Table of Contents

BONANZA CREEK ENERGY, INC. AND SUBSIDIARIES

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1 - ORGANIZATION AND BUSINESS

Bonanza Creek Energy, Inc. (“BCEI” or, together with our consolidated subsidiaries, the “Company”) is engaged in the acquisition, exploration, development and production of onshore oil and associated liquids-rich natural gas in the United States. Our oil and liquids-weighted assets are concentrated primarily in the Wattenberg Field in Colorado, which the Company has designated the Rocky Mountain region and the Dorcheat Macedonia Field in southern Arkansas, which the Company has designated the Mid-Continent region.

NOTE 2 - BASIS OF PRESENTATION

These statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information. The quarterly financial statements included herein do not necessarily include all of the disclosures as may be required under generally accepted accounting principles for complete financial statements. There has been no material change in the information disclosed in the notes to the consolidated financial statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2014 (the “2014 Form 10-K”), except as disclosed herein. These consolidated financial statements include all of the adjustments, which, in the opinion of management, are necessary for a fair presentation of the financial position and results of operations. All such adjustments are of a normal recurring nature only. The results of operations for the quarterly periods are not necessarily indicative of the results to be expected for the full fiscal year. The Company evaluated events subsequent to the balance sheet date of March 31, 2015 through the filing date of this report. Certain prior period amounts are reclassified to conform to the current period presentation, when necessary.

Principles of Consolidation

The condensed consolidated balance sheets (“balance sheets”) include the accounts of BCEI and its wholly owned subsidiaries, Bonanza Creek Energy Operating Company, LLC, Bonanza Creek Energy Resources, LLC, Bonanza Creek Energy Upstream LLC, Bonanza Creek Energy Midstream, LLC, Holmes Eastern Company, LLC and Rocky Mountain Infrastructure, LLC. All significant intercompany accounts and transactions have been eliminated.

Significant Accounting Policies

The significant accounting policies followed by the Company were set forth in Note 1 to the 2014 Form 10-K and are supplemented by the notes throughout this report. These unaudited condensed consolidated financial statements should be read in conjunction with the 2014 Form 10-K.

Recently Issued Accounting Standards

In March 2015, the Financial Accounting Standards Board issued Update No. 2015-03 – Interest – Imputation of Interest, Simplifying the Presentation of Debt Issuance Costs. The update requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability. This authoritative accounting guidance is effective for fiscal years beginning after December 15, 2015 and interim periods within those fiscal years on a retrospective basis. The Company is currently evaluating the provisions of this guidance and assessing its impact, but does not currently believe it will have a material effect on the Company's financial statements or disclosures.

NOTE 3 - DISCONTINUED OPERATIONS

During June 2012, the Company began marketing, with intent to sell, all of its oil and gas properties in California classifying them as assets held for sale. Assets are classified as held for sale when the Company commits to a plan to sell the assets and there is reasonable certainty that the sale will take place within one year. The Company determined that its intent to sell all of its assets in a region qualified as discontinued operations. The

Table of Contents

Company sold its remaining property in this region during the first quarter of 2014 for approximately \$6.0 million and recorded a gain on sale of oil and gas properties in the amount of \$6.5 million as of March 31, 2014.

The total revenues, expenses, and income associated with the operation of the oil and gas properties held for sale are presented below.

	Three Months Ended March 31, 2015 2014 (in thousands)	
Net revenues:		
Oil and gas sales	\$ —	\$ 361
Operating expenses:		
Lease operating expense	—	366
Severance and ad valorem taxes	—	13
Depreciation, depletion and amortization	—	67
Total operating expenses		446
Loss from operations associated with oil and gas properties held for sale	\$ —	\$ (85)

NOTE 4 - ACCOUNTS PAYABLE AND ACCRUED EXPENSES

Accounts payable and accrued expenses contain the following:

	As of March 31, 2015 (in thousands)	As of December 31, 2014
Drilling and completion costs	\$ 51,964	\$ 82,844
Accounts payable trade	15,326	5,493
Accrued general and administrative cost	6,755	13,541
Lease operating expense	4,249	3,569
Accrued reclamation cost	162	162
Accrued interest	18,311	14,839
Production and ad valorem taxes and other	22,237	25,340
Total accounts payable and accrued expenses	\$ 119,004	\$ 145,788

NOTE 5 - LONG-TERM DEBT

Long-term debt consisted of the following as of March 31, 2015 and December 31, 2014:

	As of March 31, 2015	As of December 31, 2014
	(in thousands)	
Revolving credit facility	\$ —	\$ 33,000
6.75% Senior Notes due 2021	500,000	500,000
Unamortized premium on 6.75% Senior Notes	7,313	7,619
5.75% Senior Notes due 2023	300,000	300,000
Total long-term debt	\$ 807,313	\$ 840,619

Credit Facility

The Company's senior secured revolving Credit Agreement (the "revolving credit facility"), dated March 29, 2011, as amended, provides for borrowings up to \$1 billion. As of March 31, 2015, the borrowing base under the revolving credit facility was \$600 million. The Company elected to limit bank commitments at \$500 million while reserving the option to access, at the Company's request, the full \$600 million borrowing base. The borrowing base is redetermined semiannually on May 15 and November 15. The revolving credit facility is collateralized by substantially all of the Company's assets and matures on September 15, 2018. As of March 31, 2015, the Company had no outstanding balance under the revolving credit facility with an available borrowing capacity of \$576 million, if the Company elected to take advantage of the entire borrowing base (without giving effect to any scheduled or interim redetermination), after reduction for the outstanding letter of credit of \$24 million. As of December 31, 2014, the Company had \$33 million outstanding under the revolving credit facility with an

Table of Contents

available borrowing capacity of \$543 million, if the Company elected to take advantage of the entire borrowing base, after reduction for the outstanding letter of credit of \$24 million.

The revolving credit facility restricts, among other items, the payment of dividends, certain additional indebtedness, sale of assets, loans and certain investments and mergers. The revolving credit facility also contains certain financial covenants, which require the maintenance of minimum current and debt coverage ratios, as defined by the revolving credit facility. The Company was in compliance with all financial and non-financial covenants as of March 31, 2015, and through the filing date of this report.

Senior Notes

The \$500 million aggregate principal amount of 6.75% Senior Notes that mature on April 15, 2021 (“6.75% Senior Notes”) and the \$300 million aggregate principal amount of 5.75% Senior Notes that mature on February 1, 2023 (“5.75% Senior Notes” and together with the 6.75% Senior Notes, the “Senior Notes”) are unsecured senior obligations and rank equal in right of payment with all of the Company’s existing and any future unsecured senior debt, and are senior in right of payment to any future subordinated debt. The Senior Notes are jointly and severally guaranteed on a senior unsecured basis by our existing and future domestic subsidiaries that guarantee or are borrowers under our revolving credit facility. The Company has no independent assets or operations unrelated to its investments in its consolidated subsidiaries. There are no significant restrictions on the Company’s ability or the ability of any subsidiary guarantor to obtain funds from its subsidiaries by such means as a dividend or loan. The Company is subject to certain covenants under the respective indentures governing the Senior Notes that limit the Company’s ability to incur additional indebtedness, issue preferred stock, and make restricted payments, including dividends. The Company was in compliance with all covenants under its Senior Notes as of March 31, 2015, and through the filing date of this report.

NOTE 6 - COMMITMENTS AND CONTINGENT LIABILITIES

From time to time, the Company is involved in various commercial and regulatory claims, litigation and other legal proceedings that arise in the ordinary course of its business. The Company assesses these claims in an effort to determine the degree of probability and range of possible loss for potential accrual in its condensed consolidated financial statements. In accordance with accounting authoritative guidance, an accrual is recorded for a loss contingency when its occurrence is probable and damages can be reasonably estimated based on the most likely anticipated outcome or the minimum amount within a range of possible outcomes. Because legal proceedings are inherently unpredictable and unfavorable resolutions could occur, assessing contingencies is highly subjective and requires judgments about uncertain future events. When evaluating contingencies, the Company may be unable to provide a meaningful estimate due to a number of factors, including the procedural status of the matter in question, the presence of complex or novel legal theories, and/or the ongoing discovery and development of information important to the matters. The Company regularly reviews contingencies to determine the adequacy of its accruals and related disclosures. No claims have been made, nor is the Company aware of any material uninsured liability which the

Company may have, as it relates to any environmental cleanup, restoration or the violation of any rules or regulations. As of the filing date of this report, there were no material pending or overtly threatened legal actions against the Company of which it is aware.

Commitments

There have been no material changes from the commitments disclosed in the notes to the Company's consolidated financial statements included in the 2014 Form 10-K.

NOTE 7 - STOCK-BASED COMPENSATION

Restricted Stock under the Long Term Incentive Plan

The Company grants shares of restricted stock to directors, eligible employees and officers under its Long Term Incentive Plan ("LTIP"). Each share of restricted stock represents one share of the Company's common stock to be released from restriction upon completion of the vesting period. The awards typically vest in one-third increments over three years. Each share of restricted stock is entitled to a non-forfeitable dividend, if the Company

Table of Contents

were to declare one, and has the same voting rights as a share of the Company's common stock. Shares of restricted stock are valued at the closing price of the Company's common stock on the grant date and are recognized as general and administrative expense over the vesting period of the award.

During the three months ended March 31, 2015, the Company granted 355,598 shares of restricted stock under the Company's LTIP to certain employees. The fair value of the issuance was \$9.6 million. Total expense recorded for restricted stock for the three month periods ended March 31, 2015 and 2014, was \$2.9 million and \$6.6 million, respectively. As of March 31, 2015, unrecognized compensation cost was \$24.3 million and will be amortized through 2018.

A summary of the status and activity of non-vested restricted stock for the three months ended March 31, 2015 is presented below.

	Restricted Stock	Weighted- Average Grant-Date Fair Value
Non-vested at beginning of year	589,529	\$ 37.66
Granted	355,598	\$ 27.11
Vested	(208,113)	\$ 26.21
Forfeited	(3,291)	\$ 43.97
Non-vested at end of quarter	733,723	\$ 34.53

Performance Stock Units under the Long Term Incentive Plan

The Company grants performance stock units ("PSUs") to certain officers as part of its LTIP. The number of shares of the Company's common stock that may be issued to settle PSUs ranges from zero to two times the number of PSUs awarded. PSUs granted prior to 2014 are determined based on the Company's performance over a three-year measurement period and vest in their entirety at the end of the measurement period. Satisfaction of the performance conditions for the PSUs granted in 2014 and thereafter are determined at the end of each annual measurement period over the course of the three-year performance cycle in an amount up to two-thirds of the target number of PSUs that are eligible for vesting (such that an amount equal to 200% of the target number of PSUs may be earned during the performance cycle). For all grants, the PSUs will be settled in shares of the Company's common stock following the end of the three-year performance cycle. Any PSUs that have not vested at the end of the applicable measurement period are forfeited. The performance criterion for the PSUs is based on a comparison of the Company's total shareholder return ("TSR") for the measurement period compared with the TSRs of a group of peer companies for the measurement period. Compensation expense associated with PSUs is recognized as general and administrative expense over the measurement period.

The fair value of each PSU is estimated at the date of grant using a Monte Carlo simulation, which results in an expected percentage of PSUs to be earned during the performance period. The following table presents the assumptions used to determine the fair value of the PSUs granted during the three months ended March 31, 2015 and for the year ended December 31, 2014.

	For the Three Months Ended March 31, 2015	For the Year Ended December 31, 2014
Expected term of award	3	3
Risk-free interest rate	0.17% - 0.99%	0.12% - 0.9%
Expected volatility	65%	40% - 45%

During the three months ended March 31, 2015, the Company granted 42,217 PSUs under the LTIP to certain officers. The fair value of the issuance was \$1.5 million. Total expense recorded for PSUs for the three month periods ended March 31, 2015 and 2014 was \$488,000 and \$174,000, respectively. As of March 31, 2015, there was \$4.5 million of total unrecognized compensation expense related to unvested PSUs to be amortized through 2018.

Table of Contents

A summary of the status and activity of PSUs for the three months ended March 31, 2015 is presented below:

	PSU	Weighted-Average Grant-Date Fair Value
Non-vested at beginning of year(1)	94,173	\$ 37.55
Granted(1)	42,217	\$ 34.50
Vested(1)	—	\$ —
Forfeited(1)	—	\$ —
Non-vested at end of quarter(1)	136,390	\$ 36.61

(1) The number of awards assumes that the associated performance condition is met at the target amount. The final number of shares of the Company's common stock issued may vary depending on the performance multiplier, which ranges from zero to two, depending on the level of satisfaction of the performance condition.

NOTE 8 - FAIR VALUE MEASUREMENTS

The Company follows fair value measurement authoritative guidance, which defines fair value, establishes a framework for using fair value to measure assets and liabilities, and expands disclosures about fair value measurements. The authoritative accounting guidance defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The statement establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions of what market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of the inputs as follows:

Level 1: Quoted prices are available in active markets for identical assets or liabilities

Level 2: Quoted prices in active markets for similar assets and liabilities, quoted prices for identical or similar instruments in markets that are not active, and model-derived valuations whose inputs are observable or whose significant value drivers are observable

Level 3: Significant inputs to the valuation model are unobservable

Edgar Filing: Bonanza Creek Energy, Inc. - Form 10-Q

Financial and non-financial assets and liabilities are to be classified based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of the fair value of assets and liabilities and their placement within the fair value hierarchy levels.

The following tables present the Company's financial and non-financial assets and liabilities that were accounted for at fair value as of March 31, 2015 and December 31, 2014 and their classification within the fair value hierarchy:

	As of March 31, 2015		
	Level 1	Level 2	Level 3
	(in thousands)		
Derivative assets(1)	\$ —	\$ 87,395	\$ —
Unproved properties(2)	\$ —	\$ —	\$ 193,400

Table of Contents

	As of December 31, 2014		
	Level 1	Level 2	Level 3
	(in thousands)		
Derivative assets(1)	\$ —	\$ 104,005	\$ —
Proved properties(2)	\$ —	\$ —	\$ 407,900
Asset retirement obligations(3)	\$ —	\$ —	\$ 6,200

-
- (1) This represents a financial asset or liability that is measured at fair value on a recurring basis.
- (2) This represents non-financial assets that are measured at fair value on a nonrecurring basis due to impairments. This is the fair value of the asset base that was subjected to impairment and does not reflect the entire asset balance as presented on the accompanying balance sheets. Please refer to the Unproved Oil and Gas Properties and Proved Oil and Gas Properties sections below for additional discussion.
- (3) This represents the revision to estimate of the asset retirement obligation, which is a non-financial liability that is measured at fair value on a nonrecurring basis. Please refer to the Asset Retirement Obligation section below for additional discussion.

Derivatives

Fair value of all derivative instruments are estimated with industry-standard models that consider various assumptions, including quoted forward prices for commodities, time value of money, volatility factors and current market and contractual prices for the underlying instruments, as well as other relevant economic measures. All valuations were compared against counterparty statements to verify the reasonableness of the estimate. The Company's commodity swaps and collars are validated by observable transactions for the same or similar commodity options using the NYMEX futures index, and are designated as Level 2 within the valuation hierarchy. Presently, all of our derivative arrangements are concentrated with five counterparties all of which are lenders under the Company's revolving credit facility.

Proved Oil and Gas Properties

Proved oil and gas property costs are evaluated for impairment and reduced to fair value when there is an indication that the carrying costs exceed the sum of the undiscounted cash flows. The Company uses Level 3 inputs and the income valuation technique, which converts future amounts to a single present value amount, to measure the fair value of proved properties through an application of risk-adjusted discount rates and price forecasts selected by the Company's management. The calculation of the risk-adjusted discount rate is a significant management estimate based on the best information available. Management believes that the risk-adjusted discount rate is representative of current market conditions and reflects the following factors: estimates of future cash payments, expectations of possible variations in the amount and/or timing of cash flows, the risk premium, and nonperformance risk. The price forecast is based on the NYMEX strip pricing, adjusted for basis differentials. Future operating costs are also adjusted as deemed appropriate for these estimates. Proved properties classified as held for sale are valued using a market approach, based on an estimated selling price, as evidenced by the most current bid prices received from third parties. If an estimated selling price is not available, the Company utilizes the income valuation technique discussed above. There were no

proved properties measured at fair value at March 31, 2015. The Company impaired the Dorcheat Macedonia Field which had a carrying value of \$519.2 million to its fair value of \$391.9 million and recognized an impairment of \$127.3 million for the year ended December 31, 2014. The Company impaired the McKamie Patton Field which had a carrying value of \$41.0 million to its fair value of \$16.0 million and recognized an impairment of \$25.0 million for the year ended December 31, 2014. The Company impaired the McCallum Field which had a carrying value of \$15.3 million to its fair value of zero and recognized an impairment of \$15.3 for the year ended December 31, 2014.

Unproved Oil and Gas Properties

Unproved oil and gas property costs are evaluated for impairment and reduced to fair value when there is an indication that the carrying costs may not be fully recoverable. To measure the fair value of unproved properties, the Company uses Level 3 inputs and the income valuation technique, which takes into account the following significant assumptions: future development plans, risk weighted potential resource recovery, remaining lease life, and estimated reserve values. Unproved properties classified as held for sale are valued using a market approach,

Table of Contents

based on an estimated selling price, as evidenced by the most current bid prices received from third parties. If an estimated selling price is not available, the Company uses the price received for similar acreage in recent transactions by the Company or other market participants in the principal market. The Company impaired the Wattenberg Field which had a carrying value of \$198.9 million to its fair value of \$193.4 million and recognized an impairment of unproved properties of \$5.5 million due to lease expirations for the three months ended March 31, 2015. There were no unproved properties measured at fair value as of December 31, 2014.

Asset Retirement Obligation

The Company utilizes the income valuation technique to determine the fair value of the asset retirement obligation liability at the point of inception by applying a credit-adjusted risk-free rate, which takes into account the Company's credit risk, the time value of money, and the current economic state, to the undiscounted expected abandonment cash flows. Upon completion of wells and natural gas plants, the Company records an asset retirement obligation at fair value using Level 3 assumptions. Given the unobservable nature of the inputs, the initial measurement of the asset retirement obligation liability is deemed to use Level 3 inputs. There were no asset retirement obligations measured at fair value as of March 31, 2015. The Company had \$6.2 million of asset retirement obligations recorded at fair value as of December 31, 2014.

Long-term Debt

As of March 31, 2015, the Company had \$500 million of outstanding 6.75% Senior Notes and \$300 million of outstanding 5.75% Senior Notes. The 6.75% Senior Notes are recorded at cost net of the unamortized premium on the accompanying balance sheets at \$507.3 million and \$507.6 million as of March 31, 2015 and December 31, 2014, respectively. The fair value of the 6.75% Senior Notes as of March 31, 2015 and December 31, 2014 was \$486.3 million and \$440.0 million, respectively. The 5.75% Senior Notes are recorded at cost on the accompanying balance sheets at \$300.0 million as of March 31, 2015 and December 31, 2014. The fair value of the 5.75% Senior Notes as of March 31, 2015 and December 31, 2014 was \$277.1 million and \$243.0 million, respectively. The Senior Notes are measured using Level 1 inputs based on a secondary market trading price. The Company's revolving credit facility, when drawn upon, approximates fair value as the applicable interest rates are floating.

NOTE 9 - DERIVATIVES

The Company enters into commodity derivative contracts to mitigate a portion of its exposure to potentially adverse market changes in commodity prices and the associated impact on cash flows. All contracts are entered into for other-than-trading purposes. The Company's derivatives include swaps and collar arrangements for oil and gas and none of the derivative instruments qualify as having hedging relationships.

Table of Contents

As of March 31, 2015, and as of the filing date of this report, the Company had the following derivative commodity contracts in place:

Settlement Period	Derivative Instrument	Total Volumes (Bbls/MMBtu per day)	Average Fixed Price	Average Short Floor Price	Average Floor Price	Average Ceiling Price	Fair Market Value of Assets (in thousands)
Oil							
2Q 2015	Swap	5,000	\$ 94.41				\$0,315
3Q 2015	Swap	2,000	\$ 93.43				7,428
4Q 2015	Swap	2,000	\$ 93.43				7,022
2Q 2015	3-Way Collar	5,500		\$ 67.73	\$ 84.09	\$95.16	8,097
3Q 2015	3-Way Collar	6,500		\$ 68.46	\$ 84.62	\$95.49	9,112
4Q 2015	3-Way Collar	6,500		\$ 68.46	\$ 84.62	\$95.49	8,619
2016	3-Way Collar	5,500		\$ 70.00	\$ 85.00	\$96.83	24,922
							\$5,515
Gas							
2Q - 4Q 2015	3-Way Collar	15,000		\$ 3.50	\$ 4.00	\$4.75	\$,880
							\$,880
Total							\$7,395

Derivative Assets and Liabilities Fair Value

The Company's commodity derivatives are measured at fair value and are included in the accompanying balance sheets as derivative assets and liabilities.

The following table contains a summary of all the Company's derivative positions reported on the accompanying balance sheets as of March 31, 2015 and December 31, 2014:

Derivative Assets:	As of March 31, 2015 Balance Sheet Location	Fair Value (in thousands)

Edgar Filing: Bonanza Creek Energy, Inc. - Form 10-Q

Commodity contracts	Current assets	\$ 69,056
Commodity contracts	Noncurrent assets	18,339
Derivative Liabilities:		
Commodity contracts	Current liabilities	—
Commodity contracts	Long-term liabilities	—
Total derivative asset		\$ 87,395

As of December 31, 2014		
	Balance Sheet Location	Fair Value (in thousands)
Derivative Assets:		
Commodity contracts	Current assets	\$ 86,240
Commodity contracts	Noncurrent assets	17,765
Derivative Liabilities:		
Commodity contracts	Current liabilities	—
Commodity contracts	Long-term liabilities	—
Total derivative asset		\$ 104,005

Table of Contents

The following table summarizes the components of the derivative gain (loss) presented on the accompanying statements of operations:

	Three months ended March 31, 2015 2014 (in thousands)	
Derivative cash settlement gain (loss):		
Oil contracts	\$ 34,791	\$ (1,699)
Gas contracts	675	(528)
Total derivative cash settlement gain (loss)(1)	\$ 35,466	\$ (2,227)
Change in fair value loss	\$ (16,610)	\$ (6,551)
Total derivative gain (loss)(2)	\$ 18,856	\$ (8,778)

-
- (1) Derivative cash settlement gain (loss) for the three months ended March 31, 2015 and 2014 is reported in the derivative cash settlements line item on the accompanying condensed consolidated statements of cash flows within the net cash for investing activities.
- (2) Total derivative gain (loss) for the three months ended March 31, 2015 and 2014 is reported in the derivative gain (loss) line item on the accompanying condensed consolidated statements of cash flows within the net cash provided by operating activities.

NOTE 10 - EARNINGS PER SHARE

The Company issues shares of restricted stock entitling the holders to receive non-forfeitable dividends, if and when, the Company was to declare a dividend, before vesting, thus making the awards participating securities. The awards are included in the calculation of earnings per share under the two-class method. The two-class method allocates earnings for the period between common shareholders and unvested participating shareholders.

The Company issues PSUs, which represent the right to receive, upon settlement of the PSUs, a number of shares of the Company's common stock that range from 0% to 200% of the number of PSUs granted on the award date. The number of potentially dilutive shares related to PSUs is based on the number of shares, if any, that would be issuable at the end of the respective reporting period, assuming that date was the end of the measurement period applicable to such PSUs. Please refer to Note 7 - Stock-Based Compensation, for additional discussion.

Table of Contents

The following table sets forth the calculation of earnings per basic and diluted shares from continuing and discontinued operations and net income (loss) for the three month periods ended March 31, 2015 and 2014:

	Three Months Ended March 31,	
	2015	2014
	(in thousands, except per share amounts)	
Income (loss) from continuing operations:		
Income (loss) from continuing operations	\$ (18,421)	\$ 9,577
Less: undistributed earnings (loss) to unvested restricted stock	(314)	181
Undistributed earnings (loss) to common shareholders	(18,107)	9,396
Basic income (loss) per common share from continuing operations	\$ (0.41)	\$ 0.24
Diluted income (loss) per common share from continuing operations	\$ (0.41)	\$ 0.24
Income from discontinued operations:		
Income from discontinued operations	\$ —	\$ 3,954
Less: undistributed earnings to unvested restricted stock	—	75
Undistributed earnings to common shareholders	—	3,879
Basic income per common share from discontinued operations	\$ —	\$ 0.10
Diluted income per common share from discontinued operations	\$ —	\$ 0.10
Net income (loss):		
Net income (loss)	\$ (18,421)	\$ 13,531
Less: undistributed earnings (loss) to unvested restricted stock	(314)	256
Undistributed earnings (loss) to common shareholders	(18,107)	13,275
Basic net income (loss) per common share	\$ (0.41)	\$ 0.34
Diluted net income (loss) per common share	\$ (0.41)	\$ 0.34
Weighted-average shares outstanding - basic	44,519,701	39,605,083
Add: dilutive effect of contingent PSUs	—	156,655
Weighted-average shares outstanding - diluted	44,519,701	39,761,738

The Company was in a net loss position for the three months ended March 31, 2015, which made the 147,786 potentially dilutive shares anti-dilutive. The Company had no anti-dilutive shares for the three months ended March 31, 2014.

NOTE 11 - CAPITAL STOCK

On February 6, 2015, the Company completed a public offering of 8,050,000 shares of its common stock generating net proceeds of \$202.8 million after deducting underwriter discounts, commissions and offering expenses of approximately \$6.5 million. The Company used a portion of the net proceeds to repay all of the outstanding borrowings under its revolving credit facility and intends to use the remaining net proceeds for general corporate purposes, including its drilling and development program and other capital expenditures.

NOTE 12 - INCOME TAXES

The Company uses the asset and liability method of accounting for deferred income taxes. Deferred tax assets and liabilities are determined based on the temporary differences between the financial statement and tax basis of assets and liabilities. Deferred tax assets or liabilities at the end of each period are determined using the tax rate in effect at that time. During the three month periods ended March 31, 2015 and 2014, the effective tax rate was 38.5%.

The deferred income tax liability for an oil and gas exploration company is dependent on many variables such as estimating the economic lives of depleting oil and gas reserves and commodity prices. Accordingly, the liability is subject to continual recalculation, revision of the numerous estimates required, and may change significantly in the event of such things as major acquisitions, divestitures, product price changes, changes in reserve estimates, changes in reserve lives, and changes in tax rates or tax laws.

Table of Contents

As of March 31, 2015, the Company had no unrecognized tax benefits. The Company's management does not believe that there are any new items or changes in facts or judgments that should impact the Company's tax position during the first quarter of 2015. Given the substantial net operating loss carry forward at the federal level, neither significant interest expense nor penalties charged for any examining agents' tax adjustments of income tax returns are anticipated, as any such adjustments would very likely adjust only net operating loss carry forward.

NOTE 13 – SUBSEQUENT EVENTS

During the first quarter of 2015, the Company formed a wholly owned subsidiary, Rocky Mountain Infrastructure, LLC, to hold gathering systems and related infrastructure that service the Wattenberg Field. Subsequent to March 31, 2015, the Company transferred approximately \$38 million of gathering systems and pipelines from the Bonanza Creek Energy Operating Company, LLC subsidiary to the Rocky Mountain Infrastructure, LLC subsidiary.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" contained in our Annual Report on Form 10-K for the year ended December 31, 2014, as well as the unaudited condensed consolidated financial statements and notes thereto included in this Quarterly Report on Form 10-Q.

Executive Summary

We are a Denver-based exploration and production company focused on the extraction of oil and associated liquids-rich natural gas in the United States. Our predecessors were founded in 1999 and we went public in December of 2011. Our shares of common stock are listed for trading on the NYSE under the symbol "BCEI."

Our operations are focused in the Wattenberg Field in Colorado, which we have designated the Rocky Mountain region, and the Dorcheat Macedonia Field in southern Arkansas, which we have designated the Mid-Continent region. The Wattenberg Field is one of the premier oil and gas resource plays in the United States benefiting from a low cost structure and strong production efficiencies. Our management team has extensive experience acquiring and operating oil and gas properties and significant expertise in horizontal drilling and fracture stimulation, which we believe will continue to contribute to the development of our sizable inventory of projects, including those targeting the Niobrara and Codell formations in the Rocky Mountain region and oily Cotton Valley sands in the Mid-Continent region. Our corporate strategy is to create shareholder value by increasing sales volumes from our Wattenberg horizontal opportunities and develop additional resource potential in both of our core areas while capitalizing on well cost reduction gained through efficiencies, managing risk exposure through derivative contracts, and engaging in prudent evaluation of potential acquisitions. We operate approximately 98% of our proved reserves with an average working

interest of approximately 86% providing us with significant control over the rate of development of our asset base. Despite the uncertainty surrounding the global economy and volatility in commodity prices, we believe the economic returns and economic growth generated by our portfolio of oil and gas assets position us well moving forward.

Effective as of January 1, 2015, the Company revised the agreements with its natural gas processors in the Rocky Mountain region to report operated sales volumes on a three stream basis, which allows for separate reporting of NGLs extracted from the natural gas stream and sold as a separate product. The contract revisions necessitated a change in our reporting of sales volumes. Prior period sales volumes, revenues, and prices have not been reclassified to conform to the current presentation given the prospective nature of the agreements. The NGL volumes identified by the Company's gas purchasers are converted to an oil equivalent. The Company believes that this conversion will more accurately convey its production and sales volumes and will allow results to be more comparable with those of our peers. This revision will increase sales volumes and the percentage of sales volumes that relate to NGLs.

Table of Contents

Financial and Operating Highlights

Our financial results and operational highlights for the first quarter of 2015 included:

- Total liquidity of \$646.5 million, consisting of a period-end cash balance plus funds available under our revolving credit facility, as compared with \$545.3 million for the first quarter of 2014;
- Completed a public offering of 8,050,000 shares of our common stock on February 6, 2015, which generated net proceeds of \$202.8 million;
- Increased sales volumes by 40% to 2,475.8 MBoe in the first quarter of 2015 from 1,773.1 MBoe in the first quarter of 2014, with oil and NGL production representing 76% of total sales volumes in the first quarter of 2015;
- Cash operating costs, which consist of lease operating expense, severance and ad valorem taxes, and the cash portion of general and administrative expense, per barrel decreased by \$9.40 per Boe to \$15.83 per Boe as compared to the first quarter of 2014;
- Projected drilling and completion AFEs on 4,000 foot laterals have decreased by 20% from \$4.5 million to \$3.6 million during the first quarter of 2015 from 2014 drilling and completion AFEs;
- The Company established a midstream subsidiary, Rocky Mountain Infrastructure, LLC to house our gathering systems and related infrastructure that service the Wattenberg Field and revised our natural gas processing agreements to allow for three stream reporting;
- Experienced average cumulative production of 40,000 Boe per well for the first 120 days of production on 9 wells in the Wattenberg Field using a 28-stage fracture design;
- Drilled 30 and completed 32 gross wells within our Rocky Mountain region and drilled 9 and completed 5 gross wells within our Mid-Continent region during the first quarter of 2015;
- Capital expenditures of \$123.4 million, as compared with \$151.9 million for the first quarter of 2014; and
- Cash flows provided by operating activities of \$32.1 million, as compared with \$77.7 million for the first quarter of 2014.

Outlook for 2015

Because the global economic outlook, central bank policies and commodity price environment are uncertain, we have planned a flexible capital spending program for 2015. We estimate our total capital expenditures in 2015 to be approximately \$420 million, allocating approximately 90% to the Wattenberg Field and 10% to southern Arkansas. Actual capital expenditures are subject to a number of factors, including economic conditions and commodity prices, and the Company may reduce or augment the capital budget as appropriate throughout the year. This estimated capital investment is expected to result in sales volumes of 27,800 Boe/d to 30,700 Boe/d, while maintaining a strong oil and liquids profile.

Table of Contents

Results of Continuing Operations

Three Months Ended March 31, 2015 Compared to Three Months Ended March 31, 2014

The following table summarizes our revenues, sales volumes, and average sales prices for the periods indicated.

	Three Months Ended March 31,			Percent Change
	2015	2014	Change	
	(In thousands, except percentages)			
Revenues:				
Crude oil sales	\$ 59,420	\$ 103,747	\$ (44,327)	(43) %
Natural gas sales	7,988	18,515	(10,527)	(57) %
Natural gas liquids sales	5,668	5,126	542	11 %
CO2 sales	—	7	(7)	(100)%
Product revenue	\$ 73,076	\$ 127,395	\$ (54,319)	(43) %
Sales Volumes:				
Crude oil (MBbls)	1,490.5	1,164.2	326.3	28 %
Natural gas (MMcf)	3,506.9	3,089.2	417.7	14 %
Natural gas liquids (MBbls)	400.8	94.0	306.8	326 %
Crude oil equivalent (MBoe)(1)	2,475.8	1,773.1	702.7	40 %
Average Sales Prices (before derivatives)(2):				
Crude oil (per Bbl)	\$ 39.87	\$ 89.11	\$ (49.24)	(55) %
Natural gas (per Mcf)	\$ 2.28	\$ 5.99	\$ (3.71)	(62) %
Natural gas liquids (per Bbl)	\$ 14.14	\$ 54.53	\$ (40.39)	(74) %
Crude oil equivalent (per Boe)(1)	\$ 29.52	\$ 71.85	\$ (42.33)	(59) %
Average Sales Prices (after derivatives)(2):				
Crude oil (per Bbl)	\$ 63.21	\$ 87.65	\$ (24.44)	(28) %
Natural gas (per Mcf)	\$ 2.47	\$ 5.82	\$ (3.35)	(58) %
Natural gas liquids (per Bbl)	\$ 14.14	\$ 54.53	\$ (40.39)	(74) %
Crude oil equivalent (per Boe)(1)	\$ 43.84	\$ 70.59	\$ (26.75)	(38) %

(1) Determined using the ratio of 6 Mcf of natural gas to 1 Bbl of crude oil. Excludes CO2 sales.

(2) The derivatives economically hedge the price we receive for crude oil and natural gas.

Revenues decreased by 43%, to \$73.1 million for the three months ended March 31, 2015 compared to \$127.4 million for the three months ended March 31, 2014 due to a 59% decrease in oil equivalent pricing. The decreased pricing was offset by increased sales volumes of 40% for the three months ended March 31, 2015 compared to the same period in 2014. The increased volumes are a direct result of the \$498.8 million expended for drilling and completion during the last three quarters of 2014 and \$121.6 million expended during the three months ended March 31, 2015. During the

period from March 31, 2014 through March 31, 2015, we drilled 128 and completed 106 gross wells in the Rocky Mountain region and drilled 42 and completed 46 gross wells in the Mid-Continent region.

Table of Contents

The following table summarizes our operating expenses for the periods indicated.

	Three Months Ended March 31,			Percent Change
	2015	2014	Change	
	(In thousands, except percentages)			
Expenses:				
Lease operating expense	\$ 19,264	\$ 17,082	\$ 2,182	13 %
Severance and ad valorem taxes	6,496	10,749	(4,253)	(40) %
Exploration	498	1,083	(585)	(54) %
Depreciation, depletion and amortization	59,004	41,132	17,872	43 %
Abandonment and impairment of unproved properties	5,469	—	5,469	100 %
General and administrative	16,872	23,714	(6,842)	(29) %
Operating expenses	\$ 107,603	\$ 93,760	\$ 13,843	15 %
Selected Costs (\$ per Boe):				
Lease operating expense	\$ 7.78	\$ 9.63	\$ (1.85)	(19) %
Severance and ad valorem taxes	2.62	6.06	(3.44)	(57) %
Exploration	0.20	0.61	(0.41)	(67) %
Depreciation, depletion and amortization	23.83	23.20	0.63	3 %
Abandonment and impairment of unproved properties	2.21	—	2.21	100 %
General and administrative	6.81	13.37	(6.56)	(49) %
Operating expenses	\$ 43.45	\$ 52.87	\$ (9.42)	(18) %

Lease Operating Expense. Our lease operating expense increased \$2.2 million, or 13%, to \$19.3 million for the three months ended March 31, 2015 from \$17.1 million for the three months ended March 31, 2014 and decreased on an equivalent basis from \$9.63 per Boe to \$7.78 per Boe. The increase in aggregate lease operating expense was related to increase sales volumes of 40%. During the quarter ended March 31, 2015, two of the largest components of lease operating expense were compression and pumping which increased \$1.4 million and \$800,000, respectively, over the comparable period in 2014. The Company has negotiated reduced operating costs while increasing production for the three months ended March 31, 2015 driving the per barrel rate down when compared to the same period in 2014. Lease operating expense for the three months ended March 31, 2014 were unusually high due to extremely cold weather.

Severance and ad valorem taxes. Our severance and ad valorem taxes decreased \$4.2 million to \$6.5 million for the three months ended March 31, 2015 from \$10.7 million for the three months ended March 31, 2014. Severance and ad valorem taxes primarily correlate to revenue. Revenues decreased by 43% for the three months ended March 31, 2015 when compared to the same period in 2014 causing the severance and ad valorem taxes to decrease by 40%.

Exploration. Our exploration expense decreased \$585,000 to \$498,000 during the three months ended March 31, 2015 from \$1.1 million for the three months ended March 31, 2014. During the three months ended March 31, 2015, we incurred \$498,000 in delay rentals. During the three months ended March 31, 2014, we incurred a \$1.0 million dry hole charge related to a vertical well within the Wattenberg Field drilled to test the Lyons formation.

Depreciation, depletion and amortization. Our depreciation, depletion and amortization expense increased \$17.9 million, or 43%, to \$59.0 million for the three months ended March 31, 2015 from \$41.1 million for the three months ended March 31, 2014. Our depreciation, depletion and amortization expense per Boe were commensurate between the three months ended March 31, 2015 and 2014.

Abandonment and impairment of unproved properties. Our abandonment and impairment of unproved properties increased 100% to \$5.5 million for the three months ended March 31, 2015 when compared to the three months ended March 31, 2014. The Company incurred impairment charges for leases expiring within the Wattenberg Field during the three months ended March 31, 2015. There were no unproved properties impaired during the three months ended March 31, 2014.

Table of Contents

General and administrative. Our general and administrative expense decreased \$6.8 million, or 29%, to \$16.9 million for the three months ended March 31, 2015 from \$23.7 million for the comparable period in 2014 and decreased on an equivalent basis to \$6.81 per Boe from \$13.37 per Boe. The decrease in general and administrative expense for the three months ended March 31, 2015 when compared to the same period in 2014 was primarily due to executive departure costs of \$7.5 million that occurred in the first quarter of 2014.

Derivative gain (loss). Our derivative gain increased \$27.7 million to \$18.9 million for the three month period ended March 31, 2015 from an \$8.8 million loss for the comparable period in 2014. The gain incurred was primarily the result of realized prices being less than the contract prices as commodity strip prices, particularly oil, have decreased during the three months ended March 31, 2015 when compared to the three months ended March 31, 2014. Please refer to Note 9 - Derivatives above for additional discussion.

Interest expense. Our interest expense for the three months ended March 31, 2015 increased \$4.9 million, or 53%, to \$14.2 million compared to \$9.3 million for the three months ended March 31, 2014. The increase for the three months ended March 31, 2015 was primarily due to the issuance of \$300 million 5.75% Senior Notes at the beginning of the third quarter of 2014. Interest expense, including amortization of the premium and financing costs, on the Senior Notes for the three month periods ended March 31, 2015 and 2014 was \$13.0 million and \$8.5 million, respectively. Average debt outstanding for the three months ended March 31, 2015 was \$821.7 million as compared to \$500.0 million for the comparable period in 2014.

Income tax expense. Our estimate for federal and state income tax benefit for the three months ended March 31, 2015 was \$11.5 million from continuing operations as compared to \$6.0 million expense for the three months ended March 31, 2014. We are allowed to deduct various items for tax reporting purposes that are capitalized for purposes of financial statement presentation. Our effective tax rate for the three month periods ended March 31, 2015 and 2014 was 38.5%, which differs from the U.S. statutory income tax rate primarily due to the effects of state income taxes.

Results for Discontinued Operations

The majority of the assets deemed held for sale and classified as discontinued operations were sold in 2012. The remaining property located in the Midway Sunset Field sold on March 21, 2014 for approximately \$6.0 million and resulted in a \$6.5 million gain as of March 31, 2014. Please refer to Note 3 — Discontinued Operations for additional discussion.

Liquidity and Capital Resources

We fund our operations, capital expenditures and working capital requirements with cash flows from our operating activities, borrowings under our revolving credit facility and by accessing the debt and capital markets.

We believe that our cash on hand of \$70.5 million, availability under our revolving credit facility of \$576.0 million, if we elect to access the entire borrowing base (without giving effect to any scheduled or interim redetermination) and cash flow from operating activities will be sufficient to fund our remaining planned capital expenditures of approximately \$298.1 million and operating expenses and comply with our debt covenants for at least the next 12 months. To the extent actual operating results differ from our anticipated results or our borrowing base under our revolving credit facility is redetermined at a substantially lower amount, our liquidity could be adversely affected.

As of March 31, 2015, our borrowing base was \$600 million, and we elected to limit our bank commitment to \$500 million while reserving the option to access the full \$600 million at the Company's request (without giving effect to any scheduled or interim redetermination). As of March 31, 2015, we had nil outstanding on our revolving credit facility, a \$24 million letter of credit issued, and \$576 million available borrowing capacity. Our weighted-average interest rates (excluding amortization of deferred financing costs and the accretion of our contractual obligation for land acquisition) on borrowings from our revolving credit facility were 1.67% and nil, respectively, for the three months ended March 31, 2015 and 2014. Our commitment fees were \$525,000 and \$452,000, respectively, for the three months ended March 31, 2015 and 2014.

Table of Contents

On February 6, 2015, the Company completed a public offering of 8,050,000 shares of its common stock generating net proceeds of \$202.8 million after deducting underwriter discounts, commissions and offering expenses of approximately \$6.5 million. The Company used a portion of the net proceeds to repay all of the outstanding borrowings under its revolving credit facility and intends to use the remaining net proceeds for general corporate purposes, including its drilling and development program and other capital expenditures.

For the remainder of 2015, we have 6,169 Bbls/d of oil hedged with three-way collars with an average ceiling of \$95.39/Bbl, average floor of \$84.46/Bbl and average short floor of \$68.24/Bbl. For the remainder of 2015, we have 15,000 Mcf/d of natural gas hedged with three-way collars with an average ceiling of \$4.75/Mcf, average floor of \$4.00/Mcf and average short floor of \$3.50/Mcf. These commodity derivatives, along with our swaps represent approximately 60% of our anticipated production for the remainder of 2015. In 2016, we have 5,500 Bbls/d of oil hedged with three-way collars with an average ceiling of \$96.83/Bbl, average floor of \$85.00/Bbl and average short floor of \$70.00/Bbl. Currently, forward oil prices are below the average price of our short floor associated with our three-way collars. Should monthly crude oil settlement prices occur below the strike price of our short floor associated with the Company's three-way collars, we will receive a payment from our hedging counterparty equal to the difference between the strike prices of the short floor and average floor multiplied by the monthly volume associated with the three-way collar. We expect that, in the future, our commodity derivative positions will help us stabilize a portion of our expected cash flows from operations despite potential declines in the price of oil and natural gas. Please refer to Note 9 — Derivatives above for a summary of derivatives in place and Item 3. Quantitative and Qualitative Disclosures About Market Risks below for additional discussion.

The following table summarizes our cash flows and other financial measures for the periods indicated.

	Three Months Ended March 31,	
	2015	2014
	(in thousands)	
Net cash provided by operating activities	\$ 32,090	\$ 77,684
Net cash used in investing activities	(131,818)	(122,296)
Net cash provided by (used in) financing activities	167,658	(4,627)
Cash and cash equivalents	70,514	131,343
Acquisitions of oil and gas properties	11,382	1,202
Exploration and development of oil and gas properties, including gas processing facilities	154,412	124,029

Cash flows provided by operating activities

During the three month period ended March 31, 2015, we generated \$32.1 million of cash provided by operating activities, a decrease of \$45.6 million from the comparable period in 2014. The decrease in cash flows from operating activities resulted primarily from a 59% decrease in crude oil equivalent pricing compounded by increased lease operating expenses and was partially offset by a 40% increase in sales volumes during the three month period ended March 31, 2015 as compared to the three month period ended March 31, 2014. See Results of Continuing Operations above for more information on the factors driving these changes.

Cash flows used in investing activities

Expenditures for development of oil and natural gas properties are the primary use of our capital resources. Net cash used in investing activities for the three months ended March 31, 2015 increased \$9.5 million as compared to the same period in 2014. For the three months ended March 31, 2015, cash used for the acquisition of oil and gas properties was \$11.4 million and cash used for the development of oil and natural gas properties (including cash used for natural gas plant capital expenditures) was \$154.4 million. For the three months ended March 31, 2014, cash used for the acquisition of oil and gas properties was \$1.2 million and cash used for the development of oil and natural gas properties (including cash used for natural gas plant capital expenditures) was \$124.0 million.

Cash flows provided by (used in) financing activities

Net cash provided by financing activities for the three months ended March 31, 2015 increased \$172.3 million, compared to the same period in 2014. The increase was primarily due to \$202.8 million of net proceeds

Table of Contents

from the sale of common stock that occurred during the three months ended March 31, 2015 offset by net payments of \$33 million to our revolving credit facility, neither of which occurred in the comparable period in 2014.

New Accounting Pronouncements

Please refer to Note 2 — Basis of Presentation under Part I, Item 1 of this report for any recently issued or adopted accounting standards.

Critical Accounting Policies and Estimates

Information regarding our critical accounting policies and estimates is contained in Item 7 of our 2014 Form 10-K.

Effects of Inflation and Pricing

Inflation in the United States has been relatively low in recent years and dropped even lower during 2014, which did not have a material impact on our results of operations for the three months ended March 31, 2015 and 2014. Although the impact of inflation has been insignificant in recent years, it is still a factor in the United States economy and we tend to experience inflationary pressure on the cost of oilfield services and equipment as increasing oil and gas prices increase drilling activity in our areas of operations. Material changes in prices also impact the current revenue stream, estimates of future reserves, borrowing base calculations, depletion expense, impairment assessments of oil and gas properties, asset retirement obligations, and values of properties in purchase and sale transactions. Material changes in prices can impact the value of oil and gas companies and their ability to raise capital, borrow money and retain personnel. Although risk of inflation is always present, given current depressed oil and gas prices, we anticipate that costs of materials and services will continue to decline.

Off-Balance Sheet Arrangements

Currently, we do not have any off-balance sheet arrangements.

Contractual Obligations

There were no material changes in our contractual obligations and other commitments as disclosed in our 2014 Form 10-K.

Cautionary Note Regarding Forward-Looking Statements

This report contains various statements, including those that express belief, expectation or intention, as well as those that are not statements of historic fact, that are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities and Exchange Act of 1934, as amended (the "Exchange Act"). When used in this report, the words "could," "believe," "anticipate," "intend," "estimate," "expect," "may," "predict," "potential," "project," "plan," "will," and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain such identifying words.

Forward looking statements include statements related to, among other things:

- reserves estimates;
- estimated sales volumes for 2015;
- inventory growth;
- amount and allocation of forecasted capital expenditures and plans for funding capital expenditures and operating expenses;
- ability to modify future capital expenditures;

Table of Contents

- the Wattenberg Field being a premier oil and resource play in the United States;
- anticipated decline of costs of materials and services;
- compliance with debt covenants;
- ability to satisfy obligations related to ongoing operations;
- compliance with government regulations;
- adequacy of gathering systems and continuous improvement of such gathering systems;
- impact from the lack of available gathering systems and processing facilities in certain areas;
- natural gas, oil and natural gas liquid prices and factors affecting the volatility of such prices;
- impact of lower commodity prices;
- the ability to use derivative instruments to manage commodity price risk and ability to use such instruments in the future;
- plans to drill or participate in wells including the intent to focus in specific areas or formations;
- loss of any purchaser of our products;
- our estimated revenues and losses;
- the timing and success of specific projects;
- intentions with respect to working interest percentages;
- management and technical team;
- outcomes and effects of litigation, claims and disputes;
- our business strategy;
- expectation that the Niobrara B and C benches and the Codell formation will be the primary sources of future production growth;
- our ability to replace oil and natural gas reserves;
- impact of recently issued accounting pronouncements;
- impact of the loss a single customer;
- timing and ability to meet certain volume commitments related to purchase and transportation agreements;
- the impact of customary royalty interests, overriding royalty interests, obligations incident to operating agreements, liens for current taxes and other industry-related constraints;
- our financial position;
- the amount and availability of our borrowing base under our revolving credit facility;
- our cash flow and liquidity;
- the adequacy of our insurance;
- intention to use certain net proceeds from our public offering of common stock on February 6, 2015 for general corporate purposes, including the Company's drilling and development program and other capital expenditures; and
- other statements concerning our operations, economic performance and financial condition.

We have based these forward looking statements on certain assumptions and analyses we have made in light of our experience and our perception of historical trends, current conditions and expected future developments

Table of Contents

as well as other factors we believe are appropriate under the circumstances. They can be affected by inaccurate assumptions or by known or unknown risks and uncertainties. Many such factors will be important in determining actual future results. The actual results or developments anticipated by these forward looking statements are subject to a number of risks and uncertainties, many of which are beyond our control, and may not be realized or, even if substantially realized, may not have the expected consequences. Actual results could differ materially from those expressed or implied in the forward looking statements.

Factors that could cause actual results to differ materially include, but are not limited to, the following:

- the risk factors discussed in Part I, Item 1A of our 2014 Form 10-K;
- declines or volatility in the prices we receive for our oil, natural gas liquids and natural gas;
- general economic conditions, whether internationally, nationally or in the regional and local market areas in which we do business;
- ability of our customers to meet their obligations to us;
- our ability to generate sufficient cash flow from operations, borrowings or other sources to enable us to fully develop our undeveloped acreage positions;
- the presence or recoverability of estimated oil and natural gas reserves and the actual future sales volume rates and associated costs;
- uncertainties associated with estimates of proved oil and gas reserves and, in particular, probable and possible resources;
- the possibility that the industry may be subject to future local, state, and federal regulatory or legislative actions (including additional taxes and changes in environmental regulation);
- environmental risks;
- seasonal weather conditions and lease stipulations;
- drilling and operating risks, including the risks associated with the employment of horizontal drilling techniques;
- our ability to acquire adequate supplies of water for drilling and completion operations;
- availability of oilfield equipment, services and personnel;
- exploration and development risks;
- competition in the oil and natural gas industry;
- management's ability to execute our plans to meet our goals;
- risks related to our derivative instruments;
 - our ability to attract and retain key members of our senior management and key technical employees;
- our ability to maintain effective internal controls;
- access to adequate gathering systems and pipeline take away capacity to provide adequate infrastructure for the products of our drilling program;
- our ability to secure firm transportation for oil and natural gas we produce and to sell the oil and natural gas at market prices;
- costs and other risks associated with perfecting title for mineral rights in some of our properties;
- continued hostilities in the Middle East and other sustained military campaigns or acts of terrorism or sabotage; and
- other economic, competitive, governmental, legislative, regulatory, geopolitical and technological factors that may negatively impact our businesses, operations or pricing.

Table of Contents

All forward looking statements speak only as of the date of this report. We disclaim any obligation to update or revise these statements unless required by law, and you should not place undue reliance on these forward looking statements. Although we believe that our plans, intentions and expectations reflected in or suggested by the forward looking statements we make in this report are reasonable, we can give no assurance that these plans, intentions or expectations will be achieved. We disclose important factors that could cause our actual results to differ materially from our expectations under Item 1A. Risk Factors and Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere in this report. These cautionary statements qualify all forward looking statements attributable to us or persons acting on our behalf.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Oil and Natural Gas Price Risk

Our financial condition, results of operations and capital resources are highly dependent upon the prevailing market prices of oil and natural gas. These commodity prices are subject to wide fluctuations and market uncertainties due to a variety of factors that are beyond our control. Factors influencing oil and natural gas prices include the level of global demand for oil and natural gas, the global supply of oil and natural gas, the establishment of, and compliance with, production quotas by oil exporting countries, weather conditions which determine the demand for natural gas, the price and availability of alternative fuels, local and global politics, and overall economic conditions. It is impossible to predict future oil and natural gas prices with any degree of certainty. Sustained weakness in oil and natural gas prices may adversely affect our financial condition and results of operations, and may also reduce the amount of oil and natural gas reserves that we can produce economically. Any reduction in our oil and natural gas reserves, including reductions due to price fluctuations, can have an adverse effect on our ability to obtain capital for our exploration and development activities. Similarly, any improvements in oil and natural gas prices can have a favorable impact on our financial condition, results of operations and capital resources.

Commodity Derivative Contracts

Our primary commodity risk management objective is to reduce volatility in our cash flows. We enter into derivative contracts for oil and natural gas using NYMEX futures or over the counter derivative financial instruments with counterparties who we believe are well capitalized and have been approved by our board of directors.

The use of financial instruments may expose us to the risk of financial loss in certain circumstances, including instances when (1) sales volumes are less than expected requiring market purchases to meet commitments, or (2) our counterparties fail to purchase the contracted quantities of natural gas or otherwise fail to perform. To the extent that we engage in derivative contracts, we may be prevented from realizing the benefits of favorable price changes in the physical market. However, we are similarly insulated against decreases in such prices.

Presently, all of our derivative arrangements are concentrated with five counterparties, all of which are lenders under our credit facility. If these counterparties fail to perform their obligations, we may suffer financial loss or be prevented from realizing the benefits of favorable price changes in the physical market.

The result of oil market prices exceeding our swap prices or collar ceilings requires us to make payment for the settlement of our derivatives, if owed by us, generally up to 15 business days before we receive market price cash payments from our customers. This could have a material adverse effect on our cash flows for the period between derivative settlement and payment for revenues earned.

Please refer to Note 9 - Derivatives of Part I, Item 1 of this report for a derivative summary table.

Interest Rates

As of March 31, 2015, we had no outstanding borrowings under our revolving credit facility. Borrowings under our revolving credit facility bear interest at a fluctuating rate that is tied to an adjusted bank base rate or London Interbank Offered Rate, at our option. Any increases in these interest rates can have an adverse impact on our results of operations and cash flow.

Table of Contents

Counterparty and Customer Credit Risk

In connection with our derivatives activity, we have exposure to financial institutions in the form of derivative transactions. Five lenders under our credit facility are counterparties on our derivative instruments currently in place and have investment grade credit ratings. We expect that any future derivative transactions we enter into will be with these or other lenders under our credit facility that will carry an investment grade credit rating.

We are also subject to credit risk due to concentration of our oil and natural gas receivables with certain significant customers. The inability or failure of our significant customers to meet their obligations to us or their insolvency or liquidation may adversely affect our financial results. We review the credit rating, payment history and financial resources of our customers, but we do not require our customers to post collateral.

Marketability of Our Production

The marketability of our production from the Mid Continent and Rocky Mountain regions depends in part upon the availability, proximity and capacity of third party refineries, access to regional trucking, pipeline and rail infrastructure, natural gas gathering systems and processing facilities. We deliver crude oil and natural gas produced from these areas through trucking services, pipelines and rail facilities that we do not own. The lack of availability or capacity on these systems and facilities could reduce the price offered for our production or result in the shut in of producing wells or the delay or discontinuance of development plans for properties.

A portion of our production may also be interrupted, or shut in, from time to time for numerous other reasons, including as a result of accidents, field labor issues or strikes, or we might voluntarily curtail production in response to market conditions. If a substantial amount of our production is interrupted at the same time, it could adversely affect our cash flow.

Currently, there are no natural gas pipeline systems that service wells in the North Park Basin, which is prospective for the Niobrara shale. In addition, we are not aware of any plans to construct a facility necessary to process natural gas produced from this basin. If neither we nor a third party constructs the required pipeline system and processing facility, we may not be able to fully test or develop our resources in the North Park Basin.

There have not been material changes to the interest rate risk analysis or oil and gas price sensitivity analysis disclosed in our 2014 Form 10-K.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our principal executive officer and principal financial officer, evaluated the effectiveness of our disclosure controls and procedures as of March 31, 2015. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in SEC rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or

submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate, to allow timely decisions regarding required disclosure. Based on the evaluation of our disclosure controls and procedures as of March 31, 2015, our principal executive officer and principal financial officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost benefit relationship of possible controls and procedures. To assist management, we have established an internal audit function to verify and monitor our internal controls and procedures. The Company's internal control system is supported by written policies and procedures, contains self-monitoring mechanisms and is

Table of Contents

audited by the internal audit function. Appropriate actions are taken by management to correct deficiencies as they are identified.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in management's evaluation pursuant to Rules 13a-15(d) or 15d-15(d) of the Exchange Act during the quarter ended March 31, 2015 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time, we are subject to legal proceedings and claims that arise in the ordinary course of business. Like other oil and gas producers and marketers, our operations are subject to extensive and rapidly changing federal and state environmental, health and safety and other laws and regulations governing air emissions, wastewater discharges, and solid and hazardous waste management activities. As of the date of this filing, there are no material pending or overtly threatened legal actions against us of which we are aware.

Item 1A. Risk Factors.

Our business faces many risks. Any of the risk factors discussed in this report or our other SEC filings could have a material impact on our business, financial position or results of operations. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also impair our business operation. For a discussion of our potential risks and uncertainties, see the information in Part I, Item 1A., Risk Factors, in our 2014 Form 10-K. There have been no material changes to our risk factors from those described in our 2014 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Unregistered sales of securities. There were no sales of unregistered equity securities during the three month period ended March 31, 2015.

Edgar Filing: Bonanza Creek Energy, Inc. - Form 10-Q

Issuer purchases of equity securities. The following table contains information about our acquisition of equity securities during the three month period ended March 31, 2015.

	Total Number of Shares Purchased(1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Be Purchased Under Plans or Programs
January 1, 2015 — January 31, 2015	2,238	\$ 22.09	—	—
February 1, 2015 — February 28, 2015	34,077	\$ 28.74	—	—
March 1, 2015 — March 31, 2015	35,487	\$ 24.12	—	—
Total	71,802	\$ 26.25	—	—

(1) Represent shares that employees surrendered back to us that equaled in value the amount of taxes required for payroll tax withholding obligations upon the vesting of restricted stock awards. These repurchases were not part of a publicly announced plan or program to repurchase shares of our common stock, nor do we have a publicly announced plan or program to repurchase shares of our common stock.

A dividend payment, whether it be in the form of cash, securities or other property, is restricted by our revolving credit facility and Senior Notes.
