**Comments from José María Álvarez-Pallete, Executive Chairman:**

*First quarter results reflected a further step forward in our business model, which is focused on the pursuit of sustainable growth. The differential quality of our asset portfolio enables us to offer differential services, which translated into improvements in our results; in particular: i) the growth in main financial metrics, including the positive impact of foreign exchange rates in the quarter; ii) the savings obtained from synergy capture and process simplification; and iii) the strengthening of our balance sheet and the strong free cash flow growth, 9x higher vs. January-March 2016. In addition, we have announced the launch of AURA, a new, more innate and simple customer relationship model, a pioneer in the area of cognitive intelligence.*

*At the same time, the results are aligned with our expectations and allow us to reiterate the guidance set for 2017 .*

Notes:

- Since the second quarter of 2016 Telefónica's operations in the United Kingdom are no longer reported as discontinued operations and all its assets and liabilities have ceased to be reported as held for sale, and have been reclassified back into full consolidation, in compliance with International Financial Reporting Standards (IFRS). For comparative purposes, the results of Telefónica Group of the first quarter of 2016 are reported following the same criteria.
- 2016 and 2017 reported figures include hyperinflationary adjustments in Venezuela in both years.
- OIBDA and OI are presented before brand fees and management fees.
- Telxius financials are fully reported in Other Companies & Eliminations in T. Group since 1 January, 2017, reflecting the final integration into Telxius of the mobile communications towers transferred from T. España, T. Deutschland, T. Brasil and T. Hispanoamérica segments and the international submarine fiber optic cable (which was already being reported within Other Companies and Eliminations). As a consequence, 2017 reported figures for these segments follow the same criteria. In addition, 2016 segment results have been revised to reflect the different dates of asset integration into Telxius, affecting T. España (since 1 January, 2016), T. Deutschland (since 1 May, 2016), T. Brasil (since 1 April, 2016) and T. Hispanoamérica (T. Perú since 1 April 2016 and T. Chile since 1 May 2016). Organic y-o-y changes on segments reflect all the charges related to the towers transferred to Telxius since 1 January 2016. The results of the segments do not include intra-group capital gains resulting from the transfer of towers to Telxius in 2016.
- **Organic criteria:** Assumes constant exchange rates as of 2016 (average FX in 2016), excludes the impact from hyperinflation in Venezuela in both years and considers constant perimeter of consolidation. In OIBDA and OI terms, excludes write-downs, capital gains/losses from the sale of companies, tower sales, material non-recurring impacts and restructuring costs. CapEx also excludes investment in spectrum.
