Earnings Release Q3 2008

Munich, July 30, 2008

Major Orders Fuel Fast Growth

Profit Rises in All Sectors

2nd Tranche of Share Buyback Completed

**Peter Löscher, President and Chief
Executive Officer of Siemens AG**

We shifted Siemens into a higher gear in the third quarter, reaching important milestones on our reorganization path. We are becoming faster, more efficient and more focused as a company, with the timely entrepreneurial approach that is required to stay on this course, commented Siemens CEO Peter Löscher.

Regarding fiscal 2008, we affirm our full-year outlook. While we expect a less favorable macroeconomic situation in fiscal 2009, we still plan to grow at twice the rate of global GDP. We are also committed to achieving a combined Sector operating result of 8 to 8.5 billion euros for the year. Our new management incentive system should play an important role in our progress ahead, along with world-wide employee participation in Siemens' success through equity ownership.

Financial highlights:

Orders rose 21%, to 23.677 billion, and revenue increased 10%, to 19.182 billion. On an organic basis, excluding the net effect of portfolio transactions and currency translation, orders climbed 26% year-over-year, and revenue rose 13%.

Total Sectors profit – a measure combining profit from the Industry, Energy and Healthcare Sectors – climbed 33%, to 2.084 billion.

Income from continuing operations rose strongly to 1.475 billion from 608 million in the prior-year quarter. Basic earnings per share (EPS) from continuing operations were 1.61, up from 0.64 a year earlier.

Net income was 1.419 billion. A year earlier, net income of 2.065 billion benefited from a substantial gain in discontinued operations related to the transfer of the carrier business into Nokia Siemens Networks. Basic EPS declined to 1.55 compared to 2.25 in the prior-year period.

Siemens completed the second tranche of its share buyback program in July, raising total purchases to 4.0 billion in the fiscal year. Approximately 1.3 billion of the total occurred in the third quarter.

Table of Contents

Siemens 2

Orders and Revenue**Robust growth and strong book-to-bill**

Orders were 23.677 billion in the third quarter, up 21% from the prior-year period, while revenue rose 10% year-over-year, to 19.182 billion.

These results include negative currency translation effects of 7 percentage points on orders and 6 percentage points on revenue. Excluding these effects and portfolio transactions, orders rose 26% and revenue increased 13%.

The book-to-bill ratio for the quarter was 1.23, driven by exceptionally large orders in Industry and Energy.

Good Sector balance

Order growth was well-balanced, with double-digit expansion in all Sectors.

Revenue growth included double-digit increases in Energy and Healthcare and 8% growth in Siemens's largest Sector, Industry.

Major orders in Europe fuel high order growth

The region comprising Europe, the Commonwealth of Independent States (CIS) and Africa contributed 40% order growth and 12% revenue growth in the third quarter, due in part to the large orders in Industry and Energy.

In the Americas, orders and revenue rose 10% and 5%, respectively, despite strong negative currency translation effects. These results include negative currency translation effects of 15 percentage points on orders and 14 percentage points on revenue. Excluding these effects and portfolio transactions, orders rose 21% and revenue increased 15%.

The region consisting of Asia, Australia and the Middle East saw 9% revenue growth, including double-digit increases in China and India. Third-quarter orders were nearly the same year-over-year, despite a higher level of large orders in the prior-year period.

Table of Contents

Siemens 3

Income and Profit**Higher profit margin drives increase in Total Sectors profit**

Siemens three Sectors delivered 2.084 billion in Total Sectors profit, up 33% from 1.571 billion in the third quarter a year earlier, with particular strength in the Industry and Energy Sectors.

Within Industry, the leading profit performers were the two Divisions created out of the former A&D Group: Industry Automation and Drive Technologies. Sector profit also included a gain of 113 million on the sale of the wireless modules business in the Industry Automation Division.

Profit growth within Energy featured strong contributions from the two new Divisions created out of the former PTD Group: Power Transmission and Power Distribution.

Siemens Healthcare Sector contributed 6% profit growth and sustained its profitability despite challenging market conditions.

Income and EPS from continuing operations rise sharply

Income from continuing operations was 1.475 billion in the third quarter, well above 608 million a year earlier.

Basic EPS on a continuing basis climbed to 1.61 from 0.64 in the prior-year period.

The main factor in these increases was the growth in Total Sectors profit year-over-year.

In addition, Strategic Equity Investments (SEI) posted profit of 1 million compared to a loss of 301 million in the third quarter a year earlier. The main factor in this change was significant progress at Nokia Siemens Networks B.V. (NSN), which improved its operating result and sharply reduced restructuring and integration costs compared to the prior-year quarter.

Siemens two Cross-Sector Businesses, Siemens Financial Services (SFS) and Siemens IT Solutions and Services, contributed 123 million in profit, nearly unchanged year-over-year.

In addition, expenses for legal and regulatory matters were lower in the current quarter.

Net income comparison influenced by prior-year gain

Net income in the third quarter was 1.419 billion, with corresponding basic EPS of 1.55.

A year earlier, third-quarter net income was 2.065 billion. Corresponding EPS were 2.25.

The comparison year-over-year is strongly influenced by discontinued operations, which posted a loss of 56 million in the current period in contrast to income of 1.457 billion in the prior-year period. The major factors in the latter result were a preliminary pre-tax non-cash gain of 1.7 billion resulting from the transfer of Siemens telecommunications carrier business into NSN and positive operating results at Siemens VDO Automotive (SV), only partly offset by an impairment of the enterprise networks business in the pre-tax amount of 355 million.

Table of Contents

Siemens 4

Cash, Return on Capital Employed (ROCE), Pension Funding Status and Investigation Expenses**Cash conversion rate****above target**

Free cash flow from continuing operations in the current quarter was 1.547 billion. For comparison, free cash flow of 1.943 billion in the prior-year quarter benefited from a positive effect of approximately 1.1 billion related to the carve-out of SV, only partly offset by a 419 million penalty payment related to a European Union antitrust investigation.

The cash conversion rate for continuing operations in the third quarter was 1.05, above the target for the quarter and on track for the full fiscal year.

ROCE for the first nine months**of fiscal 2008 was 10.7%**

On a continuing basis, return on capital employed (ROCE) declined to 10.7% from 11.2% in the first nine months a year earlier.

ROCE development in the current period was affected by a substantial increase in capital employed stemming from major acquisitions in fiscal 2008 and fiscal 2007.

This effect more than offset higher income from continuing operations in the current period, and will continue through the current fiscal year.

Continued expenses for compliance**investigations**

Expenses for outside advisors engaged in connection with investigations into alleged violations of anti-corruption laws and related matters as well as remediation activities were 119 million in the third quarter, down from 175 million in the second quarter of fiscal 2008.

The total for continuing operations in the current quarter was 106 million, with the remaining 13 million related to discontinued operations.

In the third quarter a year earlier, these costs totaled 125 million, including 54 million in continuing operations and 71 million in discontinued operations.

More information regarding these matters is provided in the document Legal Proceedings.

Siemens completes the second tranche of its share buyback program

The second share buyback tranche totaled 2.0 billion in purchases for 27,916,664 shares, and was completed after the close of the quarter on July 22, 2008. The first tranche of the program, in the amounts of 2.0 billion and 24,854,541 shares, was completed at the beginning of the quarter, on April 8, 2008. Taking both tranches together, Siemens spent a total of approximately 1.3 billion under the share repurchase program in the third quarter.

Pension funding improves

The estimated underfunding of Siemens principal pension plans as of June 30, 2008, amounted to approximately 0.4 billion, compared to an underfunding of approximately 1.0 billion at the end of fiscal 2007.

Table of Contents

Sectors 5

Industry Sector**Strong Quarter for Siemens largest Sector**

The **Industry Sector** combined 8% revenue growth with a higher profit margin to produce a substantial increase in Sector profit compared to the same quarter a year earlier. Sector profit of 1.143 billion benefited also from a 113 million gain on the sale of the Sector's wireless modules business, and both periods under review included purchase price accounting (PPA) effects and integration costs related to acquisitions.

The largest Divisions within the Sector—Industry Automation, Drive Technologies and Industry Solutions—drove the increases in Sector revenue and Sector profit year-over-year. The three other Divisions within the Sector maintained their third-quarter profit at or near prior-year levels.

Revenue for the Industry Sector rose to 9.423 billion from 8.751 billion in the third quarter a year ago. Orders grew even faster, coming in 26% higher at 11.508 billion. Order growth was broad-based, highlighted by a 1.4 billion rolling stock order in Europe and strong global demand for metals technologies solutions. Even without the rolling stock order, the book-to-bill ratio for the Sector increased to 1.07 year-over-year.

Participation in growing markets

Working in strong markets, the Industry Automation and Drive Technologies Divisions maintained high capacity utilization and continued to achieve volume-driven economies of scale. The result was significant profit growth in both Divisions.

Industry Automation contributed 467 million to Sector profit in the quarter, up sharply year-over-year on a 15% increase in revenue. This represents high double-digit profit growth even without the 113 million gain mentioned above which came within Industry Automation. Both periods under review were affected by PPA and integration effects related to the acquisition of UGS Corp. during the third quarter of fiscal 2007. These factors took approximately 190 basis points from profit margin in the current quarter, including PPA effects of 36 million and integration costs of 5 million. In the same quarter a year earlier, PPA effects and integration costs were 49 million and 11 million, respectively, and cut approximately 310 basis points from profit margin.

Drive Technologies contributed 344 million to Sector profit, a 40% increase compared to the prior-year quarter, on a 15% increase in revenue. Both periods included PPA effects of 10 million related to the acquisition of Flender Holding GmbH in fiscal 2005. The impact on profit margin was approximately 40 basis points in the current period and approximately 50 basis points in the prior-year quarter.

Table of Contents

Sectors 6

Meeting market opportunities

The **Industry Solutions** Division posted 21% profit growth on an 11% rise in revenue, including double-digit topline growth and significant margin improvement in the fast-growing metals technologies industry.

Navigating market challenges

The **Osram** and **Building Technologies** Divisions face growth challenges related to adverse currency translation effects from their substantial U.S. presence as well as slowing economic growth in Western Europe and the U.S. Yet both maintained third-quarter profit close to prior-year levels. For comparison, profit at Building Technologies in the prior-year quarter benefited from a gain on the sale of a business.

Record-setting rolling stock order

Mobility held its profit level with the prior-year period, at 39 million. Orders of 2.952 billion included the 1.4 billion contract for more than 300 trains from the Belgian state railway system, Siemens' largest-ever rolling stock order. As part of its **Mobility in Motion** transformation program to improve its cost structure, Mobility intends to take charges in the fourth quarter depending on the progress of labor negotiations.

Table of Contents

Sectors 7

Energy Sector**Broad-based growth and higher profits**

Siemens **Energy Sector** generated 615 million in profit in the third quarter, a substantial increase compared to the prior-year period. All Divisions reported higher profits, with the majority contributing high double-digit increases. Revenue growth was also robust and well-distributed among the Divisions. Sector revenue climbed 19% to 5.829 billion, with all Divisions contributing to the increase. Orders grew faster still, rising 23% over the prior-year quarter to reach 8.077 billion. While orders came in lower at the Fossil Power Generation Division, Renewable Energy more than compensated with a substantial increase compared to the same quarter a year earlier.

Double-digit profit growth in the power grid

Nearly half of the Energy Sector's profit growth came from the **Power Transmission** and **Power Distribution** Divisions, which were formerly combined in Siemens' Power Transmission and Distribution Group (PTD). These businesses continued to gain volume-driven economies of scale by successfully meeting demand for higher efficiency and security in regional power grids. As a result, both Divisions delivered strong profit growth and profit margins in their target ranges.

Revenue grew 12% at Power Transmission and 13% at Power Distribution. Orders grew more slowly year-over-year, primarily due to a lower level of large orders than in the third quarter a year ago. One of the most notable major orders came in at Power

Transmission, for grid access to the world's largest off-shore wind farm, known as Greater Gabbard, in the U.K.

Booming Markets in Oil and Gas and Renewable Energy

The Renewable Energy and Oil & Gas Divisions both profited well in the world's booming markets for energy production.

Renewable Energy generated 72 million in profit with a substantial increase in profit margin year-over-year. The Division also reached new highs in revenue and orders, which climbed to 631 million and 2.122 billion, respectively. The latter figure includes an exceptionally large order for 218 wind turbines in the U.S., which will be placed in wind farms throughout the country. Renewable Energy also won an order for 140 turbines for the Greater Gabbard off-shore wind farm mentioned above, thus demonstrating the Energy Sector's ability to provide integrated solutions for large-scale energy projects. The Division expects to slow order intake compared to the exceptionally high level of the current quarter, while ramping up capacity. In this regard, the Division announced plans to double output at its U.S. rotor blade factory.

The **Oil & Gas** Division combines products and services for extraction, transport and refining with additional offerings including industrial turbines. The Division contributed third-quarter profit of 95 million and clearly improved its profit margin year-over-year. Oil & Gas completed the quarter with a strong book-to-bill ratio based on order intake of 1.550 billion.

Table of Contents

Sectors 8

Fossil Power Generation Contributes to Profit and Revenue Growth

The **Fossil Power Generation** Division delivered profit of 212 million on revenue of 2.096 billion in the third quarter, and contributed to both revenue and profit growth for the Energy Sector as a whole. Third-quarter revenue demonstrates the Division's emphasis on balancing its business more evenly among products, services, and turnkey power plant solutions. The Division's equity investment income was stable compared to the prior year. Equity investment income is expected to be more volatile in coming quarters.

Table of Contents

Sectors 9

Healthcare Sector**Profitable Growth and Progress Toward 2010**

Siemens **Healthcare Sector** sustained its growth and profitability in the face of challenging market conditions. Sector profit was 326 million compared to 307 million in the third quarter a year earlier. Profit margin was strongly influenced by PPA effects and integration costs associated with acquisitions in the Diagnostics Division, including the acquisition of Dade Behring Holdings, Inc. (Dade Behring) between the periods under review. These factors took approximately 210 basis points from Sector profit margin in the third quarter, compared to 170 basis points in the prior-year period.

Healthcare revenue rose 10%, to 2.677 billion, including new volume from Dade Behring in the Diagnostics Division. On an organic basis, excluding portfolio transactions and strong currency translation effects in the U.S., the Sector's three Divisions all contributed to revenue growth in the quarter. Orders climbed 11% to 2.801 billion, again including the acquired volume in Diagnostics. On a regional basis, the Sector achieved rapid growth in emerging markets, particularly China. Growth was more modest in established markets characterized by slower economic growth, tightening credit, and, in the U.S., by public policy affecting medical imaging.

The Healthcare Sector expects previously announced cost-reduction programs to result in severance charges in the fourth quarter depending on the progress of labor negotiations. As part of Siemens' ongoing transformation programs, Healthcare anticipates further charges in the fourth quarter related to a strategic review of certain business activities.

New products highlight order growth at Imaging & IT

The Healthcare Sector's largest Division, **Imaging & IT**, offers medical imaging systems used for diagnostic and interventional purposes as well as information technology systems used to store, retrieve and transmit medical images and other information. In the third quarter, the newly formed Division posted a profit of 199 million, negatively influenced by substantial currency effects. Revenue and orders for Imaging & IT were 1.569 billion and 1.699 billion, respectively, in the current quarter. On an organic basis, revenue rose 3% and orders rose 8% year-over-year despite the difficult market conditions mentioned above. Highlights of order growth included new offerings for magnetic resonance imaging and computer-aided tomography. The momentum generated by these and other innovative products helped increase the Division's book-to-bill ratio year-over-year, which came in at 1.08 for the third quarter.

Table of Contents

Sectors 10

Diagnostics advances integration efforts

The **Diagnostics** Division recorded profit of \$82 million in the third quarter, up from \$52 million in the prior-year period before the acquisition of Dade Behring.

PPA effects and integration costs related to acquisitions, primarily Dade Behring, reduced profit margin by approximately 700 basis points in the current quarter, including PPA effects of \$29 million and net integration costs of \$29 million. A year earlier,

PPA and integration costs for Diagnostics were \$27 million and \$14 million in the third quarter, respectively, taking 830 basis points from the Division's profit margin.

Revenue of \$826 million was significantly higher year-over-year due to new volume from Dade Behring. Organic growth was solid at 3%. Along with profitable growth, the priorities at Diagnostics continue to be rationalizing its product portfolio and realizing synergies among its acquisitions. The Division made progress in these areas in the third quarter.

Table of Contents

Strategic Equity Investments (SEI) and Cross-Sector Businesses 11

Strategic Equity Investments (SEI) and Cross-Sector Businesses

Positive developments at

NSN drive SEI

SEI includes results at equity from three companies in which Siemens holds an equity stake: NSN, BSH Bosch und Siemens Hausgeräte GmbH (BSH), and Fujitsu Siemens Computers (Holding) B.V. (FSC). SEI contributed equity investment income of 1 million in the third quarter compared to a negative

301 million in the same period a year earlier. The largest factor in this improvement was NSN, which reported improved operating results and also substantially reduced restructuring charges and integration costs year-over-year. The current period included 201 million for restructuring and integration costs, down from 905 million in the prior-year period. As a result, Siemens equity investment loss related to NSN in the current quarter decreased to 21 million from 371 million a year earlier.

Cross-Sector Businesses hold

profit steady

Siemens IT Solutions and Services posted a profit of 64 million in the third quarter, with the release of an accrual related to a major project contributing 13 million. Revenue of

1.255 billion in the third quarter was nearly unchanged compared to the same period a year earlier, while orders rose 10% year-over-year, to 1.209 billion.

Siemens Financial Services (SFS) delivered income before income taxes of 59 million in the third quarter, up from 57 million in the same period a year earlier.

Total assets rose significantly compared to the end of fiscal 2007, primarily due to growth in the commercial finance business including asset purchases in secondary markets.

Table of Contents

Other Operations, Corporate Activities and Eliminations 12

Other Operations, Corporate Activities and Eliminations**Transformation taking hold at Other Operations**

Other Operations consist of centrally held business activities, shared services and central costs not allocated to a Sector or Cross-Sector Business. Under the previously announced transformation program for Other Operations, all business activities are to be integrated into an existing Siemens Sector or Cross-Sector Business, divested, moved to a joint venture, or closed. By the third quarter, Siemens reached or concluded the implementation phase for a majority of business activities. Partly as a result, third-quarter sales for Other Operations declined to 580 million from 678 million in the prior-year quarter. The loss from Other Operations narrowed to a negative 20 million from a negative 56 million in the third quarter a year earlier. Siemens expects negative earnings impacts in connection with the Other Operations transformation program in coming quarters.

Real estate sales continue

Income before income taxes at SRE was 103 million, up from 69 million a year earlier, primarily due to increased gains from real estate sales. SRE intends to continue real estate disposals in coming quarters, depending on market conditions.

Improvements at Corporate items

Corporate items and pensions totaled a negative 245 million in the third quarter compared to a negative 367 million in the prior-year period. The improvement is due primarily to Corporate items, which totaled a negative 270 million compared to a negative 379 million in the same quarter a year ago. The current period includes 106 million expenses for outside advisors engaged in connection with investigations into alleged violations of anti-corruption laws and related matters as well as remediation activities. These costs totaled 54 million in the prior-year period. The prior-year period included higher expenses for legal and regulatory matters.

Lower debt and interest rates benefit Corporate Treasury activities

Income before income taxes from Eliminations, Corporate Treasury and other reconciling items was a positive 2 million compared to a negative 97 million in the same period a year earlier. The difference is mainly due to reduced interest expense stemming from a combination of lower indebtedness in Siemens operating businesses as well as lower interest rates on U.S. dollar debt compared to the third quarter of fiscal 2007.

Table of Contents

Subsequent Event & Outlook 13

Subsequent Event**Siemens sells 51% stake in Siemens Enterprise Communications**

On July 29, Siemens announced the sale of a 51% stake in Siemens Enterprise Communications (SEN) to The Gores Group, a U.S.-based financial and operational management firm. The Gores Group will contribute two businesses, which will complement the business of SEN. Siemens and the Gores Group together will contribute a financial investment totaling 350 million. The transaction, which is subject to the approval of regulatory authorities, is expected to close by the end of the current fiscal year and to result in a substantial negative financial impact.

Outlook

Siemens confirms its full-year outlook for fiscal 2008. Organic revenue is expected to grow at twice the rate of global GDP growth, and Group Profit from Operations and income from continuing operations are expected to match the levels achieved in fiscal 2007. Within discontinued operations, divestment of the enterprise networks business is expected to result in a substantial financial impact in fiscal 2008.

This outlook excludes earnings impacts that may arise from legal and regulatory matters, which are not yet quantifiable, and charges that may result from Siemens' transformation programs, including the previously announced SG&A reduction program. Based on the progress of labor negotiations, Siemens intends to book material charges under the SG&A program in the fourth quarter of fiscal 2008 within Corporate Items.

Siemens expects more challenging conditions in the global economy in fiscal 2009 and expects to grow at twice the rate of global GDP. Total Sectors profit is expected to be in the range from 8.0 to 8.5 billion in fiscal 2009. Growth in income from continuing operations is expected to exceed growth in Total Sectors profit. This outlook excludes earnings impacts that may arise from legal and regulatory matters and charges for the SG&A reduction program.

Profit Total Sectors is reconciled to Income from continuing operations before income taxes in the table Segment Information.

Today beginning at 09:00 a.m. CEST, the telephone conference at which CEO Peter Löscher and CFO Joe Kaeser discuss the quarterly figures will be broadcast live on the Internet at www.siemens.com/conferencecall. The accompanying slide presentation can also be viewed here, and a recording of the conference will subsequently be made available as well. Starting at 11:00 CEST, Peter Löscher and Joe Kaeser will hold a telephone conference in English for analysts and investors, which can be followed live at www.siemens.com/analystcall.

This document contains forward-looking statements and information that is, statements related to future, not past, events. These statements may be identified by words such as expects, looks forward to, anticipates, intends, plans, believes, seeks, estimates, will, project or words of similar meaning. Such statements are based on our current expectations and certain assumptions, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens control, affect our operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. For us, particular uncertainties arise, among others, from changes in general economic and business conditions (including margin developments in major business areas); the challenges of integrating major acquisitions and implementing joint ventures and other significant portfolio measures; changes in currency exchange rates and interest rates; introduction of competing products or technologies by other companies; lack of acceptance of new products or services by customers targeted by Siemens; changes in business strategy; the outcome of pending investigations and legal proceedings, especially the corruption investigation we are currently subject to in Germany, the United States and elsewhere; the potential impact of such investigations and proceedings on our ongoing business including our relationships with governments and other customers; the potential impact of such matters on our financial statements; as well as various other factors. More detailed information about certain of these factors is contained throughout this report and in our other filings with the SEC, which are available on the Siemens website, www.siemens.com, and on the SEC's website, www.sec.gov. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the relevant forward-looking statement as expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens does not intend or assume any obligation to update or revise these forward-looking statements in light of developments which differ from those anticipated.

Joint Press Release of Siemens and The Gores Group

Siemens partners with The Gores Group in a joint venture to grow SEN

Siemens with a stake of 49% in JV Total investment of 350 million to fund growth The Gores Group will contribute two assets Enterasys and SER Solutions to the joint venture

Siemens has decided on a partner for its enterprise communications business. The Gores Group, an American investor, will acquire a 51% stake in Siemens Enterprise Communications (also known as SEN). We have been looking for an opportunity to expand our presence in the enterprise networking and communications space and this partnership with Siemens provides the perfect fit, noted Alec Gores, founder and chairman of Gores. Siemens will retain a stake of 49%. We are continuing to intensify the focus of our portfolio on the three Sectors, which are Energy, Industry and Healthcare. In Gores, we have found an extremely experienced technology and telecommunications partner, who strengthens the business with the contribution of the two assets Enterasys and SER Solutions. We are confident, that this will benefit the employees and customers in the long term. As announced already in February, the transferred business will be solidly financed, stated Joe Kaeser, Siemens CFO. The reorganization of Siemens Enterprise Communications, previously announced by Siemens, has made significant progress, ensuring a clean start for the joint venture. The deal of the joint venture is expected to be closed at the end of Siemens fiscal year 2008, pending regulatory approval.

Gores and Siemens plan to invest approximately 350 million in the joint venture not including expenditures for research and development and other expenditures as part of the ordinary course of business. The investments will be made in order to launch innovative Siemens Enterprise Communications products on the market, acquire other technology platforms to capitalize on the powerful Siemens Enterprise Communications distribution organization and further drive the expansion and transition of the business from a hardware supplier to a software and service provider. Gores, which is focused to grow businesses, has extensive management expertise in the technology and telecommunications area and has rapidly restructured businesses undergoing fundamental structural changes and established them as successful independent companies or successfully consolidated them with other companies in its portfolio. Gores has an extensive expertise in Europe as well, where they made several investments in the past few years.

When the joint venture is launched, Siemens Enterprise Communications business will also be supplemented and strengthened by combining the business with two of Gores current portfolio companies Enterasys, a network equipment and security solutions provider and SER Solutions, a call center software company. Combining the three companies will lead to a more complete enterprise networking and communications offering that will leverage Siemens Enterprise Communications powerful distribution capabilities, global reach and extensive customer base, stated Alec Gores.

With its investment of approximately 175 million, which represents half of the total amount of the planned investment of approximately 350 million, Siemens helps Siemens Enterprise Communications to grow. By creating a solid capitalization and further transaction costs as well as liabilities of Siemens Enterprise Communications, there will be a substantial financial impact in the fourth quarter of Siemens fiscal 2008.

On an operational level, business will be driven by Gores. The joint venture will be entitled to continue using the Siemens brand. Key patents and licenses will be transferred to the joint venture.

Production facilities in Leipzig, Germany, and Curitiba, Brazil, and Thessaloniki, Greece, will be transferred to the joint venture. Production at the Leipzig facility is guaranteed by contractual agreements until 2011. Curitiba will be an important production facility for the joint venture. For Thessaloniki different options are being evaluated.

1/2

Table of Contents

Siemens Enterprise Communications will continue to be a preferred supplier to Siemens, to use the Siemens One sales network and to cooperate on customer projects with Siemens. Siemens Enterprise Communications innovative new products like the OpenScape UC Server will remain an integral part of the portfolio. Gores and Siemens have agreed that Siemens Enterprise Communications will continue to offer its OpenPath migration strategies for existing product families in order to ensure a smooth transition to the new Unified Communications solutions. Support and upgrades for Siemens Enterprise Communications products, especially HiPath 3000 and HiPath 4000, are to be continued for the long term.

About The Gores Group, LLC

The **Gores Group, LLC**, founded in 1987, is a private equity firm focused on acquiring controlling interests in businesses which can benefit from the firm's operating experience and flexible capital base. The firm combines the operational expertise and detailed due diligence capabilities of a strategic buyer with the seasoned M&A team of a traditional financial buyer. Siemens AG claims damages from eleven former members of the Corporate Executive Committee

Siemens AG is asserting claims for damages against former members of the former Corporate Executive Committee of the Managing Board of Siemens AG. The company bases its claims on breaches of their organizational and supervisory duties in view of the accusations of illegal business practices and extensive bribery that occurred in the course of international business transactions in the years 2003 to 2006 and the resulting financial burdens to the company. The claims are being asserted, on the basis of currently available information, against Prof. Johannes Feldmayer, Dr. Thomas Ganswindt, Dr. Klaus Kleinfeld, Prof. Dr. Edward G. Krubasik, Rudi Lamprecht, Heinz-Joachim Neubürger, Prof. Dr. Heinrich v. Pierer, Dr. Jürgen Radomski, Dr. Uriel Sharef and Prof. Dr. Klaus Wucherer. The Supervisory Board of Siemens AG adopted a resolution to this effect at its meeting on July 29, 2008. In addition, the company will also assert claims for damages against former Corporate Executive Committee members Prof. Johannes Feldmayer and Dr. Günter Wilhelm in connection with payments to Mr. Wilhelm Schelsky and his companies.

The eleven former members of the Corporate Executive Committee named above will be given an opportunity to state their positions on the accusations before legal action for damages is taken.

Munich, July 29, 2008

Legal Proceedings Third Quarter Fiscal 2008

As previously reported, public prosecutors and other government authorities in jurisdictions around the world are conducting investigations of Siemens and certain of our current and former employees regarding allegations of public corruption, including criminal breaches of fiduciary duty including embezzlement, as well as bribery, money laundering and tax evasion, among others. These investigations involve allegations of corruption at a number of Siemens business units.

For more information regarding these and other legal proceedings in which Siemens is involved, as well as the potential risks associated with such proceedings and their potential financial impact on the Company, please refer to Siemens Annual Report for the fiscal year ended September 30, 2007 (Annual Report) and its annual report on Form 20-F for the fiscal year ended September 30, 2007 (Form 20-F), and, in particular, to the information contained in

Item 3: Key Information Risk Factors , Item 4: Information on the Company Legal Proceedings , Item 5: Operating Financial Review and Prospects , and Item 15: Controls and Procedures of the Form 20-F.

Developments regarding investigations and legal proceedings that have occurred since the publication of Siemens Annual Report and Form 20-F include:

The investigation of the Munich public prosecutor extends beyond the former Communications group. To date, the Munich public prosecutor has announced that groups under investigation include Siemens former Power Transmission and Distribution (PTD) group, in which a former member of the Managing Board is a suspect, the former Power Generation (PG) group, the former Medical Solutions (Med) group, the former Transportation Systems (TS) group and Siemens IT Solutions and Services group. The investigation of the Munich public prosecutor remains ongoing.

In May 2008, the Munich prosecutor announced an investigation against the former Chairman of the Supervisory Board, the former CEO and other former members of the Supervisory Board and of the Managing Board of Siemens AG. The investigation is based on Section 130 of the German Law on Administrative Offences regarding violations of the duty to take appropriate supervisory measures required to prevent breaches of criminal and administrative law.

On July 29, 2008, the Supervisory Board of Siemens AG resolved to claim damages from former members of the former Central Executive Committee of the Managing Board of Siemens AG. The claims are based on breaches of their organizational and supervisory duties in view of the accusations of illegal business practices and extensive bribery that occurred in the course of international business transactions and the resulting financial burdens to the company. On the basis of information available to date, claims are being asserted against ten former executives, including two former Chief Executive Officers of Siemens and a former Chief Financial Officer. Claims for damages are also being brought against one of the

1/6

Table of Contents

aforementioned ten former executives and one additional former member of the Managing Board in connection with payments made to the former head of the independent employee association AUB (*Arbeitsgemeinschaft Unabhängiger Betriebsangehöriger*). The former executives will be invited to respond to the claims before legal action for damages is taken.

Debevoise & Plimpton LLP (Debevoise), an independent external law firm engaged by the Company to conduct an independent and comprehensive investigation to determine whether anti-corruption regulations have been violated and to conduct an independent and comprehensive assessment of the Company's compliance and control systems, is investigating leads generated by the Company's amnesty program, as well as other sources.

In the course of its investigation, Debevoise identifies and reports to the Company evidence of payments to business consultants, sales-related intermediaries and cash payments. The Company analyzes whether such payments were considered in its analysis of income tax non-deductible payments conducted in fiscal 2007. As previously reported, the Company also investigates evidence of additional bank accounts at various locations. The Company is currently investigating the amount of the funds, as well as whether such funds can be recorded on the Company's balance sheet.

In November 2007, authorities in Nigeria conducted searches of the premises of Siemens Ltd. Nigeria in connection with an investigation into alleged illegal payments to Nigerian public officials between 2002 and 2005.

In December 2007, the Norwegian public prosecutor's office conducted a search of Siemens AS Norway's offices as well as several private homes in connection with payments made by Siemens for golf trips in 2003 and 2004, which were attended by members of the Norwegian Department of Defense. In light of this and the previously reported investigation of allegations of bribery and overcharging of the Department of Defense related to the awarding of a contract for the delivery of communication equipment, the Department of Defense has announced that it will not conduct further business with Siemens at this time.

The public prosecutor in Milan, Italy is investigating allegations concerning whether two employees of Siemens S.p.A. made illegal payments to employees of the state-owned gas and power group ENI. In November 2007, the public prosecutor filed charges against the two employees, Siemens S.p.A. and one of its subsidiaries, as well as against other individuals and companies not affiliated with Siemens. The prosecutor is also investigating suspicions of tax evasion by the former CFO of Siemens S.p.A. in connection with the non-deductibility for tax purposes of certain payments.

Authorities in Russia are conducting an investigation into alleged embezzlement of public funds in connection with the award of contracts to Siemens for the delivery of medical equipment to public authorities in Ekaterinburg in the years 2003 to 2005. An employee of Siemens Russia was previously arrested in connection with this investigation.

2/6

Table of Contents

In January 2008, the Vienna, Austria public prosecutor announced an investigation into payments relating to Siemens AG Austria and its subsidiary VAI for which valid consideration could not be identified.

In January 2008, the Malaysian Anti-Corruption Agency executed a search warrant at the premises of Siemens Malaysia and requested interviews with several employees of Siemens Malaysia in connection with an investigation into a project involving the PTD group.

As previously disclosed, Siemens was contacted by representatives of regional development banks, including the Inter-American Development Bank, the Asian Development Bank, the African Development Bank, the European Bank for Reconstruction and Development and the European Investment Bank, regarding anti-corruption inquiries and other matters of relevance to them.

As previously reported, in connection with the investigation relating to an agreement entered into by Siemens with an entity controlled by the former head of the independent employee association AUB (*Arbeitsgemeinschaft Unabhängiger Betriebsangehöriger*), in April 2007, a former member of the Managing Board of Siemens AG was arrested and subsequently posted bail in the amount of 5 million and was released from custody. In connection with the posting of bail, a bank issued a bond (*Bankbürgschaft*) in the amount of 5 million, 4.5 million of which was guaranteed by the Company pursuant to the provisions of German law. The warrant associated with the arrest of the former member of the Managing Board has since been revoked and the bank bond, as well as the Company's guarantee thereof, has been released. In July 2008, the Nürnberg-Fürth prosecutor brought charges against this former member of the Managing Board on several counts of criminal breach of fiduciary duty and tax evasion. According to July 2008 press reports, the Nürnberg-Fürth prosecutor has initiated an investigation against another former member of the Managing Board on suspicion of abetting breach of fiduciary duty.

In December 2007, a suit and motion for approval of a class action was filed in Israel to commence a class action based on the fines imposed by the European Commission for alleged anti-trust violations in connection with high-voltage gas-insulated switchgear. Thirteen companies have been named as defendants in the suit and motion, among them Siemens AG Germany, Siemens AG Austria and Siemens Israel Ltd. The class action alleges damages to electricity consumers in Israel in the amount of approximately 575 million related to higher electricity prices claimed to have been paid because of the alleged anti-trust violations. The court has not yet ruled on the motion for approval of the class action.

In January 2008, the Competition Authority of Slovakia imposed a fine of 3.3 million on Siemens and VA Tech in connection with an investigation into possible anti-trust violations in the market for high-voltage gas-insulated switchgear. The Company has filed an appeal against this decision.

As previously reported, in December 2006, the Japanese Fair Trade Commission (FTC) had

3/6

Table of Contents

searched the offices of more than ten producers and dealers of healthcare equipment, including Siemens Asahi Medical Technologies Ltd., in connection with an investigation into possible anti-trust violations. In February 2008, the FTC announced its findings. Siemens was found not guilty of participating in anti-trust violations, and was therefore not fined or otherwise punished.

As previously reported, the Polish Competition Authority conducted an investigation against Siemens Sp. z.o.o. Poland regarding possible anti-trust violations in the market for the maintenance of diagnostic medical equipment. In May 2008, the Authority issued a final decision finding that Siemens Poland had not violated anti-trust regulations.

In May 2008, Siemens received a decision issued by the Controller of the United Nations upon the recommendation of the Vendor Review Committee of the United Nations Secretariat Procurement Division (UNPD). According to the decision, which is based on the Fifth and Final Report (IIC Report) of the Independent Inquiry Committee into the United Nations Oil for Food Program, Siemens Medical Solutions is to be suspended for a minimum period of six months, effective as of May 23, 2008, from the UNPD Vendor Roster. Siemens appealed the decision. The review of the decision is pending.

The Company has become aware of media reports that the Republic of Iraq filed in June 2008 an action requesting unspecified damages against 93 named defendants with the United States District Court for the Southern District of New York on the basis of findings made in the IIC Report. Siemens S.A.S France, Siemens A.S. Turkey and Osram Middle East FZE, Dubai are reported to be among the 93 named defendants. None of the Siemens affiliates have been served to date.

In June 2008, the court of first instance in Kalimantan Province, Indonesia, found the head of the former Med group of Siemens PT Indonesia not guilty of allegations of participation in bribery, fraud, and overcharging related to the awarding of a contract for the delivery of medical equipment to a hospital in 2003. The decision has been appealed by the prosecutor.

In June 2008, a court of first instance in the Czech Republic reversed the decision by the national competition authority regarding alleged anti-trust valuations in the high-voltage gas-insulated switchgear market and ordered the authority to repay to Siemens the 11.7 million fine imposed by the authority. The authority has the right to appeal the decision.

In July 2008, the public prosecutor in Athens, Greece concluded his preliminary investigation relating to allegations of active and passive bribery of public officials, money laundering and aiding and abetting the foregoing, in connection with, among others, a telecom contract relating to the 2004 Olympic Games awarded by the Greek government to Siemens and purchases of telecom equipment by the Hellenic Telecommunications Organization SA (OTE) in the late 1990s. The prosecutor named several suspects, including a current and several former Siemens employees, and transferred the case to an investigative Magistrate's Court in Athens, which can issue criminal charges against specific individuals. Separately, preliminary investigations continue into allegations of bribery by Siemens of Greek national railways and of

the Greek Ministry of Defence and the Military. The Greek Ministry of Finance also announced tax probes into the local operations of Siemens.

In July 2008, the Central Anti-Corruption Office of Poland executed a search warrant at the premises of Siemens Poland in connection with a corruption investigation relating to the former Com group.

As previously reported, the Company requested arbitration against the Republic of Argentina before the International Center for Settlement of Investment Disputes (ICSID) of the World Bank. The Company claimed that Argentina unlawfully terminated the Company's contract for the development and operation of a system for the production of identity cards, border control, collection of data and voters' registers and thereby violated the Bilateral Investment Protection Treaty between Argentina and Germany (BIT). The Company sought damages for expropriation and violation of the BIT of approximately \$500 million. Argentina disputed jurisdiction of the ICSID arbitration tribunal and argued in favor of jurisdiction of the Argentine administrative courts. The arbitration tribunal rendered a decision on August 4, 2004, finding that it had jurisdiction over the Company's claims and that the Company was entitled to present its claims. A hearing on the merits of the case took place before the ICSID arbitration tribunal in Washington in October 2005. A unanimous decision on the merits was rendered on February 6, 2007, awarding the Company compensation in the amount of \$217.8 million on account of the value of its investment and consequential damages, plus compound interest thereon at a rate of 2.66% since May 18, 2001. The tribunal also ruled that Argentina is obligated to indemnify the Company against any claims of subcontractors in relation to the project (amounting to approximately \$44 million) and, furthermore, that Argentina would be obligated to pay the Company the full amount of the contract performance bond (\$20 million) in the event this bond was not returned within the time period set by the tribunal (which period subsequently elapsed without delivery). On June 4, 2007, Argentina filed with the ICSID an application for the annulment and stay of enforcement of the award, alleging serious procedural irregularities. An ad hoc committee has been appointed to consider Argentina's application. On June 6, 2008, Argentina filed with the ICSID an application for revision and request for stay of enforcement of the award alleging the discovery of new, previously unknown facts that would have decisively affected the award. Argentina relies on information reported in the media alleging bribery by the Company, which it argues makes the BIT inapplicable. The application was registered by the ICSID on June 9, 2008 and forwarded to the original members of the ICSID arbitration tribunal. The application for revision may result in a stay with respect to Argentina's application for annulment pending before the ad hoc committee.

Pursuant to an agreement of June 6, 2005, the Company sold its mobile devices business to Qisda Corp. (formerly named BenQ Corp.), a Taiwanese company. A dispute arose in 2006 between the Company and Qisda concerning the calculation of the purchase price. Beginning in September 2006, several subsidiaries in different countries used by Qisda for purposes of the acquisition filed for insolvency protection and failed to fulfill their obligations under various contracts transferred to them by the Company under the agreement. On December 8, 2006, the Company initiated arbitration proceedings against Qisda requesting a declaratory award that certain allegations made by Qisda in relation to the purchase price calculation are unjustified.

5/6

Table of Contents

The Company further requested an order that Qisda perform its obligations and/or the obligations of its local subsidiaries assumed in connection with the acquisition or, in the alternative, that Qisda indemnify the Company for any losses. The Company's request for arbitration was filed with the International Chamber of Commerce in Paris. The seat of arbitration is Zurich, Switzerland. In March 2007, Qisda raised a counterclaim alleging that the Company made misrepresentations in connection with the sale of the mobile devices business and asserted claims in connection with the purchase price. Qisda amended its counterclaim in March 2008 by (i) changing its request for declaratory relief with regard to the alleged misrepresentations to a request for substantial damages, and (ii) raising further claims for substantial damages and declaratory relief. The Company will request that the arbitral tribunal dismiss the counterclaim.

The Company remains subject to corruption-related investigations in the United States and other jurisdictions around the world. As a result, additional criminal or civil sanctions could be brought against the Company itself or against certain of its employees in connection with possible violations of law, including the U.S. Foreign Corrupt Practices Act (FCPA). In addition, the scope of pending investigations may be expanded and new investigations commenced in connection with allegations of bribery and other illegal acts. The Company's operating activities, financial results and reputation may also be negatively affected, particularly due to imposed penalties, fines, disgorgements, compensatory damages, the formal or informal exclusion from public procurement contracts or the loss of business licenses or permits. In addition to the amounts previously reported, including the fine imposed by the Munich district court, no material charges or provisions for any such penalties, fines, disgorgements or damages have been recorded or accrued as management does not yet have enough information to estimate such amounts reliably. We expect that we will need to record expenses and provisions in the future for penalties, fines or other charges, which could be material, in connection with the investigations. On January 24, 2008, the Company announced, at the Annual Shareholders Meeting, that the Securities and Exchange Commission and the Department of Justice had agreed to begin discussions with the Company regarding a possible settlement of their investigations into possible violations of U.S. law in connection with allegations of corruption. The Company anticipates that such discussions will continue over many months. The Company will also have to bear the costs of continuing investigations and related legal proceedings, as well as the costs of on-going remediation efforts. Furthermore, changes affecting the Company's course of business or changes to its compliance programs beyond those already taken may be required.

The third quarter of fiscal 2008 included a total of 119 million in expenses for outside advisors engaged by Siemens in connection with the investigations into alleged violations of anti-corruption laws and related matters as well as remediation activities. In the first nine months of fiscal 2008, the total amount of these expenses was 421 million.

This document contains forward-looking statements and information that is, statements related to future, not past, events. These statements may be identified by words such as expects, looks forward to, anticipates, intends, plans, believes, seeks, estimates, will, project or words of similar meaning. Such statements are based on our current expectations and certain assumptions, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens control, affect our operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. For us, particular uncertainties arise, among others, from changes in general economic and business conditions (including margin developments in major business areas); the challenges of integrating major acquisitions and implementing joint ventures and other significant portfolio measures; changes in currency exchange rates and interest rates; introduction of competing products or technologies by other companies; lack of acceptance of new products or services by customers targeted by Siemens; changes in business strategy; the outcome of pending investigations and legal proceedings, especially the corruption investigation we are currently subject to in Germany, the United States and elsewhere; the potential impact of such investigations and proceedings on our ongoing business including our relationships with governments and other customers; the potential impact of such matters on our financial statements; as well as various other factors. More detailed information about certain of these factors is contained throughout this report and in our other filings with the SEC, which are available on the Siemens website, www.siemens.com, and on the SEC's website, www.sec.gov. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the relevant forward-looking statement as expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens does not intend or assume any obligation to update or revise these forward-looking statements in light of developments which differ from those anticipated
