**Notes to Consolidated Financial Statements (Unaudited)**

**Note 1. Significant Accounting Policies**

*Basis of Presentation.*

This quarterly report presents the consolidated financial statements of Lakeland Bancorp, Inc. (the Company) and its subsidiary, Lakeland Bank (Lakeland). The accounting and reporting policies of the Company conform with accounting principles generally accepted in the United States of America (U.S. GAAP) and predominant practices within the banking industry.

The Company's unaudited interim financial statements reflect all adjustments, such as normal recurring accruals that are, in the opinion of management, necessary for the fair presentation of the results of the interim periods. The results of operations for the nine months ended September 30, 2015 do not necessarily indicate the results that the Company will achieve for all of 2015. You should read these interim financial statements in conjunction with the audited consolidated financial statements and accompanying notes that are presented in the Lakeland Bancorp, Inc. Annual Report on Form 10-K for the year ended December 31, 2014.

On May 21, 2014, the Company's Board of Directors authorized a 5% stock dividend which was distributed on June 17, 2014 to holders of record as of June 3, 2014. All weighted average, actual share and per share information set forth in this Quarterly Report on Form 10-Q have been adjusted retroactively for the effects of the stock dividend.

The financial information in this quarterly report has been prepared in accordance with the Company's customary accounting practices. Certain information and footnote disclosures required under U.S. GAAP have been condensed or omitted, as permitted by rules and regulations of the Securities and Exchange Commission.

Certain reclassifications have been made to prior period financial statements to conform to the 2015 presentation.

**Note 2. Share-Based Compensation**

The Company grants stock options, restricted stock and restricted stock units (RSUs) under the 2009 Equity Compensation Program. Share-based compensation expense of \$1,259,000 and \$1,121,000 was recognized for the nine months ended September 30, 2015 and 2014, respectively. As of September 30, 2015, there was unrecognized compensation cost of \$314,000 related to unvested restricted stock; that cost is expected to be recognized over a weighted average period of approximately 1.5 years. Unrecognized compensation expense related to unvested stock options was approximately \$58,000 as of September 30, 2015 and is expected to be recognized over a period of 1.7 years. Unrecognized compensation expense related to RSUs was approximately \$1.3 million as of September 30, 2015, and that cost is expected to be recognized over a period of 1.5 years.

In the first nine months of 2014, the Company granted 1,942 shares of restricted stock at a grant date fair value of \$11.21 per share under the 2009 Equity Compensation Program. Compensation expense on these shares is expected to average approximately \$4,000 per year over a five year period. No restricted stock was granted in the first nine months of 2015.

In the first nine months of 2015, the Company granted 131,509 RSUs at a weighted average grant date fair value of \$11.08 per share under the Company's 2009 Equity Compensation Program. These units vest within a range of two to three years. A portion of these RSUs will vest subject to certain performance conditions in the restricted stock unit agreement. There are also certain provisions in the compensation program which state that if a holder of the RSUs

reaches a certain age and years of service, the person has effectively earned a portion of the RSUs at that time. Compensation expense on these restricted stock units is expected to average approximately \$485,000 per year over a three year period. In the first nine months of 2014, the Company granted 127,797 RSUs at a weighted average grant date fair value of \$10.65 per share under the Company's 2009 Equity Compensation Program. Compensation expense on these RSUs is expected to average approximately \$453,000 per year over a three year period.

There were no grants of stock options in the first nine months of 2015 or 2014.

**Table of Contents**

Option activity under the Company's stock option plans is as follows:

|   | Number of<br>shares | Weighted<br>average<br>exercise<br>price | Weighted<br>average<br>remaining<br>contractual<br>term<br>(in years) | Aggregate<br>intrinsic value |
|---|---------------------|--|---|------------------------------|
| Outstanding, January 1, 2015              | 311,705             | \$ 9.69                                  |   | \$ 681,861                   |
| Issued                                    |                     |  |   |                              |
| Exercised                                 | (16,918)            | 7.34                                     |   |                              |
| Forfeited                                 | (32,785)            | 11.48                                    |   |                              |
| Expired                                   |                     |  |   |                              |
| Outstanding, September 30, 2015           | 262,002             | \$ 9.60                                  | 2.24  | \$ 492,831                   |
| Options exercisable at September 30, 2015 | 241,002             | \$ 9.62                                  | 2.15  | \$ 457,255                   |

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between the Company's closing stock price on the last trading day of the first nine months of 2015 and the exercise price, multiplied by the number of in-the-money options).

The aggregate intrinsic value of stock options exercised during the nine months ended September 30, 2015 and 2014 was \$68,000 and \$42,000, respectively. Exercise of stock options during the first nine months of 2015 and 2014 resulted in cash receipts of \$124,000 and \$86,000, respectively.

Information regarding the Company's restricted stock and changes during the nine months ended September 30, 2015 is as follows:

|                                 | Number of<br>shares | Weighted<br>average<br>price |
|---------------------------------|---------------------|------------------------------|
| Outstanding, January 1, 2015    | 160,284             | \$ 9.21                      |
| Granted                         |                     |                              |
| Vested                          | (86,696)            | 9.11                         |
| Forfeited                       | (88)                | 9.39                         |
| Outstanding, September 30, 2015 | 73,500              | \$ 9.32                      |

**Table of Contents**

The following table shows investment securities by stated maturity. Securities backed by mortgages have expected maturities that differ from contractual maturities because borrowers have the right to call or prepay, and are, therefore, classified separately with no specific maturity date (in thousands):

|  | September 30, 2015 |               |                   |               |

| Gross gains   | 223                        | 251       | 251                       | 346       |
| Gross losses  | (50)                       | (61)      | (61)                      | (344)     |

The above sales in 2014 include sales of \$1.4 million in held to maturity mortgage-backed securities of which the Company had already collected over 90% of the principal outstanding. The Company realized \$73,000 in gains on sales of these securities.

Gains or losses on sales of investment securities are based on the net proceeds and the adjusted carrying amount of the securities sold using the specific identification method.

Securities with a carrying value of approximately \$351.1 million and \$356.1 million at September 30, 2015 and December 31, 2014, respectively, were pledged to secure public deposits and for other purposes required by applicable laws and regulations.

**Table of Contents**

The following table indicates the length of time individual securities have been in a continuous unrealized loss position at September 30, 2015 and December 31, 2014:

| September 30, 2015                               | Less than 12 months |                   | 12 months or longer    |                   | Number of securities | Total      |                   |

**Table of Contents**

Management has evaluated the securities in the above table and has concluded that none of the securities are other-than-temporarily impaired. The cause of the fair values being below cost is due to interest rate movements and is deemed temporary. All investment securities are evaluated on a periodic basis to identify any factors that would require a further analysis. In evaluating the Company's securities, management considers the following items:

The Company's ability and intent to hold the securities, including an evaluation of the need to sell the security to meet certain liquidity measures, or whether the Company has sufficient levels of cash to hold the identified security in order to recover the entire amortized cost of the security;

The financial condition of the underlying issuer;

The credit ratings of the underlying issuer and if any changes in the credit rating have occurred;

The length of time the security's fair value has been less than amortized cost; and

Adverse conditions related to the security or its issuer if the issuer has failed to make scheduled payments or other factors.

If the above factors indicate that an additional analysis is required, management will perform and consider the results of a discounted cash flow analysis.

As of September 30, 2015, the equity securities include investments in other financial institutions for market appreciation purposes. Those equities had a purchase price of \$2.7 million and a market value of \$4.9 million as of September 30, 2015.

As of September 30, 2015, equity securities also included \$13.6 million in investment funds that do not have a quoted market price but use net asset value per share or its equivalent to measure fair value.

The funds include \$2.9 million in funds that are primarily invested in community development loans that are guaranteed by the Small Business Administration (SBA). Because the funds are primarily guaranteed by the federal government there are minimal changes in market value between accounting periods. These funds can be redeemed with 60 days notice at the net asset value less unpaid management fees with the approval of the fund manager. As of September 30, 2015, the net amortized cost equaled the market value of the investment. There are no unfunded commitments related to this investment.

The funds also include \$10.7 million in funds that are invested in government guaranteed loans, mortgage-backed securities, small business loans and other instruments supporting affordable housing and economic development. The Company may redeem these funds at the net asset value calculated at the end of the current business day less any unpaid management fees. As of September 30, 2015, the amortized cost of these securities was \$10.8 million and the fair value was \$10.7 million. There are no restrictions on redemptions for the holdings in these investments other than the notice required by the fund manager. There are no unfunded commitments related to this investment.

**Note 7. Loans, Leases and Other Real Estate.**

Edgar Filing: LAKELAND BANCORP INC - Form 10-Q

The following sets forth the composition of Lakeland's loan and lease portfolio as of September 30, 2015 and December 31, 2014:

|                                    | September 30,<br>2015 | December 31,<br>2014 |
|------------------------------------|-----------------------|----------------------|
|                                    | (in thousands)        |                      |

Interest that would have been accrued on impaired loans during the first nine months of 2015 and 2014 had the loans been performing under original terms would have been \$1.1 million and \$1.3 million, respectively. Interest that would have accrued for the year ended December 31, 2014 was \$1.8 million.

*Credit Quality Indicators*

The class of loans is determined by internal risk rating. Management closely and continually monitors the quality of its loans and leases and assesses the quantitative and qualitative risks arising from the credit quality of its loans and leases. It is the policy of Lakeland to require that a Credit Risk Rating be assigned to all commercial loans and loan commitments. The Credit Risk Rating System has been developed by management to provide a methodology to be used by Loan Officers, department heads and Senior Management in identifying various levels of credit risk that exist within Lakeland's loan portfolios. The risk rating system assists Senior Management in evaluating Lakeland's commercial loan portfolio, analyzing trends, and determining the proper level of required reserves to be recommended to the Board. In assigning risk ratings, management considers, among other things, a borrower's debt service coverage, earnings strength, loan to value ratios, industry conditions and economic conditions. Management categorizes commercial loans and commitments into a one (1) to nine (9) numerical structure with rating 1 being the strongest rating and rating 9 being the weakest. Ratings 1 through 5W are considered "Pass" ratings.

**Table of Contents**

The following table shows the Company's commercial loan portfolio as of September 30, 2015 and December 31, 2014, by the risk ratings discussed above (in thousands):

The risk rating tables above do not include consumer or residential loans or leases because they are evaluated on their payment status.

**Table of Contents***Allowance for Loan and Lease Losses*

As part of an ongoing evaluation process of developing the Allowance for Loan Losses estimate, management continually evaluates and updates their assumptions based on the current economic environment and their own loss experience. During the third quarter of 2015, the Company refined and enhanced its assessment of the adequacy of the allowance for loan and lease losses by extending the lookback period on its commercial loan portfolios from three years to five years and by extending the lookback period for all other portfolios from two to three years in order to capture more of the economic cycle. It also enhanced its qualitative factor framework to include a factor that captures the risk related to appraised real estate values, and how those values could change in relation to a change in capitalization rates. This enhancement is meant to increase the level of precision in the allowance for loan and lease losses. As a result, the Company will no longer have an unallocated segment in its allowance for loan losses, as the risks and uncertainties meant to be captured by the unallocated allowance have been included in the qualitative framework for the respective portfolios. As such, the unallocated allowance has in essence been reallocated to the certain portfolios based on the risks and uncertainties it was meant to capture.

The following table details activity in the allowance for loan and lease losses by portfolio segment for the three and nine months ended September 30, 2015 and 2014:

| <b>Three Months Ended<br/>September 30, 2015<br/>Allowance for Loan and<br/>Lease Losses:</b> | Commercial,<br>secured |  |        |   |                                 |                                |          | Unallocated | Total |

Lakeland also maintains a reserve for unfunded lending commitments which is included in other liabilities. This reserve was \$1.5 million and \$1.1 million at September 30, 2015 and December 31, 2014, respectively. The Company analyzes the adequacy of the reserve for unfunded lending commitments in conjunction with its analysis of the adequacy of the allowance for loan and lease losses. For more information on this analysis, see *Risk Elements* in *Management's Discussion and Analysis*.

*Troubled Debt Restructurings*

Troubled debt restructurings are those loans where concessions have been made due to borrowers' financial difficulties. Restructured loans typically involve a modification of terms such as a reduction of the stated interest rate, a moratorium of principal payments and/or an extension of the maturity date at a stated interest rate lower than the current market rate of a new loan with similar risk. The Company considers the potential losses on these loans as well

as the remainder of its impaired loans while considering the adequacy of the allowance for loan and lease losses.

**Table of Contents**

The following table summarizes loans that have been restructured during the three and nine months ended September 30, 2015 and 2014:

*Mortgages Held for Sale*

Residential mortgages originated by the bank and held for sale in the secondary market are carried at the lower of cost or fair market value. Fair market value is generally determined by the value of purchase commitments on individual loans. Losses are recorded as a valuation allowance and charged to earnings. As of September 30, 2015, the Company had \$1.9 million in mortgages held for sale compared to \$592,000 as of December 31, 2014.

*Other Real Estate and Other Repossessed Assets*

At September 30, 2015 the Company had other real estate owned and other repossessed assets of \$803,000 and \$16,000, respectively. The other real estate owned that the Company held at September 30, 2015 included \$675,000 in residential property acquired as a result of foreclosure proceedings or through a deed in lieu of foreclosure. At December 31, 2014, the Company had other real estate owned and other repossessed assets of \$977,000 and \$49,000, respectively.

**Note 8. Estimated Fair Value of Financial Instruments and Fair Value Measurement***Fair Value Measurement*

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for an asset or liability in an orderly transaction between market participants at the measurement date. U.S. GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels giving the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest level priority to unobservable inputs (level 3 measurements). The following describes the three levels of fair value hierarchy:

Level 1 unadjusted quoted prices in active markets for identical assets or liabilities; includes U.S. Treasury Notes, and other U.S. Government Agency securities that actively trade in over-the-counter markets; equity securities and mutual funds that actively trade in over-the-counter markets.

Level 2 quoted prices for similar assets or liabilities in active markets; or quoted prices for identical or similar assets or liabilities in markets that are not active; or inputs other than quoted prices that are observable for the asset or liability including yield curves, volatilities, and prepayment speeds.

Level 3 unobservable inputs for the asset or liability that reflect the Company's own assumptions about assumptions that market participants would use in the pricing of the asset or liability and that are consequently not based on market activity but upon particular valuation techniques.

The Company's assets that are measured at fair value on a recurring basis are its available for sale investment securities. The Company obtains fair values on its securities using information from a third party servicer. If quoted prices

**Table of Contents**

for securities are available in an active market, those securities are classified as Level 1 securities. The Company has U.S. Treasury Notes and certain equity securities that are classified as Level 1 securities. Level 2 securities were primarily comprised of U.S. Agency bonds, residential mortgage-backed securities, obligations of state and political subdivisions and corporate securities. Fair values were estimated primarily by obtaining quoted prices for similar assets in active markets or through the use of pricing models supported with market data information. Standard inputs include benchmark yields, reported trades, issuer spreads, bids and offers. On a quarterly basis, the Company reviews the pricing information received from the Company's third party pricing service. This review includes a comparison to non-binding third-party quotes.

The fair values of derivatives are based on valuation models from a third party using current market terms (including interest rates and fees), the remaining terms of the agreements and the credit worthiness of the counter party as of the measurement date (Level 2).

The following table sets forth the Company's financial assets that were accounted for at fair value on a recurring basis as of the periods presented by level within the fair value hierarchy. During the nine months ended September 30, 2015, the Company did not make any transfers between any levels within the fair value hierarchy. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement:

| Loans held for sale                                     |   | 592   |  | 592                 |
| Other real estate owned and other repossessed<br>assets |   |   | 1,026  | 1,026               |

Impaired loans are evaluated and valued at the time the loan is identified as impaired at the lower of cost or market value of the underlying collateral. Because most of Lakeland's impaired loans are collateral dependent, fair value is generally measured based on the value of the collateral, less estimated costs to sell, securing these loans and leases and is classified at a level 3 in the fair value hierarchy. Collateral may be real estate, accounts receivable, inventory, equipment and/or other business assets. The value of the real estate is assessed based on appraisals by qualified third party licensed appraisers. The appraisers may use the sales comparison approach, the cost approach or the income approach to value the collateral using discount rates (with ranges of 5-11%) or capitalization rates (with ranges of 3-8%) to evaluate the property. The value of the equipment may be determined by an appraiser, if significant, inquiry through a recognized valuation resource, or by the value on the borrower's financial statements. Field examiner reviews on business assets may be conducted based on the loan exposure and reliance on this type of collateral. Appraised and reported values may be adjusted based on management's historical knowledge, changes in market conditions from the time of valuation, and/or management's expertise and knowledge of the client and client's business. Loans that are not collateral dependent are evaluated based on a discounted cash flow method. Impaired loans are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly, based on the same factors identified above.

The Company has a held for sale loan portfolio that consists of residential mortgages that are being sold in the secondary market. The Company records these mortgages at the lower of cost or market value. Fair value is generally determined by the value of purchase commitments.

Other real estate owned (OREO) and other repossessed assets, representing property acquired through foreclosure, are recorded at fair value less estimated disposal costs of the acquired property on the date of acquisition and thereafter remeasured and carried at lower of cost or fair market value. Fair value on other real estate owned is based on the appraised value of the collateral using the sales comparison approach or the income approach with discount rates or capitalization rates similar to those used in impaired loan valuation. The fair value of other repossessed assets is estimated by inquiry through recognized valuation resources.

Changes in the assumptions or methodologies used to estimate fair values may materially affect the estimated amounts. Changes in economic conditions, locally or nationally, could impact the value of the estimated amounts of impaired loans, OREO and other repossessed assets.

***Fair Value of Certain Financial Instruments***

Estimated fair values have been determined by the Company using the best available data and an estimation methodology suitable for each category of financial instruments. Management is concerned that there may not be reasonable comparability between institutions due to the wide range of permitted assumptions and methodologies in the absence of active markets. This lack of uniformity gives rise to a high degree of subjectivity in estimating financial instrument fair values.

## **Table of Contents**

The estimation methodologies used, the estimated fair values, and recorded book balances at September 30, 2015 and December 31, 2014 are outlined below.

This summary, as well as the table below, excludes financial assets and liabilities for which carrying value approximates fair value. For financial assets, these include cash and cash equivalents. For financial liabilities, these include noninterest bearing demand deposits, savings and interest-bearing transaction accounts and federal funds sold and securities sold under agreements to repurchase. The estimated fair value of demand, savings and interest-bearing transaction accounts is the amount payable on demand at the reporting date. Carrying value is used because there is no stated maturity on these accounts, and the customer has the ability to withdraw the funds immediately. Also excluded from this summary and the following table are those financial instruments recorded at fair value on a recurring basis, as previously described.

The fair value of Investment Securities Held to Maturity was measured using information from the same third-party servicer used for Investment Securities Available for Sale using the same methodologies discussed above. Investment Securities Held to Maturity includes \$5.0 million in short-term municipal bond anticipation notes that are non-rated and do not have an active secondary market or information readily available on standard financial systems. As a result, the securities are classified as Level 3 securities. These are investments in municipalities in the Company's market area, and management performs a credit analysis on the municipality before investing in these securities.

Federal Home Loan Bank of New York (FHLB) stock is an equity interest that can be sold to the issuing FHLB, to other Federal Home Loan Banks, or to other member banks at its par value. Because ownership of these securities is restricted, they do not have a readily determinable fair value. As such, the Company's FHLB Stock is recorded at cost or par value and is evaluated for impairment each reporting period by considering the ultimate recoverability of the investment rather than temporary declines in value. The Company's evaluation primarily includes an evaluation of liquidity, capitalization, operating performance, commitments, and regulatory or legislative events.

The net loan portfolio at September 30, 2015 and December 31, 2014 has been valued using a present value discounted cash flow where market prices were not available. The discount rate used in these calculations is the estimated current market rate adjusted for credit risk. The valuation of the Company's loan portfolio is consistent with accounting guidance but does not fully incorporate the exit price approach.

For fixed maturity certificates of deposit, fair value was estimated based on the present value of discounted cash flows using the rates currently offered for deposits of similar remaining maturities. The carrying amount of accrued interest payable approximates its fair value.

The fair value of long-term debt is based upon the discounted value of contractual cash flows. The Company estimates the discount rate using the rates currently offered for similar borrowing arrangements. The fair value of subordinated debentures is based on bid/ask prices from brokers for similar types of instruments.

The fair values of commitments to extend credit and standby letters of credit are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of guarantees and letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date. The fair value of commitments to extend credit and standby letters of credit are deemed immaterial.

**Table of Contents**

The following table presents the carrying values, fair values and placement in the fair value hierarchy of the Company's financial instruments as of September 30, 2015 and December 31, 2014:

|   | Carrying Value | Fair Value | Quoted Prices in  |   |   |
|---|----------------|------------|---|---|---|
|   |                |            | Active Markets for Identical Assets (Level 1)<br>(in thousands) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) |

**Note 9. Derivatives**

Lakeland is a party to interest rate derivatives that are not designated as hedging instruments. Under a program, Lakeland executes interest rate swaps with commercial lending customers to facilitate their respective risk management strategies. These interest rate swaps with customers are simultaneously offset by interest rate swaps that Lakeland executes with a separate third party, such that Lakeland minimizes its net risk exposure resulting from such transactions. Because the interest rate swaps associated with this program do not meet the hedge accounting requirements, changes in the fair value of both the customer swaps and the offsetting swaps are recognized directly in earnings. The changes in the fair value of the swaps offset each other, except for the credit risk of the counterparties, which is determined by taking into consideration the risk rating, probability of default and loss given default for all counterparties. As of September 30, 2015 and December 31, 2014, Lakeland had \$2.0 million and \$505,000, respectively, in available for sale securities pledged for collateral on its interest rate swaps with the financial institution.

**Table of Contents**

The following table presents summary information regarding these derivatives for the periods presented (dollars in thousands):

| September 30, 2015            | Notional Amount | Average Maturity (Years) | Weighted Average Fixed Rate | Weighted Average Variable Rate | Fair Value |
|-------------------------------|-----------------|--------------------------|-----------------------------|--------------------------------|------------|
| Customer interest rate swaps  | (\$ 35,766)     | 14.8                     | 4.540%                      | 1 Mo Libor + 2.00              | \$ 1,836   |
| 3rd Party interest rate swaps | 35,766          | 14.8                     | 4.540%                      | 1 Mo Libor + 2.00              | (1,836)    |

| December 31, 2014             | Notional Amount | Average Maturity (Years) | Weighted Average Fixed Rate | Weighted Average Variable Rate | Fair Value |
|-------------------------------|-----------------|--------------------------|-----------------------------|--------------------------------|------------|
| Customer interest rate swaps  | (\$ 17,279)     | 5.7                      | 3.840%                      | 1 Mo Libor + 2.21              | \$ 37      |
| 3rd party interest rate swaps | 17,279          | 5.7                      | 3.840%                      | 1 Mo Libor + 2.21              | (\$ 37)    |

**Note 10. Goodwill and Intangible Assets**

The Company has recorded goodwill of \$110.0 million at September 30, 2015 and December 31, 2014 which includes \$22.9 million from the Somerset Hills acquisition in 2013 and \$87.1 million from prior acquisitions. The Company reviews its goodwill and intangible assets annually, on November 30, or more frequently if conditions warrant, for impairment. In testing goodwill for impairment, the Company compares the estimated fair value of its reporting unit to its carrying amount, including goodwill. The Company has determined that it has one reporting unit, Community Banking.

The Company recorded \$2.7 million in core deposit intangible for the Somerset Hills acquisition. Year-to-date, it has amortized \$316,000 in core deposit intangible. The estimated future amortization expense for the remainder of 2015 and for each of the succeeding five years ended December 31 is as follows (dollars in thousands):

| For the year ended: |       |
|---------------------|-------|
| 2015                | \$ 99 |
| 2016                | 366   |
| 2017                | 316   |
| 2018                | 267   |
| 2019                | 218   |
| 2020                | 168   |

**Note 11. Borrowings**

At September 30, 2015, the Company had federal funds purchased and securities sold under agreements to repurchase of \$97.0 million and \$34.4 million respectively. The securities sold under agreements to repurchase are overnight sweep arrangement accounts with our customers. The Company also had \$50.0 million in long-term securities sold under agreements to repurchase included in other borrowings which have maturities ranging from one to seven years. As of September 30, 2015, the Company had \$110.6 million in securities pledged for its securities sold under agreements to repurchase, including \$107.6 million in mortgage backed securities and \$3.0 million in U.S. government agency securities.

At times the market values of securities collateralizing our securities sold under agreements to repurchase may decline due to changes in interest rates and may necessitate our lenders to issue a margin call which requires Lakeland to pledge additional collateral to meet that margin call.

---

**Table of Contents****Note 12. Early Redemption and Extinguishment of Debt**

On August 3, 2015, The Company redeemed and extinguished \$10.0 million of Lakeland Bancorp Capital Trust IV debentures and recorded a \$1.8 million gain on the redemption and extinguishment of debt. The interest rate on this debenture floated at LIBOR plus 152 basis points and had a rate of 1.80% at the time of extinguishment.

**Note 13. Pending Acquisition**

On August 3, 2015, the Company entered into an agreement and Plan of Merger (the Merger Agreement) with Pascack Bancorp, Inc., pursuant to which Pascack Bancorp will merge with and into the Company, and Pascack Bancorp's wholly owned subsidiary, Pascack Community Bank, will merge with and into Lakeland Bank. The Merger Agreement provides that the shareholders of Pascack Bancorp will receive, at their election, for each outstanding share of Pascack Bancorp common stock that they own at the effective time of the merger or would own upon conversion of preferred stock, either 0.9576 shares of Lakeland Bancorp common stock or \$11.35 in cash, subject to proration as described in the Merger Agreement, so that 90% of the aggregate merger consideration will be shares of Lakeland Bancorp common stock and 10% will be cash. Lakeland Bancorp expects to issue an aggregate of 3,314,328 shares of its common stock in the merger, and will also cash out outstanding Pascack Bancorp options. The transaction is valued at approximately \$43.8 million in the aggregate, or \$11.35 per share. As of June 30, 2015, Pascack Bancorp had consolidated total assets, total loans, total deposits and total stockholders' equity of \$402.7 million, \$334.0 million, \$304.8 million and \$33.3 million, respectively. Pascack Bancorp had net income of \$2.4 million for the year ended December 31, 2014.

In October 2015, the Company and Pascack Bancorp received approvals from the Federal Deposit Insurance Corporation and the New Jersey Department of Banking and Insurance to complete the merger of the bank subsidiaries, Pascack Community Bank with and into Lakeland Bank. The Federal Reserve Board has advised that the merger of the bank holding companies, Pascack Bancorp with and into the Company, does not require its approval. The transaction has been approved by the board of directors of each of Lakeland Bancorp and Pascack Bancorp. Subject to approval of the shareholders of Pascack Bancorp, the Company anticipates completing the merger in the fourth quarter of 2015.

**Note 14. Recent Accounting Pronouncements**

In September 2015, the Financial Accounting Standards Board (FASB) issued an accounting standards update simplifying the accounting for adjustments made to provisional amounts recognized in a business combination, eliminating the requirement to retrospectively account for those adjustments. To simplify the accounting for adjustments made to provisional amounts, the amendments in the accounting standards update require that the acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amount is determined. The acquirer is required to also record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. In addition, an entity is required to present separately on the face of the income statement or disclose in the notes to the financial statements the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. This amendment is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015.

In May 2015, the FASB issued an accounting standards update clarifying how investments valued using the net asset value practical expedient within the fair value hierarchy should be classified. The accounting standards update was

issued to address diversity in practice by exempting investments measured using the net asset value expedient from categorization in the fair value hierarchy. This accounting standards update is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of this update is not expected to have a material impact on the Company's financial statements.

In April 2015, the FASB issued an accounting standards update requiring that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of the debt liability consistent with the presentation of debt discounts. The purpose of this update is to simplify the presentation of debt issuance costs and to align the US GAAP presentation of debt more closely with international accounting standards. In August 2015, the FASB issued a subsequent update which discussed presentation and subsequent measurement of debt issuance costs associated with line-of-credit arrangements. These amendments are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of these updates are not expected to have a material impact on the Company's financial statements.

## **Table of Contents**

In January 2015, the FASB issued an accounting standards update regarding the elimination of the concept of the extraordinary items from the statement of operations. The purpose of this update is to simplify the statement of operations presentation and to align the US GAAP income statement more closely with international accounting standards. This update is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of this update is not expected to have a material impact on the Company's financial statements.

In June 2014, the FASB issued an accounting standards update regarding share-based payments that requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. This update is effective for interim and annual periods beginning after December 15, 2015. The amendments can be applied prospectively to all awards granted or modified after the effective date or retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented and to all new or modified awards thereafter. Early adoption is permitted. The Company has determined that adoption of this update is not expected to have a material impact on its accounting and disclosures.

In June 2014, the FASB issued an accounting standards update that aligns the accounting for repurchase to maturity transactions and repurchase agreements executed as a repurchase financing with the accounting for other typical repurchase agreements. Going forward, these transactions would all be accounted for as secured borrowings. This update is effective for the first interim or annual period beginning after December 15, 2014. In addition, the disclosure of certain transactions accounted for as a sale is effective for the first interim or annual period beginning on or after December 15, 2014, and the disclosure for transactions accounted for as secured borrowings is required for annual periods beginning after December 15, 2014, and interim periods after March 15, 2015. The Company adopted this update in 2015. The disclosures required by this update are contained in Note 11. The Company does not engage in repurchase to maturity transactions, and therefore the adoption of this update did not have a material impact on the Company's financial results.

In May 2014, the FASB issued an accounting standards update that clarifies the principles for recognizing revenue. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to a customer in an amount that reflects the consideration to which the entity expects to be entitled in exchange for these goods or services. This guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. The Company is still evaluating the potential impact on the Company's financial statements.

In January 2014, the FASB issued an accounting standards update to clarify when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan should be derecognized and the real estate recognized. These amendments clarify that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either: (a) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure; or (b) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. This update is effective for annual periods and interim periods within those annual periods beginning after December 15, 2014. The Company adopted this update in the first quarter of 2015, and the disclosures required are included in Note 7. The adoption of this update did not have a material impact on the Company's financial statements.

## **PART I ITEM 2**

### **Management's Discussion and Analysis of**

**Financial Condition and Results of Operations**

This section should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

**Statements Regarding Forward Looking Information**

The information disclosed in this document includes various forward-looking statements that are made in reliance upon the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 with respect to credit quality (including delinquency trends and the allowance for loan and lease losses), corporate objectives, and other financial and business matters. The words anticipates, projects, intends, estimates, expects, believes, plans, may, could, and other similar expressions are intended to identify such forward-looking statements. The Company cautions that these forward-looking statements are necessarily speculative and speak only as of the date made, and are subject to numerous assumptions, risks and uncertainties, all of which may change over time. Actual results could differ materially from such forward-looking statements.

## **Table of Contents**

In addition to the risk factors disclosed elsewhere in this document, the following factors, among others, could cause the Company's actual results to differ materially and adversely from such forward-looking statements: changes in the financial services industry and the U.S. and global capital markets, changes in economic conditions nationally, regionally and in the Company's markets, the nature and timing of actions of the Federal Reserve Board and other regulators, the nature and timing of legislation affecting the financial services industry including, but not limited to, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, government intervention in the U.S. financial system, changes in levels of market interest rates, pricing pressures on loan and deposit products, credit risks of the Company's lending and leasing activities, customers' acceptance of the Company's products and services, competition, failure to obtain the required approval from Pascack Bancorp, Inc. shareholders for the merger of Pascack Bancorp, Inc. into Lakeland Bancorp, Inc. and failure to realize anticipated efficiencies and synergies if the holding company merger and the merger of Pascack Community Bank into Lakeland Bank are consummated.

The above-listed risk factors are not necessarily exhaustive, particularly as to possible future events, and new risk factors may emerge from time to time. Certain events may occur that could cause the Company's actual results to be materially different than those described in the Company's periodic filings with the Securities and Exchange Commission. Any statements made by the Company that are not historical facts should be considered to be forward-looking statements. The Company is not obligated to update and does not undertake to update any of its forward-looking statements made herein.

## **Critical Accounting Policies, Judgments and Estimates**

The accounting and reporting policies of the Company and its subsidiaries conform to accounting principles generally accepted in the United States of America and predominant practices within the banking industry. The consolidated financial statements include the accounts of the Company, Lakeland, Lakeland NJ Investment Corp., Lakeland Investment Corp., Lakeland Equity, Inc., Lakeland Preferred Equity, Inc., and Sullivan Financial Services, Inc. All intercompany balances and transactions have been eliminated.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. These estimates and assumptions also affect reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. There have been no material changes in the Company's critical accounting policies, judgments and estimates, including assumptions or estimation techniques utilized, as compared to those disclosed in the Company's most recent Annual Report on Form 10-K.

## **Management Overview**

The quarter and nine months ended September 30, 2015 represented a period of continued growth for the Company. As discussed in this Management's Discussion and Analysis:

Net income at \$24.0 million, or \$0.63 per diluted share in the first nine months of 2015, increased \$827,000 or \$0.02 per diluted share compared to \$23.2 million, or \$0.61, per diluted share for the same period last year. Annualized return on average assets was 0.89% for the first nine months of 2015 compared to 0.92% for the first nine months of 2014. Annualized return on average equity was 8.24% for the first nine months of 2015 compared to 8.52% for the same period last year.

The Company reported strong loan growth for the nine months ended September 30, 2015. Loans totaling \$2.85 billion at September 30, 2015 increased by \$198.2 million from December 31, 2014. Commercial real estate and commercial, industrial and other grew 10% and 22%, respectively, from December 31, 2014 to September 30, 2015.

The Company's robust loan growth has been augmented the by the opening of two new loan production offices (LPO) in the first half of 2015 serving the Middlesex/Monmouth County New Jersey region, and the greater Hudson Valley, New York area.

Non-interest-bearing demand deposits at \$694.3 million increased by \$48.2 million, or 7% in 2015, and represented 24% of total deposits at September 30, 2015.

---

**Table of Contents**

Non-performing assets totaled \$22.3 million at September 30, 2015 compared to \$21.7 million at December 31, 2014 and \$19.6 million reported at September 30, 2014.

As a result of declining charge-offs and as a result of management's continuing analysis of the adequacy of the allowance for loan and lease losses, the provision for loan and lease losses was reduced from \$4.3 million in the first nine months of 2014 to \$1.9 million in the first nine months of 2015.

On August 3, 2015, the Company entered into an agreement and Plan of Merger (the Merger Agreement) with Pascack Bancorp, Inc., pursuant to which Pascack Bancorp will merge with and into the Company, and Pascack Bancorp's wholly owned subsidiary, Pascack Community Bank, will merge with and into Lakeland Bank. For more information, please see Note 13 in Notes to the Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

**Results of Operations**

**(Third Quarter 2015 Compared to Third Quarter 2014)**

**Net Income**

Net income was \$7.8 million in the third quarter of 2015 compared to net income of \$8.2 million for the third quarter of 2014. Diluted earnings per share was \$0.20 for the third quarter of 2015, compared to diluted earnings per share of \$0.22 for the same period last year. Excluding the impact of several non-core items, net income would have been \$8.3 million or \$0.22 per diluted share in the third quarter of 2015. The non-core items consist of \$330,000 of expenses related to the proposed merger with Pascack Bancorp, Inc., \$2.4 million of prepayment fees from the repayment of \$20.0 million of long-term debt, \$1.8 million of realized gain resulting from the redemption and extinguishment of \$10.0 million of trust preferred securities, and \$173,000 in net realized gains on the sale of securities. Net interest income at \$29.3 million for the third quarter of 2015 increased \$882,000 from the third quarter of 2014 due primarily to a \$1.4 million increase in interest income, partially offset by an increase of \$481,000 in interest expense. The increase in interest income reflects an increase in interest earning assets resulting from organic growth.

**Net Interest Income**

Net interest income is the difference between interest income on earning assets and the cost of funds supporting those assets. The Company's net interest income is determined by: (i) the volume of interest-earning assets that it holds and the yields that it earns on those assets, and (ii) the volume of interest-bearing liabilities that it has assumed and the rates that it pays on those liabilities.

Net interest income on a tax equivalent basis for the third quarter of 2015 was \$29.5 million, compared to \$28.7 million for the third quarter of 2014. The net interest margin decreased from 3.58% in the third quarter of 2014 to 3.42% in the third quarter of 2015 primarily as a result of a 12 basis point decrease in the yield on interest earning assets as well as a five basis point increase in the cost of interest bearing liabilities. The decrease in the net interest margin was somewhat mitigated by an increase in interest income earned on free funds (interest earning assets funded by non-interest bearing liabilities) resulting from an increase in average non-interest bearing deposits of \$39.0 million. The components of net interest income will be discussed in greater detail below.

The following table reflects the components of the Company's net interest income, setting forth for the periods presented, (1) average assets, liabilities and stockholders' equity, (2) interest income earned on interest-earning assets

and interest expense paid on interest-bearing liabilities, (3) average yields earned on interest-earning assets and average rates paid on interest-bearing liabilities, (4) the Company's net interest spread (i.e., the average yield on interest-earning assets less the average cost of interest-bearing liabilities) and (5) the Company's net interest margin. Rates are computed on a tax equivalent basis using a tax rate of 35%.

| <b>NET INTEREST INCOME</b>                           |   | <b>\$ 29,334</b>               |   |   | <b>\$ 28,452</b>               |                                     |
| Net interest margin (C)                              |   |                                | 3.42%   |   |                                | 3.58%                               |

(A) Includes non-accrual loans, the effect of which is to reduce the yield earned on loans, and deferred loan fees.

(B) Includes interest-bearing cash accounts.

(C) Net interest income divided by interest-earning assets.

Interest income on a tax equivalent basis increased from \$31.0 million in the third quarter of 2014 to \$32.4 million in the third quarter of 2015, an increase of \$1.3 million, or 4%. The increase in interest income was primarily a result of a \$247.7 million increase in average interest earning assets partially offset by a 12 basis point decrease in the yield on interest earning assets. The yield on average loans and leases at 4.11% in the third quarter of 2015 was 14 basis points lower than the third quarter of 2014 due primarily to strong growth in new loans and leases originated or refinanced at lower rates. The yield on average taxable and tax exempt investment securities decreased by two and 38 basis points, respectively, compared to the third quarter of 2014. The decrease in yield on tax exempt investment securities was primarily due to maturing securities at higher rates and new purchases at lower rates.

Total interest expense at \$2.8 million in the third quarter of 2015 was \$481,000 greater than the \$2.3 million reported for the same period in 2014. The cost of average interest-bearing liabilities increased from 0.39% in the third quarter of 2014 to 0.44% in 2015. The increase in the cost of funds was primarily due to increases in average time deposits and borrowings. Borrowings as a percent of interest-bearing liabilities increased from 11% in the third quarter of 2014, to 14% in the third quarter of 2015 as borrowings increased \$92.0 million in that time period to help fund loan growth. Borrowings at a rate of 1.52% have a higher cost than interest bearing deposits which had an average cost of 0.27% for the third quarter of 2015. Additionally, higher cost average time deposits totaling \$309.2 million increased \$29.0 million compared to the third quarter of 2014. Because loan growth exceeded growth in core deposits in 2015, the Company bid for higher cost time deposits and used term borrowings from the Federal Home Loan Bank of New York to fund loan growth.

---

**Table of Contents****Provision for Loan and Lease Losses**

In determining the provision for loan and lease losses, management considers national and local economic conditions; trends in the portfolio including orientation to specific loan types or industries; experience, ability and depth of lending management in relation to the complexity of the portfolio; adequacy and adherence to policies, procedures and practices; levels and trends in delinquencies, impaired loans and net charge-offs; and the results of independent third party loan review.

In the third quarter of 2015, a \$332,000 provision for loan and lease losses was recorded, which was \$862,000, or 72%, lower than the provision for the same period last year. During the third quarter of 2015, the Company charged off loans and leases of \$584,000 and recovered \$1.1 million in previously charged off loans and leases compared to \$1.4 million and \$360,000, respectively, during the same period in 2014. The lower provision resulted primarily from declining trends in net charge-offs during the quarter. For more information regarding the determination of the provision, see Risk Elements below.

**Noninterest Income**

Noninterest income at \$6.7 million in the third quarter of 2015 increased by \$1.9 million compared to \$4.8 million in the third quarter of 2014. Included in noninterest income in the third quarter of 2015 was a \$1.8 million gain on debt redemption and extinguishment and \$173,000 in gain on sales and calls of investment securities. Excluding these two items, noninterest income would have been \$4.7 million, a \$125,000 decrease compared to the third quarter of 2014. Commissions and fees at \$984,000 in the third quarter of 2015 decreased \$387,000 compared to the same period last year, due primarily to a decrease in investment commission income and loan fee income. Gains on sales of loans totaled \$515,000 in the third quarter of 2015 compared to \$143,000 during the same period last year, due to increased origination and sales of residential mortgages. Income on bank owned life insurance increased \$90,000, or 25%, due primarily to death benefits received. Other income totaling \$116,000 in the third quarter of 2015 was \$125,000 less than the same period in 2014, due primarily to a \$110,000 reduction in gain on sales of other real estate owned.

**Noninterest Expense**

Noninterest expense in the third quarter of 2015 totaled \$23.8 million which was \$4.1 million greater than the \$19.7 million reported for the third quarter of 2014. Included in noninterest expense during the third quarter of 2015 was \$2.4 million in long term debt prepayment fees and \$330,000 in merger related expenses. Excluding these two items, total noninterest expense would have been \$21.1 million, a \$1.4 million increase compared to the third quarter of 2014. Salaries and employee benefits expense at \$12.4 million, increased \$1.0 million from the same period last year, primarily due to \$361,000 in costs associated with the addition of the new LPOs, a \$205,000 accrual associated with the termination of the Newton Trust Pension Plan, increased medical benefit costs, and incremental salary and benefit increases. Furniture and equipment increased \$276,000 compared to the third quarter of 2014 due primarily to an increase in service contract costs. Marketing expense at \$396,000 in the third quarter of 2015 decreased \$233,000 compared to the third quarter of 2014 due primarily to the timing of marketing campaigns. Legal expense at \$301,000 increased \$157,000 compared to the same period last year primarily due to an increase in nonperforming loan work out expenses. Other expenses at \$3.1 million increased \$135,000 due primarily to an increase in data processing fees. The Company's efficiency ratio, a non-GAAP financial measure, was 60.8% in the third quarter of 2015, compared to 58.0% for the same period last year. The increase was primarily due to an increase in noninterest expenses. The Company uses this ratio because it believes that the ratio provides a good comparison of period-to-period performance and because the ratio is widely accepted in the banking industry. The following table shows the calculation of the efficiency ratio for the periods presented:

| Efficiency ratio  | 60.8%                                       | 58.0%     |

**Income Tax Expense**

The effective tax rate increased from 33.4% in the third quarter of 2014 to 34.0% in the third quarter of 2015 primarily as a result of a decrease in tax advantaged items as a percent of pretax income. Tax advantaged items include tax-exempt security interest and income on bank owned life insurance policies. Also contributing to the increase in the effective tax rate was the impact of non-deductible merger related expenses.

**(Year to Date 2015 Compared to Year to Date 2014)****Net Income**

Net income was \$24.0 million in the first nine months of 2015 compared to net income of \$23.2 million for the first nine months of 2014. Diluted earnings per share was \$0.63 for the first nine months of 2015, compared to diluted earnings per share of \$0.61 for the same period last year. Net interest income at \$86.5 million for the first nine months of 2015 increased \$1.8 million compared to the first nine months of 2014 due to a \$3.2 million increase in interest income partially offset by a \$1.4 million increase in interest expense. The increase in net interest income reflects an increase in interest earning assets resulting from organic growth.

**Net Interest Income**

Net interest income on a tax equivalent basis for the first nine months of 2015 was \$87.2 million, compared to \$85.5 million for the first nine months of 2014 resulting primarily from growth in average earning assets of \$229.5 million.

The net interest margin decreased from 3.66% in the first nine months of 2014 to 3.48% in the first nine months of 2015 primarily as a result of a 15 basis point decrease in the yield on interest earning assets as well as a five basis point increase in the cost of interest bearing liabilities. Net interest income in the first nine months of 2015 included \$686,000 in net interest received resulting from the change in status of non-performing loans and prepayment fee income compared to

**Table of Contents**

\$202,000 of such income in the same period in 2014. The net interest margin excluding the impact of these items would be 3.45% and 3.65% for the first nine months of 2015 and 2014, respectively. The decrease in the net interest margin was somewhat mitigated by an increase in interest income earned on free funds (interest earning assets funded by non-interest bearing liabilities) resulting from an increase in average non-interest bearing deposits of \$43.1 million. The components of net interest income will be discussed in greater detail below.

The following table reflects the components of the Company's net interest income, setting forth for the periods presented, (1) average assets, liabilities and stockholders' equity, (2) interest income earned on interest-earning assets and interest expense paid on interest-bearing liabilities, (3) average yields earned on interest-earning assets and average rates paid on interest-bearing liabilities, (4) the Company's net interest spread (i.e., the average yield on interest-earning assets less the average cost of interest-bearing liabilities) and (5) the Company's net interest margin. Rates are computed on a tax equivalent basis using a tax rate of 35%.

(A) Includes non-accrual loans, the effect of which is to reduce the yield earned on loans, and deferred loan fees.

(B) Includes interest-bearing cash accounts.

(C) Net interest income divided by interest-earning assets.

Interest income on a tax equivalent basis increased from \$92.0 million in the first nine months of 2014 to \$95.1 million in the first nine months of 2015, an increase of \$3.1 million, or 3%. The increase in interest income was primarily a result of a \$181.8 million increase in average loans and leases partially offset by a 15 basis point decrease in the yield on interest earning assets. The yield on average loans and leases at 4.17% in the first nine months of 2015 was 15 basis points lower than the first nine months of 2014. The yield on average taxable and tax exempt investment securities decreased by ten basis points and 23 basis points, respectively, compared to the first nine months of 2014. The decline in yields on interest earning assets were due to the same reasons discussed in the quarterly comparison.

**Table of Contents**

Total interest expense increased from \$6.6 million in the first nine months of 2014 to \$7.9 million in the first nine months of 2015, an increase of \$1.4 million, or 21%. The cost of average interest-bearing liabilities increased from 0.37% in the first nine months of 2014 to 0.42% in 2015. The increase in the cost of interest-bearing liabilities was due to the same reasons discussed in the quarterly comparison.

**Provision for Loan and Lease Losses**

In the first nine months of 2015, a \$1.9 million provision for loan and lease losses was recorded, which was \$2.3 million lower than the provision for the same period last year. During the first nine months of 2015, the Company charged off loans and leases of \$3.3 million and recovered \$1.7 million in previously charged off loans and leases compared to \$5.6 million and \$1.5 million, respectively, during the same period in 2014. The lower provision primarily resulted from lower net charge-offs during the nine months ended September 30, 2015. For more information regarding the determination of the provision, see [Risk Elements](#) below.

**Noninterest Income**

Noninterest income at \$16.4 million in the first nine months of 2015 increased by \$3.1 million, or 24%, compared to the first nine months of 2014. Included in noninterest income during the first nine months of 2015 was a \$1.8 million gain on redemption and extinguishment of debt and \$190,000 in gain on sales and calls of investment securities. Excluding these two items, noninterest income would have been \$14.4 million, a \$1.1 million increase compared to the first nine months of 2014. Gains on sales of loans at \$1.2 million and income on Bank owned life insurance at \$1.5 million in the first nine months of 2015 increased \$866,000 and \$452,000, respectively, compared to the same period last year due to the same reasons discussed in the quarterly analysis. Service charges on deposit accounts at \$7.4 million decreased \$507,000, or 6%, primarily due to a decline in overdraft fees. Other income totaling \$686,000 in the first nine months of 2015 was \$280,000 higher than the same period in 2014. Within other income, the Company recorded \$397,000 in swap income compared to no swap income in the first nine months of 2014.

**Noninterest Expense**

Noninterest expense totaling \$65.1 million increased \$6.1 million in the first nine months of 2015 compared to the first nine months of 2014. Included in noninterest expense during the first nine months was \$2.4 million in long term debt prepayment fees and \$330,000 in merger related fees. Excluding these two items, total noninterest expense would have been \$62.3 million, a \$3.4 million increase compared to the first nine months of 2014. Salary and employee benefits at \$36.3 million increased by \$2.9 million, or 9%, primarily due to the same reasons discussed in the quarterly analysis. Stationary, supplies and postage increased \$81,000 compared to the first nine months of 2014 primarily due to special mailings and expenses related to the opening of the new loan production offices. Marketing expense at \$1.1 million in the first nine months of 2015 decreased \$439,000 compared to the first nine months of 2014 due to the same reason discussed in the quarterly comparison. In the first nine months of 2015, legal expense at \$742,000 increased \$106,000 due to an increase in non-performing loans, while other real estate owned and other repossessed asset expense at \$46,000 decreased \$119,000 compared to the same period last year as a result of less transfers of loans into other real estate. Other expenses at \$9.2 million increased \$410,000 compared to the first nine months of 2014, due to an increase in loan origination costs and data processing costs partially offset by a decline in professional fees. The Company's efficiency ratio, a non-GAAP financial measure, was 60.7% in the first nine months of 2015, compared to 59.2% for the same period last year. The following table shows the calculation of the efficiency ratio for the periods presented:

**Table of Contents**

| Efficiency ratio  | 60.7%                                      | 59.2%     |

**Income Tax Expense**

The effective tax rate decreased from 33.2% in the first nine months of 2014 to 33.1% in the first nine months of 2015.

**Financial Condition**

The Company's total assets increased \$204.8 million from \$3.54 billion at December 31, 2014, to \$3.74 billion at September 30, 2015. Total loans were \$2.85 billion, an increase of \$198.2 million from \$2.66 billion at December 31, 2014. Total deposits were \$2.92 billion, an increase of \$128.9 million from December 31, 2014.

**Loans and Leases**

Gross loans and leases of \$2.85 billion at September 30, 2015 increased by \$198.2 million from December 31, 2014 primarily in the commercial loan categories. Commercial loans secured by real estate and commercial, industrial and other increased \$146.9 million, or 10%, and \$52.7 million, or 22%, respectively, from December 31, 2014 to September 30, 2015. Real estate construction loans at \$100.2 million increased \$36.2 million, while residential mortgages and home equity and consumer loans decreased \$30.9 million and \$7.1 million, respectively. The decline in residential mortgages results from a decision to sell most of the residential loans that the Company originates. For more information on the loan portfolio, see Note 7 in Notes to the Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

---

**Table of Contents**

**Risk Elements**

Non-performing assets increased from \$21.7 million, or 0.61% of total assets, on December 31, 2014 to \$22.3 million, or 0.60% of total assets, on September 30, 2015. Non-performing assets increased primarily in the commercial secured by real estate and commercial, industrial and other loans categories, which increased by \$752,000 and \$524,000, respectively, partially offset by a \$441,000 decrease in non-performing residential mortgages. Non-accrual loans at September 30, 2015 included two loan relationships with a balance of \$1.0 million or over, totaling \$4.5 million, and four loan relationships between \$500,000 and \$1.0 million, totaling \$2.8 million.

There were \$123,000 in loans and leases past due ninety days or more and still accruing at September 30, 2015 compared to \$66,000 at December 31, 2014. These loans primarily consisted of consumer loans which are generally placed on non-accrual and reviewed for charge-off when principal and interest payments are four months in arrears unless the obligations are well-secured and in the process of collection.

On September 30, 2015, the Company had \$11.9 million in loans that were troubled debt restructurings and still accruing interest income compared to \$10.6 million at December 31, 2014. Troubled debt restructurings are those loans where the Company has granted concessions to the borrower in payment terms, either in rate or in term, as a result of the financial condition of the borrower.

On September 30, 2015, the Company had \$26.9 million in impaired loans (consisting primarily of non-accrual and restructured loans and leases) compared to \$25.7 million at year-end 2014. For more information on impaired loans and leases see Note 7 in Notes to the Consolidated Financial Statements of this Quarterly Report on Form 10-Q. The valuation allowance for impaired loans is based primarily on the fair value of the underlying collateral. Based on such evaluation, \$1.2 million has been allocated as a portion of the allowance for loan and lease losses for impairment at September 30, 2015. At September 30, 2015, the Company also had \$49.1 million in loans and leases that were rated substandard that were not classified as non-performing or impaired compared to \$46.3 million at December 31, 2014.

There were no loans and leases at September 30, 2015, other than those designated non-performing, impaired or substandard, where the Company was aware of any credit conditions of any borrowers or obligors that would indicate a strong possibility of the borrowers not complying with present terms and conditions of repayment and which may result in such loans and leases being included as non-accrual, past due or renegotiated at a future date.

The following table sets forth for the periods presented, the historical relationships among the allowance for loan and lease losses, the provision for loan and lease losses, the amount of loans and leases charged-off and the amount of loan and lease recoveries:

| Ratio of allowance at end of period as a percentage of period end total loans and leases | 1.09%  | 1.15%  | 1.16%                                 |

The ratio of the allowance for loan and lease losses to loans and leases outstanding reflects management's evaluation of the underlying credit risk inherent in the loan portfolio. The determination of the adequacy of the allowance for loan and lease losses and periodic provisioning for estimated losses included in the consolidated financial statements is the responsibility of management and the Board of Directors. The evaluation process is undertaken on a quarterly basis.

Methodology employed for assessing the adequacy of the allowance consists of the following criteria:

The establishment of specific reserve amounts for all specifically identified classified loans and leases that have been designated as requiring attention by Lakeland.

The establishment of reserves for pools of homogeneous types of loans and leases not subject to specific review, including impaired loans under \$500,000, leases, 1 - 4 family residential mortgages, and consumer loans.

The establishment of reserve amounts for the unimpaired loans and leases in each portfolio based upon the historical average loss experience as modified by management's assessment of the loss emergence period for these portfolios and management's evaluation of key environmental factors.

## **Table of Contents**

Consideration is given to the results of ongoing credit quality monitoring processes, the adequacy and expertise of the Company's lending staff, underwriting policies, loss histories, delinquency trends, and the cyclical nature of economic and business conditions. Since many of the Company's loans depend on the sufficiency of collateral as a secondary means of repayment, any adverse trend in the real estate markets could affect underlying values available to protect the Company against loss.

As part of an ongoing evaluation process of developing the Allowance for Loan Losses estimate, management continually evaluates and updates their assumptions based on the current economic environment and their own loss experience. During the third quarter of 2015, the Company refined and enhanced its assessment of the adequacy of the allowance for loan and lease losses by extending the lookback period on its commercial loan portfolios from three years to five years and by extending the lookback period for all other portfolios from two to three years in order to capture more of the economic cycle. It also enhanced its qualitative factor framework to include a factor that captures the risk related to appraised real estate values, and how those values could change in relation to a change in capitalization rates. This enhancement is meant to increase the level of precision in the allowance for loan and lease losses. As a result, the Company will no longer have an unallocated segment in its allowance for loan losses, as the risks and uncertainties meant to be captured by the unallocated allowance have been included in the qualitative framework for the respective portfolios. As such, the unallocated allowance has in essence been reallocated to the certain portfolios based on the risks and uncertainties it was meant to capture.

While the overall balance of the allowance for loan and lease losses at \$31.0 million at September 30, 2015 only increased \$310,000, from December 31, 2014, the distribution of the allowance changed between segments of the loan portfolio reflecting changes in the non-performing loan and charge-off statistics within each portfolio. Also reflected in the changes within categories are the enhancements in the analysis of the allowance for loan and lease losses discussed above. Loan reserves are based on a combination of historical charge-off experience, estimating the appropriate loss emergence and pre-emergence periods and assigning qualitative factors based on general economic conditions and specific bank portfolio characteristics.

Non-performing loans and leases increased from \$20.7 million on December 31, 2014 to \$21.5 million on September 30, 2015. The allowance for loan and lease losses as a percent of total loans was 1.09% of total loans on September 30, 2015 compared to 1.16% as of December 31, 2014. The reduction in the percentage of the allowance for loan and lease losses as a percent of total loans and leases results from a declining trend in charge-offs. The ratio of annualized net charge-offs to average loans outstanding has declined from 0.21% for the first nine months of 2014 to 0.08% for the same period in 2015. Management believes, based on appraisals and estimated selling costs, that the majority of its non-performing loans and leases are adequately secured and reserves on its non-performing loans and leases are adequate. Based upon the process employed and giving recognition to all accompanying factors related to the loan and lease portfolio, management considers the allowance for loan and lease losses to be adequate at September 30, 2015.

## **Investment Securities**

For detailed information on the composition and maturity distribution of the Company's investment securities portfolio, see Note 6 in Notes to Consolidated Financial Statements contained in this Quarterly Report on Form 10-Q. Total investment securities decreased from \$565.4 million on December 31, 2014 to \$546.4 million on September 30, 2015, a decrease of \$19.0 million, or 3%.

## **Deposits**

Total deposits increased from \$2.79 billion on December 31, 2014 to \$2.92 billion on September 30, 2015, an increase of \$128.9 million, or 5%. Noninterest bearing and savings and interest bearing deposits increased \$48.2 million and \$43.1 million, respectively. Additionally, time deposits increased \$37.6 million, or 13%, resulting primarily from an increase in public CDs.

### **Liquidity**

Liquidity measures whether an entity has sufficient cash flow to meet its financial obligations and commitments on a timely basis. The Company is liquid when its subsidiary bank has the cash available to meet the borrowing and cash withdrawal requirements of customers and the Company can pay for current and planned expenditures and satisfy its debt obligations.

**Table of Contents**

Lakeland funds loan demand and operation expenses from several sources:

Net income. Cash provided by operating activities was \$31.2 million for the first nine months of 2015 compared to \$34.2 million for the same period in 2014.

Deposits. Lakeland can offer new products or change its rate structure in order to increase deposits. In the first nine months of 2015, Lakeland's deposits increased \$128.9 million.

Sales of securities. At September 30, 2015 the Company had \$424.9 million in securities designated available for sale. Of these securities, \$282.9 million were pledged to secure public deposits and for other purposes required by applicable laws and regulations.

Repayments on loans and leases can also be a source of liquidity to fund further loan growth.

Overnight credit lines. As a member of the Federal Home Loan Bank of New York (FHLB), Lakeland has the ability to borrow overnight based on the market value of collateral pledged. Lakeland had no overnight borrowings from the FHLB on September 30, 2015. Lakeland also has overnight federal funds lines available for it to borrow up to \$162.0 million. Lakeland had borrowings against these lines of \$97.0 million at September 30, 2015. Lakeland may also borrow from the discount window of the Federal Reserve Bank of New York based on the market value of collateral pledged. Lakeland had no borrowings with the Federal Reserve Bank of New York as of September 30, 2015.

Other borrowings. Lakeland can also generate funds by utilizing long-term debt or securities sold under agreements to repurchase that would be collateralized by security or mortgage collateral. At times the market values of securities collateralizing our securities sold under agreements to repurchase may decline due to changes in interest rates and may necessitate our lenders to issue a margin call which requires Lakeland to pledge additional collateral to meet that margin call.

Management and the Board monitor the Company's liquidity through the asset/liability committee, which monitors the Company's compliance with certain regulatory ratios and other various liquidity guidelines.

The cash flow statements for the periods presented provide an indication of the Company's sources and uses of cash, as well as an indication of the ability of the Company to maintain an adequate level of liquidity. A discussion of the cash flow statement for the nine months ended September 30, 2015 follows.

Cash and cash equivalents totaling \$123.1 million on September 30, 2015 increased \$13.8 million from December 31, 2014. Operating activities provided \$31.2 million in net cash. Investing activities used \$190.7 million in net cash, primarily reflecting an increase in loans and leases. Financing activities provided \$173.3 million in net cash primarily reflecting the increase in deposits and other borrowings of \$128.9 million and \$39.5 million, respectively. The Company anticipates that it will have sufficient funds available to meet its current loan commitments and deposit maturities. This constitutes a forward-looking statement under the Private Securities Litigation Reform Act of 1995.

The following table sets forth contractual obligations and other commitments representing required and potential cash outflows as of September 30, 2015. Interest on subordinated debentures and long-term borrowed funds is calculated based on current contractual interest rates.

\* Includes interest on other borrowings and subordinated debentures at a weighted rate of 1.77%.

**Capital Resources**

Total stockholders' equity increased from \$379.4 million on December 31, 2014 to \$397.7 million on September 30, 2015, an increase of \$18.2 million, or 5%. Book value per common share increased to \$10.49 on September 30, 2015 from \$10.01 on December 31, 2014. The increase in stockholders' equity from December 31, 2014 to September 30, 2015 was primarily due to \$24.0 million in net income, partially offset by the payment of cash dividends on common stock of \$9.3 million.

The Company and Lakeland are subject to various regulatory capital requirements that are monitored by federal banking agencies. Failure to meet minimum capital requirements can lead to certain supervisory actions by regulators; any supervisory action could have a direct material adverse effect on the Company or Lakeland's financial statements. Management believes, as of September 30, 2015, that the Company and Lakeland meet all capital adequacy requirements to which they are subject.

The final rules implementing the Basel Committee on Banking Supervision's (BCBS) capital guidelines for U.S. banks became effective for the Company on January 1, 2015, with full compliance with all of the final rules' requirements phased in over a multi-year schedule, to be fully phased-in by January 1, 2019. As of September 30, 2015, the Company's capital levels remained characterized as well-capitalized under the new rules. For further discussion, see Basel III below.

The capital ratios for the Company and Lakeland at September 30, 2015 are as follows:

| Tier 1 Capital<br>to Total Average<br>Assets Ratio<br>September 30, | Common Equity<br>Tier 1 to<br>Risk-Weighted<br>Assets | Tier 1<br>Capital<br>to Risk-Weighted<br>Assets | Total<br>Capital<br>to Risk-Weighted<br>Assets |

**Table of Contents***Basel III*

On July 2, 2013, the FRB approved the final rules implementing the Basel Committee on Banking Supervision's (BCBS) capital guidelines for U.S. banks. Under the final rules, minimum requirements will increase for both the quantity and quality of capital held by the Company. The rules include a new common equity Tier 1 capital to risk-weighted assets ratio of 4.5% and a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets. The final rules also raise the minimum ratio of Tier 1 capital to risk-weighted assets from 4.0% to 6.0% and require a minimum leverage ratio of 4.0%. The final rules also implement strict eligibility criteria for regulatory capital instruments. On July 9, 2013, the FDIC also approved, as an interim final rule, the regulatory capital requirements for U.S. banks, following the actions of the FRB. The FDIC's rule is identical in substance to the final rules issued by the FRB. The phase-in period for the final rules began for the Company on January 1, 2015, with full compliance with all of the final rules requirements to be phased in over a multi-year schedule through January 1, 2019. As of September 30, 2015, the Company and Lakeland met all of the requirements under the new rules on a fully phased-in basis, if such requirements were in effect.

**Non-GAAP Financial Measures**

Reported amounts are presented in accordance with U.S. GAAP. The Company's management believes that the supplemental non-GAAP information, which consists of measurements and ratios based on tangible equity and tangible assets, is utilized by regulators and market analysts to evaluate a company's financial condition and therefore, such information is useful to investors. These disclosures should not be viewed as a substitute for financial results determined in accordance with U.S. GAAP, nor are they necessarily comparable to non-GAAP performance measures which may be presented by other companies.

**ITEM 3. Quantitative and Qualitative Disclosures about Market Risk**

The Company manages interest rate risk and market risk by identifying and quantifying interest rate risk exposures using simulation analysis and economic value at risk models. Net interest income simulation considers the relative sensitivities of the balance sheet including the effects of interest rate caps on adjustable rate mortgages and the relatively stable aspects of core deposits. As such, net interest income simulation is designed to address the probability of interest rate changes and the behavioral response of the balance sheet to those changes. Market Value of Portfolio Equity represents the fair value of the net present value of assets, liabilities and off-balance-sheet items. Changes in estimates and assumptions made for interest rate sensitivity modeling could have a significant impact on projected results and conclusions. These assumptions could include prepayment rates, sensitivity of non-maturity deposits and other similar assumptions. Therefore, if our assumptions should change, this technique may not accurately reflect the impact of general interest rate movements on the Company's net interest income or net portfolio value.

The starting point (or base case) for the following table is an estimate of the following year's net interest income assuming that both interest rates and the Company's interest-sensitive assets and liabilities remain at period-end levels. The net interest income estimated for the next twelve months (the base case) is \$116.0 million. The information provided for net interest income assumes that changes in interest rates of plus 200 basis points and minus 200 basis points change gradually in equal increments (rate ramp) over the twelve month period.

| Rate Ramp                    | Changes in interest rates |         |
|------------------------------|---------------------------|---------|
|                              | +200 bp                   | -200 bp |
| Asset/Liability Policy Limit | -5.0%                     | -5.0%   |
| September 30, 2015           | -3.6%                     | -1.9%   |
| December 31, 2014            | -3.6%                     | -1.9%   |

The Company's review of interest rate risk also includes policy limits for net interest income changes in various rate shock scenarios. Rate shocks assume that current interest rates change immediately. The information provided for net interest income assumes fluctuations or rate shocks for changes in interest rates as shown in the table below.

**Table of Contents**

| Rate Shock                   | Changes in interest rates |         |         |         |
|------------------------------|---------------------------|---------|---------|---------|
|                              | +300 bp                   | +200 bp | +100 bp | -100 bp |
| Asset/Liability Policy Limit | -15.0%                    | -10.0%  | -5.0%   | -5.0%   |
| September 30, 2015           | -5.1%                     | -3.1%   | -1.3%   | -4.7%   |
| December 31, 2014            | -5.2%                     | -3.2%   | -1.3%   | -4.5%   |

The base case for the following table is an estimate of the Company's net portfolio value for the periods presented using current discount rates, and assuming the Company's interest-sensitive assets and liabilities remain at period-end levels. The net portfolio value at September 30, 2015 (the base case) was \$502.7 million. The information provided for the net portfolio value assumes fluctuations or rate shocks for changes in interest rates as shown in the table below. Rate shocks assume that current interest rates change immediately.

| Rate Shock                   | Changes in interest rates |         |         |         |
|------------------------------|---------------------------|---------|---------|---------|
|                              | +300 bp                   | +200 bp | +100 bp | -100 bp |
| Asset/Liability Policy Limit | -25.0%                    | -20.0%  | -10.0%  | -10.0%  |
| September 30, 2015           | -12.9%                    | -8.3%   | -3.8%   | 0.2%    |
| December 31, 2014            | -13.0%                    | -8.2%   | -3.5%   | 0.7%    |

The information set forth in the above tables is based on significant estimates and assumptions, and constitutes a forward-looking statement under the Private Securities Litigation Reform Act of 1995. For more information regarding the Company's market risk and assumptions used in the Company's simulation models, please refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

Certain shortcomings are inherent in the methodologies used in the above interest rate risk measurements. Modeling changes in net interest income requires the making of certain assumptions regarding prepayment and deposit decay rates, which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. While management believes such assumptions are reasonable, there can be no assurance that assumed prepayment rates and decay rates will approximate actual future loan prepayment and deposit withdrawal activity. Moreover, the net interest income table presented assumes that the composition of interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the net interest income table provides an indication of the Company's interest rate risk exposure at a particular point in time, such measurement is not intended to and does not provide a precise forecast of the effect of changes in market interest rates on net interest income and will differ from actual results.

**ITEM 4. Controls and Procedures**

(a) Disclosure controls and procedures. As of the end of the Company's most recently completed fiscal quarter covered by this report, the Company carried out an evaluation, with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures pursuant to Securities Exchange Act Rule 13a-15. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in ensuring that information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and are operating in an effective manner and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial

Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in internal controls over financial reporting. There have been no changes in the Company's internal control over financial reporting that occurred during the quarter ended September 30, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

**Table of Contents****PART II OTHER INFORMATION****Item 1. Legal Proceedings**

In August, 2015, the Company was served with a Civil Action Summons and Class Action Complaint that was filed in the Superior Court of New Jersey, Chancery Division, Bergen County. A second action, nearly identical to that described in the preceding sentence, was served on the Company in September, 2015 and consolidated with the first action. The complaints state that the plaintiffs are bringing the class action claims on behalf of the public stockholders of Pascack Bancorp against the Board of Directors of Pascack for their alleged breach of fiduciary duties arising out of the Agreement and Plan of Merger, dated as of August 3, 2015, by and between the Company and Pascack Bancorp. The complaint alleges that the Company has aided and abetted the individual defendants in their alleged breaches of fiduciary duties. The Company intends to vigorously defend against these claims. On November 3, 2015, the plaintiffs filed a consolidated amended class action complaint, which reiterates and expands their prior claims based upon the information contained in Lakeland's Form S-4 Registration Statement.

Other than as described above, there are no pending legal proceedings involving the Company or Lakeland other than those arising in the normal course of business. Management does not anticipate that the potential liability, if any, arising out of such legal proceedings will have a material effect on the financial condition or results of operations of the Company and Lakeland on a consolidated basis.

**Item 1A. Risk Factors**

There have been no material changes in risk factors from those disclosed under Item 1A, Risk Factors in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.
