WisdomTree Emerging Currency Strategy Fund **CEW**(NYSE Arca Ticker)

SUMMARY PROSPECTUS January 1, 2014

Before you invest in the Fund, as defined below, you may want to review the Fund's prospectus and statement of additional information (SAI), which contain more information about the Fund and the risks of investing in the Fund. The Fund's current prospectus and SAI are incorporated by reference into this summary prospectus. You can find the Fund's prospectus and SAI, as well as other information about the Fund, online at www.wisdomtree.com/prospectus. You may also obtain this information at no charge by calling 1-866-909-9473 or by sending an e-mail request to getinfo@wisdomtree.com.

Investment Objective

The Fund seeks to achieve total returns reflective of both money market rates in selected emerging market countries available to foreign investors and changes to the value of these currencies relative to the U.S. dollar.

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund's average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.55%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.55%

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 Year	3 Years	5 Years	10 Years
Portfolio Turnover	\$56	\$176	\$307	\$689

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are

Edgar Filing: WisdomTree Trust - Form 497K

not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, there was no portfolio turnover rate for the Fund since the Fund invested in short-term securities with maturities less than or equal to 365 days, which are excluded from portfolio turnover calculations.

Principal Investment Strategies of the Fund

The Fund is an actively managed exchange traded fund (ETF) that seeks to achieve its investment objective by investing in short-term securities and instruments designed to provide exposure to the currencies and money market rates of selected emerging market countries.

The Fund seeks to provide exposure to currencies and money market rates from emerging and developing economies in three regions of the world: (i) Asia, (ii) Latin America and (iii) Europe, the Middle East and Africa. Within these regions, the Fund intends to invest in a subset of the following markets: Brazil, Chile, China, Colombia, Czech Republic, Hungary, India, Indonesia, Malaysia, Mexico, Nigeria, Peru, the Philippines, Poland, Romania, Russia, South Africa, South Korea, Taiwan, Thailand and Turkey. This list may change based on market developments. The Fund attempts to achieve exposure to the most liquid currencies within each of the three broad regions, while at the same time maintaining geographic and economic diversity

WisdomTree Trust Prospectus 1

across these regions. The specific set of currencies is selected on the annual assessment date each year (typically in August). The selected currencies are equally weighted in terms of U.S. dollar value. The Fund is rebalanced quarterly in order to maintain this equal weighting. In order to maintain geographic diversity, the Fund's exposure to each of the three broad geographic regions is limited to 55% of its total asset value on the annual assessment date and at each quarterly rebalancing. More frequent rebalancing may occur in response to significant market events. A significant event might include, for example, market conditions that significantly disrupt liquidity or result in the reclassification of a currency (from emerging to developed, for example). Currencies that generally would be considered liquid may be ineligible for investment or dropped from the Fund as a result of government action or other market events if the Fund's adviser believes doing so would be in the best interest of the Fund.

Because the market for money market securities in the selected emerging markets generally is less liquid and accessible to foreign investors than corresponding markets in more developed countries, the Fund intends to achieve exposure to these markets by investing primarily in short-term U.S. money market securities and forward currency contracts and swaps of the constituent currencies. The combination of U.S. money market securities with forward currency contracts and currency swaps is designed to provide exposure equivalent to money market securities denominated in currencies of the selected markets in which the Fund invests. In aggregate, the Fund's investments should create exposure that is economically similar to a basket of money market securities denominated in each of the selected currencies. A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A currency swap is an agreement between two parties to exchange one currency for another at a future rate. The Fund also may enter into repurchase agreements with counterparties that are deemed to present acceptable credit risks. A repurchase agreement is a transaction in which the Fund purchases securities or other obligations from a bank or securities dealer and simultaneously commits to resell them to a counterparty at an agreed-upon date or upon demand and at a price reflecting a market rate of interest unrelated to the coupon rate or maturity of the purchased obligations.

The Fund generally will maintain a weighted average portfolio maturity of 90 days or less with respect to the money market securities in its portfolio. The Fund will not purchase any security with a remaining maturity of more than 397 calendar days. All U.S. money market securities acquired by the Fund will be rated in the upper two short-term ratings by at least two nationally recognized statistical rating organizations (NRSROs) or, if unrated, deemed to be of equivalent quality. The Fund does not seek to preserve capital in U.S. dollars.

The decision to secure exposure directly or indirectly will be a function of, among other things, market accessibility, credit exposure, and tax ramifications for foreign investors. If the Fund pursues direct investment, eligible investments include short-term securities issued by emerging market governments and their agencies or instrumentalities, bank debt obligations and time deposits, bankers' acceptances, commercial paper, short-term corporate debt obligations, mortgage-backed securities, and asset-backed securities.

The Fund will invest, under normal circumstances, at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in investments whose combined performance is tied economically to selected emerging market countries. If, subsequent to an investment, the 80% requirement is no longer met, the Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy. The Trust will provide shareholders with sixty (60) days' prior notice of any change to this policy for the Fund.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share (NAV), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus, titled "Additional Principal Risk Information About the Fund" and "Additional Non-Principal Risk Information."

- n **Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- n **Market Risk.** The trading prices of currencies, fixed income securities and other instruments fluctuate in response to a variety of factors. The Fund's NAV and market price may fluctuate significantly in response to these factors. As a result, an investor could lose money over short or long periods of time.
- n **Shares of the Fund May Trade at Prices Other Than NAV.** As with all ETFs, Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV, and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

Edgar Filing: WisdomTree Trust - Form 497K

- n **Cash Redemption Risk.** The Fund's investment strategy will require it to effect redemptions, in whole or in part, for cash. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used exclusively.

- n **Counterparty and Issuer Credit Risk.** The financial condition of an issuer of a debt security or other instrument or a counterparty to a derivative or other contract may cause such issuer or counterparty to default, become unable to pay interest or principal due or otherwise fail to honor its obligations. The value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults and changes in the credit ratings of the Fund's portfolio investments.

- n **Currency Exchange Rate Risk.** The Fund invests a significant portion of its assets in investments denominated in non-U.S. currencies, or in securities that provide exposure to such currencies, currency exchange rates or interest rates denominated in such currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

WisdomTree Trust Prospectus 2

- n **Derivatives Risk.** The Fund will invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in this Prospectus, such as interest rate risk, market risk, and credit risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the contracts at any particular time.
- n **Emerging Markets Risk.** Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. For example, developing or emerging market governments may, without prior warning, impose capital controls on the ability to transfer currency, securities or other assets. The Fund's ability to access certain developing or emerging markets also may be limited due to a variety of factors, including currency convertibility issues. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities or currency, cause the Fund's returns to differ from those available to domestic investors, adversely affect the trading market and price for Fund shares, and cause the Fund to decline in value.
- n **Foreign Securities Risk.** The Fund invests a significant portion of its assets in non-U.S. securities and instruments, or in securities that provide exposure to such instruments. Investments in non-U.S. securities and instruments involve certain risks that may not be present with investments in U.S. securities, including the risk of loss due to foreign currency fluctuations or to political or economic instability.
- n **Interest Rate Risk.** Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates and other factors, such as perception of an issuer's creditworthiness.
- n **Issuer-Specific Risk.** Issuer-specific events, including changes in the financial condition of an issuer, can have a negative impact on the value of the Fund.
- n **Management Risk.** The Fund is actively managed using proprietary investment strategies and processes. There can be no guarantee that these strategies and processes will be successful or that the Fund will achieve its investment objective.
- n **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.
- n **Repurchase Agreement Risk.** The Fund's investment in repurchase agreements may be subject to market and credit risk with respect to the collateral securing the repurchase agreements. Investments in repurchase agreements also may be subject to the risk that the market value of the underlying obligations may decline prior to the expiration of the repurchase agreement term.

Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. The table also shows how the Fund's performance compares to the JP Morgan Emerging Local Markets Index Plus, a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily

Edgar Filing: WisdomTree Trust - Form 497K

an indication of how the Fund will perform in the future.

The Fund's year-to-date total return as of September 30, 2013 was (4.13)%.

WisdomTree Trust Prospectus 3

Best and Worst Quarter Returns (for the period reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	7.76%	3Q/2010
Lowest Return	(10.50)%	3Q/2011

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2012

	1 Year	Since Inception (5-6-2009)
WisdomTree Emerging Currency Strategy Fund		
Return Before Taxes Based on NAV	6.47%	4.18%
Return After Taxes on Distributions	6.47%	3.45%
Return After Taxes on Distributions and Sale of Fund Shares	4.21%	3.25%
JP Morgan Emerging Local Markets Index Plus (Reflects no deduction for fees, expenses or taxes)	7.45%	4.74%

Management**Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as the investment adviser to the Fund. Mellon Capital Management Corporation serves as the sub-adviser to the Fund.

Portfolio Managers

David C. Kwan, CFA, a Managing Director, Fixed Income, has been a portfolio manager of the Fund since its inception.

Zandra Zelaya, CFA, a Director, Fixed Income, has been a portfolio manager of the Fund since its inception.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca, Inc., and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (Creation Units), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 50,000 shares. The Fund generally issues and redeems Creation Units in exchange for a portfolio of money market securities closely approximating the holdings of the Fund or a designated basket of non-U.S. currency and/or an amount of U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

Edgar Filing: WisdomTree Trust - Form 497K

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an Intermediary), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.
