News Release/Presseinformation

**Agreement Reached for Advanced Electronic Systems (AES) to Acquire Altis from IBM and Infineon Technologies**

Paris, France August 30, 2007 IBM Corp. and Infineon Technologies (IFX: FSE, NYSE) today announced an agreement in principle to divest their shares in Altis Semiconductor with its manufacturing site in Corbeil-Essonnes, France, via a sale to Advanced Electronic Systems AG (AES). Terms of the agreement, which are subject to governmental and regulatory approval and works council consultation, were not disclosed.

Advanced Electronic Systems AG, located in Zurich, Switzerland, is a Swiss affiliate of GIS (Global Information Services), a Russian-based holding company.

Altis, an Infineon and IBM joint venture since 1999, mainly manufactures semiconductor components for communications, automotive and security applications in 250 to 130 nanometer technologies. Altis management was engaged in the process of searching for a buyer.

Under the terms of the current understanding, AES will purchase the equity, which includes the real estate and technology assets of Altis from Infineon and IBM, and AES agreed to maintain the level of industrial activity in Altis. Infineon and IBM agree to license key manufacturing process technologies to AES for use in Altis in the future. AES plans to use the Altis facility to manufacture European and Russian designed products and AES also has plans to open a semiconductor design center at the Altis location.

We are very pleased to acquire a state-of-the-art manufacturing site with Altis' history and experience, said Alexander Kalinin, Member of the GIS Board of Directors. The expertise and skills of the Altis employees are an asset as is the supply agreement with Infineon. We are committed to extending the customer portfolio as well as to licensing additional technologies from IBM and Infineon. We see this acquisition as a natural process of the internationalization of hi-tech businesses, and we are looking forward to continuing the excellent cooperation with IBM and Infineon in implementing new technologies in Altis.

---

-2-

The acquisition is subject to regulatory approvals and work councils processes and is anticipated to close in the fourth quarter of calendar year 2007.

**About Advanced Electronic Systems AG (AES)**

Advanced Electronic Systems AG, located in Zurich, Switzerland, is a Swiss affiliate of GIS (Global Information Services), a Russian-based holding company. GIS has offices in Russia (Moscow) and the USA (Miami).

**About Infineon**

Infineon Technologies AG, Munich, Germany, offers semiconductor and system solutions addressing three central challenges to modern society including energy efficiency, connectivity and security. In fiscal year 2006 (ending September), the company achieved sales of Euro 7.9 billion (including Qimonda sales of Euro 3.8 billion) with approximately 42,000 employees worldwide (including approximately 12,000 Qimonda employees). With a global presence, Infineon operates through its subsidiaries in the US from Milpitas, CA, in the Asia-Pacific region from Singapore, and in Japan from Tokyo. Infineon is listed on the Frankfurt Stock Exchange and on the New York Stock Exchange (ticker symbol: IFX).
