Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F:  Form 20-F  Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934:  Yes  No

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): n/a

## Edgar Filing: Mechel OAO - Form 6-K

MECHEL REPORTS RUSSIAN RAILWAYS OAO PRESIDENT VLADIMIR YAKUNIN'S VISIT TO ELGA COAL COMPLEX

Neryungri, Russia – September 13, 2012 – Mechel OAO (NYSE: MTL), one of the leading Russian mining and metals companies, reports that Russian Railways OAO's President Vladimir Yakunin visited Elga Coal Complex's facilities.

During the working visit, Russian Railways OAO's President Vladimir Yakunin, together with Chairman of Mechel OAO's Board of Directors Igor Zyuzin and Yakutugol Holding Company OAO's managing director Igor Khafizov toured the facilities of the railway linking the Elga coal deposit with Baikal-Amur Mainline's Ulak station, and examined construction progress at Elga Coal Complex.

Russian Railways' president voiced high appreciation of the work conducted at the site and noted Mechel's investment into developing transport infrastructure in Russia's Far East.

The railway's construction was one of the hardest and most important stages in developing the Elga coal deposit. Apart from its complexity and scale, this project is unique for the Russian mining industry in that it was implemented by a privately-owned company.

The railway was opened to traffic in December 2011. It was constructed in harsh geological and climatic conditions. The railroad includes 76 bridges, 370 hydroengineering facilities, passing loops, locomotive depots, and a reloading complex. Besides, a highway was built along the railway. The volume of ground and excavation works totals some 80 million cubic meters.
