On August 10, 2017, Digital Power Corporation, a California corporation (the “Company”), entered into Securities Purchase Agreements (“Agreements”) with five institutional investors (the “Investors”) to sell for an aggregate purchase price of \$800,000, 10% Senior Convertible Promissory Notes (“Convertible Notes”) with an aggregate principal face amount of \$880,000 and warrants to purchase an aggregate of 1,466,667 shares of common stock. As described further below, the principal of the Convertible Notes and interest earned thereon may be converted into shares of common stock at \$0.60 per share and under the terms of the Warrant, up to 1,466,667 shares of common stock may be purchased at an exercise price of \$0.66 per share. Under the Registration Rights Agreement, the Company has agreed to register the shares of common stock underlying the Convertible Notes and Warrants under the Securities Act of 1933.

#### Description of the 10% Senior Convertible Promissory Notes

The Convertible Notes are in the aggregate principal amount of \$880,000 and were sold for \$800,000 and bear simple interest at 10% on the principal amount, and principal and interest are due on February 10, 2018. Subject to certain beneficial ownership limitations, each Investor may convert the principal amount of the Convertible Note and accrued interest earned thereon at any time into shares of common stock at \$0.60 per share. The conversion price of the Convertible Notes is subject to adjustment for customary stock splits, stock dividends, combinations or similar events.

The Convertible Notes contain standard and customary events of default including, but not limited to, failure to make payments when due under the Convertible Note, failure to comply with certain covenants contained in the Convertible Note, or bankruptcy or insolvency of the Company. In the Event of Default, the Company may be required to pay the Investor the principal amount due plus accrued interest earned thereon times 125%, plus any other expenses.

Upon notice and other conditions, the Company may at any time prior to conversion prepay the outstanding principal balance of the Convertible Notes and accrued interest earned thereon by paying the following multiples of the outstanding principal balance and accrued interest earned thereon depending on the prepayment date (i) within 30 days – 105%; (ii) 31 to 60 days - 110%; 61 to 120 days - 115%; and 120 days to maturity - 120%. In addition, the Investors may, at their option, require the Company to repay all or a portion of the Convertible Notes and interest earned thereon in the event the Company issues, or in a series within 6 months issues, debt or equity in the aggregate amount of \$2 million or more.

In addition, while any principal amount, interest or fees or expenses due under the Convertible Notes remain outstanding and unpaid, the Company shall not enter into any public or private offering of its securities (including securities convertible into shares of common stock) with any other investor that has the effect of establishing rights or otherwise benefiting such other investor in a manner more favorable in any material respect to such other investor than the rights and benefits established in favor of the Investor unless, in any such case, the Investor has been provided with the same rights and benefits. Further, until the earlier of the Convertible Notes repayment or conversion, the Company shall not enter into a variable rate transactions.
