

Edgar Filing: Memorial Resource Development Corp. - Form 425

Memorial Resource Development Corp.

Form 425

May 31, 2016

Company Presentation May 31, 2016 FILED BY RANGE RESOURCES CORPORATION PURSUANT TO RULE 425 UNDER THE SECURITIES ACT OF 1933 AND DEEMED FILED PURSUANT TO RULE 14a-12 UNDER THE SECURITIES EXCHANGE ACT OF 1934 SUBJECT COMPANY: MEMORIAL RESOURCE DEVELOPMENT CORP FILE NO. 001-36490

**Forward-Looking Statements** This communication contains certain “forward-looking statements” within the meaning of federal securities laws, including within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 that are not limited to historical facts, but reflect Range’s and MRD’s current beliefs, expectations or intentions regarding future events. Words such as “may,” “will,” “could,” “should,” “expect,” “plan,” “project,” “intend,” “believe,” “estimate,” “predict,” “potential,” “pursue,” “target,” “continue,” and similar expressions are intended to identify such forward-looking statements. The statements in this press release that are not historical statements, including statements regarding the expected timetable for completing the proposed transaction, benefits and synergies of the proposed transaction, costs and other anticipated financial impacts of the proposed transaction; the combined company’s plans, objectives, future opportunities for the combined company and products, future financial performance and operating results and any other statements regarding Range’s and MRD’s future expectations, beliefs, plans, objectives, financial conditions, assumptions or future events or performance that are not historical facts, are forward-looking statements within the meaning of the federal securities laws. Furthermore, the statements relating to the proposed transaction are subject to numerous risks and uncertainties, many of which are beyond Range’s or MRD’s control, which could cause actual results to differ materially from the results expressed or implied by the statements. These risks and uncertainties include, but are not limited to: failure to obtain the required votes of Range’s or MRD’s shareholders; the timing to consummate the proposed transaction; satisfaction of the conditions to closing of the proposed transaction may not be satisfied or that the closing of the proposed transaction otherwise does not occur; the risk that a regulatory approval that may be required for the proposed transaction is not obtained or is obtained subject to conditions that are not anticipated; the diversion of management time on transaction-related issues; the ultimate timing, outcome and results of integrating the operations of Range and MRD; the effects of the business combination of Range and MRD, including the combined company’s future financial condition, results of operations, strategy and plans; potential adverse reactions or changes to business relationships resulting from the announcement or completion of the proposed transaction; expected synergies and other benefits from the proposed transaction and the ability of Range to realize such synergies and other benefits; expectations regarding regulatory approval of the transaction; results of litigation, settlements and investigations; and actions by third parties, including governmental agencies; changes in the demand for or price of oil and/or natural gas can be significantly impacted by weakness in the worldwide economy; consequences of audits and investigations by government agencies and legislative bodies and related publicity and potential adverse proceedings by such agencies; compliance with environmental laws; changes in government regulations and regulatory requirements, particularly those related to oil and natural gas exploration; compliance with laws related to income taxes and assumptions regarding the generation of future taxable income; weather-related issues; changes in capital spending by customers; delays or failures by customers to make payments owed to us; impairment of oil and natural gas properties; structural changes in the oil and natural gas industry; and maintaining a highly skilled workforce. Range’s and MRD’s respective reports on Form 10-K for the year ended December 31, 2015, Form 10-Q for the quarter ended March 31, 2016, recent Current Reports on Form 8-K, and other SEC filings discuss some of the important risk factors identified that may affect these factors and Range’s and MRD’s respective business, results of operations and financial condition. Range and MRD undertake no obligation to revise or update publicly any forward-looking statements for any reason. Readers are cautioned not to place undue reliance on these forward-looking statements that speak only as of the date hereof. The SEC permits oil and gas companies, in filings made with the SEC, to disclose proved reserves, which are estimates that geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions as well as the option to disclose probable and possible reserves. Range has elected not to disclose the Company’s probable and possible reserves in its filings with the SEC. Range uses certain broader terms such as “resource potential,” “unrisked resource potential,” “unproved resource potential” or “upside” or other descriptions of volumes of resources potentially recoverable through additional drilling or recovery techniques that may include probable and possible reserves as defined by the SEC’s guidelines. Range has not attempted to distinguish probable and possible reserves from these broader classifications. The SEC’s rules prohibit us from including in filings with the SEC these broader classifications of reserves. These estimates are by their nature more speculative than estimates of proved, probable and possible reserves and accordingly are subject to substantially greater risk of actually being realized. Unproved resource potential refers to Range’s internal estimates of hydrocarbon quantities that may be

potentially discovered through exploratory drilling or recovered with additional drilling or recovery techniques and have not been reviewed by independent engineers. Unproved resource potential does not constitute reserves within the meaning of the Society of Petroleum Engineer's Petroleum Resource Management System and does not include proved reserves. Area wide unproven resource potential has not been fully risked by Range's management. "EUR," or estimated ultimate recovery, refers to our management's estimates of hydrocarbon quantities that may be recovered from a well completed as a producer in the area. These quantities may not necessarily constitute or represent reserves within the meaning of the Society of Petroleum Engineer's Petroleum Resource Management System or the SEC's oil and natural gas disclosure rules. Actual quantities that may be recovered from Range's interests could differ substantially. Factors affecting ultimate recovery include the scope of Range's drilling program, which will be directly affected by the availability of capital, drilling and production costs, commodity prices, availability of drilling and completion services and equipment, lease expirations, transportation constraints, regulatory approvals, field spacing rules, recoveries of gas in place, length of horizontal laterals, actual drilling and completion results, including geological and mechanical factors affecting recovery rates and other factors. Estimates of resource potential may change significantly as development of our resource plays provides additional data. In addition, our production forecasts and expectations for future periods are dependent upon many assumptions, including estimates of production decline rates from existing wells and the undertaking and outcome of future drilling activity, which may be affected by significant commodity price declines or drilling cost increases. Investors are urged to consider closely the disclosure in our most recent Annual Report on Form 10-K, available from our website at [www.rangeresources.com](http://www.rangeresources.com) or by written request to 100 Throckmorton Street, Suite 1200, Fort Worth, Texas 76102. You can also obtain this Form 10-K on the SEC's website at [www.sec.gov](http://www.sec.gov) or by calling the SEC at 1-800-SEC-0330.

Range's Keys for Success High quality, large scale acreage position containing repeatable projects with good returns improving further as costs are reduced Low cost structure with ability to continue driving costs down Improving capital efficiency New takeaway capacity projected to improve realizations for natural gas, NGLs and condensate Shallow base decline rate, 19% in 1st year, allows a minimal level of capex to hold production flat, ~\$300 million for 2017 Low-cost takeaway capacity with built-in flexibility Strong 2016 hedges and ample liquidity with no near-term debt maturities

---

Driving Down Unit Costs \$/mcf 2011 2012 2013 2014 2015 2016E DD&A \$1.69 \$1.62 \$1.44 \$1.30 \$1.14 \$0.96 (2)  
 LOE (1) \$0.60 \$0.41 \$0.36 \$0.35 \$0.26 \$0.23 Prod. Taxes \$0.14 \$0.15 \$0.13 \$0.10 \$0.07 \$0.06 G&A (1) \$0.56 \$0.46  
 \$0.42 \$0.35 \$0.27 \$0.24 Interest \$0.69 \$0.61 \$0.51 \$0.40 \$0.33 \$0.29 Trans. & Gathering \$0.62 \$0.70 \$0.75 \$0.76  
 \$0.78 \$1.05 (3) Total \$4.30 \$3.95 \$3.61 \$3.26 \$2.85 \$2.58 \$0.00 Excludes non-cash stock compensation 1Q 2016  
 DD&A was \$0.96 Includes additional NGL & natural gas firm transport agreements. Propane transport costs were  
 previously netted against NGL revenue. Incremental natural gas & NGL revenue, including additional ethane  
 production, will more than offset the 2016 increase in transport expense (4) Expected improvement in differentials as  
 a result of additional transportation capacity 34% Decline in Unit Costs (\$0.25)(4) \$1.05(3)

Near-Term Price Enhancements Range will be able to utilize a full year of Spectra's Uniontown to Gas City project, which takes ~200 Mmcf per day of Range gas production from local Appalachia M2 to Midwest markets Additional takeaway projects could strengthen local pricing differentials Range is the only producer with capacity on the Mariner East project to Marcus Hook 20,000 barrels per day of ethane transportation to fulfill contract with INEOS 20,000 barrels per day of propane transportation with access to international propane markets Range initiated a new marketing arrangement in 3Q15 which improved Marcellus condensate net realized prices Natural Gas Differential NGL (Natural Gas Liquids) Differential Condensate Differential \$0.00 Midpoint Midpoint Midpoint

Mariner East: Opening New Lanes First Ethane Shipments – Faster Propane Loading Combined with VLGC Ships A ship waits in the harbor as another ship is being loaded. Range is the only producer with current capacity on Mariner East Historic first shipments of ethane from U.S. to Europe Optionality of selling propane internationally or in local markets Expect uplift in ethane and propane realizations in 2016 for Range Ethane loading in progress

First VLGC Loading of Range Propane for Export

Liquidity and Leverage Outlook (Range pre-merger) At March 31, 2016, Range had \$1.7 billion liquidity under bank commitments, which is currently limited to \$1.2 billion by senior subordinated note indentures \$3 billion borrowing base and \$2 billion commitment amount under \$4 billion credit facility unanimously reaffirmed by bank group, next scheduled redetermination by May 1, 2017 No note maturities until 2021 Bank facility subject to renewal in 2019, with annual redeterminations Bradford County non-operated interest sold 3/28/16 for \$110 million of proceeds Signed agreement to sell 9,200 acres in the STACK play for ~\$77 million Solid, stable coverage on debt covenants EBITDAX to interest – minimum of 2.5x (1Q Actual 4.8x) PV9 proved reserves value to debt – minimum of 1.5x (1Q Actual 2.4x) Hedges on 80% of 2016 production at ~\$3.24

Range's Keys for Success – Assets, Team, Agreements & Strategy Low cost structure with ability to continue driving costs lower Improving capital efficiency Better realizations from additional takeaway capacity and sales agreements Low-cost takeaway capacity with built-in flexibility Strong 2016 hedges and ample liquidity High quality, large scale acreage position containing repeatable projects with good returns High-grading asset sales lowered operating costs Lower debt balances reduce interest expense Improved targeting and completions Unique marketing arrangements coming on line Ability to reach premium markets and deliver products outside Marcellus, including international exports First-mover advantage allowed Range to secure capacity on low-cost expansion projects Anticipated excess infrastructure build-out and avoided contracting for excessive firm transport Approximately 80% hedged on natural gas at ~\$3.24 Mmbtu At 3/31/16, only \$31 million drawn on \$2 billion credit facility Optionality and flexibility due to quality of acreage position, gathering system, available locations on existing pads Existing pad locations with facilities and gathering Longer laterals; 2016 plan average ~7,000', 2017 plan est. to average ~8,000' 2017 maintenance capex estimated at ~\$300 million 2016 program expected to use cash flow and asset sales, preserving liquidity Further improvements expected Headcount reduced by 31% YoY

Range Resources/Memorial Resource Development Proposed Merger Announced May 16, 2016 Closing expected late 3rd Qtr. / early 4th Qtr. 2016

Highlights of Merger Core acreage positions in two of the most prolific high-quality natural gas plays in North America Immediately cash flow accretive and credit enhancing Combination of two low-cost gas producers with opportunities to drive costs lower, improve returns and increase cash flow Complementary assets positioned near expanding natural gas and NGL demand centers

Transaction Details Consideration Range Resources (“Range”) merges with Memorial Resource Development (“MRD”) for 0.375 shares of Range per MRD share; All-stock transaction Implied value of \$15.75 per MRD share, a 17% premium based on closing prices as of May 13, 2016 Pro Forma Ownership and Corporate Governance MRD shareholders will own ~31% of the combined company MRD will have the right to nominate an independent director to a seat on Range’s Board Combined company will be led by current Range senior management team Key Conditions and Timing Range shareholder approval and MRD shareholder approval Customary regulatory approvals Closing expected late 3rd quarter or early 4th quarter of 2016

Immediately Accretive & Credit Enhancing Annual Consensus Metrics\* Existing RRC Pro Forma RRC % Change

Utica Wells – Wellhead Pressure vs. Cumulative Production Early Time Production Data (Including Flowback/Test Data) Wellhead Pressure (psi) Normalized Gas Cum (Mcf/1000 ft.) RRC DMC Properties well one of the best in the Utica ~25 Mmcf/d ~30 Mmcf/d ~18 Mmcf/d ~12 Mmcf/d ~20 Mmcf/d \*TVD (total vertical depth) With an average pressure gradient of .85 to .95 for these wells, greater TVD equals higher cost and higher pressure 13,200' TVD\* 13,400' TVD\* 11,850' TVD\* 9,206' TVD\*

Utica/Point Pleasant Update 1st well estimated to have 15 Bcf EUR, or 2.8 Bcf per 1,000 lateral foot 2nd well completed with higher sand concentration and brought online in Q3 2015 with choke management at 13 Mmcf per day 2nd well EUR appears to be greater than the first well 3rd well appears to be one of the best dry gas Utica wells in the basin 400,000 net acres in SW PA prospective Note: Townships where Range holds ~2,000+ or more acres are shown outlined above (as January 2016) OH PA WV

Normalized Production Results of Marcellus Tighter Spacing Projects Mcfe/day per 1,000 ft. Tighter spaced wells turned to sales in 2009 and 2010 Average lateral length of these wells is 2,861 feet Well performance not reflective of improved targeting and completion designs 500 foot spaced wells produced 77% of 1,000 foot spaced wells through the life of the current production

Targeting/Down Spacing Test Results Encouraging Optimized targeting shows a ~53% increase in cumulative production after 600 days Normalized well costs were \$850,000 less than original wells No detrimental production impact seen on the original wells Represents New Optimized Completion Method

Returning to Existing Pads – SW Wet Avg EUR/1000 ft.: 3.6+ Bcfe Ability to target our best areas with 3.6+ Bcfe/1,000 ft. New wells have EURs 22% higher than the average wet well Significant cost savings Drilled wells - 2015 Future Locations Additional 5 wells Drilled wells - 2010

Returning to Existing Pads – SW Dry Additional 3 wells Avg EUR/1000 ft.: 3.0+ Bcfe Ability to target our best areas with 3.0+ Bcfe/1,000 ft. New wells have EURs 20% higher than the average dry well Significant cost savings Drilled wells - 2015 Future Locations Drilled wells - 2014

Gas In Place (GIP) – Marcellus Shale GIP is a function of pressure, temperature, thermal maturity, porosity, hydrocarbon saturation and net thickness Two core areas have been developed in the Marcellus Condensate and NGLs are in gaseous form in the reservoir Note: Townships where Range holds ~2,000+ acres (as of January 2016) and estimated as prospective, are outlined green. GIP – Range estimates.

Gas In Place (GIP) – Point Pleasant Bold, outlined portion represents the area of the highest pressure gradients in the Point Pleasant Note: Townships where Range holds ~2,000+ acres (as of January 2016) and estimated as prospective, are outlined green. GIP – Range estimates.

Gas In Place (GIP) – Upper Devonian Shale The greatest GIP in the Upper Devonian is found in SW PA A significant portion of the GIP in the Upper Devonian is located in the wet gas window Note: Townships where Range holds ~2,000+ acres (as of January 2016) and estimated as prospective, are outlined green. GIP – Range estimates.

**Important Additional Information** This communication does not constitute an offer to buy or sell or the solicitation of an offer to buy or sell any securities or a solicitation of any vote or approval. This communication relates to a proposed business combination between Range and MRD. In connection with the proposed transaction, Range intends to file with the SEC a registration statement on Form S-4 that will include a joint proxy statement of Range and MRD that also constitutes a prospectus of Range. Each of Range and MRD also plan to file other relevant documents with the SEC regarding the proposed transactions. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the U.S. Securities Act of 1933, as amended. Any definitive joint proxy statement/prospectus(es) for Range and/or MRD (if and when available) will be mailed to shareholders of Range and/or MRD, as applicable. **INVESTORS AND SECURITY HOLDERS OF RANGE AND MRD ARE URGED TO READ THE PROXY STATEMENT(S), REGISTRATION STATEMENT(S), PROXY STATEMENT/PROSPECTUS AND OTHER DOCUMENTS THAT MAY BE FILED WITH THE SEC CAREFULLY AND IN THEIR ENTIRETY IF AND WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION.** Investors and security holders will be able to obtain free copies of these documents (if and when available) and other documents containing important information about Range and MRD, once such documents are filed with the SEC through the website maintained by the SEC at <http://www.sec.gov>. Copies of the documents filed with the SEC by Range will be available free of charge on Range's internet website at <http://www.rangeresources.com> or by contacting Range's Investor Relations Department by email at [lsando@rangeresources.com](mailto:lsando@rangeresources.com), [damend@rangeresources.com](mailto:damend@rangeresources.com), [mfreeman@rangeresources.com](mailto:mfreeman@rangeresources.com), or by phone at 817-869-4267. Copies of the documents filed with the SEC by MRD will be available free of charge on MRD's internet website at <http://www.memorialrd.com> or by phone at 713-588-8339. Range, MRD and certain of their respective directors and executive officers may be deemed to be participants in the solicitation of proxies in respect of the proposed transaction. Information about the directors and executive officers of MRD is set forth in MRD's proxy statement for its 2016 annual meeting of shareholders, which was filed with the SEC on April 1, 2016. Information about the directors and executive officers of Range is set forth in its proxy statement for its 2016 annual meeting of shareholders, which was filed with the SEC on April 8, 2016. These documents can be obtained free of charge from the sources indicated above. Other information regarding the participants in the proxy solicitations and a description of their direct and indirect interests, by security holdings or otherwise, will be contained in the joint proxy statement/prospectus and other relevant materials to be filed with the SEC when such materials become available. Investors should read the joint proxy statement/prospectus carefully when it becomes available before making any voting or investment decisions. You may obtain free copies of these documents from Range or MRD using the sources indicated above.
