Item 8.01. Other Events.

As disclosed in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2013, filed with the Securities and Exchange Commission on July 30, 2013, we disclosed our 2013 segment realignment and presentation changes which are comprised of the following three items:

(1) In April 2013, we made the decision to simplify our organizational structure to focus on three core business segments. The new segments better reflect the markets where we participate and lead today, and where we expect to grow in the future.

Beginning in the second quarter of 2013 the following changes have been made:

- Our BioPolymer division has been moved into a standalone reporting segment and renamed FMC Health and Nutrition. This change better reflects our strategic intent to continue to broaden our product and customer base in faster growing food and pharmaceutical segments and to expand into nutraceuticals, personal care and similar markets.
- We have combined our Lithium and Alkali Chemicals divisions into a single reporting segment, FMC Minerals. We believe doing this will enable us to leverage technical resources and improve operating performance in both businesses.
- Our Agricultural Products Group has been renamed FMC Agricultural Solutions. We believe this name change better reflects the value-added solutions and services that we provide to our customers.
- Finally, our Peroxygens and related Environmental Solutions product lines have become a standalone reporting segment called FMC Peroxygens. We have begun exploring the divestiture of all of this segment.

(2) Effective January 1, 2013, we adopted the Financial Accounting Standards Board's (FASB) updated guidance on balance sheet offsetting.

Effective in January 2013, our segment presentations including allocation of certain corporate expenses were updated to reflect how we currently make financial decisions and allocate resources. These changes were first (3) presented within our Form 10-Q for the quarter ended March 31, 2013. The presentation change was also made since we believe the changes provide a better understanding of the underlying profitability of each individual business segment. The changes were the following:

• Allocation of certain long-term incentives, primarily stock-based compensation, from the category other income (expense), net to each business segment.

• Allocation of the depreciation on capitalized interest associated with completed construction projects from the category other income (expense), net to each business segment.

The presentation of the impact of noncontrolling interest as its own line item. Noncontrolling interest impacts were previously netted within each individual segment. The majority of the noncontrolling interest pertains to our FMC Minerals segment.

• We have combined other income (expense), net and corporate expense into one line item renamed "Corporate and other".

In accordance with accounting principles generally accepted in the United States, or US GAAP, these changes in our reporting must be applied retrospectively. We are issuing this Current Report on Form 8-K, or Form 8-K, to update our historical financial information on a basis that is consistent with the new reporting structure, allocations and the adoption of the FASB's updated guidance on balance sheet offsetting. The change in reportable segments, allocations and the adoption of the balance sheet offsetting accounting guidance did not change our consolidated results of operations, financial condition or cash flows for any period.

In this Form 8-K, we have updated the following information that appeared in FMC's Annual Report on Form 10-K for the year ended December 31, 2012 (2012 Form 10-K):

- Consent of Independent Registered Public Accounting Firm, attached as Exhibit 23.1 and incorporated herein by reference;
