Notes to Condensed Consolidated Financial Statements

July 31, 2018

Note 1 - Nature of Operations and Basis of Presentation

Nature of Operations

MamaMancini's Holdings, Inc. (the "Company"), (formerly known as Mascot Properties, Inc.) was organized on July 22, 2009 as a Nevada corporation. The Company has a year-end of January 31.

The Company is a manufacturer and distributor of beef meatballs with sauce, turkey meatballs with sauce, beef meat loaf and other similar meats and sauces. The Company's customers are located throughout the United States, with a large concentration in the Northeast and Southeast.

Note 2 - Summary of Significant Accounting Policies

Basis of Presentation

The condensed consolidated financial statements and related notes have been prepared in accordance with accounting principles generally accepted in the United States of America ("US GAAP") and include the accounts of the Company and its wholly-owned subsidiaries. All material intercompany balances and transactions have been eliminated in consolidation.

Following the closing of the merger with Joseph Epstein Food Enterprises, Inc. ("JEFE") on November 1, 2017, the financial statements of JEFE are consolidated with that of the Company. The prior period financial statements included in the condensed consolidated financial statements have been adjusted to reflect this transaction.

The unaudited financial information furnished herein reflects all adjustments, consisting solely of normal recurring items, which in the opinion of management are necessary to fairly state the financial position of the Company and the results of its operations for the periods presented. This report should be read in conjunction with the Company's consolidated financial statements and notes thereto included in the Company's Form 10-K for the year ended January 31, 2018 filed on May 16, 2018. The Company assumes that the users of the interim financial information herein have read or have access to the audited financial statements for the preceding fiscal year and that the adequacy of additional disclosure needed for a fair presentation may be determined in that context. The condensed consolidated balance sheet at January 31, 2018 was derived from audited financial statements but does not include all disclosures required by accounting principles generally accepted in the United States of America. The results of operations for the interim periods presented are not necessarily indicative of results for the year ending January 31, 2019.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Such estimates and assumptions impact, among others, the following: allowance for doubtful accounts, inventory obsolescence and the fair value of share-based payments.

Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the consolidated financial statements, which management considered in formulating its estimate could change in the near term due to one or more future confirming events. Accordingly, the actual results could differ significantly from our estimates.

Risks and Uncertainties

The Company operates in an industry that is subject to intense competition and change in consumer demand. The Company's operations are subject to significant risk and uncertainties including financial and operational risks including the potential risk of business failure.

The Company has experienced, and in the future expects to continue to experience, variability in sales and earnings. The factors expected to contribute to this variability include, among others, (i) the cyclical nature of the grocery industry, (ii) general economic conditions in the various local markets in which the Company competes, including a potential general downturn in the economy, and (iii) the volatility of prices pertaining to food and beverages in connection with the Company's distribution of the product. These factors, among others, make it difficult to project the Company's operating results on a consistent basis.

Cash

The Company considers all highly liquid instruments purchased with a maturity of three months or less to be cash equivalents. The Company held no cash equivalents at July 31, 2018 and January 31, 2018.

The Company minimizes its credit risk associated with cash by periodically evaluating the credit quality of its primary financial institution. The balance at times may exceed federally insured limits.

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable are stated at the amount management expects to collect from outstanding balances. The Company generally does not require collateral to support customer receivables. The Company provides an allowance for doubtful accounts based upon a review of the outstanding accounts receivable, historical collection information and existing economic conditions. The Company determines if receivables are past due based on days outstanding, and amounts are written off when determined to be uncollectible by management. The maximum accounting loss from the credit risk associated with accounts receivable is the amount of the receivable recorded, which is the face amount of the receivable net of the allowance for doubtful accounts. As of July 31, 2018 and January 31, 2018, the Company had reserves of \$2,000.

Inventories

Inventories are stated at the lower of cost or net realizable value using the first-in, first-out (FIFO) valuation method. Inventory was comprised of the following at July 31, 2018 and January 31, 2018:

	July 31, 2018	January 31, 2018
Raw Materials	\$512,869	\$486,917
Work in Process	25,513	21,387
Finished goods	741,175	315,972
	\$1,279,557	\$824,276

Property and Equipment

Property and equipment are recorded at cost. Depreciation expense is computed using straight-line methods over the estimated useful lives.

Asset lives for financial statement reporting of depreciation are:

Machinery and equipment	2-7 years
Furniture and fixtures	3 years
Leasehold improvements	*

(* Amortized on a straight-line basis over the term of the lease or the estimated useful lives, whichever period is shorter.

Upon sale or retirement of property and equipment, the related cost and accumulated depreciation are removed from the accounts and any gain or loss is reflected in the consolidated statements of operations.

Fair Value of Financial Instruments

For purpose of this disclosure, the fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation. The carrying amount of the Company's short-term financial instruments approximates fair value due to the relatively short period to maturity for these instruments.

Research and Development

Research and development is expensed as incurred. Research and development expenses for the three months ended July 31, 2018 and 2017 were \$37,083 and \$33,333, respectively. Research and development expenses for the six months ended July 31, 2018 and 2017 were \$67,179 and \$67,331, respectively.

Shipping and Handling Costs

The Company classifies freight billed to customers as sales revenue and the related freight costs as general and administrative expenses.

Revenue Recognition

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)*. ASU 2014-09 supersedes the revenue recognition requirements under Topic 605, *Revenue Recognition*, and most industry-specific guidance throughout the Industry Topics of the ASC. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which an entity expects to be entitled in exchange for those goods or services. Under the new guidance, an entity is required to perform the following five steps: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract, and (5) recognize revenue when (or as) the entity satisfies a performance obligation. The new guidance will significantly enhance comparability of revenue recognition practices across entities, industries, jurisdictions and capital markets. Additionally, the guidance requires improved disclosures as to the nature, amount, timing and uncertainty of revenue that is recognized. In May 2016, the FASB issued ASU No. 2016-12, *Revenue from Contracts with Customers (Topic 606)—Narrow-Scope Improvements and Practical Expedients*. This ASU clarified guidance on assessing collectability, presenting sales tax, measuring noncash consideration, and certain transition matters.

The Company adopted this guidance and related amendments as of the first quarter of fiscal 2019, applying the full retrospective transition method. The Company has determined that there are no material changes to the recognition, timing and classification of revenues and expenses; additionally, the adoption of ASU 2014-09 did not have a significant impact to pretax income upon adoption or on the consolidated financial statement disclosures.

The Company's sales predominantly contain a single performance obligation and revenue is recognized at a single point in time when ownership, risks and rewards transfer. Typically, this occurs when the goods are shipped to the customer. Revenues are recognized in an amount that reflects the net consideration the Company expects to receive in exchange for the goods. The Company reports all amounts billed to a customer in a sale transaction as revenue, including those amounts related to shipping and handling. Shipping and handling costs are included in cost of goods sold. Under the new revenue guidance, the Company recognizes shipping and handling activities as a fulfillment of the Company's promise to transfer products to its customers.

The Company promotes its products with advertising, consumer incentives and trade promotions. These programs include discounts, slotting fees, coupons, rebates, in-store display incentives and volume-based incentives. Customer trade promotion and consumer incentive activities are recorded as a reduction to the sale price based on amounts estimated as being due to customers and consumers at the end of a period. The Company derives these estimates principally on historical utilization and redemption rates.

Payment terms in the Company's invoices are based on the billing schedule established in contracts and purchase orders with customers. The Company generally recognizes the related trade receivable when the goods are shipped.

Expenses such as slotting fees, sales discounts, and allowances are accounted for as a direct reduction of revenues as follows:

	Six Months Ended July 31, 2018	Six Months Ended July 31, 2017
Gross Sales	\$ 13,585,549	\$ 12,587,604
Less: Slotting, Discounts, Allowances	202,725	224,869
Net Sales	\$ 13,382,824	\$ 12,362,735

Cost of Sales

Cost of sales represents costs directly related to the production and manufacturing of the Company's products. Costs include product development, freight, packaging, and print production costs.

Advertising

Costs incurred for producing and communicating advertising for the Company are charged to operations as incurred. Producing and communicating advertising expenses for the three months ended July 31, 2018 and 2017 were \$391,026 and \$412,849, respectively. Producing and communicating advertising expenses for the six months ended July 31, 2018 and 2017 were \$906,183 and \$738,943, respectively.

Stock-Based Compensation

The Company accounts for stock-based compensation in accordance with ASC Topic 718, "Compensation – Stock Compensation" ("ASC 718") which establishes financial accounting and reporting standards for stock-based employee compensation. It defines a fair value-based method of accounting for an employee stock option or similar equity instrument. The Company accounts for compensation cost for stock option plans in accordance with ASC 718. The

Company accounts for share-based payments to non-employees in accordance with ASC 505-50 "*Equity Based Payments to Non-Employees*".

The Company recognizes all forms of share-based payments, including stock option grants, warrants and restricted stock grants, at their fair value on the grant date, which are based on the estimated number of awards that are ultimately expected to vest.

Share-based payments, excluding restricted stock, are valued using a Black-Scholes option pricing model. Grants of share-based payment awards issued to non-employees for services rendered have been recorded at the fair value of the share-based payment, which is the more readily determinable value. The grants are amortized on a straight-line basis over the requisite service periods, which is generally the vesting period. If an award is granted, but vesting does not occur, any previously recognized compensation cost is reversed in the period related to the termination of service. Stock-based compensation expenses are included in cost of goods sold or selling, general and administrative expenses, depending on the nature of the services provided, in the consolidated statement of operations. Share-based payments issued to placement agents are classified as a direct cost of a stock offering and are recorded as a reduction in additional paid in capital.

For the three months ended July 31, 2018, share-based compensation amounted to \$36,945 relating to options issued to employees and consultants for services rendered.

For the three months ended July 31, 2017, share-based compensation amounted to \$57,349 for options and common stock issued to employees and consultants for services rendered.

For the six months ended July 31, 2018, share-based compensation amounted to \$79,163 relating to options issued to employees and consultants for services rendered.

For the six months ended July 31, 2017, share-based compensation amounted to \$147,499 for options and common stock issued to employees and consultants for services rendered.

For the six months ended July 31, 2018 and 2017, when computing fair value of share-based payments, the Company has considered the following variables:

	July 31, 2018		July 31, 2017	
Risk-free interest rate	1.99	%	1.18	%
Expected life of grants	2.0 years		3.76 years	
Expected volatility of underlying stock	172	%	298	%
Dividends	0	%	0	%

The expected option term is computed using the “simplified” method as permitted under the provisions of ASC 718-10-S99. The Company uses the simplified method to calculate expected term of share options and similar instruments as the Company does not have sufficient historical exercise data to provide a reasonable basis upon which to estimate expected term.

The expected stock price volatility for the Company’s stock options was estimated using the historical volatilities of the Company’s common stock. Risk free interest rates were obtained from U.S. Treasury rates for the applicable periods.

Earnings (Loss) Per Share

Earnings per share (“EPS”) is the amount of earnings attributable to each share of common stock. For convenience, the term is used to refer to either earnings or loss per share. EPS is computed pursuant to Section 260-10-45 of the FASB Accounting Standards Codification. Pursuant to ASC Paragraphs 260-10-45-10 through 260-10-45-16, basic EPS shall be computed by dividing income available to common stockholders (the numerator) by the weighted-average number of common shares outstanding (the denominator) during the period. Income available to common stockholders shall be computed by deducting both the dividends declared in the period on preferred stock (whether or not paid) and the dividends accumulated for the period on cumulative preferred stock (whether or not earned) from income from continuing operations (if that amount appears in the income statement) and also from net income. The computation of diluted EPS is similar to the computation of basic EPS except that the denominator is increased to include the number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued during the period to reflect the potential dilution that could occur from common shares issuable through contingent shares issuance arrangement, stock options or warrants.

The following table provides a reconciliation of the numerator and denominator used in computing basic and diluted net income (loss) attributable to common stockholders per common share.

Recent Accounting Pronouncements

In February 2016, the FASB issued ASU 2016-02, “Leases (Topic 842).” Under ASU 2016-02, lessees will be required to recognize, for all leases of 12 months or more, a liability to make lease payments and a right-of-use asset representing the right to use the underlying asset for the lease term. Additionally, the guidance requires improved disclosures to help users of financial statements better understand the nature of an entity’s leasing activities. This ASU is effective for public reporting companies for interim and annual periods beginning after December 15, 2018, with early adoption permitted, and must be adopted using a modified retrospective approach. The Company is in the process of evaluating the effect of the new guidance on its condensed consolidated financial statements and disclosures.

Management does not believe that any recently issued, but not yet effective accounting pronouncements, when adopted, will have a material effect on the accompanying condensed consolidated financial statements.

The Company has key sales personnel and a sales network of paid broker representatives. We currently work with approximately 35 retail food brokers who sell to Supermarket and Club Store customers.

The Company had a supply agreement with Joseph Epstein Food Enterprises, Inc. ("JEFE"), a related party. On November 1, 2017, the Company acquired JEFE through a merger transaction whereby JEFE became a wholly-owned subsidiary of the Company. Under the terms of the Merger Agreement and in connection with the merger, the Company acquired all assets of JEFE. The consideration for the transaction was (a) the extinguishment of the Inter-Company Loan between the parties, (b) the assumption by the Company of all JEFE accounts payable and accrued expenses, (c) the assumption by the Company of certain third-party loans to JEFE and (d) the indemnification of Carl Wolf with respect to his collateralization of a bank loan to JEFE. As a result of the transaction, JEFE's financial statements have been consolidated with the financial statements of the Company. No cash or stock was exchanged in

connection with the transaction.

Management believes the merger of JEFE into the Company has had a positive effect upon operations. Management believes that gross margin, operating profit, and net income has increased in this quarter and will increase in the future as a result due to plant efficiencies with higher volume and plant overhead reduction as a percentage of sales.

We believe that MamaMancini's products have the ability to expand sales and deliver more products within several areas of consumption by consumers such as fresh meat, prepared foods, hot bars, cold bars in delis, and sandwich sections of supermarkets and other food retailers. In addition, we believe that MamaMancini's products can be sold into food service channels, mass market, and exported or as a component of other products.

The Company also incurred non-recurring interest charges of approximately \$112,500 in relation to the extension of the Manatuck note and the corresponding accounting for debt modification which resulted in additional interest expense, finance charges and the write-off of debt discount related to prior debt.

Sales: Sales, net of slotting fees and discounts decreased by approximately 19% to \$5,640,830 during the three months ended July 31, 2018, from \$7,005,434 during the three months ended July 31, 2017. Sales for the quarter were negatively impacted by changes in the purchasing offices in a number of our major retailer customers - not reflective of our product quality, trade relationships or consumer acceptance. Also, during last year's second quarter we had an extraordinarily high one-time customer inventory build with new programs that went into effect. We believe that this was a short-term situation and sales growth has resumed in the current quarter over the current quarter and prior year.

Gross Profit: The gross profit margin was 37% for the three months ended July 31, 2018 compared to 34% for the three months ended July 31, 2017. The Company believes its gross margin as a percentage of sales will increase in future operating periods due more efficient operations.

Operating Expenses: Operating expenses decreased by 3% during the three months ended July 31, 2018, as compared to the three months ended July 31, 2017. The \$55,130 decrease in total operating expenses is primarily attributable to

Advertising, social media and promotional expenses of \$21,323 related to a decrease in sales and demos;

Trade show and travel expense of \$23,589 related to decrease in sales;

Commission expenses of \$22,922 related to increased sales; and

Postage and freight of \$79,226 due to lower sales this fiscal year.

Other Expense: Other expenses increased by \$143,061 to \$340,021 for the three months ended July 31, 2018 as compared to \$196,960 during the three months ended July 31, 2017. These amounts were offset by an increase in inventories of \$455,300, a decrease in accounts payable and accrued expenses of approximately \$395,700, and an approximate \$104,000 decrease in the current portion of debt.

Although the continued revenue growth coupled with improved gross margins and control of expenses leads management to believe that it is probable that the Company's cash resources will be sufficient to meet our cash requirements through the third quarter of fiscal year ended January 31, 2019, the Company may require additional funding to finance the growth of its current and expected future operations as well as to achieve its strategic objectives. There can be no assurance that financing will be available in amounts or terms acceptable to the Company, if at all. In that event, the Company would be required to change its growth strategy and seek funding on that basis, though there is no guarantee it will be able to do so.

Subsequent to July 31, 2018, the Company collected a net amount of \$2.4 million on outstanding receivables.

Recent Accounting Pronouncements

In February 2016, the FASB issued ASU 2016-02, "*Leases (Topic 842)*." Under ASU 2016-02, lessees will be required to recognize, for all leases of 12 months or more, a liability to make lease payments and a right-of-use asset representing the right to use the underlying asset for the lease term. Additionally, the guidance requires improved disclosures to help users of financial statements better understand the nature of an entity's leasing activities. This ASU is effective for public reporting companies for interim and annual periods beginning after December 15, 2018, with early adoption permitted, and must be adopted using a modified retrospective approach. The Company is in the process of evaluating the effect of the new guidance on its condensed consolidated financial statements and disclosures.

Management does not believe that any recently issued, but not yet effective accounting pronouncements, when adopted, will have a material effect on the accompanying condensed consolidated financial statements.
