**Press Release
August 18 2009**

Petrobras oil production in Brazil up 3.8% in July

Petrobras' average oil and gas production in Brazil, in July, topped out at 2,254,409 barrels of oil equivalent per day (boed), 2.7% more than a year ago (2,195,855 boed). The exclusive domestic field oil production, 1,937,583 barrels per day, was 3.8% higher than July 2008.

July's 11,000-barrel-per-day higher average volume was the outcome of production going back on line after scheduled shutdowns and of increased production at wells that are interconnected to the P-35 platform, in the Marlim field, and to the P-53 platform, in the Marlim Leste field, both in the Campos Basin.

Considering the fields in Brazil and abroad, the Company's total oil and natural gas production averaged 2,498,116 barrels of oil equivalent (boe) per day, a 3.2% spike compared to July 2008.

The volume of oil and natural gas coming from countries where Petrobras has operations reached 243,707 barrels of oil equivalent per day (boed), 8.5% more than a year earlier on account of production going on stream in the Nigerian fields of Agbami and Akpo.

Natural gas production in the domestic fields was 50.371 million cubic meters per day, the same as in July 2008.

The chart shows the July production, per state and country.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
