CROSS TIMBERS ROYALTY TRUST

GLOSSARY OF TERMS

The following are definitions of significant terms used in this Form 10-Q:

<i>Bbl</i>	Barrel (of oil)
<i>Mcf</i>	Thousand cubic feet (of natural gas)
<i>MMBtu</i>	One million British Thermal Units, a common energy measurement
<i>net proceeds</i>	Gross proceeds received by XTO Energy from sale of production from the underlying properties, less applicable costs, as defined in the net profits interest conveyances.
<i>net profits income</i>	Net proceeds multiplied by the applicable net profits percentage of 75% or 90%, which is paid to the trust by XTO Energy. Net profits income is referred to as royalty income for income tax purposes.
<i>net profits interest</i>	An interest in an oil and gas property measured by net profits from the sale of production, rather than a specific portion of production. The following defined net profits interests were conveyed to the trust from the underlying properties: <i>90% net profits interests</i> - interests that entitle the trust to receive 90% of the net proceeds from the underlying properties that are royalty or overriding royalty interests in Texas, Oklahoma and New Mexico. <i>75% net profits interests</i> - interests that entitle the trust to receive 75% of the net proceeds from the underlying properties that are working interests in Texas and Oklahoma.
<i>royalty interest (and overriding royalty interest)</i>	A nonoperating interest in an oil and gas property that provides the owner a specified share of production without any production expense or development costs.
<i>underlying properties</i>	XTO Energy's interest in certain oil and gas properties from which the net profits interests were conveyed. The underlying properties include royalty and overriding royalty interests in producing and nonproducing properties in Texas, Oklahoma and New Mexico, and working interests in producing properties located in Texas and Oklahoma.
<i>working interest</i>	An operating interest in an oil and gas property that provides the owner a specified share of production that is subject to all production expense and development costs.

CROSS TIMBERS ROYALTY TRUST

PART I - FINANCIAL INFORMATION

Item 1. Financial Statements.

The condensed financial statements included herein are presented, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in annual financial statements have been condensed or omitted pursuant to such rules and regulations, although the trustee believes that the disclosures are adequate to make the information presented not misleading. These condensed financial statements should be read in conjunction with the financial statements and the notes thereto included in the Trust's latest Annual Report on Form 10-K. In the opinion of the trustee, all adjustments, consisting only of normal recurring adjustments, necessary to present fairly the assets, liabilities and trust corpus of the Cross Timbers Royalty Trust at September 30, 2015, and the distributable income and changes in trust corpus for the three- and nine-month periods ended September 30, 2015 and 2014, have been included. Distributable income for such interim periods is not necessarily indicative of distributable income for the full year. The condensed financial statements as of September 30, 2015, and for the three-month and nine-month periods ended September 30, 2015 and 2014 have been subjected to a review by PricewaterhouseCoopers LLP, the Trust's independent registered public accounting firm, whose report is included herein.

Table of Contents

Report of Independent Registered Public Accounting Firm

To the Unitholders of Cross Timbers Royalty Trust and

Southwest Bank, Trustee:

We have reviewed the accompanying condensed statement of assets, liabilities and trust corpus of Cross Timbers Royalty Trust (the Trust) as of September 30, 2015, and the related condensed statements of distributable income and changes in trust corpus for the three-month and nine-month periods ended September 30, 2015 and 2014. These interim financial statements are the responsibility of the Trustee.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

As described in Note 1, these financial statements were prepared on the modified cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

Based on our review, we are not aware of any material modifications that should be made to the accompanying condensed interim financial statements for them to be in conformity with the basis of accounting described in Note 1.

We previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the statement of assets, liabilities and trust corpus as of December 31, 2014, and the related statements of distributable income and changes in trust corpus for the year then ended (not presented herein), and in our report dated March 6, 2015, we expressed an unqualified opinion on those financial statements. In our opinion, the information set forth in the accompanying condensed statement of assets, liabilities and trust corpus as of December 31, 2014 is fairly stated in all material respects in relation to the statement of assets, liabilities and trust corpus from which it has been derived.

Table of Contents

CROSS TIMBERS ROYALTY TRUST

Notes to Condensed Financial Statements (Unaudited)

1. Basis of Accounting

The financial statements of Cross Timbers Royalty Trust are prepared on the following basis and are not intended to present financial position and results of operations in conformity with U.S. generally accepted accounting principles (GAAP):

Net profits income recorded for a month is the amount computed and paid by XTO Energy Inc., the owner of the underlying properties, to Southwest Bank, as the trustee for the Trust. XTO Energy is a wholly owned subsidiary of Exxon Mobil Corporation. Net profits income consists of net proceeds received by XTO Energy from the underlying properties in the prior month, multiplied by net profit percentages of 90% for the 90% net profits interests, and 75% for the 75% net profits interests.

Costs deducted in the calculation of net proceeds for the 90% net profits interests generally include applicable taxes, transportation, marketing and legal costs, and do not include production expense or development costs. For the 75% net profits interests, costs deducted in the calculation of net proceeds include production expense, development costs, applicable taxes, transportation, marketing and legal costs, operating charges and other costs.

Net profits income is computed separately for each of five conveyances under which the net profits interests were conveyed to the Trust. If monthly costs exceed revenues for any conveyance, such excess costs must be recovered, with accrued interest, from future net proceeds of that conveyance and cannot reduce net proceeds from the other conveyances.

Interest income, interest to be received and distribution payable to unitholders include interest to be earned on net profits income from the monthly record date (last business day of the month) through the date of the next distribution to unitholders.

Trust expenses are recorded based on liabilities paid and cash reserves established by the trustee for liabilities and contingencies.

Distributions to unitholders are recorded when declared by the trustee.

The trustee routinely reviews the Trust's net profits interests in oil and gas properties for impairment whenever events or circumstances indicate that the carrying amount of an asset may not be recoverable. If an impairment event occurs and it is determined that the carrying value of the Trust's net profits interests may

not be recoverable, an impairment will be recognized as measured by the amount by which the carrying amount of the net profits interests exceeds the fair value of these assets, which would likely be measured by discounting projected cash flows. In general, the trustee does not view temporarily low prices or margins as a trigger event for conducting the impairment tests. The markets for crude oil and natural gas have a history of significant price volatility. Although prices will occasionally drop significantly, industry prices over the long term will continue to be driven by market supply and demand. There is no impairment of the assets as of September 30, 2015.

Table of Contents

The financial statements of the Trust differ from those prepared in conformity with U.S. GAAP because revenues are recognized when received rather than accrued in the month of production, expenses are recognized when paid rather than when incurred, and certain cash reserves may be established by the trustee for contingencies which would not be recorded under U.S. GAAP. This comprehensive basis of accounting other than U.S. GAAP corresponds to the accounting permitted for royalty trusts by the U.S. Securities and Exchange Commission, as specified by Staff Accounting Bulletin Topic 12:E, Financial Statements of Royalty Trusts.

Most accounting pronouncements apply to entities whose financial statements are prepared in accordance with U.S. GAAP, directing such entities to accrue or defer revenues and expenses in a period other than when such revenues were received or expenses were paid. Because the Trust's financial statements are prepared on the modified cash basis, as described above, most accounting pronouncements are not applicable to the Trust's financial statements.

The initial carrying value of the net profits interests of \$61,100,449 represents XTO Energy's historical net book value for the interests on February 12, 1991, the creation date of the Trust. Amortization of the net profits interests is calculated on a unit-of-production basis and is charged directly to trust corpus. Accumulated amortization was \$50,424,161 as of September 30, 2015 and \$50,106,151 as of December 31, 2014.

2. Income Taxes

For federal income tax purposes, the Trust constitutes a fixed investment trust that is taxed as a grantor trust. A grantor trust is not subject to tax at the trust level. Accordingly, no provision for income taxes has been made in the financial statements. The unitholders are considered to own the Trust's income and principal as though no trust were in existence. The income of the Trust is deemed to have been received or accrued by each unitholder at the time such income is received or accrued by the Trust and not when distributed by the Trust.

All revenues from the Trust are from sources within Texas, Oklahoma or New Mexico. Because it distributes all of its net income to unitholders, the Trust has not been taxed at the Trust level in New Mexico or Oklahoma. While the Trust has not owed tax, the trustee is required to file a return with Oklahoma reflecting the income and deductions of the Trust attributable to properties located in that state, along with a schedule that includes information regarding distributions to unitholders. Texas does not impose a state income tax, so no part of the Trust's income will be subject to income tax at the trust level in Texas.

Each unitholder should consult his or her own tax advisor regarding income tax requirements, if any, applicable to such person's ownership of trust units.

Unitholders should consult the Trust's latest annual report on Form 10-K for a complete discussion of federal and state tax matters.

3. Contingencies

Several states have enacted legislation requiring state income tax withholding from nonresident recipients of oil and gas proceeds. After consultation with its tax counsel, the trustee believes that it is not required to withhold on payments made to the unitholders. However, regulations are subject to change by the various

Table of Contents

states, which could change this conclusion. Should amounts be withheld on payments made to the Trust or the unitholders, distributions to the unitholders would be reduced by the required amount, subject to the filing of a claim for refund by the Trust or unitholders for such amount.

4. Excess Costs

	Conveyances (Underlying)		Total
	TX WI	OK WI	
Cumulative excess costs remaining at 12/31/14	\$ (53,971)	\$	\$ (53,971)
Net excess costs for the quarter ended 3/31/15	(410,337)	(43,414)	(453,751)
Net excess costs for the quarter ended 6/30/15	(310,588)	(807,158)	(1,117,746)
Net excess costs for the quarter ended 9/30/15	(88,604)	(9,635)	(98,239)
Cumulative excess costs remaining at 9/30/15	\$ (863,500)	\$ (860,207)	\$ (1,723,707)

XTO Energy advised the trustee that lower oil prices and increased costs caused costs to exceed revenues by a total of \$108,730 (\$81,548 net to the Trust) on properties underlying the Texas working interest for the quarter ended September 30, 2015. XTO Energy advised the trustee that decreased costs in August 2015 led to the partial recovery of excess costs, plus accrued interest, of \$20,126 (\$15,095 net to the Trust) for the quarter ended September 30, 2015. XTO Energy advised the trustee that lower oil prices caused costs to exceed revenues by a total of \$310,588 (\$232,941 net to the Trust) on properties underlying the Texas working interest for the quarter ended June 30, 2015. XTO Energy advised the trustee that lower oil prices and increased costs caused costs to exceed revenues by a total of \$410,337 (\$307,753 net to the Trust) on properties underlying the Texas working interest for the quarter ended March 31, 2015. However, these excess costs did not reduce net proceeds from the remaining conveyances.

XTO Energy advised the trustee that a missing payment from a purchaser, lower oil prices and decreased oil production caused costs to exceed revenues by a total of \$155,439 (\$116,579 net to the Trust) on properties underlying the Oklahoma working interest for the quarter ended September 30, 2015. XTO Energy advised the trustee that increased oil production and decreased costs in August 2015 led to the partial recovery of excess costs, plus accrued interest, of \$145,804 (\$109,353 net to the Trust) for the quarter ended September 30, 2015. XTO Energy advised the trustee that lower oil prices, decreased oil production and increased costs caused costs to exceed revenues by a total of \$807,158 (\$605,369 net to the Trust) on properties underlying the Oklahoma working interest for the quarter ended June 30, 2015. Lower oil prices caused costs to exceed revenues by a total of \$43,414 (\$32,560 net to the Trust) on properties underlying the Oklahoma working interest for the quarter ended March 31, 2015. However, these excess costs did not reduce net proceeds from the remaining conveyances.

XTO Energy advised the trustee that a missing payment from a purchaser caused costs to exceed revenues by a total of \$166 (\$125 net to the Trust) on properties underlying the Oklahoma working interest for the quarter ended June 30, 2014. However, these excess costs did not reduce net proceeds from the remaining conveyances. XTO Energy advised the trustee that increased oil production led to the full recovery of excess costs, plus accrued interest, of \$166 (\$125 net to the Trust) for the quarter ended September 30, 2014.

XTO Energy advised the trustee that lower oil prices caused costs to exceed revenues by a total of \$42,061 (\$31,546 net to the Trust) on properties underlying the Texas working interest for the quarter ended March 31, 2014. However, these excess costs did not reduce net proceeds from the remaining conveyances. XTO Energy advised the trustee that higher oil prices and decreased costs led to the full recovery of excess costs, plus accrued interest, of \$42,177 (\$31,633 net to the Trust) for the quarter ended March 31, 2014.

Table of Contents

Cumulative excess costs remaining for the Texas and Oklahoma working interest conveyances as of September 30, 2015 totaled \$1,723,707 (\$1,292,780 net to the Trust).

5. Other Proceeds

The calculation of net profits income for the quarter ended March 31, 2014 included \$519,071 (\$467,164 net to the Trust), which includes interest of \$210,242 (\$189,218 net to the Trust), related to a one-time purchaser refund for deductions attributable to coal seam gas wells located in the San Juan Basin for the period December 1997 through May 2006.

Item 2. Trustee's Discussion and Analysis.

The following discussion should be read in conjunction with the trustee's discussion and analysis contained in the Trust's 2014 Annual Report on Form 10-K, as well as the condensed financial statements and notes thereto included in this Quarterly Report on Form 10-Q. The Trust's Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports are available on the Trust's web site at www.crt-crosstimbers.com.

Distributable Income*Quarter*

For the quarter ended September 30, 2015, net profits income was \$1,894,473 compared to \$4,672,606 for third quarter 2014. This 59% decrease in net profits income is primarily the result of lower oil and gas prices (\$3.0 million) and decreased gas production (\$0.2 million), partially offset by decreased taxes, transportation and other costs (\$0.3 million) and decreased development costs (\$0.1 million). See **Net Profits Income** on the following page.

After considering interest income of \$8 and administration expense of \$133,817, distributable income for the quarter ended September 30, 2015 was \$1,760,664, or \$0.293444 per unit of beneficial interest. Administrative expense for the quarter decreased \$1,450 from the prior year quarter. For third quarter 2014, distributable income was \$4,537,620, or \$0.756270 per unit. Distributions to unitholders for the quarter ended September 30, 2015 were:

Record Date	Payment Date	Distribution per Unit
July 31, 2015	August 14, 2015	\$ 0.099748
August 31, 2015	September 15, 2015	0.099341
September 30, 2015	October 15, 2015	0.094355
		\$ 0.293444

Nine Months

For the nine months ended September 30, 2015, net profits income was \$6,570,157 compared to \$12,918,239 for the same 2014 period. This 49% decrease in net profits income is primarily the result of lower oil and gas prices (\$8.0

million), decreased gas production (\$0.6 million) and increased production expense (\$0.4 million),

Table of Contents

partially offset by excess costs on the Texas and Oklahoma working interest properties in 2015 (\$1.3 million), decreased taxes, transportation and other costs (\$1.0 million) and increased oil production (\$0.6 million). See **Net Profits Income** below.

After considering interest income of \$31 and administration expense of \$506,906, distributable income for the nine months ended September 30, 2015 was \$6,063,282, or \$1.010547 per unit of beneficial interest. Administrative expense for the nine months ended September 30, 2015 increased \$96,098 from the prior year nine-month period. Administration expense for the nine months ended September 30, 2015 included \$125,000 which the trustee reserved for administrative expenses. For the nine months ended September 30, 2014, distributable income was \$12,507,834, or \$2.084639 per unit.

Net Profits Income

Net profits income is recorded when received by the Trust, which is the month following receipt by XTO Energy and generally two months after oil production and three months after gas production. Net profits income is generally affected by three major factors:

oil and gas sales volumes,

oil and gas sales prices, and

costs deducted in the calculation of net profits income.

Because properties underlying the 90% net profits interests are royalty and overriding royalty interests, the calculation of net profits income from these interests only includes deductions for production and property taxes, legal costs, and marketing and transportation charges. In addition to these costs, the calculation of net profits income from the 75% net profits interests includes deductions for production expense and development costs since the related underlying properties are working interests.

Table of Contents

The following is a summary of the calculation of net profits income received by the trust:

	Three Months			Nine Months		
	Ended September 30 (a) 2015	2014	Increase (Decrease)	Ended September 30 (a) 2015	2014	Increase (Decrease)

Interest income (e)					210,242	(100%)
Net Proceeds	\$ 2,104,970	\$ 5,433,378	(61%)	\$ 7,347,688	\$ 14,873,187	(51%)
Net Profits Income	\$ 1,894,473	\$ 4,672,606	(59%)	\$ 6,570,157	\$ 12,918,239	(49%)

(a) Because of the interval between time of production and receipt of royalty income by the Trust, (1) oil and gas sales for the quarter ended September 30 generally represent oil production for the period May through July and

gas production for the period April through June and (2) oil and gas sales for the nine-months ended September 30 generally represent oil production for the period November through July and gas production for the period October through June.

- (b) Oil and gas sales volumes are allocated to the net profits interests based upon a formula that considers oil and gas prices and the total amount of production expense and development costs. As product prices change, the Trust's share of the production volumes is impacted as the quantity of production to cover expenses in reaching the net profits break-even level changes inversely with price. As such, the underlying property production volume changes may not correlate with the Trust's net profit share of those volumes in any given period. Therefore, comparative discussion of oil and gas sales volumes is based on the underlying properties.
- (c) Production expense is primarily from seven working interest properties in the 75% net profits interest. Six of these properties are not operated by XTO Energy or ExxonMobil. Production expense includes an overhead charge which is deducted and retained by the operator. As of September 30, 2015, this charge was \$38,430 per month (including monthly overhead charge of \$5,490 which XTO Energy deducts as operator of the Hewitt Unit) and is subject to adjustment each May based on an oil and gas industry index.
- (d) See Note 4 to Condensed Financial Statements.
- (e) See Note 5 to Condensed Financial Statements.

Table of Contents

The following are explanations of significant variances on the underlying properties from third quarter 2014 to third quarter 2015 and from the first nine months of 2014 to the comparable period in 2015:

Sales Volumes

Oil

Oil sales volumes increased 1% for third quarter and 7% for the first nine months of 2015 as compared with the same 2014 periods primarily because of increased production from new wells and workovers and the timing of cash receipts, partially offset by natural production decline.

Gas

Gas sales volumes decreased 14% for third quarter 2015 as compared with the same 2014 period primarily because of the timing of cash receipts and natural production decline. Gas sales volumes decreased 12% for the first nine months of 2015 as compared with the same 2014 period primarily because of the timing of cash receipts and natural production decline, partially offset by increased production from new wells and workovers.

The estimated rate of natural production decline on the underlying oil and gas properties is approximately 6% to 8% a year.

Sales Prices

Oil

The average oil price decreased 43% to \$54.07 per Bbl for the third quarter and decreased 40% to \$55.49 per Bbl for the nine-month period. Oil prices are expected to remain volatile. The third quarter 2015 oil price is primarily related to production from May through July 2015, when the average NYMEX price was \$56.89 per Bbl. The average NYMEX price for August and September 2015 was \$43.99 per Bbl. At October 21, 2015, the average NYMEX futures price for the following twelve months was \$48.31 per Bbl.

Gas

Gas prices for the third quarter decreased 42% to \$3.82 per Mcf and for the nine-month period decreased 38% to \$4.48 per Mcf. Natural gas prices are affected by natural gas liquids prices, the level of North American production, weather, crude oil prices, the U.S. economy, storage levels and import levels of liquefied natural gas. Natural gas prices are expected to remain volatile. The third quarter 2015 gas price is primarily related to production from April through June 2015, when the average NYMEX price was \$2.64 per MMBtu. The average NYMEX price for July through September 2015 was \$2.77 per MMBtu. At October 21, 2015, the average NYMEX futures price for the following twelve months was \$2.68 per MMBtu.

Table of Contents

Costs

Taxes, Transportation and Other

Taxes, transportation and other costs decreased 37% for the third quarter primarily because of decreased oil and gas production taxes and other deductions related to lower oil and gas revenues. Taxes, transportation and other costs decreased 35% for the nine-month period primarily because of decreased oil and gas production taxes and other deductions related to lower oil and gas revenues, partially offset by a one-time purchaser refund for coal seam gas deductions included in 2014 and increased property taxes related to increased valuations.

Production Expense

Production expense increased 3% for the third quarter primarily because of increased repairs and maintenance costs. Production expense increased 12% for the nine-month period primarily because of increased outside operated and repairs and maintenance costs, partially offset by decreased non-operated overhead costs.

Development Costs

Development costs decreased 20% for the third quarter and 6% for the nine-month period primarily because of the timing of expenditures and decreased activity and costs related to non-operated Texas and Oklahoma oil properties underlying the 75% net profits interest.

Excess Costs

XTO Energy advised the trustee that lower oil prices and increased costs caused costs to exceed revenues by a total of \$108,730 (\$81,548 net to the Trust) on properties underlying the Texas working interest for the quarter ended September 30, 2015. XTO Energy advised the trustee that decreased costs in August 2015 led to the partial recovery of excess costs, plus accrued interest, of \$20,126 (\$15,095 net to the Trust) for the quarter ended September 30, 2015. XTO Energy advised the trustee that lower oil prices caused costs to exceed revenues by a total of \$310,588 (\$232,941 net to the Trust) on properties underlying the Texas working interest for the quarter ended June 30, 2015. XTO Energy advised the trustee that lower oil prices and increased costs caused costs to exceed revenues by a total of \$410,337 (\$307,753 net to the Trust) on properties underlying the Texas working interest for the quarter ended March 31, 2015. However, these excess costs did not reduce net proceeds from the remaining conveyances.

XTO Energy advised the trustee that a missing payment from a purchaser, lower oil prices and decreased oil production caused costs to exceed revenues by a total of \$155,439 (\$116,579 net to the Trust) on properties underlying the Oklahoma working interest for the quarter ended September 30, 2015. XTO Energy advised the trustee that increased oil production and decreased costs in August 2015 led to the partial recovery of excess costs, plus accrued interest, of \$145,804 (\$109,353 net to the Trust) for the quarter ended September 30, 2015. XTO Energy advised the trustee that lower oil prices, decreased oil production and increased costs caused costs to exceed revenues by a total of \$807,158 (\$605,369 net to the Trust) on properties underlying the Oklahoma working interest for the quarter ended June 30, 2015. Lower oil prices caused costs to exceed revenues by a total of \$43,414 (\$32,560 net to the Trust) on properties underlying the Oklahoma working interest for the quarter ended March 31, 2015. However, these excess costs did not reduce net proceeds from the remaining conveyances.

XTO Energy advised the trustee that a missing payment from a purchaser caused costs to exceed revenues by a total of \$166 (\$125 net to the Trust) on properties underlying the Oklahoma working interest for the quarter ended June 30, 2014. However, these excess costs did not reduce net proceeds from the remaining conveyances. XTO Energy advised

the trustee that increased oil production led to the full recovery of excess costs, plus accrued interest, of \$166 (\$125 net to the Trust) for the quarter ended September 30, 2014.

Table of Contents

XTO Energy advised the trustee that lower oil prices caused costs to exceed revenues by a total of \$42,061 (\$31,546 net to the Trust) on properties underlying the Texas working interest for the quarter ended March 31, 2014. However, these excess costs did not reduce net proceeds from the remaining conveyances. XTO Energy advised the trustee that higher oil prices and decreased costs led to the full recovery of excess costs, plus accrued interest, of \$42,177 (\$31,633 net to the Trust) for the quarter ended March 31, 2014.

Cumulative excess costs remaining for the Texas and Oklahoma working interest conveyances as of September 30, 2015 totaled \$1,723,707 (\$1,292,780 net to the Trust).

Other Proceeds

The calculation of net profits income for the quarter ended March 31, 2014 included \$519,071 (\$467,164 net to the Trust), which includes interest of \$210,242 (\$189,218 net to the Trust), related to a one-time purchaser refund for deductions attributable to coal seam gas wells located in the San Juan Basin for the period December 1997 through May 2006.

Contingencies

Several states have enacted legislation requiring state income tax withholding from nonresident recipients of oil and gas proceeds. After consultation with its tax counsel, the trustee believes that it is not required to withhold on payments made to the unitholders. However, regulations are subject to change by the various states, which could change this conclusion. Should amounts be withheld on payments made to the Trust or the unitholders, distributions to the unitholders would be reduced by the required amount, subject to the filing of a claim for refund by the Trust or unitholders for such amount.

Forward-Looking Statements

Statements in this report relating to future plans, predictions, events or conditions are forward-looking statements. All statements other than statements of historical fact included in this Form 10-Q including, without limitation, statements regarding the net profits interests, underlying properties, development activities, development, production and other costs and expenses, oil and gas prices and differentials to NYMEX prices, distributions to unitholders, and industry and market conditions, are forward-looking statements that are subject to risks and uncertainties which are detailed in Part I, Item 1A of the Trust's Annual Report on Form 10-K for the year ended December 31, 2014, which is incorporated by this reference as though fully set forth herein. XTO Energy and the trustee assume no duty to update these statements as of any future date.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

There have been no material changes in the Trust's market risks from the information disclosed in Part II, Item 7A of the Trust's Annual Report on Form 10-K for the year ended December 31, 2014.

Item 4. Controls and Procedures.

As of the end of the period covered by this report, the trustee carried out an evaluation of the effectiveness of the Trust's disclosure controls and procedures pursuant to Exchange Act Rules 13a-15 and 15d-15. Based upon that evaluation, the trustee concluded that the Trust's disclosure controls and procedures are effective in timely recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Trust in the reports that it files or submits under the Securities Exchange Act of 1934 and are effective in ensuring that information required to be disclosed by the Trust in the reports that it files or submits under the Securities Exchange Act of 1934 is accumulated and communicated to the trustee to allow timely decisions regarding required disclosure. In its evaluation of disclosure controls and procedures, the trustee has relied, to the extent considered reasonable, on information provided by XTO Energy. There has not been any change in the Trust's internal control over financial reporting during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the Trust's internal control over financial reporting.
