(**) retroactively adjusted due to systemic rereading.

- **Total accesses** increased by 6.4% over 4Q11, closing the quarter with 76,137 thousand accesses.
- **Market share** recorded a slight annual reduction by reaching 29.1% (-0.5 p.p. y-o-y). **In the post-paid market segment** Telefônica Brasil achieved 39% of net additions, and a market share of 36.9% (+0.03% y-o-y).
- Leadership in the market share of **data cards** with 47.2% of the market, due to Vivo's differentiated coverage nationwide in 3G and HSPA+.
- Telefônica Brasil ranked in second place in the **machine-to-machine market (M2M)** and recorded a 109% y-o-y increase in its customer base, reaching 1.2 million customers in 4Q12.
- In 4Q12 the **mobile net disconnections** reached 668 thousand accesses due to the change in the disconnection policy for prepaid customers as a result of a more restrictive policy that focuses company's profitability.
- In 2012, out of the net additions 59% were in postpaid plans, thus consolidating a better **customer mix**.

- **ARPU** reached R\$ 23.9, a growth of 7.9% over the previous quarter due to the revenue growth in the voice and data revenues. In the y-o-y comparison, there was a drop of 2.8% mainly due to the reduction in the interconnection rates. Excluding the mentioned regulatory impact, the ARPU would record a reduction of only 0.8% in the period.
- **Total traffic** grew by 19.7% over the same period of last year due to the increase of on-net local traffic and long distance. In 2012, traffic grew 18.0% when compared over 2011.
- The financial volume of **Recharges** presented again a strong growth in the quarter (+13.9% y-o-y), despite a growth of 3% in the prepaid customer base.

Net handset revenues	348.8	262.7	32.8	163.0	114.0	961.4	954.3	0.7

Note: In order to better reflect the performance of the integrated company, revenues are presented after *intercompany*. Additionally, the Mobile Net Revenue considers the allocation of long distance revenues per call origination.

Net mobile service revenues in the quarter recorded a material growth of 10.7% in the annual comparison, driven by the increase in the voice services revenue, internet services consumption, use of messages, in addition to higher smartphone sales, which stimulated handset revenues. The mobile service revenue grew by 7.4%, affected mainly by regulatory impacts. Excluding this effect, the mobile net service revenue growth would be 9.6% compared to 4Q11.

Access and usage revenues increased by 9.3% y-o-y, driven by the continued growth in prepaid recharges and by the growth in the “Vivo Ilimitado” postpaid customer base.

Network usage revenues decreased by 8.8% in comparison to 4Q11 mainly due to the reduction of MTR. Excluding regulatory impact, revenues would increase 1.8%. In the q-o-q comparison, an increase of 3.2% was recorded due to seasonality.

Data and VAS (Value Added Services) revenues continued to record a good growth of 17.3% y-o-y. This is mainly due to the growth in sales of 3G and 3G Plus data plans tied to smartphones, besides the increased sales of data plans to prepaid customers. In 4Q12 68% of gross adds were **smartphones activations** versus 42% in 4Q11. In addition, the sales of prepaid data packages grew 2.25 times in relation to the same quarter of last year.

Data and VAS revenues accounted for 29% of mobile net service revenues in the quarter, 2.4 p.p. up over the same period last year. Considering outgoing revenue only, data and VAS would represent 34.7% in this quarter.

SMS revenues increased by 11.4% y-o-y, accounting for 34% of the Data and VAS revenue.

Mobile internet revenues continued to grow, having increased by 21.1% in the y-o-y comparison and 10.9% in q-o-q comparison, accounting for half of data revenue in 2012. This performance is directly driven by the strong increase in sales of modems and smartphones plans, especially the 3G Plus plans.

Other Data and VAS Revenues increased by 18.6% y-o-y and 12.6% q-o-q, with emphasis to the growth in the e-health service, launched in the last quarter of 2011, whose average of quarterly revenue growth exceeded 100%. The “Vivo Direto” service also recorded a good performance with annual growth of more than 100% against the increase of 34% in the customer base. As for the other services, we highlight again the services: “Vivo Kantoo” e-learning, “Vivo Segurança Online”, “Torpedo Recado” and other interactivity services based on promotional actions.

The strong annual increase of the **net handset revenues** is mainly explained by the growth of smartphone’s sales, increased participation of the postpaid clients in the gross additions over the period, because of the change in the sales model for SME segment and foreign exchange.

- **Fixed-line accesses** recorded a reduction of 2.2% in relation to the same period last year totaling 14,978 thousand accesses in 4Q12. We also noticed an increase in the ratio of fixed broadband over fixed voice accesses, which climbed from 33.1% in 4Q11 to 35.1% in 4Q12.
- **Fixed voice** accesses recorded a drop of 3.1% in the year, totaling 10,646 thousand in 4Q12. We managed to reduce the rate of drop of fixed voice accesses in the y-o-y comparison.
- The annual drop of 3.1% in the quarter is lower than in 3Q12 (3.4%) and in the 2Q12 (3.2%).
- Our **quality commitment** becomes evident from the analysis of the customer service index (IDA), in which we maintained a stable performance being one of the best two operators in the market, as well as leading the customer satisfaction index (ISC).
- **Fixed broadband** accesses increased by 2.8% y-o-y, closing at 3,733 thousand in 4Q12, driven by increases in the number of houses connected by fiber service, whose accesses reached 112 thousand in the year. The broadband service faced strong competition of converging offers, which, on their turn, have affected new additions. It is important to mention that churn remained under control and did not record strong variations.
- **Pay TV** accesses recorded a reduction of 3% q-o-q, recording 600 thousand subscribers in the year, a consequence of the reduction in the commercial activity for this service in 2012 due to the launching of the new TV platform.
- The new **IPTV** service, based on a Microsoft platform is being offered to fiber customers in São Paulo. For this year, the new service will be extended to

Edgar Filing: TELEFONICA BRASIL S.A. - Form 6-K
cable customers, thus providing more convergence opportunities.

% Data / Net Operational Revenue	29.0%	28.4%	0.6 p.p.	26.9%	2.1 p.p.	28.4%	25.4%

Note: In order to better reflect the performance of the integrated company, revenues are presented after intercompany. Additionally, the Net Operating Fixed Revenue considers the allocation of long distance revenue according to origin and the allocation of revenues arising from FWT solution (“Vivo Fixo” and “Vivo Box”).

Fixed-line net revenues kept the level of downward in relation to the 3Q12. The annual reduction was 7.6%, supported by the better performance in the voice revenues and accesses, in addition to corporate segment’s performance.

Voice and accesses revenues decreased by 12.7% in relation to 4Q11, showing de-acceleration in relation to the annual drop of 13.4 in 3Q12 and of 17% in 2Q12, mainly due to “Vivo Favoritos” promotion. It is important to point out that revenue has been negatively affected by the reduction of the Fixed-Mobile tariff (VC1) since the beginning of the year. Excluding said regulatory impact, voice and accesses revenue would record a reduction of 10.2% in the period.

Network usage revenues grew 16.1% over 4Q11 due to the growth of the incoming traffic with fixed termination in the period, especially from mobile origin.

Data revenues remained stable in the y-o-y comparison due to the strong competition and seasonality which impacted gross adds in this service. Adjusting speeds for ADSL customers has helped to maintain the churn level under control. To this effect, data plans offering speed above 4MB are the ones that mostly grow in the customer base with ADSL and cable technologies. The fiber service already records 112 thousand customers and the churn in the FTTH solution is the lowest in the company, evidencing great customer satisfaction with the service.

In 4Q12, **Pay TV** revenues reduced by 18.4% y-o-y and by 2.1% in relation to 3Q12. As described above, such performance reflects the reduction in the commercial activity due to the launching of the new IPTV platform. Service will be enhanced this year by the expansion of the service for cable technology.

We are implementing tactical plan to turn around the TV business.

Operating costs remained under control, having recorded annual and quarter reduction of 4.5% and 8.9%, respectively, totaling R\$ 5,056.3 million in the quarter, without considering depreciation and amortization expenses. This variation is mainly due to the maintenance of our strict control of general costs and personnel, as well as selectivity in the allocation of selling expenses with focus on profitability.

Personnel costs in 4Q12 recorded a reduction in the annual and quarterly comparison by 5.1% and 3.2%, respectively, evidencing the capturing of synergies with the reduction in the labor count in 1Q12. An increase in expenses was recorded in the year at 5.8% in line with inflation.

Operating costs remained under control, having recorded annual and quarter reduction of 4.5% and 8.9%, respectively.

The **cost of services rendered** in 4Q12 dropped by 6.0% in relation to 4Q11, mainly due to the regulatory impact resulting from the reduction in the interconnection cost, and from the reduction in payments of taxes related to additions of customers due to the selective commercial policy adopted in the period. The quarter variation recorded a reduction of 1.2%

The **cost of goods sold** in 4Q12 grew by 30.4% in relation to 4Q11, and 20.3% over 3Q12, due to the increased sales of smartphones which is linked with higher sales of postpaid and data plans, foreign exchange and because of the change in the sales model for SME segment.

Selling expenses recorded a controlled increase of 4.9% y-o-y, when faced with the growth in the mobile customer base of 6.4% in the period. This was due to the adoption of a rational commercial policy focused on value generation. The annual increase of 6.8% in third party services is due to greater expenses with commissioning, resulting from increased gross adds in data plans which have a larger unit fee.

The **Provision for Doubtful Accounts (PDA)** totaled R\$ 146.6 million in 4Q12, corresponding to 1.1% of total gross revenues, practically stable in relation to 4Q11 and a reduction of 0.23 p.p. q-o-q. The reduction of the bad debt in 4Q12 is due to conjectural factors more favorable (reduction of interest), besides the revision of the credit granting policy for the mobile operation and the practice of new collection actions.

General and administrative expenses decreased by 19.4% in 4Q12 when compared to the 4Q11 due to the renegotiation efforts with third parties contracts and cost control. The q-o-q variation recorded an increase of 21.3% due to an increase in maintenance along with the opening of the new integrated office of the company.

Other net operating revenues (expenses) recorded revenues of R\$ 496.5 million in 4Q12, an annual increase of 55.9% due to a greater sales of non-assets in the period.

Ebitda

EBITDA(earnings before interest, taxes, depreciation and amortization) totaled R\$ 3,854.0 million in 4Q12, an increase of 16.5% over 4Q11. The **EBITDA Margin** reached 43.3% (+8.9 p.p. y-o-y). This result is affected by sales of non-strategic assets in the amount of R\$ 675.7 million. Excluding this effect, the EBITDA margin would have recorded 35.7% in the quarter, an annual evolution of 1.6 p.p., comparing to the 4Q11 adjusted margin which has also been impacted by the sale of assets in the value of R\$ 380.1 million. By reason of the regulatory measures of the MTR reduction, there was an impact on the EBITDA of R\$ 13.2 million in the quarter.

The 2012 EBITDA recorded R\$ 12,705.4 million, an increase of 5.6% over the same period of last year. The non-recurrent events and integration costs recorded R\$ 1,142.5 million in the year.

The impact of MTR reduction for the year totaled R\$ 172.5 million.

The table below shows share performance in the year:

Dividends

The Board of Directors, at a meeting held on January 10, 2013, decided, ad referendum to the General Shareholders' Meeting, the payment of dividends in the amount of R\$ 1,650.0 million, based on the profit balance recorded in the September 2012 balance sheet, representing R\$ 1.377913 per ON share and R\$ 1.515704 per PN share, pursuant to the table below.

The payment of these interim dividends started on February 18, 2013 to the holders of common and preferred shares of record as of January 21, 2012.

Additionally, the management proposed that the balance of the profit for the year as of December 31, 2012, not yet allocated, in the amount of R\$ 1,458.4 million should be allocated as dividends. Furthermore, it has been also proposed that dividends and interest on the own capital forfeited in 2012 (already

compensated by actuarial loss and other effects), in the amount of R\$ 40.4 million, should be also allocated as dividends. Thus, dividends are proposed in the total amount of R\$ 1,498.8 million, representing R\$ 1.251620 per ON share and R\$ 1,376782 per PN share, as per the table below. The amounts shall be paid to the holders of common and preferred shares of record in the Company's books at the end of the day of the General Shareholders' Meeting in which the payment of such dividends shall be decided, after which date the shares will be deemed as "ex-dividends".

The Management has proposed to the General Shareholders' Meeting that the payment of such dividends should start not later than December 21, 2013, on a date to be defined by the Executive Committee of the Company and timely announced to the market, the payments to be made in one sole or several installments.

Considering the Board of Directors' proposal submitted on February,

dividends declared on the 2012 profit come to R\$ 4,271.3 thousand, resulting in a proposed payout of 96% and 8% dividend yield.

Notes:

- a) Effective as of 12/24/11, the maximum Local Service Basic Plan net tariffs, as per Anatel Act no. 8401, dated 12/21/11, were increased by 1.95% for sectors 31, 32 and 34, incorporating the productivity gain of 3.747%, as provided for in the Concession Agreement.
- b) Effective as of 12/24/11, the maximum Domestic Long-Distance Service Basic Plan net tariffs, as per Anatel Act no. 8933, dated 12/21/11, were increased by 1.95% for sectors 31, 32 and 34, incorporating the productivity gain of 3.747%, as provided for in the Concession Agreement.
- c) Effective as of 02/24/12, the Fixed-to-Mobile tariffs, as per Anatel Act no. 486 of January 24, 2012, were adjusted at -10.78% for calls between fixed and mobile phones (VC1, VC2 and VC3) throughout the Telesp concession area, sectors 31, 32 and 34 of Region III. At the same date, the absolute amounts of the adjustments to fixed-mobile interconnection tariffs (VUM), relative to VC1, VC2 and VC3, were approved. The adjustments became effective as of February 24, 2012. The new tariffs are valid for SMP (Personal Mobile Service) and SME (Special Mobile Service) throughout the Company's concession area.
- d) Anatel reduced the subscription price of AICE (Individual Access - Special Class) to R\$13.65 from R\$24.82), according to Anatel Act no. 3,506, dated 06/21/12. A franchise of 90 minutes was included and the policy concerning new clients was changed. According to the new rule, the new beneficiaries must be included in the Single Registry of Social Programs (CadÚnico) from the Ministry of Social Development and the Combat against Hunger (MDS).
- e) Until 12/31/2013, in the relationship among the STFC providers in Local calls, when the total outgoing calls, in each direction, exceed the limit of seventy-five percent (75%) of the traffic between the providers, payment is due only for the use of the Local Network for calls exceeding the mentioned limit.
