ITEM 2.02. Results of Operations and Financial Condition

On October 22, 2015, Perrigo Company plc (the “Company”) released earnings for the third calendar quarter of 2015. The press release related to the Company’s earnings is attached as Exhibit 99.1.

The Directors of the Company accept responsibility for the information contained in this document. To the best of their knowledge and belief (having taken all reasonable care to ensure such is the case), the information contained in this document is in accordance with the facts and does not omit anything likely to affect the import of such information.

A person interested in 1% or more of any class of relevant securities of the Company or Mylan N.V. may have disclosure obligations under Rule 8.3 of the Irish Takeover Rules.

The earnings release contains certain non-GAAP measures. A “non-GAAP financial measure” is defined as a numerical measure of a company’s financial performance that excludes or includes amounts different than the most directly comparable measure calculated and presented in accordance with U.S. Generally Accepted Accounting Principles (GAAP) in the statements of income, balance sheets or statements of cash flows of the company. Pursuant to the requirements of Regulation G, the Company has provided a reconciliation for organic sales on a constant currency basis, Cost of sales, Gross profit, Operating expenses, Operating income, Interest expense, net, Other expense, net, Income before income taxes, Income tax expense, Net income, Diluted weighted average shares outstanding, and diluted earnings per share within its earnings release to the most directly comparable U.S. GAAP measures for these non-GAAP measures.

The Company excludes the items listed below in the applicable period when monitoring and evaluating the on-going financial results and trends of its business, and believes that presenting operating results excluding these items is also useful for investors, since it provides important insight into the Company's on-going core business operations on a normalized basis. Management uses adjusted financial data for planning and forecasting in future periods, including trending and analyzing the core operating performance of the Company’s business from period to period without the effect of the non-core business items indicated. Management also uses adjusted financial data to prepare operating budgets and forecasts and to measure the Company’s performance against those budgets and forecasts on a corporate and segment level.

Items excluded from reported results:
