PART I

ITEM 1. BUSINESS

Legal Organization

Meadowbrook Insurance Group, Inc. (NYSE: MIG) is a holding company organized as a Michigan corporation in 1985. Our principal executive offices are located at 26255 American Drive, Southfield, Michigan 48034-6112 (telephone number: (248) 358-1100). Meadowbrook was initially founded in 1955 as Meadowbrook Insurance Agency and was subsequently incorporated in Michigan in 1965.

As used in this Form 10-K, references to the Company, we, us, or our refer to Meadowbrook Insurance Group, Inc. (Meadowbrook) and its subsidiaries: Star Insurance Company (Star), ProCentury Corporation (ProCentury), Meadowbrook Inc., and Crest Financial Corporation. References to Meadowbrook also include Star's wholly-owned subsidiaries Ameritrust Insurance Corporation (Ameritrust), Savers Property and Casualty Insurance Company (Savers), and Williamsburg National Insurance Company (Williamsburg) and ProCentury's wholly-owned subsidiaries Century Surety Company (Century), ProCentury Insurance Company (PIC), and ProCentury Risk Partners Insurance Company (PROPIC).

Star, Savers, Williamsburg, Ameritrust, Century, and PIC are collectively referred to as the Insurance Company Subsidiaries.

Recent Developments

On December 30, 2014, Fosun International Limited (HKEx stock code: 00656, together with its subsidiaries, Fosun) and the Company announced each entered into a definitive agreement under which Fosun will acquire all of the issued and outstanding common stock of the Company. The transaction follows a thorough review of strategic alternatives by the Company's Board of Directors and represents a 24% premium over the Company's closing price on December 29, 2014 and a premium of 39% to the Company's three-month average closing price for the period ending December 29, 2014. The transaction also represents a multiple of approximately 1.04x the Company's tangible book value per share as of September 30, 2014.

The transaction is subject to the approval of the Company's shareholders as well as regulatory approvals and the satisfaction of other specified closing conditions. The transaction is expected to be completed in the second half of 2015.

See Risks Related to Our Being Acquired by Fosun.

Business Overview

We are a specialty niche focused commercial insurance underwriter and insurance administration services company, which also owns/operates insurance agencies and third-party administrators. We recognize revenue within the following categories: net earned premiums, net investment income, management administrative fees, commission revenue, claims fees, and net realized gains (losses). We remain committed to our core business model where we seek to combine our diverse revenue streams and efficient capital management to deliver consistent long-term growth in shareholder value.

Our mission dictates our commitment to serving:

- our clients, by providing them with customized insurance products and services, with an emphasis on developing long-term relationships;
- our associates, for whom we foster a positive and professional work environment with a strong commitment to diversity and equal opportunities for advancement;
- our shareholders, by promoting steady growth, financial stability and superior long-term investment opportunities; and
- our communities, by supporting charitable, cultural and educational organizations nationwide, while honoring our responsibility to protect the environment.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

The Company's objective is to create value by emphasizing a regional focus and diverse source of revenues between underwriting premiums, fee-for-service revenue and commissions:

Within our insurance company operations, we believe our approach balances an effective local touch with efficient national coordination and positions us to opportunistically pursue a wide range of business in response to changing market conditions. We market and underwrite specialty property and casualty insurance programs and products on both an admitted and non-admitted basis through a broad and diverse network of independent retail agents, wholesalers, program administrators and general agents, who value service, specialized knowledge, and focused expertise. Program business refers to an aggregation of individually underwritten homogeneous risks that have similar characteristics and are distributed through a select group of agents.

Within our fee-for-service operations, we generate fee revenue by providing administrative and risk management services to self-insured groups, municipal pools and trusts.

Through our agency operations, we earn commission revenue through securing quality business and personal insurance products for our clients. Our agencies are located in Michigan, California, Massachusetts, Kansas, and Florida and produce commercial, personal lines, life and accident and health insurance which are placed primarily with unaffiliated insurance carriers. Although our agencies are a minimal source of business for our Insurance Company Subsidiaries, the agency operations remain a core strategy enabling us to balance our sources of revenue.

Our strategy is to generate profitable results and to deliver consistent, long-term shareholder value. To achieve these results we seek to leverage the unique characteristics of our balanced business model to generate:

- consistent, profitable underwriting results;
- predictable investment income in a low-risk, high-quality, primarily fixed income portfolio;
- steady fee and commission income;
- strong cash flow from our Insurance Company Subsidiaries and non-regulated fee-based services to leverage invested assets to equity and manage debt service;
- steady growth through rate increases and select new business with proven track records;

We create a competitive advantage by investing in the talent and technology to efficiently service our clients; through strategically identified industry niches and individual account selectivity; and through adequate pricing and focused claims handling.

We monitor our objectives and strategy within the context of the interest rate environment, insurance market cycle conditions, inflation and general economic conditions. Our enterprise risk management (ERM) and capital management strategies are designed to ensure our compliance with regulatory guidelines and that our industry reputation is in good-standing. As we seek to maximize long-term shareholder value, our priorities and corresponding risk appetite may be influenced by these factors.

The Meadowbrook Approach

We have built our business in a manner that is designed to adapt to changing market conditions and deliver more predictable results. The following highlights key aspects of our model that contribute to our balanced approach:

Diverse Revenue Sources: We generate the vast majority of our revenues from net earned premiums. To help generate our premiums, we have developed specialty niche expertise relative to a wide range of underwriting risks. Consequently, our premium base is broadly diversified by line of business, customer, type of distribution and

geography. We also generate fee-for-service revenues from risk management services and commission revenue from our agencies that are not related to our insurance underwriting operations. Our range of capabilities provides flexibility for our long-term business development efforts as we seek to generate profitable growth. We also believe revenue diversification reduces our risk profile and enhances the sustainability of our business model.

Positioned to Manage Insurance Cycles: We serve markets that operate on different cycles and believe our mix of admitted and non-admitted capabilities enhances our balanced business model. Our admitted market

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

capabilities generally provide a consistent source of revenues as this market generally has less pronounced cycles, higher renewal retentions, and more stable pricing than the non-admitted markets. Our non-admitted capabilities enable us to respond opportunistically to otherwise unavailable insurance and volatile pricing environments.

Conservative Investment Philosophy: We seek to generate consistent investment income through a low-risk, high-quality investment portfolio. We manage overall credit, interest rate, and liquidity risks when making investment decisions. We invest in highly-rated, investment grade securities. Our market risk to the investment portfolio is primarily interest rate risk associated with debt securities. Our exposure to equity price risk is related to our investments in high dividend equities. These investments comprise 7.0% of our investment portfolio. The duration of our high quality investment portfolio is well matched to our loss reserves and our investment approach reinforces our focus on underwriting profitability.

Ability to Attract and Retain Talented Insurance Professionals throughout United States: We have assembled a team of talented insurance professionals and are committed to providing career development opportunities and building a culture focused on delivering superior customer service. Our associates possess a wide range of expertise across all functions and lines of business. Moreover, our regional structure enables our associates to deliver strong and responsive local service to our clients. We believe this is a unique aspect of our business model that enables us to better serve our agency network.

Culture of Disciplined Underwriting, Claims Handling & Reserving: We have built a control environment that emphasizes a commitment to disciplined underwriting, claims handling and reserving. New business opportunities undergo a rigorous due diligence process with input provided from key functional areas and existing business is actively managed as discussed below.

Our underwriters are focused on achieving pricing adequacy and appropriate risk selection through adherence to program or insurance product underwriting guidelines. Underwriting trends are closely monitored, which enables us to proactively manage our business as we seek to deliver more predictable results. Our specialty lines products rely on dedicated underwriter leadership whereby the product is managed to meet a defined type of insured and we retain full underwriting and pricing authority. Our main street excess and surplus lines business includes binding authority and brokerage production sources. Our non-admitted program business employs dedicated underwriting specialists in the particular class of business being considered. These professionals review policy files for completeness and compliance with our terms, conduct on-site audits, and, when necessary, send and enforce underwriting notifications on files found to be out of compliance. With regard to property coverages, we limit exposures from catastrophe prone areas and purchase excess of loss and catastrophe reinsurance.

Additionally, our actuarial associates support underwriting with pricing and loss analysis. Corporate loss reserves are determined for each line of business, as Meadowbrook regularly performs a complete and detailed reserve analysis. Meadowbrook's actuaries utilize both standard and proprietary systems to accurately and efficiently analyze reserves. We also engage an outside actuarial firm to review our reserve estimates.

Finally, we have built a strong claims handling function internally that plays a substantial role in claims management and handling activities. Meadowbrook employs approximately 233 claims personnel who operate from 14 regional offices, located throughout the United States. We also operate a centralized support call center and manage a network of independent adjusters. Claims monitoring is conducted through self and corporate audits, internal controls and executive oversight reports.

Description of Programs, Products, and Services

We market and underwrite specialty property and casualty insurance programs and products on both an admitted and non-admitted basis. We categorize our products into the following four categories:

Admitted Programs and Standard Market Products: The admitted programs that we write are characterized by risks that are homogeneous or similar within specialty line, class and niche segments of business but have a diverse geographic profile. We also write a range of standard market products that are distributed through specialty agents. Generally, the average account premium for our admitted programs and standard market products is approximately \$6,200. Due to the specialized nature of the program and distribution style, our

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

admitted programs tend to have higher premium retention levels. This helps create stability in our business amid the cyclicity of the insurance industry. Examples of admitted programs we underwrite include coverages for the food service industry, educators, physicians, agricultural businesses and public entities. The largest line of business for our standard market products is workers' compensation.

Main Street Excess and Surplus Lines: The excess and surplus lines business we write include broad classes of Main Street commercial risks that are generally ineligible for coverage by the standard market. Generally, the average account premium for our excess and surplus lines risks is approximately \$2,500. The excess and surplus lines regulatory environment allows rate and form freedom, which gives us the flexibility to design tailored coverage forms that are often more restrictive than those available in the admitted market. The high degree of flexibility contributes to heightened competition during soft markets and creates the potential for rapid expansion during hard markets. Examples of our excess and surplus lines business we underwrite include coverages for restaurants, bars/taverns, apartments, hotels/motels, and contractors' liability. These examples and sub-classes can change as underwriting circumstances dictate.

Non-Admitted Programs: The non-admitted programs we write have characteristics that are similar to our admitted programs; however, the commercial risks we provide coverage for are generally ineligible for coverage by the standard or admitted market. With this focus on non-admitted program underwriting, we are able to provide coverage for start-up organizations and relatively low volume programs that other markets are unable or unwilling to serve. Examples of non-admitted programs we offer include coverages for pet-sitters, oil and gas contractors, and professional liability.

Specialty Market Products: We also offer specialty market products, where specific and unique underwriting expertise is required. We develop product solutions designed for specific specialty lines and market segments that may leverage either our admitted market or non-admitted market product capabilities, or both, depending on the market need. The specific and unique underwriting expertise that is required to write business in the segments we serve creates barriers to entry for new competitors. Examples of specialty markets we serve are the excess workers' compensation, environmental, and marine markets.

As part of delivering our insurance programs and products, we are actively involved in a range of activities as described below:

Program and Product Design. Before implementing a new program on behalf of a client, we generally review: (1) financial projections for the contemplated program, (2) historical loss and actuarial experience, (3) actuarial studies of the underlying risks, (4) the credit worthiness of the potential agent or client, and (5) the availability of reinsurance. Our senior management team and associates representing each of the risk-management disciplines work together to design, market, and implement new programs. Our due diligence process is structured to provide an underwriting risk assessment of the program and how the program fits within our client's entity wide business plan and our overall risk profile.

Underwriting Risk Selection and Policy Issuance. Our underwriting personnel help develop the proper criteria for selecting risks, while actuarial and reinsurance personnel evaluate and recommend the appropriate levels of rate and risk retention. The program is then tailored according to the requirements and qualifications of each client. With managed programs, we may also perform underwriting services based upon the profile of the specific program for a fee.

Claims Administration and Handling. We provide substantially all claims management and handling services for workers' compensation and most other lines, such as property, automobile liability, professional liability, and general liability. Our claims handling is managed by our field offices. Our corporate claims department monitors the results through self-audits, corporate claim audits, internal controls, and other executive oversight reports. With the exception of Midwest Financial Holdings, LLC (MFH), for which we have direct access to their paid and case reserve loss data and perform corporate claims audits, we handle substantially all claims functions for the majority of the programs we underwrite. Our involvement in claims administration and handling provides benchmarks and valuable feedback to program managers in assessing the client's risk environment and the overall structure of the program.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

Loss Prevention and Control. We provide loss control services which are designed to help clients prevent or limit the impact of certain loss events. Through an evaluation of the client's workplace environment, our loss control specialists assist the client in planning and implementing a loss prevention program and, in certain cases, provide educational and training programs. With our managed programs, we provide these same services for a fee based upon the profile of the specific program.

Reinsurance. Meadowbrook's Insurance Company Subsidiaries cede insurance to other insurers under pro rata and excess-of-loss contracts. These reinsurance arrangements diversify the Company's business and mitigate its losses arising from large risks or from hazards of an unusual nature. We maintain reinsurance treaties for our workers' compensation, liability, aviation, marine, surety and property programs. In addition, facultative reinsurance is obtained as required for individual risks on a policy-by-policy basis. Meadowbrook also has the ability to cede insurance through captives, rent-a-captives, large deductible programs, and indemnification agreements, and assume insurance from other insurers.

The Company's philosophy around reinsurance buying has not changed fundamentally and remains rooted in long-term relationships with highly rated reinsurers. These reinsurance partners are generally focused on the longer term profitability of their relationship with the Company.

We also provide the following services to our fee-for-service and agency clients:

Administration of Risk-Bearing Entities. We generate fee revenue by assisting in the formation and administration of risk-bearing entities for clients and agents. We provide administrative services to self-insured groups, municipal pools and trusts. Additionally, through our subsidiary in Washington D.C., we are able to provide administrative services for certain captives and/or rent-a-captives.

Agency. We earn commission revenue through the operation of our independent retail insurance agencies, located in Michigan, California, Massachusetts, Kansas and Florida. These agencies produce commercial, personal lines, life and accident and health insurance that is placed primarily with unaffiliated insurance carriers.

Distribution

We market our specialty property and casualty insurance products on both an admitted and non-admitted basis through a broad and diverse network of independent retail agents, wholesalers, program administrators and general agents (referred to as, agents or producers). On a limited basis, some of our producers provide certain policy issuance functions on our behalf.

Unlike traditional standard market companies that sell a full menu of insurance products through their distribution network, we selectively determine distribution and target agents that meet the specific product focus and needs for each of our targeted programs for our admitted business. We seek program agents with a primary focus and established niche expertise and where our relationship is a significant if not a majority source of their revenues.

Our largest producer in 2014 was Midwest General Insurance Agency, LLC (Midwest General), which, in combination with its affiliates, accounted for 14.6% of our gross written premium. We have a 28.5% equity interest in Midwest General Agency's parent, MWFH. Our second largest producer in 2014 was Food Service Management, which in combination with its affiliates, accounted for 10.9% of our gross written premium. No other producer was responsible for more than 10% of our gross written premium.

We seek to offer incentives to our distribution network in a manner that aligns our distributors' financial interests with our balanced business model. We believe that risk-sharing motivates participants to focus on underwriting selection, loss prevention, risk control measures and adherence to stricter underwriting guidelines. Risk sharing structures are designed based on the particular risk management goals of our clients, market conditions and our assessment of the opportunity for generating operating profit. We categorize risk sharing into two categories: profit sharing and quota sharing.

Profit-Sharing: In addition to the initial commission allowed to the program agent, we at times offer various program dependent, profit-sharing commission contracts. These are tailored to the specific product and its attributes.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

Quota Sharing: A second way we offer incentives to our producers is through quota-share reinsurance structures. In these scenarios, producers of the business determine which risks to submit to us for underwriting. For risks submitted, Meadowbrook underwrites individual primary insurance policies for members of a group or association, or a specific industry. We share in the operating results with the producer through a quota share reinsurance agreement with an insurance company (owned, or affiliated with the producer) or a captive or rent-a-captive.

We believe our selective approach to distribution also serves to align the agents' financial interests with our balanced business model. Our selective approach reduces channel conflict and allows our agencies to generate franchise value. This is a mutually beneficial approach to enhancing the value of our distribution relationships.

Technology

We seek to leverage our business technology platform in order to achieve a high level of customer service and enhance operating efficiencies. We provide a select set of internet-based business processing systems to our producers to automate their capability to rate, quote, bind and service insurance policies in a timely and efficient manner. Advantage is a processing system for quoting and binding workers' compensation insurance policies. Century On-Line (COL) is a processing system for quoting, binding, and issuing policies for general liability, property and garage insurance policies underwritten by our excess and surplus lines company, Century. Further, we provide additional systems on a network-accessible basis for processing select package and commercial automobile programs. In addition to reducing our internal administrative processing costs, these systems enhance underwriting practices by automating risk selection criteria.

Competition and Pricing

We are part of a highly competitive industry that is cyclical and historically characterized by periods of high premium rates and shortages of underwriting capacity followed by periods of intense competition and excess underwriting capacity resulting in lower pricing and relaxed eligibility standards including broadening of coverages. We compete with other providers of specialty insurance programs, products, and risk management services, as well as with traditional providers of commercial insurance. Some of our competitors may have greater financial resources than we do.

Pricing is a primary means of competition in the commercial insurance market. Competition is also based on the availability and quality of products, quality and speed of service (including claims service), financial strength, ratings, distribution systems and technical expertise. In addition to the factors noted above, the insurance industry also competes on commission rates.

Principal competitive factors for providing risk management services include the costs of self-insuring relative to the cost of purchasing insurance from an insurance carrier, the availability and pricing of excess reinsurance coverage, cash flow needs, and the expected quality and consistency of the services to be provided.

We believe that we are able to compete based on our experience, the combined quality of our products and services, the high level of our employees' professional expertise, our processing technology platforms, and our program-oriented approach. However, our ability to successfully compete is dependent upon a number of factors, including market and competitive conditions, many of which are outside of our control.

Geographic Diversity and Mix of Business

Our revenues are diversified geographically by class and line of business, type of insured and agency distribution. Within the workers' compensation line of business, we have a regional focus in California and New England. Within the other liability, commercial automobile liability, excess worker's compensation, and commercial multiple peril liability lines of business, we have a regional focus in the Southeast and California. Our fee-for-service business is managed on a regional basis with an emphasis in the Midwest, New England, and Southeast regions of the United States.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.**

The following table summarizes our gross written premium distribution by state for the years ended December 31, 2014, 2013, and 2012 (in thousands). We include only states that were top ten gross written premium production states in 2014:

Gross Written Premium	2014	%	2013	%	2012	%
California	\$ 261,305	35.2 %	\$ 325,215	34.5 %	\$ 351,805	33.0 %
Florida	61,114	8.2 %	70,005	7.4 %	98,127	9.2 %
Texas	42,795	5.8 %	54,643	5.8 %	67,068	6.3 %
New York	41,350	5.6 %	44,460	4.7 %	40,177	3.8 %
New Jersey	27,500	3.7 %	36,754	3.9 %	44,582	4.2 %
Missouri	24,967	3.4 %	23,936	2.5 %	24,526	2.3 %
Michigan	20,700	2.8 %	39,316	4.2 %	40,952	3.8 %
Pennsylvania	15,791	2.1 %	20,576	2.2 %	22,290	2.1 %
Illinois	15,304	2.1 %	21,056	2.2 %	28,969	2.7 %
Louisiana	13,260	1.7 %	19,719	2.1 %	21,168	2.0 %
All Other States	218,378	29.4 %	288,331	30.5 %	326,969	30.6 %
Total	\$ 742,464	100.0 %	\$ 944,011	100.0 %	\$ 1,066,633	100.0 %

Gross written premium decreased in 2014, which primarily reflects the impact of business that was targeted to be terminated during the fourth quarter of 2012 and planned premium reductions in specific underperforming areas. The terminations were on all new business, and upon renewal of existing business. The decrease was partially offset by achieved rate increases and the maturation of existing programs. Our most significant geographic concentration remains the state of California. Our current book of business in California is largely related to our relationship with a general agent who specializes in non-contractor workers' compensation, and our relationship with a general agent that primarily focuses on the food service industry.

We manage our business to reduce geographic concentration of risk that could increase our exposure to losses from natural or intentionally caused catastrophic events. We also monitor the regulatory environment within our concentrated regions. We believe we have been able to strategically increase our California exposure, while maintaining a geographically diverse premium base throughout the United States.

The following table summarizes gross written premiums, net earned premiums, and net written premiums by line of business for the years ended December 31, 2014, 2013, and 2012 (in thousands):

Meadowbrook Insurance Group, Inc.

Total	\$ 601,237	100.0 %	\$ 691,637	100.0 %	\$ 797,502	100.0 %

As noted above, gross written premium decreased in 2014 due primarily to business that was targeted to be terminated during the fourth quarter of 2012 and planned premium reductions in specific underperforming areas. The decrease was partially offset by achieved rate increases and the maturation of existing programs. During 2014, we achieved overall average written rate increases of approximately 6.5%. The average written rate increases for our workers' compensation line of business in 2014 was approximately 6.3%.

Reserves

The following table shows the development of reserves for unpaid losses and loss adjustment expenses (LAE) from 2005 through 2014 for our Insurance Company Subsidiaries

Development of the ProCentury acquired reserves is not included for the years prior to 2008, because our merger with ProCentury (the ProCentury Merger) was not effective until August 1, 2008. The lower portion of the table reflects the impact of reinsurance for the years 2005 through 2014 reconciling the net reserves shown in the upper portion of the table to gross reserves.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.**

Additional information relating to our reserves is included within the *Losses and Loss Adjustment Expenses and Reinsurance Recoverables* section of Note 1 ~ *Summary of Significant Accounting Policies* and Note 4 ~ *Liability for Losses and Loss Adjustment Expenses* of the Notes to the Consolidated Financial Statements, as well as to the *Critical Accounting Policies* section and the *Reserves* section of Item 7, *Management's Discussion and Analysis*.

The following table sets forth the difference between United States Generally Accepted Accounting Principles (GAAP) reserves for loss and loss adjustment expenses and statutory reserves for loss and loss adjustment expenses at December 31, (in thousands):

	2014	2013
GAAP reserves for loss and LAE	1,590,359	1,616,521
Reinsurance recoverables for unpaid losses	(519,530)	(505,431)
ASC 944 adjustment*	(5,217)	(5,827)
Statutory reserves for loss and LAE	1,065,612	1,105,263

100% Quota Share Reinsurance Agreement related to a worker's compensation novation policy, with reinsurance provisions recognized as retroactive reinsurance on a GAAP basis, in accordance with ASC 944- Financial Services- Insurance and recognized as prospective reinsurance on a statutory basis, in accordance with SSAP 62R- Property and Casualty Reinsurance.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

For the year ended December 31, 2014, we reported an increase of \$6.3 million in gross ultimate loss estimates for accident years 2013 and prior, or 0.4% of \$1,616.5 million of gross loss and LAE reserves at January 1, 2014. We reported a \$1.7 million decrease in net ultimate loss and LAE estimates for accident years 2013 and prior, or 0.2% of \$1,111.1 million of net loss & LAE reserves at January 1, 2014.

For the year ended December 31, 2013, we reported an increase of \$81.1 million in gross ultimate loss estimates for accident years 2012 and prior, or 5.6% of \$1,456.0 million of gross loss and LAE reserves at January 1, 2013. We reported a \$68.4 million increase in net ultimate loss and LAE estimates for accident years 2012 and prior, or 6.4% of \$1,074.1 million of net loss & LAE reserves at January 1, 2013.

Reinsurance

Information relating to our reinsurance structure and treaty information is included within Note 6 ~ *Reinsurance* of the Notes to the Consolidated Financial Statements.

Investments

Information relating to our investment portfolio is included within Note 3 ~ *Investments* of the Notes to the Consolidated Financial Statements and the *Investments* section of Item 7, *Management's Discussion and Analysis*, as well as Item 7A *Quantitative and Qualitative Disclosures about Market Risk*.

Regulation

Insurance Company Regulation

Our Insurance Company Subsidiaries are subject to regulation in the states where they conduct business. State insurance regulations generally are designed to protect the interests of policyholders, state insurance consumers or claimants rather than shareholders or other investors. The nature and extent of such state regulation varies by jurisdiction, but generally involves:

- prior approval of the acquisition of control of an insurance company or of any company controlling an insurance company, including the acquisition by Fosun;
- regulation of certain transactions entered into by such Insurance Company Subsidiary with any of its affiliates;
- approval of premium rates, forms and policies used for many lines of insurance;
- standards of solvency and minimum amounts of capital and surplus that must be maintained;
- establishment of reserves required to be maintained for unearned premium, loss and loss adjustment expense, or for other purposes;
- limitations on types and amounts of investments;
- underwriting and claims settlement practices;
- restrictions on the size of risks that may be insured by a single company;
- licensing of insurers and agents;
- deposits of securities for the benefit of policyholders; and
- the filing of periodic reports with respect to financial condition and other matters.

In addition, state regulatory examiners perform periodic examinations of our Insurance Company Subsidiaries. The results of these examinations can give rise to regulatory orders requiring remedial, injunctive or other corrective action.

Insurance Holding Company Regulation

We operate as an insurance holding company and are subject to regulation in the jurisdictions in which we conduct business. These regulations require that each of our Insurance Company Subsidiaries in the system register with the insurance department of its state of domicile and furnish information concerning the operations

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

of companies within the holding company system that may materially affect the operations, management or financial condition of the insurers within the system which are domiciled in that state. The insurance laws similarly provide that all transactions among members of a holding company system must be fair and reasonable. Certain types of transactions between our Insurance Company Subsidiaries and the Company and our other affiliates generally must be disclosed to the state regulators, and prior approval of the applicable state insurance regulator generally is required for any material or extraordinary transaction. In addition, a change of control of a domestic insurer or of any controlling person requires the prior approval of the state insurance regulator.

Various State and Federal Regulation

Insurance companies are also affected by a variety of state and federal legislative and regulatory measures and judicial decisions that define and extend the risks and benefits for which insurance is sought and provided. In addition, for some classes of insureds individual state insurance departments may prevent premium rates for some classes of insureds from reflecting the level of risk assumed by the insurer for those classes. Such developments may adversely affect the profitability of various lines of insurance. In some cases, if permitted by applicable regulations, these adverse effects on profitability can be minimized through repricing of coverages or limitations or cessation of the affected business.

Reinsurance Intermediary

Our reinsurance intermediaries are also subject to regulation. Under applicable regulations, an intermediary is responsible, as a fiduciary, for funds received on account of the parties to the reinsurance transaction. The intermediaries are required to hold such funds in appropriate bank accounts subject to restrictions on withdrawals and prohibitions on commingling.

Licensing and Agency Contracts

We, or certain of our designated employees, must be licensed to act as agents by state regulatory authorities in the states in which we conduct business. Regulations and licensing laws vary in individual states and are often complex.

Insurance licenses are issued by state insurance regulators upon application and may be of perpetual duration or may require periodic renewal. We must apply for and obtain appropriate new licenses before we can expand into a new state on an admitted basis or offer new lines of insurance that require separate or additional licensing.

Insurers operating on an admitted basis must file premium rate schedules and policy or coverage forms for review and approval by the insurance regulators. In many states, rates and policy forms must be approved prior to use, and insurance regulators have broad discretion in judging whether an insurer's rates are adequate, not excessive and not unfairly discriminatory.

The applicable licensing laws and regulations in all states are subject to amendment or reinterpretation by state regulatory authorities, and such authorities are vested in most cases with relatively broad discretion as to the granting, revocation, suspension and renewal of licenses. We, or our employees, could be excluded, or temporarily suspended, from continuing with some or all of our activities in, or otherwise subjected to penalties by, a particular state.

Insurance Regulation Concerning Change or Acquisition of Control

Star, Williamsburg, Ameritrust, and PIC are domestic property and casualty insurance companies organized under the insurance laws (the Insurance Codes) of Michigan, while Savers, Century and PROPIC are organized under the Insurance Codes of Missouri, Ohio, and Washington D.C., respectively. The Insurance Codes provide that acquisition or change of control of a domestic insurer or of any person that controls a domestic insurer (including the proposed transaction with Fosun) cannot be consummated without the prior approval of the relevant insurance regulatory authority. A person seeking to acquire control, directly or indirectly, of a domestic insurance company or of any person controlling a domestic insurance company must generally file with the relevant insurance regulatory authority an application for change of control (commonly known as a Form A)

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

containing information required by statute and published regulations and provide a copy of such Form A to the domestic insurer. Control is generally presumed to exist if any person, directly or indirectly, owns, controls, holds with the power to vote or holds proxies representing ten percent or more of the voting securities of the company.

In addition, many state insurance regulatory laws contain provisions that require pre-notification to state agencies of a change in control of a non-domestic admitted insurance company in that state. While such pre-notification statutes do not authorize the state agency to disapprove the change of control, such statutes do authorize issuance of a cease and desist order with respect to the non-domestic admitted insurer if certain conditions exist, such as undue market concentration.

Membership in Insolvency Funds and Associations and Mandatory Pools

Most states require admitted property and casualty insurers to become members of insolvency funds or associations, which generally protect policyholders against the insolvency of insurers. Members of the fund or association must contribute to the payment of certain claims made against insolvent insurers. Maximum contributions required by law in any one year vary between 1% and 2% of the annual premium written by a member in that state. For 2014, 2013, and 2012, assessments from insolvency funds were \$5.3 million, \$7.0 million, and \$6.8 million, respectively. Most of these payments are recoverable through future policy surcharges and premium tax reductions.

Our Insurance Company Subsidiaries are also required to participate in various mandatory insurance facilities or in funding mandatory pools, which are generally designed to provide insurance coverage for consumers who are unable to obtain insurance in the voluntary insurance market. Among the pools participated in are those established in certain states to provide windstorm and other similar types of property coverage. These pools typically require all companies writing applicable lines of insurance in the state for which the pool has been established to fund deficiencies experienced by the pool based upon each company's relative premium writings in that state, with any excess funding typically distributed to the participating companies on the same basis. To the extent that reinsurance treaties do not cover these assessments, they may have an adverse effect on the Company. For 2014, 2013, and 2012, total assessments paid to all such facilities were \$3.9 million, \$4.2 million, and \$4.9 million, respectively.

Restrictions on Dividends and Risk-Based Capital

For information on Restrictions on Dividends and Risk-based Capital that affect us please refer to Note 8 ~ *Regulatory Matters and Rating Issues* of the Notes to the Consolidated Financial Statements and the *Regulatory and Rating Issues* section within Item 7, *Management's Discussion and Analysis*.

NAIC-IRIS Ratios

The National Association of Insurance Commissioners' (NAIC) Insurance Regulatory Information System (IRIS) was developed by a committee of state insurance regulators and is primarily intended to assist state insurance departments in executing their statutory mandates to oversee the financial condition of insurance companies operating in their respective states. IRIS identifies thirteen industry ratios and specifies usual values for each ratio. Departure from the usual values on four or more ratios generally leads to inquiries or possible further review from individual state insurance commissioners. Refer to the *Regulatory and Rating Issues* section within Item 7, *Management's Discussion and Analysis*.

Effect of Federal Legislation

The Terrorism Risk Insurance Act, (TRIA), was enacted in November 2002. After several extensions, Congress enacted the Terrorism risk Insurance Program Reauthorization of 2015 (Act). The 2015 Act extends the Federal Terrorism Insurance Program until December 31, 2020. The Act continues to require insurance companies to offer terrorism coverage and provides compensation for insured losses resulting from acts of certified terrorism, subject to a program event trigger of \$100.0 million for 2015, which will increase by 20.0 million each year until it reaches \$200.0 million in 2020, after the insurer retains loss equal to 20% of its direct earned premium as permitted by the Act. There was no change to the insurer deductible under the Act. Insurers covered by the Act are also responsible for a 15% coinsurance of loss in excess of their stated retention

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

in 2015, such coinsurance will increase by 1 percentage point each year until it reaches 20% in 2020. Over 6 years the Company's co-participation of the federal insurance quota share will increase from 15% to 20%. The Company currently purchases \$140.0 million of terrorism protection under its workers' compensation treaties to satisfy these obligations. The Company implemented a conservative strategy during 2014 addressing the possible non-renewal of the statute in relation to its exposure, which is specifically connected to employee concentrations in certain large hospitals. The Company imposed aggregate limits on certain workers' compensation policies where previously statutory limits were extended as permitted; and/or non-renewed certain specific risks where other alternatives were not commercially feasible. The Company is actively engaged in evaluating alternatives and monitoring its aggregation exposures to terrorism on a regular basis, we will implement a strategy that conservatively addresses the increasing retentions under the Act.

Employees

At February 18, 2015, we employed 904 associates to service our clients and provide management services to our Insurance Company Subsidiaries as described below. We believe we have good relationships with our associates.

Available Information

Our Internet address is www.meadowbrook.com, where we make available, free of charge, our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, Statements of Beneficial Ownership (Forms 3, 4, and 5), and any amendments to those reports, as soon as reasonably practicable after we electronically file such material with, or furnish to, the SEC. You may read and copy materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington D.C., 20549. You may obtain information about the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet site that contains reports, proxy statements, and other information that we file at www.sec.gov. Our SEC reports can also be accessed through the investor relations section of our website. The information found on our website is not part of this or any other report we file with, or furnish to the SEC. The Charters of the Governance and Nominating Committee, the Compensation Committee, the Audit Committee and the Capital Strategy and Investment Committee, as well as the Board of Directors Governance Guidelines are also available on our website, or available in print to any shareholder who requests this information. In addition, our Compliance Code of Conduct and Business Ethics policy is available on our website, or in print to any shareholder who requests this information.

Glossary of Selected Insurance Terms

GAAP Terms

Book value per share

Total common shareholders' equity divided by the number of common shares outstanding.

Case reserves

Claim department estimates of anticipated future payments to be made on each specific individual reported claim.

Deferred acquisition costs

Primarily commissions and premium-related taxes that vary with, and are primarily related to, the production of new contracts and are deferred and amortized to achieve a matching of revenues and expenses when reported in financial statements prepared in accordance GAAP.

Deficiency

With regard to reserves for a given liability, a deficiency exists when it is estimated or determined that the reserves are insufficient to pay the ultimate settlement value of the related liabilities. Where the deficiency is the result of an

estimate, the estimated amount of deficiency (or even the finding of whether or not a deficiency exists) may change as new information becomes available.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

Expense ratio

See Underwriting expense ratio.

Incurred but not reported (IBNR) reserves

Reserves for estimated losses and LAE that have been incurred but not yet reported to the insurer. This includes amounts for unreported claims, development on known cases, and re-opened claims.

Loss

An occurrence that is the basis for submission and/or payment of a claim. Losses may be covered, limited or excluded from coverage, depending on the terms of the policy.

Loss adjustment expenses (LAE)

The expenses of settling claims, including legal and other fees and the portion of general expenses allocated to claim settlement costs.

Loss and LAE ratio

For GAAP, it is the ratio of incurred losses and loss adjustment expenses to net earned premiums. For SSAP, it is the ratio of incurred losses and loss adjustment expenses to net earned premiums.

Loss reserves

Liabilities established by insurers and reinsurers to reflect the estimated cost of claims incurred that the insurer or reinsurer will ultimately be required to pay in respect of insurance or reinsurance it has written. Reserves are established for losses and for LAE, and consist of case reserves and IBNR reserves. As the term is used in this document, loss reserves is meant to include reserves for both losses and LAE, unless stated otherwise.

Loss reserve development

The increase or decrease in incurred claims and claim adjustment expenses as a result of the re-estimation of claims and claim adjustment expense reserves at successive valuation dates for a given group of claims. Loss reserve development may be related to prior year or current year development.

Losses incurred

The total losses sustained by an insurance company under a policy or policies, whether paid or unpaid. Incurred losses include a provision for IBNR.

Redundancy

With regard to reserves for a given liability, a redundancy exists when it is estimated or determined that the reserves are greater than what will be needed to pay the ultimate settlement value of the related liabilities. Where the redundancy is the result of an estimate, the estimated amount of redundancy (or even the finding of whether or not a redundancy exists) may change as new information becomes available.

Underwriting expense ratio

For GAAP, it is the ratio of GAAP underwriting expenses incurred to net earned premiums. For SSAP, it is the ratio of Statutory underwriting expenses incurred to net written premiums.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

Non-GAAP Terms

Accident year

The annual calendar accounting period in which loss events occurred, regardless of when the losses are actually reported, booked or paid.

Accident year combined ratio

The accident year combined ratio is a non-GAAP measure that excludes changes in net ultimate loss estimates from prior accident year loss reserves. The accident year combined ratio provides management with an assessment of the specific policy year's profitability (which matches policy pricing with related losses) and assists management in their evaluation of product pricing levels and quality of business written. Management uses accident year combined ratio as one component to assess the Company's current year performance and as a measure to evaluate, and if necessary, adjust current year pricing and underwriting.

A.M. Best's Capital Adequacy Ratio (BCAR)..

An integrated review of underwriting, financial and asset leverage. BCAR calculates the net required capital to support the financial risks of the company associated with the exposure of assets and underwriting to adverse economic and market conditions, and compares it to economic capital.

Combined Ratio (GAAP)

The statutory combined ratios modified to reflect GAAP accounting, as management evaluates the performance of our underwriting operations using the GAAP combined ratio. Specifically, the GAAP combined ratio is the sum of the loss and LAE ratio, plus the ratio of GAAP underwriting expenses (which include the change in deferred policy acquisition costs) to net premiums earned (expense ratio)

Combined Ratio (Statutory)

The combined loss and expense ratio (or combined ratio), expressed as a percentage, is the key measure of underwriting profitability traditionally used in the property and casualty insurance business. The combined ratio is a statutory (non-GAAP) accounting measurement, which represents the sum of (i) the ratio of losses and loss expenses to net premiums earned (loss ratio), plus (ii) the ratio of underwriting expenses to net premiums written (expense ratio).

Combined Ratio (Overall)

When the combined ratio is under 100%, underwriting results are generally considered profitable; when the combined ratio is over 100%, underwriting results are generally considered unprofitable.

NAIC-IRIS ratios

Financial ratios calculated by the NAIC to assist state insurance departments in monitoring the financial condition of insurance companies.

Operating income (loss)

Net income (loss) excluding the after-tax impact of net realized investment gains (losses) and cumulative effect of changes in accounting principles when applicable.

Operating income (loss) per share

Operating income (loss) on a per share basis.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

Premium leverage ratio (Gross / Net)

The ratio of gross / net written premium to consolidated statutory surplus.

Policyholders' surplus

As determined under SSAP, the amount remaining after all liabilities, including loss reserves, are subtracted from all admitted assets. Admitted assets are assets of an insurer prescribed or permitted by a state to be recognized on the statutory balance sheet. Policyholders' surplus is also referred to as surplus or statutory surplus for statutory accounting purposes.

Risk-based capital (RBC)

A measure adopted by the NAIC and enacted by states for determining the minimum statutory policyholders' surplus requirements of insurers. Insurers having total adjusted capital less than that required by the RBC calculation will be subject to varying degrees of regulatory action depending on the level of capital inadequacy.

Statutory accounting practices (SSAP)

The practices and procedures prescribed or permitted by domiciliary state insurance regulatory authorities in the United States for recording transactions and preparing financial statements. Statutory accounting practices generally reflect a modified going concern basis of accounting.

Underwriting gain or loss

Net earned premiums claims and claim adjustment expenses and insurance-related expenses.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, including the information regarding forward-looking statements set forth in Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, you should carefully consider the following risk factors, categorized by Risks Related to Our Being Acquired by Fosun, Risks Related to Our Business, Risks Related to Our Industry and Risks Related to Our Common Stock, which could materially affect our business, financial condition or results of operations in future periods.

Risks Related to Our Being Acquired by Fosun

The announcement and pendency of our agreement to be acquired by Fosun may have an adverse impact on our business.

On December 30, 2014, we entered into a merger agreement pursuant to which we will be acquired by Fosun through the merger of us with a subsidiary of Fosun. Under the terms of the transaction, our shareholders will receive \$8.65 per share of our common stock, consisting of all cash. The transaction is expected to close in the second half of 2015. Various events, regulatory factors or other circumstances related to the merger agreement could have an impact on our results of operations, including:

- the occurrence of any event, change or other circumstance that could give rise to the termination of the merger agreement, including a termination under circumstances that could require us to pay a termination fee;
- the inability or the failure to satisfy conditions to complete the merger, including insurance regulatory approvals, and negative impacts associated with actions required to be taken by us in order to obtain requisite regulatory approvals;
- the failure of the merger to close for any other reason;
- risks that the proposed transaction disrupts current plans and operations and the potential difficulties in employee retention as a result of the merger;
- adverse outcomes of pending or threatened litigation or government investigations relating to such transaction;
- diversion of management's attention from ongoing business concerns;
- the effect of the announcement of the merger on our business relationships, operating results and our business generally, including effects on our relationships with agents, wholesalers, suppliers, customers, policyholders and regulators;
- actions taken or conditions imposed by the governmental or regulatory authorities;
- the impact of competition in the industries and in the specific markets in which we operate; and
- the possibility that the merger may be more expensive to complete than anticipated, including as a result of unexpected factors or events.

Risks Related to Our Business

Actual loss and loss adjustment expenses may exceed our reserve estimates, which would negatively impact our profitability and financial position.

In many cases, several years may elapse between the occurrence of an insured loss, the reporting of the loss to us and our payment of the loss. To recognize liabilities for unpaid losses, we establish reserves as balance sheet liabilities representing estimates of amounts needed to pay reported and unreported losses and the related loss adjustment expenses. Loss reserves are an estimate of what we anticipate the ultimate costs to be and therefore do not represent an

exact calculation of liabilities. Estimating loss reserves is a difficult and complex process involving many variables and subjective judgments. As part of the reserving process, we review historical data and consider the impact of various factors such as:

- actuarial and statistical projections of the cost of settlement and administration of claims reflecting facts and circumstances then known;

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

- historical claims information and loss emergence patterns;
- assessments of currently available data;
- estimates of future trends in claims severity and frequency;
- economic factors such as inflation;
- judicial theories of liability;
- estimates and assumptions regarding social, judicial and legislative trends, and actions such as class action lawsuits and judicial interpretation of coverages or policy exclusions; and
- the level of insurance fraud.

This process assumes that past experience, adjusted for the effects of current developments and anticipated trends, is an appropriate basis for predicting future results. It also assumes that adequate historical or other data exists upon which to make these judgments. There is no precise method, however, for evaluating the impact of any specific factor on the adequacy of reserves and actual results are likely to differ from original estimates.

If the actual amount of insured losses is greater than our reserve estimates, our profitability, capital and financial position could suffer. In addition, if our loss reserves are inadequate to cover the actual amount of insured losses, our financial strength rating or the financial strength ratings of our Insurance Company Subsidiaries could be impacted or downgraded. An increase in reserves may also require us to write off a portion of our deferred acquisition costs asset, which would also negatively impact our operating results and financial position.

In 2013, we experienced material reserve strengthening because of significant adverse loss development, and for the year ended December 31, 2013, we reported an increase in net ultimate loss estimates for accident years 2012 and prior of \$68.4 million, or \$63.1 million excluding an adverse arbitration award. The adverse development did impact our financial strength ratings of our Insurance Company Subsidiaries as discussed under *A decrease in our A.M. Best rating could negatively affect our business* below.

Additional unforeseen losses, the type and magnitude of which we cannot predict, may emerge in the future. These additional losses could arise from changes in the legal environment, laws and regulations, climate change, catastrophic events, increases in loss severity or frequency, or other causes. Such future losses could be substantial. Inflationary scenarios may cause the cost of claims, especially medical claims, to rise, impacting reserve adequacy and our results of operations. There can be no assurance that we will not in the future experience significant adverse loss developments that could result in reserve strengthening and additional material charges to earnings.

Additional information relating to our reserves is included within the *Losses and Loss Adjustment Expenses and Reinsurance Recoverables* section of Note 1 ~ *Summary of Significant Accounting Policies* and Note 4 ~ *Liability for Losses and Loss Adjustment Expenses* of the Notes to the Consolidated Financial Statements, as well as to the *Critical Accounting Policies* section and the *Reserves* section of Item 7, *Management's Discussion and Analysis*.

A decrease in our A.M. Best rating could negatively affect our business.

Financial ratings are an important factor influencing the competitive position of insurance companies. Insurance companies are subject to financial strength ratings produced by external rating agencies. Higher ratings generally indicate greater financial stability and a stronger ability to pay claims. Ratings are assigned by rating agencies to insurers based upon factors they believe are important to policyholders. Ratings evaluations are not directed to potential purchasers of our common stock and are not recommendations to buy, hold, or sell our securities and should not be relied upon as such.

Our ability to write business is most influenced by our rating from A.M. Best (A.M. Best). A.M. Best ratings are designed to assess an insurer's financial strength and ability to meet continuing obligations to policyholders. On August 2, 2013, A.M. Best lowered Meadowbrook's issuer credit rating, as well its financial strength ratings and downgraded the Company's Insurance Company Subsidiaries' financial strength rating from A- (Excellent) with a negative outlook to B++ (Good) with a stable outlook. Subsequently, on

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

February 21, 2014, A.M. Best lowered Meadowbrook's issuer credit rating from bbb+ to bbb. A.M. Best affirmed the B++ financial strength rating of our Insurance Company Subsidiaries, but lowered the outlook for this rating from stable to negative. On January 5, 2015, A.M. Best placed under review with positive implications the issuer credit rating of bb of Meadowbrook, and also placed the financial strength rating of B++ (Good) and the ICRs of bbb under review with positive implications for our Insurance Company Subsidiaries.

Our results of operations could be materially and adversely impacted by the foregoing ratings. The adverse impact could include loss of current and potential independent agents and insureds who may choose to transact their business with more highly rated competitors. In addition, we may face a significant reduction in the number of insurance contracts we write and the loss of substantial business to our competitors that maintain higher ratings, which would cause premiums and earnings to decrease. The rating changes could negatively impact our ability to raise capital and have a negative impact on our overall liquidity. Because lenders and reinsurers will use our A.M. Best ratings as a factor in deciding whether to transact business with us, the current ratings of our Insurance Company Subsidiaries or their failure to maintain the current ratings may dissuade a financial institution or reinsurance company from conducting any business with us or may increase our interest or reinsurance costs. There can be no assurance that the Company will not be further downgraded.

In response to the downgrade by A.M. Best, on August 4, 2013, the Insurance Company Subsidiaries entered into a 100% quota share reinsurance agreement(s) with State National Insurance Company, National Specialty Insurance Company and United Specialty Insurance Company (collectively, SNIC), which provides the Insurance Company Subsidiaries the use of an A rated policy of insurance for a portion of its business where an A rated policy issuer is required. The costs associated with these agreements could negatively impact our results of operations. A further downgrade of the Company could increase the cost for this agreement, as well as require us to post additional collateral. In addition, a change in the A.M. Best rating of the policy issuance company could have a material adverse impact upon our business. There can be no assurance that the Company will not need to enter into additional policy issuance agreements.

We may require additional capital in the future, which may not be available or may only be available on unfavorable terms.

Our future capital requirements depend on many factors, including our ability to write new business successfully and to establish premium rates and reserves at levels sufficient to cover losses. To the extent that our present capital is insufficient to meet future operating requirements and/or cover losses, we may need to raise additional funds through financings. If we had to raise additional capital, equity or debt financing may not be available or may be on terms that are not favorable to us in our current environment. In the case of equity financings, dilution to our shareholders could result, and in any case such securities may have rights, preferences and privileges that are senior to those of the shares currently outstanding. If we cannot obtain adequate capital on favorable terms or at all, our business, operating results and financial condition could be adversely affected.

We face competitive pressures in our business that could cause our revenues to decline and adversely affect our profitability.

We compete with a large number of other companies in our selected lines of business. Many of our competitors are substantially larger and may enjoy better name recognition, substantially greater financial resources, higher financial strength ratings by rating agencies, broader and more diversified product lines and more widespread agency relationships than us. Insurers in our markets generally compete on the basis of price, consumer recognition, coverages offered, claims handling, financial stability, customer service and geographic coverage. Although pricing is

influenced to some degree by that of our competitors, it is not in our best interests to compete solely on price, and we may from time-to-time experience a loss of market share during periods of intense price competition. A number of new, proposed or potential legislative or industry developments could further increase competition in our industry including, but not limited to:

- the formation of new insurers and an influx of new capital in the marketplace as existing companies attempt to expand their business as a result of better pricing and/or terms or the offering of similar or better products at or below our prices;
- programs in which state-sponsored entities provide property insurance in catastrophe-prone areas, other alternative market types of coverage, or other non-property insurance; and

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

- changing practices created by the Internet, which has increased competition within the insurance business. New competition resulting from these and other developments could make the property and casualty insurance marketplace more competitive by increasing the supply of insurance capacity. In that event, the current market may soften further, and it may negatively influence our ability to maintain or increase rates. Consequently, our profitability could be adversely impacted by increased competition.

The failure of any of the loss limitation methods we employ could have a material adverse effect on our results of operations and financial condition.

Various provisions of our policies, such as limitations or exclusions from coverage or choice of forum, have been negotiated to limit our exposure to certain types of risks and expanding theories of legal liability. In addition, many of our policies limit the period during which a policyholder may bring a claim under the policy, which period in many cases is shorter than the statutory period under which these claims can be brought by our policyholders. While these exclusions and limitations help us assess and control our loss exposure, it is possible that a court or regulatory authority could nullify or void an exclusion, or legislation could be enacted that modifies or voids the use of such endorsements and limitations in a way that could have a materially adverse impact on our financial condition and operating results. Such actions could result in higher than anticipated losses and LAE by extending coverage beyond our underwriting intent or increasing the number or size of claims, which could have a material adverse effect on our operating results. In some instances, these changes may not become apparent until sometime after we have issued the insurance policies that are affected by the changes and litigation relating to the insurance policy interpretation has been resolved. As a result, the full extent of liability under our insurance contracts may not be known for many years after a policy is issued.

Our geographic concentration ties our performance to the business, economic, natural perils, man-made perils, and regulatory conditions within our most concentrated region.

Our revenues and profitability are subject to the prevailing regulatory, legal, economic, political, demographic, competitive, weather and other conditions in the principal states in which we do business. Changes in any of these conditions could make it less attractive for us to do business in such states and would have a more pronounced effect on us compared to companies that are more geographically diversified. In addition, our exposure to severe losses from localized perils, such as earthquakes, hurricanes, tropical storms, tornadoes, wind, ice storms, hail, fires, terrorism, riots and explosions, is increased in those areas where we have written significant numbers of insurance policies.

One of our predominate lines of business is workers' compensation (47.8% of net earned premiums in 2014), which has a high concentration in California. Accordingly, unfavorable business, economic or regulatory conditions in this state could negatively impact our business. California is also exposed to climate and environmental changes, natural perils such as earthquakes, water supplies, and the possibility of pandemics or terrorist acts. Because our business is concentrated in this manner, we may be exposed to economic and regulatory risks or risk from natural perils that are greater than the risks associated with greater geographic diversification. Refer to Note 5 ~ *Reinsurance* for further information regarding our reinsurance structure related to workers' compensation business.

Our success depends on our ability to appropriately price the risks we underwrite.

Our financial results depend on our ability to underwrite and collect adequate premium rates for a wide variety of risks. Rate adequacy is necessary to generate sufficient premiums to pay losses, loss expenses, and underwriting expenses and to earn a profit. To price our products accurately, we must collect and properly analyze a substantial amount of data, develop, test and apply appropriate rating formulas, monitor and react to changes in trends and project

both severity and frequency of losses with reasonable accuracy. These activities are subject to a number of risks and uncertainties that are outside our control, including:

- availability of sufficient reliable data and our ability to properly analyze available data;
- uncertainties that inherently characterize estimates and assumptions;
- selection and application of appropriate rating and pricing techniques;

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

- changes in legal standards, claim settlement practices, medical care expenses and restoration costs;
- changes in mandated rates or benefits set by the state regulators; and
- legislative actions.

Consequently, we could underprice risks, which would negatively affect our profit margins, or we could overprice risks, which could reduce our sales volume and competitiveness. In either event, our profitability could be materially and adversely affected.

If market conditions cause our reinsurance to be more costly or unavailable, we may be required to bear increased risks or reduce the level of our underwriting commitments.

As part of our overall risk and capacity management strategy, we purchase reinsurance for significant amounts of risk underwritten by our Insurance Company Subsidiaries, especially for the excess-of-loss and severity risks. We purchase reinsurance by transferring part of the risk we have written (known as ceding) to a reinsurance company in exchange for part of the premium we receive in connection with the risk under pro-rata and excess-of-loss contracts. These reinsurance arrangements are intended to diversify our business and reduce our exposure to large losses or from hazards of an unusual nature.

Market conditions beyond our control determine the availability and cost of the reinsurance we purchase, which may affect the level of our business and profitability. Our reinsurance facilities are generally subject to annual renewal. We may be unable to maintain our current reinsurance facilities or to obtain other reinsurance in adequate amounts and at favorable rates. Increases in the cost of reinsurance would adversely affect our profitability. In addition, if we are unable to renew our expiring facilities or to obtain new reinsurance on favorable terms, either our net exposure to risk would increase or, if we are unwilling to bear an increase in net risk exposures, we would have to reduce the amount of risk we underwrite.

Our reinsurers may not pay on losses in a timely fashion, or at all, which may cause a substantial loss and increase our costs.

Although reinsurance makes the reinsurer liable to us to the extent the risk is transferred, the ceding of insurance does not discharge us of our primary liability to our policyholder. As a result, ceded reinsurance arrangements do not limit our ultimate obligations to policyholders to pay claims. Therefore, we are subject to credit risk with respect to the obligations of our reinsurers. We are also subject to the risk that their reinsurers may dispute their obligations to pay our claims. In addition, our reinsurance agreements are subject to specified limits and we would not have reinsurance coverage to the extent that it exceeds those limits. Should an unlikely event occur that exceeds our reinsurance coverage, then the amounts in excess of our reinsurance coverage could adversely impact our financial condition or results of operations. In order to minimize our exposure to significant losses from reinsurer insolvencies, we evaluate the financial condition of our reinsurers and monitor the economic characteristics of the reinsurers on an ongoing basis and, if appropriate, we may require trust agreements to collateralize reinsurers' financial obligation to us. Nevertheless, if our reinsurers fail to pay us or fail to pay on a timely basis, our financial results and financial condition could be adversely affected.

We may be adversely affected by interest rate changes.

Our investment portfolio is predominantly comprised of fixed income securities. These securities are sensitive to changes in interest rates. An increase in interest rates typically reduces the fair market value of fixed income securities. In addition, if interest rates decline, investment income earned from future investments in fixed income securities will be lower. We generally hold our fixed income securities to maturity, so our interest rate exposure does

not usually result in realized losses. However, as noted above, rising interest rates could result in a significant reduction of our book value. A low investment yield environment could adversely impact our net earnings, as a result of fixed income securities maturing and being replaced with lower yielding securities which impact investing results.

Interest rates are highly sensitive to many factors beyond our control including general economic conditions, governmental monetary policy, and political conditions. As discussed above, fluctuations in interest rates may adversely impact our business. See *Item 7A. Qualitative and Quantitative Disclosures About Market Risk* for further discussion on interest rate risk.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

Difficult conditions in the global capital markets and the economy potentially could materially and adversely affect our business and results of operations.

Our results of operations are materially affected by conditions in the global capital markets and the United States economy generally, both in the United States and elsewhere around the world. Recently, concerns over the slow economic recovery, the level of United States national debt, inflation levels, energy costs and geopolitical issues have contributed to increased volatility and diminished expectations for the economy and global capital markets going forward. These factors, combined with volatile oil prices, reduced business and consumer confidence and continued high unemployment, have negatively impacted the United States economy. Although liquidity has improved, the market for fixed income instruments continues to experience some price volatility, credit downgrade events and elevated probabilities of default.

Factors such as consumer spending, business investment, government spending, the volatility and strength of the capital markets, investor and consumer confidence and inflation levels all affect the business and economic environment and, ultimately, the amount and profitability of our business. In an economic downturn characterized by higher unemployment, lower family income, lower corporate earnings, lower business investment, negative investor sentiment and lower consumer spending, the demand for our insurance products could be adversely affected. Our policyholders may choose to defer paying insurance premiums or stop paying insurance premiums altogether. In addition, we may experience an elevated incidence of claims and lapses or surrenders of policies. Adverse changes in the economy could negatively affect our net income and could have a material adverse effect on our business, results of operations and financial condition.

In addition, continuing market turmoil has resulted in, and may continue to raise the possibility of, legislative, regulatory and governmental actions. We cannot predict whether or when such actions may occur, or what impact, if any, such actions could have on our business, results of operations and financial condition.

Even in the absence of a market downturn, our insurance products, as well as our investment returns and our access to and cost of financing, are sensitive to equity, fixed income, real estate and other market fluctuations and general economic and political conditions. These fluctuations and conditions could materially and adversely affect our results of operations, financial condition and liquidity.

Our investment portfolio is subject to market and credit risks, which could affect our financial results and ability to conduct business.

Our investment portfolio is subject to overall market risk and credit risk of the individual issuers of securities. The value of investments in marketable securities is subject to impairment as a result of deterioration in the creditworthiness of the issuer. Although we try to manage this risk by diversifying our portfolio and emphasizing credit quality, our investments are subject to losses as a result of a general downturn in the economy. A severe economic downturn could have a material adverse impact on our results from operations and our financial condition.

We could be forced to sell investments to meet our liquidity requirements.

We invest the premiums we receive from customers until they are needed to pay policyholder claims or until they are recognized as profits. Consequently, we seek to match the duration of our investment portfolio with the duration of our loss and loss adjustment expense reserves to ensure strong liquidity and avoid having to liquidate securities to fund claims. As an example, we ladder the maturities of our investment portfolio to ensure we have adequate liquidity to fund anticipated liabilities that are coming due. Risks such as inadequate loss and loss adjustment reserves or

unfavorable trends in litigation could potentially result in the need to sell investments to fund these liabilities. Such sales could result in significant realized losses depending on the conditions of the general market, interest rates and credit issues with individual securities.

If we are unable to successfully introduce new products or services or fail to keep pace with advances in technology, our business, financial condition and results of operations will be adversely affected.

The successful implementation of our business model depends on our ability to adapt to evolving technologies and industry standards and introduce new products and services. We cannot assure you that we will be able to introduce new products or services, or that any new products will achieve market acceptance.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

Moreover, competitors may develop competitive products that could adversely affect our results of operations. A failure by us to introduce planned products or other new products could have an adverse effect on our business, financial condition and results of operations.

If we cannot adapt to changing technologies, our products and services may become obsolete, and our business could suffer. Our success will depend, in part, on our ability to continue to enhance our existing products and services, develop new technology that addresses the increasingly sophisticated and varied needs of our prospective customers and respond to technological advances on a timely and cost-effective basis. We may not be successful in using new technologies effectively or adapting our proprietary technology to evolving customer requirements, and, as a result, our business could suffer.

Changes in federal regulation could impose significant burdens on us and otherwise adversely impact our results.

While the U.S. federal government has not historically regulated the insurance business, in 2010 the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) established a Federal Insurance Office (the FIO) within the U.S. Department of the Treasury. The FIO has limited regulatory authority and is empowered to gather data and information regarding the insurance industry and insurers. In December 2013, the FIO released a report recommending ways to modernize and improve the system of insurance regulation in the United States. While the report did not recommend full federal regulation of insurance, it did suggest an expanded federal role in some circumstances. In addition, the report suggested that Congress should consider direct federal involvement to fill regulatory gaps identified in the report, should those gaps persist, for example, by considering either establishing a federal coordinating body or a direct regulator of select aspects of the industry, such as large complex institutions or institutions that seek a federal charter, if a law is passed to allow a federal charter. It is not clear as to the extent, if any, the report will lead to regulatory changes or how any such changes would impact the Company.

As a result of the foregoing, the Dodd-Frank Act, or other additional federal regulation that is adopted in the future, could impose significant burdens on us, including impacting the ways in which we conduct our business, increasing compliance costs and duplicating state regulation, and could result in a competitive disadvantage, particularly relative to other insurers that may not be subject to the same level of regulation. Changes in the U.S. regulatory framework could impact the overall competitive environment by imposing additional burdens on us and allowing other competitors not subject to these same burdens to enter or expand their insurance businesses.

Even if we are not subject to additional regulation by the federal government, significant financial sector regulatory reform, including the Dodd-Frank Act, could have a significant impact on us. For example, regulatory reform could have an unexpected impact on our rights as a creditor or on our competitive position.

Other potential changes in U.S. federal legislation, regulation and/or administrative policies, including the potential repeal of the McCarran-Ferguson Act (which exempts insurance from most federal regulation) and potential changes in federal taxation, could also significantly harm the insurance industry, including us.

Our ability to meet ongoing cash requirements and pay dividends may be limited by our holding company structure and regulatory constraints restricting dividends or other distributions by our Insurance Company Subsidiaries.

We are a holding company that transacts the majority of our business through our Insurance Company Subsidiaries. Our ability to meet our obligations on our outstanding debt, and to pay our expenses and shareholder dividends,

depends upon the dividend paying capacity of our Insurance Company Subsidiaries. We will be limited by the earnings of our Insurance Company Subsidiaries, and the distribution or other payment of such earnings to it in the form of dividends, loans, advances or the reimbursement of expenses. Payments of dividends to us by our Insurance Company Subsidiaries are subject to various business considerations and restricted by state insurance laws, including laws establishing minimum solvency and liquidity thresholds, and could be subject to revised restrictions in the future. The ability to pay ordinary and extraordinary dividends must be reviewed in relation to the impact on key financial measurement ratios, including RBC ratios and BCAR. The Insurance Company Subsidiaries' ability to pay future dividends without advance regulatory approval is dependent upon maintaining a positive level of unassigned surplus, which in turn, is dependent upon the

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

Insurance Company Subsidiaries generating net income. As a result, at times, we may not be able to receive dividends from our Insurance Company Subsidiaries in amounts necessary to meet our debt obligations, to pay shareholder dividends on our capital stock or to pay corporate expenses. Therefore, the inability of our Insurance Company Subsidiaries to pay dividends or make other distributions could have a material adverse effect on our business and financial condition.

Our Insurance Company Subsidiaries are subject to minimum capital and surplus requirements. Failure to meet these requirements could subject us to regulatory action.

Our Insurance Company Subsidiaries are subject to minimum capital and surplus requirements (which we are in compliance with as of December 31, 2014) imposed under the laws of their respective states of domicile and each state in which they issue policies. Any failure by one of our Insurance Company Subsidiaries to meet minimum capital and surplus requirements imposed by applicable state law will subject it to corrective action. This may include requiring adoption of a comprehensive financial plan, revocation of its license to sell insurance products or placing the subsidiary under state regulatory control. A decline in the risk based capital ratios of our Insurance Company Subsidiaries could limit their ability to make a dividend to us and could be a factor in causing rating agencies to downgrade our ratings. Any new minimum capital and surplus requirements adopted in the future may require us to increase the capital and surplus of our Insurance Company Subsidiaries, which we may not be able to do.

Our reliance upon producers subjects us to their credit risk.

With respect to agency-billed premiums and premiums generated by brokers, producers collect premiums from the policyholders and forward them to us. We rely, and will continue to rely, heavily on these producers to attract new business. Independent producers generally have the ability to bind insurance policies and collect premiums on our behalf, actions over which we have a limited ability to exercise preventative control. In the event that an independent agent exceeds its authority by binding us to a risk that does not comply with our underwriting guidelines, we may be at risk for that policy until we effect a cancellation. Any improper use of such authority may result in losses that could have a material adverse effect on our business, results of operations and financial condition.

In certain jurisdictions, when the insured pays premium for these policies to producers for payment, the premium might be considered to have been paid under applicable insurance laws and the insured will no longer be liable to us for those amounts, whether or not we have actually received the premium from the producer. Consequently, we assume a degree of credit risk associated with producers. Although producers' failures to remit premiums to us have not caused a material adverse impact on us to date, there may be instances for which producers collect premium but do not remit it to us, and we may nevertheless be required under applicable law to provide the coverage set forth in the policy. Because the possibility of these events is dependent in large part upon the financial condition, cash flows, and internal operations of our producers, we may not be able to quantify any potential exposure presented by the risk. If we are unable to collect premium from our producers in the future, our financial condition and results of operations could be materially and adversely affected.

Two of our core selected producers accounts for a large portion of our premium volume, loss of business provided by this entity could adversely affect us.

Our largest producers in 2014 were Midwest General Insurance Agency, LLC, which in combination with its affiliates, accounted for 14.6% of our gross written premium and our food service industry producer which accounted for 10.9% of gross written premium. All other producers were less than 10% of our gross written premium. We do not have an exclusive relationship with either agency, and there can be no assurance that this relationship will continue in

the future. If either agency reduces their marketing of our products or moves some or all of its business to another carrier, then our business, financial condition, results of operations and cash flows may be adversely affected.

Our performance is dependent on the continued services and performance of our senior management and other key personnel.

The success of our business is dependent on our ability to retain and motivate our senior management and key management personnel and their efforts. The loss of the services of any of our executive officers or other key employees could have a material adverse effect on our business, financial condition, results of operations,

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

and cash flows. We have existing employment or severance agreements with Robert S. Cubbin, Christopher J. Timm, Karen M. Spaun, Michael G. Costello, James M. Mahoney and other senior executives. We maintain a key person life insurance policy on Robert S. Cubbin, our President and CEO. The loss of any of these officers or other key personnel could cause our ability to implement our business strategies to be delayed or hindered.

Our future success also will depend on our ability to attract, train, motivate and retain other highly skilled technical, managerial, marketing, and customer service personnel. Competition for these employees is strong and we may not be able to successfully attract, integrate or retain sufficiently qualified personnel in our current environment. In addition, our future success depends on our ability to attract, retain and motivate our agents and other producers. Our failure to attract and retain the necessary personnel and producers could have a material adverse effect on our business, financial condition, results of operations, and cash flows.

Increased information technology security threats and more sophisticated computer crime pose a risk to our systems, networks, products and services.

Our business is dependent upon the uninterrupted functioning of our information technology and telecommunication systems. We rely upon our systems, as well as the systems of our vendors, to underwrite and process our business; make claim payments; provide customer service; provide policy administration services, such as endorsements, cancellations and premium collections; comply with insurance regulatory requirements; and perform actuarial and other analytical functions necessary for pricing and product development. We have established security policies, processes and layers of defense designed to help identify and protect against intentional and unintentional misappropriation or corruption of our systems and information and disruption of our operations. Our security measures are focused on the prevention, detection and remediation of damage from computer viruses, natural disasters, unauthorized access, cyber attack and other similar disruptions.

Despite these efforts, our systems may be damaged, disrupted, or shut down due to attacks by unauthorized access, malicious software, undetected intrusion, hardware failures, or other events, and in these circumstances our disaster recovery planning may be ineffective or inadequate. Information technology security threats from user error to cybersecurity attacks are increasing in frequency and sophistication. Cybersecurity attacks may range from random attempts to coordinated and targeted attacks, including sophisticated computer crime and advanced threats. These threats pose a risk to the security of our systems and networks and the confidentiality, availability and integrity of our data. No cybersecurity attack has had a material impact on our financial condition, results of operations or liquidity. However, the potential consequences of a material cybersecurity attack include reputational damage, litigation with third parties, and increased cybersecurity protection and remediation costs. A sustained business interruption or system failure could adversely impact our ability to process our business, provide customer service, pay claims in a timely manner or perform other necessary business functions. We could also be subject to fines and penalties from a security breach. The cost to remedy a severe breach could be substantial.

Managing technology initiatives and obtaining the efficiencies anticipated with technology implementation may present significant challenges.

While technological enhancements and initiatives can streamline several business processes and ultimately reduce the costs of operations, these initiatives can present short-term costs and implementation risks. Projections of associated costs, implementation timelines, and the benefits of those results may be inaccurate and such inaccuracies could increase over time. In addition, there are risks associated with not achieving the anticipated efficiencies from technology implementation that could impact our financial condition, results of operations, and cash flows.

Our internal controls are not fail-safe.

We continually enhance our operating procedures and internal controls to effectively support our business and comply with our regulatory and financial reporting requirements. As a result of the inherent limitations in all control systems, no system of controls can provide absolute assurance that all control objectives have been or will be met, and that every instance of error or fraud has been or will be detected. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

control system are met. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by individual acts or by collusion of two or more persons. The design of any system of controls is based in part upon assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Internal controls may also become inadequate because of changes in conditions, or the degree of compliance with policies or procedures may deteriorate. Further, the design of a control system must reflect resource constraints, and the benefits of controls must be considered relative to their costs. As a result of the inherent limitations in a cost-effective control system, misstatement due to error or fraud may occur and not be detected. Accordingly, our internal controls and procedures are designed to provide reasonable, not absolute, assurance that the control objectives are met.

Risks Related to Our Industry and Our Regulatory and Litigation Environment

The property and casualty insurance industry is cyclical in nature, which may affect our overall financial performance.

Historically, the financial performance of the property and casualty insurance industry has tended to fluctuate in cyclical periods of price competition, excess capacity and lower levels of profitability (known as a soft market) followed by periods of high premium rates, shortages of underwriting capacity, and higher levels of profitability (known as a hard market). Although an individual insurance company's financial performance is dependent on its own specific business characteristics, the profitability of most property and casualty insurance companies tends to follow this cyclical market pattern. Specific factors that can drive the industry's profitability include:

- rising levels of actual costs that are not known by companies at the time they price their products;
- volatile and unpredictable developments, including man-made, weather-related and other natural catastrophes or terrorist attacks;
- changes in loss reserves resulting from the general claims and legal environments as different types of claims arise and judicial interpretations relating to the scope of insurer's liability develop;
- fluctuations in interest rates, inflationary pressures and other changes in the investment environment, which affect returns on invested assets and may impact the ultimate payout of losses; and
- increases in medical costs beyond historic or expected annual inflationary levels.

Because the cyclicity of our industry is due in large part to the actions of competitors and general economic conditions, we cannot predict with certainty the timing or duration of changes in the market cycle.

Severe weather conditions and other catastrophes are inherently unpredictable and could cause us to suffer material financial losses.

The majority of our property business is exposed to the risk of severe weather conditions and other catastrophes. Catastrophes can be caused by various events, including natural events, such as hurricanes, winter weather, tornadoes, windstorms, earthquakes, hailstorms, severe thunderstorms and fires, and other events, such as explosions, terrorist attacks and riots. The incidence and severity of catastrophes and severe weather conditions are inherently unpredictable. Generally, these losses result in an increase in the number of claims incurred as well as the amount of compensation sought by claimants.

One or more catastrophic or other events could result in claims that substantially exceed our expectations, which could have an adverse effect on our results of operations or financial condition. Along with other insurers in the industry, we use models in assessing our exposure to catastrophe losses that assume various conditions and probability scenarios.

However, these models do not necessarily accurately predict future losses or accurately measure losses currently incurred. Catastrophe models use historical information about various catastrophes and detailed information about our in-force business. While we use this information in connection with our pricing and risk management activities, there are limitations with respect to their usefulness in predicting losses in any reporting period. Such limitations lead to questionable predictive capability and post-event measurements that

27

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

have not been well understood or proven to be sufficiently reliable. In addition, the models are not necessarily reflective of our or state-specific policy language, demand surge for labor and materials or loss settlement expenses, all of which are subject to wide variation by catastrophe.

Litigation may have an adverse effect on our business

We are subject at times to various claims, lawsuits and proceedings relating principally to alleged errors or omissions in the placement of insurance, claims administration, consulting services and other business transactions arising in the ordinary course of business as further disclosed in Note 15 ~ *Commitments and Contingencies*. Where appropriate, we vigorously defend such claims, lawsuits and proceedings. Some of these claims, lawsuits and proceedings seek damages, including consequential, exemplary or punitive damages, in amounts that could, if awarded, be significant. Most of the claims, lawsuits and proceedings arising in the ordinary course of business are covered by the policy of insurance at issue. We account for such activity through the establishment of unpaid loss and loss expense reserves. We also maintain errors and omissions insurance and extra-contractual coverage under reinsurance treaties related to the policy of insurance at issue or other appropriate insurance. In terms of any retentions or deductibles associated with such insurance, we have established accruals for such retentions or deductibles, when necessary, based upon current available information. In accordance with accounting guidance, if it is probable that an asset has been impaired or a liability has been incurred as of the date of the financial statements and the amount of loss is reasonably estimable; then an accrual for the costs to resolve these claims is recorded in the accompanying consolidated balance sheets. Period expenses related to the defense of such claims are included in the accompanying consolidated statements of income. With the assistance of outside counsel, we adjust such provisions according to new developments or changes in the strategy in dealing with such matters. On the basis of current information, we do not believe that there is a reasonable possibility that, other than with regard to the arbitration disclosed in Note 15 ~ *Commitments and Contingencies*, any material loss exceeding amounts already accrued, if any, will result from any of the claims, lawsuits and proceedings to which the Company is subject to, either individually, or in the aggregate. However, it is possible that future results of operations or cash flows for any particular quarter or annual period could be materially affected by an unfavorable resolution of any such matters.

Because we are heavily regulated by the states in which we operate, we may be limited in the way we operate.

We are subject to extensive supervision and regulation in the states in which we operate. The supervision and regulation relate to numerous aspects of our business and financial condition. The primary purpose of the supervision and regulation is to maintain compliance with insurance regulations and to protect policyholders. The extent of regulation varies, but generally is governed by state statutes. These statutes delegate regulatory, supervisory and administrative authority to state insurance departments. This system of regulation covers, among other things:

- standards of solvency, including risk-based capital measurements;
- restrictions on the nature, quality and concentration of investments;
- restrictions on the types of terms that we can include in the insurance policies we offer;
- restrictions on our ability to withdraw from unprofitable lines of insurance or unprofitable market areas;
- required methods of accounting;
- required reserves for unearned premiums, losses and other purposes;
- permissible underwriting and claims settlement practices;
- assessments for the provision of funds necessary for the settlement of covered claims under certain insurance policies provided by impaired, insolvent or failed insurance companies;
- approval of policy forms and rates; and
- restrictions on transactions between our Insurance Company Subsidiaries and their affiliates.

The regulations of the state insurance departments may affect the cost or demand for our products and may impede us from obtaining rate increases or taking other actions we might wish to take to increase our

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

profitability. Furthermore, we may be unable to maintain all required licenses and approvals and our business may not fully comply with the wide variety of applicable laws and regulations or the relevant authority's interpretation of the laws and regulations. Also, regulatory authorities have relatively broad discretion to grant, renew or revoke licenses and approvals. If we do not have the requisite licenses and approvals, or do not comply with applicable regulatory requirements, the insurance regulatory authorities could stop or temporarily suspend us from conducting some or all of our activities or monetarily penalize us. In addition, state regulators and the NAIC regularly examine existing laws and regulations applicable to insurance companies. Changes in these laws and regulations or the interpretations thereof could adversely impact our business.

Although the United States federal government does not directly regulate the insurance business, changes in federal legislation, regulation, and/or administrative policies in several areas, including changes in financial services regulation and federal taxation, can significantly harm the insurance industry.

Most states assess our Insurance Company Subsidiaries to provide funds for failing insurance companies and those assessments could be material.

Our Insurance Company Subsidiaries are subject to assessments in most states where we are licensed for the provision of funds necessary for the settlement of covered claims under certain policies provided by impaired, insolvent or failed insurance companies. These assessments, which are levied by guaranty associations within the state up to prescribed limits, are imposed on all member insurers in the applicable state on the basis of the proportionate share of the premiums written by member insurers in the lines of business in which the impaired, insolvent or failed insurer was engaged. Accordingly, the assessments levied on us by the states in which we are licensed to write insurance may increase as we increase our premiums written. Maximum contributions required by law in any one year vary by state, and have historically been less than one percent of annual premiums written. In addition, as a condition to the ability to conduct business in certain states, insurance companies are required to participate in mandatory reinsurance funds. We cannot predict with certainty the amount of future assessments or level of participation in mandatory reinsurance funds. Significant assessments and the effect of mandatory reinsurance arrangements, or changes therein, could have a material adverse effect on our financial condition and results of operations.

Risks Related to Our Common Stock

The price of our common stock may be volatile.

The trading price of our common stock may fluctuate substantially due to a variety of factors, some of which are beyond our control and may not be related to our operating performance. These fluctuations could be significant and could cause a loss in the amount invested in our shares of common stock. Factors that could cause fluctuations include, but are not limited to, the following:

- Variations in our actual or anticipated operating results or changes in the expectations of financial market analysts with respect to our results;
- Investor perceptions of the insurance industry in general and the Company in particular;
- Market conditions in the insurance industry and any significant volatility in the market;
- Major catastrophic events; and
- Departure of key personnel.
- Perceptions regarding the timing and likelihood of consummating the proposed transaction with Fosun.

Provisions of the Michigan Business Corporation Act, our articles of incorporation and other corporate governing documents and the insurance laws may discourage takeover attempts.

The Michigan Business Corporation Act contains anti-takeover provisions. Chapter 7A (the Fair Price Act) of the Business Corporation Act applies to us and may have an anti-takeover effect and may delay, defer or prevent a tender offer or takeover attempt that a shareholder might consider in their best interest, including those attempts that might result in shareholders receiving a premium over market price for their shares.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

In general, subject to certain exceptions, the Fair Price Act prohibits a Michigan corporation from engaging in a business combination with an interested shareholder for a period of five years following the date that such shareholder became an interested shareholder, unless (i) prior to such date, the board of directors approved the business combination or (ii) on or subsequent to such date, the business combination is approved by at least 90% of the votes of each class of the corporation's stock entitled to vote and by at least two-thirds of such voting stock not held by the interested shareholder or such shareholder's affiliates. The Fair Price Act defines a business combination to include certain mergers, consolidations, dispositions of assets or shares and recapitalizations. An interested shareholder is defined by the Fair Price Act to include a beneficial owner, directly or indirectly, of 10% or more of the voting power of the outstanding voting shares of the corporation.

We are also subject to the laws of Michigan, Ohio, California, Washington D.C., Missouri, and other states, which govern insurance holding companies. Under these laws, a person generally must obtain the applicable Insurance Department's approval to acquire, directly or indirectly, five to ten percent or more of the outstanding voting securities of our Insurance Company Subsidiaries. An Insurance Department's determination of whether to approve an acquisition would be based on a variety of factors, including an evaluation of the acquirer's financial stability, the competence of its management, and whether competition in that state would be reduced. These laws may prevent, delay or defer a change of control of us or our Insurance Company Subsidiaries. The proposed transaction with Fosun is subject to regulatory approval by insurance departments for the states of Michigan, Ohio, Missouri, California and Washington D. C., which could either delay or prevent the execution of the transaction.

Although we have paid cash dividends in the past, we may not pay cash dividends in the future.

The declaration and payment of dividends is subject to the discretion of our Board of Directors and will depend on our financial condition, results of operations, cash flows, cash requirements, future prospects, regulatory and contractual restrictions on the payment of dividends by our Insurance Company Subsidiaries and other factors deemed relevant by our Board of Directors. There is no requirement that we must, and we cannot assure you that we will, declare and pay any dividends in the future. Our Board of Directors may determine to retain such capital for general corporate or other purposes.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not Applicable

ITEM 2. PROPERTIES

We own the land and an approximately 72,000 square foot corporate headquarters building in Southfield, Michigan. We expect that our corporate headquarters building will be adequate for our current and expected future operations.

We lease 60,000 square feet of office space in Westerville, Ohio that expires in 2024.

We are also a party to various leases for other locations in which we have offices. We do not consider any of these leases to be material.

ITEM 3. LEGAL PROCEEDINGS

The Company, and its subsidiaries, are subject at times to various claims, lawsuits and proceedings relating principally to alleged errors or omissions in the placement of insurance, claims administration, consulting services and other

business transactions arising in the ordinary course of business as further disclosed in Note 15 ~ *Commitments and Contingencies*. Where appropriate, the Company vigorously defends such claims, lawsuits and proceedings. Some of these claims, lawsuits and proceedings seek damages, including consequential, exemplary or punitive damages, in amounts that could, if awarded, be significant. Most of the claims, lawsuits and proceedings arising in the ordinary course of business are covered by the policy of insurance at issue. We account for such activity through the establishment of unpaid loss and loss expense reserves. We also maintain errors and omissions insurance and extra-contractual coverage under reinsurance treaties related to the policy of insurance at issue or other appropriate insurance. In terms of any retentions or deductibles associated with such insurance, the Company has established accruals for such retentions or deductibles, when necessary, based upon

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

current available information. In accordance with accounting guidance, if it is probable that an asset has been impaired or a liability has been incurred as of the date of the financial statements and the amount of loss is reasonably estimable; then an accrual for the costs to resolve these claims is recorded by the Company in the accompanying consolidated balance sheets. Period expenses related to the defense of such claims are included in the accompanying consolidated statements of income. Management, with the assistance of outside counsel, adjusts such provisions according to new developments or changes in the strategy in dealing with such matters. On the basis of current information, the Company does not believe that there is a reasonable possibility that, other than with regard to the arbitration disclosed in Note 15 ~ *Commitments and Contingencies*, any material loss exceeding amounts already accrued, if any, will result from any of the claims, lawsuits and proceedings to which the Company is subject to, either individually, or in the aggregate.

Share Price and Dividend Information

Our common stock is traded on the New York Stock Exchange under the symbol MIG. The following table sets forth the high and low sale prices of our common shares as reported by the NYSE and our quarterly dividends declared for

each period shown:

December 31, 2014	High	Low	Dividends
First Quarter	\$ 7.00	\$ 5.24	\$ 0.02
Second Quarter	7.20	5.27	0.02
Third Quarter	7.28	5.66	0.02
Fourth Quarter	8.63	5.76	0.02

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.**

December 31, 2013	High	Low	Dividends
First Quarter	\$ 7.44	\$ 5.79	\$ 0.02
Second Quarter	8.26	6.84	0.02
Third Quarter	8.90	5.87	0.02
Fourth Quarter	7.46	6.17	0.02

When evaluating the declaration of a dividend, our Board of Directors considers a variety of factors, including but not limited to, our cash flow, liquidity needs, results of operations strategic plans, industry conditions, our overall financial condition and other relevant factors. As a holding company, the ability to pay cash dividends is partially dependent on dividends and other permitted payments from our subsidiaries which may be subject to limitations under applicable insurance regulations. In 2014 and 2013, the Insurance Company Subsidiaries paid dividends to our holding company of \$20.0 million and \$14.0 million, respectively.

For additional information regarding dividend restrictions, refer to the *Liquidity and Capital Resources* section of *Management's Discussion and Analysis*.

Shareholders of Record

As of February 18, 2015, there were 221 shareholders of record of our common stock. For purposes of this determination, Cede & Co., the nominee for the Depository Trust Company is treated as one holder.

Purchase of Equity Securities by the Issuer

There have been no repurchases of shares of our common stock in 2014 or 2013.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****Performance Graph**

The following graph sets forth, for the five year period ended December 31, 2014, the cumulative total shareholder return for the Company's common stock, the Russell 2000 Index, and a published industry index. The graph assumes the investment of \$100 on December 31, 2009 in Common Stock of the Company, the Russell 2000 Index, and such published index. The stock price performance represented on the following graph is not necessarily indicative of future stock price performance.

The performance graph shall not be deemed soliciting material or to be filed with the Securities and Exchange Commission, nor shall such information be deemed to be incorporated by reference into any future filing of the Company under the Securities Act of 1933 or Securities Exchange Act of 1934, each as amended, except to the extent the Company specifically incorporates it by reference into such filing.

Other Data:

GAAP ratios (insurance companies only):

Net loss and LAE ratio	65.4 %	78.7 %	79.3 %	66.3 %	60.6 %
Expense ratio	36.7 %	32.3 %	32.1 %	33.5 %	34.6 %
Combined ratio (1)	102.1 %	111.0 %	111.4 %	99.9 %	95.2 %
Accident year combined ratio (2)	102.4 %	101.2 %	101.4 %	98.8 %	99.9 %
Total (favorable) adverse development on prior years	\$ (1,741)	\$ 68,400	\$ 85,515	\$ 7,311	\$ (31,003)

(1) The combined loss and expense ratio (or combined ratio), expressed as a percentage, is the key measure of underwriting profitability traditionally used in the property and casualty insurance business. The combined ratio is a statutory (non-GAAP) accounting measurement, which represents the sum of (i) the ratio of losses and loss expenses to net premiums earned (loss ratio), plus (ii) the ratio of underwriting expenses to net premiums written (expense ratio). The combined ratios above have been modified to reflect GAAP accounting, as management evaluates the performance of our underwriting operations using the GAAP combined ratio. Specifically, the GAAP combined ratio is the sum of the loss ratio, plus the ratio of GAAP underwriting expenses (which include the change in deferred policy acquisition costs) to net premiums earned (expense ratio). When the combined ratio is under 100% underwriting results are generally considered profitable; when the combined ratio is over 100% underwriting results are generally considered unprofitable.

(2) The accident year combined ratio is a non-GAAP measure that excludes changes in net ultimate loss estimates from prior accident year loss reserves. The accident year combined ratio provides management with an assessment of the specific policy year's profitability (which matches policy pricing with related losses) and assists management in their evaluation of product pricing levels and quality of business written. Management uses accident year combined ratio as one component to assess the Company's current year performance and as a measure to evaluate, and if necessary, adjust current year pricing and underwriting.

MANAGEMENT'S DISCUSSION AND ANALYSIS**

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This annual report may provide information including certain statements which constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These include statements regarding the intent, belief, or current expectations of management, including, but not limited to, those statements that use the words believes, expects, anticipates, estimates, or similar expressions. You are cautioned that any such forward-looking statements are not guarantees of future performance and involve a number of risks and uncertainties, and results could differ materially from those indicated by such forward-looking statements. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are: actual loss and loss adjustment expenses exceeding our reserve estimates; competitive pressures in our business; the failure of any of the loss limitation methods we employ; a failure of additional capital to be available or only available on unfavorable terms; our geographic concentration and the business and economic conditions, natural perils, man made perils, and regulatory conditions within our most concentrated region; our ability to appropriately price the risks we underwrite; goodwill impairment risk employed as part of our growth strategy; actions taken by regulators, rating agencies or lenders, including the impact of the downgrade by A.M. Best of the Company's Insurance Company Subsidiaries' financial strength rating, A.M. Best's downgrade of our issuer credit rating and any other future action by A.M. Best with respect to such ratings; increased risks or reduction in the level of our underwriting commitments due to market conditions; a failure of our reinsurers to pay losses in a timely fashion, or at all; interest rate changes; continued difficult conditions in the global capital markets and the economy generally; market and credit risks affecting our investment portfolio; liquidity requirements forcing us to sell our investments; a failure to introduce new products or services to keep pace with advances in technology; the new federal financial regulatory reform; our holding company structure and regulatory constraints restricting dividends or other distributions by our Insurance Company Subsidiaries; minimum capital and surplus requirements imposed on our Insurance Company Subsidiaries; our reliance upon producers, which subjects us to their credit risk; loss of one of our core selected producers; our dependence on the continued services and performance of our senior management and other key personnel; our reliance on our information technology and telecommunications systems; managing technology initiatives and obtaining the efficiencies anticipated with technology implementation; a failure in our internal controls; the cyclical nature of the property and casualty insurance industry; severe weather conditions and other catastrophes; the effects of litigation, including the previously disclosed arbitration and class action litigation or any similar litigation which may be filed in the future; state regulation; assessments imposed upon our Insurance Company Subsidiaries to provide funds for failing insurance companies, and risks and uncertainties relating to the proposed transaction with Fosun, including the risk that the Company's shareholders do not approve the transaction; uncertainties as to the timing of the transaction; the risk that regulatory or other approvals required for the transaction are not obtained or are obtained subject to conditions that are not anticipated; competitive responses to the transaction; litigation relating to the transaction; disruptions of current plans and operations caused by the announcement and pendency of the proposed transaction; potential difficulties in employee retention as a result of the announcement and pendency of the proposed transaction; and disruption from the proposed transaction making it more difficult to maintain relationships with agents, wholesalers, suppliers, customers, policyholders and regulators.

For additional information with respect to certain of these and other factors, refer to Risk Factors above and subsequent filings made with the United States Securities and Exchange Commission. We are not under any obligation to (and expressly disclaim any obligation to) update or alter our forward-looking statements, whether as a result of

new information, future events or otherwise.

Critical Accounting Policies

General

In certain circumstances, we are required to make estimates and assumptions that affect amounts reported in our consolidated financial statements and related footnotes. We evaluate these estimates and assumptions on an

36

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

on-going basis based on a variety of factors. There can be no assurance, however, the actual results will not be materially different than our estimates and assumptions, and that reported results of operation will not be affected by accounting adjustments needed to reflect changes in these estimates and assumptions. We believe the following policies, along with those disclosed in Note 1 ~ *Summary of Significant Accounting Policies*, are the most sensitive to estimates and judgments.

Losses and Loss Adjustment Expenses

Significant periods of time can elapse between the occurrence of a loss, the reporting of the loss to the insurer, and the insurer's payment of that loss. To recognize liabilities for unpaid losses and LAE, insurers establish reserves as balance sheet liabilities representing estimates of amounts needed to pay reported and unreported net losses and LAE.

We establish a liability for losses and LAE, which represents case based estimates of reported unpaid losses and LAE and actuarial estimates of IBNR and LAE. Such liabilities, by necessity, are based upon estimates and, while we believe the amount of our reserves is adequate, the ultimate liability may be greater or less than the estimate. As of December 31, 2014 and 2013, we have accrued \$1,590.4 million and \$1,616.5 million of gross loss and LAE reserves, respectively.

Components of Losses and Loss Adjustment Expense

The following table sets forth our gross and net reserves for losses and LAE based upon an underlying source of data, at December 31, 2014 (in thousands):

	Case	IBNR	Total
Direct	\$ 539,888	\$ 788,186	\$ 1,328,074
Assumed-Directly Managed (1)	55,316	151,885	207,201
Assumed-Residual Markets (2)	10,152	12,842	22,994
Assumed-MFH	10,383	5,707	16,090
Assumed-Other	5,650	10,350	16,000
Gross	621,389	968,970	1,590,359
Less Ceded	143,728	375,802	519,530
Net	\$ 477,661	\$ 593,168	\$ 1,070,829

(1) Directly Managed represents business managed and processed by our underwriting, claims, and loss control departments, utilizing our internal systems and related controls.

(2) Residual Markets represent mandatory pooled workers' compensation business allocated to individual insurance company writers based on the insurer's market share in a given state.

The reserves referenced in the above table related to our direct and assumed-directly managed business are established through transactions processed through our internal systems and related controls. Likewise, business assumed from Midwest Insurance Company is defined as assumed business related to our partial ownership of Midwest Financial Holding, LLC (MFH), where we have direct access to their paid and case reserve loss data. Accordingly, case reserves are established on a current basis, therefore, there is no delay or lag in reporting of losses from a ceding company, and IBNR is determined utilizing various actuarial methods based upon historical data. Ultimate reserve estimates related to assumed business from residual markets are provided by individual states on a two quarter lag between the date of

the evaluation and the receipt of the estimate from the National Council on Compensation Insurance (NCCI), and include an estimated reserve determined based upon internal actuarial methods for this lag. Relative to assumed business from other sources, we receive case and paid loss data within a forty-five day reporting period and develop our estimates for IBNR based on both current and historical data.

The completeness and accuracy of data received from cedants on assumed business that we do not manage directly is verified through monthly reconciliations to detailed statements, inception-to-date roll-forwards of claim data, actuarial estimates of historical trends, field audits, and a series of management oversight reports on a program basis.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

The following table sets forth our net case and IBNR reserves for losses and LAE by line of business at December 31, 2014 (in thousands):

	Net Case	Net IBNR	Total
Workers' Compensation	\$ 233,145	\$ 235,943	\$ 469,088
Residual Markets	10,682	14,218	24,900
Commercial Multiple Peril/General Liability	160,680	283,644	444,324
Commercial Automobile	55,613	48,304	103,917
Other	17,541	11,059	28,600
Total	\$ 477,661	\$ 593,168	\$ 1,070,829

Claim Reserving Process and Methodology

When a claim is reported to one of our Insurance Company Subsidiaries or our affiliate MFH, for the majority of claims, our claims personnel within our risk management subsidiary will establish a case reserve for the estimated amount of the ultimate payment. The amount of the reserve is primarily based upon a case-by-case evaluation of the type of claim involved, the circumstances surrounding each claim, and the policy provisions relating to the type of losses. The estimate reflects the informed judgment of such personnel based on general insurance reserving practices, which focus on the ultimate probable cost of each reported claim, as well as the experience and knowledge of the claims person. Until the claim is resolved, these estimates are revised as deemed necessary by the responsible claims personnel based on subsequent developments, new information, or periodic reviews.

In addition to case reserves and in accordance with industry practice, we maintain estimates of reserves for losses and LAE incurred but not yet reported. We project an estimate of ultimate losses and LAE at each reporting date. The difference between the projected ultimate loss and LAE reserves and the case loss reserves and LAE reserves, is carried as IBNR reserves. By using both estimates of reported claims and IBNR determined using generally accepted actuarial reserving techniques, we estimate the ultimate liability for losses and LAE, net of reinsurance recoverables.

In developing claim and claim adjustment expense reserve estimates, we perform a complete and detailed reserve analyses each quarter. To perform this analysis, the data is organized at a reserve category level. A reserve category can be a line of business such as commercial automobile liability, or it may be a particular geographical area within a line of business such as California workers' compensation. The reserves within a reserve category level are characterized as either short tail or long tail. About 98% of our reserves can be characterized as coming from long tail lines of business. For long tail business, several years may lapse between the time the business is written and the time when all claims are settled. Our long-tail exposures include workers' compensation, commercial automobile liability, general liability, professional liability, products liability, aviation liability, excess, and umbrella. Short-tail exposures include property, commercial automobile physical damage, a portion of ocean marine, a portion of aviation, and inland marine. The analyses generally review losses both gross and net of reinsurance.

The standard actuarial methods that we use to project ultimate losses for both long-tail and short-tail exposures include, but are not limited to, the following:

- Paid Development Method
- Incurred Development Method
- Paid Bornhuetter-Ferguson Method

- Reported Bornhuetter-Ferguson Method
- Initial Expected Loss Method
- Paid Roll-forward Technique
- Incurred Roll-forward Technique

TABLE OF CONTENTS

**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

All of these methods are consistently applied to each reserve category for which they are applicable and they create indications for each accident year. We use judgment selecting the best estimate from within these estimates or adjusted estimates. As such, no one method or group of methods is strictly used for any line of business or reserve category within a line of business. The individual selections by year are our best judgments based on the strengths and weaknesses of the method, indications, the inherent variability in the data and the specific modifications to selections for data characteristics.

A brief description of the methods and some discussion of their inherent strengths, weaknesses and uses are as follows:

Paid Development Method

This method uses historical, cumulative paid losses by accident year and develops those actual losses to estimated ultimate losses based upon the assumption that each accident year will develop to estimated ultimate cost in a manner that is analogous to prior years, adjusted as deemed appropriate for the expected effects of known changes in the claim payment environment, and to the extent necessary supplemented by analyses of the development of broader industry data.

Selection of the paid loss pattern requires analysis of several factors including the impact of inflation on claims costs, the rate at which claims professionals make claim payments and close claims, the impact of judicial decisions, the impact of underwriting changes, the impact of large claim payments, and other factors. Claim cost inflation itself requires evaluation of changes in the cost of repairing or replacing property, changes in the cost of medical care, changes in the cost of wage replacement, judicial decisions, legislative changes and other factors. Because this method assumes that losses are paid at a consistent rate, changes in any of these factors can impact the results. Since the method does not rely on case reserves, it is not directly influenced by changes in the adequacy of case reserves.

Incurred Development Method

This method uses historical, cumulative reported loss dollars by accident year and develops those actual losses to estimated ultimate losses based upon the assumption that each accident year will develop to estimated ultimate cost in a manner that is analogous to prior years, adjusted as deemed appropriate for the expected effects of known changes in the claim payment and case reserving environment, and to the extent necessary supplemented by analyses of the development of broader industry data.

Since the method uses more data (case reserves in addition to paid losses) than the paid development method, the incurred development patterns may be less variable than paid patterns. However, selection of the incurred loss pattern requires analysis of all of the factors listed in the description of the paid development method. In addition, the inclusion of case reserves can lead to distortions if changes in case reserving practices have taken place and the use of case incurred losses may not eliminate the issues associated with estimating the incurred loss pattern subsequent to the most mature point available.

Paid Bornhuetter-Ferguson Method

This is a method that assigns partial weight to initial expected losses for each accident year and partial weight to observed paid losses. The weights assigned to the initial expected losses decrease as the accident year matures.

The method assumes that only future losses will develop at the expected loss ratio level. The percent of paid loss to ultimate loss implied from the paid development method is used to determine what percentage of ultimate loss is yet to be paid. The use of the pattern from the paid development method requires consideration of all factors listed in the description of the paid development method. The estimate of losses yet to be paid is added to current paid losses to estimate the ultimate loss for each year. This method will react very slowly if actual ultimate loss ratios are different from expectations due to changes not accounted for by the expected loss ratio calculation.

TABLE OF CONTENTS

**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

Reported Bornhuetter-Ferguson Method

This is a method that assigns partial weight to the initial expected losses and partial weight to observed reported loss dollars (paid losses plus case reserves). The weights assigned to the initial expected losses decrease as the accident year matures.

The use of case incurred losses instead of paid losses can result in development patterns that are less variable than paid patterns. However, the inclusion of case reserves can lead to distortions if changes in case reserving have taken place, and the method requires analysis of all the factors that need to be reviewed for the expected loss ratio and incurred development methods.

Initial Expected Loss Method

This method is used directly, and as an input to the Bornhuetter-Ferguson methods. Initial expected losses for an accident year are based on adjusting prior accident year projections to the current accident year levels using underlying loss trends, rate changes, benefit changes, reinsurance structure and cost changes and other pertinent adjustments specific to the line of business.

This method may be useful if loss development patterns are inconsistent, losses emerge very slowly, or there is relatively little loss history from which to estimate future losses. The selection of the expected loss ratio requires analysis of loss ratios from earlier accident years or pricing studies and analysis of inflationary trends, frequency trends, rate changes, underwriting changes, and other applicable factors.

Paid Roll-forward Technique

This technique adjusts prior estimates of ultimate losses based on the actual paid loss emergence in the quarter compared to the expected emergence. It is useful in evaluating reserves by considering the longer term implications of ordinary fluctuations in the development patterns.

Incurred Roll-forward Technique

This technique adjusts prior estimates of ultimate losses based on the actual case incurred loss emergence in the quarter compared to the expected emergence. It may also be useful in evaluating reserves by considering the longer term implications of ordinary fluctuations in the development patterns and generally reacts faster than the paid roll-forward technique.

Claims for short-tail lines of business settle quicker than long-tail lines of business, and in general, loss development factors for short-tail lines are smaller than long-tail lines. For long-tail lines, we tend to rely on initial expected loss methods throughout the current accident year then typically move to development factor based methods for older accident years. Development methods on short-tail lines are generally reliable in the third and fourth quarter of the initial accident year and recorded loss ratios reflect a blend of the development and forecast methods. Short-tail lines represent 2% of our total reserves at December 31, 2014.

The reserve categories for which the above methods are not applicable are few. The largest of these is our workers' compensation residual market reserve category, where we utilize detailed reserve analyses performed by the industry statistical agency NCCI in making our estimates. We adjust these estimates for timing differences in the reporting of

the data. The other reserve categories that deviate from the above methods are smaller; as a group they constitute less than one percent of the total reserves.

Each of the methods listed above requires the selection and application of parameters and assumptions. For all but the initial expected loss method, the key assumptions are the patterns with which our aggregate claims data will be paid or will emerge over time (development patterns). These patterns incorporate inherent assumptions of claims cost inflation rates and trends in the frequency of claims, both overall and by severity of claim. These are affected by underlying loss trends, rate changes, benefit changes, reinsurance structure and cost changes, and other pertinent adjustments which are explicit key assumptions underlying the initial expected loss method. Each of these key assumptions is discussed in the following paragraphs.

To analyze the development patterns, we compile, to the extent available, long-term and short-term historical data for our Insurance Company Subsidiaries, organized in a manner which provides an indication of the

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC. MANAGEMENT'S DISCUSSION AND ANALYSIS - continued

historical development patterns. To the extent that the historical data may provide insufficient information about future patterns—whether due to environmental changes such as legislation or due to the small volume or short history of data for some segments of our business—benchmarks based on industry data, and forecasts made by industry rating bureaus regarding the effect of legislative benefit changes on such patterns, may be used to supplement, adjust, or replace patterns based on our Insurance Company Subsidiaries' historical data.

Actuarial judgment is required in selecting the patterns to apply to each segment of data being analyzed, and our views regarding current and future claim patterns are among the factors that enter into our establishment of the reserve for losses and LAE at each balance sheet date. When short-term averages or external rate bureau analyses indicate the claims patterns are changing from historical company or industry patterns, the new or forecasted information typically is factored into the methodologies. When new claims emergence or payment patterns have appeared in the actual data repeatedly over multiple evaluations, those new patterns are given greater weight in the selection process.

Because some claims are paid over many years, the selection of claim emergence and payment patterns involves judgmentally estimating the manner in which recently occurring claims will develop for many years and at times, decades in the future. When it is likely the actual development will occur in the distant future, the potential for actual development to differ substantially from historical patterns or current projections is increased.

This process assumes that past experience, adjusted for the effects of current developments and anticipated trends, is an appropriate basis for predicting future events. In particular, the development factor based methods all have as a key assumption that the development of losses in the future will follow a pattern similar to those measured by past experience and as adjusted either explicitly or by actuarial judgment. There is no precise method for subsequently evaluating the impact of any specific factor on the adequacy of reserves, because the eventual deficiency or redundancy is affected by multiple and varied factors. With respect to the ultimate estimates for losses and LAE, the key methods remained consistent for the years ended December 31, 2014 and 2013. We reviewed the key assumptions that underlie the actuarial standard methods and made the appropriate adjustments to reflect the emergence of claim activity.

Variability of Claim Reserve Estimates

By its nature, the estimate of ultimate losses and LAE is subject to variability due to differences between our assumptions and actual events in the future. Although many factors influence the actual cost of claims and our corresponding reserve estimates, we do not measure and estimate values for all of these variables individually. This is due to the fact that many of the factors known to impact the cost of claims cannot be measured directly, such as the impact on claim costs due to economic inflation, coverage interpretations, and jury determinations. In most instances, we rely on our historical experience or industry information to estimate the values for the variables that are explicitly used in our reserve analyses. We assume that the historical effect of these unmeasured factors, which is embedded in our experience or industry experience, is representative of the future effects of these factors. Where we have reason to expect a change in the effect of one of these factors, we perform analyses to perform the necessary adjustments.

One implicit assumption underlying development patterns is that the claims inflation trends will continue into the future similar to their past patterns. To estimate the sensitivity of the estimated ultimate loss and settlement expense payments to an unexpected change in inflationary trends, our actuarial department derives expected payment patterns separately for each major line of business. These patterns were applied to the December 31, 2014 loss and settlement expense reserves to generate estimated annual incremental loss and settlement expense payments for each subsequent calendar year. Then, for the purpose of sensitivity testing, an explicit annual inflationary variance of one percent was

added to the inflationary trend that is implicitly embedded in the estimated payment pattern, and revised incremental loss and settlement expense payments were calculated. General inflation trends have been fairly stable over the past several years but there have been fluctuations of one to two percent over the past ten years and therefore we used a one percent annual inflation variance factor. The effect differed by line of business but overall was a four percent change in reserve adequacy or approximately \$24.9 million effect on after tax net income. A variance of this type would typically be recognized in loss and settlement expense reserves and, accordingly, would not have a material effect on liquidity because the claims have not been paid.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

An explicit assumption used in the analysis is the set of initial expected loss ratios (IELRs) used in the current accident year reserve projections and in some of the prior accident year ultimate loss indications. To estimate the sensitivity of the estimated ultimate loss to a change in IELRs, the actuarial department recast the loss reserve indications using a set of IELRs all one percent higher than the final IELRs. The overall impact of a one percent change in IELRs would be a corresponding one percent change in reserve adequacy or a \$5.7 million effect on after tax net income. Often the loss ratios by line of business will vary from the IELR in different directions causing them to partially offset each other. A variance of this type would typically be recognized in loss and settlement expense reserves and, accordingly, would not have a material effect on liquidity because the claims have not been paid.

The other factors having influence upon the loss and LAE reserve levels are too numerous and interdependent to efficiently model and test for sensitivity. Likewise, the development factors by reserve category and age are too numerous to model and test for sensitivity. Instead, ranges are estimated by reserve category considering past history, fluctuations in the development patterns, emerging issues, trends, and other factors. The ranges are compiled and the total range is estimated considering the sensitivity to all of the underlying factors together. The resulting range is our best estimate of the expected ongoing variability in the loss reserves.

Our range of loss and LAE reserves table shows that presently we estimate them as going from favorable development of 10.9% to unfavorable of 10.9%. The range was evaluated based on the ultimate loss estimates from the actuarial methods described above.

**Pre-tax Impact on Earnings from a Variance in Future Loss Payments and Case Reserves as of
December 31, 2014**

(in thousands)

Line of Business	Minimum Reserve Range		Maximum Reserve Range	
Workers' Compensation	\$ (36,303)	-7.7 %	\$ 35,483	7.6 %
Residual Markets	(1,744)	-7.0 %	746	3.0 %
Commercial Multiple Peril / General Liability	(68,863)	-15.5 %	70,640	15.9 %
Commercial Automobile	(8,345)	-8.0 %	8,276	8.0 %
Other	(1,765)	-6.2 %	1,832	6.4 %
Total	\$ (117,020)	-10.9 %	\$ 116,977	10.9 %

The range of loss and LAE reserves at December 31, 2014 had a minimum reserve estimate of \$953.8 million and a maximum reserve estimate of \$1,187.8 million.

The range of loss and LAE reserves at December 31, 2013 had a minimum reserve estimate of \$971.8 million and a maximum reserve estimate of \$1,210.0 million. At December 31, 2013 we recorded the loss and LAE reserves at \$1,111.1 million. At December 31, 2014, re-estimated loss and LAE reserves for December 31, 2013 were \$1,109.3 million which was within our 2013 loss and LAE estimated reserve range.

The sensitivity around our workers' compensation reserves primarily reflects the size and the maturity of the underlying book of business. Our workers' compensation reserves represent 46% of our total reserves at December 31, 2014.

The sensitivity around our commercial multiple peril and general liability reserves primarily reflects the longer duration of reserves relating to our liability excess program, which started in 2003 and was terminated in 2012, and our construction defect exposure, which together represent approximately 34% of the \$444.3 million reserves in this line of business as of December 31, 2014. These lines of business are subject to greater uncertainty and volatility than the remainder of our book of business.

The sensitivity around our commercial automobile reserves primarily reflects the speed of reporting of the underlying losses, as well as the maturity of the case law surrounding automobile liability.

The sensitivity around the other lines of business primarily reflects the size of the underlying book of business. Our other reserves represent 3% of total reserves at December 31, 2014. A large portion of these

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC. MANAGEMENT'S DISCUSSION AND ANALYSIS - continued

reserves represent professional liability programs which tend to be claims-made, therefore reducing the volatility that is inherent in a smaller book of business. Another large portion represents property claims, which have a shorter reporting and payout pattern than liability and workers' compensation claims.

All of our reserves are sensitive to changes in the underlying claim payment and case reserving practices, as well as the other sources of variations mentioned above.

Reinsurance Recoverables

Reinsurance recoverables represent (1) amounts currently due from reinsurers on paid losses and LAE, (2) amounts recoverable from reinsurers on case basis estimates of reported losses and LAE, and (3) amounts recoverable from reinsurers on actuarial estimates of IBNR losses and LAE. Such recoverables, by necessity, are based upon estimates. Reinsurance does not legally discharge us from our legal liability to our insureds, but it does make the assuming reinsurer liable to us to the extent of the reinsurance ceded. Instead of being netted against the appropriate liabilities, ceded unearned premiums and reinsurance recoverables on paid and unpaid losses and LAE are reported separately as assets in our consolidated balance sheets. Reinsurance recoverable balances are also subject to credit risk associated with the particular reinsurer. In our selection of reinsurers, we continually evaluate their financial stability. While we believe our reinsurance recoverables are collectible, the ultimate ceded reserve recoverable may be greater or less than the amount accrued. At December 31, 2014 and 2013, reinsurance recoverables on paid and unpaid losses were \$535.4 million and \$519.9 million, respectively.

In our risk-sharing programs, we are subject to credit risk with respect to the payment of claims by our clients' captive, rent-a-captive, large deductible programs, indemnification agreements, or on the portion of risk either ceded to the captives, or retained by the clients. The capitalization and credit worthiness of prospective risk-sharing partners is one of the factors we consider upon entering into and renewing risk-sharing programs. We collateralize balances due from our risk-sharing partners through funds withheld trusts or stand-by letters of credit issued by highly rated banks. We have historically maintained an allowance for the potential uncollectibility of certain reinsurance balances due from some risk-sharing partners, some of which may be in dispute. At the end of each quarter, an analysis of these exposures is conducted to determine the potential exposure to uncollectibility. At December 31, 2014, we believe this allowance is adequate. To date, we have not, in the aggregate, experienced material difficulties in collecting balances from our risk-sharing partners. No assurance can be given, however, regarding the future ability of our risk-sharing partners to meet their obligations.

Legal Contingencies

The Company, and its subsidiaries, are subject at times to various claims, lawsuits and proceedings relating principally to alleged errors or omissions in the placement of insurance, claims administration, consulting services and other business transactions arising in the ordinary course of business as further disclosed in Note 15 ~ *Commitments and Contingencies*. Where appropriate, the Company vigorously defends such claims, lawsuits and proceedings. Some of these claims, lawsuits and proceedings seek damages, including consequential, exemplary or punitive damages, in amounts that could, if awarded, be significant. Most of the claims, lawsuits and proceedings arising in the ordinary course of business are covered by the policy of insurance at issue. We account for such activity through the establishment of unpaid loss and loss expense reserves. We also maintain errors and omissions insurance and extra-contractual coverage under reinsurance treaties related to the policy of insurance at issue or other appropriate insurance. In terms of any retentions or deductibles associated with such insurance, the Company has established accruals for such retentions or deductibles, when necessary, based upon current available information. In accordance

with accounting guidance, if it is probable that an asset has been impaired or a liability has been incurred as of the date of the financial statements and the amount of loss is reasonably estimable; then an accrual for the costs to resolve these claims is recorded by the Company in the accompanying consolidated balance sheets. Period expenses related to the defense of such claims are included in the accompanying consolidated statements of income. Management, with the assistance of outside counsel, adjusts such provisions according to new developments or changes in the strategy in dealing with such matters. On the basis of current information, the Company does not believe that there is a reasonable possibility that, other than with regard to the arbitration disclosed in Note 15 ~ *Commitments and Contingencies*, any material

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

loss exceeding amounts already accrued, if any, will result from any of the claims, lawsuits and proceedings to which the Company is subject to, either individually, or in the aggregate.

Non-GAAP Financial Measures*Statutory Surplus*

Statutory surplus is a non-GAAP measure with the most directly comparable financial GAAP measure being shareholders' equity. The following is a reconciliation of statutory surplus to shareholders' equity:

**Meadowbrook Insurance Group, Inc.
Consolidated Statutory Surplus to GAAP Shareholders' Equity
For Period Ending: December 2014**

Statutory Consolidated Surplus		510,999
Statutory to GAAP differences:		
Deferred policy acquisition costs	60,862	
Unrealized gain on investments	21,414	
Non-admitted assets and other	(15,553)	
Total Statutory to GAAP differences		66,723
Total Non-Regulated Entities (1)		(120,089)
GAAP Consolidated Shareholders' Equity		457,633

(1) Total includes \$80,930 of debentures and \$121,282 of debt

Net Operating Income (Loss) and Net Operating Income (Loss) Per Share

Net operating income (loss) and net operating income (loss) per share are non-GAAP measures that represent net income (loss) excluding net realized gains, net of tax. The most directly comparable financial GAAP measures to net operating income (loss) and net operating income (loss) per share are net income (loss) and net income (loss) per share, respectively. Net operating income (loss) and net operating income (loss) per share are intended as supplemental information and are not meant to replace net income (loss) nor net income (loss) per share. Net operating income (loss) and net operating income (loss) per share should be read in conjunction with the GAAP financial results. The following is a reconciliation of net operating income (loss) to net income (loss), as well as net operating income (loss) per share to net income (loss) per share:

For the Years Ended December 31,		
2014	2013	2012
(In thousands, except share and per share data)		

Edgar Filing: MEADOWBROOK INSURANCE GROUP INC - Form 10-K

Net operating income (loss) (1)	\$ 21,547	\$ (117,908)	\$ (28,401)
Net realized gains, net of tax	7,110	5,598	40,150
Net income (loss)	\$ 28,657	\$ (112,310)	\$ 11,749
Diluted earnings (loss) per common share:			
Net operating income (loss)	\$ 0.43	\$ (2.36)	\$ (0.57)
Net income (loss)	\$ 0.57	\$ (2.25)	\$ 0.23
Diluted weighted average common shares outstanding	50,063,953	49,871,587	50,177,484

- (1) After-tax non- cash goodwill impairment represented \$101.6 million (or \$2.04 loss per diluted share) of the 2013 net operating loss.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

We use net operating income (loss) and net operating income (loss) per share as components to assess our performance and as measures to evaluate the results of our business. We believe these measures provide investors with valuable information relating to our ongoing performance that may be obscured by the net effect of realized gains and losses as a result of our market risk sensitive instruments, which primarily relate to fixed income securities that are available for sale and not held for trading purposes. Realized gains and losses may vary significantly between periods and are generally driven by external economic developments, such as capital market conditions. In 2014, realized gains before tax were \$10.9 million, compared to \$7.8 million of realized gains in 2013. Realized gains in 2012 were \$55.3 million that were generated by the sale of a large portion of our investment portfolio. Accordingly, net operating income (loss) excludes the effect of items that tend to be highly variable from period to period and highlights the results from our ongoing business operations and the underlying loss or profitability of our business. We believe that it is useful for investors to evaluate net operating income (loss) and net operating income (loss) per share, along with net income (loss) and net income (loss) per share, when reviewing and evaluating our performance.

Accident Year Loss and LAE Ratio

The accident year loss and LAE ratio is a non-GAAP measure and represents our net loss and LAE ratio excluding the impact of any changes in net ultimate loss estimates on prior year loss and LAE reserves. The most directly comparable financial GAAP measure to the accident year loss and LAE ratio is the net loss and LAE ratio. The accident year loss and LAE ratio is intended as supplemental information and is not meant to replace the net loss and LAE ratio. The accident year loss and LAE ratio should be read in conjunction with the GAAP financial results. The following is a reconciliation of the accident year loss and LAE ratio to the net loss and LAE ratio:

	For the Years Ended December 31,		
	2014	2013	2012
Accident year loss and LAE ratio	65.7 %	68.9 %	69.3 %
Increase in net ultimate loss estimates on prior year loss reserves	(0.3)%	9.8 %	10.0 %
Net loss & LAE ratio	65.4 %	78.7 %	79.3 %

We use the accident year loss and LAE ratio as one component to assess our current year performance and as a measure to evaluate, and if necessary, adjust our pricing and underwriting. Our net loss and LAE ratio is based on calendar year information. Adjusting this ratio to an accident year loss and LAE ratio allows us to evaluate information based on the current year activity. We believe this measure provides investors with valuable information for comparison to historical trends and current industry estimates. We also believe that it is useful for investors to evaluate the accident year loss and LAE ratio and net loss and LAE ratio separately when reviewing and evaluating our performance.

Year-to-Date Developments

On December 30, 2014 Fosun International Limited (HKEx stock code: 00656, together with its subsidiaries, Fosun) and the Company announced each entered into a definitive agreement under which Fosun will acquire all of the issued and outstanding common stock of the Company. The transaction follows a thorough review of strategic alternatives by the Company's Board of Directors and represents a 24% premium over the Company's closing price on December 29, 2014 and a premium of 39% to the Company's three-month average closing price for the period ending December 29, 2014. The transaction also represents a multiple of approximately 1.04x the Company's tangible book value per share as of September 30, 2014.

The transaction is subject to the approval of the Company's shareholders as well as regulatory approvals and the satisfaction of other specified closing conditions. The transaction is expected to be completed in the second half of 2015.

See Risks Related to Our Being Acquired by Fosun.

TABLE OF CONTENTS

**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

Results of Operations

Executive Overview

Net income for the year ended December 31, 2014 was \$28.7 million, or \$0.57 per diluted share, compared to a net loss of (\$112.3 million), or (\$2.25) per diluted share, for the year ended December 31, 2013. Net operating income, a non-GAAP measure, for the year ended December 31, 2014 was \$21.5 million, or \$0.43 per diluted share, compared to a net operating loss of (\$117.9 million), or (\$2.36) per diluted share in 2013. The 2014 net income includes \$7.1 million, or \$0.14 per diluted share, of after-tax realized gains, compared to \$5.6 million, or \$0.11 per diluted share, in 2013. The 2013 results were largely impacted by an after-tax goodwill impairment of (\$101.6 million), or (\$2.04) per share.

Our GAAP combined ratio was 102.1% for the year ended December 31, 2014, compared to 111.0% in 2013. Excluding the impact of the Multiple Line Quota Share Treaty with Swiss Reinsurance America Corporation (Swiss Re), the GAAP combined ratio was 101.8% for the year ended December 31, 2014, compared to 107.9% for the year ended December 31, 2013. Our accident year combined ratio was 102.4% for the year ended December 31, 2014, compared to 101.2% in 2013.

The year to date 2014 results were impacted by the decrease in net ultimate loss estimates for 2013 and prior accident years, which reduced the GAAP combined ratio by 0.3 percentage points. The year to date 2013 results included an increase in net ultimate loss estimates for 2012 and prior accident years, which increased the GAAP combined ratio by 9.8 percentage points.

Results of Operations - 2014 compared to 2013:

The net income for the year ended December 31, 2014 was \$28.7 million, or \$0.57 per dilutive share, compared to net loss of (\$112.3 million), or (\$2.25) per dilutive share, for the comparable period of 2013. Net operating income, a non-GAAP measure, for the year ended December 31, 2014 was \$21.5 million, or \$0.43 per diluted share, compared to net operating loss of (\$117.9 million), or (\$2.36) per diluted share for the year ended December 31, 2013. The 2013 net operating loss, excluding the goodwill impairment, was (\$16.3 million), or (\$0.33) per diluted share; there was no goodwill impairment in 2014. Refer to *Note 14 – Goodwill and Other Intangible Assets* of the Notes to the Consolidated Financial Statements, for additional information specific to the goodwill impairment. Total diluted weighted average shares outstanding for the year ended December 31, 2014, were 50,063,953, compared to 49,871,587 the comparable period in 2013. The increase primarily reflects the impact of share issuances pursuant to our 2013 long term incentive plan.

Revenues - 2014 compared to 2013

Revenues for the year ended December 31, 2014 decreased \$48.7 million, or 6.1%, to \$742.5 million, from \$791.2 million for the comparable period in 2013. This decrease primarily reflects reduced premium levels.

The following table sets forth the components of revenues (in thousands):

**For the Years Ended
December 31,**

	2014	2013
Revenue:		
Net earned premiums	\$ 643,271	\$ 697,417
Management administrative fees	17,891	16,034
Claims fees	6,668	7,065
Commission revenue	18,614	16,413
Net investment income	45,142	46,473
Net realized gains	10,939	7,769
Total revenue	\$ 742,525	\$ 791,171

Net earned premiums decreased \$54.1 million, or 7.8%, to \$643.3 million for the year ended December 31, 2014, from \$697.4 million in the comparable period in 2013. The decrease in premium is attributed to the

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

termination of, or premium volume reductions in certain programs where pricing and underwriting did not meet the Company's underwriting standards and was offset by an overall 9.1% earned rate increase, which exceeded the Company's estimated loss ratio trend of 1.9%.

Net commission and fee revenue increased \$3.7 million, or 9.3%, to \$43.2 million for the year ended December 31, 2014, from \$39.5 million for the comparable period in 2013. This increase was driven primarily by commission revenues generated from our subsidiary US Specialty Underwriters (USSU) that are no longer considered intercompany and as a result are not eliminated in consolidation as they are now written by SNIC carriers. This increase did not impact the Company's consolidated financial results as there is a corresponding increase in the expenses from net commission and fee operations. The remainder of the increase in commission and fee revenue was the result of increased agency commission revenue attributable to a recently acquired agency.

Net investment income decreased by \$1.4 million, or 3.0%, to \$45.1 million for the year ended December 31, 2014, from \$46.5 million for the comparable period in 2013. The decrease reflects the impact of lower reinvestment rates in 2014.

Net realized gains increased by \$3.1 million, to a \$10.9 million gain for the year ended December 31, 2014, from a \$7.8 million gain for the comparable period in 2013. The increase in realized gains primarily relates to the rebalancing of the equity portfolio in accordance with the Company's investment policy.

Expenses - 2014 compared to 2013

Expenses decreased \$223.5 million from \$936.9 million for the year ended December 31, 2013 to \$713.4 million for the year ended December 31, 2014. The decrease primarily is attributed to the \$115.4 million goodwill impairment and \$68.4 million of unfavorable development on prior years that was recorded during 2013.

The following table sets forth the components of expenses (in thousands):

	For the Years Ended December 31,	
	2014	2013
Expense:		
Net losses and loss adjustment expenses	\$ 420,808	\$ 549,037
Policy acquisition and other underwriting expenses	236,271	225,510
General selling & administrative expenses	31,972	25,789
General corporate expenses	6,454	3,997
Amortization expense	3,988	4,237
Goodwill impairment expense	—	115,397
Interest expense	13,899	12,950
Total expenses	\$ 713,392	\$ 936,917

Net loss and loss adjustment expenses (LAE) decreased \$128.2 million to \$420.8 million for the year ended December 31, 2014, from \$549.0 million for the same period in 2013. Our loss and LAE ratio was 65.4% for the year ended December 31, 2014 and 78.7% for the year ended December 31, 2013. The loss and LAE ratio for the year ended

December 31, 2014 includes a 0.3 percentage point decrease from net ultimate loss estimates for accident years 2013 and prior, whereas the 2013 results include a 9.8 percentage point increase from net ultimate loss estimates for accident years 2012 and prior. The accident year loss and LAE ratio was 65.7% for the year ended December 31, 2014, down from 68.9% in the comparable period in 2013. Additional discussion of our reserve activity is described below within the Other Items ~ Reserves section.

Policy acquisition and other underwriting expenses increased \$10.8 million, to \$236.3 million for the year ended December 31, 2014, from \$225.5 million for the same period in 2013. Our expense ratio increased 4.4 percentage points to 36.7% for the year ended December 31, 2014, from 32.3% for the same period in 2013. Excluding the impact of the quota share surplus relief treaty, the year to date expense ratio was 37.0% for 2014

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

compared to 33.3% for 2013. The 3.7% increase primarily reflects the cost associated with the use of an unaffiliated A rated insurance company for policy issuance which added 1.7 percentage points; a shift in the mix of business which includes business with a higher average commission rate; deleveraging impact of the anticipated reduction in earned premium associated with the Company's efforts to terminate unprofitable business; and the impacts of a special incentive bonus.

General, selling and administrative expenses increased \$6.2 million, to \$32.0 million in 2014 from \$25.8 million in 2013. The increase was driven by the USSU commission expense, which is no longer considered intercompany expense, and by increased agency commission expense attributable to a recently acquired agency. The increase attributed to the USSU commission expense did not impact our consolidated financial results, as there is a corresponding increase in the commission revenues.

Federal income tax expense for the year ended December 31, 2014 was \$4.0 million, or 13.8% of income before taxes, compared to a benefit of \$31.1 million, or 21.3% of income before taxes for the same period in 2013. Income tax expense on net capital gains and the change in our valuation allowance on deferred tax assets was \$3.8 million for the year ended December 31, 2014, compared to \$2.1 million for the year ended December 31, 2013. The 2013 tax rate is primarily due to the large tax benefit generated from underwriting losses resulting from adverse loss development offset by the tax expense on net investment income and realized gains. The effective tax rate on net investment income in 2014 was 20.5%, driven by the level of tax exempt investments, compared to 20.8% for the year ended December 31, 2013. The 2014 effective tax rate on underwriting results and profits from net commissions and fees was 33.5% compared to 2013 of 21.5%. The 2014 effective tax rate on realized gains was 35.0% compared to 27.9% in 2013. The proportion of these three components of 2014 net income resulted in the 13.8% overall effective tax rate.

Results of Operations - 2013 compared to 2012:

The net loss for the year ended December 31, 2013 was (\$112.3 million), or (\$2.25) per dilutive share, compared to net income of \$11.7 million, or \$0.23 per dilutive share, for the comparable period of 2012. Net operating loss, a non-GAAP measure, for the year ended December 31, 2013 was (\$117.9 million), or (\$2.36) per diluted share, compared to net operating loss of (\$28.4 million), or (\$0.57) per diluted share for the year ended December 31, 2012. The 2013 net operating loss, excluding the goodwill impairment, was (\$16.3 million), or (\$0.21) per diluted share. Total diluted weighted average shares outstanding for the year ended December 31, 2013, were 49,871,587, compared to 50,177,484 the comparable period in 2012. The decrease reflects the impact of share repurchases made pursuant to our Share Repurchase Plan in 2012.

Revenues - 2013 compared to 2012

Revenues for the year ended December 31, 2013, decreased \$205.6 million, or 20.6%, to \$791.2 million, from \$996.8 million for the comparable period in 2012. This decrease primarily reflects reduced premium levels and a decrease in net realized gains.

The following table sets forth the components of revenues (in thousands):

For the Years Ended December 31,	
2013	2012

Edgar Filing: MEADOWBROOK INSURANCE GROUP INC - Form 10-K

Revenue:

Net earned premiums	\$ 697,417	\$ 854,259
Management administrative fees	16,034	11,676
Claims fees	7,065	6,444
Commission revenue	16,413	15,929
Net investment income	46,473	53,143
Net realized gains	7,769	55,312
Total revenue	\$ 791,171	\$ 996,763

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

Net earned premiums decreased \$156.8 million, or 18.4%, to \$697.4 million for the year ended December 31, 2013, from \$854.3 million in the comparable period in 2012. The decrease in premium is attributed to the termination of, or premium volume reductions in certain programs where pricing and underwriting did not meet the Company's underwriting standards and was offset by an overall 12% rate increase, which exceeded the Company's estimated loss ratio trend of 1.7%.

Net commission and fee revenue increased \$5.5 million, or 16.0%, to \$39.5 million for the year ended December 31, 2013, from \$34.0 million for the comparable period in 2012. This increase was driven primarily by commission revenues generated from our subsidiary USSU that are no longer considered intercompany and as a result are not eliminated in consolidation, as they are now written by SNIC carriers. This increase did not impact the Company's consolidated financial results as there is a corresponding increase in the expenses from net commission and fee operations.

Net investment income decreased by \$6.7 million, to \$46.5 million for the year ended December 31, 2013, from \$53.1 million for the comparable period in 2012. The decrease reflects the impact of lower reinvestment rates in 2013 from the proceeds of the fourth quarter 2012 sale of a portion of our bond portfolio offset by the investment of the proceeds from the cash convertible senior notes.

Net realized gains decreased by \$47.5 million, to a \$7.8 million gain for the year ended December 31, 2013, from a \$55.3 million gain for the comparable period in 2012. The decrease in realized gains relates to the fourth quarter 2012 sale of a portion of our bond portfolio in order to generate realized gains and enhance the statutory surplus of our Insurance Company Subsidiaries.

Expenses - 2013 compared to 2012

Expenses decreased \$58.6 million from \$995.5 million for the year ended December 31, 2012 to \$936.9 million for the year ended December 31, 2013.

The following table sets forth the components of expenses (in thousands):

	For the Years Ended December 31,	
	2013	2012
Expense:		
Net losses and loss adjustment expenses	\$ 549,037	\$ 677,684
Policy acquisition and other underwriting expenses	225,510	274,066
General selling & administrative expenses	25,789	24,463
General corporate expenses	3,997	3,572
Amortization expense	4,237	7,296
Goodwill impairment expense	115,397	—
Interest expense	12,950	8,429
Total expenses	\$ 936,917	\$ 995,510

Net loss and loss adjustment expenses (LAE) decreased \$128.6 million to \$549.0 million for the year ended December 31, 2013, from \$677.7 million for the same period in 2012. Our loss and LAE ratio was 78.7% for the year ended December 31, 2013 and 79.3% for the year ended December 31, 2012. The loss and LAE ratio for the year ended December 31, 2013 includes a 9.8 percentage point increase from net ultimate loss estimates for accident years 2012 and prior, whereas the 2012 results include a 10.0 percentage point increase from net ultimate loss estimates for accident years 2011 and prior. The accident year loss and LAE ratio was 68.9% for the year ended December 31, 2013, down from 69.3% in the comparable period in 2012. Additional discussion of our reserve activity is described below under Other Items ~ Reserves .

Policy acquisition and other underwriting expenses decreased \$48.6 million, to \$225.5 million for the year ended December 31, 2013, from \$274.1 million for the same period in 2012. Our expense ratio increased 0.2 percentage points to 32.3% for the year ended December 31, 2013, from 32.1% for the same period in 2012. The 2013 expense ratio, excluding the impact of the quota share reinsurance treaty, was 33.3% compared to

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

32.1% in 2012, or an increase of 1.2 percentage points. This increase reflects the effect of the arbitration award expense of 0.3 percentage points and 0.4 percentage points relating to a reallocation of corporate overhead costs from our fee-for-service operations to Insurance Company Subsidiaries' operations. The reallocation reflects a shift of corporate resources used to support capital and operating enhancements focused on strengthening statutory surplus and returning the Insurance Company Subsidiaries to an underwriting profit and a corresponding decrease to general selling and administrative costs. This reallocation had no net income effect. In addition, the expense ratio included a 0.4 percentage point increase relating to the use of an unaffiliated A rated insurance company for policy issuance purposes. The remaining 0.1 percentage point reflects the impact of deleveraging fixed costs.

Amortization expense decreased \$3.1 million to \$4.2 million for the year ended December 31, 2013, from \$7.3 million for the same period in 2012. The decrease is primarily due to the \$1.8 million write off of an intangible asset related to the public entity excess liability program that we terminated in the fourth quarter of 2012.

Goodwill impairment expense increased by \$115.4 million from \$0 in 2012 due to the \$115.4 million impairment recognized in the second quarter of 2013. Refer to *Note 14 – Goodwill and Other Intangible Assets* of the Notes to the Consolidated Financial Statements, for additional information specific to the goodwill impairment.

Interest expense increased by \$4.5 million to \$12.9 million for the year ended December 31, 2013 from \$8.4 million for the same period in 2012. The increase is primarily due to the interest incurred on the \$100 million cash convertible senior notes entered into in the first quarter of 2013.

Federal income tax benefit for the year ended December 31, 2013 was \$31.1 million, or 21.3% of income before taxes, compared to an expense of \$8.1 million, or -794.3% of income before taxes for the same period in 2012. Income tax expense on net capital gains and the change in our valuation allowance on deferred tax assets was \$2.1 million for the year ended December 31, 2013, compared to \$15.2 million for the year ended December 31, 2012. The unusual 2012 tax rate is primarily due to the large tax benefit generated from underwriting losses resulting from adverse loss development and storm losses offset by the tax expense on net investment income and realized gains. The effective tax rate on net investment income in 2013 was 20.8%, driven by the level of tax exempt investments, compared to 25.7% for the year ended December 31, 2012. The 2013 effective tax rate on underwriting results and profits from net commissions and fees was 21.5% compared to 2012 of 34.3%. The 2013 effective tax rate on realized gains was 27.9% compared to 27.4% in 2012. The proportion of these three components of 2013 net income resulted in the 21.3% overall effective tax rate.

Other Items - Results of Operations***Equity earnings of affiliated, net of tax***

In July 2009, our subsidiary, Star, purchased a 28.5% ownership interest in an affiliate, MFH, for \$14.8 million in cash. We are not required to consolidate this investment as we are not the primary beneficiary of the business nor do we control the entity's operations. Our ownership interest is significant, but is less than a majority ownership and, therefore, we are accounting for this investment under the equity method of accounting. Star recognizes 28.5% of the profits and losses as a result of this equity interest ownership. We recognized equity earnings, net of tax, from MFH of \$2.5 million, or \$0.05 per dilutive share, for the year ended December 31, 2014, compared to \$2.8 million, or \$0.06 per dilutive share, for the comparable period of 2013, and \$3.0 million, or \$0.06 per dilutive share, for the comparable period of 2012. We received dividends from MFH in 2014, 2013 and 2012, for \$3.2 million, \$2.0 million and \$4.0 million, respectively.

In November 2012, our subsidiary, Century, committed to a \$10 million contribution to the Aquiline Financial Services Fund II L.P. as a strategic investment. As of December 31, 2014, approximately \$6.7 million of the commitment had been satisfied with \$3.3 million of unfunded commitment remaining. Our ownership interest is approximately 1.3% of the fund, which does not constitute significant influence. Therefore, we are accounting for this investment under the equity method of accounting. Century recognizes 1.3% of the Fund's

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

profits and losses as a result of this equity interest ownership. We recognized equity earnings, net of tax, from the Aquiline Financial Services Fund II L.P. of \$1.1 million, or \$0.02 per dilutive share and \$0.6 million, or \$0.01 per dilutive share, for the years ended December 31, 2014 and 2013, respectively.

Reserves

At December 31, 2014, our best estimate for the ultimate liability for loss and LAE reserves, net of reinsurance recoverables, was \$1.1 billion. We established a reasonable range of reserves of approximately \$953.8 million to \$1.2 billion. This range was established primarily by considering the various indications derived from standard actuarial techniques and other appropriate reserve considerations. The following table sets forth this range by line of business (in thousands):

Line of Business	Minimum Reserve Range	Maximum Reserve Range	Selected Reserves
Workers' Compensation	\$ 432,785	\$ 504,571	\$ 469,088
Residual Markets	23,156	25,646	24,900
Commercial Multiple Peril / General Liability	375,461	514,964	444,324
Commercial Automobile	95,572	112,193	103,917
Other	26,835	30,432	28,600
Total Net Reserves	\$ 953,809	\$ 1,187,806	\$ 1,070,829

Reserves are reviewed and established by our internal actuaries for adequacy and peer reviewed by our third-party actuaries. When reviewing reserves, we analyze historical data and estimate the impact of numerous factors such as (1) per claim information; (2) industry and our historical loss experience; (3) legislative enactments, judicial decisions, legal developments in the imposition of damages, and changes in political attitudes; and (4) trends in general economic conditions, including the effects of inflation. This process assumes that past experience, adjusted for the effects of current developments and anticipated trends, is an appropriate basis for predicting future events. There is no precise method for subsequently evaluating the impact of any specific factor on the adequacy of reserves, because the eventual deficiency or redundancy is affected by multiple factors.

The key assumptions used in our selection of ultimate reserves included the underlying actuarial methodologies, a review of current pricing and underwriting initiatives, an evaluation of reinsurance costs and retention levels, and a detailed claims analysis with an emphasis on how aggressive claims handling may be impacting the paid and incurred loss data trends embedded in the traditional actuarial methods. With respect to the ultimate estimates for losses and LAE, the key methods remained consistent for the year ended December 31, 2014, and the year ended December 31, 2013. We reviewed the key assumptions that underlie the actuarial standard methods and made the appropriate adjustments to reflect the emergence of claim activity.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

For the year ended December 31, 2014, we reported a decrease in net ultimate loss estimates for accident years 2013 and prior of \$1.7 million, or -0.2% of \$1.1 billion of beginning net loss and LAE reserves at January 1, 2014. At December 31, 2013 we recorded the loss and LAE reserves at 1,111.1 million. At December 31, 2014, re-estimated loss and LAE reserves for December 31, 2013 were \$1,109.3 million which was within our 2013 loss and LAE estimated reserve range. The change in net ultimate loss estimates reflected revisions in the estimated reserves as a result of actual claims activity in calendar year 2014 that differed from the projected activity. The major components of this change in ultimates are as follows (in thousands):

Line of Business	Incurred Losses				Paid Losses			Reserves at December 31, 2014
	Reserves at December 31, 2013	Current Year	Prior Years	Total Incurred	Current Year	Prior Years	Total Paid	
Workers' Compensation	\$ 477,413	\$ 205,843	\$ (31,518)	\$ 174,325	\$ 34,188	\$ 148,462	\$ 182,650	\$ 469,088
Residual Markets	22,577	10,288	(1,175)	9,113	2,082	4,708	6,790	24,900
Commercial Multiple Peril / General Liability	459,950	104,458	18,546	123,004	8,723	129,907	138,630	444,324
Commercial Automobile	118,375	53,275	8,207	61,482	17,251	58,689	75,940	103,917
Other	32,775	48,685	4,199	52,884	32,663	24,396	57,059	28,600
Net Reserves	1,111,090	\$ 422,549	\$ (1,741)	\$ 420,808	\$ 94,907	\$ 366,162	\$ 461,069	1,070,829
Reinsurance Recoverable	505,431							519,530
Consolidated	\$ 1,616,521							\$ 1,590,359

The following table shows the re-estimated December 31, 2013 held reserves by line as of December 31, 2014 (in thousands):

Line of Business	Reserves at December 31, 2013	Re-estimated Reserves for December 31, 2013 at December 31, 2014	Development as a percentage of prior year reserves
Workers' Compensation	\$ 477,413	\$ 445,895	-6.6 %
Commercial Multiple Peril / General Liability	459,950	478,496	4.0 %
Commercial Automobile	118,375	126,582	6.9 %
Other	32,775	36,974	12.8 %
Sub-total	1,088,513	1,087,947	-0.1 %

Edgar Filing: MEADOWBROOK INSURANCE GROUP INC - Form 10-K

Residual Markets	22,577	21,402	-5.2 %
Total Net Reserves	\$ 1,111,090	\$ 1,109,349	-0.2 %

Workers' Compensation Excluding Residual Markets

The net ultimate loss estimates for accident years 2013 and prior in the workers' compensation line of business decreased \$31.5 million, or 6.6%. This decrease, which was primarily related to the 2013 accident year, was led by the California-dominated business segments for which substantial rate and underwriting improvements have been enacted over the last few years.

Commercial Multiple Peril / General Liability

The net ultimate loss estimates for accident years 2013 and prior in the commercial multi-peril/general liability line of business increased \$18.5 million, or 4.0%. The increase was driven by a \$15.1 million increase

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

related to the 2009-2012 accident years combined. Accident year 2011 has the highest loss & ALAE ratio of that group peaking at 67%. Accident year 2013 is at a 57% loss & ALAE ratio and accident year 2014 is even lower. The improvement in the recent accident year loss ratios reflects the rate increase, underwriting actions, and termination of unprofitable business undertaken since 2012.

Commercial Automobile

The \$8.2 million increase, or 6.9%, in net ultimate loss estimates for the commercial automobile line of business was primarily driven by the 2009-2012 accident years which developed unfavorably by \$11.2 million. Of the 2009-2012 unfavorable development, 75% was on terminated business and almost 45% was on a single terminated transportation program.

Other

The \$4.2 million increase, or 12.8%, in net ultimate loss estimates in other lines of business is primarily from an increase in accident year 2012 related to a cancelled surety program.

Residual Markets

The workers' compensation residual market line of business had a decrease in net ultimate loss estimate of \$1.2 million, or 5.2% of net reserves. This decrease reflects a reduction in the net ultimate loss estimates for various accident years. We record loss reserves as reported by the NCCI, plus a provision for the reserves incurred but not yet analyzed and reported to us due to a two quarter lag in reporting. These changes reflect a difference between our estimate of the lag incurred but not reported and the amounts reported by the NCCI in the year.

The following combined ratios and development figures are before the impact of the Quota Share Reinsurance Treaty which was terminated as of October 1, 2013.

The following table shows the calendar year combined ratio by line and calendar year:

Calendar Year Combined Ratio	2014	2013	2012	2011*	2010*
Workers' Compensation	91.6 %	102.1 %	108.8 %	102.3 %	101.5 %
Residual Market	97.1 %	148.6 %	146.7 %	214.8 %	103.6 %
CMP/GL	115.3 %	111.9 %	108.1 %	90.9 %	83.7 %
Auto	116.4 %	121.6 %	126.5 %	110.3 %	97.7 %
Other	99.7 %	103.6 %	109.3 %	96.2 %	92.7 %
Total	101.8 %	107.9 %	111.4 %	99.7 %	95.0 %

Uses expense ratios originally reported in calendar year statement. These expense ratios have been restated in statement years 2012 and subsequent in accordance with accounting guidance retrospectively adopted on January 1, 2012. The impact on the expense ratio for any given year of the guidance was 0.2 points or less.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

For the table above, the calendar year combined ratios increased to over 100% in calendar year 2012 and 2013, primarily driven by adverse development on prior accident year Loss & Loss Adjustment Expense (LAE). The 2014 combined ratio, which includes \$1.7 million of favorable development, is also over 100%. This is due in part to the expense ratio which includes a policy issuance expense associated with use of an A-rated insurance carrier. This prior year development is shown allocated to the related accident years in the following table:

Prior Year Development - Loss & LAE (in thousands)

Accident Year	2014	2013	2012	2011	2010
2009 & Prior	8,420	19,543	29,980	3,267	(31,003)
2010	5,969	11,260	22,508	4,044	
2011	7,144	18,598	33,027		
2012	13,358	18,999			
2013	(37,472)				
Total excluding Swiss Re	(2,581)	68,400	85,515	7,311	(31,003)
Swiss Re Accident Year					
2013	840				
Total including Swiss Re	(1,741)	68,400	85,515	7,311	(31,003)

The following table reconciles the calendar year combined ratios to the accident year combined ratios as they were originally reported for the related 12 month period:

Reconciliation of Calendar Year Combined Ratios to Accident Year Combined Ratios

	2014	2013	2012	2011	2010
Calendar year Combined Ratio	101.8 %	107.9 %	111.4 %	99.7 %	95.0 %

**Prior Year Development — Loss & LAE
(% of Related NEP)****Accident Year**

2009 & Prior	1.2 %	2.3 %	3.5 %	0.5 %	-4.7 %
2010	0.9 %	1.3 %	2.6 %	0.5 %	
2011	1.1 %	2.2 %	3.9 %		
2012	2.0 %	2.3 %

Accident Year Combined Ratio

Originally Reported	102.2 %	99.8 %	101.4 %	98.7 %	99.7 %
----------------------------	---------	--------	---------	--------	--------

The accident year combined ratio provides management with an assessment of a specific accident period's profitability (which matches policy pricing with related losses) and assists management in their evaluation of product pricing levels and quality of business written in individual years. The current accident year's combined ratio plus the current calendar year development on prior accident year's reserves (as a percent of net earned premium) equals the current

calendar year's combined ratio. Prior accident year development is thus appropriately assigned and added to the accident years that triggered such liability. Therefore, each accident year's developed combined ratio includes all development adjustments that have been recorded in all calendar periods to-date. The net earned premium and expenses remain fixed in the calendar period in which they were recorded and thus the sole difference between the calendar and accident year combined ratio is the allocation of the Loss & LAE to appropriate accident year. The incurred Loss & LAE inception-to-date does not change in total, but only in such accident year allocation.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

Allocation of Loss & LAE to accident year is a more appropriate match of revenue (net earned premium) and expenses (Loss & LAE) than calendar year. Accident year combined ratios furthermore allow management to monitor changes over time in the profitability of the business written year-over-year and the impact of operational changes such as rate increases, underwriting actions, etc.

The following table shows the accident year combined ratio by line and year as originally reported:

	Accident Year Combined Ratio Originally Reported				
	2014	2013	2012	2011	2010
Workers' Compensation	101.9 %	98.1 %	100.8 %	99.3 %	99.2 %
Residual Market	112.9 %	141.9 %	173.3 %	354.5 %	331.8 %
CMP/GL	103.9 %	96.6 %	94.3 %	93.3 %	96.0 %
Auto	106.3 %	106.6 %	110.4 %	105.7 %	106.5 %
Other	96.4 %	102.2 %	106.1 %	96.9 %	96.2 %
Total	102.2 %	99.8 %	101.4 %	98.7 %	99.7 %

The following table shows prior year development allocated to the related accident years:

Development Year	Accident Year Prior Year Development - Loss & LAE (in thousands)			
	2013	2012	2011	2010
2011				4,044
2012			33,027	22,508
2013		18,999	18,598	11,260
2014	(37,472)	13,358	7,144	5,969
Total	(37,472)	32,357	58,769	43,781

The following table reconciles the originally reported accident year combined ratios to those with the ultimate evaluated at 12/31/14:

Accident Year Combined Ratio	Reconciliation of Accident Year Combined Ratios Originally Reported to Accident Year Combined Ratios - Ultimate Evaluated at 12/31/2014				
	2014	2013	2012	2011	2010
Originally Reported	102.2 %	99.8 %	101.4 %	98.7 %	99.7 %

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

The table below shows accident year combined ratios in which the prior accident year development has been reallocated to the appropriate accident year:

Accident Year Combined Ratio - Ultimate Evaluated at 12/31/2014

	2014	2013	2012	2011	2010
Workers' Compensation	101.9 %	91.0 %	101.4 %	103.8 %	111.1 %
Residual Market	112.9 %	82.9 %	151.1 %	313.8 %	244.5 %
CMP/GL	103.9 %	94.8 %	98.3 %	105.4 %	95.2 %
Auto	106.3 %	104.8 %	124.3 %	119.1 %	118.0 %
Other	96.4 %	102.7 %	109.0 %	101.6 %	97.4 %
Total	102.2 %	95.4 %	105.2 %	106.6 %	106.4 %

The developed (to ultimate) accident year combined ratio measurement allows management to observe profitability associated with business earned in each year and take appropriate actions. Management records its best estimate of reserves at each accounting date.

Other-Than-Temporary Impairments (OTTI)

Refer to Note 2 ~ *Investments* of the Notes to the Consolidated Financial Statements, for additional information specific to OTTI and their fair value and amount of unrealized losses segregated by the time period the investment has been in an unrealized loss position.

LIQUIDITY AND CAPITAL RESOURCES

Our principal sources of funds are insurance premiums, investment income, proceeds from the maturity and sale of invested assets from our Insurance Company Subsidiaries, and risk management fees and agency commissions from our non-regulated subsidiaries. Funds are primarily used for the payment of claims, commissions, salaries and employee benefits, other operating expenses, shareholder dividends, share repurchases, capital expenditures, and debt service.

A significant portion of our consolidated assets represents assets of our Insurance Company Subsidiaries that may not be transferable to the holding company in the form of dividends, loans or advances in accordance with state insurance laws. These laws generally specify that dividends can be paid only from unassigned surplus and only to the extent that all dividends in the current twelve months do not exceed the greater of 10% of total statutory surplus as of the end of the prior fiscal year or 100% of the statutory net income for the prior year, less any dividends paid in the prior twelve months. Using these criteria, the available ordinary dividend available to be paid from the Insurance Company Subsidiaries during 2014 was \$48.8 million without prior regulatory approval. Of this \$48.8 million, ordinary dividends of \$20.0 million were declared and paid as of December 31, 2014. In addition to ordinary dividends, the Insurance Company Subsidiaries had the capacity to pay \$149.9 million of extraordinary dividends in 2014, subject to prior regulatory approval. The ability to pay ordinary and extraordinary dividends must be reviewed in relation to the impact on key financial measurement ratios, including RBC ratios (all of which were above any regulatory action levels, refer to Note 8 ~ *Regulatory Matters and Rating Issues* for further details) and BCAR. The Insurance Company Subsidiaries' ability to pay future dividends without advance regulatory approval is dependent upon maintaining a positive level of unassigned surplus, which in turn, is dependent upon the Insurance Company Subsidiaries generating net income. Total ordinary dividends paid from our Insurance Company Subsidiaries to our holding company were

\$20.0 million and \$14.0 million for the years ended December 31, 2014 and 2013, respectively. As of December 31, 2014, we had non-regulated cash and cash equivalents of \$7.9 million. As of December 31, 2014, on a trailing twelve month statutory consolidated basis, the gross and net premium leverage ratios were 1.4 to 1.0 and 1.2 to 1.0, respectively.

We also generate operating cash flow from non-regulated subsidiaries in the form of commission revenue, outside management fees, and intercompany management fees. These sources of income are used to meet debt service, shareholders' dividends, and other operating expenses of the holding company and non-regulated subsidiaries. Earnings before interest, taxes, depreciation, and amortization from non-regulated subsidiaries were approximately \$11.2 million for the year ended December 31, 2014.

TABLE OF CONTENTS

**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

Based on our subsidiaries' membership in the Federal Home Loan Bank of Indianapolis (FHLBI), we have the ability to borrow on a collateralized basis at relatively low borrowing rates, providing a source of liquidity. As of December 31, 2014 and December 31, 2013, we had borrowed \$30.0 million from the FHLBI. The proceeds were used to fund purchases of high quality bonds with maturities that match the maturity of the FHLBI credit facility. We have the ability to increase our borrowing capacity through additional investments and pledging additional securities.

Cash flows used in operations were \$11.5 million for the year ended December 31, 2014. Cash provided by operations were \$2.0 million for the year ended December 31, 2013. The decrease in operating cash flows reflects a decrease in premium collected related to the termination of, or premium volume reductions in, certain programs where pricing and underwriting did not meet the Company's underwriting standards.

Other Items – Liquidity and Capital Resources

Credit Facilities

On August 29, 2012, the Company executed \$130.0 million in senior credit facilities (the Credit Facilities). The Credit Facilities included a \$30.0 million term loan facility and a \$100.0 million revolving credit facility.

On September 19, 2013, the Company amended the Credit Facilities pursuant to a Second Amendment to Credit Agreement and Waiver (the Amendment). Under the Amendment, the term loan facility continues to have a four year term and the same amortization period. As of December 31, 2014, the outstanding balance on the Company's term loan facility was \$16.5 million. The Amendment reduced available borrowing under the revolving credit facility from \$100.0 million to \$30.0 million with further periodic reductions to \$21.0 million as of March 31, 2016, less any optional reductions to the revolving commitments. The Amendment also established an amortization schedule for the revolving credit facility beginning on September 30, 2014. The Company has \$15.0 million outstanding under its revolving credit facility and \$0.1 million in letters of credit as of December 31, 2014. The undrawn portion of the revolving credit facility, which was \$8.4 million as of December 31, 2014, is available to finance working capital and for other general corporate purposes, including but not limited to, surplus contributions to its Insurance Company Subsidiaries to support premium growth or strategic acquisitions. On December 30, 2014, in connection with the proposed transaction with Fosun, the parties to the Credit Agreement entered into a letter agreement amending the definition of Change of Control therein by removing from such definition the entry by Meadowbrook into a contract that would result in an acquisition of Meadowbrook.

The principal amount outstanding under the Credit Facilities provides for interest at either the Alternative Base Rate (ABR) or the London interbank offered rate (LIBOR). ABR borrowings under the Credit Facilities will bear interest at the greatest of (a) the Administrative Agent's prime rate, (b) the federal funds effective rate plus 0.5%, or (c) the adjusted LIBOR for a one-month period plus 1.0%, in each case, plus a margin that is adjusted on the basis of Company's consolidated leverage ratio. Eurodollar borrowings under the Credit Facilities will bear interest at the adjusted LIBOR for the interest period in effect plus a margin that is adjusted on the basis of Company's consolidated leverage ratio. In addition, the Credit Facilities provide for an unused facility fee ranging between twenty-five basis points and thirty-seven and a half basis points, based on the Company's consolidated leverage ratio as defined by the Credit Facilities. At December 31, 2014, the interest rate on the Company's term loan was 2.81%, which consisted of a variable rate of 0.31%, plus an applicable margin of 2.50%. At December 31, 2014, the interest rate on the Company's revolving credit facility was approximately 0.27%, plus a 2.50% margin.

Additionally, under the Amendment, the financial covenants applicable to the Credit Facilities consist of: (1) minimum consolidated net worth of \$365,697,000 as of the effective date of the Amendment, with quarterly increases thereafter of the sum of (a) seventy-five percent of positive net income and (b) seventy-five percent of increases in shareholders' equity by reason of the issuance and sale of equity interests, if any, (2) minimum Risk Based Capital Ratio for all material Insurance Company Subsidiaries of 1.75 times Company Action Level,

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

(3) maximum permitted consolidated leverage ratio of 0.35 to 1.00 at any time on or after September 30, 2014, (4) minimum consolidated fixed charge coverage ratio of 1.25 to 1.00, and (5) minimum A.M. Best rating of B++ for all Insurance Company Subsidiaries. As of December 31, 2014, the Company was in compliance with these debt covenants.

Refer to Note 6 ~ *Debt* of the Notes to the Consolidated Financial Statements, for additional information specific to our credit facilities and debentures.

Cash Convertible Senior Notes

On March 18, 2013, the Company issued \$100.0 million of 5.0% cash convertible senior notes (the *Notes*), which mature on March 15, 2020. Interest on the Notes is payable semi-annually in arrears on March 15 and September 15 of each year, commencing September 15, 2013. Until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their Notes solely into cash at any time on or after September 15, 2019 or earlier under certain circumstances determined by: (i) the market price of the Company's stock, (ii) the trading price of the Notes, or (iii) the occurrence of specified corporate transactions, including change in control. The Notes are not convertible into Meadowbrook common stock or any other securities under any circumstances. The initial conversion rate is 108.8732 shares of common stock per \$1,000 principal amount of the Notes (equivalent to an initial conversion price of approximately \$9.18 per share), subject to adjustment upon the occurrence of certain events. Additionally, in the event of a fundamental change, the holders may require the Company to repurchase the Notes for a cash price equal to 100% of the principal, plus any accrued and unpaid interest. The proceeds from the issuance of the Notes were bifurcated into a debt component and an embedded conversion option component.

Due to the bifurcation, the debt component reflects an original issue discount (*OID*) of \$12.9 million which will be amortized into interest expense over the term of the Notes. After considering the contractual interest payments and amortization of the *OID*, the Notes' effective interest rate is 7.4%.

The following table shows the amounts recorded for the debt component of the Notes as of December 31, 2014 and December 31, 2013 (in thousands):

	December 31, 2014	December 31, 2013
Outstanding principal	\$ 100,000	\$ 100,000
Unamortized <i>OID</i>	(10,218)	(11,777)
Total debt component	\$ 89,782	\$ 88,223

Deferred issuance costs of \$3.7 million will also be amortized into interest expense over the term of the Notes. Interest expense on the Notes, including amortization of deferred issuance costs, recognized on the notes was \$7.0 million and \$5.4 million for the years ended December 31, 2014 and 2013, respectively.

As the conversion feature is structured under the cash settlement method, the embedded conversion option is reported as a derivative liability.

In connection with the offering of the Notes, the Company also entered into cash convertible senior notes hedge transactions (the *Note Hedges*) and warrant transactions (the *Warrants*) with respect to its common stock with certain

counter-parties. Upon conversion, the Note Hedges are intended to offset potential cash payments in excess of the principal amount of the Notes. The Note Hedges and Warrants are separate transactions, entered into by the Company with certain counter-parties and are not part of the terms of the Notes.

The Company paid \$12.9 million for the Note Hedges, which are exercisable upon conversion of the Notes. The Note Hedges are structured under the cash settlement method and are accounted for as a derivative asset.

The Company received \$3.0 million for the Warrants sold to certain counter-parties. The Warrants have a strike price of \$11.69 and will be net share settled, meaning the Company will issue a number of shares per Warrant corresponding to the difference between its share price on each Warrant exercise date and the exercise price. The Warrants meet the definition of derivatives under the guidance in Accounting Standards Codification

TABLE OF CONTENTS

**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

(ASC) 815; however, because these instruments have been determined to be indexed to the Company's own stock and meet the criteria for equity classification under ASC 815-40, the Warrants have been accounted for as an adjustment to the Company's paid-in-capital.

If the market value per share of the Company's common stock exceeds the strike price of the Warrants, the Warrants will have a dilutive effect on the Company's net income per share and the Company will use the treasury stock method in calculating the dilutive effect on earnings per share.

Interest Rate Swaps

We have entered into interest rate swap transactions to mitigate our interest rate risk on our existing debt obligations. These interest rate swap transactions have been designated as cash flow hedges and are deemed highly effective hedges. These interest rate swap transactions are recorded at fair value on the balance sheet and the effective portion of the changes in fair value are accounted for within other comprehensive income. The interest differential to be paid or received is accrued and recognized as an adjustment to interest expense.

Refer to Note 7 ~ *Derivative Instruments* of the Notes to the Consolidated Financial Statements, for additional information specific to our interest rate swaps.

Investment Portfolio

As of December 31, 2014 and December 31, 2013, the recorded values of our investment portfolio, including cash and cash equivalents, were \$1.7 billion for both years.

In general, we believe our overall investment portfolio is conservatively invested. The effective duration of the investment portfolio at December 31, 2014 and 2013, was 4.3 years and 5.0 years, respectively. Our pre-tax book yield, excluding cash and cash equivalents at December 31, 2014 was 2.9% compared to 3.0% in 2013. The tax equivalent yield, excluding cash and cash equivalents was 3.5% at December 31, 2014, compared to 3.7% at December 31, 2013. Approximately 99.9% of our fixed income investment portfolio is investment grade.

Shareholders' Equity

Refer to Note 12 ~ *Shareholders' Equity* of the Notes to the Consolidated Financial Statements.

(1) Relates to our revolving line of credit.

TABLE OF CONTENTS

**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT’S DISCUSSION AND ANALYSIS - continued**

Relates to the proceeds received from the Federal Home Loan Bank of Indianapolis facility for which the
(2) Company used the full proceeds to purchase bonds. The Company achieves a margin on the assets above the cost of the debt and therefore treats this as operating leverage.

Relates to the cash convertible senior notes, refer to *Note 6 ~ Debt*. The current carrying value on the Balance
(3) Sheet considering the original issue discount is \$89.8 million. This will accrete to par value of \$100 million due in 2020.

Five year call feature associated with debentures, estimated seven year repayment. For a description of our
(4) debentures and related interest rate terms, as well as actual rates in accordance with our interest rate swap transactions, refer to *Note 6 ~ Debt* and *Note 7 ~ Derivative Instruments*.

(5) Relates to the junior subordinated debentures acquired in conjunction with the ProCentury Merger.
(6) For a description of our term loan and its interest rate terms, as well as actual rates in accordance with our interest rate swap transaction, refer to *Note 6 ~ Debt* and *Note 7 ~ Derivative Instruments*.

(7) Consists of rental obligations under real estate leases related to branch offices. In addition, includes amounts related to equipment leases.

The loss and loss adjustment expense payments do not have contractual maturity dates and the exact timing of payments cannot be predicted with certainty. However, based upon historical payment patterns, we have included an estimate of our gross losses and loss adjustment expenses. In addition, we have anticipated cash receipts on
(8) reinsurance recoverables on unpaid losses and loss adjustment expenses of \$519.5 million, of which we estimate that these payments to be paid for losses and loss adjustment expenses for the periods less than one year, one to three years, three to five years, and more than five years, to be \$88.2 million, \$120.0 million, \$76.1 million, and \$235.2 million, respectively, resulting in net losses and loss adjustment expenses of \$330.1 million, \$373.6 million, \$153.8 million, and \$213.4 million, respectively.

In November 2012, Century committed to a \$10.0 million contribution to the Aquiline Financial Services Fund II L.P. as a strategic investment. As of December 31, 2014, approximately \$6.7 million of the commitment had been
(9) satisfied with \$3.3 million of unfunded commitment remaining. The remainder of the capital commitment will most likely be called in 2015; however, the exact date is not known as it is at the discretion of the fund managers based on the timing of the fund’s investments.

In May 2014, ProCentury committed to a \$2.0 million contribution to the Michigan Income & Principal-Protected Growth Fund, L.P. as a strategic investment. As of December 31, 2014, \$440,000 of the commitment had been
(10) satisfied with \$1.56 million of unfunded commitment remaining. The remainder of the capital commitment will most likely be called in 2015; however, the exact date is not known as it is at the discretion of the fund managers based on the timing of the fund’s investments.

Variable Compensation

Our variable compensation plans have been established as an incentive for performance of our management team and consist of an Annual Bonus Plan (Bonus Plan) and a Long-Term Incentive Plan (LTIP). The Bonus Plan is a discretionary cash bonus plan premised upon a targeted growth in net after-tax earnings on a year over year basis. Each year, the Compensation Committee and our Board of Directors establish new targets based upon prior year performance and the forecasted performance levels anticipated for the following year. The amount of the bonus pool is established by aggregating the individual targets for each participant, which is a percentage of salary. An employee’s actual bonus may be plus or minus his or her target based upon the Company and individual’s performance at the end of the year. The Compensation Committee and the Board of Directors review our performance in relation to performance targets and then establish the total bonus pool to be utilized to pay cash bonuses to the management team based upon overall corporate and individual participant goals.

The LTIP is intended to provide an incentive to management to improve our performance over a period of time and remain with the Company, thereby increasing shareholder value. The LTIP is paid entirely in stock based upon the performance of the Company and the participant's service during the applicable period. A participant's target annual opportunity as a percentage of salary is established by the Compensation Committee and the Board of Directors in advance of any LTIP award.

Our Compensation Committee also is authorized to issue restricted stock awards when the Company achieves various financial, operational and strategic goals and objectives.

All of our plans are administered by the Compensation Committee of the Board of Directors and all awards are reviewed and approved by the Board of Directors at both inception and at distribution.

Refer to Note 11 ~ *Variable Compensation* of the Notes to the Consolidated Financial Statements, for additional information relating to our variable compensation.

Regulatory and Rating Issues

Following the release of our 2013 fourth quarter results, on February 21, 2014, A.M. Best downgraded the issuer credit rating for our Insurance Company Subsidiaries to bbb from bbb+ while affirming their

TABLE OF CONTENTS

**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

financial strength rating of B++ (Good). A.M. Best also downgraded Meadowbrook's issuer credit rating to bb from bb+ and revised the outlook for the Insurance Company Subsidiaries to negative from stable .

On January 5, 2015, A.M. Best placed under review with positive implications the issuer credit rating of bb of Meadowbrook, and also placed the financial strength rating of B++ (Good) and the ICRs of bbb under review with positive implications for our Insurance Company Subsidiaries. Our results of operations could be materially and adversely impacted a negative rating change.

The National Association of Insurance Commissioners (NAIC) has a RBC formula to be applied to all property and casualty insurance companies. The formula measures required capital and surplus based on an insurance company's products and investment portfolio and is used as a tool to evaluate the capital of regulated companies. The RBC formula is used by state insurance regulators to monitor trends in statutory capital and surplus for the purpose of initiating regulatory action. In general, an insurance company must submit a calculation of its RBC formula to the insurance department of its state of domicile as of the end of the previous calendar year. These laws require increasing degrees of regulatory oversight and intervention as an insurance company's RBC declines. The level of regulatory oversight ranges from requiring the insurance company to inform and obtain approval from the domiciliary insurance commissioner of a comprehensive financial plan for increasing its RBC to mandatory regulatory intervention requiring an insurance company to be placed under regulatory control in a rehabilitation or liquidation proceeding.

At December 31, 2014, each of our Insurance Company Subsidiaries was in excess of any minimum threshold at which corrective action would be required. Refer to Note 8 ~ *Regulatory Matters and Rating Issues* for further details of RBC.

Insurance operations are subject to various leverage tests (e.g., premium to statutory surplus ratios), which are evaluated by regulators and rating agencies. As of December 31, 2014, on a trailing twelve month statutory consolidated basis, the gross and net premium leverage ratios were 1.4 to 1.0 and 1.2 to 1.0, respectively.

The NAIC's Insurance Regulatory Information System (IRIS) was developed by a committee of state insurance regulators and is primarily intended to assist state insurance departments in executing their statutory mandates to oversee the financial condition of insurance companies operating in their respective states. IRIS identifies thirteen industry ratios and specifies usual values for each ratio. State insurance regulators review the IRIS ratio results in coordination with a company's Statutory Annual Statement filings to determine if an insurer is in need of further regulatory scrutiny or action. While the ratios, individually and collectively, are effective tools for identifying companies that may be experiencing financial difficulty, they are only a guide for regulators and should not be considered an absolute indicator of a Company's financial condition.

A given ratio result may or may not reflect financial difficulty, depending on the underlying circumstances. Therefore, any unusual values generated by IRIS tests should be reviewed and analyzed in coordination with the overall financial condition of a company. Analysis of a company's Statutory Annual Statement and familiarity with its operations and history are important in reviewing each ratio result and its significance to the company's financial condition.

Departure from the usual values on four or more ratios, at an individual company, generally leads to inquiries or possible further review operations and financial condition from state insurance commissioners. In reviewing the financial information in the Statutory Annual Statements in coordination with the IRIS ratio results, a state regulator may determine that a company's departure from usual values is significant enough to indicate a strong concern with the financial condition of a company. When such a determination is made, state regulatory requirements may include

but not be limited to: specific restrictions on premium writings and surplus levels of a company, additional analysis of other key financial ratios of a company, or requiring an action plan be filed by the Company with specific actions outlined to bring the ratios back into the usual range.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

In 2014, our Insurance Company Subsidiaries generated ratios that varied from the usual value range. The variations and additional details for the reasons are set forth below:

Ratio	Usual Range	Value
Company: Star		
Investment Yield	Between 3.0% and 6.5%	2.8% (1)
Adjusted Liabilities to Liquid Assets	Equal to or Under 100%	111.0% (2)
Company: Century		
Two-Year Overall Operating Ratio	Equal to or Under 100%	102.0% (3)
Investment Yield	Between 3.0% and 6.5%	2.4% (1)
Company: Savers		
Two-Year Overall Operating Ratio	Equal to or Under 100%	102.0% (3)
Investment Yield	Between 3.0% and 6.5%	2.5% (1)
Two-Year Reserve Development to Policyholders' Surplus	Equal to or Under 20%	22.0% (4)
Company: ProCentury		
Two-Year Overall Operating Ratio	Equal to or Under 100%	103.0% (3)
Investment Yield	Between 3.0% and 6.5%	2.4% (1)
Two-Year Reserve Development to Policyholders' Surplus	Equal to or Under 20%	23.0% (4)
Company: Ameritrust		
Two-Year Overall Operating Ratio	Equal to or Under 100%	102.0% (3)
Investment Yield	Between 3.0% and 6.5%	2.7% (1)
Two-Year Reserve Development to Policyholders' Surplus	Equal to or Under 20%	20.0% (4)
Company: Williamsburg		
Two-Year Overall Operating Ratio	Equal to or Under 100%	103.0% (3)
Investment Yield	Between 3.0% and 6.5%	2.7% (1)
Two-Year Reserve Development to Policyholders' Surplus	Equal to or Under 20%	21.0% (4)

- (1) Investment Yield is a measure of the return on invested assets. It is calculated on a pre-tax basis and includes statutory net investment income, but excludes realized and unrealized capital gains/(losses). Because pre-tax investment income is used in the calculation, the ratio does not take into account lower yield rates on tax-exempt bonds. All six insurance subsidiaries generated unusual values for this ratio in 2014. In general, we believe our overall investment portfolio is conservatively invested. On a consolidated basis, our overall tax equivalent yield, excluding cash and cash equivalents was 3.5% at December 31, 2014, compared to 3.7% at December 31, 2013. As a comparison, the risk free rate on the 10 Year treasuries decreased during 2014 from 3.0% to 2.2% continuing

- to reflect historical lows. Approximately 99.9% of our fixed income investment portfolio is investment grade. The Adjusted Liabilities to Liquid Assets evaluates an entity's ability to meet obligations as they become due. While all liabilities are included in the ratio, only assets considered liquid by NAIC definition are included in the denominator of the ratio. For 2014, this ratio is outside the usual range on Star, primarily as a result of our Intercompany Reinsurance Pooling Agreement. The Adjusted Liabilities include the gross amount of reinsurance
- (2) payables related to the pool and does not allow an offset to those payables for any reinsurance recoverables related to the pool. In addition, the reinsurance recoverables are not included in the Liquid Assets portion of the formula. This causes the ratio results to appear much higher due to the timing of the settlement of the pool balances. Pool balances between the entities are settled subsequent to year-end. Once the balances are settled, the ratio is below 100% for Star and within the usual value.
- The Two-Year Overall Operating ratio measures the overall profitability of an entity over a two-year period. For
- (3) 2014, this ratio is above 100% for five of six Insurance Subsidiaries. This was driven by the adverse prior year development experienced in calendar year 2013.
- Two-Year Reserve Development to Policyholders' Surplus measures the deficiency/(redundancy) of reserves reported to date on loss/ALAE costs reported in the second prior year, in relation to policyholders' surplus as of
- (4) year-end. Four of the six Insurance Subsidiaries generated Two-Year Reserve Development to Policyholders' Surplus ratios greater than the usual value of 20%. The results of this ratio are driven by the adverse prior year development experienced in calendar year 2013.

Reinsurance Considerations

We seek to manage the risk exposure of our Insurance Company Subsidiaries and our clients through the purchase of excess-of-loss and quota share reinsurance. Our reinsurance requirements are analyzed on both a specific program and line of business basis to determine the appropriate retention levels and reinsurance coverage limits. We secure this reinsurance based on the availability, cost, and benefits of various reinsurance alternatives.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS - continued**

Reinsurance does not legally discharge an insurer from its primary liability for the full amount of risks assumed under insurance policies it issues, but it does make the assuming reinsurer liable to the insurer to the extent of the reinsurance ceded. Therefore, we are subject to credit risk with respect to the obligations of our reinsurers.

In regard to our excess-of-loss reinsurance, we manage our credit risk on reinsurance recoverables by reviewing the financial stability, A.M. Best rating, capitalization, and credit worthiness of prospective or existing reinsurers. We generally do not seek collateral where the reinsurer is rated A- or better by A.M. Best, has \$500 million or more in surplus, and is admitted in the state of Michigan. The following table sets forth information relating to our five largest unaffiliated excess-of-loss reinsurers based upon ceded premium as of December 31, 2014:

Reinsurer	Reinsurance Premium Ceded December 31, 2014 (In thousands)	Reinsurance Recoverable December 31, 2014 (In thousands)	A.M. Best Rating
Maiden Reins NA	\$ 17,670	\$ 35,536	A-
Hannover Rueck SE	16,001	66,260	A+
Swiss Reinsurance America Corporation	11,768	73,385	A+
Lloyd's Syndicate Number 2003	9,095	52,263	A
Lloyd's Syndicate Number 4472	5,598	30,114	A

In regard to our risk-sharing partners (client captive or rent-a-captive quota-share non-admitted reinsurers), we manage credit risk on reinsurance recoverables by reviewing the financial stability, capitalization, and credit worthiness of prospective or existing reinsurers or partners. We customarily collateralize reinsurance balances due from non-admitted reinsurers through funds withheld trusts or stand-by letters of credit issued by highly rated banks. To date, we have not, in the aggregate, experienced material difficulties in collecting reinsurance recoverables.

Effective December 31, 2012, we entered into a Multiple Line Quota Share Treaty with Swiss Reinsurance America Corporation (Swiss Re). This agreement was terminated on a run-off basis for business effective October 1, 2013 and after. Effective December 31, 2012, we ceded 50% of our unearned premium on a select portion of business. In return, we received a provisional ceding commission. The business included in the agreement was subject to specific limitations and ceded certain business based upon an in-force, new and renewal basis. We ceded 25% of direct written premium on this selected business commencing January 1, 2013, until the contract termination date of September 30, 2013, the remaining unearned premium and losses will continue to run-off. The ceded earned premium associated with this agreement was \$23.2 million, ceded loss and LAE was \$11.4 million and the ceding commission benefit was \$10.2 million for the year ended December 31, 2014.

Off-Balance Sheet Arrangements

As of December 31, 2014, we have no off-balance sheet arrangements as defined in Item 303(a) (4) of Regulation S-K.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****ITEM 7A. QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK**

Market risk is the risk of loss arising from adverse changes in market rates and prices, such as interest rates as well as other relevant market rate or price changes. The volatility and liquidity in the markets in which the underlying assets are traded directly influence market risk. The following is a discussion of our primary risk exposures and how those exposures are currently managed as of December 31, 2014. Our market risk sensitive instruments are primarily related to fixed income securities, which are available for sale and not held for trading purposes.

Interest rate risk is managed within the context of an asset and liability management strategy where the target duration for the fixed income portfolio is based on the estimate of the liability duration and takes into consideration our surplus. The investment policy guidelines provide for a fixed income portfolio duration of between three and a half and five and a half years. At December 31, 2014, our fixed income portfolio had an effective duration of 4.3 years compared to 5.0 years at December 31, 2013.

At December 31, 2014, the fair value of our investment portfolio, excluding cash and cash equivalents, was \$1.6 billion. Our market risk to the investment portfolio is primarily interest rate risk associated with debt securities. Our exposure to equity price risk is related to our investments in high dividend equities, these investments comprise of 7.0% of our investment portfolio.

Our investment philosophy is one of maximizing after-tax earnings and has historically included significant investments in tax-exempt bonds. For our investment portfolio, there were no significant changes in our primary market risk exposures or in how those exposures are managed compared to the year ended December 31, 2013. We do not anticipate significant changes in our primary market risk exposures or in how those exposures are managed in future reporting periods based upon what is known or expected to be in effect.

A sensitivity analysis is defined as the measurement of potential loss in future earnings, fair values, or cash flows of market sensitive instruments resulting from one or more selected hypothetical changes in interest rates and other market rates or prices over a selected period. In our sensitivity analysis model, a hypothetical change in market rates is selected that is expected to reflect reasonable possible near-term changes in those rates. Near term means a period of up to one year from the date of the consolidated financial statements. In our sensitivity model, we use a hypothetical change to measure our potential loss in fair value of debt securities assuming an upward and downward parallel shift in interest rates. The table below presents our model's estimate of changes in fair values given a change in interest rates. Dollar values are in thousands.

	Rates Down 100bps	Rates Unchanged	Rates Up 100bps
Fair Value	\$1,524,711	\$1,464,376	\$1,402,196
Yield to Maturity or Call	1.3%	2.1%	3.0%
Effective Duration	4.2	4.3	4.3

The other financial instruments, which include cash and cash equivalents, equity securities, premium receivables, reinsurance recoverables, line of credit and other assets and liabilities, when included in the sensitivity model, do not produce a material change in fair values.

Our debentures are subject to variable interest rates. Thus, our interest expense on these debentures is directly correlated to market interest rates. At December 31, 2014 and 2013, we had debentures of \$80.9 million. At this level,

a 100 basis point (1%) change in market rates would change annual interest expense by \$809,000.

Our term loan is subject to variable interest rates. Thus, our interest expense on our term loan is directly correlated to market interest rates. At December 31, 2014, we had an outstanding balance under our term loan of \$16.5 million. At this level, a 100 basis point (1%) change in market rates would change annual interest expense by \$165,000. At December 31, 2013, we had an outstanding balance under our term loan of \$22.5 million. At this level, a 100 basis point (1%) change in market rates would change annual interest expense by \$225,000.

We have entered into interest rate swap transactions to mitigate our interest rate risk on our existing debt obligations. These interest rate swap transactions have been designated as cash flow hedges and are deemed highly effective hedges. These interest rate swap transactions are recorded at fair value on the balance sheet and the effective portion of the changes in fair value are accounted for within other comprehensive income. The

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

interest differential to be paid or received is accrued and recognized as an adjustment to interest expense. Refer to Note 7 ~ *Derivative Instruments* for further detail relating to our interest rate swap transactions.

In addition, our revolving line of credit under which we can borrow up to \$23.5 million is subject to variable interest rates. Thus, our interest expense on the revolving line of credit is directly correlated to market interest rates. At December 31, 2014, we had \$15 million outstanding under our line of credit. At this level, a 100 basis point (1%) change in market rates would change annual interest expense by \$150,000. At December 31, 2013, we had \$20.0 million outstanding on this revolving line of credit. At this level, a 100 basis point (1%) change in market rates would have changed interest expense by \$200,000. In addition, at December 31, 2014 the letter of credit was \$145,000 and \$500,000 at December 31, 2013.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Refer to list of Financial Statement Schedules (including the Reports of Independent Registered Public Accounting Firm referenced therein) set forth in Item 15 of this Annual Report on Form 10-K and Note 18 ~ *Quarterly Financial Data (Unaudited)* of the Notes to the Consolidated Financial Statements.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, the Exchange Act), which we refer to as disclosure controls, are controls and procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Exchange Act, such as this annual report, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls are also designed with the objective of ensuring that such information is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. There are inherent limitations to the effectiveness of any control system. A control system, no matter how well conceived and operated, can provide only reasonable assurance that its objectives are met. No evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our Company have been detected.

As of December 31, 2014, an evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls and procedures. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures were effective to ensure that material information relating to us is made known to management, including our Chief Executive Officer and Chief Financial Officer, particularly during the period when our periodic reports are being prepared.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act). Our internal control system was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Because of its inherent limitations, internal controls over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may be inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal controls

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

over financial reporting as of December 31, 2014. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework (2013 framework) . Based on our assessment, we concluded that, as of December 31, 2014, our internal controls over financial reporting were effective based on those criteria.

The attestation report of Ernst & Young LLP, our independent registered public accounting firm, regarding internal control over financial reporting is set forth in Item 15 of this Annual Report on Form 10-K under the caption Report of Independent Registered Public Accounting Firm on Internal Control over financial Reporting and incorporated herein by reference.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting during the most recent quarter ended December 31, 2014, which have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

TABLE OF CONTENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of
Meadowbrook Insurance Group, Inc.

We have audited the accompanying consolidated balance sheets of Meadowbrook Insurance Group, Inc. as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2014. Our audits also included the financial statement schedules listed in the Index at Item 15(a). These financial statements and schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Meadowbrook Insurance Group, Inc. at December 31, 2014 and 2013, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedules, when considered in relation to the basic financial statements taken as a whole, present fairly in all material respects the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Meadowbrook Insurance Group, Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated March 2, 2015 expressed an unqualified opinion thereon.

TABLE OF CONTENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of
Meadowbrook Insurance Group, Inc.

We have audited Meadowbrook Insurance Group, Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). Meadowbrook Insurance Group, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Meadowbrook Insurance Group, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the COSO criteria.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Meadowbrook Insurance Group, Inc. as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2014 and our report dated March 2, 2015 expressed an unqualified opinion thereon.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation and Principles of Consolidation

The consolidated financial statements include accounts, after elimination of intercompany accounts and transactions, of Meadowbrook Insurance Group, Inc. (the Company or Meadowbrook), its wholly owned subsidiary Star Insurance Company (Star), and Star's wholly owned subsidiaries, Savers Property and Casualty Insurance Company (Savers), Williamsburg National Insurance Company (Williamsburg), and Ameritrust Insurance Corporation (Ameritrust). The consolidated financial statements also include Meadowbrook, Inc., Crest Financial Corporation, and their respective subsidiaries. In addition, the consolidated financial statements also include ProCentury Corporation (ProCentury) and its wholly owned subsidiaries. ProCentury's wholly owned subsidiaries consist of Century Surety Company (Century) and its wholly owned subsidiary ProCentury Insurance Company (PIC). In addition, ProCentury Risk Partners Insurance Company, Ltd. (PROPIC) is a wholly owned subsidiary of ProCentury. Star, Savers, Williamsburg, Ameritrust, Century, and PIC are collectively referred to as the Insurance Company Subsidiaries.

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States (GAAP), which differ from statutory accounting practices prescribed or permitted for insurance companies by regulatory authorities. Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (NAIC), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

Business

The Company, through its affiliated Insurance Company Subsidiaries, is a specialty niche focused commercial insurance underwriter and insurance administration services company. The Company markets and underwrites specialty property and casualty insurance programs and products on both an admitted and non-admitted basis through a broad and diverse network of independent retail agents, wholesalers, program administrators and general agents. Program business refers to an aggregation of individually underwritten risks that have some unique characteristic and are distributed through a select group of agents. The Company seeks to combine profitable underwriting, income from net commissions and fees, investment returns and efficient capital management to deliver consistent long-term growth in shareholder value.

Through its retail property and casualty agencies, the Company also generates commission revenue, which represents 2.5% of total consolidated revenues. The Company's agencies are located in Michigan, California, Massachusetts, and Florida and produce commercial, personal lines, life and accident and health insurance primarily with unaffiliated insurance carriers. These agencies produce a minimal amount of business for the Company's affiliated Insurance Company Subsidiaries.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. While management believes the amounts included in the consolidated financial statements reflect management's best estimates and assumptions, actual results may differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and highly liquid short-term investments. The Company considers all short-term investments purchased with an original maturity of three months or less to be cash equivalents.

Investments

The Company's investment securities are classified as available for sale. Investments classified as available for sale are available to be sold in the future in response to the Company's liquidity needs, changes in market interest rates, tax strategies and asset-liability management strategies, among other reasons. Available for sale

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued

securities that are not determined to be other-than-temporarily impaired (OTTI) are reported at fair value, with unrealized gains and losses reported in the accumulated other comprehensive income component of shareholders' equity, net of deferred taxes and, accordingly, have no effect on net income.

Realized gains or losses on sale of investments are determined on the basis of specific costs of the investments. Dividend income is recognized when declared and interest income is recognized when earned. Discount or premium on debt securities purchased at other than par value is amortized using the effective yield method.

Refer to Note 2 ~ *Investments* of the Notes to Consolidated Financial Statements for further detail in regard to the Company's investments.

Losses and Loss Adjustment Expenses and Reinsurance Recoverables

The liability for losses and loss adjustment expenses (LAE) represents case base estimates of reported unpaid losses and LAE and actuarial estimates of incurred but not reported (IBNR) losses and LAE. In addition, the liability for losses and loss adjustment expenses represents estimates received from ceding reinsurers on assumed business. Such liabilities, by necessity, are based upon estimates and, while management believes the amount of its reserves is adequate, the ultimate liability may be greater or less than the estimate.

Reserves related to the Company's direct business and assumed business it manages directly are established through transactions processed through the Company's internal systems and related controls. Accordingly, case reserves are established on a current basis, therefore, there is no delay or lag in reporting of losses from a ceding company, and IBNR is determined utilizing various actuarial methods based upon historical data. Ultimate reserve estimates related to assumed business from residual markets are provided by the mandatory pools on a two quarter lag and include an estimated reserve determined based upon internal actuarial methods for this lag. Lastly, in relation to assumed business from other sources, the Company receives case and paid loss data within a forty-five day reporting period and develops estimates for IBNR based on both current and historical data.

In addition to case reserves and in accordance with industry practice, the Company maintains estimates of reserves for losses and LAE IBNR. The Company projects an estimate of ultimate losses and LAE expenses at each reporting date. The difference between the projected ultimate loss and LAE reserves and the case loss and LAE reserves is carried as IBNR reserves. By using both estimates of reported claims and IBNR determined using generally accepted actuarial reserving techniques, the Company estimates the ultimate liability for losses and LAE, net of reinsurance recoverables.

Reinsurance recoverables represent (1) amounts currently due from reinsurers on paid losses and LAE, (2) amounts recoverable from reinsurers on case basis estimates of reported losses and LAE, and (3) amounts recoverable from reinsurers on actuarial estimates of incurred but not reported losses and LAE. Such recoverables, by necessity, are based upon estimates and, while management believes that the amount accrued is collectible, the ultimate recoverable may be greater or less than the amount accrued.

The methods for making such estimates and for establishing the loss reserves and reinsurance recoverables are continually reviewed and updated. We reviewed the key assumptions that underlie the actuarial methods and made the appropriate adjustments to reflect the emergence of claim activity.

Revenue Recognition

Premiums written, which include direct, assumed and ceded amounts are recognized as earned on a pro rata basis over the life of the policy term. Unearned premiums represent the portion of premiums written that are applicable to the unexpired terms of policies in force. Provisions for unearned premiums on reinsurance assumed from others are made on the basis of ceding reports when received and actuarial estimates.

Assumed premium estimates include business where the Company accepts a portion of the risk from a ceding carrier as well as the mandatory assumed pool business from the National Council on Compensation Insurance (NCCI), or residual market business.

Effective July 1, 2013 the Insurance Company Subsidiaries of the Company entered into an agreement with State National Insurance Company, National Specialty Insurance Company and United Specialty Insurance

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued

Company (collectively, SNIC), wherein certain portions of our business from our Insurance Company Subsidiaries were written direct with SNIC and 100% assumed collectively by our Insurance Company Subsidiaries based on agreed upon percentages. The SNIC business has a 5.5% fee, which is reflected as assumed commission on the applicable Insurance Company Subsidiaries' financial statements. Our Insurance Company Subsidiaries collectively have assumed \$268.5 million and \$170.2 million in gross written premium from SNIC for the years ended December 31, 2014 and 2013, respectively. The impact of the SNIC fee on the Company's expense ratio was 2.4% for the year ending December 31, 2014 and 0.5% for the year ended December 31, 2013.

Fee income, which includes risk management consulting, loss control, and claims services, is recognized during the period the services are provided. Depending on the terms of the contract, claims processing fees are recognized as revenue over the estimated life of the claims, or the estimated life of the contract. For those contracts that provide services beyond the expiration or termination of the contract, fees are deferred in an amount equal to management's estimate of the Company's obligation to continue to provide services in the future.

Commission income, which includes reinsurance placement, is recorded on the later of the effective date or the billing date of the policies on which they were earned. Commission income is reported net of any sub-producer commission expense. Commission adjustments that occur subsequent to the issuance of the policy, typically because of cancellation, are recognized when the policy is effectively cancelled. Profit sharing commissions from Insurance Company Subsidiaries are recognized when determinable, which is when such commissions are received.

The Company reviews, on an ongoing basis, the collectability of its receivables and establishes an allowance for estimated uncollectible accounts. As of December 31, 2014 and 2013, the allowance for uncollectibles on receivables was \$5.5 million and \$5.1 million, respectively.

The agent balances receivable from Midwest Financial Holdings, LLC (MFH) for the years ended December 31, 2014 and 2013 were \$32.7 million and \$37.7 million, respectively. No other receivable exceeds 10% of the aggregate amount of receivables.

Equity Earnings of Affiliates

Equity earnings represent investments in affiliates in which the Company does not exercise control and has a 20% or more voting interest. Such investments in affiliates are accounted for using the equity method of accounting. The Company has a 28.5% equity interest in one affiliate, MFH. The equity earnings of this interest were recorded in net income. Equity earnings, net of tax, from MFH in 2014, 2013, and 2012, were \$2.5 million, \$2.8 million, and \$3.0 million, respectively. The Company received dividends from MFH in 2014, 2013, and 2012, for \$3.2 million, \$2.0 million, and \$4.0 million, respectively. The Company is recording the equity earnings in MFH based on a month lag due to timing differences with respect to the availability of information.

The Company has a 1.3% equity interest in another affiliate, Aquiline Financial Services Fund II L.P. The equity earnings incurred with respect to this interest were recorded in net income. The equity earnings, net of tax, from Aquiline Financial Services Fund II L.P. in 2014 were \$1.1 million and \$0.6 million in 2013. The Company had no equity earnings related to the Aquiline Financial Services Fund II L.P. for 2012.

Deferred Policy Acquisition Costs

Commissions and other costs of acquiring insurance business that vary with and are primarily related to the production of new and renewal business are deferred and amortized over the terms of the policies or reinsurance treaties to which they relate. Investment earnings are anticipated in determining the recoverability of such deferred amounts. The Company reduces these costs for premium deficiencies. There were no premium deficiencies for the years ended December 31, 2014, 2013, and 2012.

Participating Policyholder Dividends

The Company's method for determining policyholder dividends is a combination of subjective and objective decisions, which may include, among other things, a loss ratio analysis for the specific program and the

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued

Company's overall business strategy and regulatory constraints related to the Insurance Company Subsidiaries. The Company determines the total dividends to be paid and then obtains the approval of the Board of Directors to pay up to a certain amount. At December 31, 2014 and 2013, the Company had \$1.2 million and \$1.3 million accrued for policyholder dividends, respectively.

Furniture and Equipment

Furniture and equipment are stated at cost, net of accumulated depreciation, and are primarily depreciated using the straight-line method over the estimated useful lives of the assets, generally three to ten years. Upon sale or retirement, the cost of the asset and related accumulated depreciation are eliminated from their respective accounts, and the resulting gain or loss is included in income. Repairs and maintenance are charged to operations when incurred.

Goodwill

The Company evaluates existing goodwill for impairment on an annual basis as of October 1, or more frequently, if events or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Goodwill impairment is performed at the reporting unit level.

Refer to Note 14 ~ *Goodwill and Other Intangible Assets* of the Notes to Consolidated Financial Statements for further detail in regard to the Company's Goodwill.

Income Taxes

The Company provides for federal income taxes based on amounts the Company believes it ultimately will owe. Inherent in the provision for federal income taxes are estimates regarding the deductibility of certain items and the realization of certain tax credits. In the event the ultimate deductibility of certain items or the realization of certain tax credits differs from estimates, the Company may be required to significantly change the provision for federal income taxes recorded in the consolidated financial statements. Any such change could significantly affect the amounts reported in the consolidated statements of income.

The Company and its subsidiaries file a consolidated federal income tax return in accordance with a tax sharing agreement, whereby allocation is made primarily on a separate return basis with current credit for any net operating losses or other items utilized in the consolidated tax return.

The Company utilizes the asset and liability method of accounting for income tax. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Under this method, the effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established when necessary to reduce the deferred tax assets to the amounts that are more likely than not to be realized.

Restricted Stock Awards, Long Term Incentive Plan, and Deferred Compensation Plan

Refer to Note 11 ~ *Variable Compensation* of the Notes to Consolidated Financial Statements for further details in regards to the Company's Restricted Stock Awards, Long Term Incentive Plan, and Deferred Compensation Plan.

Earnings Per Share

Basic earnings per share are based on the weighted average number of common shares outstanding during the year, while diluted earnings per share includes the weighted average number of common shares and potential dilution from shares issuable pursuant to stock awards using the treasury stock method.

Shares related to the LTIP included in diluted earnings per share were all zero for the years ended December 31, 2014, 2013, and 2012, respectively.

TABLE OF CONTENTS

**MEADOWBROOK INSURANCE GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

Restricted stock awards granted under the Plan on February 23, 2011, and 2010, were 28,500 and 202,500, respectively. Shares retired under both plans for tax withholding were 35,183 resulting in a net issuance of 195,817, which are included in the weighted average number of common shares for the year ended December 31, 2014.

Comprehensive Income

Comprehensive income encompasses all changes in shareholders' equity (except those arising from transactions with shareholders) and includes net income, net unrealized capital gains or losses on available for sale securities, net unrealized gains or losses in affiliates and unconsolidated subsidiaries, net increase or decrease on non-credit other-than-temporary impairments on available for sale securities, and net deferred derivative gains or losses on hedging activity.

Derivative Instruments

The Company has entered into interest rate swap transactions to mitigate its interest rate risk on its existing debt obligations. These interest rate swap transactions have been designated as cash flow hedges and are deemed highly effective hedges. These interest rate swap transactions are recorded at fair value on the balance sheet and the effective portion of the changes in fair value are accounted for within other comprehensive income. The interest differential to be paid or received is accrued and recognized as an adjustment to interest expense. The Company does not use interest rate swaps for trading or other speculative purposes.

Fair Value Disclosures

Due to the short-term nature of cash and cash equivalents, premiums and agent balances receivable, reinsurance recoverables, accrued interest, and other assets, the estimated fair value of such items approximates their carrying value. Since debt and equity securities are recorded in the financial statements at their estimated fair value as securities available for sale, their carrying value is their estimated fair value. The Company's long term debt, including its debentures, line of credit, accrued expenses and other liabilities, and reinsurance balances payable are either short term in nature or based on current market prices; therefore, their estimated fair value approximates their carrying value. In addition, the Company's derivative instruments, as disclosed in Note 7 ~ *Derivative Instruments*, are recorded in accordance with related accounting guidance and, therefore, are recorded at fair value.

Recent Accounting Pronouncements

Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income

In February 2013, the FASB issued guidance to improve the reporting of reclassifications out of accumulated other comprehensive income. The guidance requires an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under GAAP to be reclassified in its entirety to net income. For other amounts that are not required under GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under GAAP that provide additional detail about those amounts. The guidance is to be applied prospectively for reporting periods beginning after December 15, 2012. The Company adopted this new guidance on January 1, 2013 and included the required disclosures in Note 19 ~ *Accumulated Other Comprehensive Income*.

Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Loss, or a Tax Credit Carryforward Exists

In July 2013, the FASB issued a new standard that requires entities to present an unrecognized tax benefit as a reduction of a deferred tax asset for a net operating loss carryforward, or similar tax loss or tax credit carryforward, rather than as a liability when the uncertain tax position would reduce the net operating loss or other carryforward under the tax law of the applicable jurisdiction and when the entity intends to use the

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

deferred tax asset for that purpose. The new standard is effective for fiscal years and interim periods within those years that begin after December 15, 2013. The Company adopted this new guidance on January 1, 2014. The adoption of the new standard did not have a material impact on the Company's consolidated financial statements.

Revenue Recognition

In May 2014, the Financial Accounting Standards Board (FASB) issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), (ASU 2014-09), which is intended to improve and converge the financial reporting requirements for revenue contracts with customers. Previous GAAP comprised broad revenue recognition concepts along with numerous industry-specific requirements. The new guidance establishes a five-step model which entities must follow to recognize revenue and removes inconsistencies and weaknesses in existing guidance. ASU 2014-09 is effective for annual and interim periods beginning after December 15, 2016, and must be retrospectively applied. Entities will have the option of presenting prior periods as impacted by the new guidance or presenting the cumulative effect of initial application along with supplementary disclosures. Early adoption is prohibited. The Company is currently evaluating the impact of adopting ASU 2014-09 on its financial condition and results of operations, but currently does not anticipate it having a material impact.

2. INVESTMENTS

The cost or amortized cost, gross unrealized gains, losses, non-credit other than temporary impairments (OTTI) and estimated fair value of investments in securities classified as available for sale at December 31, 2014 and December 31, 2013 were as follows (in thousands):

Less investment expenses	1,667	1,615	1,378
Net investment income	\$ 45,142	\$ 46,473	\$ 53,143

United States Government obligations, municipal and corporate bonds aggregating \$959.7 million and \$756.5 million were on deposit at December 31, 2014 and 2013, respectively, with state regulatory authorities or otherwise pledged as required by law or contract.

Other-Than-Temporary Impairments of Securities and Unrealized Losses on Investments

Available for sale securities are reviewed for declines in fair value that are determined to be other-than-temporary. For a debt security, if the Company intends to sell a security and it is more likely than not the Company will be required to sell a debt security before recovery of its amortized cost basis and the fair value of the debt security is below amortized cost, the Company concludes that an OTTI has occurred and the amortized cost is written down to current fair value, with a corresponding charge to realized loss in the Consolidated Statements of Income. If the Company does not intend to sell a debt security and it is not more likely than not the Company will be required to sell a debt security before recovery of its amortized cost basis but the present value of the cash flows expected to be collected is less than the amortized cost of the debt security (referred to as the credit loss), the Company concludes that an OTTI has occurred. In this instance, accounting guidance requires the bifurcation of the total OTTI into the amount related to the credit loss, which is recognized in earnings and the non-credit OTTI, which is recorded in Other Comprehensive Income as an unrealized non-credit OTTI in the Consolidated Statements of Comprehensive Income.

When assessing the Company's intent to sell a debt security, if it is more likely than not the Company will be required to sell a debt security before recovery of its cost basis, facts and circumstances such as, but not limited to, decisions to reposition the security portfolio, sale of securities to meet cash flow needs and sales of securities to capitalize on favorable pricing, are evaluated. In order to determine the amount of the credit loss for a debt security, the Company calculates the recovery value by performing a discounted cash flow analysis based on the current cash flows and future cash flows expected to be recovered. The discount rate is the effective interest rate implicit in the underlying debt security upon issuance. The effective interest rate is the original yield or the coupon if the debt security was previously impaired. If an OTTI exists and there is not sufficient cash flows or other information to determine a recovery value of the security, the Company concludes that the entire OTTI is credit-related and the amortized cost for the security is written down to current fair value with a corresponding charge to realized loss in the Consolidated Statements of Income.

To determine the recovery period of a debt security, the Company considers the facts and circumstances surrounding the underlying issuer including, but not limited to the following:

- Historical and implied volatility of the security;
- Length of time and extent to which the fair value has been less than amortized cost;
- Conditions specifically related to the security such as default rates, loss severities, loan to value ratios, current levels of subordination, third party guarantees, and vintage;
- Specific conditions in an industry or geographic area;
- Any changes to the rating of the security by a rating agency;

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

- Failure, if any, of the issuer of the security to make scheduled payments; and
- Recoveries or additional declines in fair value subsequent to the balance sheet date.

In periods subsequent to the recognition of an OTTI, the security is accounted for as if it had been purchased on the measurement date of the OTTI. Therefore, for a fixed maturity security, the discount or reduced premium is reflected in net investment income over the contractual term of the investment in a manner that produces a constant effective yield.

For an equity security, if the Company does not have the ability and intent to hold the security for a sufficient period of time to allow for a recovery in value, the Company concludes that an OTTI has occurred, and the cost of the equity security is written down to the current fair value, with a corresponding charge to realized loss within the Consolidated Statements of Income. When assessing the Company's ability and intent to hold the equity security to recovery, the Company considers, among other things, the severity and duration of the decline in fair value of the equity security, as well as the cause of decline, a fundamental analysis of the liquidity, business prospects and overall financial condition of the issuer.

Upon review of the Company's investment portfolio in the context of our OTTI policy, the Company recorded \$116,000 of OTTI losses on equity securities for the year ended December 31, 2014. The Company did not record a credit or a non-credit related OTTI loss on debt securities for the years ended December 31, 2014, 2013 and 2012.

The Company recorded an impairment which pertained to two lots of equities in our portfolio. The basis for the impairment was related to the length of time the lots had been in a loss position and not due to other factors such as severity of loss or credit worthiness of the issuances.

The fair value and amount of unrealized losses segregated by the time period the investment has been in an unrealized loss position were as follows (in thousands):

3. FAIR VALUE MEASUREMENTS

According to accounting guidance for fair value measurements and disclosures, fair value is the price that would be received in the sale of an asset or would be paid in the transfer of a liability (i.e., the exit price) in an orderly transaction between market participants at the measurement date. The guidance establishes a three-level hierarchy for fair value measurements that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs) and the reporting entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs).

The estimated fair values of the Company's fixed investment portfolio are based on prices provided by a third party pricing service and a third party investment manager. The prices provided by these services are based

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued

on quoted market prices, when available, non-binding broker quotes, or matrix pricing. The third party pricing service and the third party investment manager provide a single price or quote per security and the Company has not historically adjusted security prices. The Company obtains an understanding of the methods, models and inputs used by the third party pricing service and the third party investment manager, and has controls in place to validate that amounts provided represent fair values. The Company's control process includes, but is not limited to, initial and ongoing evaluation of the methodologies used, a review of specific securities and an assessment for proper classification within the fair value hierarchy. The hierarchy level assigned to each security in the Company's available for sale portfolio is based upon its assessment of the transparency and reliability of the inputs used in the valuation as of the measurement date. The three hierarchy levels are defined as follows:

Level 1 – Valuations that are based on unadjusted quoted prices in active markets for identical securities. The fair value of exchange-traded preferred and common equities, and mutual funds included in the Level 1 category were based on quoted prices that are readily and regularly available in an active market. The fair value measurements that were based on Level 1 inputs comprise 7.0% of the fair value of the total investment portfolio.

Level 2 – Valuations that are based on observable inputs (other than Level 1 prices) such as quoted prices for similar assets at the measurement date; quoted prices in markets that are not active; or other inputs that are observable, either directly or indirectly. The fair value of securities included in the Level 2 category were based on the market values obtained from a third party pricing service that were evaluated using pricing models that vary by asset class and incorporate available trade, bid and other observable market information. The third party pricing service monitors market indicators, as well as industry and economic events. The Level 2 category includes corporate bonds, government and agency bonds, asset-backed, residential mortgage-backed and commercial mortgage-backed securities and municipal bonds. The fair value measurements that were based on Level 2 inputs comprise 92.8% of the fair value of the total investment portfolio.

Level 3 – Valuations that are derived from techniques in which one or more of the significant inputs are unobservable and/or involve management judgment and/or are based on non-binding broker quotes. The fair value measurements that were based on Level 3 inputs comprise 0.2% of the fair value of the total investment portfolio.

For corporate, government and municipal bonds, the third party pricing service utilizes a pricing model with standard inputs that include benchmark yields, reported trades, issuer spreads, two-sided markets, benchmark securities, market bids/offers, and other reference data observable in the marketplace. The model uses the option adjusted spread methodology and is a multi-dimensional relational model. All bonds valued under these techniques are classified as Level 2.

For asset-backed, residential mortgage-backed and commercial mortgage-backed securities, the third party pricing service valuation methodology includes consideration of interest rate movements, new issue data, monthly remittance reports and other pertinent data that is observable in the marketplace. This information is used to determine the cash flows for each tranche and identifies the inputs to be used such as benchmark yields, prepayment assumptions and collateral performance. All asset-backed, residential mortgage-backed and commercial mortgage-backed securities valued under these methods are classified as Level 2.

Also included in Level 2 valuation are interest rate swap agreements the Company utilizes to hedge the floating interest rate on its debt, thereby changing the variable rate exposure to a fixed rate exposure for interest on these obligations. The estimated fair value of the interest rate swaps is obtained from the third party financial institution counterparties and measured using discounted cash flow analysis that incorporates significant observable inputs,

including the LIBOR forward curve, derivative counterparty spreads, and measurements of volatility.

The Level 3 securities consist of 15 securities totaling \$3.3 million or 0.2% of the total investment portfolio. These primarily represent asset-backed securities and corporate debt securities that have a principal protection feature supported by a U.S. Treasury strip. To fair value all 15 of these securities, the third party investment manager used benchmarking techniques based upon industry sector, rating and other factors.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

Also included in Level 3 valuation, are the conversion feature within the Notes (as defined in Note 6) and the convertible senior notes hedge. The estimated fair values of the both the conversion feature and the convertible senior notes hedge are obtained from the third party financial institution counterparties valued using non-binding broker quotations and significant unobservable inputs.

The following table presents the Company's assets and liabilities measured at fair value on a recurring basis, classified by the valuation hierarchy as of December 31, 2014 (in thousands):

	December 31, 2014 Total	Fair Value Measurements Using

There were no credit related losses for the period included in earnings attributable to the change in unrealized losses on Level 3 assets still held at the reporting date.

The Company's policy on recognizing transfers between hierarchy levels is applied at the end of a reporting period. During the year ended December 31, 2014, there were no transfers between Levels 1, 2 and 3.

4. LIABILITY FOR LOSSES AND LOSS ADJUSTMENT EXPENSES

The Company regularly updates its reserve estimates as new information becomes available and further events occur that may impact the resolution of unsettled claims. Changes in prior reserve estimates are reflected in results of operations in the year such changes are determined to be needed and recorded. Activity in the reserves for ultimate losses and loss adjustment expenses is summarized as follows (in thousands):

	For the Years Ended December 31,		
	2014	2013	2012
Balance, beginning of year	\$ 1,616,521	\$ 1,455,980	\$ 1,194,977
Less reinsurance recoverables	505,431	381,905	315,884

Incurred related to:			
Current year	422,549	480,637	592,169
Prior years	(1,741)	68,400	85,515
Total Incurred	420,808	549,037	677,684
Paid related to:			
Current year	94,907	115,542	151,262
Prior years	366,162	396,480	331,440

Total Paid	461,069	512,022	482,702
Net balance, end of year	1,070,829	1,111,090	1,074,075
Plus reinsurance recoverables	519,530	505,431	381,905
Balance, end of year	\$ 1,590,359	\$ 1,616,521	\$ 1,455,980

As a result of development on prior accident years' reserves, the estimate for net ultimate losses and loss adjustment expenses (LAE) decreased by \$1.7 million in calendar year 2014, increased by \$68.4 million in calendar year 2013, and increased by \$85.5 million in calendar year 2012.

For the year ended December 31, 2014, the Company reported a decrease in net ultimate loss and LAE estimates of \$1.7 million, or -0.2% of \$1,111.1 million of beginning net loss and LAE reserves. There were no significant changes in the key methods utilized in the analysis and calculations of the Company's reserves during

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued

2014. The \$1.7 million net ultimate decrease reflects a decrease of \$31.5 million and \$1.2 million related to workers' compensation programs and the residual markets, respectively. These decreases were partially offset by increases of \$18.5 million, \$8.2 million, and \$4.2 million related to commercial multiple peril, commercial automobile programs, and other lines of business, respectively.

For the year ended December 31, 2013, the Company reported an increase in net ultimate loss and LAE estimates of \$68.4 million, or 6.4% of \$1,074.1 million of beginning net loss and LAE reserves. There were no significant changes in the key methods utilized in the analysis and calculations of the Company's reserves during 2013. The \$68.4 million net ultimate increase reflects increases of \$35.6 million, \$15.8 million, \$14.6 million, \$1.8 million, and \$0.6 million related to commercial multiple peril, commercial automobile programs, workers' compensation programs, other lines of business and the residual markets, respectively.

For the year ended December 31, 2012, the Company reported an increase in net ultimate loss and LAE estimates of \$85.5 million, or 9.7% of \$879.1 million of beginning net loss and LAE reserves. There were no significant changes in the key methods utilized in the analysis and calculations of the Company's reserves during 2012. We reviewed the key assumptions that underlie the actuarial methods and made the appropriate adjustments to reflect the emergence of claim activity. The \$85.5 million net ultimate increase reflects increases of \$34.4 million, \$28.5 million, \$19.9 million, and \$3.8 million related to commercial multiple peril, workers' compensation programs, commercial automobile programs and other lines of business, respectively. The 2012 increase also reflects a decrease of \$1.1 million related to the residual markets.

5. REINSURANCE

The Company's Insurance Company Subsidiaries cede insurance to reinsurers under facultative, pro-rata and excess-of-loss contracts. These reinsurance arrangements diversify the Company's business and minimize its exposure to large losses or hazards of an unusual nature. The ceding of insurance does not discharge the original insurer from its primary liability to its policyholder. In the event that all or any of the reinsuring companies are unable to meet their obligations, the Company would be liable for such defaulted amounts. Therefore, the Company is subject to credit risk with respect to the obligations of its reinsurers. In order to minimize its exposure to significant losses from reinsurer insolvencies, the Company evaluates the financial condition of its reinsurers and monitors the economic characteristics of the reinsurers on an ongoing basis. The Company also assumes insurance from other domestic insurers and reinsurers. The Company performs a risk transfer analysis on those agreements which are not reasonably self-evident to evaluate whether the reinsurance agreements entered into by the Company transfer both significant timing and underwriting risk to the reinsurer. All current reinsurance contracts conform to the risk transfer requirements and, accordingly, are accounted for as reinsurance under the applicable accounting guidance.

The Company receives ceding commissions in conjunction with certain reinsurance activities. These ceding commissions are offset against the related underwriting expenses and were \$ 22.1 million, \$56.8 million, and \$57.2 million in 2014, 2013, and 2012, respectively.

At December 31, 2014 and 2013, the Company had reinsurance recoverable for paid and unpaid losses of \$535.4 million and \$519.9 million, respectively.

The Company manages its credit risk on reinsurance recoverable by reviewing the financial stability, A.M. Best rating, capitalization, and credit worthiness of prospective and existing risk-sharing partners. The Company customarily collateralizes reinsurance balances due from non-admitted reinsurers through funds withheld trusts or

stand-by letters of credit issued by highly rated banks. The Company generally does not seek collateral where the reinsurer is rated A- or better by A.M. Best, has \$500 million or more in surplus, and is admitted in the state of Michigan. As of December 31, 2014, the largest unsecured reinsurance recoverable is due from an admitted reinsurer with an A+ (Superior) A.M. Best rating and accounts for 13.7% of the total recoverable for paid and unpaid losses. To date, the Company has not, in the aggregate, experienced material difficulties in collecting reinsurance recoverable.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued

The Company has historically maintained an allowance for the potential exposure to certain uncollectible reinsurance balances. At the end of each quarter, an analysis of these exposures is conducted to determine the potential exposure to default. While management believes the allowances to be adequate, no assurance can be given regarding the future ability of any of the Company's risk-sharing partners to meet their financial obligations.

The allowance was \$12.0 million and \$14.0 million at December 31, 2014 and 2013, respectively.

The Company maintains a reinsurance structure designed to protect against large or unusual loss and loss adjustment expense activity. The Company determines the appropriate amount of reinsurance based primarily on the Company's evaluation of the risks accepted, but also considers analysis prepared by consultants and reinsurers, along with market conditions including the availability and pricing of reinsurance. To date, there have been no material disputes with the Company's reinsurers. However, no assurance can be given regarding the future ability of any of the Company's reinsurers to meet their obligations.

The Company's current reinsurance structure for business generated by it and its affiliated insurance entities includes the following primary categories:

Aviation

- The Company retains up to the first \$1.0 million of loss for each aviation hull and up to \$1.0 million for each aviation liability risk; however, the retention for any one occurrence is limited to \$1.0 million. For policies effective November 1, 2013 through October 31, 2014, Reinsurers reimburse the Company up to \$12.5 million for each loss occurrence in excess of the \$1.0 million retention. Reinsurers reimburse the
- Company up to \$29M for each loss occurrence in excess of the \$1.0M retention for policies in force and effective November 1, 2014 through October 31, 2015.

Casualty – Commercial Lines – Excess and Primary

- The Company retains up to the first \$1.0 million of loss for each risk.
- Reinsurers reimburse the Company up to \$6.0 million per risk, or up to \$15.0 million per risk, for business classified as excess liability for Public Entities, in excess of the \$1.0 million retention.
- Reinsurers reimburse the Company up to an additional \$5.0 million for a loss event where two or more policies or coverage parts are involved.
- Reinsurers reimburse the Company up to an additional \$10.0 million for awards made in excess of the Company's policy limits or resulting from extra contractual obligations, after the Company retains the first \$500,000.
- Individual facultative reinsurance is purchased for excess and primary Casualty limits in excess of \$7.0 million.

Excess Workers' Compensation

- The Company retains 10% of the difference between \$2.0 million and the insured's self-insured retention, up to \$175,000 of loss per claim, per occurrence based on a minimum SIR of \$250,000 for policies effective prior to July 1, 2014. For policies effective July 1, 2014 and after, the Company cedes 100% of the layer. Reinsurers reimburse the Company 100% of the difference between \$2.0 million and the insured's
- self-insured retention, up to \$1.75 million per claim, per occurrence after an annual aggregate deductible is met. The minimum annual aggregate deductible is \$8,250,000.
-

Reinsurers reimburse the Company 100% of \$13.0 million per claim, per occurrence in excess of the \$2 million underlying structure.

Marine

- The Company retains up to \$1.0 million of loss for each hull and each marine liability risk.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued

- Reinsurers reimburse the Company up to \$4.0 million for each hull and each marine liability risk in excess of the \$1.0 million retention.
- Reinsurers reimburse the Company up to an additional \$2.0 million for a loss event involving both marine hull and liability or a loss event involving more than one risk.

Medical Malpractice Common Loss

- The Company retains up to \$2.0 million per occurrence for the \$50.0 million of losses under medical malpractice policies relating to a common event or systemic cause of loss.
- Reinsurers reimburse the Company up to \$8.0 million for each occurrence in excess of the \$2.0 million retention.

Multiple Line Quota Share

The Company entered into a 50% quota share agreement for a select portion of business subject to certain limitations, effective December 31, 2012 on an in force, new and renewal basis. Business subject to the treaty effective January 1, 2013 through September 30, 2013 ceded at 25%. In return, the Company received a provisional ceding commission, which has been deferred and is recognized in relation to earned premium. This treaty was terminated by mutual consent October 1, 2013 on a run-off basis.

-

Property

- The Company retains up to \$1.0 million of loss for each property risk.
- Reinsurers reimburse the Company up to \$9.0 million for each property risk in excess of the \$1.0 million retention after an annual aggregate deductible of \$1.0 million is met.
- Individual or semi-automatic facultative reinsurance is purchased for any property risk with limits in excess of \$10.0 million.
- The Company retains the first \$5.0 million of net property catastrophe loss plus 50% of the next \$5.0 million of net property catastrophe loss (up to \$7.5 million) per loss occurrence.
- Reinsurers reimburse the Company up to \$57.5 million of net property catastrophe loss, per occurrence in excess of the \$7.5 million retention, subject to an aggregate limit of \$115.0 million for all property catastrophe losses occurring during the treaty period.

Surety

The Company retained up to \$2.5 million for each bond and Reinsurers reimbursed the Company up to \$7.5 million for each bond under a variable quota share agreement effective through November 1, 2013. The Company terminated the variable quota share agreement November 1, 2013 in line with reducing its maximum exposure to \$1.0M or less for any single bond.

-

Workers' Compensation

- The Company retains up to \$1.0 million of loss per occurrence. In addition, the Company has a \$1.5M annual aggregate deductible for certain business written in California through a specific production source.
- Reinsurers reimburse the Company up to \$14.0 million of loss for each claimant and \$99.0 million for all claimants involved in any one loss occurrence, subject to an aggregate limit of \$198.0 million for the annual period. For terrorism the Company can recover an additional \$40.0 million in loss in excess of the \$100.0 million underlying reinsurance structure.
- The Company assumes a 65% line under a third party quota share agreement where the maximum exposure to any one loss occurrence is limited to \$1.0 million after an annual aggregate deductible of \$500,000 is met. The quota share contract is protected by inuring excess of loss reinsurance up to

\$20.0 million per claim or per occurrence.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued****Fronting – Multiple Lines**

Effective July 1, 2013, the Company entered into a reinsurance fronting agreement with SNIC, wherein certain portions of our business from our six insurance carriers was written with SNIC and 100% assumed collectively by our six carriers based on agreed upon percentages. The SNIC fronted business has a 5.5% fee, which is reflected as assumed commission in the Company's financial statements.

Reconciliations of direct to net premiums, on a written and earned basis, for 2014, 2013, and 2012 are as follows (in thousands):

	2014		2013		2012	
	Written	Earned	Written	Earned	Written	Earned

Ceded	(141,227)	(177,210)	(252,374)	(331,645)	(269,131)	(159,706)
Net	\$ 601,237	\$ 643,271	\$ 691,637	\$ 697,417	\$ 797,502	\$ 854,259

6. DEBT**Credit Facilities**

On August 29, 2012, the Company executed \$130.0 million in senior credit facilities (the Credit Facilities). The Credit Facilities included a \$30.0 million term loan facility and a \$100.0 million revolving credit facility.

On September 19, 2013, the Company amended the Credit Facilities pursuant to a Second Amendment to Credit Agreement and Waiver (the Amendment). Under the Amendment, the term loan facility continues to have a four year term and the same amortization period. As of December 31, 2014, the outstanding balance on the Company's term loan facility was \$16.5 million. The Amendment reduced available borrowing under the revolving credit facility from \$100.0 million to \$30.0 million with further periodic reductions to \$21.0 million as of March 31, 2016, less any optional reductions to the revolving commitments. The Amendment also established an amortization schedule for the revolving credit facility beginning on September 30, 2014. The Company has \$15.0 million outstanding under its revolving credit facility and \$0.1 million in letters of credit as of December 31, 2014. The undrawn portion of the revolving credit facility, which was \$8.4 million as of December 31, 2014, is available to finance working capital and for other general corporate purposes, including but not limited to, surplus contributions to its Insurance Company Subsidiaries to support premium growth or strategic acquisitions. On December 30, 2014, in connection with the proposed transaction with Fosun, the parties to the Credit Agreement entered into a letter agreement amending the definition of Change of Control therein by removing from such definition the entry by Meadowbrook into a contract that would result in an acquisition of Meadowbrook.

The principal amount outstanding under the Credit Facilities provides for interest at either the Alternative Base Rate (ABR) or the London interbank offered rate (LIBOR). ABR borrowings under the Credit Facilities will bear interest at the greatest of (a) the Administrative Agent's prime rate, (b) the federal funds effective rate plus 0.5%, or (c) the adjusted LIBOR for a one-month period plus 1.0%, in each case, plus a margin that is adjusted on the basis of Company's consolidated leverage ratio. Eurodollar borrowings under the Credit Facilities will bear interest at the adjusted LIBOR for the interest period in effect plus a margin that is adjusted on the basis of Company's consolidated leverage ratio. In addition, the Credit Facilities provide for an unused facility fee ranging between twenty-five basis

points and thirty-seven and a half basis points, based on the Company's consolidated leverage ratio as defined by the Credit Facilities. At December 31, 2014, the interest rate on the Company's term loan was 2.81%, which consisted of a variable rate of 0.31%, plus an applicable margin of 2.50%. At December 31, 2014, the interest rate on the Company's revolving credit facility was approximately 0.27%, plus a 2.50% margin.

Additionally, under the Amendment, the financial covenants applicable to the Credit Facilities consist of: (1) minimum consolidated net worth of \$365,697,000 as of the effective date of the Amendment, with quarterly

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

increases thereafter of the sum of (a) seventy-five percent of positive net income and (b) seventy-five percent of increases in shareholders' equity by reason of the issuance and sale of equity interests, if any, (2) minimum Risk Based Capital Ratio for all material Insurance Company Subsidiaries of 1.75 times Company Action Level, (3) maximum permitted consolidated leverage ratio of 0.35 to 1.00 at any time on or after September 30, 2014, (4) minimum consolidated fixed charge coverage ratio of 1.25 to 1.00, and (5) minimum A.M. Best rating of B++ for all Insurance Company Subsidiaries. As of December 31, 2014, the Company was in compliance with these debt covenants.

FHLBI

During 2011, certain of the Insurance Company Subsidiaries (Star, Williamsburg and Ameritrust) became members of the Federal Home Loan Bank of Indianapolis (FHLBI). As a member of the FHLBI, these subsidiaries have the ability to borrow on a collateralized basis at relatively low borrowing rates providing a source of liquidity. As of December 31, 2014, the Company had borrowed \$30.0 million from the FHLBI after pledging as collateral residential mortgage-backed securities (RMBS) having a carrying value of \$35.5 million, and making a FHLBI common stock investment of approximately \$1.6 million. Proceeds of the borrowing were used to purchase investment securities with durations to match the maturity of the debt in 2017, realizing a margin over the cost of debt of approximately 100 bps. The Company has the ability to increase its borrowing capacity through purchasing additional investments in FHLBI and pledging additional securities. The Company retains all the rights regarding the collateralized RMBS.

Debentures

The following table summarizes the principal amounts and variables associated with the Company's debentures (in thousands):

Year of Issuance	Description	Year Callable	Year Due	Interest Rate Terms	Interest Rate at December 31, 2014 (1)	Principal Amount
2003	Junior subordinated debentures	2008	2033	Three-month LIBOR, plus 4.05%	4.28%	\$ 10,310
2004	Senior debentures	2009	2034	Three-month LIBOR, plus 4.00%	4.23%	13,000
2004	Senior debentures	2009	2034	Three-month LIBOR, plus 4.20%	4.43%	12,000
2005	Junior subordinated debentures	2010	2035	Three-month LIBOR, plus 3.58%	3.81%	20,620
	Junior subordinated debentures (2)	2007	2032	Three-month LIBOR, plus 4.00%	4.23%	15,000
	Junior subordinated debentures (2)	2008	2033	Three-month LIBOR, plus 4.10%	4.33%	10,000
					Total	\$ 80,930

(1)

The underlying three-month LIBOR rate varies as a result of the interest rate reset dates used in determining the three-month LIBOR rate, which varies for each long-term debt item each quarter.

- (2) Represents the junior subordinated debentures acquired in conjunction with our merger with ProCentury (the ProCentury Merger) on July 31, 2008.

Excluding the junior subordinated debentures acquired in conjunction with the ProCentury Merger, the Company received a total of \$53.3 million in net proceeds from the issuances of the above long-term debt, of which \$26.2 million was contributed to the surplus of its Insurance Company Subsidiaries and the remaining balance was used for general corporate purposes.

The junior subordinated debentures issued in 2003 and 2005 were issued in conjunction with the issuance of \$10.0 million and \$20.0 million in mandatory redeemable trust preferred securities to a trust formed by an institutional investor from the Company's unconsolidated subsidiary trusts, Meadowbrook Capital Trust I and Meadowbrook Capital Trust II, respectively.

The junior subordinated debentures acquired in the ProCentury Merger were issued in conjunction with the issuance of \$15.0 million and \$10.0 million in floating rate trust preferred securities to a trust formed from the Company's unconsolidated trust, ProFinance Statutory Trust I and ProFinance Statutory Trust II.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

The junior subordinated debentures are unsecured obligations of the Company and are junior to the right of payment to all senior indebtedness of the Company. The Company has guaranteed that the payments made to the four trusts mentioned above will be distributed to the holders of the respective trust preferred securities.

The Company estimates that the fair value of the above mentioned junior subordinated debentures and senior debentures issued approximate the gross proceeds of cash received at the time of issuance.

Cash Convertible Senior Notes

On March 18, 2013, the Company issued \$100.0 million of 5.0% cash convertible senior notes (the Notes), which mature on March 15, 2020. Interest on the Notes is payable semi-annually in arrears on March 15 and September 15 of each year, commencing September 15, 2013. Until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their Notes solely into cash at any time on or after September 15, 2019 or earlier under certain circumstances determined by: (i) the market price of the Company's stock, (ii) the trading price of the Notes, or (iii) the occurrence of specified corporate transactions, including certain changes in control. The Notes are not convertible into Meadowbrook common stock or any other securities under any circumstances. The initial conversion rate is 108.8732 shares of common stock per \$1,000 principal amount of the Notes (equivalent to an initial conversion price of approximately \$9.18 per share), subject to adjustment upon the occurrence of certain events. Additionally, in the event of a fundamental change, the holders may require the Company to repurchase the Notes for a cash price equal to 100% of the principal, plus any accrued and unpaid interest. The proceeds from the issuance of the Notes were bifurcated into a debt component and an embedded conversion option component.

Due to the bifurcation, the debt component reflects an original issue discount (OID) of \$12.9 million which will be amortized into interest expense over the term of the Notes. After considering the contractual interest payments and amortization of the OID, the Notes' effective interest rate is 7.4%.

The following table shows the amounts recorded for the debt component of the Notes as of December 31, 2014 and December 31, 2013 (in thousands):

	December 31, 2014	December 31, 2013
Outstanding principal	\$ 100,000	\$ 100,000
Unamortized OID	(10,218)	(11,777)
Total debt component	\$ 89,782	\$ 88,223

Deferred issuance costs of \$3.7 million will also be amortized into interest expense over the term of the Notes. Interest expense on the Notes, including amortization of deferred issuance costs, recognized on the notes was \$7.0 million and \$5.4 million for the years ended December 31, 2014 and 2013, respectively.

As the conversion feature is structured under the cash settlement method, the embedded conversion option is reported as a derivative liability.

In connection with the offering of the Notes, the Company also entered into cash convertible senior notes hedge transactions (the Note Hedges) and Warrant transactions (the Warrants) with respect to its common stock with certain counter-parties. Upon conversion, the Note Hedges are intended to offset potential cash payments in excess of the

principal amount of the Notes. The Note Hedges and Warrants are separate transactions, entered into by the Company with certain counter-parties and are not part of the terms of the Notes.

The Company paid \$12.9 million for the Note Hedges, which are exercisable upon conversion of the Notes. The Note Hedges are structured under the cash settlement method and are accounted for as a derivative asset.

The Company received \$3.0 million for the Warrants sold to certain counter-parties. The Warrants have a strike price of \$11.69 and will be net share settled, meaning the Company will issue a number of shares per Warrant corresponding to the difference between its share price on each Warrant exercise date and the exercise

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

price. The Warrants meet the definition of derivatives under the guidance in Accounting Standards Codification (ASC) 815; however, because these instruments have been determined to be indexed to the Company's own stock and meet the criteria for equity classification under ASC 815-40, the Warrants have been accounted for as an adjustment to the Company's paid-in-capital.

If the market value per share of the Company's common stock exceeds the strike price of the Warrants, the Warrants will have a dilutive effect on the Company's net income per share and the Company will use the treasury stock method in calculating the dilutive effect on earnings per share.

See Note 7 ~ *Derivative Instruments* for additional discussion on the Cash Convertible Senior Notes.

7. DERIVATIVE INSTRUMENTS*Interest Rate Swaps*

The Company has entered into interest rate swap transactions to mitigate its interest rate risk on its existing debt obligations. These interest rate swap transactions have been designated as cash flow hedges and are deemed highly effective hedges. These interest rate swap transactions are recorded at fair value on the balance sheet, with gross unrealized gains reported as other assets and gross unrealized losses reported as other liabilities. The effective portion of the changes in fair value is accounted for within other comprehensive income. The interest differential to be paid or received is accrued and recognized as an adjustment to interest expense.

The following table summarizes the rates and amounts associated with the Company's interest rate swaps (in thousands):

Effective Date	Expiration Date	Debt Instrument	Counterparty Interest Rate Terms	Fixed Rate	Fixed Amount at December 31, 2014
6/30/2013	6/30/2023	Junior subordinated debentures	Three-month LIBOR, plus 4.05%	6.340%	\$ 10,000
4/29/2013	4/29/2023	Senior debentures	Three-month LIBOR, plus 4.00%	6.250%	13,000
9/28/2012	8/30/2016	Term loan (1)	Three-month LIBOR	0.714%	16,500
8/15/2013	8/15/2023	Junior subordinated debentures (2)	Three-month LIBOR	2.180%	10,000
9/4/2013	9/4/2023	Junior subordinated debentures (2)	Three-month LIBOR	2.270%	15,000
9/8/2010	5/24/2016	Senior debentures	Three-month LIBOR, plus 4.20%	6.248%	5,000
9/16/2010	9/15/2015	Junior subordinated debentures	Three-month LIBOR, plus 3.58%	6.160%	10,000
9/16/2010	9/15/2015	Junior subordinated debentures	Three-month LIBOR, plus 3.58%	6.190%	10,000

5/24/2011	5/24/2016	Senior debentures	Three-month LIBOR, plus 4.20%	6.472%	7,000
				Total	\$ 96,500

(1) The Company is required to make fixed rate interest payments on the current balance of the term loan, amortizing in accordance with the term loan amortization schedule. The Company fixed only the variable interest portion of the loan. The actual interest payments associated with the term loan also include an additional rate of 2.50% in accordance with the Credit Facilities.

(2) The Company fixed only the variable interest portion of the debt. The actual interest payments associated with the debentures also include an additional rate of 4.10% and 4.00% on the \$10.0 million and \$15.0 million debentures, respectively.

In relation to the above interest rate swaps, the net interest expense incurred for the year ended December 31, 2014, 2013, and 2012 was approximately \$1.8 million, \$2.3 million, and \$3.1 million, respectively.

As of December 31, 2014, the total fair value of the interest rate swaps reflects a gross unrealized loss position of (\$1.2 million). As of December 31, 2013, the total fair value of the interest rate swaps was \$1.6 million, which reflects a gross unrealized gain position of \$2.9 million and a gross unrealized loss position of (\$1.3 million). At December 31, 2014 and 2013, accumulated other comprehensive income included accumulated gain (loss) on the cash flow hedge, net of taxes, of approximately (\$0.8) million and \$1.0 million, respectively. The Company does not net the unrealized gains and losses in the financial statements.

TABLE OF CONTENTS

**MEADOWBROOK INSURANCE GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

Convertible Note with Unaffiliated Insurance Agency

The Company has a \$2.0 million convertible note with an unaffiliated insurance agency. The interest rate on the convertible note is 3% and is due on January 1, 2022. This note is convertible at the option of the Company based upon a pre-determined formula. As security for the note, the borrower granted the Company a first lien on all of its accounts receivable, cash, general intangibles, and other assets. As additional collateral for the note, the Company obtained guaranties of payment and performance from certain affiliated companies of the borrower, as well as related individuals, which guaranties are secured by additional collateral.

Cash Convertible Senior Notes and Note Hedges

As discussed in Note 6 ~ *Debt*, the Company issued the Notes. Holders may convert their Notes subject to certain conversion provisions, including certain changes in control. In order to offset the risk associated with the cash conversion feature, the Company entered into the Note Hedges. Both the cash conversion feature and the purchased convertible Note Hedges are measured at fair value with gains and losses recorded in the Company's Consolidated Statements of Income.

At December 31, 2014, the cash conversion feature of the Notes had a fair market value of (\$16.6 million) and the Note Hedges had a fair market value of \$16.6 million.

8. REGULATORY MATTERS AND RATING ISSUES

As an insurance holding company, the Company's ability to continue to pay shareholder dividends is dependent upon the availability of liquid assets, which is dependent in large part on the dividend paying ability of the Company's Insurance Company Subsidiaries. The timing and amount of dividends paid by the Insurance Company Subsidiaries to the Company may vary from year to year. Our Insurance Company Subsidiaries are subject to laws and regulations in the jurisdictions where they operate that restrict the amount and timing of dividends they may pay within twelve consecutive months without the prior approval of regulatory authorities. The restrictions are generally based on net income and on certain levels of policyholders' surplus as determined in accordance with statutory accounting practices. Dividends in excess of such thresholds are considered extraordinary and require prior regulatory approval.

A significant portion of the Company's consolidated assets represents assets of its Insurance Company Subsidiaries that may not be transferable to the holding company in the form of dividends, loans or advances. The restriction on the transferability to the holding company from its Insurance Company Subsidiaries is limited by regulatory guidelines. These guidelines specify that dividends can be paid only from unassigned surplus and only to the extent that all dividends in the current twelve months do not exceed the greater of 10% of total statutory surplus as of the end of the prior fiscal year or 100% of the statutory net income for the prior year, less any dividends paid in the prior twelve months. Using these criteria, the ordinary dividend available to be paid from the Insurance Company Subsidiaries during 2014 was \$48.8 million without prior regulatory approval. Of this \$48.8 million, ordinary dividends of \$20.0 million were declared and paid as of December 31, 2014. In addition to ordinary dividends, the Insurance Company Subsidiaries had the capacity to pay \$149.9 million of extraordinary dividends in 2014, subject to prior regulatory approval. The ability to pay ordinary and extraordinary dividends must be reviewed in relation to the impact on key financial measurement ratios, including Risk Based Capital (RBC) ratios and A.M. Best's Capital Adequacy Ratio (BCAR). The Company heavily considers these ratios when evaluating liquidity and capital strategies. The Insurance Company Subsidiaries' ability to pay future dividends without advance regulatory approval is dependent upon maintaining a positive level of unassigned surplus, which in turn, is dependent upon the Insurance Company

Subsidiaries generating net income. Total ordinary dividends paid from the Company's Insurance Company Subsidiaries to its holding company were \$20.0 million and \$14.0 million in 2014 and 2013, respectively.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

Summarized 2014 and 2013 statutory basis information for the primary insurance subsidiaries, which differs from generally accepted accounting principles, is as follows (in thousands):

	Star	Savers	Williamsburg	Ameritrust	Century	PIC
2014:

RBC authorized control level	\$ 80,246	\$ 13,565	\$ 7,097	\$ 6,122	\$ 40,714	\$ 9,924
Statutory net income	\$ 3,935	\$ (3,561)	\$ (2,018)	\$ (1,398)	\$ (3,776)	\$ (2,715)
RBC %	385.8 %	427.1 %	441.7 %	480.3 %	438.7 %	464.0 %

Insurance operations are subject to various leverage tests (e.g., premium to statutory surplus ratios), which are evaluated by regulators and rating agencies. As of December 31, 2014, on a trailing twelve month statutory consolidated basis, the gross and net premium leverage ratios were 1.4 to 1.0 and 1.2 to 1.0, respectively.

NAIC has adopted an RBC formula to be applied to all property and casualty insurance companies. The formula measures required capital and surplus based on an insurance company's products and investment portfolio and is used as a tool to evaluate the capital of regulated companies. The RBC formula is used by state insurance regulators to monitor trends in statutory capital and surplus for the purpose of initiating regulatory action. In general, an insurance company must submit a calculation of its RBC formula to the insurance department of its state of domicile as of the end of the previous calendar year. These laws require increasing degrees of regulatory oversight and intervention as an insurance company's RBC declines. The level of regulatory oversight ranges from requiring the insurance company to inform and obtain approval from the domiciliary insurance commissioner of a comprehensive financial plan for increasing its RBC to mandatory regulatory intervention requiring an insurance company to be placed under regulatory control in a rehabilitation or liquidation proceeding.

The RBC Model Act provides for four different levels of regulatory attention depending on the ratio of the company's total adjusted capital, defined as the total of its statutory capital, and surplus to its risk-based capital requirement. Risk-based capital requirements are determined by applying varying factors to asset, premium and reserve items. The factor is higher for those items that have a greater inherent risk, and lower for those items of lesser risk.

At December 31, 2014, each of our Insurance Company Subsidiaries was in excess of any minimum threshold at which corrective action would be required. At December 31, 2014 and 2013, the Company's consolidated statutory surplus was \$511.0 million and \$488.2 million, respectively. For the years ended December 31, 2014, 2013, and 2012, the Company's consolidated statutory net (loss)/income was \$42.5 million, (\$20.7 million), and \$33.5 million,

respectively.

The Company's Insurance Company Subsidiaries have deposits with various states to comply with the insurance laws where the Insurance Company Subsidiaries are licensed. At December 31, 2014 and 2013, the book value of these deposits totaled \$959.7 million and \$756.5 million, respectively. There are withdrawal and other restrictions on these deposits, but we direct how the deposits are invested and we earn interest on the funds, and therefore these funds are not restricted cash. Since these deposits are invested at management's direction and the Company earns the related interest, management does not anticipate that it is reasonably likely that the deposits will affect the Company's financial position or results of operations.

98

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

The Company's current financial strength rating from A.M. Best (insurance industry credit rating) is B++ (Good) for its Insurance Company Subsidiaries. The issuer credit rating is bbb for the Insurance Company Subsidiaries and bb for Meadowbrook. A.M. Best ratings are designed to assess an insurer's financial strength and ability to meet continuing obligations to policyholders.

9. DEFERRED POLICY ACQUISITION COSTS

The following table reflects the amounts of policy acquisition costs deferred and amortized (in thousands):

	For the Years Ended December 31,		
	2014	2013	2012
Balance, beginning of period	\$ 62,773	\$ 45,417	\$ 74,467
Acquisition costs deferred	136,536	144,359	159,416
Amortized to expense during the period	(146,182)	(151,255)	(156,480)
Change in Swiss Re QS Agreement	7,735	24,252	(31,986)
Balance, end of period	\$ 60,862	\$ 62,773	\$ 45,417

The Company reduces deferred policy acquisition costs for premium deficiencies. There were no premium deficiencies at December 31, 2014, 2013, and 2012.

10. INCOME TAXES

The provision for income taxes consists of the following (in thousands):

	For the Years Ended December 31,		
	2014	2013	2012
Current tax (benefit) expense	\$ 458	\$ (17,533)	\$ 1,048
Deferred tax (benefit) expense	3,648	(13,427)	(8,890)
Total provision for income tax (benefit) expense	\$ 4,106	\$ (30,960)	\$ (7,842)

A reconciliation of the Company's tax provision on income from operations to the U.S. federal income tax rate of 35% is as follows (in thousands):

	For the Years Ended December 31,		
	2014	2013	2012
Tax provision at statutory rate	\$ 10,197	\$ (51,011)	\$ 439
Tax effect of:			
Goodwill impairment write off	—	26,532	—
Tax exempt interest, net of proration	(5,883)	(6,057)	(5,684)
Deferred tax asset valuation allowance	—	(548)	(4,085)
Dividends received deduction, net of proration	(677)	(539)	(130)
Non-deductible expenses	632	383	293

Edgar Filing: MEADOWBROOK INSURANCE GROUP INC - Form 10-K

Deferred and other tax asset adjustments	(228)	199	1,233
State income taxes, net of federal benefit	55	113	153
Other, net	10	(32)	(61)
Federal and state income tax (benefit) expense	\$ 4,106	\$ (30,960)	\$ (7,842)
Effective tax (benefit) expense rate	14.1 %	21.2 %	(625.9)%

At December 31, 2014 and 2013, the current taxes receivable were \$12.7 million and \$20.5 million, respectively.

Deferred federal income taxes reflect the estimated future tax effect of temporary differences between the bases of assets and liabilities for financial reporting purposes and such amounts as measured by tax laws and regulations.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

The components of deferred tax assets and liabilities as of December 31, 2014 and 2013 are as follows (in thousands):

	2014	2013
Deferred Tax Assets:		
Unpaid losses and loss adjustment expenses	\$ 30,200	\$ 34,424
Unearned premium reserves	18,344	20,966
Net operating loss carry-forward	8,759	9,325
AMT credit carry-forward	5,253	2,312
Goodwill	4,263	4,953
Allowance for doubtful accounts	1,934	1,783
Compensation related	1,902	1,520
Other than temporary impairment losses on investments and purchase accounting adjustments	1,322	2,015
Amortization of debt and transaction costs	1,100	1,191
Other, net	500	839
Total Deferred Tax Assets	73,577	79,328
Deferred Tax Liabilities:		
Deferred policy acquisition costs	(21,302)	(21,970)
Unrealized gains on investments, net	(18,293)	(8,310)
Amortization of intangible assets	(2,992)	(3,872)
Depreciation	(2,195)	(2,750)
Total Deferred Tax Liabilities	(44,782)	(36,902)
Net deferred tax assets before valuation allowance	28,795	42,426
Valuation allowance	(755)	(991)
Net deferred tax assets	\$ 28,040	\$ 41,435

Realization of the deferred tax asset shown above is dependent upon generating sufficient taxable income to absorb the applicable reversing temporary differences. A valuation allowance is established if, based upon certain facts and circumstances, management believes some or all of certain tax assets will not be realized. At December 31, 2014 and 2013, the Company had a valuation allowance of \$0.8 million and \$1.0 million, respectively, related to unrealized losses on securities and other than temporary impairments that, upon realization, could not be offset by past or future capital gains. During 2014, the valuation allowance decreased by \$236,000 which was recorded as an increase to other comprehensive income. During 2013, the valuation allowance decreased by \$413,000 of which \$548,000 was recorded through the statement of operations. The offsetting \$135,000 was recorded as a reduction to other comprehensive income. Management periodically evaluates the adequacy of the valuation allowances, taking into account open tax positions, tax assessments received and tax law changes. This evaluation involves the use of estimates and a high degree of management judgment. Actual results could differ significantly from the estimates and interpretations used in determining the current and deferred income tax liabilities and reserves.

At December 31, 2014, the Company had a Net Operating Loss (NOL) Carry-forward of \$25.0 million which will expire in 2033. This carry-forward is available to be used as a reduction of future taxable income on the federal income tax returns filed by the Company in subsequent years. The Company's NOL Carry-forward at December 31,

2013 was \$26.6 million.

The Company had an Alternative Minimum Tax (AMT) credit carry-forward of \$5.3 million at December 31, 2014 and \$2.3 million at December 31, 2013. The AMT credit carry-forwards have no expiration date.

100

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued

At December 31, 2014 and 2013, the Company did not have any unrecognized tax benefits. Interest costs and penalties related to income taxes are classified as interest expense and general corporate expenses, respectively. As of December 31, 2014 and December 31, 2013, the Company had no accrued interest or penalties related to uncertain tax positions.

The Company and its subsidiaries are subject to United States federal income tax as well as to income tax of multiple state jurisdictions. During 2014, the Internal Revenue Service (IRS) completed an exam of the 2011 federal income tax return and federal income tax returns for all years after 2011 are subject to future examination by the IRS. Tax returns for multiple state jurisdictions for all years after 2009 are subject to future examination by tax authorities.

11. VARIABLE COMPENSATION

Restricted and Non-Restricted Stock Awards

On February 23, 2011 and 2010, the Company issued 28,500 and 202,500 restricted stock awards, respectively, to named executive officers and other members of management of the Company, out of its 2002 Amended and Restated Stock Option Plan (the Plan). No restricted stock awards were issued in 2012, 2013 or 2014. The restricted stock awards vest over a four year period, with the first twenty percent vesting immediately on the date issued (i.e., February 23) and the remaining eighty percent vesting annually on a straight-line basis over the requisite four year service period. The unvested restricted stock awards are subject to forfeiture in the event the employee is terminated for Good Cause or voluntarily resigns their employment without Good Reason as provided for in the employee's respective employment agreements. The Company recorded approximately \$93,000 and \$330,000 of restricted stock awards compensation expense for the year ended December 31, 2014 and 2013, respectively. The total compensation cost related to the non-vested portion of the awards that have not been recognized as of December 31, 2014 and 2013 were approximately \$8,000 and \$103,000, respectively. The 2002 Amended and Restated Stock Option Plan expired in 2012 so any future award will be issued out of the Company's 2009 Equity Compensation Plan, which was previously approved by shareholders.

On February 13, 2014 and February 13, 2013, the Company issued 2,400 non-restricted stock awards to each outside member of the Board of Directors, which vested immediately. On May 16, 2014 and August 12, 2014, the Company issued a 2,400 non-restricted stock award and a 2,000 non-restricted stock award to two newly elected members of the Board of Directors. The Company recorded \$148,000 and \$137,000 of non-restricted stock awards compensation expense for the year ended December 31, 2014 and 2013, respectively.

Long Term Incentive Plan

The Company maintains a Long Term Incentive Plan (the LTIP). On February 7, 2014, February 8, 2013 and July 27, 2012, the Company adopted its 2014, 2013 and 2012 LTIP (the Plan(s)), respectively. The Plans allow for the use of restricted stock incentive awards to eligible executives, managers and other eligible key employees based on the achievement of service and pre-established performance goals for annual performance periods. The Compensation Committee of the Board of Directors administers the Plans, subject to the direction of the Board of Directors, and will designate the eligible employees who will participate in the Plans for a specified service/performance period. Restricted stock awards under the Plans are made pursuant to the Company's 2009 Equity Compensation Plan. Participants are not eligible for any award under the Plans, until the end of the service and performance periods, which are December 31 for each respective Plan.

Under the Plans, in the event that a participant's employment is terminated by the Company or any of its subsidiaries for cause , or by the participant without good reason (as such terms are defined in the Plans), the participant forfeits all shares of unvested restricted stock, and will not be entitled to any award for the period in which such termination of employment occurs.

In the event that a participant's employment is terminated by the Company or any of its subsidiaries without cause , by the participant for good reason (as such terms are defined in the Plans), or due to the participant's

101

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued

death, disability or retirement, the participant will become vested in all shares of restricted stock that have not yet vested (or will continue to vest in such shares in accordance with the terms and conditions of the participant's restricted stock agreement), and is entitled to a pro rata portion of any awards for the period in which such termination occurs.

In the event of a change in control of the Company (as defined in the Plans) each participant under the plan is entitled to the payment of their award for the period in which the change in control occurs, as provided for in the applicable restricted stock agreement; all shares of restricted stock fully vest and become nonforfeitable.

Awards under the Plan will be paid 100% in stock and vest in 20% increments following the end of the one-year period, with 30% of the award based upon service and 70% of the award based upon the performance of the Company for senior executives. The Company will expense each Plan over a five year period beginning with the quarter ending March 31 of the respective Plan year.

The prior LTIP, was a three-year plan for the years 2009 through 2011 and provided participants with the opportunity to earn cash and stock awards based upon the achievement of pre-established performance goals over a three-year performance period. The Company began accruing for the LTIP payout for the 2009 through 2011 Plan years as of March 31, 2009.

At December 31, 2014, the Company had accrued \$593,000 for the 2012 LTIP service portion, \$481,000 for the 2013 LTIP service portion and \$244,000 for the 2014 LTIP service portion for a total of \$1,318,000. At December 31, 2013, the Company had accrued \$398,000 for the 2012 LTIP service portion and \$244,000 for the 2013 LTIP service portion for a total of \$642,000. Because the targets were not met for the performance portion of all three LTIP Plans, no amounts were accrued for the performance portion by the Company as of December 31, 2014, 2013 and 2012.

Deferred Compensation Plan

The Company maintains an Executive Nonqualified Excess Plan (the Excess Plan). The Excess Plan is intended to be a nonqualified deferred compensation plan that will comply with the provisions of Section 409A of the Internal Revenue Code. The Company maintains the Excess Plan to provide a means by which certain key management employees may elect to defer receipt of current compensation from the Company in order to provide retirement and other benefits, as provided for in the Excess Plan. The Excess Plan is funded solely by the participating employees and maintained primarily for the purpose of providing deferred compensation benefits for eligible employees. For those participants who satisfy minimum funding requirements, the participant is eligible for a life insurance benefit of \$250,000 in the event of the participant's death. At December 31, 2014 and 2013, the Company had \$2.5 million and \$2.2 million accrued for the Excess Plan, respectively.

12. SHAREHOLDERS' EQUITY

At December 31, 2014, shareholders' equity was \$457.6 million, or a book value of \$9.14 per common share, compared to \$413.4 million, or a book value of \$8.29 per common share, at December 31, 2013.

On October 28, 2011, the Company's Board of Directors approved a Share Repurchase Plan authorizing management to purchase up to 5.0 million shares of the Company's common stock in market transactions for a period not to exceed twenty-four months. For the years ended December 31, 2014 and 2013, there were no share repurchases. The Company has no Share Repurchase Plan in place, with the last plan having expired on October 28, 2013.

For each of the years ended December 31, 2014 and 2013, cash dividends paid to common shareholders totaled \$4.0 million. On February 27, 2015, the Company's Board of Directors declared a quarterly dividend of \$0.02 per common share. The dividend is payable on March 30, 2015, to shareholders of record as of March 16, 2015.

When evaluating the declaration of a dividend, the Company's Board of Directors considers a variety of factors, including but not limited to, cash flow, liquidity needs, results of operations, industry conditions, and our overall financial condition. As a holding company, the ability to pay cash dividends is partially dependent on dividends and other permitted payments from its Insurance Company Subsidiaries.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued****13. EARNINGS PER SHARE**

Basic earnings per share are based on the weighted average number of common shares outstanding during the year, while diluted earnings per share include the weighted average number of common shares and potential dilution from shares issuable pursuant to stock awards using the treasury stock method.

The following table is a reconciliation of the income and share data used in the basic and diluted earnings per share computations for the years ended December 31 (in thousands, except per share amounts):

	2014	2013	2012
Net income (loss)	\$ 28,657	\$ (112,310)	\$ 11,749
Common shares:			
Basic			
Weighted average shares outstanding	50,063,953	49,871,587	50,177,484
Diluted			
Weighted average shares outstanding	50,063,953	49,871,587	50,177,484
Dilutive effect of:			
Share awards under long term incentive plan	—	—	—
Total	50,063,953	49,871,587	50,177,484
Net income (loss) per common share			
Basic	\$ 0.57	\$ (2.25)	\$ 0.23
Diluted	\$ 0.57	\$ (2.25)	\$ 0.23

14. GOODWILL AND OTHER INTANGIBLE ASSETS***Goodwill***

The Company evaluates existing goodwill for impairment on an annual basis, or more frequently if events or changes in circumstances indicate that the asset might be impaired. Goodwill impairment is performed at the reporting unit level.

In accordance with accounting guidance, the Company concluded its reporting units to be specialty insurance operations (the Specialty Insurance Operations) and agency operations (the Agency Operations). The nature of the business and economic characteristics of all Agency Operations and all Specialty Insurance Operations are similar based upon, but not limited to, the following: (1) management alignment within each reporting unit, (2) the Company's Insurance Company Subsidiaries operating under a reinsurance pooling arrangement, and (3) the ability of the Company to leverage its expertise and fixed costs within each reporting unit.

Goodwill and intangible assets with indefinite lives must be tested for impairment at least once a year or more frequently if management believes indicators of impairment exist. Carrying values are compared with fair values, and

when the carrying value exceeds the fair value, the carrying value of the impaired asset is reduced to its fair value. The performance of the test involves a two-step process. Step One of the impairment test involves comparing the fair values of the applicable reporting units with their aggregate carrying values, including goodwill. If the carrying amount of a reporting unit exceeds the reporting unit's fair value, the Company performs Step Two to determine the amount of impairment loss. Step Two analysis involves determining the potential impairment of goodwill as the difference between the carried goodwill and the hypothetical fair value of enterprise less the fair value of the tangible net assets and less the estimation of identifiable intangible assets, such as agent relationships, licenses, trademarks and other intangibles that are not carried on the books at fair value.

103

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

Estimating the fair value of reporting units is a subjective process involving the use of estimates and judgments, particularly related to future cash flows, discount rates (including market risk premiums) and market multiples. The fair values of the reporting units were determined using a blend of two commonly used valuation techniques, the market approach and the income approach. The Company gives consideration to two valuation techniques, as either technique can be an indicator of value. For the market approach, valuations of reporting units were based on an analysis of price multiples, net book value and net tangible book value. The peer group price multiples used in the analysis were selected based on management's judgment. For the income approach, the Company estimated future cash flows using a discounted cash flow model (DCF model). A DCF model was selected to be comparable to what would be used by market participants to estimate fair value. The DCF model incorporated expected future growth rates, terminal value amounts, and the applicable weighted-average cost of capital to discount estimated cash flows. The projections used in the estimate of fair value are consistent with the Company's forecast and long-range plans.

On August 2, 2013, A.M. Best (insurance industry rating agency) downgraded Meadowbrook's issuer credit rating, as well its financial strength ratings and the issuer credit ratings of its Insurance Company Subsidiaries after the Company reported weaker-than-anticipated second-quarter results. This downgrade represented a triggering event for potential goodwill impairment. In response, the Company completed a Step One interim goodwill impairment evaluation and determined that a potential goodwill impairment existed in the Specialty Insurance Operations reporting unit, as the carrying value of the unit exceeded its fair value. The results of Step One analysis indicated that after assigning the fair value of the Specialty Insurance Operations reporting unit to all of the assets and liabilities, there would not be any excess fair value over the amounts assigned to allocate to goodwill. As a result, the Company performed a Step Two analysis of the goodwill impairment test. The Step Two analysis indicated that the estimation of the fair value of identifiable intangible assets was greater than the amount of other intangibles carried. To the extent this estimation is greater than the carried amount of other intangibles, the Company is not permitted to write up the other intangibles to fair value. Management reviewed the results of Step Two analysis and, concluded that a full impairment of Specialty Insurance Operations' goodwill should be recognized resulting in a \$115.4 million impairment charge in the second quarter of 2013.

The carrying amount of the remaining goodwill is \$6.9 million and \$5.6 million at December 31, 2014 and December 31, 2013, respectively and it represents goodwill attributable to the Company's Agency Operations reporting unit. During 2014 and 2013, the Company performed an annual qualitative assessment testing of the Agency Operations goodwill. The qualitative assessment is a method that allows management to qualitatively assess whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount in lieu of performing the two-step goodwill impairment testing. The Company selected October 1st of each year as the date for the evaluation of the Agency Operations reporting unit goodwill. As part of the analysis, management evaluated the impact of events and circumstances, including both positive and negative evidence that have occurred since the last two-step goodwill impairment test date of June 30, 2013. This evaluation is a subjective process and involves the consideration of historical performance, changes in carrying value, and identifying and assessing changes in key drivers of enterprise value (both internal and external factors). Based on this qualitative assessment, management concluded that there was no goodwill impairment in the Agency Operations reporting unit as of December 31, 2014 and December 31, 2013.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

The following summarizes the goodwill activity and beginning and ending balances for the year ended December 31, 2014 and the year ended December 31, 2013 (in thousands):

	Agency Operations	Specialty Insurance Operations	Total
Balance at January 1, 2013	\$ 5,644	\$ 115,397	\$ 121,041
Goodwill Impairment	—	(115,397)	(115,397)
Balance at December 31, 2013	\$ 5,644	\$ —	\$ 5,644
Additions to Goodwill	1,213	—	1,213
Balance at December 31, 2014	\$ 6,857	\$ —	\$ 6,857

Other Intangible Assets

At December 31, 2014 and 2013, the Company had other intangible assets of \$21.9 million (\$55.0 million gross, net of \$33.1 million accumulated amortization) and \$24.5 million (\$53.8 million gross, net of \$29.3 million accumulated amortization), respectively. Other intangible assets consist of definite lived intangibles and indefinite lived intangibles as detailed below.

As of December 31, 2014 and 2013 the Company had definite lived intangibles of \$16.4 million (\$49.5 million gross, net of \$33.1 million accumulated amortization) and \$19.0 million (\$48.3 million gross, net of \$29.3 million accumulated amortization), respectively. The definite lived assets are primarily comprised of agent relationships and trade names acquired during the 2008 ProCentury Merger. ProCentury-related agent relationships were \$10.7 million (\$21.0 million gross, net of \$10.3 million accumulated amortization) and \$12.7 million (\$21.0 million gross, net of \$8.3 million accumulated amortization) as of December 31, 2014 and 2013, respectively. ProCentury-related trade names were \$1.8 million (\$5.0 million gross, net of \$3.2 million accumulated amortization) and \$2.3 million (\$5.0 million gross, net of \$2.7 million accumulated amortization) as of December 31, 2014 and 2013, respectively. At the time of acquisition, agent relationships and trade names had estimated useful lives of fifteen years and ten years, respectively. As of December 31, 2014, agent relationships have an estimated remaining life of nine years and trade names have an estimated remaining life of four years.

The definite lived intangible balances also included intangibles acquired through the USSU acquisition of \$0.5 million (\$14.5 million gross, net of \$14.0 million accumulated amortization) and \$1.2 million (\$14.5 million gross, net of \$13.3 million accumulated amortization) as of December 31, 2014 and 2013, respectively. At the time of acquisition, the USSU intangible had an estimated life of eight years and as of December 31, 2014 the estimated remaining life of this asset is two years. All other definite lived intangible assets, except those described above, have estimated useful lives of five to fifteen years.

The indefinite lived intangible balance was \$5.5 million as of December 31, 2014 and 2013. The indefinite lived assets are primarily related to an insurance license acquired during the ProCentury Merger in 2008 and were not subject to amortization as of December 31, 2014 and 2013.

Amortization expense related to other intangible assets for 2014, 2013, and 2012, was \$4.0 million, \$4.2 million, and \$7.3 million, respectively. During 2012, the Company wrote off a \$1.8 million intangible asset related to the Public Entity Excess Liability program that it terminated in the fourth quarter of 2012. This amount is included in the 2012

amortization expense.

Amortization expense for the five succeeding years is as follows (in thousands):

2015	\$ 3,751
2016	3,001
2017	2,505
2018	2,033
2019	1,288
Total amortization expense	\$ 12,578

105

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued****15. COMMITMENTS AND CONTINGENCIES**

The Company has certain operating lease agreements for its offices and equipment. A majority of the Company's lease agreements contain renewal options and rent escalation clauses. At December 31, 2014, future minimum rental payments required under non-cancelable long-term operating leases are as follows (in thousands):

2015	\$ 3,508
2016	3,346
2017	3,167
2018	2,679
2019	2,295
Thereafter	5,234
Total minimum lease commitments	\$ 20,229

Rent expense for the years ended December 31, 2014, 2013, and 2012, was \$4.6 million, \$4.1 million, and \$4.7 million, respectively.

In November 2012, Century committed to a \$10 million contribution to the Aquiline Financial Services Fund II L.P. as a strategic investment. As of December 31, 2014, approximately \$6.7 million of the commitment had been satisfied with \$3.3 million of unfunded commitment remaining.

Most states require admitted property and casualty insurers to become members of insolvency funds or associations, which generally protect policyholders against the insolvency of such insurers. Members of the fund or association must contribute to the payment of certain claims made against insolvent insurers. Maximum contributions required by law in any one year vary between 1% and 2% of annual premium written by a member in that state. Assessments from insolvency funds were \$5.3 million, \$7.0 million, and \$6.8 million, for 2014, 2013, and 2012, respectively. Most of these payments are recoverable through future policy surcharges or premium tax reductions.

The Company's Insurance Company Subsidiaries are also required to participate in various mandatory insurance facilities or in funding mandatory pools, which are generally designed to provide insurance coverage for consumers who are unable to obtain insurance in the voluntary insurance market. Among the pools participated in are those established in certain states to provide windstorm and other similar types of property coverage. These pools typically require all companies writing applicable lines of insurance in the state for which the pool has been established to fund deficiencies experienced by the pool based upon each company's relative premium writings in that state, with any excess funding typically distributed to the participating companies on the same basis. To the extent that reinsurance treaties do not cover these assessments, they may have an adverse effect on the Company. Total assessments paid to all such facilities were \$3.9 million, \$4.2 million, and \$4.9 million for 2014, 2013, and 2012, respectively.

Legal Proceedings

The Company and its subsidiaries are subject at times to various claims, lawsuits and proceedings relating principally to alleged errors or omissions in the placement of insurance, claims administration, consulting services and other business transactions arising in the ordinary course of business. Where appropriate, the Company vigorously defends such claims, lawsuits and proceedings. Some of these claims, lawsuits and proceedings seek damages, including consequential, exemplary or punitive damages, in amounts that could, if awarded, be significant. Most of the claims,

lawsuits and proceedings arising in the ordinary course of business are covered by the policy of insurance at issue. We account for such activity through the establishment of unpaid loss and loss expense reserves. We also maintain errors and omissions insurance and extra-contractual coverage under reinsurance treaties related to the policy of insurance at issue or other appropriate insurance. In terms of any retentions or deductibles associated with such insurance, the Company has established accruals for such retentions or deductibles, when necessary, based upon current available information. In accordance with accounting guidance, if it is probable that an asset has been impaired or a liability has been incurred as of the date of the financial statements and the amount of loss is reasonably estimable; then an accrual for the costs to

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued

resolve these claims is recorded by the Company in the accompanying consolidated balance sheets. Period expenses related to the defense of such claims are included in the accompanying consolidated statements of income. Management, with the assistance of outside counsel, adjusts such provisions according to new developments or changes in the strategy in dealing with such matters. On the basis of current information, the Company does not believe that there is a reasonable possibility that, other than with regard to the arbitration described below, any material loss exceeding amounts already accrued, if any, will result from any of the claims, lawsuits and proceedings to which the Company is subject to, either individually, or in the aggregate.

Arbitration

The Company purchased a three year underlying per occurrence excess of loss reinsurance agreement (the Retention Buy Down Treaty) from a reinsurer (the Reinsurer), which reinsured the Company's statutory workers' compensation business for the period of January 1, 1999 through January 1, 2002. Under the Retention Buy Down Treaty, the Company ceded losses to the Reinsurer of approximately \$42.6 million. The Company was also a party to an unrelated excess of loss treaty with another reinsurer for its workers' compensation business covering the same periods (the Excess of Loss Treaty). Under the Excess of Loss Treaty, the Company's retention was \$250,000 per occurrence. The Company purchased the Retention Buy Down Treaty to reduce its \$250,000 existing per occurrence retention to \$100,000. In approximately 2008, a dispute arose between the Company and the Reinsurer as to how the Retention Buy Down Treaty applied to certain losses. When the Company and the Reinsurer could not come to a mutual understanding, the Company initiated arbitration proceedings requesting payment of its outstanding balance. On July 23, 2013, the arbitration panel issued an interim final award finding the Retention Buy Down Treaty did not include certain losses that the Company believed were subject to the Retention Buy Down Treaty.

During the arbitration, the Reinsurer sought from the Company an award of \$1.6 million. This amount reflected the difference between what the Company claimed was due from the Reinsurer (\$2.9 million) and what the Reinsurer claimed it was due back from the Company (\$4.5 million). The panel awarded the Reinsurer \$1.6 million, and \$2.0 million in interest, plus attorney's fees. Based upon the panel's interpretation of the Retention Buy Down Treaty, the Company was required to reverse certain of its ceded incurred losses due from the Reinsurer. The Company recorded this change in ceded incurred losses during the second quarter of 2013. Notwithstanding the panel's netting of the outstanding balances, the panel requested the Company submit additional documentation listing all programs covered by the Retention Buy Down Treaty and the Company's retained limit for each program. The Reinsurer was allowed to respond and submit its bill for attorney's fees. The Company paid the \$1.6 million and \$2.0 million in interest, as required by the interim final award. On August 6, 2013, the Company submitted the above-mentioned additional documentation.

On August 9, 2013 the Reinsurer argued the Company's submission was non-compliant. On August 12, 2013 and August 13, 2013, the panel (by majority) issued two orders: (1) the first order determined the Company's submission of August 6, 2013 was non-compliant; and (2) the second order modified the terms of the interim final award and limited the submissions to documents previously produced in the arbitration.

The Company filed a complaint in state court to vacate and/or modify the interim final award.

On August 21, 2013, the Company brought a Motion to Stay Proceedings before the panel, because it had discovered evidence of what it believed were improper ex parte contacts between the Reinsurer's lawyer and the arbitrator appointed by the Reinsurer. On August 29, 2013, the panel (by majority) denied the Company's Motion to Stay Proceedings.

Subsequently, the Company filed a Motion to Stay the Arbitration in the state court requesting discovery to investigate what the Company believed was a tainted arbitration panel. The Reinsurer removed the case to the United States District Court for the Eastern District of Michigan.

On September 4, 2013, the Reinsurer filed a response to the Company's submission before the panel seeking an additional \$25 million in damages from the Company. On September 10, 2013, the Company filed a motion seeking a preliminary injunction from the federal court requesting the court enjoin the panel from issuing any further decisions.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued

On September 12, 2013, the federal court granted the Company's preliminary injunction enjoining the panel from issuing any further decisions, finding the Company would likely succeed on its underlying complaint seeking to vacate the interim final award due to the strong evidence of: (1) improper *ex parte* communications between the arbitrator appointed by the Reinsurer and its lawyer; (2) a breach of the arbitration provision within the Retention Buy Down Treaty, because the Reinsurer's arbitrator and the neutral arbitrator issued two substantive orders without the knowledge or input from the Company's arbitrator; and (3) failing to disclose to the Company certain relationships between the Reinsurer and its arbitrator.

The Reinsurer appealed the preliminary injunction. On April 9, 2014, the Sixth Circuit Court of Appeals issued an opinion and order finding the trial court did not have jurisdiction to issue its preliminary injunction enjoining the panel. The appellate court found that the Company could challenge the fairness of the proceedings and partiality of the arbitrators after a final award was issued.

On July 25, 2014, the panel issued its final award. The panel (by majority) awarded the reinsurer approximately \$10.9 million, plus interest. The Company immediately filed a complaint in federal district court to vacate and/or modify the arbitration award(s) for the same reasons the court previously granted the Company's request for a preliminary injunction : (1) improper *ex parte* communications between the arbitrator appointed by the Reinsurer and its lawyer; (2) breach of the Retention Buy Down Treaty's arbitration provision because the Reinsurer's arbitrator and the neutral arbitrator issued two substantive orders without input from the Company's arbitrator; and (3) failure to disclose to the Company certain relationships between the Reinsurer and its arbitrator. In addition, the following additional grounds were included in the complaint: (1) financial conflict of interest on the part of the Reinsurer's arbitrator; (2) breach of the Retention Buy Down Treaty's arbitration provision because the Reinsurer's arbitrator was not a disinterested arbitrator and was under the control of the Reinsurer; (3) evident partiality of the neutral arbitrator; (4) failure to consider material evidence, in accordance with Michigan law; (5) improper interpretation and re-writing of the treaty; and (6) improper award of interest and attorney fees contrary to Michigan law. The Reinsurer has filed a motion to confirm the panel's majority interim and final awards. The Company has filed a motion to vacate and/or modify the awards.

The Company intends to vigorously pursue its complaint to vacate the arbitration award(s). While the Company believes it will succeed upon the merits, given the inherent uncertainty surrounding the conclusion of this proceeding, an adverse outcome in this matter could have a material impact on our results of operations or cash flows on a particular quarter or annual period. If this matter is resolved against the Company, we currently estimate the Company would suffer a loss of approximately \$10.9 million, plus approximately \$5.0 million of interest, attorney fees and costs.

Securities Class Action

In August and October 2013, two putative class action complaints were filed in the United States District Court for the Southern District of New York against the Company, Robert Cubbin and Karen Spaun. The cases were subsequently consolidated and on April 25, 2014, the plaintiffs filed a Consolidated Amended Class Action Complaint naming the same defendants, on behalf of a putative class consisting of all persons who purchased the Company's stock between February 17, 2009 and February 21, 2014 (the Class Period). The Consolidated Amended Complaint alleged that during the purported Class Period, the defendants made materially false and misleading statements relating to the Company's reserves and reported goodwill. The plaintiffs filed a Second Amended Complaint in response to our motion to dismiss. On November 5, 2014, the defendants filed another motion to dismiss seeking a dismissal of the Second Amended Complaint. On December 5, 2014 the plaintiffs filed a stipulation of voluntarily dismissal with

prejudice of the Second Amended Complaint, pursuant to which the plaintiffs and defendants each agreed not to pursue the other party for costs or attorney fees. On December 8, 2014, the court entered an order of dismissal.

Merger-Related Litigation

In connection with the proposed merger of the Company with Fosun, certain putative class action lawsuits have been filed on behalf of a purported class of the Company's shareholders. On January 7, 2015, a purported shareholder of Meadowbrook filed a putative class action complaint in the United States District Court for the Eastern District of Michigan, captioned *Steinberg v. Meadowbrook Insurance Group, Inc., et al.* (Case No.

TABLE OF CONTENTS

MEADOWBROOK INSURANCE GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued

2:15-cv-10057-JCO-MJH). The lawsuit names Meadowbrook, each of our current directors, former director Herbert Tyner, Fosun, and Fosun's merger vehicles as defendants. The lawsuit alleges that the individual defendants breached their fiduciary duties by, among other things, failing to take appropriate steps to maximize the value of Meadowbrook to its shareholders, failing to value Meadowbrook properly, and ignoring or not protecting against directors' alleged conflicts of interest in connection with the merger. The lawsuit also alleges that Meadowbrook, Fosun, and Fosun's merger vehicles aided and abetted those alleged breaches of fiduciary duties by the individual defendants. The lawsuit seeks, among other relief, injunctive relief enjoining the merger and directing the defendants to exercise their fiduciary duties to obtain a transaction that is in the best interests of the shareholders and that will obtain the best possible consideration. The lawsuit also purports to seek recovery of the costs of the action, including reasonable attorneys' and experts' fees. The lawsuit is in a preliminary stage.

On January 9, 2015, and January 12, 2015, two additional lawsuits, captioned *Raul v. Cubbin, et al.* (Case No. 2015-144933-CB), and *Klein v. Meadowbrook Insurance Group, et al.* (Case No. 2015-144948-CB), were filed in the Circuit Court of Oakland County, Michigan. These lawsuits asserted similar claims and allegations to those in the *Steinberg* lawsuit, on behalf of the same putative class. On February 2, 2015, upon stipulation by all parties, both the *Raul* and the *Klein* lawsuits were dismissed without prejudice. On February 6, 2015, the *Klein* and *Raul* plaintiffs jointly re-filed an action in the United States District Court for the Eastern District of Michigan, captioned *Klein v. Cubbin, et al.* (Case No. 2:15-cv-10497-JCO-RSW). The lawsuit asserts similar claims and allegations to those in the *Steinberg* lawsuit, against the same defendants and on behalf of the same putative class of shareholders. The lawsuit seeks, among other relief, injunctive relief enjoining the merger. It also purports to seek recovery of the costs of the action, including reasonable attorneys' and experts' fees. The lawsuit is in a preliminary stage.

16. RELATED PARTY TRANSACTIONS

At December 31, 2014 and 2013, the Company held a note receivable from one of its executive officers with the total amount outstanding equal to \$683,000 and \$709,000, respectively, including \$23,000 and \$48,000 of accrued interest, respectively. This note arose from a transaction in late 1998 in which the Company loaned the officer funds to exercise 64,718 common stock options to cover the exercise price and the taxes incurred as a result of the exercise. The note bears interest equal to the rate charged pursuant to the Company's revolving credit agreement and is due on demand any time after January 1, 2002. As of December 31, 2014, the rate was 2.76%. The loan is partially collateralized by 64,718 shares of the Company's common stock under a stock pledge agreement. For the years ended December 31, 2014 and 2013, \$43,800 and \$43,800, respectively, was paid against the loan. As of December 31, 2014, the cumulative amount that has been paid against this loan was \$469,400.

The Company maintains an employment agreement with the executive officer, which provides that the note is a non-recourse loan and the Company's sole legal remedy in the event of a default is the right to reclaim the shares pledged under the stock pledge agreement. Also, if there is a change in control of the Company and the officer is terminated or if the officer is terminated without cause, the note is cancelled and deemed paid in full. In these events, the officer may also retain the pledged shares of the Company, or, at the officer's discretion, sell these shares back to the Company at the then current market price or their book value, whichever is greater.

If the officer is terminated by the Company for cause, the note is cancelled and considered paid in full. In this case, however, the officer forfeits the pledged shares of the Company, or, at the Company's discretion, must sell these shares back to the Company for a nominal amount.

If the officer terminates his employment during the term of the agreement, the Company can demand full repayment of the note. If the note was not paid by the officer on the demand of the Company, the Company's only recourse is to reclaim the shares of the Company that were pledged under the stock pledge agreement.

17. EMPLOYEE BENEFIT PLANS

Company employees over the age of 20 1/2 who have completed six months of service are eligible for participation in The Meadowbrook, Inc. 401(k) Profit Sharing Plan (the 401(k) Plan). The 401(k) Plan

109

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued**

provides for matching contributions and/or profit sharing contributions at the discretion of the Board of Directors of Meadowbrook, Inc. In 2014, 2013, and 2012, the matching contributions were \$1.4 million, \$1.4 million, and \$1.3 million, respectively. There were no profit sharing contributions in 2014, 2013, and 2012.

18. QUARTERLY FINANCIAL DATA (Unaudited)

The following is a summary of unaudited quarterly results of operations for 2014 and 2013 (in thousands, except per share and ratio data):

	1st Quarter	2nd Quarter	3rd Quarter	4th Quarter
2014:

Goodwill impairment expense	0	115,397	0	0
Interest expense	2,197	3,653	3,581	3,519
Net income (loss)	7,082	(113,058)	5,516	(11,850)
Diluted earnings (losses) per share	\$ 0.14	\$ (2.27)	\$ 0.11	\$ (0.24)
GAAP combined ratio (1)	101.1 %	116.0 %	103.0 %	124.6 %

(1) The combined loss and expense ratio (or combined ratio), expressed as a percentage, is the key measure of underwriting profitability traditionally used in the property and casualty insurance business. The combined ratio is a statutory (non-GAAP) accounting measurement, which represents the sum of (i) the ratio of losses and loss expenses to premiums earned (loss ratio), plus (ii) the ratio of underwriting expenses to net premiums written (expense ratio). The combined ratios above have been modified to reflect GAAP accounting, as management evaluates the performance of our underwriting operations using the GAAP combined ratio. Specifically, the GAAP combined ratio is the sum of the loss ratio, plus the ratio of GAAP underwriting expenses (which include the change in deferred policy acquisition costs) to net premiums earned (expense ratio). When the combined ratio is under 100%, underwriting results are generally considered profitable; when the combined ratio is over 100%, underwriting results are generally considered unprofitable.

TABLE OF CONTENTS**MEADOWBROOK INSURANCE GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - continued****19. ACCUMULATED OTHER COMPREHENSIVE INCOME**

The Company's comprehensive income includes net earnings plus unrealized gain or loss on available-for-sale investment securities, net of tax. In reporting comprehensive earnings on a net basis in the income statement, we used a 35 percent tax rate. The following table illustrates the amounts reclassified from accumulated other comprehensive income:
