## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

#### NOTE 1 BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements include the accounts of Old National Bancorp and its wholly-owned affiliates (hereinafter collectively referred to as Old National ) and have been prepared in conformity with accounting principles generally accepted in the United States of America and prevailing practices within the banking industry. Such principles require management to make estimates and assumptions that affect the reported amounts of assets, liabilities and the disclosures of contingent assets and liabilities at the date of the financial statements and amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The allowance for loan losses, valuation of purchased loans, FDIC indemnification asset, valuation and impairment of securities, goodwill and intangibles, derivative financial instruments, and income taxes are particularly subject to change. In the opinion of management, the consolidated financial statements contain all the normal and recurring adjustments necessary for a fair statement of the financial position of Old National as of September 30, 2014 and 2013, and December 31, 2013, and the results of its operations for the three and nine months ended September 30, 2014 and 2013. Interim results do not necessarily represent annual results. These financial statements should be read in conjunction with Old National s Annual Report for the year ended December 31, 2013.

All significant intercompany transactions and balances have been eliminated. Certain prior year amounts have been reclassified to conform with the 2014 presentation. Such reclassifications had no effect on net income or shareholders equity and were insignificant amounts.

#### NOTE 2 RECENT ACCOUNTING PRONOUNCEMENTS

FASB ASC 405 In February 2013, the FASB issued an update (ASU No. 2013-04, Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation is Fixed at the Reporting Date) impacting FASB ASC 405, Liabilities. This update requires an entity to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of the guidance is fixed at the reporting date as the sum of (1) the amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and (2) any additional amount the reporting entity expects to pay on behalf of its co-obligors. This update also requires an entity to disclose the nature and amount of the obligation as well as other information about those obligations. This update became effective for interim and annual periods beginning after December 15, 2013 and did not have a material impact on the consolidated financial statements.

FASB ASC 323 In January 2014, the FASB issued an update (ASU No. 2014-01, Accounting for Investments in Qualified Affordable Housing Projects) impacting FASB ASC 323, Investments Equity Method and Joint Ventures. This update permits reporting entities to make an accounting policy election to account for their investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense (benefit). The amendments in this update become effective for annual periods and interim periods within those annual periods beginning after December 15, 2014 and should be applied retrospectively. We are currently evaluating the impact of adopting the new guidance on the consolidated financial statements, but it is not expected to have a material impact.

FASB ASC 310 In January 2014, the FASB issued an update (ASU No. 2014-04, Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure) impacting FASB ASC 310-40. The amendments in this update clarify that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the property in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. The amendments also require disclosure of (1) the amount of foreclosed residential real estate property held by the creditor (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure. The amendments in this update become effective for annual periods and interim periods within those annual periods beginning after December 15, 2014. We are currently evaluating the impact of adopting the new guidance on the consolidated financial statements, but it is not expected to have a material impact.

FASB ASC 205 and 360 In April 2014, the FASB issued an update (ASU No. 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity) impacting FASB ASC 205, Presentation of Financial Statements, and FASB ASC 360, Property, Plant, and Equipment. The amendments in this update change the requirements for reporting discontinued operations. A discontinued operation may include a component of an entity or a group of components of an entity, or a business or nonprofit activity. A disposal of a component of an entity or a group of components of an entity is required to be reported in discontinued operations if the disposal represents a strategic shift that has, or will have, a major effect on an entity s operations and financial results. An entity will have to present, for each comparative period, the assets and liabilities of a disposal group that includes discontinued operations separately in the asset and liability sections of the statement of financial position. The amendments in this update become effective for annual periods and interim periods within those annual periods beginning after December 15, 2014. We are currently evaluating the impact of adopting the new guidance on the consolidated financial statements, but it is not expected to have a material impact.

FASB ASC 606 In May 2014, the FASB issued an update (ASU No. 2014-09, Revenue from Contracts with Customers) creating FASB Topic 606, Revenue from Contracts with Customers. The guidance in this update affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets unless those contracts are within the scope of other standards (for example, insurance contracts or lease contracts). The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance provides steps to follow to achieve the core principle. An entity should disclose sufficient information to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. The amendments in this update become effective for annual periods and interim periods within those annual periods beginning after December 15, 2016. We are currently evaluating the impact of adopting the new guidance on the consolidated financial statements, but it is not expected to have a material impact.

FASB ASC 860 In June 2014, the FASB issued an update (ASU No. 2014-11, Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures) impacting FASB ASC 860, Transfers and Servicing. The amendments in this update change the accounting for repurchase-to-maturity transactions and linked repurchase financings to secured borrowing accounting, which is consistent with the accounting for other repurchase agreements. The amendments also require new disclosures. An entity is required to disclose information on transfers accounted for as sales in transactions that are economically similar to repurchase agreements. An entity must also provide additional information about the types of collateral pledged in repurchase agreements and similar transactions accounted for as secured borrowings. An entity is required to present changes in accounting for transactions outstanding on the effective date as a cumulative-effect adjustment to retained earnings as of the beginning of the period of adoption. The amendments in this update become effective for the first interim or annual period beginning after December 15, 2014. We are currently evaluating the impact of adopting the new guidance on the consolidated financial statements, but it is not expected to have a material impact.

FASB ASC 718 In June 2014, the FASB issued an update (ASU No. 2014-12, Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period) impacting FASB ASC 860, Transfers and Servicing. Generally, an award with a performance target also requires an employee to render service until the performance target is achieved. In some cases, however, the terms of an award may provide that the performance target could be achieved after an employee completes the requisite service period. The amendments in this update require that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. An entity should apply guidance in Topic 718 as it relates to awards with performance conditions that affect vesting to account for such awards. As such, the performance target should not be reflected in estimating the grant-date fair value of the award. Compensation cost

should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period for which the service has already been rendered. The amendments in this update become effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. We are currently evaluating the impact of adopting the new guidance on the consolidated financial statements, but it is not expected to have a material impact.

9

FASB ASC 310 In August 2014, the FASB issued an update (ASU No. 2014-14, Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure) impacting FASB ASC 310-40, Receivables Troubled Debt Restructuring by Creditors. This update affects creditors that hold government-guaranteed mortgage loans. The amendments in this update require that a mortgage loan be derecognized and that a separate other receivable be recognized if the following conditions are met: (1) The loan has a government guarantee that is not separable from the loan before foreclosure. (2) At the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under the claim. (3) At the time of foreclosure, the claim that is determined on the basis of the fair value of the real estate is fixed. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. The amendments in this update become effective for annual periods and interim periods within those annual periods beginning after December 15, 2014. We are currently evaluating the impact of adopting the new guidance on the consolidated financial statements, but it is not expected to have a material impact.

FASB ASC 205 In August 2014, the FASB issued an update (ASU No. 2014-15, Disclosure of Uncertainties about an Entity s Ability to Continue as a Going Concern) impacting FASB ASC 205-40, Presentation of Financial Statements Going Concern. This update requires management to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about an entity s ability to continue as a going concern within one year after the date that the financial statements are issued. Management s evaluation should be based on relevant conditions and events that are known and reasonably knowable at the date the financial statements are issued. Substantial doubt about an entity s ability to continue as a going concern exists when relevant conditions and events, considered in the aggregate, indicate that it is probable that an entity will be unable to meet its obligations as they become due within one year after the date that the financial statements are issued. If the substantial doubt is alleviated as a result of consideration of management s plans, the entity should disclose information that enables financial statement users to understand the principal conditions or events that raised substantial doubt, management s evaluation of the conditions and management s plans to alleviate the substantial doubt. If substantial doubt exists about an entity s ability to continue as a going concern, and the substantial doubt is not alleviated after consideration of management s plans, an entity should include a statement in the footnotes indicating that there is substantial doubt about the entity s ability to continue as a going concern. The amendments in this update become effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. We are currently evaluating the impact of adopting the new guidance on the consolidated financial statements, but it is not expected to have a material impact.

## NOTE 3 ACQUISITION AND DIVESTITURE ACTIVITY

#### 2014 Acquisitions

Tower Financial Corporation

On September 10, 2013, Old National announced that it had entered into an agreement to acquire Tower Financial Corporation ( Tower ) through a stock and cash merger. The acquisition contemplated by this agreement was completed effective April 25, 2014 (the Closing Date ). Tower was an Indiana bank holding company with Tower Bank & Trust Company as its wholly-owned subsidiary. Headquartered in Fort Wayne, Indiana, Tower operated seven banking centers and had approximately \$556 million in trust assets under management on the Closing Date. The merger strengthens Old National s position as the third largest deposit holder in Indiana and Old National believes that it will be able to achieve cost savings by integrating the two companies and combining accounting, data processing, retail and lending support, and other administrative functions after the merger, which will enable Old National to achieve economies of scale in these areas.

The total purchase price for Tower was \$110.4 million, consisting of \$31.7 million of cash and the issuance of 5.6 million shares of Old National Common Stock valued at \$78.7 million. This acquisition was accounted for under the acquisition method of accounting. Accordingly, the Company recognized amounts for identifiable assets acquired and liabilities assumed at their estimated acquisition date fair values, while \$5.7 million of transaction and integration costs associated with the acquisition were expensed as incurred.

10

Under the acquisition method of accounting, the total estimated purchase price is allocated to Tower s net tangible and intangible assets based on their current estimated fair values on the date of acquisition. Based on management s preliminary valuation of the fair value of tangible and intangible assets acquired and liabilities assumed, which are based on assumptions that are subject to change, the purchase price for the Tower acquisition is allocated as follows (in thousands):

Cash and cash equivalents	\$ 56,345
Investment securities	142,759
Loans held for sale	474
Loans	371,054
Premises and equipment	8,516
Accrued interest receivable	2,371
Other real estate owned	473
Company-owned life insurance	21,281
Other assets	15,200
Deposits	(527,995)
Short-term borrowings	(18,898)
Other borrowings	(21,113)
Accrued expenses and other liabilities	(4,681)
Net tangible assets acquired	45,786
Definite-lived intangible assets acquired	8,382
Goodwill	56,203
Total estimated fair value of consideration transferred	\$ 110,371

Prior to the end of the one year measurement period for finalizing the purchase price allocation, if information becomes available which would indicate adjustments are required to the purchase price allocation, such adjustments will be included in the purchase price allocation retrospectively. During the third quarter of 2014, adjustments were made to the purchase price allocations that affected the amounts allocated to goodwill and other assets.

Of the total purchase price, \$45.8 million has been allocated to net tangible assets acquired and \$8.4 million has been allocated to definite-lived intangible assets acquired. The remaining purchase price has been allocated to goodwill. The goodwill will not be deductible for tax purposes and is included in the Banking segment, as described in Note 21 of these consolidated financial statement footnotes.

The components of the estimated fair value of the acquired identifiable intangible assets are in the table below. These intangible assets will be amortized on an accelerated basis over their estimated lives and are included in the Banking segment, as described in Note 21 of these consolidated financial statement footnotes.

	Estimated	
	Fair Value	<b>Estimated</b>
	(in millions)	<b>Useful Lives (Years)</b>

United Bancorp, Inc.

On January 8, 2014, Old National announced that it had entered into an agreement to acquire United Bancorp, Inc. (United) through a stock and cash merger. The acquisition contemplated by this agreement was completed effective July 31, 2014 (the Closing Date). United was a Michigan bank holding company with United Bank & Trust as its wholly-owned subsidiary. Headquartered in Ann Arbor, Michigan, United operated eighteen banking centers and had approximately \$688 million in trust assets under management as of June 30, 2014. The merger doubles Old National s presence in Michigan to 36 total branches and Old National believes that it will be able to achieve cost savings by integrating the two companies and combining accounting, data processing, retail and lending support, and other administrative functions after the merger, which will enable Old National to achieve economies of scale in these areas.

The total purchase price for United was \$157.8 million, consisting of \$34.0 million of cash, the issuance of 9.1 million shares of Old National Common Stock valued at \$122.0 million, and the assumption of United s options and stock appreciation rights, valued at \$1.8 million. This acquisition was accounted for under the acquisition method of accounting. Accordingly, the Company recognized amounts for identifiable assets acquired and liabilities assumed at their estimated acquisition date fair values. To date, transaction and integration costs of \$6.5 million associated with the acquisition have been expensed and remaining integration costs will be expensed in future quarters as incurred.

Under the acquisition method of accounting, the total estimated purchase price is allocated to United s net tangible and intangible assets based on their current estimated fair values on the date of acquisition. Based on management s preliminary valuation of the fair value of tangible and intangible assets acquired and liabilities assumed, which are based on assumptions that are subject to change, the purchase price for the United acquisition is allocated as follows (in thousands):

Cash and cash equivalents	\$ 16,447
Investment securities	157,765
Loans held for sale	1,073
Loans	631,747
Premises and equipment	7,741
Accrued interest receivable	2,614
Other real estate owned	1,676
Company-owned life insurance	14,857
Other assets	16,568
Deposits	(763,681)
Short-term borrowings	(10,420)
Other borrowings	(12,515)
Accrued expenses and other liabilities	(8,337)
Net tangible assets acquired	55,535
Definite-lived intangible assets acquired	10,763
Loan servicing rights	8,983
Goodwill	82,475
Total estimated fair value of consideration transferred	\$ 157,756

Of the total purchase price, \$55.5 million has been allocated to net tangible assets acquired, \$9.0 million has been allocated to loan servicing rights and \$10.8 million has been allocated to definite-lived intangible assets acquired. The remaining purchase price has been allocated to goodwill. The goodwill will not be deductible for tax purposes and is included in the Banking segment, as described in Note 21 of these consolidated financial statement footnotes.

The components of the estimated fair value of the acquired identifiable intangible assets are in the table below. These intangible assets will be amortized on an accelerated basis over their estimated lives and are included in the Banking segment, as described in Note 21 of these consolidated financial statement footnotes.

	Estimated	
	Fair Value (in millions)	Estimated Useful Lives (Years)
Core deposit intangible	\$ 5.9	7

Summary of Unaudited Pro-forma Information

The unaudited pro-forma information below for the periods ended September 30, 2014 and 2013 gives effect to the Tower and United acquisitions as if the acquisitions had occurred on January 1, 2013. The pro-forma financial information is not necessarily indicative of the results of operations if the acquisitions had been effective as of this date.

	Three Months Ended September 30,		Nine Months Ended September 30,		
(dollars in thousands)	2014	2013	2014	2013	
Revenue (1)	\$ 147,850	\$ 148,471	\$ 436,446	\$ 444,710	
Net income	\$ 32,083	\$ 29,517	\$ 94,944	\$ 85,379	

#### (1) Net interest income plus noninterest income.

2014 supplemental pro-forma earnings were adjusted to exclude \$3.2 million and \$11.8 million of acquisition-related costs incurred during the three and nine months ended September 30, 2014, respectively. 2013 supplemental pro-forma earnings were adjusted to include these charges.

#### Pending Acquisitions

On June 3, 2014, Old National announced that it had entered into an agreement to acquire LSB Financial Corp. (LSB) through a stock and cash merger. LSB is a savings and loan holding company with Lafayette Savings Bank as its wholly-owned subsidiary. LSB is the largest bank headquartered in Lafayette and operates five full-service banking centers. At June 3, 2014, LSB had total assets of approximately \$369 million and \$315 million of deposit liabilities. Pursuant to the merger agreement, shareholders of LSB will receive 2.269 shares of Old National common stock and \$10.63 in cash for each share of LSB common stock. As of June 3, 2014, the transaction was valued at approximately \$66.7 million. The transaction has received regulatory and shareholder approval and is expected to close November 1, 2014, subject to customary closing conditions.

On July 28, 2014, Old National announced that it had entered into an agreement to acquire Grand Rapids, Michigan-based Founders Financial Corporation (Founders) through a stock and cash merger. Founders is a bank holding company with Founders Bank & Trust as its wholly-owned subsidiary. Founders Bank & Trust operates four full-service banking centers in Kent County. At June 30, 2014, Founders had total assets of approximately \$466 million and \$378 million of deposit liabilities. Pursuant to the merger agreement, shareholders of Founders will receive 3.25 shares of Old National common stock and \$38.00 in cash for each share of Founders common stock. Based upon the July 25, 2014, closing price of \$13.87 per share of Old National common stock, the transaction is valued at approximately \$88.2 million. Subsequent to quarter-end, the transaction received regulatory and shareholder approval, but is still subject to the satisfaction of customary closing conditions.

#### 2013 Acquisitions

Bank of America

On January 9, 2013, Old National announced that it had entered into a purchase and assumption agreement to acquire 24 bank branches of Bank of America. Four of the branches are located in northern Indiana and 20 branches are located in southwest Michigan. The Company paid a deposit premium of 2.94%. The acquisition doubled Old National s presence in the South Bend/Elkhart area and provided a logical market extension into southwest Michigan. The premium paid for our entrance into a new market drove the goodwill recorded in this transaction. The transaction closed on July 12, 2013.

During the three months ended June 30, 2014, the Company finalized its valuation of all assets and liabilities acquired, resulting in no material change to purchase accounting adjustments. A summary of the final purchase price allocation is as follows (in thousands):

Cash and equivalents	\$ 562,906
Loans	5,638
Premises and equipment	12,559
Accrued interest receivable	15
Other assets	331
Deposits	(565,106)
Accrued expenses and other liabilities	(246)
Net tangible assets acquired	16,097
Definite-lived intangible assets acquired	3,462
Goodwill	13,347
Purchase price	\$ 32,906

The acquired identifiable intangible asset is core deposit intangible and the estimated fair value is approximately \$3.5 million. The core deposit intangible asset will be amortized over an estimated useful life of 7 years and is included in the Banking segment, as described in Note 21 of these consolidated financial statement footnotes. The goodwill recorded in the transaction will be deductible for tax purposes and is included in the Banking segment.

#### 2013 Divestitures

On August 16, 2012, Old National announced plans to sell the deposits of nine banking centers located in southern Illinois and western Kentucky. As such, these deposits were considered held for sale as of December 31, 2012. During the first quarter of 2013 these deposits were sold. Deposits at the time of sale were approximately \$150.0 million and the Company received a deposit premium of \$2.2 million.

On September 5, 2013, Old National entered into branch purchase and assumption agreements to sell three banking centers in the fourth quarter of 2013. The banking centers were sold during the fourth quarter and deposits at the time of sale were approximately \$28.2 million and we received a deposit premium of \$650 thousand.

As part of our efforts to provide an efficient and effective branch banking network, Old National also consolidated 23 banking centers into existing branch locations during 2013.

## NOTE 4 NET INCOME PER SHARE

No shares of restricted stock awards or restricted stock units were excluded in the computation of net income per diluted share for the third quarter ended September 30, 2014 and 2013, respectively, because the effect would be antidilutive. 0 and 6 shares of restricted stock and restricted stock units were excluded in the computation of net income per diluted share for the nine months ended September 30, 2014 and 2013, respectively, because the effect would be antidilutive.

(2) Options to purchase 988 shares and 1,013 shares outstanding at September 30, 2014 and 2013, respectively, were excluded in the computation of net income per diluted share for the third quarter ended September 30, 2014 and 2013, respectively, because the exercise price of these options was greater than the average market price of the common shares and, therefore, the effect would be antidilutive. Options to purchase 976 and 1,025 shares outstanding at September 30, 2014 and 2013, respectively, were excluded in the computation of net income per diluted share for the nine months ended September 30, 2014 and 2013, respectively, because the exercise price of these options was greater than the average market price of the common shares and, therefore, the effect would be antidilutive.

16

## NOTE 5 ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The following tables summarize the changes within each classification of accumulated other comprehensive income (loss) ( AOCI ) net of tax for the three and nine months ended September 30, 2014 and summarizes the significant amounts reclassified out of each component of AOCI:

#### Changes in Accumulated Other Comprehensive Income (Loss) by Component

All of the mortgage-backed securities in the investment portfolio are residential mortgage-backed securities. The amortized cost and fair value of the investment securities portfolio are shown by expected maturity. Expected maturities may differ from contractual maturities if borrowers have the right to call or prepay obligations with or without call or prepayment penalties. Weighted average yield is based on amortized cost.

	Septembe	r 30, 2014	Weighted

Proceeds from sales and calls of securities available for sale were \$223.7 million and \$334.4 million for the nine months ended September 30, 2014 and 2013, respectively. Gains of \$5.2 million and \$2.9 million were realized on these sales during 2014 and 2013, respectively and offsetting losses of \$0.5 million and \$0.3 million were realized on these sales during 2014 and 2013, respectively. Also included in net securities gains for the first nine months of 2014 is \$238 thousand of gains associated with the trading securities, \$67 thousand of gains from mutual funds and a \$100 thousand other-than-temporary impairment charge related to credit loss on one limited partnership investment,

described below. Impacting earnings in the first nine months of 2013 was \$194 thousand of gains associated with the trading securities and \$195 thousand of gains from mutual funds. There were no other-than-temporary impairment charges related to credit loss in the first nine months of 2013.

Trading securities, which consist of mutual funds held in a trust associated with deferred compensation plans for former Monroe Bancorp directors and executives, are recorded at fair value and totaled \$3.8 million at September 30, 2014 and \$3.6 million at December 31, 2013.

During the third quarter of 2013, state and political subdivision securities with a fair value of \$357.8 million were transferred from the available-for-sale portfolio to the held-to-maturity portfolio. The \$31.0 million unrealized holding loss at the date of transfer shall continue to be reported as a separate component of shareholders—equity and will be amortized over the remaining life of the securities as an adjustment of yield. The corresponding discount on these securities will offset this adjustment to yield as it is amortized. We moved these securities to our held-to-maturity portfolio to better align with the percentage of these securities held by our peers and to protect our tangible common equity against rising interest rates.

Management evaluates securities for other-than-temporary impairment (OTTI) at least on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. The investment securities portfolio is evaluated for OTTI by segregating the portfolio into two general segments and applying the appropriate OTTI model. Investment securities classified as available-for-sale or held-to-maturity are generally evaluated for OTTI under FASB ASC 320 (SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*). However, certain purchased beneficial interests, including non-agency mortgage-backed securities, asset-backed securities, and collateralized debt obligations, that had credit ratings at the time of purchase of below AA are evaluated using the model outlined in FASB ASC 325-10 (EITF Issue No. 99-20, *Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests that Continue to be Held by a Transfer in Securitized Financial Assets*).

In determining OTTI under the FASB ASC 320 (SFAS No. 115) model, management considers many factors, including: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the entity has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary decline exists involves a high degree of subjectivity and judgment and is based on the information available to management at a point in time. The second segment of the portfolio uses the OTTI guidance provided by FASB ASC 325-10 (EITF 99-20) that is specific to purchased beneficial interests that, on the purchase date, were rated below AA. Under the FASB ASC 325-10 model, we compare the present value of the remaining cash flows as estimated at the preceding evaluation date to the current expected remaining cash flows. An OTTI is deemed to have occurred if there has been an adverse change in the remaining expected future cash flows.

When other-than-temporary-impairment occurs under either model, the amount of the other-than-temporary-impairment recognized in earnings depends on whether an entity intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss. If an entity intends to sell or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss, the other-than-temporary-impairment shall be recognized in earnings equal to the entire difference between the investment s amortized cost basis and its fair value at the balance sheet date. Otherwise, the other-than-temporary-impairment shall be separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total other-than-temporary-impairment related to the credit loss is determined based on the present value of cash flows expected to be collected and is recognized in earnings. The amount of the total other-than-temporary-impairment related to other factors shall be recognized in other comprehensive income, net of applicable taxes. The previous amortized cost basis less the other-than-temporary-impairment recognized in earnings shall become the new amortized cost basis of the investment.

There was \$100 thousand of other-than-temporary-impairment recorded in the first nine months of 2014. There was no other-than-temporary-impairment recorded in the first nine months of 2013.

As of September 30, 2014, Old National s securities portfolio consisted of 1,614 securities, 178 of which were in an unrealized loss position. The unrealized losses attributable to our U.S government-sponsored entities and agencies and agency mortgage-backed securities are the result of fluctuations in interest rates. Our pooled trust preferred securities are discussed below.

## **Pooled Trust Preferred Securities**

At September 30, 2014, our securities portfolio contained three pooled trust preferred securities with a fair value of \$7.1 million and unrealized losses of \$10.9 million. One of the pooled trust preferred securities in our portfolio falls within the scope of FASB ASC 325-10 (EITF 99-20) and has a fair value of \$0.2 million with an unrealized loss of \$3.8 million at September 30, 2014. This security was rated A3 at inception, but at September 30, 2014, this security is rated D. The issuers in this security are primarily banks, but some of the pools do include a limited number of insurance companies. We use the OTTI evaluation model to compare the present value of expected cash flows to the previous estimate to determine whether an adverse change in cash flows has occurred during the quarter. The OTTI model considers the structure and term of the collateralized debt obligation ( CDO ) and the financial condition of the underlying issuers. Specifically, the model details interest rates, principal balances of note classes and underlying issuers, the timing and amount of interest and principal payments of the underlying issuers, and the allocation of the payments to the note classes. The current estimate of expected cash flows is based on the most recent trustee reports and any other relevant market information including announcements of interest payment deferrals or defaults of underlying trust preferred securities. Assumptions used in the model include expected future default rates and prepayments. We assume no recoveries on defaults and a limited number of recoveries on current or projected interest payment deferrals. In addition, we use the model to stress this CDO, or make assumptions more severe than expected activity, to determine the degree to which assumptions could deteriorate before the CDO could no longer fully support repayment of Old National s note class. For the nine months ended September 30, 2014, our model indicated no other-than-temporary-impairment losses on this security. At September 30, 2014, we have no intent to sell any securities that are in an unrealized loss position nor is it expected that we would be required to sell any securities.

Two of our pooled trust preferred securities with a fair value of \$6.9 million and unrealized losses of \$7.1 million at September 30, 2014 are not subject to FASB ASC 325-10. These securities are evaluated using collateral-specific assumptions to estimate the expected future interest and principal cash flows. Our analysis indicated no other-than-temporary-impairment on these securities.

For the nine months ended September 30, 2013, the three securities subject to FASB ASC 325-10 accounted for \$5.4 million of the unrealized losses in the pooled trust preferred securities category. Our analysis indicated no other-than-temporary-impairment losses on these securities.

Two of our pooled trust preferred securities with a fair value of \$6.0 million and unrealized losses of \$8.1 million at September 30, 2013 were not subject to FASB ASC 325-10. These securities were evaluated using collateral-specific assumptions to estimate the expected future interest and principal cash flows. Our analysis indicated no other-than-temporary-impairment on these securities.

The table below summarizes the relevant characteristics of our three pooled trust preferred securities as well as six single issuer trust preferred securities which are included with other securities in Note 6 to the consolidated financial statements. Each of the pooled trust preferred securities support a more senior tranche of security holders.

As depicted in the table below, all three securities have experienced credit defaults. However, two of these securities have excess subordination and are not other-than-temporarily-impaired as a result of their class hierarchy which provides more loss protection.

<sup>(1)</sup> Lowest rating for the security provided by any nationally recognized credit rating agency.

On July 19, 2010, financial regulatory reform legislation entitled the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act ) was signed into law. The Dodd-Frank Act contains provisions (the Volcker

Rule ) prohibiting certain investments which can be held by a bank holding company. A limited partnership held by Old National falls under these restrictions and will have to be divested by July 2015, unless a request of up to two 1-year extensions is approved. The estimated sales proceeds for this security would be less than the amortized cost of the security, and an other-than-temporary-impairment charge of \$100 thousand was recorded for this security in the first quarter of 2014.

The following table details the remaining securities with other-than-temporary-impairment, their credit rating at September 30, 2014, and the related life-to-date credit losses recognized in earnings:

### NOTE 7 LOANS HELD FOR SALE

Residential loans that Old National has committed to sell are recorded at fair value in accordance with FASB ASC 825-10 (SFAS No. 159 *The Fair Value Option for Financial Assets and Financial Liabilities*). At September 30, 2014 and December 31, 2013, Old National had residential loans held for sale of \$12.9 million and \$7.7 million, respectively.

There were no commercial or commercial real estate loans held for investment reclassified to loans held for sale during the first nine months of 2014.

During the third quarter of 2013, residential real estate loans held for investment of \$96.9 million were reclassified to loans held for sale at the lower of cost or fair value and sold for \$96.9 million, resulting in no gain or loss. These longer duration loans were sold to reduce interest rate risk in the loan portfolio. At September 30, 2014, there were no loans held for sale under this arrangement.

At June 30, 2013, Old National had taxable finance leases held for sale of \$11.6 million. These leases were transferred from the commercial loan category at fair value and a loss of \$0.2 million was recognized. The portfolio of leases held for sale had an average maturity of 2.7 years and interest rates ranging from 3.57% to 10.22%. The leases held for sale were to a variety of borrowers, with various types of equipment securing the leases, and all of the leases were current. The leases held for sale were sold in the third quarter of 2013 with no additional loss. As of September 30, 2014, Old National does not intend to sell its nontaxable finance leases.

During the first nine months of 2013, commercial and commercial real estate loans held for investment of \$5.9 million, including \$0.4 million of purchased impaired loans, were reclassified to loans held for sale at the lower of cost or fair value and sold for \$7.1 million, resulting in a charge-off of \$0.2 million, recoveries of \$0.4 million and other noninterest income of \$1.0 million. At September 30, 2013, there were no loans held for sale under this arrangement.

## NOTE 8 LOANS AND ALLOWANCE FOR CREDIT LOSSES

Old National s finance receivables consist primarily of loans made to consumers and commercial clients in various industries including manufacturing, agribusiness, transportation, mining, wholesaling and retailing. Most of Old National s lending activity occurs within our principal geographic markets of Indiana, southeastern Illinois, western Kentucky and southwestern Michigan. Old National has no concentration of commercial loans in any single industry exceeding 10% of its portfolio.

The composition of loans by lending classification was as follows:

(dollars in thousands)	September 30, 2014	December 31, 2013
Commercial (1)	\$ 1,647,889	\$ 1,373,415
Commercial real estate:		
Construction	149,346	88,630

Total loans	6,242,435	5,082,964
Allowance for loan losses	(44,693)	(41,741)
Allowance for loan losses covered loans	(3,586)	(5,404)
	` ' '	
Net loans	\$ 6,194,156	\$ 5,035,819

(1) Includes direct finance leases of \$20.4 million at September 30, 2014 and \$27.8 million at December 31, 2013.

Portfolio loans, or loans Old National intends to hold for investment purposes, are carried at the principal balance outstanding, net of earned interest, purchase premiums or discounts, deferred loan fees and costs, and an allowance for loan losses. Interest income is accrued on the principal balances of loans outstanding.

The risk characteristics of each loan portfolio segment are as follows:

### Commercial

Commercial loans are primarily based on the identified cash flows of the borrower and secondarily on the underlying collateral provided by the borrower. The cash flows of borrowers, however, may not be as expected and the collateral securing these loans may fluctuate in value. Most commercial loans are secured by the assets being financed or other business assets such as accounts receivable or inventory and may incorporate a personal guarantee; however, some short-term loans may be made on an unsecured basis. In the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers.

27

## Commercial real estate

These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Commercial real estate lending typically involves higher loan principal amounts, and the repayment of these loans is generally dependent on the successful operation of the property securing the loan or the business conducted on the property securing the loan. Commercial real estate loans may be adversely affected by conditions in the real estate markets or in the general economy. The properties securing Old National s commercial real estate portfolio are diverse in terms of type and geographic location. Management monitors and evaluates commercial real estate loans based on collateral, geography and risk grade criteria. As a general rule, Old National avoids financing single purpose projects unless other underwriting factors are present to help mitigate risk. In addition, management tracks the level of owner-occupied commercial real estate loans versus non-owner occupied loans.

Included with commercial real estate are construction loans, which are underwritten utilizing feasibility studies, independent appraisal reviews, sensitivity analysis of absorption and lease rates and financial analysis of the developers and property owners. Construction loans are generally based on estimates of costs and value associated with the complete project. These estimates may be inaccurate. Construction loans often involve the disbursement of substantial funds with repayment substantially dependent on the success of the ultimate project. Sources of repayment for these types of loans may be pre-committed permanent loans from approved long-term lenders, sales of developed property or an interim loan commitment from Old National until permanent financing is obtained. These loans are closely monitored by on-site inspections and are considered to have higher risks than other real estate loans due to their ultimate repayment being sensitive to interest rate changes, governmental regulation of real property, general economic conditions and the availability of long-term financing.

### Residential

With respect to residential loans that are secured by 1-4 family residences and are generally owner occupied, Old National typically establishes a maximum loan-to-value ratio and requires private mortgage insurance if that ratio is exceeded. Repayment of these loans is primarily dependent on the personal income of the borrowers, which can be impacted by economic conditions in their market areas such as unemployment levels. Repayment can also be impacted by changes in residential property values. Risk is mitigated by the fact that the loans are of smaller individual amounts and spread over a large number of borrowers.

## Consumer

Home equity loans are typically secured by a subordinate interest in 1-4 family residences, and consumer loans are secured by consumer assets such as automobiles or recreational vehicles. Some consumer loans are unsecured such as small installment loans and certain lines of credit. Repayment of these loans is primarily dependent on the personal income of the borrowers, which can be impacted by economic conditions in their market areas such as unemployment levels. Repayment can also be impacted by changes in residential property values. Risk is mitigated by the fact that the loans are of smaller individual amounts and spread over a large number of borrowers.

### **Covered Loans**

On July 29, 2011, Old National acquired the banking operations of Integra in an FDIC assisted transaction. As part of the purchase and assumption agreement, Old National and the FDIC entered into loss sharing agreements (each, a loss sharing agreement and collectively, the loss sharing agreements), whereby the FDIC will cover a substantial portion of any future losses on loans (and related unfunded commitments), OREO and up to 90 days of certain accrued interest on loans. The acquired loans and OREO subject to the loss sharing agreements are referred to collectively as covered

assets. Under the terms of the loss sharing agreements, the FDIC will reimburse Old National for 80% of losses up to \$275.0 million, losses in excess of \$275.0 million up to \$467.2 million at 0% reimbursement, and 80% of losses in excess of \$467.2 million. As of September 30, 2014, we do not expect losses to exceed \$275.0 million. Old National will reimburse the FDIC for its share of recoveries with respect to losses for which the FDIC has previously reimbursed Old National under the loss sharing agreements. The loss sharing provisions of the agreements for commercial and single family residential mortgage loans are in effect for five and ten years, respectively, from the July 29, 2011 acquisition date and the loss recovery provisions for such loans are in effect for eight years and ten years, respectively, from the acquisition date.

28

Ending balance

## Allowance for loan losses

The allowance for loan losses is maintained at a level believed adequate by management to absorb probable losses incurred in the loan portfolio. Management s evaluation of the adequacy of the allowance is an estimate based on reviews of individual loans, pools of homogeneous loans, historical loss experience, and assessments of the impact of current economic conditions on the portfolio.

The allowance is increased through a provision charged to operating expense. Loans deemed to be uncollectible are charged to the allowance. Recoveries of loans previously charged-off are added to the allowance.

No allowance was brought forward on any of the acquired loans as any credit deterioration evident in the loans was included in the determination of the fair value of the loans at the acquisition date. Purchased credit impaired ( PCI ) loans are not considered impaired until after the point at which there has been a degradation of cash flows below our expected cash flows at acquisition. Impairment on PCI loans would be recognized in the current period as provision expense.

Old National s activity in the allowance for loan losses for the three months ended September 30, 2014 and 2013 is as follows:

## **Credit Quality**

Old National s management monitors the credit quality of its financing receivables in an on-going manner. Internally, management assigns a credit quality grade to each non-homogeneous commercial and commercial real estate loan in the portfolio. The primary determinants of the credit quality grade are based upon the reliability of the primary source of repayment and the past, present, and projected financial condition of the borrower. The credit quality rating also reflects current economic and industry conditions. Major factors used in determining the grade can vary based on the nature of the loan, but commonly include factors such as debt service coverage, internal cash flow, liquidity, leverage, operating performance, debt burden, FICO scores, occupancy, interest rate sensitivity, and expense burden. Old National uses the following definitions for risk ratings:

**Criticized**. Special mention loans that have a potential weakness that deserves management s close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the

institution s credit position at some future date.

**Classified Substandard**. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

**Classified** Nonaccrual. Loans classified as nonaccrual have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection in full, on the basis of currently existing facts, conditions, and values, in doubt.

**Classified Doubtful.** Loans classified as doubtful have all the weaknesses inherent in those classified as nonaccrual, with the added characteristic that the weaknesses make collection in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

31

Pass rated loans are those loans that are other than criticized, classified substandard, classified nonaccrual or classified doubtful.

As of September 30, 2014 and December 31, 2013, the risk category of loans, excluding covered loans, by class of loans is as follows:

(dollars in thousands)

Old National considers the performance of the loan portfolio and its impact on the allowance for loan losses. For residential and consumer loan classes, Old National also evaluates credit quality based on the aging status of the loan and by payment activity. The following table presents the recorded investment in residential and consumer loans based on payment activity as of September 30, 2014 and December 31, 2013, excluding covered loans:

<u>September 30, 2014</u>		Consumer		Residential

Total	\$ 251,102	\$ 620,473	\$ 99,683	\$ 1,359,569

# **Impaired Loans**

Large commercial credits are subject to individual evaluation for impairment. Retail credits and other small balance credits that are part of a homogeneous group are not tested for individual impairment unless they are modified as a troubled debt restructuring. A loan is considered impaired when it is probable that contractual interest and principal payments will not be collected either for the amounts or by the dates as scheduled in the loan agreement. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported net, at the present value of estimated cash flows using the loan s existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Old National s policy, for all but purchased credit impaired loans, is to recognize interest income on impaired loans unless the loan is placed on nonaccrual status. No additional funds are committed to be advanced in connection with these impaired loans.

The following table shows Old National s impaired loans, excluding covered loans, that are individually evaluated as of September 30, 2014 and December 31, 2013. Of the loans purchased without FDIC loss share coverage, only those that have experienced subsequent impairment since the date acquired are included in the table below.

(1) The Company does not record interest on nonaccrual loans until principal is recovered. For all loan classes, a loan is generally placed on nonaccrual status when principal or interest becomes 90 days past due unless it is well secured and in the process of collection, or earlier when concern exists as to the ultimate collectibility of principal or interest. Interest accrued during the current year on such loans is reversed against earnings. Interest accrued in the prior year, if any, is charged to the allowance for loan losses. Cash interest received on these loans is applied to the principal balance until the principal is recovered or until the loan returns to accrual status. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current, remain current for six months and future payments are reasonably assured.

Loans accounted for under FASB ASC Topic 310-30 accrue interest, even though they may be contractually past due, as any nonpayment of contractual principal or interest is considered in the periodic re-estimation of expected cash flows and is included in the resulting recognition of current period covered loan loss provision or prospective yield adjustments. Similar to uncovered loans, covered loans accounted for outside FASB ASC Topic 310-30 are classified as nonaccrual when, in the opinion of management, collection of principal or interest is doubtful. Information for covered loans accounted for both under and outside FASB ASC Topic 310-30 is included in the table below in the row labeled covered loans.

Old National s past due financing receivables as of September 30, 2014 and December 31, 2013 are as follows:

## **Loan Participations**

Old National has loan participations, which qualify as participating interests, with other financial institutions. At September 30, 2014, these loans totaled \$306.9 million, of which \$177.4 million had been sold to other financial

institutions and \$129.5 million was retained by Old National. The loan participations convey proportionate ownership rights with equal priority to each participating interest holder, involve no recourse (other than ordinary representations and warranties) to, or subordination by, any participating interest holder, all cash flows are divided among the participating interest holders in proportion to each holder s share of ownership and no holder has the right to pledge the entire financial asset unless all participating interest holders agree.

## **Troubled Debt Restructurings**

Old National may choose to restructure the contractual terms of certain loans. The decision to restructure a loan, versus aggressively enforcing the collection of the loan, may benefit Old National by increasing the ultimate probability of collection.

36

Any loans that are modified are reviewed by Old National to identify if a troubled debt restructuring ( TDR ) has occurred, which is when for economic or legal reasons related to a borrower s financial difficulties, the Bank grants a concession to the borrower that it would not otherwise consider. Terms may be modified to fit the ability of the borrower to repay in line with its current financial status. The modification of the terms of such loans included one or a combination of the following: a reduction of the stated interest rate of the loan, an extension of the maturity date at a stated rate of interest lower than the current market rate of new debt with similar risk, or a permanent reduction of the recorded investment of the loan.

Loans modified in a TDR are typically placed on nonaccrual status until we determine the future collection of principal and interest is reasonably assured, which generally requires that the borrower demonstrate a period of performance according to the restructured terms for six months.

If we are unable to resolve a nonperforming loan issue, the credit will be charged off when it is apparent there will be a loss. For large commercial type loans, each relationship is individually analyzed for evidence of apparent loss based on quantitative benchmarks or subjectively based upon certain events or particular circumstances. It is Old National s policy to charge off small commercial loans scored through our small business credit center with contractual balances under \$250,000 that have been placed on nonaccrual status or became ninety days or more delinquent, without regard to the collateral position. For residential and consumer loans, a charge off is recorded at the time foreclosure is initiated or when the loan becomes 120 to 180 days past due, whichever is earlier.

For commercial TDRs, an allocated reserve is established within the allowance for loan losses for the difference between the carrying value of the loan and its computed fair value. To determine the fair value of the loan, one of the following methods is selected: (1) the present value of expected cash flows discounted at the loan s original effective interest rate, (2) the loan s observable market price, or (3) the fair value of the collateral value, if the loan is collateral dependent. The allocated reserve is established as the difference between the carrying value of the loan and the collectable value. If there are significant changes in the amount or timing of the loan s expected future cash flows, impairment is recalculated and the valuation allowance is adjusted accordingly.

When a consumer or residential loan is identified as a troubled debt restructuring, the loan is written down to its collateral value less selling costs.

At September 30, 2014, our TDRs consisted of \$21.0 million of commercial loans, \$19.9 million of commercial real estate loans, \$2.0 million of consumer loans and \$2.1 million of residential loans, totaling \$45.0 million. Approximately \$22.8 million of the TDRs at September 30, 2014 were included with nonaccrual loans. At December 31, 2013, our TDRs consisted of \$22.5 million of commercial loans, \$22.6 million of commercial real estate loans, \$1.4 million of consumer loans and \$2.4 million of residential loans, totaling \$48.9 million. Approximately \$33.1 million of the TDRs at December 31, 2013 were included with nonaccrual loans.

As of September 30, 2014 and December 31, 2013, Old National has allocated \$5.0 million and \$4.1 million of specific reserves to customers whose loan terms have been modified in TDRs, respectively. Old National has not committed to lend any additional amounts as of September 30, 2014 and December 31, 2013, respectively, to customers with outstanding loans that are classified as troubled debt restructurings.

The following table presents loans by class modified as troubled debt restructurings that occurred during the nine months ended September 30, 2014:

		Pre-m	odification	Post-n	nodification			
	Number of C	Outstand	ling Recorde	eoutstanding Record				
(dollars in thousands)	Loans	Inv	estment	Inv	vestment			
Troubled Debt Restructuring:								
Commercial	27	\$	13,310	\$	11,695			
Commercial Real Estate construction	1		937		484			
Commercial Real Estate other	22		2,659		2,221			
Residential	2		194		175			
Consumer other	21		1,094		1,033			
Total	73	\$	18,194	\$	15,608			

The TDRs described above increased the allowance for loan losses by \$0.4 million and resulted in immaterial charge-offs during the nine months ended September 30, 2014.

The following table presents loans by class modified as troubled debt restructurings that occurred during the twelve months ended December 31, 2013:

		Pre-m	odification	Post-n	nodification			
	Number of (	Outstand	ling Recorde	de@utstanding Recorde				
(dollars in thousands)	Loans	Inv	estment	Inv	vestment			
Troubled Debt Restructuring:								
Commercial	35	\$	16,196	\$	15,155			
Commercial Real Estate construction	1		60		60			
Commercial Real Estate other	36		10,585		9,791			
Residential	14		1,936		1,901			
Consumer other	49		1,622		1,484			
Total	135	\$	30,399	\$	28,391			

The TDRs described above increased the allowance for loan losses by \$0.1 million and resulted in charge-offs of \$0.2 million during the twelve months ended December 31, 2013.

A loan is considered to be in payment default once it is 90 days contractually past due under the modified terms.

There was one commercial real estate loan that was modified as a TDR during the first nine months of 2014 for which there was a payment default within the last twelve months. The impact of the default was immaterial.

The TDR that subsequently defaulted had no material impact on the allowance for loan losses and resulted in no charge-offs during the nine months ended September 30, 2014.

Table of Contents

The following table presents loans by class modified as TDRs during 2013 for which there was a payment default within the last twelve months:

	Number of	Rec	corded
(dollars in thousands)	Contracts	Inve	stment
Troubled Debt Restructuring			
That Subsequently Defaulted:			
Commercial	3	\$	32
Commercial Real Estate	2		85
Total	5	\$	117

The TDRs that subsequently defaulted, described above, resulted in no material impact on the allowance for loan losses and resulted in charge-offs of \$0.1 million during the twelve months ended December 31, 2013.

The terms of certain other loans were modified during the nine months ended September 30, 2014 that did not meet the definition of a TDR. It is our process to review all classified and criticized loans that, during the period, have been renewed, have entered into a forbearance agreement, have gone from principal and interest to interest only, or have had the maturity date extended. In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on its debt in the foreseeable future without the modification. The evaluation is performed under our internal underwriting policy. We also evaluate whether a concession has been granted or if we were adequately compensated through a market interest rate, additional collateral or a bona fide guarantee. We also consider whether the modification was insignificant relative to the other terms of the agreement or if the delay in a payment was 90 days or less.

Purchased credit impaired ( PCI ) loans are not considered impaired until after the point at which there has been a degradation of cash flows below our expected cash flows at acquisition. If a PCI loan is subsequently modified, and meets the definition of a TDR, it will be removed from PCI accounting and accounted for as a TDR only if the PCI loan was being accounted for individually. If the purchased credit impaired loan is being accounted for as part of a pool, it will not be removed from the pool. As of September 30, 2014, it has not been necessary to remove any loans from PCI accounting.

In general, once a modified loan is considered a TDR, the loan will always be considered a TDR, and therefore impaired, until it is paid in full, otherwise settled, sold or charged off. However, our policy also permits for loans to be removed from TDR status in the years following the restructuring if the following two conditions are met: (1) the restructuring agreement specifies an interest rate equal to or greater than the rate that we were willing to accept at the time of the restructuring for a new loan with comparable risk, and (2) the loan is not impaired based on the terms specified by the restructuring agreement.

68

## **Purchased Impaired Loans (non-covered loans)**

Purchased loans acquired in a business combination are recorded at estimated fair value on their purchase date with no carryover of the related allowance for loan and lease losses. In determining the estimated fair value of purchased loans, management considers a number of factors including the remaining life of the acquired loans, estimated prepayments, estimated loss ratios, estimated value of the underlying collateral, net present value of cash flows expected to be received, among others. Purchased loans are accounted for in accordance with guidance for certain loans acquired in a transfer (ASC 310-30), when the loans have evidence of credit deterioration since origination and it is probable at the date of acquisition that the acquirer will not collect all contractually required principal and interest payments. The difference between contractually required payments and the cash flows expected to be collected at acquisition is referred to as the non-accretable difference. Subsequent decreases to the expected cash flows will generally result in a provision for loan and lease losses. Subsequent increases in expected cash flows will result in a reversal of the provision for loan losses to the extent of prior charges and then an adjustment to accretable yield, which would have a positive impact on interest income.

Old National has purchased loans for which there was, at acquisition, evidence of deterioration of credit quality since origination and it was probable, at acquisition, that all contractually required payments would not be collected. For these noncovered loans that meet the criteria of ASC 310-30 treatment, the carrying amount is as follows:

Edgar Filing: OLD NATIONAL BANCORP /IN/ - Form 10-Q

	Sept	ember 30,	December 31,		
(dollars in thousands)		2014		2013	
Commercial	\$	4,363	\$	648	
Commercial real estate		30,616		23,618	
Consumer		8,117		12,725	
Residential		155		154	
Carrying amount	\$	43,251	\$	37,145	
Carrying amount, net of allowance	\$	41,902	\$	34,576	
Allowance for loan losses	\$	1,349	\$	2,569	

The outstanding balance of noncovered loans accounted for under ASC 310-30, including contractual principal, interest, fees and penalties, was \$125.5 million and \$115.0 million as of September 30, 2014 and December 31, 2013, respectively.

The accretable difference on purchased loans acquired in a business combination is the difference between the expected cash flows and the net present value of expected cash flows with such difference accreted into earnings using the effective yield method over the term of the loans. Accretion of \$12.3 million has been recorded as loan interest income through the nine months ended September 30, 2014. Accretion of \$11.9 million was recorded as loan interest income through the nine months ended September 30, 2013. Improvement in cash flow expectations has resulted in a reclassification from nonaccretable difference to accretable yield.

Accretable yield of noncovered loans, or income expected to be collected, is as follows:

	Integra						
(dollars in thousands)	Monroe	Nor	ncovered	IBT	Tower	United	Total
Balance at January 1, 2014	\$ 6,787	\$	2,425	\$19,079	\$	\$	\$ 28,291
New loans purchased					4,065	1,605	5,670
Accretion of income	(2,411)		(664)	(8,509)	(571)	(132)	(12,287)
Reclassifications from (to) nonaccretable							
difference	(1,266)		(159)	3,304	485		2,364
Disposals/other adjustments	746		(96)				650
Balance at September 30, 2014	\$ 3,856	\$	1,506	\$13,874	\$3,979	\$1,473	\$ 24,688

Included in Old National s allowance for loan losses is \$1.3 million related to the purchased loans disclosed above for the first nine months of 2014. Included in Old National s allowance for loan losses was \$2.6 million related to the purchased loans in 2013. An immaterial amount of allowances for loan losses were reversed during 2013 related to these loans.

At acquisition, purchased credit impaired loans, both covered and noncovered, for which it was probable at acquisition that all contractually required payments would not be collected are as follows:

(dollars in thousands) Contractually required payments Nonaccretable difference	Monroe Bancorp \$ 94,714 (45,157)	Integra Bank (1) \$ 921,856 (226,426)	IBT \$118,535 (53,165)	Tower \$ 22,746 (5,826)	United \$ 15,483 (5,487)
Cash flows expected to be collected at acquisition	49,557	695,430	65,370	16,920	9,996
Accretable yield	(6,971)	(98,487)	(11,945)	(4,065)	(1,605)
Fair value of acquired loans at acquisition	\$ 42,586	\$ 596,943	\$ 53,425	\$ 12,855	\$ 8,391

(1) Includes covered and noncovered.

Income is not recognized on certain purchased loans if Old National cannot reasonably estimate cash flows to be collected. Old National had no purchased loans for which it could not reasonably estimate cash flows to be collected.

41

## NOTE 9 COVERED LOANS

Covered loans represent loans acquired from the FDIC that are subject to loss share agreements. The carrying amount of covered loans was \$158.3 million at September 30, 2014. The composition of covered loans by lending classification was as follows:

	At Septe	ember 30, 201	4			
	Loans A	Accounted for	Loans e	xcluded from	1	
	Un	Under ASC A		ASC 310-30

		` , ,		. , ,		` , ,
Covered loans, net	\$	85,086	\$	69,673	\$	154,759

(1) Includes loans with revolving privileges which are scoped out of FASB ASC 310-30 and certain loans which Old National elected to treat under the cost recovery method of accounting.

Loans were recorded at fair value in accordance with FASB ASC 805, Business Combinations. No allowance for loan losses related to the acquired loans is recorded on the acquisition date as the fair value of the loans acquired incorporates assumptions regarding credit risk. Loans acquired are recorded at fair value in accordance with the fair value methodology prescribed in FASB ASC 820, exclusive of the loss share agreements with the FDIC. The fair value estimates associated with the loans include estimates related to expected prepayments and the amount and timing of undiscounted expected principal, interest and other cash flows.

The outstanding balance of covered loans accounted for under ASC 310-30, including contractual principal, interest, fees and penalties, was \$254.8 million and \$406.3 million as of September 30, 2014 and December 31, 2013, respectively.

The following table is a roll-forward of acquired impaired loans accounted for under ASC 310-30 for the nine months ended September 30, 2014:

Contractual Nonaccretable Accretable Carrying (dollars in thousands)

Removals due to foreclosure or sale		(8,586)		746	(1,193)	(9,033)
Balance at September 30, 2013	\$	276,029	\$	(52,653)	\$ (75,558)	\$ 147,818

- (1) The balance of contractual cash flows includes future contractual interest and is net of amounts charged off and interest collected on nonaccrual loans.
- (2) Carrying amount for this table is net of allowance for loan losses.

Over the life of the acquired loans, we continue to estimate cash flows expected to be collected on individual loans or on pools of loans sharing common risk characteristics which were treated in the aggregate when applying various valuation techniques. We evaluate at each balance sheet date whether the present value of its loans determined using the effective interest rates has decreased and if so, recognize a provision for loan losses. For any increases in cash flows expected to be collected, we adjust the amount of accretable yield recognized on a prospective basis over the loan s or pool s remaining life. Eighty percent of the prospective yield adjustments are offset as Old National will recognize a corresponding decrease in cash flows expected from the indemnification asset prospectively in a similar manner. The indemnification asset is adjusted over the shorter of the life of the underlying investment or the indemnification agreement.

Accretable yield, or income expected to be collected on the covered loans accounted for under ASC 310-30, is as follows:

(dollars in thousands)	2014	2013
Balance at January 1,	\$ 73,211	\$ 85,779
New loans purchased		
Accretion of income	(53,424)	(28,103)
Reclassifications from (to) nonaccretable difference	18,223	16,689
Disposals/other adjustments	2,391	1,193
Balance at September 30,	\$ 40,401	\$ 75,558

At September 30, 2014, the \$28.0 million loss sharing asset is comprised of a \$25.7 million FDIC indemnification asset and a \$2.3 million FDIC loss share receivable. The loss share receivable represents actual incurred losses where

reimbursement has not yet been received from the FDIC. The indemnification asset represents future cash flows we expect to collect from the FDIC under the loss sharing agreements and the amount related to the estimated improvements in cash flow expectations that are being amortized over the same period for which those improved cash flows are being accreted into income. At September 30, 2014, \$12.3 million of the FDIC indemnification asset is related to expected indemnification payments and \$13.4 million is expected to be amortized and reported in noninterest income as an offset to future accreted interest income. At September 30, 2013, \$50.6 million of the FDIC indemnification asset was related to expected indemnification payments and \$31.0 million was expected to be amortized and reported in noninterest income as an offset to future accreted interest income.

For covered loans, we remeasure contractual and expected cash flows on a quarterly basis. When the quarterly re-measurement process results in a decrease in expected cash flows due to an increase in expected credit losses, impairment is recorded. As a result of this impairment, the indemnification asset is increased to reflect anticipated future cash flows to be received from the FDIC. Consistent with the loss sharing agreements between Old National and the FDIC, the amount of the increase to the indemnification asset is measured at 80% of the resulting impairment.

43

Alternatively, when the quarterly re-measurement results in an increase in expected future cash flows due to a decrease in expected credit losses, the nonaccretable difference decreases and the effective yield of the related loan portfolio is increased. As a result of the improved expected cash flows, the indemnification asset would be reduced first by the amount of any impairment previously recorded and, second, by increased amortization over the remaining life of the related loss sharing agreements or the remaining life of the indemnification asset, whichever is shorter.

The following table shows a detailed analysis of the FDIC loss sharing asset for the nine months ended September 30, 2014 and 2013:

(dollars in thousands)	2014	2013
Balance at January 1,	\$ 88,513	\$116,624
Adjustments not reflected in income:

(1) Includes \$0.3 million of repossessed personal property at September 30, 2014.

Other Real Estate Other Real Estate

Edgar Filing: OLD NATIONAL BANCORP /IN/ - Form 10-Q

			C	Owned,
(dollars in thousands)	Ow	Owned (1)		overed
Balance, January 1, 2013	\$	11,179	\$	26,137
Additions		5,724		6,046
Sales		(5,892)		(9,874)
Write-downs/other adjustments		(1,402)		(4,061)
Balance, September 30, 2013	\$	9,609	\$	18,248

## (1) Includes \$0.3 million of repossessed personal property at September 30, 2013.

Covered OREO expenses and valuation write-downs are recorded in the noninterest expense section of the consolidated statements of income. Under the loss sharing agreements, the FDIC will reimburse us for 80% of expenses and valuation write-downs related to covered assets up to \$275.0 million, losses in excess of \$275.0 million up to \$467.2 million at 0%, and 80% of losses in excess of \$467.2 million. As of September 30, 2014, we do not expect losses to exceed \$275.0 million. The reimbursable portion of these expenses is recorded in the FDIC indemnification asset. Changes in the FDIC indemnification asset are recorded in the noninterest income section of the consolidated statements of income.

44

## NOTE 11 GOODWILL AND OTHER INTANGIBLE ASSETS

The following table shows the changes in the carrying amount of goodwill by segment for the nine months ended September 30, 2014 and 2013:

(dollars in thousands)	Banking	Insurance	Other	Total
Balance, January 1, 2014	\$ 312,856	\$ 39,873	\$	\$ 352,729
Goodwill acquired during the period	138,678			138,678
Balance, September 30, 2014	\$ 451,534	\$ 39,873	\$	\$491,407
Balance, January 1, 2013	\$ 298,947	\$ 39,873	\$	\$338,820
Goodwill acquired during the period	13,909			13,909
Balance, September 30, 2013	\$312,856	\$ 39,873	\$	\$ 352,729

Goodwill is reviewed annually for impairment. Old National completed its most recent annual goodwill impairment test as of August 31, 2014 and concluded that, based on current events and circumstances, it is not more likely than not that the carry value of goodwill exceeds fair value. During the third quarter of 2014, Old National recorded \$82.5 million of goodwill associated with the acquisition of United which was allocated to the Banking segment. During the second quarter of 2014, Old National recorded \$56.2 million of goodwill associated with the acquisition of Tower which was allocated to the Banking segment. During the third quarter of 2013, Old National recorded \$13.3 million of goodwill associated with the acquisition of 24 retail bank branches from Bank of America. This was allocated to the Banking segment. During the second quarter of 2013, Old National recorded \$0.6 million of goodwill primarily related to the final pension settlement associated with the IBT acquisition. This was allocated to the Banking segment. The final purchase price allocation resulted in goodwill of \$86.2 million associated with the IBT acquisition.

The gross carrying amount and accumulated amortization of other intangible assets at September 30, 2014 and December 31, 2013 was as follows:

(dollars in thousands)	s Carrying Amount	Am	umulated ortization mpairment	Carrying mount
September 30, 2014				
Amortized intangible assets:				
Core deposit	\$ 54,531	\$	(35,193)	\$ 19,338
Customer business relationships	28,148		(21,063)	7,085
Customer trust relationships	13,986		(2,703)	11,283
Customer loan relationships	4,413		(3,076)	1,337
Total intangible assets	\$ 101,078	\$	(62,035)	\$ 39,043

**December 31, 2013** 

Amortized intangible assets:

Edgar Filing: OLD NATIONAL BANCORP /IN/ - Form 10-Q

Core deposit	\$ 44,021	\$ (31,266)	\$ 12,755
Customer business relationships	27,848	(19,826)	8,022
Customer trust relationships	5,352	(1,810)	3,542
Customer loan relationships	4,413	(2,775)	1,638
-			
Total intangible assets	\$ 81,634	\$ (55,677)	\$ 25,957

Other intangible assets consist of core deposit intangibles and customer relationship intangibles and are being amortized primarily on an accelerated basis over their estimated useful lives, generally over a period of 5 to 15 years. During the third quarter of 2014, Old National increased core deposit intangibles by \$5.9 million related to the United acquisition, which is included in the Banking segment. Also during the third quarter of 2014, Old National increased customer trust relationship intangibles by \$4.9 million associated with the trust business of United, which is included in the Banking segment. During the second quarter of 2014, Old National increased core deposit intangibles by \$4.6 million related to the Tower acquisition, which is included in the Banking segment. Also during the second quarter of 2014, Old National increased customer trust relationship intangibles by \$3.8 million associated with the trust business of Tower, which is included in the Banking segment. Also during the second quarter of 2014, Old National increased customer business relationship intangibles by \$0.3 million related to the purchase of an insurance book of business, which is included in the Insurance segment. During the fourth quarter of 2013, Old National increased customer business relationships by \$1.3 million related to the purchase of an insurance book of business, which is included in the Insurance segment. During the third quarter of 2013, Old National increased core deposit intangibles by \$3.5 million related to the acquisition of 24 retail bank branches from Bank of America, which is included in the Banking segment. During the second quarter of 2013, Old National increased customer business relationships by \$0.1 million related to the purchase of an insurance book of business, which is included in the Insurance segment. Also during the second quarter of 2013, Old National decreased customer business relationships by \$0.1 million related to the sale of an insurance book of business, which is included in the Insurance segment. See Note 21 to the consolidated financial statements for a description of the Company s operating segments.

Old National reviews other intangible assets for possible impairment whenever events or changes in circumstances indicate that carrying amounts may not be recoverable. No impairment charges were recorded in 2014 or 2013. Total amortization expense associated with other intangible assets for the nine months ended September 30 was \$6.4 million in 2014 and \$6.2 million in 2013. Included in expense for the first quarter of 2013 is \$0.6 million related to the branch sales that occurred in the first quarter.

Estimated amortization expense for future years is as follows:

(dollars in thousands)	
2014 remaining	\$ 2,693
2015	9,512
2016	7,865
2017	5,861
2018	4,407
Thereafter	8,705
Total	\$ 39,043

## NOTE 12 LOAN SERVICING RIGHTS

On July 31, 2014, Old National closed on its acquisition of United and assumed loan servicing rights with a fair value of \$9.0 million. At September 30, 2014, loan servicing rights derived from loans sold with servicing retained were \$8.8 million and were included in Other Assets in the consolidated balance sheet. Loans serviced for others are not reported as assets. The principal balance of loans serviced for others was \$992.7 million at September 30, 2014. Approximately 94% of the loans serviced for others were residential mortgage loans. Custodial escrow balances maintained in connection with serviced loans were \$3.3 million at September 30, 2014. No valuation allowance was

required at September 30, 2014.

When loans are sold with servicing retained, servicing rights are initially recorded at fair value with the income statement effect recorded in gain on sale of loans. Fair value is based on market prices for comparable servicing contracts, when available or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. All classes of servicing assets are subsequently measured using the amortization method which requires servicing rights to be amortized into noninterest income in proportion to, and over the period of, the estimated future net servicing income of the underlying loans.

The following table summarizes the activity related to loan servicing rights and the related valuation allowance at September 30, 2014:

(dollars in thousands)	2014
Balance at January 1	\$
Additions	9,066
Amortization	(278)
Balance before valuation allowance, September 30	8,788
Valuation allowance:	
Balance at January 1	
Additions	
Balance, September 30	
Loan servicing rights, net	\$8,788

At September 30, 2014, the fair value of servicing rights was \$9.0 million. Fair value at September 30, 2014 was determined using a discount rate of 12% and a weighted average prepayment speed of 165% PSA.

## **NOTE 13 SHORT-TERM BORROWINGS**

The following table presents the distribution of Old National s short-term borrowings and related weighted-average interest rates as of September 30, 2014:

	<b>Federal Funds</b>		Repurchase		
(dollars in thousands)	Purchased		Agreements	Total	
2014					
Outstanding at September 30, 2014	\$	150,346	\$ 344,916	\$495,262	
Average amount outstanding		76,036	317,941	393,977	
Maximum amount outstanding at any					
month-end		182,847	344,916

Total other borrowings	\$	871,716	\$	556,388

Contractual maturities of other borrowings at September 30, 2014, were as follows:

(dollars in thousands)	
Due in 2014	\$ 200,713
Due in 2015	63
Due in 2016	117,376
Due in 2017	45,989
Due in 2018	145,563
Thereafter	366,738
ASC 815 fair value hedge and other basis adjustments	(4,726)
Total	\$871,716

## **SENIOR NOTES**

In August 2014, Old National issued \$175.0 million of senior unsecured notes with a 4.125% interest rate. These notes pay interest on February 15<sup>th</sup> and August 15<sup>th</sup>, with payment commencing February 15, 2015. The notes mature on August 15, 2024.

### FEDERAL HOME LOAN BANK

Federal Home Loan Bank (FHLB) advances had weighted-average rates of 0.80% and 0.94% at September 30, 2014, and December 31, 2013, respectively. These borrowings are collateralized by investment securities and residential real estate loans up to 145% of outstanding debt.

During 2013, Old National terminated \$50.0 million of FHLB advances, resulting in a loss on extinguishment of debt of \$1.0 million. Old National also restructured \$33.4 million pertaining to two FHLB advances in the first quarter of 2013, which lowered their effective interest rates from 3.27% and 3.29% to 2.04% and 2.49%, respectively.

48

### JUNIOR SUBORDINATED DEBENTURES

Junior subordinated debentures related to trust preferred securities are classified in other borrowings. These securities qualify as Tier 1 capital for regulatory purposes, subject to certain limitations.

In 2007, Old National acquired St. Joseph Capital Trust II in conjunction with its acquisition of St. Joseph Capital Corporation. Old National guarantees the payment of distributions on the trust preferred securities issued by St. Joseph Capital Trust II. St. Joseph Capital Trust II issued \$5.0 million in preferred securities in March 2005. The preferred securities had a cumulative annual distribution rate of 6.27% until March 2010 and now carry a variable rate of interest priced at the three-month LIBOR plus 175 basis points, payable quarterly and maturing on March 17, 2035. Proceeds from the issuance of these securities were used to purchase junior subordinated debentures with the same financial terms as the securities issued by St. Joseph Capital Trust II. Old National, at any time, may redeem the junior subordinated debentures at par and thereby cause a redemption of the trust preferred securities.

In 2011, Old National acquired Monroe Bancorp Capital Trust I and Monroe Bancorp Statutory Trust II in conjunction with its acquisition of Monroe Bancorp. Old National guarantees the payment of distributions on the trust preferred securities issued by Monroe Bancorp Capital Trust I and Monroe Bancorp Statutory Trust II. Monroe Bancorp Capital Trust I issued \$3.0 million in preferred securities in July 2006. The preferred securities carried a fixed rate of interest of 7.15% until October 7, 2011 and thereafter a variable rate of interest priced at the three-month LIBOR plus 160 basis points. Proceeds from the issuance of these securities were used to purchase junior subordinated debentures with the same financial terms as the securities in March 2007. The preferred securities carried a fixed rate of interest of 6.52% until June 15, 2012 and thereafter a variable rate of interest priced at the three-month LIBOR plus 160 basis points. Proceeds from the issuance of these securities were used to purchase junior subordinated debentures with the same financial terms as the securities issued by Monroe Bancorp Statutory Trust II. Old National, at any time, may redeem the junior subordinated debentures at par and thereby cause a redemption of the trust preferred securities in whole or in part.

In 2012, Old National acquired Home Federal Statutory Trust I in conjunction with its acquisition of Indiana Community Bancorp. Old National guarantees the payment of distributions on the trust preferred securities issued by Home Federal Statutory Trust I. Home Federal Statutory Trust I issued \$15.0 million in preferred securities in September 2006. The preferred securities carry a variable rate of interest priced at the three-month LIBOR plus 165 basis points. Proceeds from the issuance of these securities were used to purchase junior subordinated debentures with the same financial terms as the securities issued by Home Federal Statutory Trust I. Old National, at any time, may redeem the junior subordinated debentures at par and thereby cause a redemption of the trust preferred securities in whole or in part.

On April 25, 2014, Old National acquired Tower Capital Trust 2 and Tower Capital Trust 3 in conjunction with its acquisition of Tower Financial Corporation. Old National guarantees the payment of distributions on the trust preferred securities issued by Tower Capital Trust 2 and Tower Capital Trust 3. Tower Capital Trust 2 issued \$8.0 million in preferred securities in December 2005. The preferred securities carry a variable rate of interest priced at the three-month LIBOR plus 134 basis points. Proceeds from the issuance of these securities were used to purchase junior subordinated debentures with the same financial terms as the securities issued by Tower Capital Trust 2. Tower Capital Trust 3 issued \$9.0 million in preferred securities in December 2006. The preferred securities carry a variable rate of interest priced at the three-month LIBOR plus 169 basis points. Proceeds from the issuance of these securities were used to purchase junior subordinated debentures with the same financial terms as the securities issued by Tower Capital Trust 3. Old National, at any time, may redeem the junior subordinated debentures at par and thereby cause a redemption of the trust preferred securities in whole or in part.

## **CAPITAL LEASE OBLIGATION**

On January 1, 2004, Old National entered into a long-term capital lease obligation for a branch office building in Owensboro, Kentucky, which extends for 25 years with one renewal option for 10 years. The economic substance of this lease is that Old National is financing the acquisition of the building through the lease and accordingly, the building is recorded as an asset and the lease is recorded as a liability. The fair value of the capital lease obligation was estimated using a discounted cash flow analysis based on Old National s current incremental borrowing rate for similar types of borrowing arrangements.

49

At September 30, 2014, the future minimum lease payments under the capital lease were as follows:

(dollars in thousands)		
2014 remaining	\$	101
2015		410
2016		410
2017		410
2018		410
Thereafter		9,265
Total minimum lease payments	1	1,006
Less amounts representing interest	(	6,893
Present value of net minimum lease payments	\$ 4	4,113

### NOTE 15 EMPLOYEE BENEFIT PLANS

### RETIREMENT PLAN

Old National maintains a funded noncontributory defined benefit plan (the Retirement Plan ) that was frozen as of December 31, 2005. Retirement benefits are based on years of service and compensation during the highest paid five years of employment. The freezing of the plan provides that future salary increases will not be considered. Old National s policy is to contribute at least the minimum funding requirement determined by the plan s actuary. Old National expects to contribute approximately \$320 thousand to the Retirement Plan in 2014.

Old National also maintains an unfunded pension restoration plan (the Restoration Plan ) which provides benefits for eligible employees that are in excess of the limits under Section 415 of the Internal Revenue Code of 1986, as amended, that apply to the Retirement Plan. The Restoration Plan is designed to comply with the requirements of ERISA. The entire cost of the plan, which was also frozen as of December 31, 2005, is supported by contributions from the Company.

Old National contributed \$86 thousand to cover benefit payments from the Restoration Plan during the first nine months of 2014. Old National expects to contribute an additional \$27 thousand to cover benefit payments from the Restoration Plan during the remainder of 2014.

The net periodic benefit cost and its components were as follows for the three and nine months ended September 30:

			Nine M	Ionths	
	<b>Three Months Ended</b>		Ended		
	Septemb	September 30,			
(dollars in thousands)	2014	2013	2014	2013	
Interest cost	\$ 438	\$ 435	\$ 1,315	\$ 1,305	
Expected return on plan assets	(560)	(551)	(1,680)	(1,652)	
Recognized actuarial loss	329	580	987	1,739	

Settlement		269	285	692
Net periodic benefit cost	\$ 207	\$ 733	\$ 907	\$ 2,084

On September 15, 2012, Old National assumed Indiana Bank and Trust s Pentegra Defined Benefit Plan for Financial Institutions. This defined benefit pension plan has been frozen since April 1, 2008. The trustees of the Financial Institutions Retirement Fund administer the Pentegra Plan, employer identification number 13-5645888 and plan number 333. The Pentegra Plan operates as a multi-employer plan for accounting purposes and as a multiple-employer plan under the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code.

During the second quarter of 2013, Old National withdrew from the plan, contributing \$14.0 million to satisfy the final termination liability. Funding the termination liability had no impact on earnings as it was considered in the fair value of Indiana Bank and Trust s purchase accounting entries.

### NOTE 16 STOCK-BASED COMPENSATION

At September 30, 2014, Old National had 5.2 million shares remaining available for issuance under the Company s Amended and Restated 2008 Incentive Compensation Plan. The granting of awards to key employees is typically in the form of restricted stock awards or units.

### Restricted Stock Awards

The Company granted 194 thousand time-based restricted stock awards to certain key officers during the first nine months of 2014, with shares vesting over either a thirty-six or sixty month period. Compensation expense is recognized on a straight-line basis over the vesting period. Shares are subject to certain restrictions and risk of forfeiture by the participants. As of September 30, 2014, unrecognized compensation expense was estimated to be \$2.8 million for unvested restricted stock awards.

Old National recorded expense of \$0.7 million, net of tax, during the first nine months of 2014, compared to expense of \$0.5 million during the first nine months of 2013 related to the vesting of restricted stock awards.

### Restricted Stock Units

The Company granted 260 thousand shares of performance based restricted stock units to certain key officers during the first nine months of 2014, with shares vesting at the end of a thirty-six month period based on the achievement of certain targets. For certain awards, the level of performance could increase or decrease the percentage of shares earned. Compensation expense is recognized on a straight-line basis over the vesting period. Shares are subject to certain restrictions and risk of forfeiture by the participants. As of September 30, 2014, unrecognized compensation expense was estimated to be \$3.5 million.

Old National recorded \$1.0 million of stock based compensation expense, net of tax, during the first nine months of 2014. Included in 2014 is the reversal of \$0.7 million of expense associated with certain performance based restricted stock grants. Old National recorded \$1.4 million of stock based compensation expense, net of tax, during the first nine months of 2013.

## Stock Options

Old National has not granted stock options since 2009. However, in connection with the acquisition of Tower Financial Corporation on April 25, 2014, 22 thousand options for shares of Tower Financial Corporation were converted to 37 thousand options for shares of Old National Bancorp stock. In connection with the acquisition of United Bancorp, Inc. on July 31, 2014, 260 thousand options for shares of United Bancorp, Inc. were converted to 231 thousand options for shares of Old National Bancorp stock. Old National recorded no incremental expense associated with the conversion of these options.

Old National did not record any stock based compensation expense related to stock options during the first nine months of 2014 or 2013, respectively.

Stock Appreciation Rights

Old National has never granted stock appreciation rights. However, in connection with the acquisition of United Bancorp, Inc. on July 31, 2014, 183 thousand stock appreciation rights for shares of United Bancorp, Inc. were converted to 163 thousand stock appreciation rights for shares of Old National Bancorp stock. Old National recorded no incremental expense associated with the conversion of these stock appreciation rights.

Old National did not record any stock based compensation expense related to stock appreciation rights during the first nine months of 2014 or 2013, respectively.

51

## NOTE 17 INCOME TAXES

Following is a summary of the major items comprising the differences in taxes from continuing operations computed at the federal statutory rate and as recorded in the consolidated statement of income for the three and nine months ended September 30:

	Three Mon Septeml		Nine Months Ended September 30,		
(dollars in thousands)	2014	2013	2014	2013	
Provision at statutory rate of 35%	\$ 14,080	\$ 10,786	\$ 35,844	\$ 37,578	
Tax-exempt income	(3,640)	(3,533)	(10,199)	(9,522)	
Reversal of portion of unrecognized tax benefits	(1,076)	(381)	(1,076)	(381)	
State income taxes	1,196	386	2,021	2,757	
State statutory rate change			904	1,257	
Interim period effective rate adjustment	451	(268)	576	(490)	
Other, net	84	(121)	(75)	(204)	
Income tax expense	\$ 11,095	\$ 6,869	\$ 27,995	\$ 30,995	
Effective tax rate	27.6%	22.3%	27.3%	28.9%	

In accordance with ASC 740-270, Accounting for Interim Reporting, the provision for income taxes was recorded at September 30, 2014 and 2013 based on the current estimate of the effective annual rate.

For the nine months ended September 30, 2014, the effective tax rate was lower than the nine months ended September 30, 2013. The lower tax rate in the first nine months of 2014 is the result of higher tax exempt income in relation to pre-tax book income for 2014 as compared to prior year, as well as lower projected state taxes due to reduced statutory rates.

No valuation allowance was recorded at September 30, 2014 and 2013 because, based on our current expectations, Old National believes that it will generate sufficient income in the future years to realize deferred tax assets.

## **Unrecognized Tax Benefits**

The Company and its subsidiaries file a consolidated U.S. federal income tax return, as well as filing various state returns. Unrecognized state income tax benefits are reported net of their related deferred federal income tax benefit.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

(dollars in thousands)	2014	2013
Balance at January 1	\$ 3,847	\$3,953
Additions (reductions) based on tax positions related to the		
current year	30	21
Reductions due to statute of limitations expiring	(3,807)	(140)

Balance at September 30

**\$** 70

\$3,834

Approximately \$70 thousand of unrecognized tax benefits, net of interest, if recognized, would favorably affect the effective income tax rate in future periods.

The Company reversed \$3.8 million related to uncertain tax positions accounted for under FASB ASC 740-10 (FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*). The positive \$3.8 million income tax reversal relates to the 2010 statute of limitations expiring. The statute of limitations expired in the third quarter of 2014. As a result, the Company reversed a total of \$3.8 million from its unrecognized tax benefit liability.

## NOTE 18 DERIVATIVE FINANCIAL INSTRUMENTS

As part of our overall interest rate risk management, Old National uses derivative instruments, including interest rate swaps, caps and floors. The notional amount of these derivative instruments was \$609.5 million and \$464.5 million at September 30, 2014 and December 31, 2013, respectively. The September 30, 2014 balances consist of \$39.5 million notional amount of receive-fixed pay variable interest rate swaps, \$525.0 million notional amount of pay-fixed, receive variable interest rate swaps on certain of its FHLB advances and \$45.0 million notional amount of receive-fixed pay variable interest rate swaps on certain of its commercial loans. The December 31, 2013 balances consist of \$39.5 million notional amount of receive-fixed pay variable interest rate swaps and \$425.0 million notional amount of pay-fixed, receive variable interest rate swaps on certain of its FHLB advances. These hedges were entered into to manage interest rate risk. These derivative instruments are recognized on the balance sheet at their fair value and are not reported on a net basis.

In addition, commitments to fund certain mortgage loans (interest rate lock commitments) and forward commitments for the future delivery of mortgage loans to third party investors are considered derivatives. At September 30, 2014, the notional amount of the interest rate lock commitments and forward commitments were \$24.5 million and \$27.2 million, respectively. At December 31, 2013, the notional amount of the interest rate lock commitments and forward commitments were \$10.5 million and \$17.2 million, respectively. It is our practice to enter into forward commitments for the future delivery of residential mortgage loans to third party investors when interest rate lock commitments are entered into in order to economically hedge the effect of changes in interest rates resulting from our commitment to fund the loans. All derivative instruments are recognized on the balance sheet at their fair value.

Old National also enters into derivative instruments for the benefit of its customers. The notional amounts of these customer derivative instruments and the offsetting counterparty derivative instruments were \$454.7 million and \$454.7 million, respectively, at September 30, 2014. At December 31, 2013, the notional amounts of the customer derivative instruments and the offsetting counterparty derivative instruments were \$436.8 million and \$436.8 million, respectively. These derivative contracts do not qualify for hedge accounting. These instruments include interest rate swaps, caps and collars. Commonly, Old National will economically hedge significant exposures related to these derivative contracts entered into for the benefit of customers by entering into offsetting contracts with approved, reputable, independent counterparties with substantially matching terms.

Credit risk arises from the possible inability of counterparties to meet the terms of their contracts. Old National s exposure is limited to the replacement value of the contracts rather than the notional, principal or contract amounts. There are provisions in our agreements with the counterparties that allow for certain unsecured credit exposure up to an agreed threshold. Exposures in excess of the agreed thresholds are collateralized. In addition, we minimize credit risk through credit approvals, limits, and monitoring procedures.

The following tables summarize the fair value of derivative financial instruments utilized by Old National:

	<b>Asset Derivatives</b>				
	September 3	<b>30, 2014</b>	December 3	1, 2013	
	Balance		Balance		
	Sheet	Fair	Sheet	Fair	
(dollars in thousands)	Location	Value	Location	Value	
Derivatives designated as hedging instruments					
Interest rate contracts	Other assets	\$3,541	Other assets	\$3,545
