Item 2.05 Costs Associated with Exit or Disposal Activities

In conjunction with the separation of its Performance Chemicals segment in mid-2015, DuPont committed to streamlining support for what will be a more focused portfolio of businesses. As a part of its broad-based redesign initiative to streamline and further leverage global business support, on June 26, 2014, DuPont committed to a restructuring plan to reduce residual costs associated with the separation of Performance Chemicals and to improve productivity across all businesses. The company expects to record a pre-tax charge to earnings of about \$270 million in the second quarter 2014, comprised of approximately \$165 million of severance and related benefits costs and about \$105 million of asset related charges. Future cash payments related to this charge are anticipated to be approximately \$170 million, primarily related to the payment of severance and related benefits. The actions associated with this charge are expected to be substantially complete by December 31, 2015 and to achieve pre-tax costs savings of approximately \$250 million in 2015 and approximately \$300 million per year in subsequent years.

Additional charges and future cash payments are expected to be incurred in relation to this plan. At the current time, the company is unable, in good faith, to make a determination of an estimate of the total amount or range of amounts required by paragraphs (b), (c) and (d) of Item 2.05 of Form 8-K in connection with this plan. As permitted by Item 2.05 of Form 8-K, the company will file an amendment to this report upon the determination of such amounts.
