## The Markets in Review

Dear Shareholder,

Diverging monetary policies and shifting economic outlooks across regions have been the overarching themes driving financial markets over the past couple of years. With U.S. growth outpacing the global economic recovery while inflationary pressures remained low, investors spent most of 2015 anticipating the curtailment of the Federal Reserve's near-zero interest rate policy, which ultimately came in December. In contrast, the European Central Bank and the Bank of Japan took measures to stimulate growth. In this environment, the U.S. dollar strengthened considerably, causing profit challenges for U.S. exporters and high levels of volatility in emerging market currencies and commodities.

Global market volatility increased in the latter part of 2015 and continued into early 2016. Oil prices collapsed in mid-2015 due to excess supply, and remained precarious while the world's largest oil producers sought to negotiate a deal. Developing countries, many of which rely heavily on oil exports to sustain their economies, were particularly affected by falling oil prices. Meanwhile, China, one of the world's largest oil consumers, exhibited further signs of slowing economic growth. This, combined with a depreciating yuan and declining confidence in the country's policymakers, stoked worries about the potential impact of China's weakness on the broader global economy.

Toward the end of the period, volatility abated as investors were relieved to find that conditions were not as bad as previously feared. While the recent selloff in risk assets has resulted in more reasonable valuations and some appealing entry points, investors continue to face mixed economic data and uncertainty relating to oil prices, corporate earnings and an unusual U.S. presidential election season.

For the 12-month period, higher quality assets such as U.S. Treasuries, municipal bonds and investment grade corporate bonds generated positive returns, while risk assets such as equities and high yield bonds broadly declined.

At BlackRock, we believe investors need to think globally, extend their scope across a broad array of asset classes and be prepared to move freely as market conditions change over time. We encourage you to talk with your financial advisor and visit [blackrock.com](http://blackrock.com) for further insight about investing in today's markets.

## Fund Summary as of February 29, 2016

## BlackRock Defined Opportunity Credit Trust

## Fund Overview

BlackRock Defined Opportunity Credit Trust's (BHL) (the Fund) primary investment objective is to provide high current income, with a secondary objective of long-term capital appreciation. The Fund seeks to achieve its investment objectives by investing substantially all of its assets in loan and debt instruments and loan-related and debt-related instruments (collectively credit securities). The Fund invests, under normal market conditions, at least 80% of its assets in any combination of the following credit securities: (i) senior secured floating rate and fixed rate loans; (ii) second lien or other subordinated or unsecured floating rate and fixed rate loans or debt; (iii) credit securities that are rated below investment grade quality; and (iv) investment grade corporate bonds. The Fund may invest directly in such securities or synthetically through the use of derivatives.

BHL is scheduled to terminate no later than December 31, 2017.

No assurance can be given that the Fund's investment objectives will be achieved.

## Performance and Portfolio Management Commentary

Returns for the six months ended February 29, 2016 were as follows:

	Returns Based On	
	Market Price	NAV
BHL <sup>1,2</sup>	1.65%	(3.71)%
Lipper Loan Participation Funds <sup>3</sup>	(7.81)%	(7.18)%

<sup>1</sup> All returns reflect reinvestment of dividends and/or distributions.

<sup>2</sup> The Fund's discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV.

<sup>3</sup> Average return.

The following discussion relates to the Fund's absolute performance based on NAV:

## What factors influenced performance?

Credit markets, including floating rate loan interests (bank loans), were in negative territory for the six months ended February 29, 2016, driven in large part by a continued decline in commodity prices. Following a brief recovery entering the period, energy prices were the hardest hit as crude oil slid during the period to below \$30 a barrel. The Fund's modest exposure to the energy sector was the most notable detractor from returns. Positions in collateralized loan obligations (CLOs) and high yield bonds detracted from performance as well.

## Describe recent portfolio activity.

During the period, the Fund maintained its overall focus on the higher quality segments of the loan market in terms of loan structure, liquidity and general credit quality. The Fund concentrated its investments in strong companies with stable cash flows, and high quality collateral with the ability to meet interest obligations and ultimately return principal. Although there has been tighter supply in the floating rate loan interests (bank loans) market, the Fund has maintained its highly selective investment approach.

From a sector standpoint, the Fund added to names in the technology and health care sectors, while trimming exposure in the pharmaceuticals and lodging sectors. The Fund also reduced its exposure to CLOs during the period.

**Describe portfolio positioning at period end.**

At period end, the Fund held a majority of its total portfolio in floating rate loan interests (bank loans), with a small position in high yield corporate bonds. The Fund maintained its highest concentration in higher coupon B-rated loans of select issuers while limiting exposure to low coupon BB-rated loans. Additionally, the Fund held a reduced position in CCC-rated loans, while also avoiding the more volatile segments of that universe, such as oil field services, metals & mining and media companies. The largest individual positions included First Data Corp. (technology), Level 3 Communications, Inc. (wirelines), and Avago Technologies Ltd.

BlackRock Floating Rate Income Strategies Fund, Inc.

## Fund Overview

BlackRock Floating Rate Income Strategies Fund, Inc.'s (FRA) (the Fund) investment objective is to provide shareholders with high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments. The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in floating rate debt securities, including floating or variable rate debt securities that pay interest at rates that adjust whenever a specified interest rate changes and/or which reset on predetermined dates (such as the last day of a month or calendar quarter). The Fund invests a substantial portion of its investments in floating rate debt securities consisting of secured or unsecured senior floating rate loans that are rated below investment grade. The Fund may invest directly in floating rate debt securities or synthetically through the use of derivatives.

No assurance can be given that the Fund's investment objective will be achieved.

Fund Summary as of February 29, 2016

BlackRock Limited Duration Income Trust

**Fund Overview**

BlackRock Limited Duration Income Trust's (BLW) (the Fund) investment objective is to provide current income and capital appreciation. The Fund seeks to achieve its investment objective by investing primarily in three distinct asset classes:

intermediate duration, investment grade corporate bonds, mortgage-related securities, asset-backed securities and U.S. Government and agency securities;

senior, secured floating rate loans made to corporate and other business entities; and

U.S. dollar-denominated securities of U.S. and non-U.S. issuers rated below investment grade and, to a limited extent, non-U.S. dollar denominated securities of non-U.S. issuers rated below investment grade.

The Fund's portfolio normally has an average portfolio duration of less than five years (including the effect of anticipated leverage), although it may be longer from time to time depending on market conditions. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund's investment objective will be achieved.

**Performance and Portfolio Management Commentary**

Returns for the six months ended February 29, 2016 were as follows:

	Returns Based On	
	Market Price	NAV
BLW <sup>1,2</sup>	(0.64)%	(3.56)%
Lipper High Yield Funds (Leveraged) <sup>3</sup>	(3.57)%	(8.51)%

<sup>1</sup> All returns reflect reinvestment of dividends and/or distributions.

<sup>2</sup> The Fund's discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV.

<sup>3</sup> Average return.

The following discussion relates to the Fund's absolute performance based on NAV:

**What factors influenced performance?**

The largest detractors from the Fund's absolute performance over the period were its allocations to high yield corporate bonds and senior loans. Positions in asset backed securities (ABS), U.S. Treasuries, commercial mortgage-backed securities (CMBS) and investment-grade

## Edgar Filing: BLACKROCK Ltd DURATION INCOME TRUST - Form N-CSRS

corporate bonds also detracted from performance as well.

The largest contributors to the Fund's absolute performance over the period were its exposure to foreign exchange markets and non-U.S. dollar securities. The Fund's duration (sensitivity to interest rate movements) and yield curve positioning also supported returns.

The Fund held derivatives during the period including Treasury futures, currency forwards, options and credit default swaps. The derivatives were primarily used to adjust duration and yield curve exposure or to manage credit risk. The use of these derivatives did not have a material impact on Fund performance.

Describe recent portfolio activity.

While the Fund's core exposures remained largely consistent over the six-month period, its allocation to ABS, specifically credit loan obligations, was reduced in order to decrease the credit risk in the Fund. In addition, the Fund moved to a longer duration stance.

Describe portfolio positioning at period end.

At period end, the Fund maintained a diversified exposure to non-government spread sectors including high yield and investment grade corporate credit, senior loans, CMBS and ABS, as well as agency and non-agency residential mortgage-backed securities.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

## The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the distribution rate on, and net asset value ( NAV ) of, their common shares ( Common Shares ). However, these objectives cannot be achieved in all interest rate environments.

In general, the concept of leveraging is based on the premise that the financing cost of leverage, which is based on short-term interest rates, is normally lower than the income earned by a Fund on its longer-term portfolio investments purchased with the proceeds from leverage. To the extent that the total assets of the Funds (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Funds' shareholders benefit from the incremental net income. The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV.

To illustrate these concepts, assume a Fund's capitalization is \$100 million and it utilizes leverage for an additional \$30 million, creating a total value of \$130 million available for investment in longer-term income securities. If prevailing short-term interest rates are 3% and longer-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, a Fund's financing costs on the \$30 million of proceeds obtained from leverage are based on the lower short-term interest rates. At the same time, the securities purchased by a Fund with the proceeds from leverage earn income based on longer-term interest rates. In this case, a Fund's financing cost of leverage is significantly lower than the income earned on a Fund's longer-term investments acquired from such leverage proceeds, and therefore the holders of Common Shares ( Common Shareholders ) are the beneficiaries of the incremental net income.

However, in order to benefit shareholders, the return on assets purchased with leverage proceeds must exceed the ongoing costs associated with the leverage. If interest and other costs of leverage exceed the Funds' return on assets purchased with leverage proceeds, income to shareholders is lower than if the Funds had not used leverage. Furthermore, the value of the Funds' portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the value of the Funds' obligations under their respective leverage arrangements generally does not

fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Funds' NAVs positively or negatively. Changes in the future direction of interest rates are very difficult to predict accurately, and there is no assurance that the Funds' intended leveraging strategy will be successful.

Leverage also generally causes greater changes in the Funds' NAVs, market prices and dividend rates than comparable portfolios without leverage. In a declining market, leverage is likely to cause a greater decline in the NAV and market price of Funds' shares than if the Funds were not leveraged. In addition, the Funds may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause the Funds to incur losses. The use of leverage may limit the Funds' ability to invest in certain types of securities or use certain types of hedging strategies. The Funds incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income to the shareholders. Moreover, to the extent the calculation of the Funds' investment advisory fees includes assets purchased with the proceeds of leverage, the investment advisory fees payable to the Funds' investment advisor will be higher than if the Funds did not use leverage.

Each Fund may utilize leverage through a credit facility or reverse repurchase agreements as described in the Notes to Financial Statements.

Under the Investment Company Act of 1940, as amended (the 1940 Act ), the Funds are permitted to issue debt up to 33 1/3% of their total managed assets. A Fund may voluntarily elect to limit its leverage to less than the maximum amount permitted under the 1940 Act. In addition, a Fund may also be subject to certain asset coverage, leverage or portfolio composition requirements imposed by its credit facility, which may be more stringent than those imposed by the 1940 Act.

If a Fund segregates or designates on its books and records cash or liquid assets having values not less than the value of a Fund's obligations under the reverse repurchase agreement (including accrued interest), then such transaction is not considered a senior security and is not subject to the foregoing limitations and requirements under the 1940 Act.

## Derivative Financial Instruments

## Edgar Filing: BLACKROCK Ltd DURATION INCOME TRUST - Form N-CSRS

The Funds may invest in various derivative financial instruments. Derivative financial instruments are used to obtain exposure to a security, index and/or market without owning or taking physical custody of securities or to manage market, equity, credit, interest rate, foreign currency exchange rate, commodity and/or other risks. Derivative financial instruments may give rise to a form of economic leverage. Derivative financial instruments also involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the

derivative financial instrument. The Funds' ability to use a derivative financial instrument successfully depends on the investment advisor's ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may limit the amount of appreciation a Fund can realize on an investment and/or may result in lower distributions paid to shareholders. The Funds' investments in these instruments, if any, are discussed in detail in the Notes to Financial Statements.

<sup>1</sup> As of August 31, 2015, the Fund used observable inputs in determining the value of certain investments. As of February 29, 2016, the Fund used significant unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$6,810,499 transferred from Level 2 to Level 3 in the disclosure hierarchy.

<sup>2</sup> As of August 31, 2015, the Fund used significant unobservable inputs in determining the value of certain investments. As of February 29, 2016, the Fund used observable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$2,572,329 transferred from Level 3 to Level 2 in the disclosure hierarchy.

<sup>3</sup> Included in the related net change in unrealized appreciation (depreciation) in the Statements of Operations.

<sup>4</sup> Any difference between net change in unrealized appreciation (depreciation) on investments still held at February 29, 2016 is generally due to investments no longer held or categorized as Level 3 at period end.

The Fund's investments that are categorized as Level 3 were valued utilizing third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in third party information could result in a significantly lower or higher value of such Level 3 investments.

<sup>1</sup> As of August 31, 2015, the Fund used observable inputs in determining the value of certain investments. As of February 29, 2016, the Fund used significant unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$29,120,247 transferred from Level 2 to Level 3 in the disclosure hierarchy.

<sup>2</sup> As of August 31, 2015, the Fund used significant unobservable inputs in determining the value of certain investments. As of February 29, 2016, the Fund used observable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$13,550,569 transferred from Level 3 to Level 2 in the disclosure hierarchy.

<sup>3</sup> Included in the related net change in unrealized appreciation (depreciation) in the Consolidated Statement of Operations.

<sup>4</sup> Any difference between net change in unrealized appreciation (depreciation) on investments still held at February 29, 2016 is generally due to investments no longer held or categorized as Level 3 at period end.

The Fund's investments that are categorized as Level 3 were valued utilizing third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in third party information could result in a significantly lower or higher value of such Level 3 investments.
