### **New discovered in Xerelete Field**

(Rio de Janeiro, September 10, 2007). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA, BCBA: APBR/APBRA], a Brazilian international energy company, announces that it has declared the oil field denominated XERELETE, located in the southern portion of the Campos Basin, in the State of Rio de Janeiro, commercial to the National Petroleum Agency (NPA). This new field is located partially in the old BC-2 and partially in the BM-C-14, some 155 km Southeast of the city of Cabo Frio and 42 km East of the Papa Terra field.

Preliminary geological studies indicate the accumulation's total area may reach more than 26 km<sup>2</sup>, holding an estimated in-place volume of some 1.4 billion barrels of oil equivalent. Additional studies are being carried out to define this new field's production development project.

The Xerelete discoverer well, the 1-EPB-1-RJS, drilled at a water depth of 2,483 meters, reached sandy 17.5° API oil-bearing reservoirs at a depth of 3,478 meters. This accumulation's productivity was confirmed via delimitation well 3-RJS-648 (3-BRSA-481-RJS), where flows of up to 2500 barrels of oil per day were registered. A new world water depth record (2,460 m) was set at this well with the use of the Submerged Submarine Centrifugal Pump.

This accumulation was discovered in an area operated by PETROBRAS, in partnership with TOTAL and DEVON.

## FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
