Risk Factors

Please see the Preliminary Offering Documents for a description of certain risks related to this investment, including, but not limited to, the following:

- If your notes are not called prior to maturity, your investment may result in a loss; there is no guaranteed return of principal.
- Payments on the notes, including any repayment of principal, are subject to the credit risk of Deutsche Bank and any resolution measure imposed by its competent resolution authority, and actual or perceived changes in its creditworthiness are expected to affect the value of the notes. If Deutsche Bank becomes insolvent, is unable to pay its obligations or any resolution measure becomes applicable to it, you may lose your entire investment.
 - The initial estimated value of the notes on the pricing date will be less than their public offering price.
- If you attempt to sell the notes prior to maturity, their market value may be lower than both the public offering price and the initial estimated value of the notes on the pricing date.
 - If called, your return on the notes is limited to the return represented by the applicable call premium.
- You will have no rights of a holder of the securities represented by the Market Measure, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.

Final terms will be set on the pricing date within the given range for the specified Market-Linked Investment. Please see the Preliminary Offering Documents for complete product disclosure, including related risks and tax disclosure. ve on more than four public company boards, well within the guidelines of both ISS and Glass Lewis.

Our directors actively participate in the Board and have established the strategy that is driving substantial value for Mitek shareholders.

6. Why did you adopt the NOL pill if you have only \$15 million in deferred tax assets? Is the NOL pill just a way to entrench the board?

As we stated in our press release announcing the adoption of the NOL rights plan on October 23, 2018, Mitek has estimated available NOLs of \$27.6 million for federal income tax purposes, and NOLs for state income tax purposes of approximately \$30.1 million - Elliott's reference to numbers from June 30, 2018 is misleading and not accurate.

The Board previously determined, and still believes, that protecting Mitek's valuable deferred tax assets from the risk of an ownership change is in the best interests of all the Company's stockholders.

The plan does not in any way impair our Board's ability to move forward with a potential acquirer if the Board determines such action is in the best interests of all the Company's shareholders - but Elliott's proposal does not provide such a basis for negotiations.

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
