Message from Management

Brazil's current economic climate - with an increase in inflation, credit restriction and, above all, strong devaluation of the real - has had a direct impact on the commercial aviation sector and on our company.

Despite maintaining a positive operating income (EBIT) in the quarter, we have recorded an accounting loss of R\$2,133.6 million due to the depreciation of the real and the resulting exchange rate variation of liabilities in US dollars.

The exchange rate is a variable that significantly affects our results, since about 50% of our operating expenses and 86.8% of our financial liabilities, including aircraft, are denominated in US dollars. In the quarter, the minimum and maximum dollar price rate ranged between 37.3% and, for the average of the same period of 2014, the increase was even higher, at 55.5%.

Therefore, we are working with all of our focus on mitigating the consequences of this macro scenario on our activities. There are three major areas of action: exercising strong control over costs and expenses; seeking continuous evolution of our operational efficiency; and adjusting capacity with discipline, in order to reach maximum productivity and utilization of our aircraft. In addition, we are taking all measures to ensure a solid cash position.

Costs and expenses optimization

As an example of cost and expenses control initiatives and expected productivity gains, we highlight the new optimization processes and tools of our crew and airport team working schedule; our network; the review of maintenance contracts, ramp, hospitality and corporate services in general; the redesign of the organizational structure by eliminating layers and the cancellation of new hires.

Network improvements to ensure maximum profitability

Our network is constantly improving and adjusting to the economies in which we operate. As a result, the flights to Miami and Orlando, in the United States, will only be operated seasonally from February 19, 2016. We have also studied the feasibility of continuing operations to Caracas, Venezuela, which are currently ongoing but at a reduced frequency to once a week.

We have also planned two new destinations in Latin America, including Havana, in Cuba, and, as the example of the flights departing from Fortaleza and Natal to Buenos Aires, we studied new direct operations to Argentina's capital departing from other Northeastern cities.

Maintaining our commitment to reduce 1% of the Company's domestic supply for 2015, we redesigned our network with frequencies adjustments, as well as launched new routes and flights departing from Congonhas Airport in São Paulo to the coastal cities of Salvador, Porto Seguro, Ilhéus and Florianópolis, which are in high demand during the summer. In addition, we expanded operations to Maringá, Londrina, and Presidente Prudente.

For the High Season, we will operate direct flights from Santos Dumont Airport, in Rio de Janeiro, to Navegantes and Florianópolis, in the South of the country. More cities will also be connected to Porto Seguro with direct flights departing from Belo Horizonte, Rio de Janeiro and Brasília. From Campinas, we will have operations to Natal, Fortaleza, Salvador, Recife and Maceió.

Fleet reduction

Considering the adjustments in our capacity previously disclosed and always monitoring the efficient management of our standard fleet of Boeing 737-700 and 800 NG, we have negotiated with our supplier the flexibility in the delivery schedule of the next two years. Therefore, instead of fifteen Boeing 737-800 NG scheduled to be delivered in 2016 and 2017, we will add four aircraft to our fleet in the period. In addition, as we have already done in recent years, we will sublease 12 aircraft in 2016 to foreign counterparts during our low season – compared to 7 in 2015.

All these initiatives, that are already being incorporated, helped us reached a net revenue of R\$2,489.6 million in 3Q15, an increase of 1.1% compared to 3Q14. The results also benefited from our efforts to increase the representation of ancillary and cargo revenues on total revenue. Today, they already account for 12.3% of GOL's total revenue.

Strong liquidity position

Anticipating the effects of the economy on our operations and in order to maintain our strong liquidity position and the continuation of projects, we have completed major financial transactions in the quarter. They were: the capital increase of R\$461.3 million, held mainly by our controlling shareholder and by Delta Air Lines; the issuance of a long term loan with third parties amounting to US\$300 million, with Delta as the guarantor. Adding these two transactions to the figures that we had in the previous period, we have reached R\$3,073.3 million in cash in 3Q15, representing 31.2% of our net revenue in the last twelve months. Apart from these, we held the issuance of the 6th series of debentures, amounting to R\$1,050.0 million, maturing 2019, with total resources used exclusively for the early redemption of the 4th and 5th issuances which had maturities in 2017 and 2018.

2015 guidance review

I would also like to announce a new operating margin (EBIT) guidance for 2015, with the range of -2% to neutral, since the earlier range was between + 2% and + 5%. The review reflects the Brazilian economic scenario already described above, which produced an impact on GOL's costs and expenses, and on passenger transportation revenues, which mix of leisure and corporate customers has changed.

Our Team of Eagles is devoting all their energy in performing this solid strategy to overcome the challenges of the current economic scenario. I have total confidence in our people and believe that the initiatives announced here and in other studies will lead us to overcome these challenges with security and liquidity, ensuring our strength, and leaving us ready to resume our path of success and achievements.

2015 Guidance

Annual Change in Domestic Supply (ASK)	0	-1%	0	-1%	+1.6%
Average Exchange Rate (R\$ /US\$)	3.15	2.95	3.40	3.30	3.17
Jet Fuel Price	2.20	2.10	2.25	2.15	2.10
Operating Margin (EBIT)	2%	5%	-2%	0%	-1.2%

These guidance revisions reflects the high foreign exchange volatility, the decline in international oil prices, and the current economic scenario which, altogether, impacted GOL's costs and expenses and revenue from passenger transport, whose leisure and business traveler mix changed.

The maintenance of the 2015 domestic supply forecast, from zero to -1%, will reduce capacity by 5% to 7% in 4Q15, given the indicator's increase by 1.6% until September.

Due to the impact of an adverse macroeconomic scenario, GOL may revise its guidance to incorporate any developments in its operating and financial performance, as well as any changes in interest, FX, GDP and WTI and Brent oil price trends.

Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review according to the Brazilian and international review standards of interim financial information (NBC TR 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, and ISRE 2410 - Review of Interim Financial Information Performed by the Independent

A review of interim financial information consists of inquiries, mainly of the people responsible for the financial and accounting matters, and the application of analytical and other review procedures. The scope of a review is significantly narrower than that of an audit conducted in accordance with audit standards and, accordingly, it did not permit us to obtain assurance that we took notice of all significant matters that could have been raised in an audit. Therefore, we did not express an audit opinion.

Conclusion on the interim financial information

Based on our review, we are not aware of any fact that makes us believe that the interim individual and consolidated financial information included in the Quarterly Information referred above was not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34 applicable to the preparation of Quarterly Information (ITR), and presented in compliance with the rules issued by the CVM.

2.2. New standards, amendments and interpretations

a) New standards and interpretations issued by IASB but not applicable until September 30, 2015 with no early adoption by the Company:

- IFRS 9 Financial instruments: On July, 2014, IASB issued the final version of IFRS 9 - Financial Instruments, which reflects all phases of the financial instruments project, and replaces the IAS 39 - Financial Instruments: Recognition and Measurement and all IFRS 9's previous versions. The standard introduces new requirements on classification and measurement, loss on impairment and hedge accounting. IFRS 9 is effective for annual periods beginning on January 01, 2018 or thereafter, and the early application is not allowed. Retrospective application is required, but it is not mandatory, however, the presentation of comparative information. Early adoption of earlier versions of IFRS 9 (2009, 2010 and 2013) is allowed if the initial application date is earlier than February 01, 2015. The adoption of IFRS 9 will have an effect on the classification and measurement of the Company's financial assets, not causing, however, any impact on the classification and measurement of the financial liabilities of the Company.
- IFRS 15 Revenue contract with customers: Establish a model of five steps that apply to income received from a customer contract, regardless of the type of revenue or industry transaction. Applies to all revenue contracts and provides a model for the recognition and measurement of gains or losses on the sale of certain non-financial assets that are not related to the regular activities of the entity (i.e. real estate sales, installations and equipment or intangibles). Extensive disclosures are also required by this standard. This Statement shall be applied for annual periods beginning on or after January 01, 2017, with earlier application allowed.

In addition the following new standards, amendments and interpretations were issued by IASB, but the Company's Management does not expect impacts on the individual and consolidated interim financial information on the initial adoption:

- Annual improvements – Cycle 2010-2012 and cycle 2011-2013 – Applicable for annual periods beginning on July 1, 2014 or, thereafter;
- Amendments to IFRS 11 Joint Arrangements: Acquisitions accounting for corporate parties - Applicable for annual periods beginning on January 01, 2016 and thereafter, and the early application is not allowed in Brazil.
- Amendments to IAS 16 and IAS 38 – Explanation of acceptable methods of depreciation amortization - The amendments are applicable prospectively for annual periods beginning on January 01, 2016 or thereafter.

The Company intends to adopt those Standards when these become effective and disclose and recognize the impacts in the interim financial information that may occur on application of those standards.

Considering the current of the Company and its subsidiaries, management does not expect this change to have a material effect on the interim financial information - ITR from its adoption.

There are no other standards and interpretations issued but not yet adopted that, in Management's opinion, have a significant impact on net income or equity issued by the Company.

3. Seasonality

The Company expects that revenues and profits from its flights reach the highest levels during the summer and winter vacation periods, in January and July, respectively, and during the last two weeks of December, during the season holidays. Given the high portion of fixed costs, this seasonality tends to result in fluctuations in our operational quarter-on-quarter income.

4. Cash and cash equivalents

	Individual		Consolidated	
	09/30/2015	12/31/2014	09/30/2015	12/31/2014
Cash and bank deposits	481,716	32,995	1,103,932	507,248
Cash equivalents	615,876	426,369	1,348,963	1,391,525
	1,097,592	459,364	2,452,895	1,898,773

The cash equivalents breakdown is as follows:

	Individual		Consolidated	
	09/30/2015	12/31/2014	09/30/2015	12/31/2014
Private bonds	615,426	426,369	1,085,667	1,130,462
Government bonds	-	-	6,125	63
Investment funds	450	-	257,171	261,000
	615,876	426,369	1,348,963	1,391,525

As of September 30, 2015, the cash equivalents were represented by private bonds (Bank Deposit Certificates - "CDBs"), buy-back transactions and time deposits paid at post fixed rates ranging between

100% and 101% of the Interbank Deposit Certificate rate (“CDI”) on the onshore investments.

The investment funds were represented primarily by government bonds paid at a weighted average rate of 99% of the CDI rate.

The investment funds classified as cash equivalents have high liquidity and, according to the Company analysis, readily convertible to a known amount of cash with insignificant risk of change in its value.

Repatriation of the generated cash in Venezuela

Until January 22, 2014, the Venezuelan government allowed the companies with operations in Venezuela could request the repatriation of their resources generated by sales in Venezuela through CADIVI (“Comisión de Administración de Divisas”) by the official rate of BS 6,30/US\$1,00. From January 23, 2014, the airlines companies were obligated by the government to adopt an additional procedures translation for repatriation of resources denominated Sistema Supplementary Foreign Currency Administration System (SICAD) which is determined on a weekly basis. 15. Losses per share

Although there are differences between common and preferred shares in terms of voting rights and priority in case of liquidation, the Company's preferred shares are not entitled to receive any fixed dividends. The preferred stockholders are entitled to receive dividends per share 35 (thirty five) times of the dividends per share paid to common stockholders. Therefore, the Company understands that the economic capacity of the preferred shares is higher than the common shares.

Consequently, result per share is calculated by dividing the net income or loss by the weighted average number of all classes of shares outstanding during the period. Diluted earnings or loss per share are computed including stock options granted to key management and employees using the treasury shares method when the effect is dilutive. The antidilutive effect of all potential shares is disregarded in calculating diluted earnings or loss per share.

(b) The weighted average considers the split of 1 common shares to 35 common shares approved at the Extraordinary General Meeting held on March 23, 2015, in accordance with CPC 41 (IAS 33). Earnings per share presented reflects of the economic strenght of each class of shares.

Diluted result per share is calculated by the weighted average number of outstanding shares, in order to assume the conversion of all potential dilutive shares. Diluted result per share is calculated based on considering the instruments that may have a potential dilutive effect in the future, such as share-based payment transactions, described in Note 13. However, due to the losses reported for the period ended on September 30, 2015, these instruments issued have anti-dilutive effect and, therefore, are not considered in the total number of outstanding shares.

The returns provisions consider the costs that meet the contractual conditions for the return of engines maintained under operating leases, as well as the costs to reconfigure the aircraft without purchase option, as prescribed in the returns conditions of the lease contracts, and which is capitalized in fixed assets

(aircraft reconfigurations/overhauling), as described in Note 16.

b) Provision for legal proceedings

As of September 30, 2015 the Company and its subsidiaries are parties to 28,230 (9,002 labor and 19,228 civil) lawsuits and administrative proceedings. The lawsuits and administrative proceedings are classified into Operation (those arising from the Company's normal course of operations), and Succession (those arising from the succession of former Varig S.A. obligations).

Under this classification, the number of proceedings is as follows:

	Operation	Succession	Total
Civil lawsuits	17,517	239	17,756
Civil proceedings	1,469	3	1,472
Labor lawsuits	5,609	3,191	8,800
Labor proceedings	200	2	202

The civil lawsuits are primarily related to compensation claims generally related to flight delays and cancellations, baggage loss and damage. The labor claims primarily consist of discussions related to overtime, hazard pay, and wage differences.

GOL Linhas Aéreas Inteligentes S.A.

The provisions related to civil and labor suits, whose likelihood of loss is assessed as probable are as follows:

	09/30/2015	12/31/2014
Civil	66,338	55,097
Labor	68,397	46,996
	134,735	102,093

Provisions are reviewed based on the progress of the proceedings and history of losses based on the best current estimate for labor and civil lawsuits.

There are other civil and labor lawsuits assessed by management and its legal counsel as possible risks, in the estimated amount as of September 30, 2015 of R\$16,538 for civil claims and R\$21,321 for labor claims (R\$15,786 and R\$2,341 as of December 31, 2014 respectively), for which no provisions are recognized.

On August 2015, the Superior Labor Court (“TST”) declared unconstitutional the monetary adjustments of the labor debts by Reference Rate (“TR”), which was substituted by IPCA-E (the National Index of Price to the Ample), which will be applicable to all litigations in progress as of June 30, 2009 and from the date on.

On October 14, 2015, the Federal Supreme Court (STF) granted an injunction suspending the effects of the decision previously communicated by the TST. The Company, along with its internal and external legal advisors, believes that, in the current scenario, the risk of obligation to update the labour claims by IPCA-E is remote.

The tax lawsuits below were evaluated by the Company's management and its legal consultants as being relevant and with probable risk as of September 30, 2015:

- GLAI is discussing the non-occurrence of taxation of PIS and COFINS on revenues generated by the interest on capital in the amount of R\$37,511, related to the years from 2006 to 2008, paid by its subsidiary GTA Transportes Aéreos S.A., succeeded by VRG on September 25, 2008. According to the opinion of the Company's legal counsel and based on the jurisprudence occurred in recent events, the Company classified this case as possible loss, without a provision registered for the related amount. Additionally, the Company maintains a letter of credit with Bic Banco with a partial guarantee on the lawsuit value of R\$19,563 as disclosed in Note 6.
- Tax on Services (ISS), the amount of R\$16,543 (R\$16,470 as of December, 31 2014) arising from assessment notices issued by the Prefeitura do Município de São Paulo against the Company, in the period from January, 2007 to December, 2010 regarding a possible ISS taxation on partners agreements. The classification of the possible risk stems from the matters under discussion and are interpretative, and involves discussions of factual and evidential materials, and has no final positioning of the Superior Courts.
- Customs Penalty in the amount of R\$19,183 (R\$33,956 as of December, 31 2014) relating to assessment notices issued against the Company for alleged breach of customs rules regarding procedures for temporary import of aircraft. The classification of possible risk is a result of the absence of a final positioning of the Superior Courts.
- BSSF goodwill (BSSF Air Holdings), in the amount of R\$44,718 (R\$43,246 as of December, 31 2014) related to Infraction notices due to the deductibility of the goodwill allocated to future profitability. The classification of possible risk is a result of the absence of a final positioning of the Superior Courts.

- VRG's goodwill in the amount of R\$19,215 (R\$17,894 as of December, 31 2014) resulted from summons of violation related to the deductibility of the goodwill classified as future payment. The classification of probable risk arises from the absence of a final opinion from the Superior Courts.

There are other lawsuits considered by the Company's management and its legal counsel as possible risk, in the estimated amount of R\$136,039 (R\$27,538 as of December, 31 2014) which added to the lawsuits mentioned above, amount to R\$273,209 as of September 30, 2015 (R\$176,854 as of December, 31 2014).

(a) The eliminations from operating entries are fully represented by transactions between VRG and Smiles.

(b) Include charges for depreciation and amortization totaling R\$302,645 allocated for each operating segment as follows: R\$300,861 in flight transportation segment and R\$1,784 in Loyalty Program Segment (R\$367,094 and R\$2,089 respectively on September 30, 2015)

In the individual Interim Financial Information of the subsidiary Smiles, which represents the segment Smiles Loyalty Program and in the information provided to the relevant decision makers, the revenue recognition occurs upon redemption of the miles by the participants. Under this perspective, this measurement is appropriate given that this is when the revenue recognition cycle is complete. At this point, Smiles has transferred to its suppliers the obligation to provide services or deliver products to its customers.

However, from a consolidated perspective, the revenue recognition cycle related to miles exchanged for flight tickets is only complete when the passengers are effectively transported. Therefore, for purposes of reconciliation with the consolidated assets, liabilities and results, as well as for purposes of equity method of accounting and for consolidation purposes, the Company performed, besides eliminations entries, consolidating adjustments to adjust the accounting practices related to Smiles' revenues. In this case, under the perspective of the consolidated Interim Financial Information, the miles that were used to redeem airline tickets are only recognized as revenue when passengers are transported, in accordance with accounting practices and policies adopted by the Company.

29. Commitments

As of September 30, 2015 the Company holds 126 firm orders for aircraft acquisitions with Boeing. These aircraft acquisition commitments include estimates for contractual price increases during the construction phase. The approximate amount of firm orders, not including the contractual discounts, is R\$57,679,441 (corresponding to US\$14,518,221 at the reporting date) and are segregated according to the following years:

	09/30/2015	12/31/2014
2015	665,997	1,323,818
2016	2,071,720	1,385,110
2017	3,189,957	2,132,740
2018	2,178,858	1,456,740

As of September 30, 2015, from the total orders mentioned above, the Company holds the amount of R\$7,645,843 (corresponding to US\$1,924,499 at the reporting date) related to advances for aircraft acquisition, to be disbursed in accordance with the following schedule:

	09/30/2015	12/31/2014

Beyond 2019	4,838,228	3,234,741
	7,645,843	5,292,882

The installment financed by long-term debt with aircraft guarantee through the U.S. Ex-Im Bank corresponds approximately to 85% of the aircraft total cost. Other establishments finance the acquisitions with equal or higher percentages, reaching up to 100%.

The Company performs payments related to aircraft acquisition through its own funds, short and long-term debt, cash provided by operating activities, short and medium-term line of credit and supplier financing.

The Company leases its entire aircraft fleet through a combination of operational and financial leases. As of September 30, 2015, the total fleet leased was comprised of 144 aircraft, of which 98 were under operating leases and 46 were recorded as financial leases. The Company holds 40 aircraft under financial leasing with purchase option. During the period ended September 30, 2015, the Company received 2 aircraft and did not return any aircraft under operating lease contracts.

a) Operating leases

The future payments of non-cancelable operating lease contracts are denominated in U.S. Dollars, and are as follows:

	09/30/2015	12/31/2014
2015	402,365	785,052
2016	1,164,331	697,744

Beyond 2019	3,140,831	1,657,034
Total minimum lease payments	7,568,504	4,794,810

b) Sale-leaseback transactions

The Company, during the years 2006 to 2009, recorded gains and losses from sale-leaseback transactions of 4 aircraft 737-800 Next Generation. These gains and losses were deferred, and are being amortized proportionally to the payments of the operational lease agreements over the contract term of 120 months. The amounts registered during the period ended September 30, 2015 and December 31, 2014 are as follows:

	Prepaid expenses				Other liabilities

	09/30/2015	12/31/2014	09/30/2015	12/31/2014	09/30/2015	12/31/2014	09/30/2015	12/31/2014

(*) Related to 2 aircraft from transactions on 2006.

(**) Related to 11 aircraft from transactions from 2006 to 2009, see Note 10.

Additionally, during the period ended on September 30, 2015, the Company recorded a net gain of R\$21,396 resulting from 4 aircraft received during the period (R\$73,920 related to 9 aircraft received during the period ended September 30, 2014) that were used as sale-leaseback transactions and resulted in operating leases. Given that the gains and losses from sale-leaseback transactions will not be offset against future lease payments and were negotiated at fair value, such gain was recognized directly in profit or loss.

30. Financial instruments and risks management

The Company and its subsidiaries have financial asset and financial liability transactions, which consist in part of derivative financial instruments.

The financial derivative instruments are used to hedge against the inherent risks related to the Company operations. The Company and its subsidiaries consider as most relevant risks: fuel price, exchange rate and interest rate. These risks can be mitigated by using exchange swap derivatives, futures and options contracts based on oil, U.S. Dollar and interest markets. The contracts may be held by means of exclusive investment funds, as described in the Risk Management Policy of the Company.

The Management follows a documented guideline when managing its financial instruments, set out in its Risk Management Policy, which is periodically revised by the Risk Committee (CPR), and approved by the Board of Directors. The Committee sets the guidelines and limits, monitors controls, including the mathematical models adopted for a continuous monitoring of exposures and possible financial effects and also prevents the execution of speculative financial instruments transactions.

The gains or losses on these transactions and the application of risk management controls are part of the Committee's monitoring and have been satisfactory when considering the objectives proposed.

The fair values of financial assets and liabilities of the Company and its subsidiaries are established through information available in the market and according to valuation methodologies.

Most of the derivative financial instruments are engaged with the purpose of hedging against fuel and exchange rates risks based on scenarios with low probability of occurrence, and thus have lower costs compared to other instruments with higher probability of occurrence. Consequently, despite the high correlation between the hedged item and the derivative financial instruments contracted, can presents ineffective positions for hedge accounting purposes upon settlement, which are presented in the tables below.

The description of the consolidated account balances and the categories of financial instruments included in the statements of financial position as of September 30, 2015 and December 31, 2014 is as follows:

(d) The fair values are approximately the book values, according to the short term maturity period of these assets and liabilities, except the amounts related to Perpetual Bonds and Senior Notes, as disclosed on Note 18.

As of September 30, 2015 the Company had no financial assets available for sale.

Risks

The operating activities expose the Company and its subsidiaries to the following financial risks: market (especially currency risk, interest rate risk, and fuel price risk), credit and liquidity risks. These risks are originated by, essentially, leasing agreements of aircraft purchase.

The Company's risk management policy aims at mitigating potential adverse effects from transactions that could affect its financial performance.

GOL Linhas Aéreas Inteligentes S.A.

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

The Company's and its subsidiaries' decisions on the exposure portion to be hedged against financial risk, both for fuel consumption and currency and interest rate exposures, consider the risks and hedge costs.

The Company and its subsidiaries do not usually contract hedging instruments for its total exposure, and thus they are subject to the portion of risks resulting from market fluctuations. The portion of exposure to be hedged is determined and reviewed at least yearly in compliance with the strategies determined in the Risk Policies Committees. The relevant information on the main risks affecting the Company's and its subsidiaries' operation is as follows:

a) Fuel price risk

As of September 30, 2015, fuel expenses accounted for 33.7% of the costs and operating expenses of the Company. The aircraft fuel price fluctuates both in the short and in the long term, in line with crude oil and oil byproduct price fluctuations.

To mitigate the risk of fuel price, the Company holds derivative financial instruments referenced mainly to crude oil and, eventually, to their derivatives, also contracted, directly with the local supplier, are future fuel deliveries to aircraft at predetermined prices.

b) Exchange rate risk

The exchange rate risk derives from the possibility of unfavorable fluctuation of foreign currencies to which the Company's liabilities or cash flows are exposed. The exposure of the Company's and its subsidiaries' assets and liabilities to the foreign currency risk mainly derives from foreign currency-denominated trade

accounts payable, leasing provision and leases and financing.

The Company's revenues are mainly denominated in Brazilian Reais, except for a small portion in U.S. Dollar, Argentinean Pesos, Bolivian Bolivianos, Chilean Peso, Colombian Peso, Paraguay Guarani, Uruguayan Peso, Venezuela Bolivar etc.

To mitigate the risk of exchange rate, the Company holds derivative financial instruments that are referenced to the U.S. Dollar.

The currency exposure of the Company on September 30, 2015 and December 31, 2014 is shown below:

c) *Interest rate risk*

The Company and its subsidiaries are exposed to fluctuations in domestic and foreign interest rates, substantially the CDI and Libor, respectively. The highest exposure is related to lease transactions, of which the installments to be paid are indexed to the Libor after date that the aircraft are delivered. Another relevant exposure is the local investments and debts indexed to the CDI rate.

To mitigate the interest rate risk the Company holds swap derivatives.

d) Credit risk

The credit risk is inherent in the Company's operating and financing activities, mainly represented by trade receivables, cash and cash equivalents, and short-term investments.

The trade receivable credit risk consists of amounts falling due from the largest credit card companies, with credit risk better than or equal to those of the Company and its subsidiaries, and receivables from travel agencies, installment sales, and government sales, with a small portion exposed to risks from individuals or other entities.

GOL Linhas Aéreas Inteligentes S.A.

September 30, 2015

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

As defined in the Risk Management Policy, the Company is required to evaluate the counterparty risks in financial instruments and diversify the exposure. Financial instruments are contracted with counterparties rated at least as investment grade by S&P and Moody's. The financial instruments are mostly contracted on commodities and futures exchanges (BM&FBOVESPA and NYMEX), which substantially mitigate the credit risks, derivative transactions contracted on the OTC market (OTC) have counterparts with a minimum rating of "investment grade". The Company's Risk Management Policy establishes a maximum limit of 20% per counterparty for short-term investments.

e) Liquidity risk

Liquidity risk takes on two distinct forms: market and cash flow liquidity risk. The first is related to current market prices and varies in accordance with the types of assets and the markets where they are traded. Cash flow liquidity risk, however, is related to difficulties in meeting the contracted operating obligations at the agreed dates.

As a way of managing the liquidity risk, the Company invests its funds in liquid assets (governmental bonds, CDBs, and investment funds with daily liquidity), and the Cash Management Policy establishes that the Company's and its subsidiaries' weighted average debt maturity should be higher than the weighted average maturity of the investment portfolio. As of September 30, 2015, the weighted average maturity of the Company's financial assets was 33 days and of financial debt, excluding perpetual bonds, was 3.6 years.

The schedule of financial liability hold by the Company is shown bellow:

f) *Capital management*

The Company seeks alternatives to capital in order to meet its operational needs, aiming a capital structure that takes into account suitable parameters for the financial costs, the maturities of fundings and its guarantees.

The Company monitors its financial leverage ratio, which corresponds to net debt, including short and long-term debt divided by total capital.

The table as follow shows the financial leverage rate as of September 30, 2015 and December 31, 2014:

Classification of derivatives financial instruments

i. Cash flow hedges

The Company and its subsidiaries use cash flow hedges to hedge against future revenue or expense fluctuations resulting from changes in the exchange rates, interest rates or fuel price, and accounts for actual fluctuations of the fair value of derivative financial instruments in stockholders' equity until the hedged revenue or expense is recognized.

The Company estimates the effectiveness based on statistical correlation methods and the ratio between gains and losses on the financial instruments used as hedge, and the cost and expense fluctuation of the hedged items.

The instruments are considered as effective when the fluctuation in the value of derivatives offsets between 80% and 125% the impact of the price fluctuation on the cost or expense of the hedged item.

The balance of the actual fluctuations in the fair values of the derivatives designated as cash flow hedges is transferred from stockholders' equity to profit or loss for the period in which the hedged costs or expenses impacts profit or loss. Gains or losses on effective cash flow hedges are recorded in balancing accounts of the hedged expenses, by reducing or increasing the operating cost, and the ineffective gains or losses are recognized as financial income or financial expenses for the period.

ii. Derivative financial instruments not designated as hedge

The Company holds derivative financial instruments that are not formally designated for hedge accounting. This occurs when transactions are in the short term and the control and disclosure complexity.

Sensitivity analysis of derivative financial instruments

The sensitivity analysis of financial instruments was prepared according to CVM Instruction 475/08, in order to estimate the impact on the fair value of financial instruments operated by the Company, considering three scenarios considered in the risk variable: most likely scenario, the assessment of the Company; deterioration of 25% (possible adverse scenario) in the risk variable, deterioration 50% (remote adverse scenario).

The estimates presented, since they are based on simple statistics, do not necessarily reflect the amounts to be reported in the next Interim Financial Information. The use of different methodologies and/ or assumptions may have a material effect on the estimates presented.

The tables below show the sensitivity analysis for market risks and financial instruments considered relevant by management, open position as of September 30, 2015 and based on the scenarios described above.

The probable scenario of the Company is the maintaining of the market rates.

In the tables, positive values are displayed as asset exposures (assets higher than liabilities) and negative values are exposed liabilities (liabilities higher than assets).
