The exact stock prices and effective dates may not be set forth in the table above, in which case:

if the applicable stock price is between two stock prices in the table or the effective date is between two effective dates in the table, the fundamental change early settlement rate will be determined by straight-line interpolation between the fundamental change early settlement rates set forth for the higher and lower stock prices and the two effective dates, as applicable, based on a 365-day year;

if the applicable stock price is in excess of \$90.00 per share (subject to adjustment), then the fundamental change early settlement rate will be the minimum settlement rate; or

if the applicable stock price is less than \$10.00 per share (subject to adjustment), the “minimum stock price,” the fundamental change early settlement rate will be determined as if the stock price equaled the minimum stock price, and using straight line interpolation, as described in the first bullet of this paragraph, if the effective date is between two dates in the table.

The maximum number of shares of the Issuer’s common stock deliverable under a Purchase Contract is 2.0964 , subject to adjustment.

Repurchase of Amortizing Notes at the Option of the Holder:

If the Issuer elects to settle the Purchase Contracts early, holders of Amortizing Notes (whether as components of Units or separate Amortizing Notes) will have the right to require the Issuer to repurchase their Amortizing Notes for cash at a repurchase price per Amortizing Note equal to the principal amount of such Amortizing Note as of the

repurchase date, plus accrued and unpaid interest on such principal amount from, and including, the immediately preceding Installment Payment Date to, but not including, the repurchase date, calculated at an annual rate of 5.25%.

Delivery of Common Stock:

Subject to the assumptions and provisions described in the Preliminary Prospectus Supplement, the following table illustrates that a holder of a Unit or a separate Purchase Contract, as applicable, will receive upon mandatory settlement the following numbers of shares of the Issuer's common stock at the following assumed constant daily VWAPs:

Assumed Constant Daily VWAP	Number of Shares of Common Stock
\$40.00	2.0964
\$42.50	2.0964
\$45.00	2.0964
\$47.50	2.0964
\$47.70	2.0964
\$50.00	2.0000
\$52.50	1.9048
\$55.00	1.8182
\$57.50	1.7391
\$58.43	1.7114
\$60.00	1.7114
\$62.50	1.7114

As a result, if, for the applicable observation period, the daily VWAP remains constant and is greater than or equal to the Threshold Appreciation Price, the holder would receive only approximately 81.64% of the appreciation in market value of the Issuer's common stock that the holder would have received had it purchased \$100.00 worth of shares of the Issuer's common stock at the Reference Price instead of a Unit.

If, for the applicable observation period, the daily VWAP remains constant and is less than the Threshold Appreciation Price but greater than the Reference Price, the Purchase Contracts will settle at the money, and the holder would not receive the benefit of any appreciation in the market value of Issuer's common stock.

If, for the applicable observation period, the daily VWAP remains constant and is less than or equal to the Reference Price, the holder would realize a loss on the decline in market value of Issuer's common stock below the Reference Price.

Updates to Disclosure

The following Sections of the Tangible Equity Units Preliminary Prospectus Supplement and Common Stock Preliminary Prospectus Supplement, as applicable, are updated as follows:

1. Recent Developments-PowerBar Acquisition

We expect to fund the acquisition of the PowerBar and Musashi brands with cash on hand or a portion of the net proceeds from approximately \$260 million of new term loan borrowings under our senior secured credit facilities, which will be incurred concurrent with (and as part of the same tranche of loans as) the approximately \$625 million of term loans we expect to incur to fund our acquisition of Michael Foods. In total, the Company would have approximately \$885 million of term loan borrowings upon completion of the Michael Foods acquisition.

2. Recent Developments-Financing Transactions (and other references to the financing transactions):

Descriptions of the financing transactions will be revised to reflect the increased offering size, and that the Company currently expects to incur approximately \$885 million of new term loan borrowings upon consummation of the Michael Foods acquisition, of which approximately \$625 million would be used to finance the Michael Foods acquisition, and the remaining approximately \$260 million would be used for general corporate purposes, which could include, among other things, financing the previously announced PowerBar and Musashi acquisition and financing additional future acquisition opportunities, working capital and capital expenditures.

3. Risk Factor appearing on Page S-40 of the Tangible Equity Units Preliminary Prospectus Supplement:

We may not be able to settle your purchase contracts and deliver shares of our common stock, or make payments on the amortizing notes, in the event that we file for bankruptcy.

Upon the occurrence of specified events of bankruptcy, insolvency or reorganization with respect to us, the mandatory settlement date for each purchase contract, whether held separately or as part of a Unit, will automatically accelerate. If we file for bankruptcy protection prior to settlement of the purchase contracts, we may be unable to deliver our common stock to you and the purchase contract agreement will (i) provide that, in such circumstances, your claim will be subordinated to the prior payment in full of all other claims against us, whether secured or unsecured and whether incurred, assumed or guaranteed after the initial issuance date of the Units and (ii) include an acknowledgement by you that the purchase contracts are not intended to provide you with rights that are senior to the interests of holders of our common stock in any U.S. bankruptcy proceeding concerning us; in addition, in any bankruptcy proceeding concerning us, under section 510(b) of the Bankruptcy Code (Title 11 of the United States Code) (the “Bankruptcy Code”) such claim will be subordinated to rank equally with the interests of holders of our common stock, in which case you will only be able to recover damages to the extent holders of our common stock receive any recovery. Indeed, to the extent that the purchase contracts are “executory contracts” as defined in the Bankruptcy Code, under the Bankruptcy Code we would be prohibited from assuming the purchase contracts and delivering our common stock to you. See “Description of the Purchase Contracts-Consequences of Bankruptcy.”

In addition, bankruptcy law generally prohibits the payment of pre-bankruptcy debt by a company that has commenced a bankruptcy case while the case is pending. If we become a debtor in a bankruptcy case, so long as the case was pending you would likely not receive payments of principal or interest due under the amortizing note component of the Units.

4. Description of Purchase Contracts - Consequences of Bankruptcy, appearing on page S-97 of the Tangible Equity Units Preliminary Prospectus Supplement:

Upon the occurrence of specified events of bankruptcy, insolvency or reorganization with respect to Post, the mandatory settlement date for each purchase contract, whether held separately or as part of a Unit, will automatically accelerate. Upon acceleration, holders will be entitled to receive a number of shares of our common stock per purchase contract equal to the maximum settlement rate in effect immediately prior to such acceleration (regardless of the market value of our common stock at that time). If we file for bankruptcy court protection prior to the settlement of the purchase contracts, however, we may be unable to deliver our common stock in settlement of the accelerated purchase contracts after such filing. Instead, a holder would have a damage claim against us for the value of our common stock that we would have otherwise been required to deliver upon settlement of the purchase contracts, but the purchase contract agreement will (i) provide that such claim will be subordinated to the prior payment in full of all other claims against us, whether secured or unsecured and whether incurred, assumed or guaranteed after the initial issuance date of the Units and (ii) include an acknowledgement by the holders that the purchase contracts are not intended to provide the holders with rights that are senior to the interests of holders of our common stock in any U.S. bankruptcy proceeding concerning us; in addition, in any bankruptcy proceeding concerning us, under section 510(b) of the Bankruptcy Code such claim will be subordinated to rank equally with the interests of holders of our common stock, in which case you will only be able to recover damages to the extent holders of our common stock receive any recovery.
