ECONOMIC AND MARKET OVERVIEW

The U.S. economy slowed during the 12 months ended March 31, 2008, as gross domestic product (GDP) growth decelerated sharply and registered an annualized rate of 0.6% in the fourth quarter of 2007 and first quarter of 2008. This was a significant change from the third quarter's fairly robust 4.9% annualized growth, which was the highest in more than seven years. A softening labor market, tighter credit conditions and ongoing housing market weakness rattled consumer confidence and hurt consumer spending. These factors as well as upward inflationary pressures from rising food, energy and commodity prices, and a weaker dollar significantly weighed on the overall economy.

Volatile oil prices reached a historical high in March, topping \$110 per barrel before retreating to \$102 by period-end. Core inflation, which excludes food and energy costs, rose modestly for the period, signaling that inflation risk remains. For March 2008, core inflation had a 12-month increase of 2.4%. (1) The Federal Reserve Board's (Fed's) preferred measure of inflation, the core personal consumption expenditures price index, reported a 12-month increase of 2.1%. (2)

As financial market turmoil and investor uncertainty persisted, the Fed remained committed to act in an effort to restore confidence and liquidity to U.S. financial markets. The Fed implemented a number of programs to buffer downside risk, such as a \$200 billion package to increase liquidity to banks, an extension on direct credit lines to non-banking financial service companies and the orchestration of Bear Stearns' acquisition by JPMorgan Chase. The Fed cut interest rates five times over the 12-month period, bringing the federal funds target rate to 2.25%. In addition, regulators eased capital requirements on government-sponsored Fannie Mae and Freddie Mac. Despite the Fed's aggressive actions, U.S. Treasuries rallied in a flight to quality and equities continued to fall during the period.

2 | Annual Report

Over the period, as investors sought the relative safety of short-term U.S. Treasuries, Treasury yields declined and the yield curve steepened. Short-term, two- and five-year yields declined substantially, with the two-year bill yielding 1.62% at the end of March, down from 4.58% 12 months prior. The 10-year U.S. Treasury note ended March yielding 3.45%, compared with 4.65% at the beginning of the period.

INVESTMENT STRATEGY

We invest in a diversified mix of fixed income securities, primarily high yield corporate bonds, senior secured floating rate bank loans, and mortgage- and other asset-backed securities. Our top-down analysis of macroeconomic trends combined with a bottom-up fundamental analysis of market sectors, industries and issuers drives our investment process. We seek to maintain a limited duration,

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

or interest rate sensitivity, to moderate the impact that fluctuating interest rates might have on the Fund's fixed income portfolio. Within the corporate bond and bank loan sectors, we seek securities trading at reasonable valuations from issuers with characteristics such as strong market positions, stable cash flows, reasonable capital structures, supportive asset values, strong sponsorship and improving credit fundamentals. In the mortgage- and other asset-backed securities sector, we look to capture an attractive income stream and total return through our analysis of security prepayment assumptions, pricing inefficiencies and underlying collateral characteristics.

MANAGER'S DISCUSSION

The fiscal year under review was characterized by volatility and the emergence of one of the largest financial crises in decades. The period began with strong economic growth leading to inflationary concerns. However, fear and uncertainty took hold as subprime mortgage delinquencies led to a significant credit crunch. After rising initially on inflation fears, U.S. Treasury yields began falling in June 2007 and many ended the period more than 100 basis points (100 basis points equal one percentage point) below where they began. Declining interest rates and a flight to quality boosted returns of mortgage-backed securities, which were the Fund's best performing asset class during the period. High yield corporate bonds and leveraged bank loans, however,

were negatively affected by the market's general risk aversion. Although default rates remained relatively low during the period for both asset classes, fears of a recession and expectations for increasing default rates in the near future contributed to rising risk premiums. In addition, high yield corporate bonds and leveraged bank loans suffered from technical factors, as financing for leveraged buyouts (LBOs) that were arranged in a more favorable environment still needed to come to market. The increased spreads on these assets more than offset the

decline in interest rates and the interest earned on the securities. Therefore, both asset classes experienced negative returns during the fiscal year. In an effort to take advantage of opportunities created by market volatility, the Fund increased its exposure to bank loans and reduced its weighting in high yield corporate bonds. Our exposure to mortgage-backed and other asset-backed securities was roughly unchanged.

As the fiscal year began, strong corporate earnings and balance sheet liquidity contributed to a healthy fundamental environment for high yield corporate bonds. As a result, the default rate was low and credit spreads above Treasuries tightened to a record low of 265 basis points in early June. Subprime market turmoil and the resulting credit crunch, however, led to fears of a recession and expectations that default rates could rise. In addition, despite a somewhat reduced forward calendar of LBO transactions from summer 2007 levels, pending supply weighed on the sector at period-end. Consequently, credit spreads widened significantly and ended the period nearly 800 basis points above Treasuries, more than three times as much as in June and the highest level in five years. Although spreads were above the historical average at period-end, the fundamental outlook for the asset class was uncertain. In our view, corporate balance sheets were generally favorable, but a recession could lead to increasing default rates. During the Fund's fiscal year, we found more attractive investment opportunities in other asset classes, in particular bank loans and investment grade corporate bonds.

Similar to high yield corporate bonds, bank loans enjoyed a favorable market environment early in the fiscal year, followed by rapidly deteriorating fundamental and technical factors beginning in July. As investor risk aversion increased, structured products such as collateralized loan obligations, which previously had accounted for about two-thirds of purchases of all loans, nearly

4 | Annual Report

disappeared from the market. Therefore, spreads widened to attract new buyers to the asset class. At the same time, banks held a large supply of loans from previous LBO funding commitments, which further pressured the market. In addition, as the Fed cut short-term interest rates in an effort to boost the economy, bank loan yields fell. As loan prices fell, some investors that employed leverage to purchase loans were forced to unload some of their positions, putting yet more pressure on the market. Largely as a result, average secondary loan prices fell to a period low in February before rebounding and stabilizing at higher levels as investors found value at the lower levels.

At period-end, the market seemed to be pricing in a default rate that would be worse than the last down cycle of 2001-2002. However, the 1.7% default rate at the end of March was below the historical average, and companies within our bank loan portfolio performed adequately. (3) With spreads above previous levels and bid prices close to historical lows, we found what we believed were attractive long-term investment opportunities in light of valuations that were attractive on a historical basis and relative to high yield corporate bonds.

Over the Fund's fiscal year, agency mortgage-backed securities generally outperformed the Fund's other primary investment sectors. Within an environment of increased volatility and uncertainty, the overall mortgage-backed securities market performed relatively well. As spreads in many fixed income sectors widened relative to Treasuries, markets experienced a flight to quality that benefited GNMA, FNMA and FHLMC securities due to their government backing or sponsorship. On the other hand, securities from privately issued companies, as well as some other asset-backed securities, tended to generate lower returns. With tightening credit standards and slowing housing and refinancing activity during the period, prepayments declined across all coupons and program types.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

Consistent with our strategy, we increased the Fund's allocation to higher coupon mortgage-backed securities and found investment opportunities in those sectors that experienced widening yield spreads and were hampered by relatively low liquidity.

1. Figures are for common shares. As of March 31, 2008, the Trust had leverage in the amount of 35.58% of the Trust's total assets. The Trust employs leverage through the issuance of Auction Preferred Shares. The use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares). The cost of leverage rises and falls with changes in short-term interest rates. Such increases/decreases in the cost of the Trust's leverage may be offset by increased/decreased income from the Trust's floating rate investments.
2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated.

Dividend Reinvestment Plan

The Fund's Dividend Reinvestment Plan (Plan) offers you a prompt and simple way to reinvest dividends and capital gain distributions (Distributions) in shares of the Fund. PFPC, Inc. (Agent), P.O. Box 43027, Providence, RI 02940-3027, will act as your Agent in administering the Plan. The Agent will open an account for you under the Plan in the same name as your outstanding shares are registered. The complete Terms and Conditions of the Dividend Reinvestment Plan are contained in the Fund's Dividend Reinvestment Plan Brochure. A copy of that Brochure may be obtained from the Fund at the address on the back cover of this report.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

You are automatically enrolled in the Plan unless you elect to receive Distributions in cash. If you own shares in your own name, you should notify the Agent, in writing, if you wish to receive Distributions in cash.

If the Fund declares a Distribution, you, as a participant in the Plan, will automatically receive an equivalent amount of shares of the Fund purchased on your behalf by the Agent.

If on the payment date for a Distribution, the net asset value per share is equal to or less than the market price per share plus estimated brokerage commissions, the Agent shall receive newly issued shares, including fractions, from the Fund for your account. The number of additional shares to be credited shall be determined by dividing the dollar amount of the Distribution by the greater of the net asset value per share on the payment date, or 95% of the then current market price per share.

If the net asset value per share exceeds the market price plus estimated brokerage commissions on the payment date for a Distribution, the Agent (or a broker-dealer selected by the Agent) shall try, for a purchase period of 30 days, to apply the amount of such Distribution on your shares (less your pro rata share of brokerage commissions incurred) to purchase shares on the open market. The weighted average price (including brokerage commissions) of all shares it purchases shall be your allocated price per share. If, before the Agent has completed its purchases, the market price plus estimated brokerage commissions exceeds the net asset value of the shares as of the payment date, the purchase price the Agent paid may exceed the net asset value of the shares, resulting in the acquisition of fewer shares than if such Distribution had been paid in shares issued by the Fund. Participants should note that they will not be able to instruct the Agent to purchase shares at a specific time or at a specific price. The Agent may make open-market purchases on any securities exchange where shares are traded, in the over-the-counter market or in negotiated transactions, and may be on such terms as to price, delivery and otherwise as the Agent shall determine.

9 | Annual Report

The market price of shares on a particular date shall be the last sales price on the American Stock Exchange, or, if there is no sale on the exchange on that date, then the mean between the closing bid and asked quotations on the exchange on such date. The net asset value per share on a particular date shall be the amount most recently calculated by or on behalf of the Fund as required by law.

The Agent shall at all times act in good faith and agree to use its best efforts within reasonable limits to ensure the accuracy of all services performed under this agreement and to comply with applicable law, but assumes no responsibility and shall not be liable for loss or damage due to errors unless such error is caused by the Agent's negligence, bad faith, or willful misconduct or that of its employees. Your uninvested funds held by the Agent will not bear interest. The Agent shall have no responsibility for the value of shares acquired. For the purpose of cash investments, the Agent may commingle your funds with those of other participants in the same Fund.

There is no direct charge to participants for reinvesting Distributions, since the Agent's fees are paid by the Fund. However, when shares are purchased in the open market, each participant will pay a pro rata portion of any brokerage commissions incurred. If you elect by notice to the Agent to have it sell part or all of your shares and remit the proceeds, the Agent will deduct brokerage commissions from the proceeds.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

The automatic reinvestment of Distributions does not relieve you of any taxes that may be payable on Distributions. In connection with the reinvestment of Distributions, shareholders generally will be treated as having received a Distribution equal to the cash Distribution that would have been paid.

The Agent will forward to you any proxy solicitation material and will vote any shares so held for you first in accordance with the instructions set forth on proxies you return to the Fund, and then with respect to any proxies you do not return to the Fund in the same portion as the Agent votes proxies the participants return to the Fund.

As long as you participate in the Plan, the Agent will hold the shares it has acquired for you in safekeeping, in its name or in the name of its nominee. This convenience provides added protection against loss, theft or inadvertent destruction of certificates. However, you may request that a certificate representing your Plan shares be issued to you. Upon your written request, the Agent will deliver to you, without charge, a certificate or certificates for the full shares. The Agent will send you a confirmation of each acquisition made for your account as soon as practicable, but not later than 60 days after the acquisition date. Although from time to time you may have an undivided fractional interest in a share of the Fund, no certificates for a fractional share

10 | Annual Report

will be issued. Distributions on fractional shares will be credited to your account. If you terminate your account under the Plan, the Agent will adjust for any such undivided fractional interest in cash at the market value of shares at the time of termination.

You may withdraw from the Plan at any time, without penalty, by notifying the Agent in writing at the address above or by telephone at 1-800/331-1710. Such termination will be effective with respect to a Distribution if the Agent receives your notice prior to the Distribution record date. The Agent or the Fund may terminate the Plan upon notice to you in writing mailed at least 30 days prior to any record date for the payment of any Distribution. Upon any termination, the Agent will issue, without charge, stock certificates for all full shares you own and will convert any fractional shares you hold at the time of termination to cash at current market price and send you a check for the proceeds.

The Fund or the Agent may amend the Plan. You will receive written notice at least 30 days before the effective date of any amendment.

NOTES TO FINANCIAL STATEMENTS

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Franklin Templeton Limited Duration Income Trust (Fund) is registered under the Investment Company Act of 1940, as amended, (1940 Act) as a diversified, closed-end investment company.

The following summarizes the Fund's significant accounting policies.

A. SECURITY VALUATION

Securities listed on a securities exchange or on the NASDAQ National Market System are valued at the last quoted sale price or the official closing price of the day, respectively. Over-the-counter securities and listed securities for which there is no reported sale are valued within the range of the most recent quoted bid and ask prices. Securities that trade in multiple markets or on multiple exchanges are valued according to the broadest and most representative market. Investments in open-end mutual funds are valued at the closing net asset value.

Corporate debt securities, government securities, mortgage pass-through securities, other mortgage-backed securities, and asset-backed securities generally trade in the over-the-counter market rather than on a securities exchange. The Fund may utilize independent pricing services, quotations from bond dealers, and information with respect to bond and note transactions, to assist in determining a current market value for each security. The Fund's pricing services may use valuation models or matrix pricing which considers information with respect to comparable bond and note transactions, quotations from bond dealers, or by reference to other securities that are considered comparable in such characteristics as rating, interest rate and maturity date, option adjusted spread models, prepayment projections, interest rate spreads and yield curves, to determine current value.

Senior secured corporate loans with floating or variable interest rates generally trade in the over-the-counter market rather than on a securities exchange. The Fund may utilize independent pricing services, quotations from loan dealers and other financial institutions, and information with respect to bond and note transactions, to assist in determining a current market value for each security. The Fund's pricing services use independent market quotations from loan dealers or financial institutions and may incorporate valuation methodologies that consider multiple bond characteristics such as dealer quotes,

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

issuer type, coupon, maturity, weighted average maturity, interest rate spreads and yield curves, cash flow and credit risk/quality analysis, to determine current value.

Foreign securities are valued as of the close of trading on the foreign stock exchange on which the security is primarily traded, or the NYSE, whichever is earlier. If no sale is reported at that time, the foreign security will be valued within the range of the most recent quoted bid and ask prices. The value is then converted into its U.S. dollar equivalent at the foreign exchange rate in effect at the close of the NYSE on the day that the value of the foreign security is determined.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

A. SECURITY VALUATION (CONTINUED)

The Fund has procedures to determine the fair value of individual securities and other assets for which market prices are not readily available or which may not be reliably priced. Methods for valuing these securities may include: fundamental analysis, matrix pricing, discounts from market prices of similar securities, or discounts applied due to the nature and duration of restrictions on the disposition of the securities. Due to the inherent uncertainty of valuations of such securities, the fair values may differ significantly from the values that would have been used had a ready market for such investments existed. Occasionally, events occur between the time at which trading in a security is completed and the close of the NYSE that might call into question the availability (including the reliability) of the value of a portfolio security held by the Fund. If such an event occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services. All security valuation procedures are approved by the Fund's Board of Trustees.

B. FOREIGN CURRENCY TRANSLATION

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Occasionally, events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Fund's Board of Trustees.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments on the Statement of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar

equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

C. SECURITIES PURCHASED ON A WHEN-ISSUED OR DELAYED DELIVERY BASIS

The Fund may purchase securities on a when-issued or delayed delivery basis, with payment and delivery scheduled for a future date. These transactions are subject to market fluctuations and are subject to the risk that the value at delivery may be more or less than the trade date purchase price. Although the Fund will generally purchase these securities with the intention of holding the securities, it may sell the securities before the settlement date. Sufficient assets have been segregated for these securities.

28 | Annual Report

Franklin Templeton
Limited Duration Income Trust

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

D. FOREIGN CURRENCY CONTRACTS

When the Fund purchases or sells foreign securities it may enter into foreign exchange contracts to minimize foreign exchange risk from the trade date to the settlement date of the transactions. A foreign exchange contract is an agreement between two parties to exchange different currencies at an agreed upon exchange rate at a future date. Realized and unrealized gains and losses on these contracts are included in the Statement of Operations.

The Fund may also enter into forward exchange contracts to hedge against fluctuations in foreign exchange rates or to gain exposure to certain foreign currencies. These contracts are valued daily by the Fund and the unrealized gains or losses on the contracts, as measured by the difference between the contractual forward foreign exchange rates and the forward rates at the reporting date, are included in the Statement of Assets and Liabilities. Realized and unrealized gains and losses on these contracts are included in the Statement of Operations.

The risks of these contracts include movement in the values of the foreign currencies relative to the U.S. dollar and the possible inability of the counterparties to fulfill their obligations under the contracts, which may be in excess of the amount reflected in the Statement of Assets and Liabilities.

E. MORTGAGE DOLLAR ROLLS

The Fund enters into mortgage dollar rolls, typically on a to-be-announced (TBA) basis. Mortgage dollar rolls are agreements between the fund and a financial institution to simultaneously sell and repurchase mortgage-backed securities at a future date. Gains or losses are realized on the initial sale, and the difference between the repurchase price and the sale price is recorded as an unrealized gain or loss to the fund upon entering into the mortgage dollar roll. In addition, the Fund may earn interest on the cash proceeds that are received from the initial sale. During the period between the sale and repurchase, the Fund is not entitled to principal and interest paid on the mortgage backed securities. The risks of mortgage dollar roll transactions include the potential inability of the counterparty to fulfill its obligations.

F. SENIOR FLOATING RATE INTERESTS

Senior secured corporate loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. These base lending rates are generally the prime rate offered by a designated U.S. bank or the London InterBank Offered Rate (LIBOR). Senior secured corporate loans often require prepayment of principal from excess cash flows or at the discretion of the borrower. As a result, actual maturity may be substantially less than the stated maturity.

Senior secured corporate loans in which the Fund invests are generally readily marketable, but may be subject to some restrictions on resale.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

G. INCOME TAXES

No provision has been made for U.S. income taxes because it is the Fund's policy to qualify as a regulated investment company under the Internal Revenue Code and to distribute to shareholders substantially all of its taxable income and net realized gains.

Foreign securities held by the Fund may be subject to foreign taxation on dividend and interest income received. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Fund invests.

The Fund has reviewed the tax positions, taken on federal income tax returns, for each of the three open tax years and as of March 31, 2008, and has determined that no provision for income tax is required in the Fund's financial statements.

H. SECURITY TRANSACTIONS, INVESTMENT INCOME, EXPENSES AND DISTRIBUTIONS

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income and estimated expenses are accrued daily. Amortization of premium and accretion of discount on debt securities are included in interest income. Facility fees are recognized as income over the expected term of the loan. Dividend income is recorded on the ex-dividend date. Distributions to common shareholders are recorded on the ex-dividend date and are determined according to income tax regulations (tax basis). Distributable earnings determined on a tax basis may differ from earnings recorded in accordance with accounting principles generally accepted in the United States of America. These differences may be permanent or temporary. Permanent differences are reclassified among capital accounts to reflect their tax character. These reclassifications have no impact on net assets or the results of operations. Temporary differences are not reclassified, as they may reverse in subsequent periods.

I. ACCOUNTING ESTIMATES

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

J. GUARANTEES AND INDEMNIFICATIONS

Under Franklin Templeton Limited Duration Income Trust's (Trust) organizational documents, its officers and trustees are indemnified by the Trust against certain liabilities arising out of the performance of their duties to the Trust. Additionally, in the normal course of business, the Trust enters into contracts with service providers that contain general indemnification clauses. The Trust's maximum exposure under these arrangements is unknown as this would involve future

claims that may be made against the Trust that have not yet occurred. Currently, the Trust expects the risk of loss to be remote.

2. SHARES OF BENEFICIAL INTEREST

At March 31, 2008, there were 28,290,000 common shares authorized (without par value). During the year ended March 31, 2008, there were 34,261 shares issued for \$490,071 from reinvested distributions. During the year ended March 31, 2007, there were no shares issued; all reinvested distributions were satisfied with previously issued shares purchased in the open market.

3. AUCTION RATE PREFERRED SHARES

On November 7, 2003 the Fund issued 2,534 Preferred Shares Series M, 2,533 Preferred Shares Series W and 2,533 Preferred Shares Series F, each with a \$25,000 liquidation preference per share totaling \$190,000,000. Dividends to preferred shareholders are cumulative and are declared weekly, at rates established through an auction process. During the year ended March 31, 2008, the dividends on Preferred Shares ranged from 3.65% to 6.15%. The weekly auctions for Series M, W and F have failed since February 13, 2008; consequently, the dividend rate paid on the preferred shares has moved to the maximum rate as defined in the prospectus.

The Fund is required to maintain, on a weekly basis, a specified discounted value of its portfolio in compliance with guidelines established by Fitch Ratings and Moody's Investor Services Inc., and is required to maintain asset coverage for the Preferred Shares of at least 200%.

The Preferred Shares are redeemable by the Fund at any time and are subject to mandatory redemption if the asset coverage or discounted value requirements are not met. During the year ended March 31, 2008, all requirements were met.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

4. TRANSACTIONS WITH AFFILIATES (CONTINUED)

The Fund pays an investment management fee and administrative fee to Advisers and FT Services of 0.50% and 0.20%, respectively, per year of the average daily managed assets. Managed assets are defined as the Fund's gross asset value minus the sum of accrued liabilities, other than the liquidation value of the preferred shares and other financial leverage.

5. EXPENSE OFFSET ARRANGEMENT

The Fund has entered into an arrangement with its custodian whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the Fund's custodian expenses. During the year ended March 31, 2008, the custodian fees were reduced as noted in the Statement of Operations.

6. INCOME TAXES

For tax purposes, capital losses may be carried over to offset future capital gains, if any. At March 31, 2008, the capital loss carryforwards were as follows:

Capital loss carryforwards expiring in:	
2014	\$ 601,751
2015	895,576
2016	703,562

	\$ 2,200,889
	=====

For tax purposes, realized capital losses occurring subsequent to October 31, may be deferred and treated as occurring on the first day of the following fiscal year. At March 31, 2008, the Fund deferred realized capital losses of \$4,369,429.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

The tax character of distributions paid during the years ended March 31, 2008 and 2007, was as follows:

	2008 -----	2007 -----
Distributions paid from ordinary income	\$ 36,767,993	\$ 37,007,176

At March 31, 2008, the cost of investments, net unrealized appreciation (depreciation) and undistributed ordinary income for income tax purposes were as follows:

Cost of investments	\$ 557,938,270 =====
Unrealized appreciation	\$ 4,345,897
Unrealized depreciation	(32,918,792) -----

6. INCOME TAXES (CONTINUED)

Net investment income differs for financial statement and tax purposes primarily due to differing treatments of foreign currency transactions, mortgage dollar rolls, paydown losses, payments-in-kind, and bond discounts and premiums.

Net realized gains (losses) differ for financial statement and tax purposes primarily due to differing treatments of wash sales, foreign currency transactions, mortgage dollar rolls, paydown losses, and bond discounts and premiums.

7. INVESTMENT TRANSACTIONS

Purchases and sales of investments (excluding short term securities) for the year ended March 31, 2008, aggregated \$259,419,990 and \$258,945,374, respectively.

8. INVESTMENTS IN FRANKLIN INSTITUTIONAL FIDUCIARY TRUST MONEY MARKET PORTFOLIO

The Fund may invest in the Franklin Institutional Fiduciary Trust Money Market Portfolio (Sweep Money Fund), an open-end investment company managed by Advisers. Management fees paid by the Fund are reduced on assets invested in the Sweep Money Fund, in an amount not to exceed the management and administrative fees paid by the Sweep Money Fund.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

10. CREDIT RISK

The Fund has 62.10% of its portfolio invested in high yield, senior secured floating rate notes, or other securities rated below investment grade. These securities may be more sensitive to economic conditions causing greater price volatility and are potentially subject to a greater risk of loss due to default than higher rated securities.

11. UNFUNDED LOAN COMMITMENTS

The Fund may enter into certain credit agreements, all or a portion of which may be unfunded. The Fund is obligated to fund these loan commitments at the borrowers' discretion. Funded portions of credit agreements are presented on the Statement of Investments.

At March 31, 2008, unfunded commitments were as follows:

BORROWER	UNFUNDED COMMITMENT
-----	-----
Bausch and Lomb Inc., Delayed Draw Term Loan	\$ 70,000

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

Community Health Systems Inc., Delayed Draw Term Loan	125,290
Laureate Education Inc., Delayed Draw Term Loan	348,387
Univision Communications Inc., Delayed Draw Term Loan	93,960
	\$ 637,637

Unfunded loan commitments and funded portions of credit agreements are marked to market daily and any unrealized gain or loss is included in the Statement of Assets and Liabilities and Statement of Operations.

12. REGULATORY AND LITIGATION MATTERS

As part of various investigations by a number of federal, state, and foreign regulators and governmental entities, including the U.S. Securities and Exchange Commission (SEC), relating to certain practices in the mutual fund industry, including late trading, market timing and marketing support payments to securities dealers who sell fund shares (marketing support), Franklin Resources, Inc. and certain of its subsidiaries (collectively, the Company), entered into settlements with certain of those regulators and governmental entities. Specifically, the Company entered into settlements with the SEC, among others, concerning market timing and marketing support.

On May 9, 2008, the SEC approved a final plan of distribution for the Company's market timing settlement. Disbursements of settlement monies will be made promptly to individuals who were shareholders of the designated funds during the relevant period, in accordance with the terms and conditions of the settlement and plan.

12. REGULATORY AND LITIGATION MATTERS (CONTINUED)

In addition, the Company, as well as most of the mutual funds within Franklin Templeton Investments and certain current or former officers, Company directors, fund directors, and employees, have been named in private lawsuits (styled as shareholder class actions, or as derivative actions on behalf of either the named funds or Franklin Resources, Inc.). The lawsuits relate to the industry practices referenced above.

The Company and fund management believe that the claims made in each of the private lawsuits referenced above are without merit and intend to defend against them vigorously. The Company cannot predict with certainty the eventual outcome of these lawsuits, nor whether they will have a material negative impact on the Company. If it is determined that the Company bears responsibility for any unlawful or inappropriate conduct that caused losses to the Funds, it is committed to making the Funds or their shareholders whole, as appropriate.

13. NEW ACCOUNTING PRONOUNCEMENTS

In September 2006, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 157, "Fair Value Measurement" (SFAS 157), which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. SFAS 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Fund believes the adoption of SFAS 157 will have no material impact on its financial

statements.

In March 2008, FASB issued FASB Statement No. 161, "Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133" (SFAS 161), which expands disclosures about derivative investments and hedging activities. SFAS 161 is effective for fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. The Fund is currently evaluating the impact, if any, of applying the various provisions of SFAS 161.

14. SUBSEQUENT EVENT

On May 20, 2008, the Fund's Board of Trustees approved a plan to redeem \$100,000,000 of the Fund's auction rate preferred shares, to be funded through the use of mortgage dollar rolls. The partial redemption will be offered on a pro rata basis across the three series of preferred shares and is anticipated to be completed in June 2008.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

TO THE BOARD OF TRUSTEES AND SHAREHOLDERS OF FRANKLIN TEMPLETON LIMITED DURATION INCOME TRUST

In our opinion, the accompanying statement of assets and liabilities, including the statement of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Franklin Templeton Limited Duration Income Trust (the "Fund") at March 31, 2008, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at March 31, 2008 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

BOARD REVIEW OF INVESTMENT MANAGEMENT AGREEMENT

At a meeting held February 25, 2008, the Board of Trustees (Board), including a majority of non-interested or independent Trustees, approved renewal of the investment management agreement for Franklin Templeton Limited Duration Income Trust (Fund). In reaching this decision, the Board took into account information furnished throughout the year at regular Board meetings, as well as information prepared specifically in connection with the annual renewal review process. Information furnished and discussed throughout the year included investment performance reports on the Fund, information on its share price discount to net asset value, and other related financial information, as well as periodic reports on legal, compliance, pricing, brokerage commissions and execution and

other services provided by the Investment Manager (Manager) and its affiliates. Information furnished specifically in connection with the renewal process included a report prepared by Lipper, Inc. (Lipper), an independent organization, as well as a Fund profitability analysis report prepared by management. The Lipper report compared the Fund's investment performance and expenses with those of other funds deemed comparable to the Fund as selected by Lipper. The Fund profitability analysis report discussed the profitability to Franklin Templeton Investments from its overall U.S. fund operations, as well as on an individual fund-by-fund basis. Included with such profitability analysis report was information on a fund-by-fund basis listing portfolio managers and other accounts they manage, as well as information on management fees charged by the Manager and its affiliates including management's explanation of differences where relevant, and a three-year expense analysis with an explanation for any increase in expense ratios. Additional material accompanying such report was a memorandum prepared by management describing project initiatives and capital investments relating to the services provided to the Fund by the Franklin Templeton Investments organization, as well as a memorandum relating to economies of scale.

In considering such materials, the independent Trustees received assistance and advice from and met separately with independent counsel. In approving continuance of the investment management agreement for the Fund, the Board, including a majority of independent Trustees, determined that the existing management fee structure was fair and reasonable and that continuance of the investment management agreement was in the best interests of the Fund and its shareholders. While attention was given to all information furnished, the following discusses some primary factors relevant to the Board's decision.

NATURE, EXTENT AND QUALITY OF SERVICE. The Board was satisfied with the nature and quality of the overall services provided by the Manager and its affiliates to the Fund and its shareholders. In addition to investment performance and expenses discussed later, the Board's opinion was based, in part, upon periodic reports furnished them showing that the investment policies and restrictions for the Fund were consistently complied with as well as other reports periodically furnished the Board covering matters such as the compliance of portfolio managers and other management personnel with the code of ethics adopted throughout the Franklin Templeton fund

BOARD REVIEW OF INVESTMENT MANAGEMENT AGREEMENT (CONTINUED)

complex, the adherence to fair value pricing procedures established by the Board, and the accuracy of net asset value calculations. Favorable consideration was given to management's efforts and expenditures in establishing back-up systems and recovery procedures to function in the event of a natural disaster, it being noted by the Board that such systems and procedures had functioned smoothly during the Florida hurricanes and blackouts experienced in recent years. Among other factors taken into account by the Board were the Manager's best execution trading policies, including a favorable report by an independent portfolio trading analytical firm. Consideration was also given to the experience of the Fund's portfolio management team, the number of accounts managed and general method of compensation. In this latter respect, the Board noted that a primary factor in management's determination of the level of a portfolio manager's bonus compensation was the relative investment performance

of the funds he or she managed and that a portion of such bonus was required to be invested in a predesignated list of funds within such person's fund management area so as to be aligned with the interests of Fund shareholders.

INVESTMENT PERFORMANCE. The Board placed significant emphasis on the investment performance of the Fund in view of its importance to shareholders. While consideration was given to performance reports and discussions with portfolio managers at Board meetings during the year, particular attention in assessing performance was given to the Lipper report furnished for the agreement renewals. The Lipper report prepared for the Fund showed its investment performance in comparison with a performance universe consisting of the Fund and six other leveraged closed-end BBB-rated corporate debt funds as selected by Lipper during 2007, 2006, 2005 and 2004, being the Fund's first four full years of operation. Such report considers both income return and total return on a net asset value basis without regard to market discounts or premiums to accurately reflect investment performance. The Lipper report showed the Fund's 2007 income return was above the median of such performance universe and on an annualized basis was at the median of such universe for the four-year period ended December 31, 2007. The Lipper report showed the Fund's 2007 total return was the second-lowest in such performance universe, but on an annualized basis was within three basis points of the median of such universe for the four-year period ended December 31, 2007. The Board felt such performance was acceptable in view of the Fund's investment mandate to invest in securities with limited interest rate sensitivities with at least 50 percent of its assets being invested in high yield corporate bonds and corporate bank loans.

COMPARATIVE EXPENSES. Consideration was given to a comparative analysis of the management fees and total expense ratios of the Fund compared with a Lipper expense group consisting of the Fund and four other leveraged closed-end BBB-rated corporate debt funds as selected by Lipper. Prior to making such comparison, the Board relied upon a survey showing that the scope of services covered under the Fund's investment management agreement was similar to those provided by fund managers to other fund groups. In reviewing comparative costs, emphasis was

Franklin Templeton
Limited Duration Income Trust

BOARD REVIEW OF INVESTMENT MANAGEMENT AGREEMENT (CONTINUED)

given to the Fund's contractual investment management fee rate in comparison with the contractual investment management fee that would have been charged by other funds within its Lipper expense group assuming they were similar in size to the Fund, as well as the actual total expense ratio of the Fund in comparison with those of its Lipper expense group. The Lipper contractual investment management fee analysis includes administrative charges as being part of contractual investment management fees. The results of such expense comparisons showed that the Fund's contractual investment management fee rate and total expense ratios were both the second highest in its Lipper expense group, but that the Fund's contractual investment management expense ratio was within 10 basis points of the Lipper expense group median, and its total expense ratio was less than half a basis point above its Lipper expense group median. The Board found such expenses to be acceptable.

MANAGEMENT PROFITABILITY. The Board also considered the level of profits realized by the Manager and its affiliates in connection with the operation of

the Fund. In this respect, the Board reviewed the Fund profitability analysis that addresses the overall profitability of Franklin Templeton's U.S. fund business, as well as its profits in providing management and other services to the Fund. Specific attention was given to the methodology followed in allocating costs to the Fund, it being recognized that allocation methodologies are inherently subjective and various allocation methodologies may each be reasonable while producing different results. In this respect, the Board noted that, while being continuously refined and reflecting changes in the Manager's own cost accounting, such cost allocation methodology was consistent with that followed in profitability report presentations made in prior years and that the Fund's independent registered public accounting firm had been engaged by the Manager to perform certain procedures on a biennial basis, specified and approved by the Manager and the Fund's Board solely for their purposes and use in reference to the profitability analysis. In reviewing and discussing such analysis, management discussed with the Board its belief that costs incurred in establishing the infrastructure necessary for the type of fund operations conducted by the Manager and its affiliates may not be fully reflected in the expenses allocated to each Fund in determining its profitability, as well as the fact that the level of profits, to a certain extent, reflected operational cost savings and efficiencies initiated by management. In addition, the Board considered a third-party study comparing the profitability of the Manager's parent on an overall basis as compared to other publicly held managers broken down to show profitability from management operations exclusive of distribution expenses, as well as profitability including distribution expenses. The Board also considered the extent to which the Manager and its affiliates might derive ancillary benefits from fund operations, as well as potential benefits resulting from allocation of fund brokerage and the use of "soft" commission dollars to pay for research. Based upon its consideration of all these factors, the Board determined that the level of profits realized by the Manager and its affiliates from providing services to the Fund was not excessive in view of the nature, quality and extent of services provided.

BOARD REVIEW OF INVESTMENT MANAGEMENT AGREEMENT (CONTINUED)

ECONOMIES OF SCALE. The Board also considered whether the Manager realizes economies of scale as the Fund grows larger and the extent to which any such benefit is shared with the Fund and its shareholders. The Board believed that a manager's ability to realize economies of scale and the sharing of such benefit is a more relevant consideration in the case of an open-end fund whose size increases as a result of the continuous sale of its shares. A closed-end investment company such as the Fund does not continuously offer shares, and growth following its initial public offering will primarily result from market appreciation, which benefits its shareholders. While believing economies of scale to be less of a factor in the context of a closed-end fund, the Board believes at some point an increase in size may lead to economies of scale that should be shared with the Fund and its shareholders and intends to monitor future growth of the Fund accordingly.

PROXY VOTING POLICIES AND PROCEDURES

The Fund has established Proxy Voting Policies and Procedures (Policies) that the Fund uses to determine how to vote proxies relating to portfolio securities. Shareholders may view the Fund's complete Policies online at

Members of the Audit Committee are: Robert F. Carlson, Frank W.T. LaHaye, Frank A. Olson and John B. Wilson.

ITEM 6. SCHEDULE OF INVESTMENTS. N/A

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

The board of trustees of the Fund has delegated the authority to vote proxies related to the portfolio securities held by the Fund to the Fund's manager Franklin Advisers, Inc. in accordance with the Proxy Voting Policies and Procedures (Policies) adopted by the manager.

The manager has delegated its administrative duties with respect to the voting of proxies to the Proxy Group within Franklin Templeton Companies, LLC (Proxy Group), an affiliate and wholly owned subsidiary of Franklin Resources, Inc. All proxies received by the Proxy Group will be voted based upon the manager's instructions and/or policies.

To assist it in analyzing proxies, the manager subscribes to RiskMetrics Group (RiskMetrics), an unaffiliated third party corporate governance research service that provides in-depth analyses of shareholder meeting agendas, vote recommendations, recordkeeping and vote disclosure services. In addition, the manager subscribes to Glass, Lewis & Co., LLC (Glass Lewis), an unaffiliated third party analytical research firm, to receive analyses and vote recommendations on the shareholder meetings of publicly held U.S. companies. Although RiskMetrics' and/or Glass Lewis' analyses are thoroughly reviewed and considered in making a final voting decision, the manager does not consider recommendations from RiskMetrics, Glass Lewis or any other third party to be determinative of the manager's ultimate decision. The manager votes proxies solely in the interests of the Fund and its shareholders. As a matter of policy, the officers, directors/trustees and employees of the Fund, the manager and the Proxy Group will not be influenced by outside sources whose interests conflict with the interests of the Fund and its shareholders. Efforts are made to resolve all conflicts in the interests of the manager's clients. Material conflicts of interest are identified by the Proxy Group based upon analyses of client, broker and vendor lists, information periodically gathered from directors and officers, and information derived from other sources, including public filings. In situations where a material conflict of interest is identified, the Proxy Group may defer to the voting recommendation of RiskMetrics, Glass Lewis or those of another independent third party provider of proxy services; or send the proxy directly to the Fund with a recommendation regarding the vote for approval. If the conflict is not resolved by the Fund, the Proxy Group may refer the matter, along with the recommended course of action by the manager to an interdepartmental Proxy Review Committee (which may include portfolio managers and/or research analysts employed by the manager), for evaluation and voting

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

instructions. The Proxy Review Committee may defer to the voting recommendation of RiskMetrics, Glass Lewis or those of another independent third party provider of proxy services; or send the proxy directly to the Fund. Where the Proxy Group or the Proxy Review Committee refers a matter to the Fund, it may rely upon the instructions of a representative of the Fund, such as the board of trustees or a committee of the board.

Where a material conflict of interest has been identified, but the items on which the manager's vote recommendations differ from Glass Lewis, RiskMetrics, or another independent third party provider of proxy services relate specifically to (1) shareholder proposals regarding social or environmental issues or political contributions, (2) "Other Business" without describing the matters that might be considered, or (3) items the manager wishes to vote in opposition to the recommendations of an issuer's management, the Proxy Group may defer to the vote recommendations of the manager rather than sending the proxy directly to the Fund for approval.

To avoid certain potential conflicts of interest, the manager will employ echo voting, if possible, in the following instances: (1) when the Fund invests in an underlying fund in reliance on Sections 12(d)(1) of the 1940 Act, or pursuant to an SEC exemptive order; (2) when the Fund invests uninvested cash in affiliated money market funds pursuant to an SEC exemptive order ("cash sweep arrangement"); or (3) when required pursuant to the Fund's governing documents or applicable law. Echo voting means that the investment manager will vote the shares in the same proportion as the vote of all of the other holders of the fund's shares.

The recommendation of management on any issue is a factor which the manager considers in determining how proxies should be voted, but is not determinative of the manager's ultimate decision. As a matter of practice, the votes with respect to most issues are cast in accordance with the position of the company's management. Each issue, however, is considered on its own merits, and the manager will not support the position of the company's management in any situation where it deems that the ratification of management's position would adversely affect the investment merits of owning that company's shares.

MANAGER'S PROXY VOTING POLICIES AND PRINCIPLES The manager has adopted general proxy voting guidelines, which are summarized below. These guidelines are not an exhaustive list of all the issues that may arise and the manager cannot anticipate all future situations. In all cases, each proxy will be considered based on the relevant facts and circumstances.

BOARD OF DIRECTORS. The manager supports an independent board of directors, and prefers that key committees such as audit, nominating, and compensation committees be comprised of independent directors. The manager will generally vote against management efforts to classify a board and will generally support proposals to declassify the board of directors. The manager may withhold votes from directors who have attended less than 75% of meetings without a valid reason. While generally in favor of separating Chairman and CEO positions, the manager will review this issue as well as proposals to restore or provide for cumulative voting on a case-by-case basis, taking into consideration factors such as the company's corporate governance guidelines or provisions and performance.

RATIFICATION OF AUDITORS OF PORTFOLIO COMPANIES. In light of several high profile accounting scandals, the manager will closely scrutinize the role and performance of auditors. On a case-by-case basis, the manager will examine proposals relating to non-audit relationships and non-audit fees. The manager will also consider, on a case-by-case basis, proposals to rotate auditors, and will vote against the ratification of auditors when there is clear and compelling evidence of accounting irregularities or negligence.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

MANAGEMENT AND DIRECTOR COMPENSATION. A company's equity-based compensation plan should be in alignment with its shareholders' long-term interests. The manager believes that executive compensation should be directly linked to the performance of the company. The manager evaluates plans on a case-by-case basis by considering several factors to determine whether the plan is fair and reasonable, including the RiskMetrics quantitative model utilized to assess such plans and/or the Glass Lewis evaluation of the plans. The manager will generally oppose plans that have the potential to be excessively dilutive, and will almost always oppose plans that are structured to allow the repricing of underwater options, or plans that have an automatic share replenishment "evergreen" feature. The manager will generally support employee stock option plans in which the purchase price is at least 85% of fair market value, and when potential dilution is 10% or less.

Severance compensation arrangements will be reviewed on a case-by-case basis, although the manager will generally oppose "golden parachutes" that are considered to be excessive. The manager will normally support proposals that require a percentage of directors' compensation to be in the form of common stock, as it aligns their interests with those of shareholders. The manager will review on a case-by-case basis any shareholder proposals to adopt policies on expensing stock option plans.

ANTI-TAKEOVER MECHANISMS AND RELATED ISSUES. The manager generally opposes anti-takeover measures since they tend to reduce shareholder rights. On occasion, the manager may vote with management when the research analyst has concluded that the proposal is not onerous and would not harm the Fund or its shareholders' interests. The manager generally supports proposals that require shareholder rights' plans ("poison pills") to be subject to a shareholder vote and will closely evaluate such plans on a case-by-case basis to determine whether or not they warrant support. The manager will generally vote against any proposal to issue stock that has unequal or subordinate voting rights. The manager generally opposes any supermajority voting requirements as well as the payment of "greenmail." The manager generally supports "fair price" provisions and confidential voting.

CHANGES TO CAPITAL STRUCTURE. The manager will review, on a case-by-case basis, proposals by companies to increase authorized shares and the purpose for the increase and proposals seeking preemptive rights. The manager will generally not vote in favor of dual-class capital structures to increase the number of authorized shares where that class of stock would have superior voting rights. The manager will generally vote in favor of the issuance of preferred stock in cases where the company specifies the voting, dividend, conversion and other rights of such stock and the terms of the preferred stock issuance are deemed reasonable.

MERGERS AND CORPORATE RESTRUCTURING. Mergers and acquisitions will be subject to careful review by the research analyst to determine whether each will be beneficial to shareholders. The manager will analyze various economic and strategic factors in making the final decision on a merger or acquisition. Corporate restructuring and reincorporation proposals are also subject to a thorough examination on a case-by-case basis.

SOCIAL AND CORPORATE POLICY ISSUES. The manager will generally give management discretion with regard to social, environmental and ethical issues, although the manager may vote in favor of those that are believed to have significant economic benefits or implications for the Fund and its shareholders.

GLOBAL CORPORATE GOVERNANCE. Many of the tenets discussed above are applied to proxy voting decisions for international companies. However, the manager must be more flexible in these instances and must be mindful of the varied market practices of each region.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

The manager will attempt to process every proxy it receives for all domestic and foreign issuers. However, there may be situations in which the manager cannot process proxies, for example, where a meeting notice was received too late, or sell orders preclude the ability to vote. If a security is on loan, the manager may determine that it is not in the best interests of the Fund to recall the security for voting purposes. Also, the manager may abstain from voting under certain circumstances or vote against items such as "Other Business" when the manager is not given adequate information from the company.

Shareholders may view the complete Policies online at franklintempleton.com. Alternatively, shareholders may request copies of the Policies free of charge by calling the Proxy Group collect at 1-954/527-7678 or by sending a written request to: Franklin Templeton Companies, LLC, 500 East Broward Boulevard, Suite 1500, Fort Lauderdale, FL 33394, Attention: Proxy Group. Copies of the Fund's proxy voting records are available online at franklintempleton.com and posted on the SEC website at WWW.SEC.GOV. The proxy voting records are updated each year by August 31 to reflect the most recent 12-month period ended June 30.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

(a) (1) As of May 30, 2008 the portfolio managers of the Fund are as follows:

Roger Bayston, CFA, Richard Hsu, Christopher Molumphy, CFA and Eric G. Takaha, CFA, serve as the portfolio management team responsible for managing the Fund's portfolio investment. Each of them has experience managing Franklin mutual funds and private accounts.

Mr. Bayston has been a portfolio manager of the Fund since inception. He joined Franklin Templeton Investments in 1991.

Mr. Hsu has been a portfolio manager of the Fund since 2006. He joined Franklin Templeton Investments in 1996.

Mr. Molumphy has been a portfolio manager of the Fund since inception. He joined Franklin Templeton Investments in 1988.

Mr. Takaha has been a portfolio manager of the Fund since inception. He joined Franklin Templeton Investments in 1989.

(a) (2) This section reflects information about the portfolio managers as of the fiscal year ended March 31, 2008.

The following table shows the number of other accounts managed by each portfolio manager and the total assets in the accounts managed within each category:

NAME	NUMBER OF OTHER REGISTERED INVESTMENT COMPANIES MANAGED	ASSETS OF OTHER REGISTERED INVESTMENT COMPANIES MANAGED (x \$1 MILLION)	NUMBER OF OTHER POOLED INVESTMENT VEHICLES MANAGED/1	ASSETS OF OTHER POOLED INVESTMENTS VEHICLES MANAGED (X \$1 MILLION) /1	NUMBER OF OTHERS ACCOUNTS MANAGED/1

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

Roger Bayston	6	8,661.9	4	3,289.0	0
Richard Hsu	1	1,396.0	2	496.9	0
Christopher Molumphy	9	9,483.2	5	1,088.8	2
Eric G. Takaha	6	6,922.1	4	718.7	3

1. The various pooled investment vehicles and accounts listed are managed by a team of investment professionals. Accordingly, the individual manager listed would not be solely responsible for managing such listed amounts.

Portfolio managers that provide investment services to the Fund may also provide services to a variety of other investment products, including other funds, institutional accounts and private accounts. The advisory fees for some of such other products and accounts may be different than that charged to the Fund and may include performance based compensation. This may result in fees that are higher (or lower) than the advisory fees paid by the Fund. As a matter of policy, each fund or account is managed solely for the benefit of the beneficial owners thereof. As discussed below, the separation of the trading execution function from the portfolio management function and the application of objectively based trade allocation procedures help to mitigate potential conflicts of interest that may arise as a result of the portfolio managers managing accounts with different advisory fees.

CONFLICTS. The management of multiple funds, including the Fund, and accounts may also give rise to potential conflicts of interest if the funds and other accounts have different objectives, benchmarks, time horizons, and fees as the portfolio manager must allocate his or her time and investment ideas across multiple funds and accounts. The manager seeks to manage such competing interests for the time and attention of portfolio managers by having portfolio managers focus on a particular investment discipline. Most other accounts managed by a portfolio manager are managed using the same investment strategies that are used in connection with the management of the Fund. Accordingly, portfolio holdings, position sizes, and industry and sector exposures tend to be similar across similar portfolios, which may minimize the potential for conflicts of interest. The separate management of the trade execution and valuation functions from the portfolio management process also helps to reduce potential conflicts of interest. However, securities selected for funds or accounts other than the Fund may outperform the securities selected for the Fund. Moreover, if a portfolio manager identifies a limited investment opportunity that may be suitable for more than one fund or other account, the Fund may not be able to take full advantage of that opportunity due to an allocation of that opportunity across all eligible funds and other accounts. The manager seeks to manage such potential conflicts by using procedures intended to provide a fair allocation of buy and sell opportunities among funds and other accounts.

The structure of a portfolio manager's compensation may give rise to potential conflicts of interest. A portfolio manager's base pay and bonus tend to increase with additional and more complex responsibilities that include increased assets under management. As such, there may be an indirect relationship between a portfolio manager's marketing or sales efforts and his or her bonus.

Finally, the management of personal accounts by a portfolio manager may give rise to potential conflicts of interest. While the funds and the manager have adopted a code of ethics which they believe contains provisions reasonably necessary to prevent a wide range of prohibited activities by portfolio managers

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

and others with respect to their personal trading activities, there can be no assurance that the code of ethics addresses all individual conduct that could result in conflicts of interest.

The manager and the Fund have adopted certain compliance procedures that are designed to address these, and other, types of conflicts. However, there is no guarantee that such procedures will detect each and every situation where a conflict arises.

COMPENSATION. The manager seeks to maintain a compensation program that is competitively positioned to attract, retain and motivate top-quality investment professionals. Portfolio managers receive a base salary, a cash incentive bonus opportunity, an equity compensation opportunity, and a benefits package. Portfolio manager compensation is reviewed annually and the level of compensation is based on individual performance, the salary range for a portfolio manager's level of responsibility and Franklin Templeton guidelines. Portfolio managers are provided no financial incentive to favor one fund or account over another. Each portfolio manager's compensation consists of the following three elements:

BASE SALARY Each portfolio manager is paid a base salary.

ANNUAL BONUS Annual bonuses are structured to align the interests of the portfolio manager with those of the Fund's shareholders. Each portfolio manager is eligible to receive an annual bonus. Bonuses generally are split between cash (50% to 65%) and restricted shares of Franklin Resources stock (17.5% to 25%) and mutual fund shares (17.5% to 25%). The deferred equity-based compensation is intended to build a vested interest of the portfolio manager in the financial performance of both Franklin Resources and mutual funds advised by the manager. The bonus plan is intended to provide a competitive level of annual bonus compensation that is tied to the portfolio manager achieving consistently strong investment performance, which aligns the financial incentives of the portfolio manager and Fund shareholders. The Chief Investment Officer of the manager and/or other officers of the manager, with responsibility for the Fund, have discretion in the granting of annual bonuses to portfolio managers in accordance with Franklin Templeton guidelines. The following factors are generally used in determining bonuses under the plan:

- o INVESTMENT PERFORMANCE. Primary consideration is given to the historic investment performance over the 1, 3 and 5 preceding years of all accounts managed by the portfolio manager. The pre-tax performance of each fund managed is measured relative to a relevant peer group and/or applicable benchmark as appropriate.
- o NON-INVESTMENT PERFORMANCE. The more qualitative contributions of a portfolio manager to the manager's business and the investment management team, including professional knowledge, productivity, responsiveness to client needs and communication, are evaluated in determining the amount of any bonus award.
- o RESPONSIBILITIES. The characteristics and complexity of funds managed by the portfolio manager are factored in the manager's appraisal.

ADDITIONAL LONG-TERM EQUITY-BASED COMPENSATION Portfolio managers may also be awarded restricted shares or units of Franklin Resources stock or restricted shares or units of one or more mutual funds, and options to purchase common shares of Franklin Resources stock. Awards of such deferred equity-based compensation typically vest over time, so as to create incentives to retain key talent.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

Portfolio managers also participate in benefit plans and programs available generally to all employees of the manager.

OWNERSHIP OF FUND SHARES. The manager has a policy of encouraging portfolio managers to invest in the funds they manage. Exceptions arise when, for example, a fund is closed to new investors or when tax considerations or jurisdictional constraints cause such an investment to be inappropriate for the portfolio manager. The following is the dollar range of Fund shares beneficially owned by each portfolio manager as of March 31, 2008 (such amounts may change from time to time):

Portfolio Manager	Dollar Range of Fund Shares Beneficially Owned
Roger Bayston	None
Richard Hsu	None
Christopher Molumphy	None
Eric G. Takaha	None

ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS. N/A

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There have been no changes to the procedures by which shareholders may recommend nominees to the Registrant's Board of Trustees that would require disclosure herein.

ITEM 11. CONTROLS AND PROCEDURES.

(A) EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES. The Registrant maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Registrant's filings under the Securities Exchange Act of 1934 and the Investment Company Act of 1940 is recorded, processed, summarized and reported within the periods specified in the rules and forms of the Securities and Exchange Commission. Such information is accumulated and communicated to the Registrant's management, including its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. The Registrant's management, including the principal executive officer and the principal financial officer, recognizes that any set of controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Within 90 days prior to the filing date of this Shareholder Report on Form N-CSR, the Registrant had carried out an evaluation, under the supervision and with the participation of the Registrant's management, including the Registrant's principal executive officer and the Registrant's principal financial officer, of the effectiveness of the design and operation of the Registrant's disclosure controls and procedures. Based on such evaluation, the Registrant's principal executive officer and principal financial officer concluded that the Registrant's disclosure controls and procedures are effective.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

(B) CHANGES IN INTERNAL CONTROLS. There have been no significant changes in the Registrant's internal controls or in other factors that could significantly affect the internal controls subsequent to the date of their evaluation in connection with the preparation of this Shareholder Report on Form N-CSR.
