

BANK OF MONTREAL /CAN/  
Form FWP  
April 10, 2019

**Registration No. 333-217200**

**Filed Pursuant to Rule 433**

**Dated April 10, 2019**

Bank of Montreal, the issuer of the ETNs, has filed a registration statement (including a pricing supplement, prospectus supplement and prospectus) with the SEC about the offerings to which this website relates. Please read those documents and the other documents relating to these offerings that Bank of Montreal has filed with the SEC for more complete information about Bank of Montreal and these offerings. These documents may be obtained without cost by visiting EDGAR on the SEC website at [www.sec.gov](http://www.sec.gov). Alternatively, Bank of Montreal, any agent or any dealer participating in these offerings will arrange to send the pricing supplement, the prospectus supplement and the prospectus if so requested by calling toll-free at 1-877-369-5412.

4/2/2019 localhost:65439/ETN/NRGU.P/ localhost:65439/ETN/NRGU.P/ 1/5 MicroSectors™ U.S. Big Oil Index 3X Leveraged ETNs Description The return on the MicroSectors™ U.S. Big Oil Index 3X Leveraged ETNs (3X ETNs) is linked to a three times leveraged participation in the performance of the Index, compounded daily, minus the applicable fees. The ETNs provide levered exposure to the Solactive MicroSectors™ U.S. Big Oil Index. The Solactive MicroSectors™ U.S. Big Oil Index, an equal-dollar weighted index, was created by Solactive AG in 2019 to provide exposure to the 10 largest U.S. energy and oil companies. MicroSectors™ provide concentrated exposure to 10 stocks in a given sub-sector, or “microsector”. The ETN seeks a return on the underlying index for a single day. The ETNs are not “buy and hold” investments and should not be expected to provide a leveraged return of the underlying index’s cumulative return for periods greater than a day. Additional Information Key Risks An investment in the MicroSectors™ U.S. Big Oil Index 3X Leveraged Exchange Traded Notes (+3X ETNs) involves risks. Key risks are summarized here, but we urge you to read the more Product Details Primary Exchange NYSE Arca ETN Ticker NRGU Intraday Indicative Value Ticker NRGUIV Index Ticker SOLUSBOT CUSIP 063679815 Issue Date April 12, 2019 Maturity Date March 25, 2039 Daily Market Data (as of ) ETNs Outstanding 500,000 4/2/2019 localhost:65439/ETN/NRGU.P/ localhost:65439/ETN/NRGU.P/ 2/5 Key Risks detailed explanation of risks described under “Risk Factors” in Bank of Montreal’s pricing supplement for these securities. Capitalized terms used but not defined herein have the meanings set forth in such pricing supplement. You may lose some or all of your principal - The +3X ETNs do not guarantee any return on your initial investment. The +3X ETNs are leveraged notes, which means they are exposed to three times the risk of any decrease in the level of the Index, compounded daily. Due to leverage, the +3X ETNs are very sensitive to changes in the level of the Index and the path of such changes. Because the Daily Investor Fee and the Daily Financing Charge reduce your final payment, the level of the Index, measured as a component of the closing Indicative Note Value during the Final Measurement Period or Call Measurement Period, or on a Redemption Measurement Date, will need to increase by an amount at least equal to the percentage of the principal amount represented by the Daily Investor Fee, the Daily Financing Charge and any Redemption Fee Amount in order for you to receive an aggregate amount at maturity, upon a call or redemption, or if you sell your +3X ETNs, that is equal to at least the principal amount. You may lose some or all of your investment at maturity or call, or upon early redemption. Credit of issuer - The +3X ETNs are senior unsecured debt obligations of the issuer, Bank of Montreal, and are not, either directly or indirectly, an obligation of any third party. Any payment to be made on the +3X ETNs, including any payment at maturity, call or upon early redemption, depends on the ability of Bank of Montreal to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of Bank of Montreal will affect the market value, if any, of the +3X ETNs prior to maturity, call or early redemption. In addition, in the event Bank of Montreal defaults on its obligations, you may not receive any amounts owed to you under the terms of the +3X ETNs. Correlation and compounding risk - A number of factors may affect the +3X ETNs’ ability to achieve a high degree of correlation with the performance of the Index, and the +3X ETNs are not expected to achieve a high degree of correlation with the performance of the Index over periods longer than one day. The leverage is reset daily, the return on the +3X ETNs is path dependent and you will be exposed to compounding of daily returns. As a result, the performance of the +3X ETNs for periods greater than one Index Business Day may be either greater than or less than three times the Index performance, before accounting for the Daily Investor Fee, the Daily Financing Charge and any Redemption Fee Amount. Path dependence - The return on the +3X ETNs will be highly path dependent.

Accordingly, even if the level of the Index increases or decreases over the term of the +3X ETNs, or over the term which you hold the +3X ETNs, the value of the +3X ETNs will increase or decrease not only based on any change in the level of the Index over a given time period, but also based on the volatility of the Index over that time period. The value of the +3X ETNs will depend not only upon the level of the Index at maturity, upon call or upon early redemption, but also on the performance of the Index over each day that you hold the +3X ETNs. It is possible that you will suffer significant losses in the +3X ETNs, even if the long-term performance of the Index is positive. Accordingly, the returns on the +3X ETNs may not correlate with returns on the Index over periods of longer than one day. Long holding period risk - The +3X ETNs are intended to be daily trading tools for sophisticated investors and are designed to reflect a leveraged long exposure to the performance of the Index 4/2/2019 localhost:65439/ETN/NRGU.P/ localhost:65439/ETN/NRGU.P/ 3/5 Key Risks on a daily basis; however, their returns over different periods of time can, and most likely will, differ significantly from three times the return on a direct long investment in the Index. The +3X ETNs are very sensitive to changes in the level of the Index, and returns on the +3X ETNs may be negatively affected in complex ways by volatility of the Index on a daily or intraday basis. Also, the Index is potentially volatile as it includes only a small number of constituents (10); any Index volatility would be magnified by the leverage. Accordingly, the +3X ETNs should be purchased only by knowledgeable investors who understand the potential consequences of investing in the Index and of seeking daily compounding leveraged long investment results. Investors should actively and frequently monitor their investments in the +3X ETNs, even intra-day. It is possible that you will suffer significant losses in the +3X ETNs even if the long-term performance of the Index is positive (before taking into account the negative effect of the Daily Investor Fee and the Daily Financing Charge, and the Redemption Fee Amount, if applicable). Potential total loss of value - If the closing Indicative Note Value of the +3X ETNs is equal to or less than \$0 on any Exchange Business Day, then the Indicative Note Value on all future Exchange Business Days will be \$0. If the Intraday Indicative Value of the +3X ETNs is equal to or less than \$0 at any time on any Index Business Day, then both the Intraday Indicative Value of the +3X ETNs and the closing Indicative Note Value on that Exchange Business Day, and on all future Exchange Business Days, will be \$0. If the Indicative Note Value is zero, the Cash Settlement Amount will be zero. Leverage risk - The +3X ETNs are three times leveraged and, as a result, the +3X ETNs will benefit from three times any positive, but will decline based on three times any negative, daily performance of the Index. However, the leverage of the +3X ETNs may be greater or less than 3.0 during any given Index Business Day. Volatility of the Index level may have a significant negative effect on the value of the +3X ETNs. The Index has a limited actual performance history - The Index was launched in March 2019. Because the Index is of recent origin and limited actual historical performance data exists with respect to it, your investment in the +3X ETNs may involve a greater risk than investing in securities linked to one or more indices with a more established record of performance. The Index lacks diversification and is concentrated in one sector, and has a limited number of Index constituents - All of the stocks included in the Index are issued by companies in the energy sector. As a result, the +3X ETNs will not benefit from the diversification that could result from an investment linked to an index of companies that operate in multiple sectors. Each of the 10 Index constituents represents 10% of the weight of the Index as of each monthly rebalancing date. Any reduction in the market price of any of those stocks is likely to have a substantial adverse impact on the Index Closing Level and the value of the +3X ETNs. Giving effect to leverage, negative changes in the performance of one Index constituent will be magnified and have a material adverse effect on the value of the +3X ETNs. A trading market for the +3X ETNs may not develop - The +3X ETNs are listed on the NYSE Arca under the symbol "NRGU." However, a trading market for the +3X ETNs may not develop. We are not required to maintain any listing of the +3X ETNs on the NYSE Arca or any other exchange. The Intraday Indicative Value is not the same as the trading price of the +3X ETNs in the secondary market - The Intraday Indicative Value of the +3X ETNs will be calculated and published every 15 seconds on each Exchange Business Day during normal trading hours on 4/2/2019 localhost:65439/ETN/NRGU.P/ localhost:65439/ETN/NRGU.P/ 4/5 Key Risks Bloomberg under the ticker symbol NRGUIV so long as no Market Disruption Event has occurred or is continuing. The trading price of the +3X ETNs at any time is the price at which you may be able to sell your +3X ETNs in the secondary market at such time, if one exists. The trading price of the +3X ETNs at any time may vary significantly from the Intraday Indicative Value of the +3X ETNs at such time. Paying a premium purchase price over the Intraday Indicative Value of the +3X ETNs could lead to significant losses in the event one sells such +3X ETNs at a time when such premium is no longer present in the market place or the +3X ETNs are called - Paying a premium purchase price over the Intraday Indicative Value of the +3X ETNs could

lead to significant losses in the event one sells the +3X ETNs at a time when such premium is no longer present in the market place or if the +3X ETNs are called, in which case investors will receive a cash payment in an amount based on the arithmetic mean of the closing Indicative Note Value of the +3X ETNs during the Call Measurement Period. Before trading in the secondary market, you should compare the Intraday Indicative Value with the then-prevailing trading price of the +3X ETNs. Call right - We may elect to redeem all outstanding +3X ETNs at any time. If we exercise our Call Right, the Call Settlement Amount may be less than the principal amount of your +3X ETNs. Any exercise by us of our Call Right could present a conflict between your interest in the +3X ETNs and our interests in determining whether to call the +3X ETNs. Minimum redemption amount - You must elect to redeem at least 25,000 +3X ETNs for us to repurchase your +3X ETNs, unless we determine otherwise or your broker or other financial intermediary bundles your +3X ETNs for redemption with those of other investors to reach this minimum requirement, and there can be no assurance that they can or will do so. Therefore, your ability to elect redemption of the +3X ETNs may be limited. Your redemption election is irrevocable - You will not be able to rescind your election to redeem your +3X ETNs after your redemption notice is received by us. Accordingly, you will be exposed to market risk if the level of the Index decreases after we receive your offer and the Redemption Amount is determined on the Redemption Measurement Date. You will not know the Redemption Amount at the time that you submit your irrevocable redemption notice. No interest payments or ownership rights - The +3X ETNs do not pay any interest. You will not have any ownership rights in the Index constituents, nor will you have any right to receive dividends or other distributions paid to holders of the Index constituents, except as reflected in the level of the Index. Potential conflicts - We and our affiliates play a variety of roles in connection with the issuance of the +3X ETNs, including acting as an agent of the issuer for the offering of the +3X ETNs, making certain calculations and determinations that may affect the value of the +3X ETNs and hedging our obligations under the +3X ETNs. Any profit in connection with such hedging activities will be in addition to any other compensation that we and our affiliates receive for the sale of the +3X ETNs, which creates an additional incentive to sell the +3X ETNs to you. In performing these activities, our economic interests and those of our affiliates are potentially adverse to your interests as an investor in the +3X ETNs. Uncertain tax treatment - Significant aspects of the tax treatment of the +3X ETNs are uncertain. You should consult your own tax advisor about your own tax situation. Bank of Montreal and its affiliates do not provide tax advice, and nothing contained herein should be construed as tax advice. 4/2/2019 localhost:65439/ETN/NRGO.P/ localhost:65439/ETN/NRGO.P/ 5/5 Key Risks advice. Please be advised that any discussion of U.S. tax matters contained herein (including any attachments and other documents incorporated by reference): (i) is not intended or written to be used, and cannot be used, by you for the purposes of avoiding U.S. tax-related penalties, and (ii) was written to support the promotion of marketing of the transactions or other matters addressed herein. Accordingly, you should seek advice based on your particular circumstances from your independent tax advisor. Disclaimer Documents 4/2/2019 localhost:65439/ETN/NRGO.P/ localhost:65439/ETN/NRGO.P/ 1/5 MicroSectors™ U.S. Big Oil Index 2X Leveraged ETNs Description The return on the MicroSectors™ U.S. Big Oil Index 2X Leveraged ETNs (2X ETNs) is linked to a two times leveraged participation in the performance of the Index, compounded daily, minus the applicable fees. The ETNs provide levered exposure to the Solactive MicroSectors™ U.S. Big Oil Index. The Solactive MicroSectors™ U.S. Big Oil Index, an equal-dollar weighted index, was created by Solactive AG in 2019 to provide exposure to the 10 largest U.S. energy and oil companies. MicroSectors™ provide concentrated exposure to 10 stocks in a given sub-sector, or “microsector”. The ETN seeks a return on the underlying index for a single day. The ETNs are not “buy and hold” investments and should not be expected to provide a leveraged return of the underlying index’s cumulative return for periods greater than a day. Additional Information Key Risks An investment in the MicroSectors™ U.S. Big Oil Index 2X Leveraged Exchange Traded Notes (2X ETNs) involves risks. Key risks are summarized here, but we urge you to read the more detailed Product Details Primary Exchange NYSE Arca ETN Ticker NRGO Intraday Indicative Value Ticker NRGOIV Index Ticker SOLUSBOT CUSIP 063679757 Issue Date April 12, 2019 Maturity Date March 25, 2039 Daily Market Data (as of ) ETNs Outstanding 500,000 4/2/2019 localhost:65439/ETN/NRGO.P/ localhost:65439/ETN/NRGO.P/ 2/5 Key Risks explanation of risks described under “Risk Factors” in Bank of Montreal’s pricing supplement for these securities. Capitalized terms used but not defined herein have the meanings set forth in such pricing supplement. You may lose some or all of your principal - The 2X ETNs do not guarantee any return on your initial investment. The 2X ETNs are leveraged notes, which means they are exposed to two times the risk of any decrease in the level of the Index, compounded daily. Due to leverage, the 2X ETNs are very sensitive to changes in the level of the Index and the path of such changes. Because the Daily Investor Fee and the Daily Financing Charge

reduce your final payment, the level of the Index, measured as a component of the closing Indicative Note Value during the Final Measurement Period or Call Measurement Period, or on a Redemption Measurement Date, will need to increase by an amount at least equal to the percentage of the principal amount represented by the Daily Investor Fee, the Daily Financing Charge and any Redemption Fee Amount in order for you to receive an aggregate amount at maturity, upon a call or redemption, or if you sell your 2X ETNs, that is equal to at least the principal amount. You may lose some or all of your investment at maturity or call, or upon early redemption. Credit of issuer - The 2X ETNs are senior unsecured debt obligations of the issuer, Bank of Montreal, and are not, either directly or indirectly, an obligation of any third party. Any payment to be made on the 2X ETNs, including any payment at maturity, call or upon early redemption, depends on the ability of Bank of Montreal to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of Bank of Montreal will affect the market value, if any, of the 2X ETNs prior to maturity, call or early redemption. In addition, in the event Bank of Montreal defaults on its obligations, you may not receive any amounts owed to you under the terms of the 2X ETNs. Correlation and compounding risk - A number of factors may affect the 2X ETNs' ability to achieve a high degree of correlation with the performance of the Index, and the 2X ETNs are not expected to achieve a high degree of correlation with the performance of the Index over periods longer than one day. The leverage is reset daily, the return on the 2X ETNs is path dependent and you will be exposed to compounding of daily returns. As a result, the performance of the 2X ETNs for periods greater than one Index Business Day may be either greater than or less than two times the Index performance, before accounting for the Daily Investor Fee, the Daily Financing Charge and any Redemption Fee Amount. Path dependence - The return on the 2X ETNs will be highly path dependent. Accordingly, even if the level of the Index increases or decreases over the term of the 2X ETNs, or over the term which you hold the 2X ETNs, the value of the 2X ETNs will increase or decrease not only based on any change in the level of the Index over a given time period, but also based on the volatility of the Index over that time period. The value of the 2X ETNs will depend not only upon the level of the Index at maturity, upon call or upon early redemption, but also on the performance of the Index over each day that you hold the 2X ETNs. It is possible that you will suffer significant losses in the 2X ETNs, even if the long-term performance of the Index is positive. Accordingly, the returns on the 2X ETNs may not correlate with returns on the Index over periods of longer than one day. Long holding period risk - The 2X ETNs are intended to be daily trading tools for sophisticated investors and are designed to reflect a leveraged long exposure to the performance of the Index on a daily basis; however, their returns over different periods of time can, and most likely will, 4/2/2019 localhost:65439/ETN/NRGO.P/ localhost:65439/ETN/NRGO.P/ 3/5 Key Risks differ significantly from two times the return on a direct long investment in the Index. The 2X ETNs are very sensitive to changes in the level of the Index, and returns on the 2X ETNs may be negatively affected in complex ways by volatility of the Index on a daily or intraday basis. Also, the Index is potentially volatile as it includes only a small number of constituents (10); any Index volatility would be magnified by the leverage. Accordingly, the 2X ETNs should be purchased only by knowledgeable investors who understand the potential consequences of investing in the Index and of seeking daily compounding leveraged long investment results. Investors should actively and frequently monitor their investments in the 2X ETNs, even intra-day. It is possible that you will suffer significant losses in the 2X ETNs even if the long-term performance of the Index is positive (before taking into account the negative effect of the Daily Investor Fee and the Daily Financing Charge, and the Redemption Fee Amount, if applicable). Potential total loss of value - If the closing Indicative Note Value of the 2X ETNs is equal to or less than \$0 on any Exchange Business Day, then the Indicative Note Value on all future Exchange Business Days will be \$0. If the Intraday Indicative Value of the 2X ETNs is equal to or less than \$0 at any time on any Index Business Day, then both the Intraday Indicative Value of the 2X ETNs and the closing Indicative Note Value on that Exchange Business Day, and on all future Exchange Business Days, will be \$0. If the Indicative Note Value is zero, the Cash Settlement Amount will be zero. Leverage risk - The 2X ETNs are two times leveraged and, as a result, the 2X ETNs will benefit from two times any positive, but will decline based on two times any negative, daily performance of the Index. However, the leverage of the 2X ETNs may be greater or less than 2.0 during any given Index Business Day. Volatility of the Index level may have a significant negative effect on the value of the 2X ETNs. The Index has a limited actual performance history - The Index was launched in March 2019. Because the Index is of recent origin and limited actual historical performance data exists with respect to it, your investment in the 2X ETNs may involve a greater risk than investing in securities linked to one or more indices with a more established record of performance. The Index lacks diversification and is concentrated in one sector, and has a limited number of Index constituents - All of the stocks included in the Index are issued by companies in the

energy sector. As a result, the 2X ETNs will not benefit from the diversification that could result from an investment linked to an index of companies that operate in multiple sectors. Each of the 10 Index constituents represents 10% of the weight of the Index as of each monthly rebalancing date. Any reduction in the market price of any of those stocks is likely to have a substantial adverse impact on the Index Closing Level and the value of the 2X ETNs. Giving effect to leverage, negative changes in the performance of one Index constituent will be magnified and have a material adverse effect on the value of the 2X ETNs. A trading market for the 2X ETNs may not develop - The 2X ETNs are listed on the NYSE Arca under the symbol "NRGO." However, a trading market for the 2X ETNs may not develop. We are not required to maintain any listing of the 2X ETNs on the NYSE Arca or any other exchange. The Intraday Indicative Value is not the same as the trading price of the 2X ETNs in the secondary market - The Intraday Indicative Value of the 2X ETNs will be calculated and published every 15 seconds on each Exchange Business Day during normal trading hours on Bloomberg under the ticker symbol NRGOIV so long as no Market Disruption Event has occurred or is 4/2/2019 localhost:65439/ETN/NRGO.P/ localhost:65439/ETN/NRGO.P/ 4/5 Key Risks continuing. The trading price of the 2X ETNs at any time is the price at which you may be able to sell your 2X ETNs in the secondary market at such time, if one exists. The trading price of the 2X ETNs at any time may vary significantly from the Intraday Indicative Value of the 2X ETNs at such time. Paying a premium purchase price over the Intraday Indicative Value of the 2X ETNs could lead to significant losses in the event one sells such 2X ETNs at a time when such premium is no longer present in the market place or the 2X ETNs are called - Paying a premium purchase price over the Intraday Indicative Value of the 2X ETNs could lead to significant losses in the event one sells the 2X ETNs at a time when such premium is no longer present in the market place or if the 2X ETNs are called, in which case investors will receive a cash payment in an amount based on the arithmetic mean of the closing Indicative Note Value of the 2X ETNs during the Call Measurement Period. Before trading in the secondary market, you should compare the Intraday Indicative Value with the then-prevailing trading price of the 2X ETNs. Call right - We may elect to redeem all outstanding 2X ETNs at any time. If we exercise our Call Right, the Call Settlement Amount may be less than the principal amount of your 2X ETNs. Any exercise by us of our Call Right could present a conflict between your interest in the 2X ETNs and our interests in determining whether to call the 2X ETNs. Minimum redemption amount - You must elect to redeem at least 25,000 +2X ETNs for us to repurchase your +2X ETNs, unless we determine otherwise or your broker or other financial intermediary bundles your +2X ETNs for redemption with those of other investors to reach this minimum requirement, and there can be no assurance that they can or will do so. Therefore, your ability to elect redemption of the +2X ETNs may be limited. Your redemption election is irrevocable - You will not be able to rescind your election to redeem your 2X ETNs after your redemption notice is received by us. Accordingly, you will be exposed to market risk if the level of the Index decreases after we receive your offer and the Redemption Amount is determined on the Redemption Measurement Date. You will not know the Redemption Amount at the time that you submit your irrevocable redemption notice. No interest payments or ownership rights - The 2X ETNs do not pay any interest. You will not have any ownership rights in the Index constituents, nor will you have any right to receive dividends or other distributions paid to holders of the Index constituents, except as reflected in the level of the Index. Potential conflicts - We and our affiliates play a variety of roles in connection with the issuance of the 2X ETNs, including acting as an agent of the issuer for the offering of the 2X ETNs, making certain calculations and determinations that may affect the value of the 2X ETNs and hedging our obligations under the 2X ETNs. Any profit in connection with such hedging activities will be in addition to any other compensation that we and our affiliates receive for the sale of the 2X ETNs, which creates an additional incentive to sell the 2X ETNs to you. In performing these activities, our economic interests and those of our affiliates are potentially adverse to your interests as an investor in the 2X ETNs. Uncertain tax treatment - Significant aspects of the tax treatment of the 2X ETNs are uncertain. You should consult your own tax advisor about your own tax situation. Bank of Montreal and its affiliates do not provide tax advice, and nothing contained herein should be construed as tax advice. Please be advised that any discussion of U.S. tax matters contained herein (including any 4/2/2019 localhost:65439/ETN/NRGO.P/ localhost:65439/ETN/NRGO.P/ 5/5 Key Risks attachments and other documents incorporated by reference): (i) is not intended or written to be used, and cannot be used, by you for the purposes of avoiding U.S. tax-related penalties, and (ii) was written to support the promotion of marketing of the transactions or other matters addressed herein. Accordingly, you should seek advice based on your particular circumstances from your independent tax advisor. Disclaimer Documents 4/2/2019 localhost:65439/ETN/YGRN.P/ localhost:65439/ETN/YGRN.P/ 1/5 MicroSectors™ U.S. Big Oil Index Inverse ETNs Description The return on the MicroSectors™ U.S. Big Oil Index Inverse ETNs

(ETNs) is linked to the inverse exposure in the performance of the Index, compounded daily, minus the applicable fees. The ETNs provide inverse exposure to the Solactive MicroSectors™ U.S. Big Oil Index. The Solactive MicroSectors™ U.S. Big Oil Index, an equal-dollar weighted index, was created by Solactive AG in 2019 to provide exposure to the 10 largest U.S. energy and oil companies. MicroSectors™ provide concentrated exposure to 10 stocks in a given sub-sector, or “microsector”. The ETN seeks a return on the underlying index for a single day. The ETNs are not “buy and hold” investments and should not be expected to provide a return of the underlying index’s cumulative return for periods greater than a day. Additional Information Key Risks An investment in the MicroSectors™ U.S. Big Oil Index Inverse Exchange Traded Notes (-1X ETNs) involves risks. Key risks are summarized here, but we urge you to read the more detailed explanation of risks described under “Risk Factors” in Bank of Montreal’s pricing supplement for these securities. Capitalized terms used but not defined herein have the meanings set forth in such pricing supplement. Product Details Primary Exchange NYSE Arca ETN Ticker YGRN Intraday Indicative Value Ticker YGRNIV Index Ticker SOLUSBOT CUSIP 063679740 Issue Date April 12, 2019 Maturity Date March 25, 2039 Daily Market Data (as of ) ETNs Outstanding 500,000 4/2/2019 localhost:65439/ETN/YGRN.P/ localhost:65439/ETN/YGRN.P/ 2/5 Key Risks The -1X ETNs are linked to the inverse performance of the Index - Your investment in the -1X ETNs is linked to the inverse, or “short,” performance of the Index. Therefore, notwithstanding the gains resulting from the daily interest, if any, and the cumulative negative effect of the daily investor fee, your -1X ETNs will generally appreciate as the level of the Index decreases and will decrease in value as the level of the Index increases. You may lose some or all of your investment if the level of the Index increases over the term of your -1X ETNs. You may lose some or all of your principal - The -1X ETNs do not guarantee any return on your initial investment. The -1X ETNs are inverse notes, which means they are exposed to the risk of any increase in the level of the Index, compounded daily. Due to compounding, the -1X ETNs are very sensitive to changes in the level of the Index and the path of such changes. Because the Daily Investor Fee and any negative Daily Interest reduce your final payment, the level of the Index, measured as a component of the closing Indicative Note Value during the Final Measurement Period or Call Measurement Period, or on a Redemption Measurement Date, will need to decrease by an amount at least equal to the percentage of the principal amount represented by the Daily Investor Fee, any negative Daily Interest and any Redemption Fee Amount in order for you to receive an aggregate amount at maturity, upon a call or redemption, or if you sell -1X ETNs, that is equal to at least the principal amount. You may lose some or all of your investment at maturity or call, or upon early redemption. Credit of issuer - The -1X ETNs are senior unsecured debt obligations of the issuer, Bank of Montreal, and are not, either directly or indirectly, an obligation of any third party. Any payment to be made on the -1X ETNs, including any payment at maturity, call or upon early redemption, depends on the ability of Bank of Montreal to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of Bank of Montreal will affect the market value, if any, of the -1X ETNs prior to maturity, call or early redemption. In addition, in the event Bank of Montreal defaults on its obligations, you may not receive any amounts owed to you under the terms of the -1X ETNs. The Daily Interest may be negative - Although the Daily Interest will be added to the Deposit Amount, the Daily Interest will be negative on any Exchange Business Day on which the Daily Interest Rate is negative. On those Exchange Business Days, the Daily Interest will be subtracted from the Deposit Amount, which, in turn, will reduce the Indicative Note Value and the amount that you will receive for your -1X ETNs at maturity, call or redemption. Correlation and compounding risk - A number of factors may affect the -1X ETNs’ ability to achieve a high degree of correlation with the performance of the Index, and the -1X ETNs are not expected to achieve a high degree of correlation with the performance of the Index over periods longer than one day. The exposure is reset daily, the return on the -1X ETNs is path dependent and you will be exposed to compounding of daily returns. As a result, the performance of the -1X ETNs for periods greater than one Index Business Day may be either greater than or less than the inverse of the Index performance, before accounting for the Daily Investor Fee, any negative Daily Interest and any Redemption Fee Amount. Path dependence - The return on the -1X ETNs will be highly path dependent. Accordingly, even if the level of the Index decreases or increases over the term of the -1X ETNs, or over the term which you hold the -1X ETNs, the value of the -1X ETNs will increase or decrease not only based on any change in the level of the Index over a given time period but also based on the volatility of 4/2/2019 localhost:65439/ETN/YGRN.P/ localhost:65439/ETN/YGRN.P/ 3/5 Key Risks the Index over that time period. The value of the -1X ETNs will depend not only upon the level of the Index at maturity, upon call or upon early redemption, but also on the performance of the Index over each day that you hold the -1X ETNs. It is possible that you will suffer significant losses in the -1X ETNs, even if the long-term performance of the

Index is negative. Accordingly, the returns on the -1X ETNs may not correlate with returns on the Index over periods of longer than one day. Long holding period risk - The -1X ETNs are intended to be daily trading tools for sophisticated investors and are designed to reflect inverse exposure to the performance of the Index on a daily basis; however, their returns over different periods of time can, and most likely will, differ significantly from the return on a direct inverse investment in the Index. The -1X ETNs are very sensitive to changes in the level of the Index, and returns on the -1X ETNs may be negatively affected in complex ways by volatility of the Index on a daily or intraday basis. Also, the Index is potentially volatile as it includes only a small number of constituents (10); any Index volatility would be magnified by the compounding. Accordingly, the -1X ETNs should be purchased only by knowledgeable investors who understand the potential consequences of investing in the Index and of seeking daily compounding inverse investment results. Investors should actively and frequently monitor their investments in the -1X ETNs, even intra-day. It is possible that you will suffer significant losses in the -1X ETNs even if the long-term performance of the Index is negative (before taking into account the negative effect of the Daily Investor Fee and the Daily Interest, and the Redemption Fee Amount, if applicable). Potential total loss of value - If the closing Indicative Note Value of the -1X ETNs is equal to or less than \$0 on any Exchange Business Day, then the Indicative Note Value on all future Exchange Business Days will be \$0. If the Intraday Indicative Value of the -1X ETNs is equal to or less than \$0 at any time on any Index Business Day, then both the Intraday Indicative Value of the -1X ETNs and the closing Indicative Note Value on that Exchange Business Day, and on all future Exchange Business Days, will be \$0. If the Indicative Note Value is zero, the Cash Settlement Amount will be zero. Exposure risk - The -1X ETNs will benefit from any negative, but will decline based on any positive, daily performance of the Index. However, the exposure of the -1X ETNs may be greater or less than -1.0 during any given Index Business Day. Volatility of the Index level may have a significant negative effect on the value of the -1X ETNs. The Index has a limited actual performance history - The Index was launched in March 2019. Because the Index is of recent origin and limited actual historical performance data exists with respect to it, your investment in the -1X ETNs may involve a greater risk than investing in securities linked to one or more indices with a more established record of performance. The Index lacks diversification and is concentrated in one sector, and has a limited number of Index constituents - All of the stocks included in the Index are issued by companies in the energy sector. As a result, the -1X ETNs will not benefit from the diversification that could result from an investment linked to an index of companies that operate in multiple sectors. Each of the Index constituents represents 10% of the weight of the Index as of each monthly rebalancing date. Any increase in the market price of any of those stocks is likely to have a substantial positive impact on the Index Closing Level and a substantial adverse impact on the value of the -1X ETNs. 4/2/2019 localhost:65439/ETN/YGRN.P/ localhost:65439/ETN/YGRN.P/ 4/5 Key Risks A trading market for the -1X ETNs may not develop - The -1X ETNs are listed on the NYSE Arca under the symbol "YGRN." However, a trading market for the -1X ETNs may not develop. We are not required to maintain any listing of the -1X ETNs on the NYSE Arca or any other exchange. The Intraday Indicative Value is not the same as the trading price of the -1X ETNs in the secondary market - The Intraday Indicative Value of the -1X ETNs will be calculated and published every 15 seconds on each Exchange Business Day during normal trading hours on Bloomberg under the ticker symbol YGRNIV so long as no Market Disruption Event has occurred or is continuing. The trading price of the -1X ETNs at any time is the price at which you may be able to sell your -1X ETNs in the secondary market at such time, if one exists. The trading price of the -1X ETNs at any time may vary significantly from the Intraday Indicative Value of the -1X ETNs at such time. Paying a premium purchase price over the Intraday Indicative Value of the -1X ETNs could lead to significant losses in the event one sells such -1X ETNs at a time when such premium is no longer present in the market place or the -1X ETNs are called - Paying a premium purchase price over the Intraday Indicative Value of the -1X ETNs could lead to significant losses in the event one sells the -1X ETNs at a time when such premium is no longer present in the market place or if the -1X ETNs are called, in which case investors will receive a cash payment in an amount based on the arithmetic mean of the closing Indicative Note Value of the -1X ETNs during the Call Measurement Period. Before trading in the secondary market, you should compare the Intraday Indicative Value with the then-prevailing trading price of the -1X ETNs. Call right - We may elect to redeem all outstanding -1X ETNs at any time. If we exercise our Call Right, the Call Settlement Amount may be less than the principal amount of your -1X ETNs. Any exercise by us of our Call Right could present a conflict between your interest in the -1X ETNs and our interests in determining whether to call the -1X ETNs. Minimum redemption amount - You must elect to redeem at least 25,000 -1X ETNs for us to repurchase your -1X ETNs, unless we determine otherwise or your broker or other financial intermediary bundles

your -1X ETNs for redemption with those of other investors to reach this minimum requirement, and there can be no assurance that they can or will do so. Therefore, your ability to elect redemption of the -1X ETNs may be limited. Your redemption election is irrevocable - You will not be able to rescind your election to redeem your -1X ETNs after your redemption notice is received by us. Accordingly, you will be exposed to market risk if the level of the Index decreases after we receive your offer and the Redemption Amount is determined on the Redemption Measurement Date. You will not know the Redemption Amount at the time that you submit your irrevocable redemption notice. No interest payments or ownership rights - The -1X ETNs do not pay any interest. You will not have any ownership rights in the Index constituents, nor will you have any right to receive dividends or other distributions paid to holders of the Index constituents, except as reflected in the level of the Index. Potential conflicts - We and our affiliates play a variety of roles in connection with the issuance of the -1X ETNs, including acting as an agent of the issuer for the offering of the -1X ETNs, making certain calculations and determinations that may affect the value of the -1X ETNs and hedging our obligations under the -1X ETNs. Any profit in connection with such hedging activities will be in addition to any other compensation that we and our affiliates receive for the sale of the -1X 4/2/2019

localhost:65439/ETN/YGRN.P/ localhost:65439/ETN/YGRN.P/ 5/5 Key Risks ETNs, which creates an additional incentive to sell the -1X ETNs to you. In performing these activities, our economic interests and those of our affiliates are potentially adverse to your interests as an investor in the -1X ETNs. Uncertain tax treatment - Significant aspects of the tax treatment of the -1X ETNs are uncertain. You should consult your own tax advisor about your own tax situation. Accordingly, you should seek advice based on your particular circumstances from your independent tax advisor. Disclaimer Documents 4/2/2019

localhost:65439/ETN/NRGZ.P/ localhost:65439/ETN/NRGZ.P/ 1/5 MicroSectors™ U.S. Big Oil Index -2X Inverse Leveraged ETNs Description The return on the MicroSectors™ U.S. Big Oil Index -2X Inverse Leveraged ETNs (-2X ETNs) is linked to a two times inverse leveraged participation in the performance of the Index, compounded daily, minus the applicable fees. The ETNs provide inverse leveraged exposure to the Solactive MicroSectors™ U.S. Big Oil Index. The Solactive MicroSectors™ U.S. Big Oil Index, an equal-dollar weighted index, was created by Solactive AG in 2019 to provide exposure to the 10 largest U.S. energy and oil companies. MicroSectors™ provide concentrated exposure to 10 stocks in a given sub-sector, or “microsector”. The ETN seeks a return on the underlying index for a single day. The ETNs are not “buy and hold” investments and should not be expected to provide a leveraged return of the underlying index’s cumulative return for periods greater than a day. Additional Information Key Risks Product Details Primary Exchange NYSE Arca ETN Ticker NRGZ Intraday Indicative Value Ticker NRGZIV Index Ticker SOLUSBOT CUSIP 063679732 Issue Date April 12, 2019 Maturity Date March 25, 2039 Daily Market Data (as of ) ETNs Outstanding 500,000 4/2/2019 localhost:65439/ETN/NRGZ.P/ localhost:65439/ETN/NRGZ.P/ 2/5 Key Risks An investment in the MicroSectors™ U.S. Big Oil Index -2X Inverse Leveraged Exchange Traded Notes (-2X ETNs) involves risks. Key risks are summarized here, but we urge you to read the more detailed explanation of risks described under “Risk Factors” in Bank of Montreal’s pricing supplement for these securities. Capitalized terms used but not defined herein have the meanings set forth in such pricing supplement. The -2X ETNs are linked to the inverse performance of the Index - Your investment in a the -2X ETNs is linked to the inverse, or “short”, performance of the Index. Therefore, notwithstanding the gains resulting from the daily interest, if any, and the cumulative negative effect of the daily investor fee, your -2X ETNs will generally appreciate as the level of the Index decreases and will decrease in value as the level of the Index increases. You may lose some or all of your investment if the level of the Index increases over the term of your -2X ETNs. You may lose some or all of your principal - The -2X ETNs do not guarantee any return on your initial investment. The -2X ETNs are leveraged inverse notes, which means they are exposed to two times the risk of any increase in the level of the Index, compounded daily. Due to leverage, the -2X ETNs are very sensitive to changes in the level of the Index and the path of such changes. Because the Daily Investor Fee and any negative Daily Interest reduce your final payment, the level of the Index, measured as a component of the closing Indicative Note Value during the Final Measurement Period or Call Measurement Period, or on a Redemption Measurement Date, will need to decrease by an amount at least equal to the percentage of the principal amount represented by the Daily Investor Fee, any negative Daily Interest and Redemption Fee Amount, if applicable, in order

for you to receive an aggregate amount at maturity, upon a call or redemption, or if you sell your -2X ETNs, that is equal to at least the principal amount. You may lose some or all of your investment at maturity or call, or upon early redemption. Credit of issuer - The -2X ETNs are senior unsecured debt obligations of the issuer, Bank of Montreal, and are not, either directly or indirectly, an obligation of any third party. Any payment to be made on the -2X ETNs, including any payment at maturity, call or upon early redemption, depends on the ability of Bank of Montreal to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of Bank of Montreal will affect the market value, if any, of the -2X ETNs prior to maturity, call or early redemption. In addition, in the event Bank of Montreal defaults on its obligations, you may not receive any amounts owed to you under the terms of the -2X ETNs. The Daily Interest may be negative - Although the Daily Interest will be added to the Deposit Amount, the Daily Interest will be negative on any Exchange Business Day on which the Daily Interest Rate is negative. On those Exchange Business Days, the Daily Interest will be subtracted from the Deposit Amount, which, in turn, will reduce the Indicative Note Value and the amount that you will receive for your -2X ETNs at maturity, call or redemption. Correlation and compounding risk - A number of factors may affect the -2X ETNs' ability to achieve a high degree of correlation with the performance of the Index, and the -2X ETNs are not expected to achieve a high degree of correlation with the performance of the Index over periods longer than one day. The leverage is reset daily, the return on the -2X ETNs is path dependent and you will be exposed to compounding of daily returns. As a result, the performance of the -2X ETNs for periods greater than one Index Business Day may be either greater than or less than 4/2/2019 localhost:65439/ETN/NRGZ.P/ localhost:65439/ETN/NRGZ.P/ 3/5 Key Risks two times the inverse of the Index performance, before accounting for the Daily Investor Fee, any negative Daily Interest and any Redemption Fee Amount. Path dependence - The return on the -2X ETNs will be highly path dependent. Accordingly, even if the level of the Index decreases or increases over the term of the -2X ETNs, or over the term which you hold the -2X ETNs, the value of the -2X ETNs will increase or decrease not only based on any change in the level of the Index over a given time period but also based on the volatility of the Index over that time period. The value of the -2X ETNs will depend not only upon the level of the Index at maturity, upon call or upon early redemption, but also on the performance of the Index over each day that you hold the -2X ETNs. It is possible that you will suffer significant losses in the -2X ETNs, even if the long-term performance of the Index is negative. Accordingly, the returns on the -2X ETNs may not correlate with returns on the Index over periods of longer than one day. Long holding period risk - The -2X ETNs are intended to be daily trading tools for sophisticated investors and are designed to reflect a leveraged inverse exposure to the performance of the Index on a daily basis; however, their returns over different periods of time can, and most likely will, differ significantly from two times the return on a direct inverse investment in the Index. The -2X ETNs are very sensitive to changes in the level of the Index, and returns on the -2X ETNs may be negatively affected in complex ways by volatility of the Index on a daily or intraday basis. Also, the Index is potentially volatile as it includes only a small number of constituents (10); any Index volatility would be magnified by the leverage. Accordingly, the -2X ETNs should be purchased only by knowledgeable investors who understand the potential consequences of investing in the Index and of seeking daily compounding leveraged inverse investment results. Investors should actively and frequently monitor their investments in the -2X ETNs, even intra-day. It is possible that you will suffer significant losses in the -2X ETNs even if the long-term performance of the Index is negative (before taking into account the negative effect of the Daily Investor Fee and the Daily Interest, and the Redemption Fee Amount, if applicable). Potential total loss of value - If the closing Indicative Note Value of the -2X ETNs is equal to or less than \$0 on any Exchange Business Day, then the Indicative Note Value on all future Exchange Business Days will be \$0. If the Intraday Indicative Value of the -2X ETNs is equal to or less than \$0 at any time on any Index Business Day, then both the Intraday Indicative Value of the -2X ETNs and the closing Indicative Note Value on that Exchange Business Day, and on all future Exchange Business Days, will be \$0. If the Indicative Note Value is zero, the Cash Settlement Amount will be zero. Leverage risk - The -2X ETNs are two times leveraged and, as a result, the -2X ETNs will benefit from two times any negative, but will decline based on two times any positive, daily performance of the Index. However, the leverage of the -2X ETNs may be greater or less than -2.0 during any given Index Business Day. Volatility of the Index level may have a significant negative effect on the value of the -2X ETNs. The Index has a limited actual performance history - The Index was launched in March 2019. Because the Index is of recent origin and limited actual historical performance data exists with respect to it, your investment in the -2X ETNs may involve a greater risk than investing in securities linked to one or more indices with a more established record of performance. 4/2/2019 localhost:65439/ETN/NRGZ.P/ localhost:65439/ETN/NRGZ.P/ 4/5 Key Risks The Index

lacks diversification and is concentrated in one sector, and has a limited number of Index constituents - All of the stocks included in the Index are issued by companies in the energy sector. As a result, the -2X ETNs will not benefit from the diversification that could result from an investment linked to an index of companies that operate in multiple sectors. Each of the 10 Index constituents represents 10% of the weight of the Index as of each monthly rebalancing date. Any increase in the market price of any of those stocks is likely to have a substantial positive impact on the Index Closing Level and a substantial adverse impact on the value of the -2X ETNs. Giving effect to leverage, positive changes in the performance of one Index constituent will be magnified and have a material adverse effect on the value of the -2X ETNs. A trading market for the -2X ETNs may not develop - The -2X ETNs are listed on the NYSE Arca under the symbol "NRGZ." However, a trading market for the -2X ETNs may not develop. We are not required to maintain any listing of the -2X ETNs on the NYSE Arca or any other exchange. The Intraday Indicative Value is not the same as the trading price of the -2X ETNs in the secondary market - The Intraday Indicative Value of the -2X ETNs will be calculated and published every 15 seconds on each Exchange Business Day during normal trading hours on Bloomberg under the ticker symbol NRGZIV so long as no Market Disruption Event has occurred or is continuing. The trading price of the -2X ETNs at any time is the price at which you may be able to sell your -2X ETNs in the secondary market at such time, if one exists. The trading price of the -2X ETNs at any time may vary significantly from the Intraday Indicative Value of the -2X ETNs at such time. Paying a premium purchase price over the Intraday Indicative Value of the -2X ETNs could lead to significant losses in the event one sells such -2X ETNs at a time when such premium is no longer present in the market place or the -2X ETNs are called - Paying a premium purchase price over the Intraday Indicative Value of the -2X ETNs could lead to significant losses in the event one sells the -2X ETNs at a time when such premium is no longer present in the market place or if the -2X ETNs are called, in which case investors will receive a cash payment in an amount based on the arithmetic mean of the closing Indicative Note Value of the -2X ETNs during the Call Measurement Period. Before trading in the secondary market, you should compare the Intraday Indicative Value with the then-prevailing trading price of the -2X ETNs. Call right - We may elect to redeem all outstanding -2X ETNs at any time. If we exercise our Call Right, the Call Settlement Amount may be less than the principal amount of your -2X ETNs. Any exercise by us of our Call Right could present a conflict between your interest in the -2X ETNs and our interests in determining whether to call the -2X ETNs. Minimum redemption amount - You must elect to redeem at least 25,000 -2X ETNs for us to repurchase your -2X ETNs, unless we determine otherwise or your broker or other financial intermediary bundles your -2X ETNs for redemption with those of other investors to reach this minimum requirement, and there can be no assurance that they can or will do so. Therefore, your ability to elect redemption of the -2X ETNs may be limited. Your redemption election is irrevocable - You will not be able to rescind your election to redeem your -2X ETNs after your redemption notice is received by us. Accordingly, you will be exposed to market risk if the level of the Index decreases after we receive your offer and the Redemption Amount is determined on the Redemption Measurement Date. You will not know the Redemption Amount at the time that you submit your irrevocable redemption notice. 4/2/2019 localhost:65439/ETN/NRGZ.P/ localhost:65439/ETN/NRGZ.P/ 5/5 Key Risks No interest payments or ownership rights - The -2X ETNs do not pay any interest. You will not have any ownership rights in the Index constituents, nor will you have any right to receive dividends or other distributions paid to holders of the Index constituents, except as reflected in the level of the Index. Potential conflicts - We and our affiliates play a variety of roles in connection with the issuance of the -2X ETNs, including acting as an agent of the issuer for the offering of the -2X ETNs, making certain calculations and determinations that may affect the value of the -2X ETNs and hedging our obligations under the -2X ETNs. Any profit in connection with such hedging activities will be in addition to any other compensation that we and our affiliates receive for the sale of the -2X ETNs, which creates an additional incentive to sell the -2X ETNs to you. In performing these activities, our economic interests and those of our affiliates are potentially adverse to your interests as an investor in the -2X ETNs. Uncertain tax treatment - Significant aspects of the tax treatment of the -2X ETNs are uncertain. You should consult your own tax advisor about your own tax situation. Bank of Montreal and its affiliates do not provide tax advice, and nothing contained herein should be construed as tax advice. Please be advised that any discussion of U.S. tax matters contained herein (including any attachments and other documents incorporated by reference): (i) is not intended or written to be used, and cannot be used, by you for the purposes of avoiding U.S. tax-related penalties, and (ii) was written to support the promotion of marketing of the transactions or other matters addressed herein. Accordingly, you should seek advice based on your particular circumstances from your independent tax advisor. Disclaimer Documents 4/2/2019 localhost:65439/ETN/NRGD.P/

localhost:65439/ETN/NRGD.P/ 1/5 MicroSectors™ U.S. Big Oil Index -3X Inverse Leveraged ETNs Description The return on the MicroSectors™ U.S. Big Oil Index -3X Inverse Leveraged ETNs (-3X ETNs) is linked to a three times inverse leveraged participation in the performance of the Index, compounded daily, minus the applicable fees. The ETNs provide inverse leveraged exposure to the Solactive MicroSectors™ U.S. Big Oil Index. The Solactive MicroSectors™ U.S. Big Oil Index, an equal-dollar weighted index, was created by Solactive AG in 2019 to provide exposure to the 10 largest U.S. energy and oil companies. MicroSectors™ provide concentrated exposure to 10 stocks in a given sub-sector, or “microsector”. The ETN seeks a return on the underlying index for a single day. The ETNs are not “buy and hold” investments and should not be expected to provide a leveraged return of the underlying index’s cumulative return for periods greater than a day. Key risks are summarized here, but we urge you to read the more detailed explanation of risks described under “Risk Factors” in Bank of Montreal’s pricing supplement for these securities. Capitalized terms used but not defined herein have the meanings set forth in such pricing supplement. The -3X ETNs are linked to the inverse performance of the Index - Your investment in a the -3X ETNs is linked to the inverse, or “short,” performance of the Index. Therefore, notwithstanding the gains resulting from the daily interest, if any, and the cumulative negative effect of the daily investor fee, your -3X ETNs will generally appreciate as the level of the Index decreases and will decrease in value as the level of the Index increases. You may lose some or all of your investment if the level of the Index increases over the term of your -3X ETNs. You may lose some or all of your principal - The -3X ETNs do not guarantee any return on your initial investment. The -3X ETNs are leveraged inverse notes, which means they are exposed to three times the risk of any increase in the level of the Index, compounded daily. Due to leverage, the -3X ETNs are very sensitive to changes in the level of the Index and the path of such changes. Because the Daily Investor Fee and any negative Daily Interest reduce your final payment, the level of the Index, measured as a component of the closing Indicative Note Value during the Final Measurement Period or Call Measurement Period, or on a Redemption Measurement Date, will need to decrease by an amount at least equal to the percentage of the principal amount represented by the Daily Investor Fee, any negative Daily Interest and any Redemption Fee Amount in order for you to receive an aggregate amount at maturity, upon a call or redemption, or if you sell your -3X ETNs, that is equal to at least the principal amount. You may lose some or all of your investment at maturity or call, or upon early redemption. Credit of issuer - The -3X ETNs are senior unsecured debt obligations of the issuer, Bank of Montreal, and are not, either directly or indirectly, an obligation of any third party. Any payment to be made on the -3X ETNs, including any payment at maturity, call or upon early redemption, depends on the ability of Bank of Montreal to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of Bank of Montreal will affect the market value, if any, of the -3X ETNs prior to maturity, call or early redemption. In addition, in the event Bank of Montreal defaults on its obligations, you may not receive any amounts owed to you under the terms of the -3X ETNs. The Daily Interest may be negative - Although the Daily Interest will be added to the Deposit Amount, the Daily Interest will be negative on any Exchange Business Day on which the Daily Interest Rate is negative. On those Exchange Business Days, the Daily Interest will be subtracted from the Deposit Amount, which, in turn, will reduce the Indicative Note Value and the amount that you will receive for your -3X ETNs at maturity, call or redemption. Correlation and compounding risk - A number of factors may affect the -3X ETNs’ ability to achieve a high degree of correlation with the performance of the Index, and the -3X ETNs are not expected to achieve a high degree of correlation with the performance of the Index over periods longer than one day. The leverage is reset daily, the return on the -3X ETNs is path dependent and you will be exposed to compounding of daily returns. As a result, the performance of the -3X ETNs for periods greater than one Index Business Day may be either greater than or less than Home p Top 4/2/2019 localhost:65439/ETN/NRGD.P/ localhost:65439/ETN/NRGD.P/ 3/5 Key Risks three times the inverse of the Index performance, before accounting for the Daily Investor Fee, any negative Daily Interest and any Redemption Fee Amount. Path dependence - The return on the -3X ETNs will be highly path dependent. Accordingly, even if the level of the Index decreases or increases over the term of the -3X ETNs, or over the term which you hold the -3X ETNs, the value of the -3X ETNs will increase or decrease not only based on any change in the level of the Index over a given time period but also based on the volatility of the Index over that time period. The value of the -3X

ETNs will depend not only upon the level of the Index at maturity, upon call or upon early redemption, but also on the performance of the Index over each day that you hold the -3X ETNs. It is possible that you will suffer significant losses in the -3X ETNs, even if the long-term performance of the Index is negative. Accordingly, the returns on the -3X ETNs may not correlate with returns on the Index over periods of longer than one day. Long holding period risk - The -3X ETNs are intended to be daily trading tools for sophisticated investors and are designed to reflect a leveraged inverse exposure to the performance of the Index on a daily basis; however, their returns over different periods of time can, and most likely will, differ significantly from three times the return on a direct inverse investment in the Index. The -3X ETNs are very sensitive to changes in the level of the Index, and returns on the -3X ETNs may be negatively affected in complex ways by volatility of the Index on a daily or intraday basis. Also, the Index is potentially volatile as it includes only a small number of constituents (10); any Index volatility would be magnified by the leverage. Accordingly, the -3X ETNs should be purchased only by knowledgeable investors who understand the potential consequences of investing in the Index and of seeking daily compounding leveraged inverse investment results. Investors should actively and frequently monitor their investments in the -3X ETNs, even intra-day. It is possible that you will suffer significant losses in the -3X ETNs even if the long-term performance of the Index is negative (before taking into account the negative effect of the Daily Investor Fee and the Daily Interest, and the Redemption Fee Amount, if applicable). Potential total loss of value - If the closing Indicative Note Value of the -3X ETNs is equal to or less than \$0 on any Exchange Business Day, then the Indicative Note Value on all future Exchange Business Days will be \$0. If the Intraday Indicative Value of the -3X ETNs is equal to or less than \$0 at any time on any Index Business Day, then both the Intraday Indicative Value of the -3X ETNs and the closing Indicative Note Value on that Exchange Business Day, and on all future Exchange Business Days, will be \$0. If the Indicative Note Value is zero, the Cash Settlement Amount will be zero. Leverage risk - The -3X ETNs are three times leveraged and, as a result, the -3X ETNs will benefit from three times any negative, but will decline based on three times any positive, daily performance of the Index. However, the leverage of the -3X ETNs may be greater or less than -3.0 during any given Index Business Day. Volatility of the Index level may have a significant negative effect on the value of the -3X ETNs. The Index has a limited actual performance history - The Index was launched in March 2019. Because the Index is of recent origin and limited actual historical performance data exists with respect to it, your investment in the -3X ETNs may involve a greater risk than investing in securities linked to one or more indices with a more established record of performance. Giving effect to leverage, positive changes in the performance of one Index constituent will be magnified and have a material adverse effect on the value of the -3X ETNs. A trading market for the -3X ETNs may not develop - The -3X ETNs are listed on the NYSE Arca under the symbol "NRGD." However, a trading market for the -3X ETNs may not develop. We are not required to maintain any listing of the -3X ETNs on the NYSE Arca or any other exchange. The Intraday Indicative Value is not the same as the trading price of the -3X ETNs in the secondary market - The Intraday Indicative Value of the -3X ETNs will be calculated and published every 15 seconds on each Exchange Business Day during normal trading hours on Bloomberg under the ticker symbol NRGDIV so long as no Market Disruption Event has occurred or is continuing. The trading price of the -3X ETNs at any time is the price at which you may be able to sell your -3X ETNs in the secondary market at such time, if one exists. The trading price of the -3X ETNs at any time may vary significantly from the Intraday Indicative Value of the -3X ETNs at such time. Paying a premium purchase price over the Intraday Indicative Value of the -3X ETNs could lead to significant losses in the event one sells such -3X ETNs at a time when such premium is no longer present in the market place or the -3X ETNs are called - Paying a premium purchase price over the Intraday Indicative Value of the -3X ETNs could lead to significant losses in the event one sells the -3X ETNs at a time when such premium is no longer present in the market place or if the -3X ETNs are called, in which case investors will receive a cash payment in an amount based on the arithmetic mean of the closing Indicative Note Value of the -3X ETNs during the Call Measurement Period. Before trading in the secondary market, you should compare the Intraday Indicative Value with the then-prevailing trading price of the -3X ETNs. Call right -

We may elect to redeem all outstanding -3X ETNs at any time. If we exercise our Call Right, the Call Settlement Amount may be less than the principal amount of your -3X ETNs. Any exercise by us of our Call Right could present a conflict between your interest in the -3X ETNs and our interests in determining whether to call the -3X ETNs.

**Minimum redemption amount** - You must elect to redeem at least 25,000 -3X ETNs for us to repurchase your -3X ETNs, unless we determine otherwise or your broker or other financial intermediary bundles your -3X ETNs for redemption with those of other investors to reach this minimum requirement, and there can be no assurance that they can or will do so. Therefore, your ability to elect redemption of the -3X ETNs may be limited. Your redemption election is irrevocable - You will not be able to rescind your election to redeem your -3X ETNs after your redemption notice is received by us. Accordingly, you will be exposed to market risk if the level of the Index decreases after we receive your offer and the Redemption Amount is determined on the Redemption Measurement Date. You will not know the Redemption Amount at the time that you submit your irrevocable redemption notice. Home p Top 4/2/2019 localhost:65439/ETN/NRGD.P/ localhost:65439/ETN/NRGD.P/ 5/5 Key Risks

**No interest payments or ownership rights** - The -3X ETNs do not pay any interest. You will not have any ownership rights in the Index constituents, nor will you have any right to receive dividends or other distributions paid to holders of the Index constituents, except as reflected in the level of the Index.

**Potential conflicts** - We and our affiliates play a variety of roles in connection with the issuance of the -3X ETNs, including acting as an agent of the issuer for the offering of the -3X ETNs, making certain calculations and determinations that may affect the value of the -3X ETNs and hedging our obligations under the -3X ETNs. Any profit in connection with such hedging activities will be in addition to any other compensation that we and our affiliates receive for the sale of the -3X ETNs, which creates an additional incentive to sell the -3X ETNs to you. In performing these activities, our economic interests and those of our affiliates are potentially adverse to your interests as an investor in the -3X ETNs.

**Uncertain tax treatment** - Significant aspects of the tax treatment of the -3X ETNs are uncertain. You should consult your own tax advisor about your own tax situation. Bank of Montreal and its affiliates do not provide tax advice, and nothing contained herein should be construed as tax advice. Please be advised that any discussion of U.S. tax matters contained herein (including any attachments and other documents incorporated by reference): (i) is not intended or written to be used, and cannot be used, by you for the purposes of avoiding U.S. tax-related penalties, and (ii) was written to support the promotion of marketing of the transactions or other matters addressed herein. Accordingly, you should seek advice based on your particular circumstances from your independent tax advisor. Disclaimer Documents Home p Top
