate owned	\$ 93,560	External Appraisal	external appraisals	22.9% (5.0% - 40.0%)

Edgar Filing: POPULAR INC - Form 10-Q

The significant unobservable inputs used in the fair value measurement of the Corporation's collateralized mortgage obligations and interest-only collateralized mortgage obligation (reported as "other"), which are classified in the "trading" category, are yield, constant prepayment rate, and weighted average life. Significant increases (decreases) in any of those inputs in isolation would result in significantly lower (higher) fair value measurement. Generally, a change in the assumption used for the constant prepayment rate will generate a directionally opposite change in the weighted average life. For example, as the average life is reduced by a higher constant prepayment rate, a lower yield will be realized, and when there is a reduction in the constant prepayment rate, the average life of these collateralized mortgage obligations will extend, thus resulting in a higher yield. These particular financial instruments are valued internally by the Corporation's investment banking and broker-dealer unit utilizing internal valuation techniques. The unobservable inputs incorporated into the internal discounted cash flow models used to derive the fair value of collateralized mortgage obligations and interest-only collateralized mortgage obligation (reported as "other"), which are classified in the "trading" category, are reviewed by the Corporation's Corporate Treasury unit on a quarterly basis. In the case of Level 3 financial instruments which fair value is based on broker quotes, the Corporation's Corporate Treasury unit reviews the inputs used by the broker-dealers for reasonableness utilizing information available from other published sources and validates that the fair value measurements were developed in accordance with ASC Topic 820. The Corporate Treasury unit also substantiates the inputs used by validating the prices with other broker-dealers, whenever possible.

Table of Contents

The significant unobservable inputs used in the fair value measurement of the Corporation's mortgage servicing rights are constant prepayment rates and discount rates. Increases in interest rates may result in lower prepayments. Discount rates vary according to products and / or portfolios depending on the perceived risk. Increases in discount rates result in a lower fair value measurement. The Corporation's Corporate Comptroller's unit is responsible for determining the fair value of MSR's, which is based on discounted cash flow methods based on assumptions developed by an external service provider, except for prepayment speeds, which are adjusted internally for the local market based on historical experience. The Corporation's Corporate Treasury unit validates the economic assumptions developed by the external service provider on a quarterly basis. In addition, an analytical review of prepayment speeds is performed quarterly by the Corporate Comptroller's unit. Significant variances in prepayment speeds are investigated by the Corporate Treasury unit. The Corporation's MSR Committee analyzes changes in fair value measurements of MSR's and approves the valuation assumptions at each reporting period. Changes in valuation assumptions must also be approved by the MSR Committee. The fair value of MSR's are compared with those of the external service provider on a quarterly basis in order to validate if the fair values are within the materiality thresholds established by management to monitor and investigate material deviations. Back-testing is performed to compare projected cash flows with actual historical data to ascertain the reasonability of the projected net cash flow results.

Following is a description of the Corporation's valuation methodologies used for assets and liabilities measured at fair value. The disclosure requirements exclude certain financial instruments and all non-financial instruments. Accordingly, the aggregate fair value amounts of the financial instruments disclosed do not represent management's estimate of the underlying value of the Corporation.

Trading Account Securities and Investment Securities Available-for-Sale

U.S. Treasury securities: The fair value of U.S. Treasury securities is based on yields that are interpolated from the constant maturity treasury curve. These securities are classified as Level 2.

Obligations of U.S. Government sponsored entities: The Obligations of U.S. Government sponsored entities include U.S. agency securities, which fair value is based on an active exchange market and on quoted market prices for similar securities. The U.S. agency securities are classified as Level 2.

Obligations of Puerto Rico, States and political subdivisions: Obligations of Puerto Rico, States and political subdivisions include municipal bonds. The bonds are segregated and the like characteristics divided into specific sectors. Market inputs used in the evaluation process include all or some of the following: trades, bid price or spread, two sided markets, quotes, benchmark curves including but not limited to Treasury benchmarks, LIBOR and swap curves, market data feeds such as those obtained from municipal market sources, discount and capital rates, and trustee reports. The municipal bonds are classified as Level 2.

Mortgage-backed securities: Certain agency mortgage-backed securities (MBS) are priced based on a bond's theoretical value derived from similar bonds defined by credit quality and market sector. Their fair value incorporates an option adjusted spread. The agency MBS are classified as Level 2. Other agency MBS such as GNMA Puerto Rico Serials are priced using an internally-prepared pricing matrix with quoted prices from local brokers dealers. These particular MBS are classified as Level 3.

Collateralized mortgage obligations: Agency and private-label collateralized mortgage obligations (CMOs) are priced based on a bond's theoretical value derived from similar bonds defined by credit quality and market sector and for which fair value incorporates an option adjusted spread. The option adjusted spread model includes prepayment and volatility assumptions, ratings (whole loans collateral) and spread adjustments. These CMOs are classified as Level 2. Other CMOs, due to their limited liquidity, are classified as Level 3 due to the insufficiency of inputs such as broker quotes, executed trades, credit information and cash flows.

Equity securities: Equity securities with quoted market prices obtained from an active exchange market are classified as Level 1. Other equity securities that do not trade in highly liquid markets are classified as Level 2.

Edgar Filing: POPULAR INC - Form 10-Q

Corporate securities, commercial paper and mutual funds (included as other in the trading account securities category): Quoted prices for these security types are obtained from broker dealers. Given that the quoted prices are for similar instruments or do not trade in highly liquid markets, these securities are classified as Level 2. The important

Table of Contents

variables in determining the prices of Puerto Rico tax-exempt mutual fund shares are net asset value, dividend yield and type of assets in the fund. All funds trade based on a relevant dividend yield taking into consideration the aforementioned variables. In addition, demand and supply also affect the price. Corporate securities that trade less frequently or are in distress are classified as Level 3.

Mortgage servicing rights

Mortgage servicing rights (MSRs) do not trade in an active market with readily observable prices. MSRs are priced internally using a discounted cash flow model. The discounted cash flow model incorporates assumptions that market participants would use in estimating future net servicing income, including portfolio characteristics, prepayments assumptions, discount rates, delinquency and foreclosure rates, late charges, other ancillary revenues, cost to service and other economic factors. Prepayment speeds are adjusted for the Corporation's loan characteristics and portfolio behavior. Due to the unobservable nature of certain valuation inputs, the MSRs are classified as Level 3.

Derivatives

Interest rate swaps, interest rate caps and indexed options are traded in over-the-counter active markets. These derivatives are indexed to an observable interest rate benchmark, such as LIBOR or equity indexes, and are priced using an income approach based on present value and option pricing models using observable inputs. Other derivatives are liquid and have quoted prices, such as forward contracts or to be announced securities (TBAs). All of these derivatives are classified as Level 2. The non-performance risk is determined using internally-developed models that consider the collateral held, the remaining term, and the creditworthiness of the entity that bears the risk, and uses available public data or internally-developed data related to current spreads that denote their probability of default.

Contingent consideration liability

The fair value of the true-up payment obligation (contingent consideration) to the FDIC as it relates to the Westernbank FDIC-assisted transaction was estimated using projected cash flows related to the loss sharing agreements at the true-up measurement date. It took into consideration the intrinsic loss estimate, asset premium/discount, cumulative shared loss payments, and the cumulative servicing amount related to the loan portfolio. Refer to Note 9 to the consolidated financial statements for a description of the formula established in the loss share agreements for determining the true-up payment.

On a quarterly basis, management evaluates and revises the estimated credit loss rates that are used to determine expected cash flows on the covered loan pools. The expected credit losses on the loan pools are used to determine the loss share cash flows expected to be paid to the FDIC when the true-up payment is due.

The true-up payment obligation was discounted using a term rate consistent with the time remaining until the payment is due. The discount rate was an estimate of the sum of the risk-free benchmark rate for the term remaining before the true-up payment is due and a risk premium to account for the credit risk profile of BPPR. The risk premium was calculated based on a 12-month trailing average spread of the yields on corporate bonds with credit ratings similar to BPPR.

Loans held-in-portfolio considered impaired under ASC Section 310-10-35 that are collateral dependent

The impairment is measured based on the fair value of the collateral, which is derived from appraisals that take into consideration prices in observed transactions involving similar assets in similar locations, in accordance with the provisions of ASC Section 310-10-35, and which could be subject to internal adjustments based on the age of the appraisal. Currently, the associated loans considered impaired are classified as Level 3.

Loans measured at fair value pursuant to lower of cost or fair value adjustments

Loans measured at fair value on a nonrecurring basis pursuant to lower of cost or fair value were priced based on secondary market prices and discounted cash flow models which incorporate internally-developed assumptions for prepayments and credit loss estimates. These loans are classified as Level 3.

Other real estate owned and other foreclosed assets

Other real estate owned includes real estate properties securing mortgage, consumer, and commercial loans. Other foreclosed assets include automobiles securing auto loans. The fair value of foreclosed assets may be determined using an external appraisal, broker price opinion, internal valuation or binding offer. The majority of these foreclosed assets are classified as Level 3 since they are subject to internal adjustments.

Certain foreclosed assets which are measured based on binding offers are classified as Level 2.

Table of Contents**Note 23 Fair value of financial instruments**

The fair value of financial instruments is the amount at which an asset or obligation could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Fair value estimates are made at a specific point in time based on the type of financial instrument and relevant market information. Many of these estimates involve various assumptions and may vary significantly from amounts that could be realized in actual transactions.

The information about the estimated fair values of financial instruments presented hereunder excludes all nonfinancial instruments and certain other specific items.

For those financial instruments with no quoted market prices available, fair values have been estimated using present value calculations or other valuation techniques, as well as management's best judgment with respect to current economic conditions, including discount rates, estimates of future cash flows, and prepayment assumptions.

The fair values reflected herein have been determined based on the prevailing interest rate environment at September 30, 2012 and December 31, 2011, as applicable. In different interest rate environments, fair value estimates can differ significantly, especially for certain fixed rate financial instruments. In addition, the fair values presented do not attempt to estimate the value of the Corporation's fee generating businesses and anticipated future business activities, that is, they do not represent the Corporation's value as a going concern. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Corporation.

Following is a description of the Corporation's valuation methodologies and inputs used to estimate the fair values for each class of financial assets and liabilities not measured at fair value, but for which the fair value is disclosed. The disclosure requirements exclude certain financial instruments and all non-financial instruments. Accordingly, the aggregate fair value amounts of the financial instruments disclosed do not represent management's estimate of the underlying value of the Corporation. For a description of the valuation methodologies and inputs used to estimate the fair value for each class of financial assets and liabilities measured at fair value, refer to Note 22.

Cash and due from banks

Cash and due from banks include cash on hand, cash items in process of collection, and non-interest bearing deposits due from other financial institutions. The carrying amount of cash and due from banks is a reasonable estimate of its fair value. Cash and due from banks are classified as Level 1.

Money market investments

Investments in money market instruments include highly liquid instruments with an average maturity of three months or less. For this reason, they carry a low risk of changes in value as a result of changes in interest rates, and the carrying amount approximates their fair value. Money market investments include federal funds sold, securities purchased under agreements to resell, time deposits with other banks, restricted cash, and excess balances held at the Federal Reserve. These money market investments are classified as Level 2, except for excess balances held at the Federal Reserve which are classified as Level 1.

Investment securities held-to-maturity

Obligations of Puerto Rico, States and political subdivisions: Municipal bonds include Puerto Rico public municipalities debt and bonds collateralized by second mortgages under the Home Purchase Stimulus Program. Puerto Rico public municipalities debt was valued internally based on benchmark treasury notes and a credit spread derived from comparable Puerto Rico government trades and recent issuances. Puerto Rico public municipalities debt is classified as Level 3. Given that the fair value of municipal bonds collateralized by second mortgages was based on internal yield and prepayment speed assumptions, these municipal bonds are classified as Level 3.

Agency collateralized mortgage obligation: The fair value of the agency collateralized mortgage obligation (CMO), which is guaranteed by GNMA, was based on internal yield and prepayment speed assumptions. This agency CMO is classified as Level 3.

Edgar Filing: POPULAR INC - Form 10-Q

Other: Other securities include foreign and corporate debt. Given that the fair value was based on quoted prices for similar instruments, foreign debt is classified as Level 2. The fair value of corporate debt, which is collateralized by municipal bonds of Puerto Rico, was internally derived from benchmark treasury notes and a credit spread based on comparable Puerto Rico government trades, similar securities, and/or recent issuances. Corporate debt is classified as Level 3.

Table of Contents*Other investment securities*

Federal Home Loan Bank capital stock: Federal Home Loan Bank (FHLB) capital stock represents an equity interest in the FHLB of New York. It does not have a readily determinable fair value because its ownership is restricted and it lacks a market. Since the excess stock is repurchased by the FHLB at its par value, the carrying amount of FHLB capital stock approximates fair value. Thus, these stocks are classified as Level 2.

Federal Reserve Bank capital stock: Federal Reserve Bank (FRB) capital stock represents an equity interest in the FRB of New York. It does not have a readily determinable fair value because its ownership is restricted and it lacks a market. Since the canceled stock is repurchased by the FRB for the amount of the cash subscription paid, the carrying amount of FRB capital stock approximates fair value. Thus, these stocks are classified as Level 2.

Trust preferred securities: These securities represent the equity-method investment in the common stock of these trusts. Book value is the same as fair value for these securities since the fair value of the junior subordinated debentures is the same amount as the fair value of the trust preferred securities issued to the public. The equity-method investment in the common stock of these trusts is classified as Level 2, except for that of Popular Capital Trust III (Troubled Asset Relief Program) which is classified as Level 3. Refer to Note 15 for additional information on these trust preferred securities.

Other investments: Other investments include private equity method investments and Visa Class B common stock held by the Corporation. Since there are no observable market values, private equity method investments are classified as Level 3. The Visa Class B common stock was priced by applying the quoted price of Visa Class A common stock, net of a liquidity adjustment, to the as converted number of Class A common shares since these Class B common shares are restricted and not convertible to Class A common shares until pending litigation is resolved. Thus, these stocks are classified as Level 3.

Loans held-for-sale

The fair value of certain impaired loans held-for-sale was based on a discounted cash flow model that assumes that no principal payments are received prior to the effective average maturity date, that the outstanding unpaid principal balance is reduced by a monthly net loss rate, and that the remaining unpaid principal balance is received as a lump sum principal payment at the effective average maturity date. The remaining unpaid principal balance expected to be received, which is based on the prior 12-month cash payment experience of these loans and their expected collateral recovery, was discounted using the interest rate currently offered to clients for the origination of comparable loans. These loans are classified as Level 3. For loans held-for-sale originated with the intent to sell in the secondary market, its fair value was determined using similar characteristics of loans and secondary market prices assuming the conversion to mortgage-backed securities. Given that the valuation methodology uses internal assumptions based on loan level data, these loans are classified as Level 3. The fair value of certain other loans held-for-sale is based on bids received from potential buyers; binding offers; or external appraisals, net of internal adjustments and estimated costs to sell. Loans held-for-sale based on binding offers are classified as Level 2. Loans held-for-sale based on indicative offers and/or external appraisals are classified as Level 3.

Loans held-in-portfolio

The fair values of the loans held-in-portfolio have been determined for groups of loans with similar characteristics. Loans were segregated by type such as commercial, construction, residential mortgage, consumer, and credit cards. Each loan category was further segmented based on loan characteristics, including interest rate terms, credit quality and vintage. Generally, fair values were estimated based on an exit price by discounting expected cash flows for the segmented groups of loans using a discount rate that considers interest, credit and expected return by market participant under current market conditions. Additionally, prepayment, default and recovery assumptions have been applied in the mortgage loan portfolio valuations. Generally accepted accounting principles do not require a fair valuation of the lease financing portfolio, therefore it is included in the loans total at its carrying amount. Loans held-in-portfolio are classified as Level 3.

FDIC loss share asset

Edgar Filing: POPULAR INC - Form 10-Q

Fair value of the FDIC loss share asset was estimated using projected net losses related to the loss sharing agreements, which are expected to be reimbursed by the FDIC. The projected net losses were discounted using the U.S. Government agency curve. The loss share asset is classified as Level 3.

Table of Contents

Deposits

Demand deposits: The fair value of demand deposits, which have no stated maturity, was calculated based on the amount payable on demand as of the respective dates. These demand deposits include non-interest bearing demand deposits, savings, NOW, and money market accounts. Thus, these deposits are classified as Level 2.

Time deposits: The fair value of time deposits was calculated based on the discounted value of contractual cash flows using interest rates being offered on time deposits with similar maturities. The non-performance risk was determined using internally-developed models that consider, where applicable, the collateral held, amounts insured, the remaining term, and the credit premium of the institution. For certain 5-year certificates of deposit in which customers may withdraw their money anytime with no penalties or charges, the fair value of these certificates of deposit incorporate an early cancellation estimate based on historical experience. Time deposits are classified as Level 2.

Assets sold under agreements to repurchase

Securities sold under agreements to repurchase (structured and non-structured): Securities sold under agreements to repurchase with short-term maturities approximate fair value because of the short-term nature of those instruments. Resell and repurchase agreements with long-term maturities were valued using discounted cash flows based on the three-month LIBOR. In determining the non-performance credit risk valuation adjustment, the collateralization levels of these long-term securities sold under agreements to repurchase were considered. In the case of callable structured repurchase agreements, the callable feature is not considered when determining the fair value of those repurchase agreements, since there is a remote possibility, based on forward rates, that the investor will call back these agreements before maturity since it is not expected that the interest rates would rise more than the specified interest rate of these agreements. Securities sold under agreements to repurchase (structured and non-structured) are classified as Level 2.

Other short-term borrowings

The carrying amount of other short-term borrowings approximate fair value because of the short-term maturity of those instruments or because they carry interest rates which approximate market. Thus, these other short-term borrowings are classified as Level 2.

Notes payable

FHLB advances: The fair value of FHLB advances was based on the discounted value of contractual cash flows over their contractual term. In determining the non-performance credit risk valuation adjustment, the collateralization levels of these advances were considered. These advances are classified as Level 2.

Medium-term notes: The fair value of publicly-traded medium-term notes was determined using recent trades of similar transactions. Publicly-traded medium-term notes are classified as Level 2. The fair value of non-publicly traded debt was based on remaining contractual cash outflows, discounted at a rate commensurate with the non-performance credit risk of the Corporation, which is subjective in nature. Non-publicly traded debt is classified as Level 3.

Junior subordinated deferrable interest debentures (related to trust preferred securities): The fair value of junior subordinated interest debentures was determined using recent trades of similar transactions. Thus, these junior subordinated deferrable interest debentures are classified as Level 2.

Edgar Filing: POPULAR INC - Form 10-Q

Junior subordinated deferrable interest debentures (Troubled Asset Relief Program): The fair value of junior subordinated deferrable interest debentures was based on the discounted value of contractual cash flows over their contractual term. The discount rate was based on the rate at which a similar security was priced in the open market. Thus, these junior subordinated deferrable interest debentures are classified as Level 3.

Others: The other category includes capital lease obligations. Generally accepted accounting principles do not require a fair valuation of capital lease obligations, therefore; it is included at its carrying amount. Capital lease obligations are classified as Level 3.

Table of Contents*Commitments to extend credit and letters of credit*

Commitments to extend credit were valued using the fees currently charged to enter into similar agreements. For those commitments where a future stream of fees is charged, the fair value was estimated by discounting the projected cash flows of fees on commitments. Since the fair value of commitments to extend credit varies depending on the undrawn amount of the credit facility, fees are subject to constant change, and cash flows are dependent on the creditworthiness of borrowers, commitments to extend credit are classified as Level 3. The fair value of letters of credit was based on fees currently charged on similar agreements. Given that the fair value of letters of credit constantly vary due to fees being subject to constant change and whether the fees are received depends on the creditworthiness of the account parties, letters of credit are classified as Level 3.

The following table presents the carrying or notional amounts, as applicable, and estimated fair values for financial instruments with their corresponding level in the fair value hierarchy.

(In thousands)	Carrying amount	September 30, 2012			Fair value	December 31, 2011

Letters of credit	154,745			2,285	2,285	136,341	2,339

[1] Refer to Note 22 to the consolidated financial statements for the fair value by class of financial asset and its hierarchy level.

[2] Refer to Note 14 to the consolidated financial statements for the composition of short-term borrowings.

Table of Contents**Note 24 Net income per common share**

The following table sets forth the computation of net income per common share (EPS), basic and diluted, for the quarters and nine months ended September 30, 2012 and 2011:

(In thousands, except per share information)	Quarter ended September 30,		Nine months ended September 30,	
	2012	2011	2012	2011
Net income	\$ 47,188	\$ 27,533	\$ 161,335	\$ 148,350
Preferred stock dividends	(931)	(931)	(2,792)	(2,792)
Net income applicable to common stock	\$ 46,257	\$ 26,602	\$ 158,543	\$ 145,558
Average common shares outstanding	102,451,410	102,166,004	102,363,099	102,147,450
Average potential dilutive common shares	33,550		182,375	104,270
Average common shares outstanding assuming dilution	102,484,960	102,166,004	102,545,474	102,251,720
Basic and dilutive EPS	\$ 0.45	\$ 0.26	\$ 1.55	\$ 1.42

Potential common shares consist of common stock issuable under the assumed exercise of stock options and restricted stock awards using the treasury stock method. This method assumes that the potential common shares are issued and the proceeds from exercise, in addition to the amount of compensation cost attributed to future services, are used to purchase common stock at the exercise date. The difference between the number of potential shares issued and the shares purchased is added as incremental shares to the actual number of shares outstanding to compute diluted earnings per share. Warrants, stock options, and restricted stock awards that result in lower potential shares issued than shares purchased under the treasury stock method are not included in the computation of dilutive earnings per share since their inclusion would have an antidilutive effect in earnings per common share.

For the quarter and nine months ended September 30, 2012, there were 164,195 and 166,810 weighted average antidilutive stock options outstanding, respectively (September 30, 2011 207,813 and 210,077). Additionally, the Corporation has outstanding a warrant issued to the U.S. Treasury to purchase 2,093,284 shares of common stock, which had an antidilutive effect at September 30, 2012.

Table of Contents**Note 25 Other service fees**

The caption of other services fees in the consolidated statements of operations consist of the following major categories:

(In thousands)	Quarter ended September 30,		Nine months ended September 30,	
	2012	2011	2012	2011
Debit card fees	\$ 8,772	\$ 13,075	\$ 27,348	\$ 39,795
Insurance fees	12,322	13,785	36,775	37,919
Credit card fees	14,576	13,738	41,403	36,106
Sale and administration of investment products	9,511	9,915	28,045	24,702
Mortgage servicing fees, net of fair value adjustments	9,857	2,120	29,123	10,649
Trust fees	3,977	4,006	12,127	11,611
Processing fees	1,406	1,684	4,819	5,121
Other fees	4,363	4,341	13,210	13,720
Total other services fees	\$ 64,784	\$ 62,664	\$ 192,850	\$ 179,623

Note 26 FDIC loss share (expense) income

The caption of FDIC loss share (expense) income in the consolidated statements of operations consists of the following major categories:

(In thousands)	Quarters ended September 30,		Nine months ended September 30,	
	2012	2011	2012	2011
(Amortization) accretion of loss share indemnification asset	\$ (29,184)	\$ (21,072)	\$ (95,972)	\$ 13,361
80% mirror accounting on credit impairment losses ^[1]	18,095	20,458	60,943	71,787
80% mirror accounting on reimbursable expenses ^[2]	7,378	(447)	19,846	570
80% mirror accounting on discount accretion on loans unfunded commitments accounted for under ASC 310-20	(248)	(2,916)	(744)	(32,919)
Change in true-up payment obligation	(2,991)	(1,640)	(4,849)	(4,684)
Other	243	256	1,389	1,229
Total FDIC loss share (expense) income	\$ (6,707)	\$ (5,361)	\$ (19,387)	\$ 49,344

[1] Reductions in expected cash flows for ASC 310-30 loans, which may impact the provision for loan losses, may consider reductions in both principal and interest cash flow expectations. The amount covered under the FDIC loss sharing agreements for interest not collected from borrowers is limited under the agreements (approximately 90 days); accordingly, these amounts are not subject fully to the 80% mirror accounting.

[2] Amounts presented are net of the mirror accounting on gains on sales of foreclosed assets.

Table of Contents**Note 27 Pension and postretirement benefits**

The Corporation has a non-contributory defined benefit pension plan and supplementary pension benefit restoration plans for regular employees of certain of its subsidiaries. The accrual of benefits under the plans is frozen to all participants.

The components of net periodic pension cost for the periods presented were as follows:

(In thousands)	Pension Plan		Benefit Restoration Plans	
	Quarters ended September 30, 2012	2011	Quarters ended September 30, 2012	2011
Interest Cost	\$ 7,495	\$ 7,784	\$ 393	\$ 395
Expected return on plan assets	(9,810)	(10,840)	(526)	(450)
Amortization of net loss	5,426	2,829	323	148
Total net periodic pension cost (benefit)	\$ 3,111	\$ (227)	\$ 190	\$ 93

(In thousands)	Pension Plans		Benefit Restoration Plans	
	Nine months ended September 30, 2012	2011	Nine months ended September 30, 2012	2011
Interest Cost	\$ 22,486	\$ 23,354	\$ 1,179	\$ 1,186
Expected return on plan assets	(29,430)	(32,521)	(1,578)	(1,350)
Amortization of net loss	16,277	8,486	969	443
Total net periodic pension cost (benefit)	\$ 9,333	\$ (681)	\$ 570	\$ 279

The Corporation did not make any contributions to the pension and benefit restoration plans during the quarter and nine months ended September 30, 2012. The total contributions expected to be paid during the year 2012 for the pension and benefit restoration plans amount to approximately \$58 million.

The Corporation also provides certain postretirement health care benefits for retired employees of certain subsidiaries. The table that follows presents the components of net periodic postretirement benefit cost.

(In thousands)	Postretirement Benefit Plan			
	Quarters ended September 30, 2012	2011	Nine months ended September 30, 2012	2011
Service cost	\$ 548	\$ 504	\$ 1,642	\$ 1,512
Interest cost	1,950	2,135	5,851	6,405
Amortization of prior service cost	(50)	(240)	(150)	(720)
Amortization of net loss	540	267	1,621	801
Total net periodic postretirement benefit cost	\$ 2,988	\$ 2,666	\$ 8,964	\$ 7,998

Contributions made to the postretirement benefit plan for the quarter and nine months ended September 30, 2012 amounted to approximately \$1.8 million and \$5.6 million, respectively. The total contributions expected to be paid during the year 2012 for the postretirement benefit plan amount to approximately \$7.4 million.

Table of Contents**Note 28 Stock-based compensation**

The Corporation maintained a Stock Option Plan (the "Stock Option Plan"), which permitted the granting of incentive awards in the form of qualified stock options, incentive stock options, or non-statutory stock options of the Corporation. In April 2004, the Corporation's shareholders adopted the Popular, Inc. 2004 Omnibus Incentive Plan (the "Incentive Plan"), which replaced and superseded the Stock Option Plan. The adoption of the Incentive Plan did not alter the original terms of the grants made under the Stock Option Plan prior to the adoption of the Incentive Plan.

Stock Option Plan

Employees and directors of the Corporation or any of its subsidiaries were eligible to participate in the Stock Option Plan. The Board of Directors or the Compensation Committee of the Board had the absolute discretion to determine the individuals that were eligible to participate in the Stock Option Plan. This plan provided for the issuance of Popular, Inc.'s common stock at a price equal to its fair market value at the grant date, subject to certain plan provisions. The shares are to be made available from authorized but unissued shares of common stock or treasury stock. The Corporation's policy has been to use authorized but unissued shares of common stock to cover each grant. The maximum option term is ten years from the date of grant. Unless an option agreement provides otherwise, all options granted are 20% exercisable after the first year and an additional 20% is exercisable after each subsequent year, subject to an acceleration clause at termination of employment due to retirement.

(Not in thousands)		Weighted-average exercise price of options outstanding	Weighted-average remaining life of options outstanding in years	Options exercisable (fully vested)	Weighted-average exercise price of options exercisable
Exercise price range per share	Options outstanding				
\$ 158.35 - \$185.00	57,987	\$ 167.67	0.45	57,987	\$ 167.67
\$ 192.50 - \$272.00	106,208	\$ 252.32	1.75	106,208	\$ 252.32
\$ 158.35 - \$272.00	164,195	\$ 222.43	1.29	164,195	\$ 222.43

There was no intrinsic value of options outstanding and exercisable at September 30, 2012 and 2011.

The following table summarizes the stock option activity and related information:

(Not in thousands)	Options Outstanding	Weighted-Average Exercise Price
Outstanding at December 31, 2010	227,518	\$ 206.71
Granted		
Exercised		
Forfeited		
Expired	(20,572)	195.48
Outstanding at December 31, 2011	206,946	\$ 207.83
Granted		
Exercised		
Forfeited		
Expired	(42,751)	151.74
Outstanding at September 30, 2012	164,195	\$ 222.43

The stock options exercisable at September 30, 2012 totaled 164,195 (September 30, 2011 - 207,813). There were no stock options exercised during the quarters and nine months ended September 30, 2012 and 2011. Thus, there was no intrinsic value of options exercised during the quarters and nine months ended September 30, 2012 and 2011.

Edgar Filing: POPULAR INC - Form 10-Q

There were no new stock option grants issued by the Corporation under the Stock Option Plan during 2011 and 2012.

There was no stock option expense recognized for the quarters and nine months ended September 30, 2012 and 2011.

Table of Contents*Incentive Plan*

The Incentive Plan permits the granting of incentive awards in the form of Annual Incentive Awards, Long-term Performance Unit Awards, Stock Options, Stock Appreciation Rights, Restricted Stock, Restricted Units or Performance Shares. Participants in the Incentive Plan are designated by the Compensation Committee of the Board of Directors (or its delegate as determined by the Board). Employees and directors of the Corporation and/or any of its subsidiaries are eligible to participate in the Incentive Plan.

Under the Incentive Plan, the Corporation has issued restricted shares, which become vested based on the employees' continued service with Popular. Unless otherwise stated in an agreement, the compensation cost associated with the shares of restricted stock is determined based on a two-prong vesting schedule. The first part is vested ratably over five years commencing at the date of grant and the second part is vested at termination of employment after attainment of 55 years of age and 10 years of service. The five-year vesting part is accelerated at termination of employment after attaining 55 years of age and 10 years of service. The restricted shares granted consistent with the requirements of the Troubled Asset Relief Program (TARP) Interim Final Rule vest in two years from grant date.

The following table summarizes the restricted stock activity under the Incentive Plan for members of management.

(Not in thousands)	Restricted Stock	Weighted-Average Grant Date Fair Value
Non-vested at December 31, 2010	113,174	\$ 36.06
Granted	155,945	32.35
Vested	(5,156)	89.97
Forfeited	(22,029)	42.03
Non-vested at December 31, 2011	241,934	\$ 31.98
Granted	359,427	17.72
Vested	(95,543)	37.78
Forfeited	(9,036)	27.02
Non-vested at September 30, 2012	496,782	\$ 20.64

During the quarters ended September 30, 2012 and 2011, there were no shares of restricted stock awarded to management under the Incentive Plan. For the nine -month period ended September 30, 2012, 359,427 shares of restricted stock (September 30, 2011 155,945) were awarded to management under the Incentive Plan, from which 253,170 shares (September 30, 2011 111,045) were awarded to management consistent with the requirements of the TARP Interim Final Rule.

During the quarter ended September 30, 2012, the Corporation recognized \$ 1.1 million of restricted stock expense related to management incentive awards, with a tax benefit of \$ 0.3 million (September 30, 2011 \$ 0.3 million, with a tax benefit of \$ 49 thousand). For the nine -month period ended September 30, 2012, the Corporation recognized \$ 3.2 million of restricted stock expense related to management incentive awards, with a tax benefit of \$ 0.8 million (September 30, 2011 \$ 1.5 million, with a tax benefit of \$ 0.4 million). During the quarter ended September 30, 2012, there was vesting of restricted stock. For the nine -month period ended September 30, 2012, the fair market value of the restricted stock vested was \$2.7 million at grant date and \$1.6 million at vesting date. This triggers a shortfall of \$0.3 million that was recorded as an additional income tax expense at the applicable income tax rate. No additional income tax expense was recorded for the U.S. employees due to the valuation allowance of the deferred tax asset. The total unrecognized compensation cost related to non-vested restricted stock awards and performance shares to members of management at September 30, 2012 was \$ 13 million and is expected to be recognized over a weighted-average period of 1.1 years.

The following table summarizes the restricted stock activity under the Incentive Plan for members of the Board of Directors:

Table of Contents

(Not in thousands)	Restricted Stock	Weighted-Average Grant Date Fair Value
Non-vested at December 31, 2010		
Granted	30,163	\$ 26.72
Vested	(30,163)	26.72
Forfeited		
Non-vested at December 31, 2011		
Granted	37,800	\$ 16.11
Vested	(37,800)	16.11
Forfeited		
Non-vested at September 30, 2012		

During the quarter ended September 30, 2012, the Corporation granted 3,322 shares of restricted stock to members of the Board of Directors of Popular, Inc., which became vested at grant date (September 30, 2011 2,792). During this period, the Corporation recognized \$0.1 million of restricted stock expense related to these restricted stock grants, with a tax benefit of \$32 thousand (September 30, 2011 \$0.1 million, with a tax benefit of \$35 thousand). For the nine -month period ended September 30, 2012, the Corporation granted 37,800 shares of restricted stock to members of the Board of Directors of Popular, Inc., which became vested at grant date (September 30, 2011 24,662). During this period, the Corporation recognized \$0.3 million of restricted stock expense related to these restricted stock grants, with a tax benefit of \$0.1 million (September 30, 2011 \$0.3 million, with a tax benefit of \$0.1 million). The fair value at vesting date of the restricted stock vested during the nine months ended September 30, 2012 for directors was \$ 0.6 million.

Table of Contents**Note 29 Income taxes**

Income tax expense (benefit) differed from the amounts computed by applying the Puerto Rico income tax rate of 30 percent to pre-tax income as a result of the following:

(In thousands)	Quarters ended			
	September 30, 2012		September 30, 2011	
	Amount	% of pre-tax income	Amount	% of pre-tax income
Computed income tax at statutory rates	\$ 18,772	30%	\$ 9,921	30%
Net benefit of net tax exempt interest income	(7,625)	(12)	(7,779)	(23)

Income tax (benefit) expense	\$ (46,317)	(40)%	\$ 114,664	44%

[1] Represents the impact of the Ruling and Closing Agreement with the P.R. Treasury signed in June 2011.

[2] Includes the impact of the Closing Agreement with the P.R. Treasury signed in June 2012 as adjusted as of September 30, 2012.

The results for the nine months ended September 30, 2012 reflect a tax benefit of \$72.9 million, recorded during the second quarter, related to the reduction of the deferred tax liability on the estimated gains for tax purposes related to the loans acquired from Westernbank (the Acquired Loans). In June 2012, the Puerto Rico Department of the Treasury (the P.R. Treasury) and the Corporation entered into a Closing Agreement (the Closing Agreement) to clarify that the Acquired Loans are a capital asset and any gain resulting from such loans will be taxed at the capital gain tax rate of 15% instead of the ordinary income tax rate of 30%, thus reducing the deferred tax liability on the estimated gain and recognizing an income tax benefit for accounting purposes.

Table of Contents

The results for the nine months ended September 30, 2011 reflect an income tax expense of \$ 103.3 million due to the effect on the net deferred tax asset of the reduction in the marginal corporate income tax rate from 39% to 30% as a result of the enactment on January 31, 2011 of a new Internal Revenue Code in Puerto Rico. The results also reflect a tax benefit of \$53.6 million as a result of a private ruling and a Closing Agreement entered into with the P.R. Treasury. In June 2011, the P.R. Treasury and the Corporation signed a Closing Agreement in which both parties agreed that for tax purposes the deductions related to certain charge-offs recorded on the financial statements of the Corporation for years 2009 and 2010 will be deferred until years 2013 through 2016. The tax benefit arises from the recovery of certain tax benefits not previously recorded during 2009 (the benefit of reduced tax rates for capital gains) and 2010 (the benefit of exempt income) that were previously unavailable to the Corporation as a result of being in a loss position during such years.

The effective tax rate for the Corporation's Puerto Rico banking operations for 2012 is estimated at 15.8%.

The following table presents the components of the Corporation's deferred tax assets and liabilities.

(In thousands)	September 30, 2012	December 31, 2011
Deferred tax assets:		
Tax credits available for carryforward	\$ 3,633	\$ 3,459
Net operating loss and other carryforward available	1,195,338	1,174,488
Postretirement and pension benefits	102,796	104,663
Deferred loan origination fees	6,813	6,788
Allowance for loan losses	599,030	605,105
Deferred gains	10,836	11,763
Accelerated depreciation	5,798	5,527
Intercompany deferred gains	3,792	4,344
Other temporary differences	35,972	27,661
Total gross deferred tax assets	1,964,008	1,943,798
Deferred tax liabilities:		
Differences between the assigned values and the tax bases of assets and liabilities recognized in purchase business combinations	35,906	32,293
Difference in outside basis between financial and tax reporting on sale of a business	8,155	20,721
FDIC-assisted transaction	57,293	142,000
Unrealized net gain on trading and available-for-sale securities	55,833	73,991
Deferred loan origination costs	3,273	4,277
Other temporary differences	7,252	6,507
Total gross deferred tax liabilities	167,712	279,789
Valuation allowance	1,261,594	1,259,358
Net deferred tax asset	\$ 534,702	\$ 404,651

The net deferred tax asset shown in the table above at September 30, 2012 is reflected in the consolidated statements of financial condition as \$546 million in net deferred tax assets (in the Other assets caption) (December 31, 2011 \$430 million) and \$11 million in deferred tax liabilities in the Other liabilities caption (December 31, 2011 \$25 million), reflecting the aggregate deferred tax assets or liabilities of individual tax-paying subsidiaries of the Corporation.

A deferred tax asset should be reduced by a valuation allowance if based on the weight of all available evidence, it is more likely than not (a likelihood of more than 50%) that some portion or the entire deferred tax asset will not be realized. The valuation allowance should be sufficient to reduce the deferred tax asset to the amount that is more likely than not to be realized. The determination of whether a deferred tax asset is realizable is based on weighting all available evidence, including both positive and negative evidence. The realization of deferred tax assets, including carryforwards and deductible temporary differences, depends upon the existence of sufficient taxable income of the same character

Edgar Filing: POPULAR INC - Form 10-Q

during the carryback or carryforward period. The analysis considers all sources of taxable income available to realize the deferred tax asset, including the future reversal of existing taxable

Table of Contents

temporary differences, future taxable income exclusive of reversing temporary differences and carryforwards, taxable income in prior carryback years and tax-planning strategies.

The Corporation's U.S. mainland operations are in a cumulative loss position for the three-year period ended September 30, 2012. For purposes of assessing the realization of the deferred tax assets in the U.S. mainland, this cumulative taxable loss position is considered significant negative evidence and has caused management to conclude that it is more likely than not that the Corporation will not be able to realize the associated deferred tax assets in the future. At September 30, 2012, the Corporation recorded a valuation allowance of approximately \$ 1.3 billion on the deferred tax assets of its U.S. operations (December 31, 2011 \$ 1.3 billion).

At September 30, 2012, the Corporation's net deferred tax assets related to its Puerto Rico operations amounted to \$561 million. The Corporation's Puerto Rico banking operation is in a cumulative loss position for the three-year period ended September 30, 2012 taking into account taxable income exclusive of temporary differences. This cumulative loss position was mainly due to the performance of the construction and commercial real estate loan portfolios in prior years, including the losses related to the reclassification and sale of certain loans pertaining to those portfolios. The Corporation weighs all available positive and negative evidence to assess the realization of the deferred tax asset. Positive evidence assessed included (i) the Corporation's Puerto Rico banking operations very strong earnings history; (ii) consideration that the event causing the cumulative loss position is not a continuing condition of the operations; (iii) new legislation extending the period of carryover of net operating losses to ten years; (iv) unrealized gain on appreciated assets that could be realized to increase taxable income; and (v) the financial results of the operations showed an improvement in the profitability of the business during 2011 and first three quarters of 2012. Accordingly, there is enough positive evidence to outweigh the negative evidence of the cumulative loss. Based on this evidence, the Corporation has concluded that it is more-likely-than-not that such net deferred tax asset will be realized.

The reconciliation of unrecognized tax benefits was as follows:

(In millions)	2012	2011
Balance at January 1	\$ 19.5	\$ 26.3
Additions for tax positions January through March	0.7	2.2
Reduction as a result of settlements January through March		(4.4)
Balance at March 31	\$ 20.2	\$ 24.1
Additions for tax positions April through June		0.8
Additions for tax positions taken in prior years April through June		2.1
Reduction for tax positions April through June	(0.2)	
Reduction for tax positions taken in prior years April through June	(0.7)	
Balance at June 30	\$ 19.3	\$ 27.0
Additions for tax positions July through September	0.2	0.3
Reduction as a result of lapse of statute of limitations July through September	(6.3)	(6.0)
Balance at September 30	\$ 13.2	\$ 21.3

The accrued interest related to uncertain tax positions approximated \$4.1 million at September 30, 2012 (December 31, 2011 \$5.5 million). Management determined that at September 30, 2012 and December 31, 2011, there was no need to accrue for the payment of penalties.

After consideration of the effect on U.S. federal tax of unrecognized U.S. state tax benefits, the total amount of unrecognized tax benefits, including U.S. and Puerto Rico, that if recognized, would affect the Corporation's effective tax rate, was approximately \$16.4 million at September 30, 2012 (September 30, 2011 \$25.6 million).

The amount of unrecognized tax benefits may increase or decrease in the future for various reasons including adding amounts for current tax year positions, expiration of open income tax returns due to the statutes of limitation, changes in management's

Table of Contents

judgment about the level of uncertainty, status of examinations, litigation and legislative activity and the addition or elimination of uncertain tax positions.

The Corporation and its subsidiaries file income tax returns in Puerto Rico, the U.S. federal jurisdiction, various U.S. states and political subdivisions, and foreign jurisdictions. At September 30, 2012, the following years remain subject to examination in the U.S. Federal jurisdiction: 2009 and thereafter; and in the Puerto Rico jurisdiction, 2008 and thereafter. The Corporation anticipates a reduction in the total amount of unrecognized tax benefits within the next 12 months, which could amount to approximately \$8 million.

Table of Contents**Note 30 Supplemental disclosure on the consolidated statements of cash flows**

Additional disclosures on cash flow information and non-cash activities for the nine months ended September 30, 2012 and September 30, 2011 are listed in the following table:

(In thousands)	September 30, 2012	September 30, 2011
Non-cash activities:		
Loans transferred to other real estate	\$ 218,798	\$ 139,807
Loans transferred to other property	18,970	20,690
Total loans transferred to foreclosed assets	237,768	160,497
Transfers from loans held-in-portfolio to loans held-for-sale	55,826	53,618
Transfers from loans held-for-sale to loans held-in-portfolio	10,325	27,234
Loans securitized into investment securities ^[1]	834,352	829,927
Trades receivables from brokers and counterparties	287,322	855,567
Trades payables to brokers and counterparties	71,698	
Recognition of mortgage servicing rights on securitizations or asset transfers	12,842	15,651
Loans sold to a joint venture in exchange for an acquisition loan and an equity interest in the joint venture		102,353

[1] Includes loans securitized into trading securities and subsequently sold before quarter end.

Table of Contents

Note 31 Segment reporting

The Corporation's corporate structure consists of two reportable segments - Banco Popular de Puerto Rico and Banco Popular North America.

Management determined the reportable segments based on the internal reporting used to evaluate performance and to assess where to allocate resources. The segments were determined based on the organizational structure, which focuses primarily on the markets the segments serve, as well as on the products and services offered by the segments.

Banco Popular de Puerto Rico:

Given that Banco Popular de Puerto Rico constitutes a significant portion of the Corporation's results of operations and total assets at September 30, 2012, additional disclosures are provided for the business areas included in this reportable segment, as described below:

Commercial banking represents the Corporation's banking operations conducted at BPPR, which are targeted mainly to corporate, small and middle size businesses. It includes aspects of the lending and depository businesses, as well as other finance and advisory services. BPPR allocates funds across business areas based on duration matched transfer pricing at market rates. This area also incorporates income related with the investment of excess funds, as well as a proportionate share of the investment function of BPPR.

Consumer and retail banking represents the branch banking operations of BPPR which focus on retail clients. It includes the consumer lending business operations of BPPR, as well as the lending operations of Popular Auto and Popular Mortgage. Popular Auto focuses on auto and lease financing, while Popular Mortgage focuses principally on residential mortgage loan originations. The consumer and retail banking area also incorporates income related with the investment of excess funds from the branch network, as well as a proportionate share of the investment function of BPPR.

Other financial services include the trust and asset management service units of BPPR, the brokerage and investment banking operations of Popular Securities, and the insurance agency and reinsurance businesses of Popular Insurance, Popular Insurance V.I., Popular Risk Services, and Popular Life Re. Most of the services that are provided by these subsidiaries generate profits based on fee income.

Banco Popular North America:

Banco Popular North America's reportable segment consists of the banking operations of BPNA, E-LOAN, Popular Equipment Finance, Inc. and Popular Insurance Agency, U.S.A. BPNA operates through a retail branch network in the U.S. mainland, while E-LOAN supports BPNA's deposit gathering through its online platform. All direct lending activities at E-LOAN were ceased during the fourth quarter of 2008. Popular Equipment Finance, Inc. also holds a running-off loan portfolio as this subsidiary ceased originating loans during 2009. Popular Insurance Agency, U.S.A. offers investment and insurance services across the BPNA branch network.

The Corporate group consists primarily of the holding companies: Popular, Inc., Popular North America, Popular International Bank and certain of the Corporation's investments accounted for under the equity method, including EVERTEC and Centro Financiero BHD, S.A. The Corporate group also includes the expenses of certain corporate areas that are identified as critical to the organization: Finance, Risk Management and Legal.

The accounting policies of the individual operating segments are the same as those of the Corporation. Transactions between reportable segments are primarily conducted at market rates, resulting in profits that are eliminated for reporting consolidated results of operations.

Note 32 Subsequent events

Subsequent events are events and transactions that occur after the balance sheet date but before the financial statements are issued. The effects of subsequent events and transactions are recognized in the financial statements when they provide additional evidence about conditions that existed at the balance sheet date. The Corporation has evaluated events and transactions occurring subsequent to September 30, 2012. Such evaluation resulted in no adjustments or additional disclosures in the consolidated financial statements for the quarter and nine months ended September 30, 2012, other than information updated in the legal proceedings in Note 19.

Table of Contents

Note 33 Condensed consolidating financial information of guarantor and issuers of registered guaranteed securities

The following condensed consolidating financial information presents the financial position of Popular, Inc. Holding Company (PIHC) (parent only), Popular North America, Inc. (PNA) and all other subsidiaries of the Corporation at September 30, 2012 and December 31, 2011, and the results of their operations and cash flows for periods ended September 30, 2012 and 2011.

PNA is an operating, wholly-owned subsidiary of PIHC and is the holding company of its wholly-owned subsidiaries: Equity One, Inc. and Banco Popular North America (BPNA), including BPNA 's wholly-owned subsidiaries Popular Equipment Finance, Inc., Popular Insurance Agency, U.S.A., and E-LOAN, Inc.

PIHC fully and unconditionally guarantees all registered debt securities issued by PNA.

Popular International Bank, Inc. (PIBI) is a wholly-owned subsidiary of PIHC and is the holding company of its wholly-owned subsidiaries Popular Insurance V.I., Inc. and Tarjetas y Transacciones en Red Tranred, C.A. Effective January 1, 2012, PNA, which was a wholly-owned subsidiary of PIBI prior to that date, became a direct wholly-owned subsidiary of PIHC after an internal reorganization. Since the internal reorganization, PIBI is no longer a bank holding company and is no longer a potential issuer of the Corporation 's debt securities. PIBI has no outstanding registered debt securities that would also be guaranteed by PIHC.

A potential source of income for PIHC consists of dividends from BPPR and BPNA. Under existing federal banking regulations any dividend from BPPR or BPNA to the PIHC could be made if the total of all dividends declared by each entity during the calendar year would not exceed the total of its net income for that year, as defined by the Federal Reserve Board, combined with its retained net income for the preceding two years, less any required transfers to surplus or to a fund for the retirement of any preferred stock. Under this test, at September 30, 2012, BPPR could have declared a dividend of approximately \$371 million (December 31, 2011 \$243 million). Currently, the prior approval of the Federal Reserve Bank of New York and the Office of the Commissioner of Financial Institutions in Puerto Rico is necessary for the payments of any dividends by BPPR to PIHC. Prior approval of the Federal Reserve Bank of New York is also necessary for the payments of any dividends by BPNA to PIHC.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report includes management's discussion and analysis (MD&A) of the consolidated financial position and financial performance of Popular, Inc. (the Corporation or Popular). All accompanying tables, financial statements and notes included elsewhere in this report should be considered an integral part of this analysis.

The Corporation is a diversified, publicly-owned financial holding company subject to the supervision and regulation of the Board of Governors of the Federal Reserve System. The Corporation has operations in Puerto Rico, the United States (U.S.) mainland, and the U.S. and British Virgin Islands. In Puerto Rico, the Corporation provides retail and commercial banking services through its principal banking subsidiary, Banco Popular de Puerto Rico (BPPR), as well as mortgage banking, investment banking, broker-dealer, auto and equipment leasing and financing, and insurance services through specialized subsidiaries. In the U.S. mainland, the Corporation operates Banco Popular North America (BPNA), including its wholly-owned subsidiary E-LOAN. BPNA focuses efforts and resources on the core community banking business. BPNA, under the name Popular Community Bank, operates branches in New York, California, Illinois, New Jersey and Florida. E-LOAN markets deposit accounts under its name for the benefit of BPNA. Note 31 to the consolidated financial statements presents information about the Corporation's business segments. The Corporation has a 48.5% interest in EVERTEC, which provides transaction processing services throughout the Caribbean and Latin America, including servicing many of the Corporation's system infrastructures and transaction processing businesses.

OVERVIEW

Edgar Filing: POPULAR INC - Form 10-Q

The third quarter of 2012, which marks the seventh consecutive profitable quarter for the Corporation. Net income amounted to \$47.2 million for the quarter ended September 30, 2012, compared with net income of \$27.5 million for the same quarter of the previous year. For the nine months ended September 30, 2012, net income amounted to \$161.3 million, compared with net income of \$148.4 million for the same period in 2011.

Table of Contents**Main events for the quarter ended September 30, 2012**

Credit quality metrics of the non-covered loan portfolio continued to improve during the third quarter of 2012. Non-performing assets declined by \$57 million or 3% to \$1.9 billion from June 30, 2012, down 22% from its peak in the third quarter of 2010, and were at their lowest level since the second quarter of 2009. This decline was primarily attributable to a decline in non-performing loans held-for-sale by \$70 million or 39% from June 30, 2012. In addition, net charge-offs declined for the fourth consecutive quarter.

Taxable equivalent net interest margin increased to 4.50% for the quarter ended September 30, 2012, from 4.43% for the quarter ended June 30, 2012. The improvement in margin was driven largely by reduced funding costs. During the second quarter of 2012 BPPR canceled \$350 million of structured repurchase agreements and recorded \$25 million in prepayment expense. The Corporation replaced high-cost structured repurchase agreements and maturing brokered deposits with short-term borrowings at lower costs. The discussion that follows provides highlights of the Corporation's results of operations for the quarter ended September 30, 2012, compared to the results of operations for the same quarter of the previous year. It also provides some highlights with respect to the Corporation's financial condition, credit quality, capital and liquidity.

Financial highlights for the quarter ended September 30, 2012

Taxable equivalent net interest income was \$343.4 million for the third quarter of 2012, down \$25.9 million, or 7%, from the same quarter of the prior year. The 6-basis-point decrease in the net interest margin from 4.56% to 4.50% was mainly attributable to a lower average yield in earning assets by 38 basis points primarily in covered loans due to the resolution of certain commercial loans during 2011; non-covered mortgage loans resulting mainly from purchases and originations under a lower interest rate scenario; and investment securities as a result of higher prepayment activity and reinvestments at a lower rate; partially offset by a decrease in the cost of funds by 32 basis points, mainly from deposits and other short-term borrowings as a result of the Corporation's strategy to continue to reduce its funding costs. In addition, the full repayment of the FDIC note during 2011 and the early cancellation of high-cost repurchase agreements during the second quarter contributed to the decrease in interest expense. Refer to the Net Interest Income section of this MD&A for a discussion of the major variances in net interest income, including yields and costs.

The Corporation continued its improvement in credit quality in both the Puerto Rico and U.S. mainland operations, which was reflected in improved credit metrics, such as the level of net charge-offs and non-performing loans, during the third quarter of the current year. Net charge-offs in the third quarter were at the lowest level since the first quarter of 2008. Also, non-performing loans held-in-portfolio were 34% lower than peak levels in the third quarter of 2010.

Provision for loan losses decreased by \$70.1 million or 40% for the third quarter of 2012 compared with the same quarter of the previous year, principally in the non-covered loan portfolio. The provision for loan losses for non-covered loans for the third quarter of 2012 reflected lower net charge-offs by \$39.4 million in both the P.R. and U.S. mainland operations, including reductions in all non-covered loan portfolio categories except for the mortgage loan category which experienced higher reserve requirements prompted by higher loss trends and higher specific reserves for loans restructured under loss mitigation programs. During the quarter, there was also a reduction in the allowance for loan losses, mainly from the commercial and consumer loan portfolios, as a result of continued improvement in credit trends, which was partially offset by the previously mentioned increase in general and specific reserves in the mortgage loan portfolio. During the third quarter of 2012, the annualized net charge-offs to average non-covered loans held-in-portfolio ratio fell to 1.92% in Puerto Rico and to 1.74% in the U.S. mainland operations from 2.49% and 3.00%, respectively, during the quarter ended September 30, 2011.

In addition, the non-covered non-performing loan portfolio declined by \$187 million to \$1.6 billion, down 11% from December 31, 2011, mainly due to improvements in all loan categories. Non-performing loans held-for-sale, excluding covered loans, also declined by \$153 million or 58% from December 31, 2011 driven principally by certain construction loans in the BPPR reportable segment which were resolved.

The improvements in credit quality led to a decrease in the allowance for loan losses to non-covered loans held-in-portfolio ratio from 3.35% at December 31, 2011 to 3.07% at September 30, 2012. The general and specific reserves related to non-covered loans amounted to \$529 million and \$107 million, respectively, at September 30, 2012, compared

Table of Contents

with \$631 million and \$59 million, respectively, at December 31, 2011. The decrease in the general reserve component was mainly driven by lower loss trends in the commercial and consumer loan portfolios, partially offset by higher general reserves in the residential loan portfolio of the BPPR reportable segment. The increase in the specific reserves of the residential loan portfolio of the BPPR reportable segment was mainly the result of loans restructured under loss mitigation programs.

Non-interest income decreased by \$6.7 million or 5% to \$115.7 million for the quarter ended September 30, 2012, compared with \$122.4 million for the same quarter in the previous year. This decrease was the result of the \$8.5 million gain on sale of available-for-sale FHLB notes during the third quarter of 2011 and higher trading account losses by \$5.2 million on mortgage-backed securities, partially offset by higher other operating income by \$6.5 million mostly resulting from lower net losses on equity-method investments, net of intra-entity eliminations. Refer to the Non-Interest Income section of this MD&A for additional information on the main variances that affected the non-interest income categories.

Total operating expenses increased by \$8.0 million or 3% for the third quarter of 2012, when compared with the same quarter of the previous year, principally due to higher professional fees by \$4.7 million due to loan collection efforts and higher OREO expenses by \$2.7 million related to higher subsequent fair value adjustments on commercial and construction properties. Refer to the Operating Expenses section in this MD&A for additional explanations on the factors that influenced the variances in the different operating expense categories.

Income tax expense amounted to \$15.4 million for the quarter ended September 30, 2012, compared with an income tax expense of \$5.5 million for the same period of the previous year, primarily due to higher income recognized by the Puerto Rico operations. Refer to the Income Taxes section of this MD&A for additional factors that affected this variance.

Total assets amounted to \$36.5 billion at September 30, 2012, compared with \$37.3 billion at December 31, 2011. Money market investments declined by \$451 million mainly as a result of a decrease in excess balances held at the Federal Reserve. In addition, total loans held-in-portfolio declined by \$294 million from the end of 2011, principally due to a decline of \$445 million in the covered loan portfolio. The non-covered portfolio reflected an increase of \$151 million mainly in the mortgage and consumer loan portfolios driven by acquisitions, originations, and loans repurchased from the recourse portfolio during the second and third quarter of the current year, partially offset by decreases in non-covered commercial and legacy loans due to charge-offs and resolutions of non-performing loans.

Deposits amounted to \$26.3 billion at September 30, 2012, compared with \$27.9 billion at December 31, 2011. The decrease in time deposits of \$2.0 billion was principally in brokered and non-brokered certificates of deposit of the BPPR operations. The decrease in brokered and non-brokered deposits resulted from the Corporation's substitution of maturing brokered and non-brokered deposits with short-term borrowings at lower costs. These decreases were partially offset by increases in savings, NOW, and money market deposits by \$0.5 billion.

The Corporation's borrowings amounted to \$5.0 billion at September 30, 2012, compared with \$4.3 billion at December 31, 2011. The increase in borrowings was mainly driven by an increase in other short-term borrowings by \$0.9 billion, since the Corporation replaced maturing brokered deposits and time deposits with short term FHLB NY advances at a lower cost.

Stockholders' equity amounted to \$4.1 billion at September 30, 2012, compared to \$3.9 billion at December 31, 2011. Capital ratios continued to be strong. Tier I common risk-based capital ratio increased to 16.81% at September 30, 2012, from 15.97% at December 31, 2011. Tangible common equity ratio at September 30, 2012 was 9.26%, up from 8.62% at December 31, 2011. Refer to Table 20 for capital ratios and Table 21 for Non-GAAP reconciliations.

Table 1 provides selected financial data and performance indicators for the quarters and nine months ended September 30, 2012 and 2011.

Edgar Filing: POPULAR INC - Form 10-Q

As a financial services company, the Corporation's earnings are significantly affected by general business and economic conditions. Lending and deposit activities and fee income generation are influenced by the level of business spending and investment, consumer income, spending and savings, capital market activities, competition, customer preferences, interest rate conditions and prevailing market rates on competing products.

The Corporation continuously monitors general business and economic conditions, industry-related indicators and trends, competition, interest rate volatility, credit quality indicators, loan and deposit demand, operational and systems efficiencies, revenue enhancements and changes in the regulation of financial services companies.

Table of Contents

The Corporation operates in a highly regulated environment and may be adversely affected by changes in federal and local laws and regulations. Also, competition with other financial institutions could adversely affect its profitability.

The description of the Corporation's business contained in Item 1 of the Corporation's 2011 Annual Report, while not all inclusive, discusses additional information about the business of the Corporation and risk factors, many beyond the Corporation's control that, in addition to the other information in this Form 10-Q, readers should consider.

The Corporation's common stock is traded on the NASDAQ Global Select Market under the symbol BPOP.

CRITICAL ACCOUNTING POLICIES / ESTIMATES

The accounting and reporting policies followed by the Corporation and its subsidiaries conform to generally accepted accounting principles in the United States of America and general practices within the financial services industry. Various elements of the Corporation's accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. These estimates are made under facts and circumstances at a point in time and changes in those facts and circumstances could produce actual results that differ from those estimates.

Management has discussed the development and selection of the critical accounting policies and estimates with the Corporation's Audit Committee. The Corporation has identified as critical accounting policies those related to: (i) Fair Value Measurement of Financial Instruments; (ii) Loans and Allowance for Loan Losses; (iii) Acquisition Accounting for Loans and Related Indemnification Asset; (iv) Income Taxes; (v) Goodwill, and (vi) Pension and Postretirement Benefit Obligations. For a summary of these critical accounting policies and estimates, refer to that particular section in the MD&A included in Popular, Inc.'s 2011 Financial Review and Supplementary Information to Stockholders, incorporated by reference in Popular, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2011 (the 2011 Annual Report). Also, refer to Note 2 to the consolidated financial statements included in the 2011 Annual Report for a summary of the Corporation's significant accounting policies.

Allowance for Loan Losses

One of the most critical and complex accounting estimates is associated with the determination of the allowance for loan losses. The provision for loan losses charged to current operations is based on this determination. The Corporation's assessment of the allowance for loan losses is determined in accordance with the guidance of loss contingencies in ASC Subtopic 450-20 and loan impairment guidance in ASC Section 310-10-35.

The accounting guidance provides for the recognition of a loss allowance for groups of homogeneous loans. The determination for general reserves of the allowance for loan losses includes the following principal factors:

Historical net loss rates (including losses from impaired loans) by loan type and by legal entity adjusted for recent net charge-off trends and environmental factors. The base net loss rates are based on the moving average of annualized net charge-offs computed over a 36-month historical loss window for the commercial and construction loan portfolios, and an 18-month period for the consumer and mortgage loan portfolios.

Net charge-off trend factors are applied to adjust the base loss rates based on recent loss trends. The Corporation applies a trend factor when base losses are below recent loss trends. Currently, the trend factor is based on the last 12 months of losses for the commercial, construction and legacy loan portfolios and 6 months of losses for the consumer and mortgage loan portfolios. The trend factor accounts for inherent imprecision and the lagging perspective in base loss rates. The trend factor replaces the base-loss period when it is higher than base loss up to a determined cap.

Environmental factors, which include credit and macroeconomic indicators such as employment, price index and construction permits, were adopted to account for current market conditions that are likely to cause estimated credit losses to differ from historical losses. The Corporation reflects the effect of these environmental factors on each loan group as an adjustment that, as appropriate, increases or decreases the historical loss rate applied to each group. Environmental factors provide updated perspective on credit and economic conditions. Correlation and regression analyses are used to select and weight these indicators.

During the first quarter of 2012, in order to better reflect current market conditions, management revised the estimation process for evaluating the adequacy of the general reserve component of the allowance for loan losses for the Corporation's commercial and construction loan portfolios. The change in the methodology is described in the paragraphs below. The net effect of these changes in the first quarter amounted to a \$24.8 million reduction in the Corporation's allowance for loan losses, resulting from a reduction of \$40.5 million due to the enhancements to the allowance for loan losses methodology, offset in part by a \$15.7 million increase in environmental factor reserves due to the Corporation's decision to monitor recent trends in its commercial loan portfolio at the BPPR reportable segment that although improving, continue to warrant additional scrutiny.

Management made the following principal changes to the methodology during the first quarter of 2012:

Established a more granular stratification of the commercial loan portfolios to enhance the homogeneity of the loan classes.

Previously, the Corporation used loan groupings for commercial loan portfolios based on business lines and collateral types (secured / unsecured loans). As part of the loan segregation, management evaluated the risk profiles

Table of Contents

of the loan portfolio, recent and historical credit and loss trends, current and expected portfolio behavior and economic indicators. The revised groupings consider product types (construction, commercial multifamily, commercial & industrial, non-owner occupied commercial real estate (CRE) and owner occupied CRE) and business lines for each of the Corporation's reportable segments, BPPR and BPNA. In addition, the Corporation established a legacy portfolio at the BPNA reportable segment, comprised of commercial loans, construction loans and commercial lease financings related to certain lending products exited by the Corporation as part of restructuring efforts carried out in prior years.

The refinement in the loan groupings resulted in a decrease to the allowance for loan losses of \$7.9 million at March 31, 2012, which consisted of a \$9.7 million reduction related to the BPNA reportable segment, partially offset by an increase of \$1.8 million related to the BPPR reportable segment.

Increased the historical look-back period for determining the loss trend factor. The Corporation increased the look-back period for assessing recent trends applicable to the determination of commercial, construction and legacy loan net charge-offs from 6 months to 12 months.

Previously, the Corporation used a trend factor based on 6 months of net charge-offs as it aligned the estimation of inherent losses for the Corporation's commercial and construction loan portfolios with deteriorating trends.

Given the current overall commercial and construction credit quality improvements noted on recent periods in terms of loss trends, non-performing loan balances and non-performing loan inflows, management concluded that a 12-month look-back period for the trend factor aligns the Corporation's allowance for loan losses methodology to current credit quality trends.

The increase in the historical look-back period for determining the loss trend factor resulted in a decrease to the allowance for loan losses of \$28.1 million at March 31, 2012, of which \$24.0 million related to the BPPR reportable segment and \$4.1 million to the BPNA reportable segment.

There were additional enhancements to the allowance for loan losses methodology which accounted for a reduction to the allowance for loan losses of \$4.5 million at March 31, 2012, of which \$3.9 million related to the BPNA reportable segment and \$0.6 million to the BPPR reportable segment. This reduction related to loan portfolios with minimal or zero loss history.

There were no changes in the methodology for environmental factor reserves. There were no changes to the allowance for loan losses methodology for the Corporation's consumer and mortgage loan portfolios during the first quarter of 2012.

Refer to Note 2 Summary of Significant Accounting Policies and the Critical Accounting Policies / Estimates section of the MD&A included in the Corporation's 2011 Annual Report for additional information on the Corporation's credit accounting policies, including interest recognition, troubled debt restructuring, accounting for impaired loans and other information with respect to the determination of specific reserves for loans individually evaluated for impairment.

Goodwill

The Corporation's goodwill and other identifiable intangible assets having an indefinite useful life are tested for impairment. Intangibles with indefinite lives are evaluated for impairment at least annually and on a more frequent basis if events or circumstances indicate impairment could have taken place. Such events could include, among others, a significant adverse change in the business climate, an adverse action by a regulator, an unanticipated change in the competitive environment and a decision to change the operations or dispose of a reporting unit.

Under applicable accounting standards, goodwill impairment analysis is a two-step test. The first step of the goodwill impairment test involves comparing the fair value of the reporting unit with its carrying amount, including goodwill. If the fair value of the reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not impaired; however, if the carrying amount of the reporting unit exceeds its fair value, the second step must be performed. The second step involves calculating an implied fair value of goodwill for each reporting unit for which the first step indicated possible impairment. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination, which is the excess of the fair value of the reporting unit, as determined in the first step, over the aggregate fair values of the individual assets, liabilities and identifiable intangibles (including any unrecognized intangible assets, such as unrecognized core deposits and trademark) as if the reporting unit was being acquired in a business combination and the fair value of the reporting unit was the price paid to acquire the reporting unit. The Corporation estimates the fair values of the assets and liabilities of a reporting unit, consistent with the requirements of the fair value measurements accounting standard, which defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair

Table of Contents

value of the assets and liabilities reflects market conditions, thus volatility in prices could have a material impact on the determination of the implied fair value of the reporting unit goodwill at the impairment test date. The adjustments to measure the assets, liabilities and intangibles at fair value are for the purpose of measuring the implied fair value of goodwill and such adjustments are not reflected in the consolidated statement of condition. If the implied fair value of goodwill exceeds the goodwill assigned to the reporting unit, there is no impairment. If the goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment charge is recorded for the excess. An impairment loss recognized cannot exceed the amount of goodwill assigned to a reporting unit, and the loss establishes a new basis in the goodwill. Subsequent reversal of goodwill impairment losses is not permitted under applicable accounting standards.

The Corporation performed the annual goodwill impairment evaluation for the entire organization during the third quarter of 2012 using July 31, 2012 as the annual evaluation date. The reporting units utilized for this evaluation were those that are one level below the business segments, which are the legal entities within the reportable segment. The Corporation follows push-down accounting, as such all goodwill is assigned to the reporting units when carrying out a business combination.

In determining the fair value of a reporting unit, the Corporation generally uses a combination of methods, including market price multiples of comparable companies and transactions, as well as discounted cash flow analysis. Management evaluates the particular circumstances of each reporting unit in order to determine the most appropriate valuation methodology. The Corporation evaluates the results obtained under each valuation methodology to identify and understand the key value drivers in order to ascertain that the results obtained are reasonable and appropriate under the circumstances. Elements considered include current market and economic conditions, developments in specific lines of business, and any particular features in the individual reporting units.

The computations require management to make estimates and assumptions. Critical assumptions that are used as part of these evaluations include:

a selection of comparable publicly traded companies, based on nature of business, location and size;

a selection of comparable acquisition and capital raising transactions;

the discount rate applied to future earnings, based on an estimate of the cost of equity;

the potential future earnings of the reporting unit; and

the market growth and new business assumptions.

For purposes of the market comparable approach, valuations were determined by calculating average price multiples of relevant value drivers from a group of companies that are comparable to the reporting unit being analyzed and applying those price multiples to the value drivers of the reporting unit. Multiples used are minority based multiples and thus, no control premium adjustment is made to the comparable companies market multiples. While the market price multiple is not an assumption, a presumption that it provides an indicator of the value of the reporting unit is inherent in the valuation. The determination of the market comparables also involves a degree of judgment.

For purposes of the discounted cash flows (DCF) approach, the valuation is based on estimated future cash flows. The financial projections used in the DCF valuation analysis for each reporting unit are based on the most recent (as of the valuation date) financial projections presented to the Corporation's Asset / Liability Management Committee (ALCO). The growth assumptions included in these projections are based on management's expectations for each reporting unit's financial prospects considering economic and industry conditions as well as particular plans of each entity (i.e. restructuring plans, de-leveraging, etc.). The cost of equity used to discount the cash flows was calculated using the Ibbotson Build-Up Method and ranged from 11.93% to 18.38% for the 2012 analysis. The Ibbotson Build-Up Method builds up a cost of equity starting with the rate of return of a risk-free asset (20-year U.S. Treasury note) and adds to it additional risk elements such as equity risk premium, size premium and industry risk premium. The resulting discount rates were analyzed in terms of reasonability given the current market conditions and adjustments were made when necessary.

Edgar Filing: POPULAR INC - Form 10-Q

For BPNA, the only reporting unit that failed Step 1, the Corporation determined the fair value of Step 1 utilizing a DCF approach and a market value approach. The market value approach is based on a combination of price multiples from comparable companies and multiples from capital raising transactions of comparable companies. The market multiples used included price to book and price to tangible book. The Step 1 fair value for BPNA under both valuation approaches (market and DCF) was below the carrying amount of its equity book value as of the valuation date (July 31), requiring the completion of Step 2. In accordance with accounting standards, the Corporation performed a valuation of all assets and liabilities of BPNA, including any recognized and unrecognized intangible assets, to determine the fair value of BPNA's net assets. To complete Step 2, the Corporation subtracted from BPNA's

Table of Contents

Step 1 fair value the determined fair value of the net assets to arrive at the implied fair value of goodwill. The results of the Step 2 indicated that the implied fair value of goodwill exceeded the goodwill carrying value of \$402 million at July 31, 2012, resulting in no goodwill impairment. The reduction in BPNA's Step 1 fair value was offset by a reduction in the fair value of its net assets, resulting in an implied fair value of goodwill that exceeds the recorded book value of goodwill.

The analysis of the results for Step 2 indicates that the reduction in the fair value of the reporting unit was mainly attributed to the deteriorated fair value of the loan portfolios and not to the fair value of the reporting unit as a going concern. The current negative performance of the reporting unit is principally related to deteriorated credit quality in its loan portfolio, which is consistent with the results of the Step 2 analysis. The fair value determined for BPNA's loan portfolio in the July 31, 2012 annual test represented a discount of 18.2%, compared with 28.0% at July 31, 2011. The discount is mainly attributed to market participant's expected rate of returns, which affected the market discount on the commercial and construction loan portfolios of BPNA.

If the Step 1 fair value of BPNA declines further in the future without a corresponding decrease in the fair value of its net assets or if loan discounts improve without a corresponding increase in the Step 1 fair value, the Corporation may be required to record a goodwill impairment charge. The Corporation engaged a third-party valuator to assist management in the annual evaluation of BPNA's goodwill (including Step 1 and Step 2) as well as BPNA's loan portfolios as of the July 31, 2012 valuation date. Management discussed the methodologies, assumptions and results supporting the relevant values for conclusions and determined they were reasonable.

For the BPPR reporting unit, the average estimated fair value calculated in Step 1 using all valuation methodologies exceeded BPPR's equity value by approximately \$222 million in the July 31, 2012 annual test as compared with approximately \$472 million at July 31, 2011. This results indicates there would be no indication of impairment on the goodwill recorded in BPPR at July 31, 2012. For the BPNA reporting unit, the estimated implied fair value of goodwill calculated in Step 2 exceeded BPNA's goodwill carrying value by approximately \$338 million as compared to approximately \$701 million at July 31, 2011. The reduction in the excess of the implied fair value of goodwill over its carrying amount for BPNA is due to the improved credit quality of its loan portfolio. The goodwill balance of BPPR and BPNA, as legal entities, represented approximately 97% of the Corporation's total goodwill balance as of the July 31, 2012 valuation date.

Furthermore, as part of the analyses, management performed a reconciliation of the aggregate fair values determined for the reporting units to the market capitalization of Popular, Inc. concluding that the fair value results determined for the reporting units in the July 31, 2012 annual assessment were reasonable.

The goodwill impairment evaluation process requires the Corporation to make estimates and assumptions with regard to the fair value of the reporting units. Actual values may differ significantly from these estimates. Such differences could result in future impairment of goodwill that would, in turn, negatively impact the Corporation's results of operations and the reporting units where the goodwill is recorded. Declines in the Corporation's market capitalization could increase the risk of goodwill impairment in the future.

Management monitors events or changes in circumstances between annual tests to determine if these events or changes in circumstances would more likely than not reduce the fair value of a reporting unit below its carrying amount.

STATEMENT OF OPERATIONS ANALYSIS**NET INTEREST INCOME**

Net interest income, on a taxable equivalent basis, is presented with its different components in Tables 2 and 3 for the quarter and nine months ended September 30, 2012 as compared with the same periods in 2011, segregated by major categories of interest earning assets and interest bearing liabilities.

The interest earning assets include the investment securities and loans that are exempt from income tax, principally in Puerto Rico. The main sources of tax-exempt interest income are certain investments in obligations of the U.S. Government, its agencies and sponsored entities, certain obligations of the Commonwealth of Puerto Rico and its agencies, and certain consumer loans purchased during the second quarter. To facilitate the comparison of all interest related to these assets, the interest income has been converted to a taxable equivalent basis, using the applicable statutory income tax rates for each quarter. The taxable equivalent computation considers the interest expense disallowance required by Puerto Rico tax law.

Table of Contents

Average outstanding securities balances are based upon amortized cost excluding any unrealized gains or losses on securities available-for-sale. Non-accrual loans have been included in the respective average loans and leases categories. Prepayment penalties, late fees collected and amortization of premium / discounts recorded as interest income amounted to \$4.3 million and \$14.9 million, for the quarter and nine months ended September 30, 2012 compared to \$5.3 million and \$15.8 million for the same period in 2011. Interest income on covered loans for the quarter and nine months ended September 30, 2011 included the discount accretion on covered loans accounted for under ASC 310-20 (revolving lines of credit), which amounted to \$3.5 million and \$37.1 million, respectively. This discount was fully accreted during the third quarter of 2011.

The decrease in the net interest margin, on a taxable equivalent basis, for the quarter ended September 30, 2012, when compared to the same period in 2011, was mostly related to a reduction in the yield on earning assets, mainly in the loan portfolio. Major variances are detailed as follows:

Lower yield in the covered loan portfolio mainly as a result of a temporary benefit recorded during the quarter ended September 30, 2011. This benefit resulted from the resolution of certain commercial loans in pools with a relatively short average life. As a result, the unamortized discount was recognized into income based on the pools average life. In addition, the net interest margin for the quarter ended September 20, 2011 benefited from the amortization into income of approximately \$3.5 million related to covered loans accounted for under ASC 310-20, as mentioned above.

Lower yield for the mortgage loan portfolio. This reduction was impacted by various factors including: acquisitions made, principally in the U.S. mainland, of high quality loans that carry a lower yield than the portfolio; originations in a lower rate environment; the run-off of higher-coupon loans from the portfolio; reversals of interest for delinquent loans; and non-performing loans repurchased under credit recourse agreements. These loans, which are delinquent at the time of repurchase, are put through loss mitigation programs for potential restructuring.

Lower yield of investment securities as a result of an increase in the premium amortized for mortgage-backed securities due to higher prepayment activity. In addition, cash flows from mortgage-backed securities were reinvested in lower yielding collateralized mortgage obligations.

Items that partially offset the reductions in net interest margin included:

Lower cost of interest bearing deposits reflecting the Corporation's strategy to reprice this funding base.

Higher yield in the non-covered construction loan portfolio as a result of a lower proportion of non-performing assets.

Lower cost of borrowings resulting from the cancellation, during the quarter ended June 30, 2012, of \$350 million in repurchase agreements which had an average cost of 4.36%, and replacing them with lower cost Federal Home Loan Bank advances. The reduction in the average balance of investment securities reflects maturities and prepayment activity within the mortgage related investments. In addition, the average loan balance continues to exhibit a reduction when compared to the same quarter of the previous year. Loan demand in the commercial sector has been weak, and resolutions of non-performing loans and charge-offs continue to impact the portfolio balance. The reduction in the average balance of the covered loan portfolio was impacted by charge-offs, resolutions and collections. On the other hand, the mortgage loans category was directly impacted by acquisitions made during the second and third quarter of 2012, both in the U.S. and P.R. The increase in the consumer loan portfolio reflects the acquisition of \$225 million in P.R. consumer loans at the end of the second quarter of 2012.

On the funding side, interest bearing deposits reflected a reduction mostly associated to a decrease in brokered deposits and retail time deposits, partially offset by higher average balances of NOW, money market, savings and demand deposits. The borrowings category reflects a reduction of \$1.1 billion in the average balance of the note issued to the FDIC related to the acquisition of the Westernbank assets in 2010. This note was fully repaid at the end of 2011.

Note: The changes that are not due solely to volume or rate are allocated to volume and rate based on the proportion of the change in each category.

- * Includes interest bearing demand deposits corresponding to certain government entities in Puerto Rico.
- ** Junior subordinated deferrable interest debentures held by the U.S. Treasury.

Table of Contents

The results for the nine-month period ended September 30, 2012 were impacted by the same factors described in the quarterly results. A lower yield in the loan portfolio, mainly covered loans and non-covered mortgage loans, along with a reduction in the yield of investment securities, contributed to a lower net interest margin. However, collections made during the first quarter of 2012 related to a large loan relationship in the U.S. mainland operations, which had been placed in non-accrual status, contributed to a higher positive effect in the yield of the non-covered construction loan portfolio. In addition, a reduction in the cost of interest bearing deposits assisted in mitigating the yield reduction experienced within the loans and investment securities categories.

Table of Contents**PROVISION FOR LOAN LOSSES**

The Corporation's provision for loan losses totaled \$106.2 million for the quarter ended September 30, 2012 compared with \$176.3 million for the same period in 2011. The provision for loan losses for the nine months ended September 30, 2012 amounted to \$326.1 million, compared with \$395.9 million. The provision for loan losses for the nine months ended September 30, 2012 included the net benefit of \$24.8 million, recorded in the first quarter of 2012, related to revisions in the allowance for loan losses methodology of \$40.5 million net of \$15.7 million related to environmental factor reserves for the BPPR commercial loan portfolio, as described in the Critical Accounting Policies / Estimates section. Refer to the Overview, Reportable Segments and Credit Risk Management and Loan Quality sections of this MD&A for an explanation of the main factors for the reduction in the provision for loan losses and a detailed analysis of net charge-offs, non-performing assets, the allowance for loan losses and selected loan losses statistics.

NON-INTEREST INCOME

Refer to Table 4 for a breakdown on non-interest income by major categories for the quarters and nine months ended September 30, 2012 and 2011.

Table 4 Non-Interest Income

(In thousands)	Quarter ended September 30,			Nine months ended September 30,

Table of Contents

The decrease in non-interest income for the quarter ended September 30, 2012, compared with the same period of the previous year, was mainly attributed to a lower net gain on sale and valuation adjustments on investment securities by \$8.1 million principally due to the \$8.5 million gain on the sale of \$234 million in FHLB notes during the third quarter of 2011 and to an unfavorable variance in trading account (loss) profit of \$5.2 million due to lower realized and unrealized gains on mortgage-backed securities in the P.R. mortgage banking business, partially offset by lower hedging costs. These negative variances were partially offset by a favorable variance in other operating income of \$6.5 million mostly resulting from \$5.5 million in lower net losses on investments accounted for under the equity method, net of intra-entity eliminations.

The decrease in non-interest income for the nine months ended September 30, 2012, when compared with the same period of the previous year, was mainly attributed to the following factors:

Unfavorable variance in FDIC loss share (expense) income of \$68.7 million. This unfavorable variance was mainly the result of the negative accretion of the FDIC loss share asset due to a decrease in expected losses on covered loans and a reduction in the provision for loan losses on covered loans, partially offset by a favorable impact from the mirror accounting on the 80% FDIC coverage for reimbursable loan-related expenses on covered loans and a favorable impact on the mirror accounting for the discount accretion on loans and unfunded commitments accounted for under ASC Subtopic 310-20 since the discount on these loans had been fully accreted by the end of the third quarter of 2011. Refer to Table 5 for a breakdown of FDIC loss share (expense) income by major categories.

Unfavorable variance in trading account (loss) profit of \$15.0 million, which corresponded principally to the P.R. mortgage banking business, was mainly influenced by lower unrealized gains due to a lower volume in outstanding mortgage-backed securities and lower gains realized on sales of mortgage-backed securities, partially offset by lower hedging costs.

Unfavorable variance in net gain (loss) on sale and valuation adjustments of investment securities available-for-sale of \$8.3 million principally due to the aforementioned sale of FHLB notes during the third quarter of 2011.

Unfavorable variance on the fair value of the equity appreciation instrument issued to the FDIC as part of the Westernbank FDIC-assisted transaction of \$8.3 million since the results for 2011 included the positive impact of valuing the instrument which expired in May 2011.

These unfavorable variances for the nine-month period were partially offset by the following positive variances:

Higher other service fees by \$13.2 million due to favorable fair value adjustments on mortgage servicing rights, higher credit card fees mainly due to higher interchange fees from the credit card portfolio acquired in August 2011 and higher commission income on sales of investment products by the retail division of Popular Securities, partially offset by lower debit card fees mostly from lower interchange income due to the effects of the Durbin Amendment of the Dodd-Frank Act that began to take effect on October 1, 2011.

Lower unfavorable adjustments recorded to indemnity reserves on loans sold by \$11.6 million mainly as a result of improvements in credit quality trends of mortgage loans serviced subject to credit recourse as well as a declining portfolio since the Corporation is no longer selling loans subject to credit recourse.

Higher net gain on sale of loans, net of valuation adjustments on loans held-for-sale, by \$3.8 million as detailed in the table below. There were higher net gains on sales of loans by \$15.9 million principally in the BPPR reportable segment. Offsetting this favorable variance were higher unfavorable valuation adjustments on loans held-for-sale by \$18.4 million principally due to \$27.3 million in valuation adjustments recorded during the second quarter of 2012 on commercial and construction loans held-for-sale in the BPPR reportable segment as a result of the impact of revised appraisals and market indicators.

[1] Reductions in expected cash flows for ASC 310-30 loans, which may impact the provision for loan losses, may consider reductions in both principal and interest cash flow expectations. The amount covered under the FDIC loss sharing agreements for interest not collected from borrowers is limited under the agreements (approximately 90 days); accordingly, these amounts are not subject fully to the 80% mirror accounting.

[2] Amounts presented are net of the mirror accounting on gains on sales of foreclosed assets.

Average balances
