Portugal Telecom approves proposal to spin off PT Multimedia, to increase the proposed shareholder remuneration package to Euro 3.5 billion and to contribute Euro 1.0 billion into the pension funds

Lisbon, Portugal, 3 August 2006 - Portugal Telecom, SGPS, S.A. (Portugal Telecom or PT) announced today that it intends to spin off its 58.43% interest in its subsidiary PT Multimédia -Serviços de Telecomunicações e Multimedia, SGPS, S.A. (PTM or PT Multimedia) and to increase the shareholder remuneration package already announced for the 2006-2008 period from Euro 3.0 billion to Euro 3.5 billion, in addition to the distribution of PTM shares. The implementation of these proposals is subject to shareholder approval at an Extraordinary General Meeting (EGM) to be called for that purpose and these proposals will only be executed if the Sonaecom tender offer lapses or ceases.

After the technological and regulatory review of different alternatives to address the concerns regarding access network concentration, PT 's management has concluded that the separation of the networks through the implementation of an Access Service Division (as described in the report of the Board of Directors disclosed to the market and filed with the CMVM on 6 March 2006 and with the SEC on 7 March 2006) would be lengthy, complex from a legal standpoint and would carry significant costs. The separation of PT Multimedia can be executed in a shorter timeframe and with lower execution risk, creating at the same time an alternative operator to the PT Group with critical size in Portugal and the ability to expand internationally.

PT 's management has also concluded that the separation of PT Multimedia from Portugal Telecom should positively contribute to the development of the telecommunications market in Portugal, allowing the market to develop increasingly innovative and convergent services to consumers. The resulting market structure should provide regulatory relief for PT 's wireline business, giving it flexibility to offer more and better services to its customers, while PTM would be able to pursue its own competitive strategy, domestically and abroad. By allowing the management of each company to focus on its core competencies, PT believes that this strategy is more likely to create greater value for shareholders over time. The proposed separation also addresses the long-standing objectives of the Portuguese regulators.

As a result, the Board of Directors of Portugal Telecom approved today the distribution of PT 's stake in PTM to all PT shareholders by way of a dividend in kind. In the spin-off, PT shareholder are expected to receive 4 PTM shares for each 25 PT shares owned, which at PTM 's closing price on 2 August 2006 would be equivalent to Euro 1.47 per PT share.

Portugal Telecom also announced today that its Board of Directors has approved an increase in the remuneration package for the 2006-2008 period from the previously announced Euro 3.0 billion to Euro 3.5 billion (including the dividend already paid in May 2006 of Euro 536 million), consisting of an extraordinary cash return of Euro 1.9 billion, or Euro 1.75 per share, within the next 12 months and a commitment to continue to implement a progressive

dividend policy.

In addition, the Board of Directors of PT intends to reduce the expected funding period of the post retirement benefits deficit from 14 years to 6 years through a contribution of Euro 1.0 billion over the 2006-2008 period, upon achieving an improved labour relations framework.

The company does not expect the financing of the Euro 1.75 per share extraordinary dividend and the contribution to fund the retirement benefits to impair PT's ability to maintain the financial flexibility necessary to execute its strategic business plan. PT expects to maintain an investment-grade credit rating after the implementation of these initiatives.

The proposed initiatives are subject to market conditions and to the company's financial, accounting position and the approval at an EGM, subject to Sonaecom's offer lapsing or ceasing.

In summary, PT shareholders are expected to receive Euro 3.5 billion in cash plus PTM shares over the 2006-2008 period, including the dividends paid in 2006, and to continue to benefit from PT's leadership position in the telecommunications market in Portugal, Brazil and certain regions of Africa.

The Board of Directors of Portugal Telecom will initiate the process for submitting, in due time, to an Extraordinary General Meeting the proposed distribution of PTM shares, the contributions to fund the post retirement obligations and the extraordinary shareholder remuneration.

The Board of Portugal Telecom believes that the announced spin-off should promote increased regulatory flexibility and should benefit shareholders, consumers, create more employment and job opportunities and positively impact the Portuguese telecommunications market.

The Board of Portugal Telecom remains firmly committed to its duty of maximising the value of the company for the benefit of all of its stakeholders.
