\$10 principal amount per unit
Settlement DateSeptember 3, 2015
CUSIP No. 06053W664
Maturity DateSeptember 12, 2016

Autocallable Coupon Bearing Notes Linked to the Common Stock of Lowe's Companies, Inc.

Maturity of approximately one year and one week, if not called prior to maturity

Automatic call of the notes at \$10 per unit plus the final interest payment if the Underlying Stock is flat or increases from the Starting Value on the relevant Observation Date

Interest payable quarterly at the rate of 9.40% per year

No participation in any increase in the price of the Underlying Stock, and the Redemption Amount at maturity will not exceed the principal amount per unit plus the final interest payment

1-to-1 downside exposure to decreases in the Underlying Stock, with up to 100% of your principal at risk

All payments on the notes subject to the credit risk of Bank of America Corporation

Limited secondary market liquidity, with no exchange listing

The notes are being issued by Bank of America Corporation (BAC). There are important differences between the notes and a conventional debt security, including different investment risks and certain additional costs. See Risk Factors beginning on page TS-7 of this term sheet and beginning on page PS-6 of product supplement CBN-1.

The initial estimated value of the notes as of the pricing date is \$9.71 per unit, which is less than the public offering price listed below. See Summary on the following page, Risk Factors beginning on page TS-7 of this term sheet and Structuring the Notes on page TS-10 of this term sheet for additional information. The actual value of your notes at any time will reflect many factors and cannot be predicted with accuracy.

None of the Securities and Exchange Commission (the SEC), any state securities commission, or any other regulatory body has approved or disapproved of these securities or determined if this Note Prospectus (as defined below) is truthful or complete. Any representation to the contrary is a criminal offense.

2016 Summary

The Autocallable Coupon Bearing Notes Linked to the Common Stock of Lowe's Companies, Inc., due September 12, 2016 (the notes) are our senior unsecured debt securities. The notes are not guaranteed or insured by the Federal Deposit Insurance Corporation or secured by collateral. The notes will rank equally with all of our other unsecured and unsubordinated debt. Any payments due on the notes, including any repayment of principal, will be subject to the credit risk of BAC. The notes will pay quarterly interest payments. The notes will be automatically called if the Observation Level of the Underlying Stock, which is the common stock of Lowe's Companies, Inc., is equal to or greater than the Call Level (which will be equal to the Starting Value) on any Observation Date. If the notes are called, you will receive a payment equal to the principal amount plus the final interest payment. If not called, at maturity, the payment on the notes will equal the principal amount if the Ending Value of the Underlying Stock is at or above the Threshold Value (which is equal to the Starting Value). If the Ending Value is less than the Threshold Value, you will lose all or a portion of the principal amount of your notes. Payments on the notes, including the amount you receive at maturity or upon an automatic call, will be calculated based on the \$10 principal amount per unit and will depend on the performance of the Underlying Stock, subject to our credit risk. See Terms of the Notes below.

The economic terms of the notes (including the interest rate) are based on our internal funding rate, which is the rate we would pay to borrow funds through the issuance of market-linked notes and the economic terms of certain related hedging arrangements. Our internal funding rate is typically lower than the rate we would pay when we issue conventional fixed or floating rate debt securities. This difference in funding rate, as well as the underwriting discount and the hedging related charge described below, reduced the economic terms of the notes to you and the initial estimated value of the notes on the pricing date. Due to these factors, the public offering price you pay to purchase the notes will be greater than the initial estimated value of the notes.

On the cover page of this term sheet, we have provided the initial estimated value for the notes. This initial estimated value was determined based on our and our affiliates' pricing models, which take into consideration our internal funding rate and the market prices for the hedging arrangements related to the notes. The notes are subject to an automatic call, and the initial estimated value is based on an assumed tenor of the notes. For more information about the initial estimated value and the structuring of the notes, see Structuring the Notes on page TS-10.

Determining Payment on the Notes

Automatic Call Provision

The notes will be called automatically on an Observation Date if the Observation Level on that Observation Date is equal to or greater than the Starting Level. If the notes are called, you will receive \$10 per unit plus the final interest payment.

YesIs the Observation

Level equal to
or greater than

The notes will be called and you will receive per

the Call Level

on an \$10 + the final interest

Observation payment.

Observation

Date?

No The notes will not be called.

Redemption Amount Determination

If the notes are not automatically called, on the maturity date, you will receive a cash payment per unit determined as follows:

YesIs the

Ending Value
greater than or
equal to the

You will receive per unit:
\$10 + the final interest

Threshold

Value?

No You will receive per unit:

+ the final interest payment

Because the Threshold Value for the notes is equal to the Starting Value, you

payment

will lose all or a portion of your investment if the Ending Value is less

than the Starting Value.

The terms and risks of the notes are contained in this term sheet and in the following:

Product supplement CBN-1 dated May 11, 2015:

You may wish to consider an investment in the notes if:

You anticipate that the Observation Level on one or You want to hold your notes for the full term. more Observation Dates, or the Ending Value on the Valuation Date, will be greater than or equal to the Starting Value.

You seek interest payments on your investment.

You accept that the maximum return on the notes is limited to the sum of the quarterly interest payments, and that you will not participate in any increases in the price of the Underlying Stock.

You are willing to risk a loss of principal and return In addition to interest payments, you seek an if the notes are not automatically called and the Ending Value is below the Threshold Value.

You are willing to forgo dividends or other benefits paid on the Underlying Stock. of owning shares of the Underlying Stock.

You are willing to accept a limited or no market for liquid secondary market. sales prior to maturity, and understand that the market prices for the notes, if any, will be affected by various factors, including our actual and perceived creditworthiness, our internal funding rate notes. and fees and charges on the notes.

You are willing to assume our credit risk, as issuer of the notes, for all payments under the notes, including the Redemption Amount or the payment upon an automatic call.

The notes may not be an appropriate investment for you if:

You believe that the notes will not be automatically called and the Ending Value will be less than the Threshold Value.

You anticipate that the price of the Underlying Stock will increase and seek to participate in that increase.

You seek principal repayment or preservation of capital.

additional return above the principal amount.

You seek to receive dividends or other distributions

You seek an investment for which there will be a

You are unwilling or are unable to take market risk on the notes or to take our credit risk as issuer of the

We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

2016

Examples of Hypothetical Payments

The following examples are for purposes of illustration only. They are based on hypothetical values and show hypothetical returns on the notes. They illustrate the calculation of the Call Amount or Redemption Amount, as applicable, based on the hypothetical terms set forth below. The actual amount you receive and the resulting total rate of return will depend on the actual Starting Value, Call Level, Threshold Value, Ending Value, each Observation Level and the term of your investment. The following examples do not take into account any tax consequences from investing in the notes. These examples are based on:

- 1) a Starting Value of 100.00;
- 2) a Threshold Value of 100.00;
- a Call Level of
- 100.00;
- the term of the notes from September 3, 2015 to September 12, 2016 if the notes are not called on any of the Observation Dates;
- 5) the interest rate of 9.40% per year; and
- 6) Observation Dates occurring approximately six and nine months after the pricing date.

The **hypothetical** Starting Value of 100.00 used in these examples has been chosen for illustrative purposes only. The actual Starting Value is 68.90. For recent actual prices of the Underlying Stock, see The Underlying Stock section below. In addition, all payments on the notes are subject to issuer credit risk.

Notes Are Called on an Observation Date

The notes will be called at \$10.00 plus the applicable final interest payment on one of the Observation Dates if the Observation Level is equal to or greater than the Call Level.

Example 1 The Observation Level on the first Observation Date is 110.00. You will receive the quarterly interest payments up to the respective Call Settlement Date. The notes will be called at \$10.00. After the notes are called, they will no longer remain outstanding and there will not be any further payments on the notes. In this case, you will receive interest payments on the notes for only approximately six months.

Example 2 The Observation Level on the first Observation Date is below the Call Level, but the Observation Level on the second Observation Date is 105.00. You will receive the quarterly interest payments up to the respective Call Settlement Date. The notes will be called at \$10.00. After the notes are called, they will no longer remain outstanding and there will not be any further payments on the notes. In this case, you will receive interest payments on the notes for only approximately nine months.

Notes Are Not Called on Any Observation Date

<u>Example 3</u> The Observation Levels on the first and second Observation Dates are below the Call Level, and the Ending Value on the Valuation Date is 105.00. You will receive the quarterly interest payments up to the maturity date. At maturity, the notes will also pay the principal amount.

Example 4 The notes are not called on any Observation Date and the Ending Value on the Valuation Date is 85.00, which is less than the Threshold Value. Consequently, you will receive all quarterly interest payments; however, you will also participate on a 1-for-1 basis in the decrease in the price of the Underlying Stock below the Threshold Value. The Redemption Amount per unit will equal:

On the maturity date, you will receive the Redemption Amount per unit of \$8.50.

Summary of the Hypothetical Examples

	Notes Are Called on an Observation Date		Notes Are Not Called on Any Observation Date	
	Example 1	Example 2	Example 3	Example 4
Starting Value	100.00	100.00	100.00	100.00
Call Level	100.00	100.00	100.00	100.00
Threshold Value	100.00	100.00	100.00	100.00
