Kansas City Life Insurance Company
Notes to Consolidated Financial Statements (Unaudited)

1. NATURE OF OPERATIONS AND SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The unaudited interim consolidated financial statements, the accompanying notes to these unaudited interim consolidated financial statements and Management's Discussion and Analysis of Financial Condition and Results of Operations of Kansas City Life Insurance Company include the accounts of the Company and its subsidiaries, principally Sunset Life Insurance Company of America (Sunset Life) and Old American Insurance Company (Old American).

The unaudited interim consolidated financial statements have been prepared in accordance with United States of America generally accepted accounting principles (GAAP) for interim financial reporting and with the instructions to Form 10-Q and Regulation S-X. Accordingly, they do not include all of the disclosures required by GAAP for complete financial statements. As such, these unaudited interim consolidated financial statements should be read in conjunction with the Company's 2007 Annual Report on Form 10-K. Management believes that the disclosures are adequate to make the information presented not misleading, and all normal and recurring adjustments necessary to present fairly the financial position at September 30, 2008 and the results of operations for all periods presented have been made. The results of operations for any interim period are not necessarily indicative of the Company's operating results for a full year.

Significant intercompany transactions have been eliminated in consolidation and certain immaterial reclassifications have been made to the prior period results to conform with the current period's presentation.

The preparation of the unaudited interim consolidated financial statements requires management of the Company to make estimates and assumptions relating to the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the unaudited interim consolidated financial statements, and the reported amounts of revenue and expenses during the period. These estimates are inherently subject to change and actual results could differ from these estimates.

Business Changes

On January 23, 2006, the Company entered into a definitive agreement to sell its bank subsidiary, Generations Bank, for \$10.1 million in cash to Brooke Corporation. On January 8, 2007, the Company completed the sale of Generations Bank. The gain on the sale was \$1.9 million. The bank subsidiary and the results of operations were not material to the financial statements of the Company and are not disclosed separately.

Significant Accounting Policies

Presented below is a summary of significant accounting policies used by the Company. This is not intended to be an exhaustive list of all accounting policies used by the Company. For a full discussion, please refer to the Company's 2007 Form 10-K as filed with the Securities and Exchange Commission.

Investments

Investment income is recognized when earned. Realized gains and losses on the sale of investments are determined on the basis of specific security identification recorded on the trade date. Securities available for sale are stated at fair value. Unrealized gains and losses, net of adjustments to deferred acquisition costs, value of business acquired, policyholder account balances and deferred income taxes, are reported as a separate component of accumulated other comprehensive loss in stockholders' equity. The adjustments to deferred acquisition costs (DAC) and value of business acquired (VOBA) represent changes in the amortization of DAC and VOBA that would have been required as a charge or credit to income had such unrealized gains and losses been realized. The adjustment to policyholder account balances represents the increase from using a discount rate that would have been required if such unrealized gains had been realized and the proceeds reinvested at current market interest rates.

The Company's fair value of fixed maturity and equity securities are derived from external pricing sources, brokers, and internal matrices and estimates. The Company reviews and analyzes its securities on an ongoing basis to determine whether impairments exist that are other-than-temporary. Based upon these analyses, specific security values may be written down to fair value through earnings as a realized investment loss if the security is considered to be other-than-temporary impaired.

Mortgage loans are stated at cost, adjusted for amortization of premium and accrual of discount, less a valuation reserve for probable losses. A loan is considered impaired if it is probable that contractual amounts due will not

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited)-Continued

be collected.

Real estate consists of directly owned investments and real estate joint ventures. Real estate that is directly owned is carried at depreciated cost. Real estate joint ventures consist primarily of office and industrial warehouse buildings, unimproved land for future development and low income housing tax credit ("LIHTC") investments. Real estate joint ventures are consolidated where required or are valued at cost, adjusted for the Company's equity in earnings.

Policy loans are carried at cost, less principal payments received. Short-term investments are stated at cost, adjusted for amortization of premium and accrual of discount.

Valuation of Investments

The Company's principal investments are in fixed maturity securities, mortgage loans and real estate; all of which are exposed to three primary sources of investment risk: credit, interest rate and liquidity. The fixed maturity securities, which are all classified as available for sale, are carried at their fair value in the Company's balance sheet, with unrealized gains or losses recorded in accumulated other comprehensive loss. The unrealized gains or losses are recorded net of the adjustment to policyholder account balances to reflect what would have been earned had those gains or losses been realized and the proceeds reinvested. The Company's fair value of fixed maturity and equity securities are derived from external pricing sources, brokers, and internal matrices and estimates. Approximately 92% of these investments are from external pricing services while 8% are derived from brokers and internal matrices and estimates. The investment portfolio is monitored regularly to ensure that investments which may be other-than-temporarily impaired are identified in a timely fashion and properly valued, and that impairments are charged against earnings as realized investment losses. The valuation of the investment portfolio involves a variety of assumptions and estimates, especially for investments that are not actively traded.

The Company has a policy and process in place to identify securities that could potentially have an impairment that is other-than-temporary. This process involves monitoring market events that could impact issuers' credit ratings, business climate, management changes, litigation and government actions, and other similar factors. This process also involves monitoring late payments, downgrades by rating agencies, key financial ratios, financial statements, revenue forecasts, asset quality and cash flow projections as indicators of credit issues.

At the end of each quarter, all securities are reviewed to determine whether impairments should be recorded. This quarterly process includes an assessment of the credit quality of each investment in the entire securities portfolio. Additional reporting and review procedures are conducted for those securities where fair value is less than 90% of amortized cost. Further, detailed analysis is performed for each issue or issues having experienced a formal restructuring or where the security has experienced material deterioration in fair value.

The Company considers relevant facts and circumstances in evaluating whether the impairment of a security is other-than-temporary. Relevant facts and circumstances considered include but are not limited to:

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

- The current fair value of the security as compared to cost;
- The length of time the fair value has been below cost;
- The financial position of the issuer, including the current and future impact of any specific events;
- The Company's ability and intent to hold the security to maturity or until it recovers in value.

To the extent the Company determines that a security is deemed to be other-than-temporarily impaired, the difference between amortized cost and fair value is charged to income as a realized investment loss, resulting in a reduction to the cost basis of the underlying investment.

There are a number of significant risks and uncertainties inherent in the process of monitoring impairments and determining if an impairment is other-than-temporary. These risks and uncertainties include but are not limited to:

- The risk that the Company's assessment of an issuer's ability to meet all of its contractual obligations will change based on changes in the credit characteristics of that issuer;
- The risk that the economic outlook will be worse than expected or have more of an impact on the issuer than anticipated;
- The risk that fraudulent information could be provided to the Company's investment professionals who determine the fair value estimates;

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited)-Continued

- The risk that new information obtained by the Company or changes in other facts and circumstances may lead the Company to change its intent to hold the security to maturity or until it recovers in value;
- The risk that inaccurate or misleading information could be provided to the Company's investment professionals who determine the fair value estimates.

Any of these situations could result in a charge to income in a future period.

Deferred Acquisition Costs (DAC) and Value of Business Acquired (VOBA)

Deferred acquisition costs (DAC), principally agent commissions and other selling, selection and issue costs, which vary with and are directly related to the production of new business, are capitalized as incurred. These deferred costs are then amortized in proportion to future premium revenues or the expected future profits of the business, depending upon the type of product.

When a new block of business is acquired or when an insurance company is purchased, a portion of the purchase price is allocated to a separately identifiable intangible asset, called the value of business acquired (VOBA). VOBA is established as the actuarially determined present value of future gross profits of the business acquired and is amortized in proportion to future premium revenues or the expected future profits, depending on the type of business acquired.

The Company considers the following assumptions to be of significance when evaluating the amortization of DAC and VOBA: expected mortality, interest spreads, surrender rates and expense margins. Mortality relates to the occurrence of death. Interest spreads are the difference between the investment returns earned and the crediting rates of interest applied to policyholder account balances. Surrender rates relate to the relative volume of policy terminations. Expense margins involve the expenses incurred for maintaining and servicing in-force policies.

At least annually, a review is performed of the models and the assumptions used to develop expected future profits, based upon management's current view of future events. DAC is reviewed on an ongoing basis to determine that the unamortized portion does not exceed the expected recoverable amounts. Management's view primarily reflects Company experience but can also reflect emerging trends within the industry. Short-term deviations in experience affect the amortization of DAC and VOBA in the period, but do not necessarily indicate that a change to the long-term assumptions of future experience is warranted. If it is determined that it is appropriate to change the long-term assumptions of future experience, then an unlocking adjustment is recognized for the block of business being evaluated. Certain assumptions, such as interest spreads and surrender rates, may be interrelated. As such, unlocking adjustments often reflect revisions to multiple assumptions. The balances of DAC and VOBA are immediately impacted by any assumption changes, with the change reflected through the income statement as an unlocking adjustment in the amount of DAC or VOBA amortized. These adjustments can be positive or negative. The impact of unlocking adjustments from the changes in estimates for the periods reported are included in the *Consolidated Results of Operations* and *Operating Results by Segment* sections of the Management's Discussion and Analysis of Financial Condition and Results of Operations contained within this document.

The following table reflects the estimated pre-tax impact to DAC and VOBA on universal life, variable universal life, and fixed and variable deferred annuity products that could occur in a twelve-month period for an unlocking adjustment due to reasonably likely changes in significant assumptions. Changes in assumptions of the same magnitude in the opposite direction would have an impact of a similar magnitude but opposite direction of the examples provided. Information in the table below was presented in the 2007 Form 10-K and the Company believes that the

sensitivity results remain valid.

8

Kansas City Life Insurance Company**Notes to Consolidated Financial Statements (Unaudited)-Continued**

Critical Accounting Estimate	Determination Methodology	Potential One-time Effect on DAC, VOBA and Related Items
Mortality Experience	Based on Company mortality experience. Industry experience and trends are also considered.	A 2.5% increase in expected mortality experience for all future years would result in a reduction in DAC and VOBA, and an increase in current period amortization expense of \$4.6 million.
Surrender Rates	Based on Company surrender experience. Industry experience and trends are also considered.	A 10% increase in expected surrender rates for all future years would result in a reduction in DAC and VOBA, and an increase in current period amortization expense of \$2.3 million.
Interest Spreads	Based on expected future investment returns and expected future crediting rates applied to policyholder account balances; future crediting rates include constraints imposed by policy guarantees.	A 10 basis point reduction in future interest rate spreads would result in a reduction in DAC and VOBA, and an increase in current period amortization expense of \$3.9 million.
Maintenance Expenses	Based on Company experience using an internal expense allocation methodology.	A 10% increase in future maintenance expenses would result in a reduction in DAC and VOBA, and an increase in current period amortization expense of \$2.5 million.

Separate Accounts

Separate account assets and liabilities arise from the sale of variable life insurance and annuity products. The separate account represents funds segregated for the benefit of certain policyholders who bear the investment risk. The assets are legally segregated and are not subject to claims which may arise from any other business of the Company. The separate account assets and liabilities, which are equal, are recorded at fair value. Policyholder account deposits and withdrawals, investment income and realized investment gains and losses are excluded from the amounts reported in the Consolidated Statements of Income. Revenues to the Company from separate accounts consist principally of contract charges, which include maintenance charges, administrative fees and mortality and risk charges.

The total separate account assets were \$315.4 million as of September 30, 2008. Variable life and variable annuity assets comprised 30% and 70% of this amount, respectively. Two guarantees are offered under variable life and variable annuity contracts: a guaranteed minimum death benefit rider is available on certain variable universal life contracts and guaranteed minimum death benefits are provided on variable annuities. The guaranteed minimum death benefit rider for variable universal life contracts guarantees the death benefit for specified periods of time, regardless of investment performance, provided cumulative premium requirements are met. The Company introduced a guaranteed minimum withdrawal benefit (GMWB) rider in 2007 that can be added to new or existing variable annuity contracts. The rider provides a minimum guarantee that the owner can make annual withdrawals equal to 5% of the initial annuity deposit for twenty years, or for life if withdrawals are started at age 65 or later, regardless of market returns. The value of variable annuity separate accounts with the GMWB rider was \$28.1 million and the liability was \$32.2 million at September 30, 2008. The value of the GMWB rider is recorded at fair value. The change in this liability is included in policyholder benefits in the Consolidated Statements of Income.

Future Policy Benefits

The Company establishes liabilities for amounts payable under insurance policies, including traditional life insurance, annuities and accident and health insurance. Generally, amounts are payable over an extended period

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited)-Continued

of time. Liabilities for future policy benefits of traditional life insurance have been computed by a net level premium method based upon estimates at the time of issue for investment yields, mortality and withdrawals. These estimates include provisions for experience less favorable than initially expected.

Liabilities for future policy benefits of immediate annuities and supplementary contracts with life contingencies are also computed by a net level premium method, based upon estimates at the time of issue for investment yields and mortality.

Liabilities for future policy benefits of accident and health insurance represent estimates of payments to be made on reported insurance claims, as well as claims incurred but not yet reported. These liabilities are estimated using actuarial analyses and case basis evaluations that are based upon past claims experience, claim trends and industry experience.

Policyholder Account Balances

Policyholder account balances include universal life insurance, fixed deferred annuity contracts and investment-type contracts. Liabilities for these policyholder account balances are included without reduction for potential surrender charges and deferred front-end contract charges. The account balances for universal life contracts are equal to cumulative premiums, less contract charges and withdrawals, plus interest credited. The account balances for fixed deferred annuities and investment-type contracts are equal to the cumulative deposits, less any applicable contract charges and withdrawals, plus interest credited. Front-end contract charges are amortized over the term of the policies. Policyholder benefits incurred in excess of related policyholder account balances are charged to policyholder benefits expense. Interest on policyholder account balances is credited as earned.

Recognition of Revenues

Premiums for traditional life insurance products are reported as revenue when due. Premiums on accident and health, disability and dental insurance are reported as earned ratably over the contract period in proportion to the amount of insurance protection provided. A reserve is provided for the portion of premiums written which relate to unexpired terms of coverage.

Deposits related to universal life, fixed deferred annuity contracts and investment-type products are credited to policyholder account balances. Revenues from such contracts consist of amounts assessed against policyholder account balances for mortality, policy administration and surrender charges, and are recognized in the period in which the benefits and services are provided. The cash flows from deposits are credited to policyholder account balances. Deposits are not recorded as revenue under FASB Statement No. 97, "Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments." Deposits are shown as a Financing Activity in the Consolidated Statements of Cash Flows.

The Company measures its sales or new business production with two components: new premiums recorded and new deposits received. Premiums and deposits are subdivided into two categories: new and renewal. New premiums and deposits are measures of sales or new business production. Renewal premiums and deposits occur as continuing business from existing customers.

Reinsurance

Reinsurance is one of the tools that the Company uses to accomplish its business objectives. A variety of reinsurance vehicles are currently in use, including individual and bulk arrangements on both coinsurance and mortality/morbidity only basis. Reinsurance supports a multitude of corporate objectives, including managing statutory capital, reducing volatility and surplus strain. At the customer level, reinsurance increases the Company's capacity, provides access to additional underwriting expertise, and generally makes it possible for the Company to offer products at competitive levels that could not otherwise be made available. Reinsurance is an actively managed tool that has increased in importance over recent years and will continue to play a role in the Company's future. Reinsurance receivables include amounts related to paid benefits and estimated amounts related to unpaid policy and contract claims, future policy benefits and policyholder account balances.

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited)-Continued

2. NEW ACCOUNTING PRONOUNCEMENTS

In September 2005, the Accounting Standards Executive Committee of the American Institute of Certified Public Accountants (AcSEC) issued Statement of Position 05-1 (SOP 05-1), "Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts". SOP 05-1 provides guidance on accounting by insurance enterprises for deferred acquisition costs on internal replacements of insurance contracts other than those specifically described in Statement of Financial Accounting Standards (SFAS) No. 97, "Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments". SOP 05-1 defines an internal replacement as a modification in product benefits, features, rights, or coverages that occurs by exchange of a contract for a new contract, or by amendment, endorsement, or rider to a contract, or by the election of a feature or coverage within a contract. SOP 05-1 became effective for internal replacements occurring in fiscal years beginning after December 31, 2006. Retrospective application of SOP 05-1 to previously issued consolidated financial statements was not permitted. SOP 05-1 was adopted on January 1, 2007, with no material impact to the consolidated financial statements.

In June 2006, the Financial Accounting Standards Board (FASB) issued Interpretation 48 "Accounting for Uncertainty in Income Taxes" (FIN 48). FIN 48 applies to all uncertain tax positions accounted for under SFAS No. 109 "Accounting for Income Taxes". FIN 48 addresses whether tax positions taken or to be taken on tax returns should be reflected in the financial statements before they are resolved with the appropriate taxing authority. Previous statements provided no specific guidance related to such positions. FIN 48 was adopted on January 1, 2007, with no material impact to the consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS 157). SFAS 157 provides a single definition of fair value, together with a framework for measuring it, and requires additional disclosure about the use of fair value to measure assets and liabilities. SFAS 157 also emphasizes that fair value is a market-based measurement, not an entity-specific measurement, and established a fair value hierarchy with the highest priority being the quoted price in active markets. SFAS 157 amended SFAS 107, "Disclosure about Fair Value of Financial Instruments." This statement became effective for years beginning after November 15, 2007. The Company adopted SFAS 157 on January 1, 2008 with no material impact to the unaudited interim consolidated financial statements. Please see Note 3 – Fair Values for added disclosures pertaining to SFAS 157.

In October 2008, the FASB issued FASB Staff Position (FSP) No. 157-3, "Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active" (FSP FAS 157-3). FSP FAS 157-3 clarifies the application of FASB Statement No. 157 *Fair Value Measurements*, in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. The Company adopted FSP FAS 157-3 on issuance, applicable to the third quarter 2008 financial statements.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115" (SFAS 159). SFAS 159 permits an entity to measure certain financial assets and liabilities at fair value. Under SFAS 159, entities that elect the fair value option will report unrealized gains and losses in earnings at each subsequent reporting date. The fair value option may be elected on an instrument-by-instrument basis, with a few exceptions, as long as it is applied to the instrument in its entirety. Once adopted, the fair value option election is irrevocable, unless a new election date occurs. This statement became effective for years beginning after November 15, 2007. Upon the adoption of SFAS 159, the Company was also required to adopt SFAS 157 concurrently. The Company adopted SFAS 159 on January 1, 2008 with no material impact to the unaudited interim consolidated financial statements. Please see Note 3 – Fair Values for additional information pertaining to SFAS 159.

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities" (SFAS 161). This statement amends and expands the disclosure requirements of Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. SFAS 161 requires companies with derivative instruments to disclose information about how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under Statement 133, and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. This statement shall be effective for financial statements issued for fiscal years beginning after November 15, 2008.

11

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited)-Continued

The Company is currently evaluating the impact of this statement but does not believe that it will have a material impact on the consolidated financial statements.

In May 2008, the FASB issued SFAS No. 162, "The Hierarchy of Generally Accepted Accounting Principles" (SFAS 162). SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements. This statement shall be effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board (PCAOB) amendments to AU Section 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*. The Company plans to adopt SFAS 162 on issuance, but does not believe that it will have a material impact on the consolidated financial statements.

In May 2008, the FASB issued SFAS No. 163, "Accounting for Financial Guarantee Insurance Contracts" (SFAS 163). SFAS 163 clarifies how FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, applies to financial guarantee insurance contracts, including the recognition and measurement of premium revenue and claim liabilities. This statement also requires expanded disclosures about financial guarantee insurance contracts. This statement shall be effective for financial statements issued for fiscal years beginning after December 15, 2008. The Company has evaluated the impact of the implementation of SFAS 163 and believes that the statement is not applicable to the Company as it does not sell financial guarantee insurance contracts.

All other Standards and Interpretations of those Standards issued during the nine months ended September 30, 2008 did not relate to accounting policies and procedures pertinent to the Company at this time.

3. FAIR VALUES

Fair Values Hierarchy

Effective January 1, 2008, in accordance with SFAS 159, the Company elected to not measure financial assets and liabilities at fair value other than those already prescribed, such as securities available for sale, securities identified in trading portfolios and certain derivatives and hedging activity that the Company participates in.

In accordance with SFAS 157, the Company groups its financial assets and liabilities measured at fair value in three levels, based on the inputs and assumptions used to determine the fair value. These levels are as follows:

Level 1 – Valuations are based upon quoted prices for identical instruments traded in active markets. Level 1 assets include U. S. Treasury Notes and Bonds, other U. S. Government securities and certain common and preferred stocks that are traded by dealers or brokers in active markets.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Level 2 – Valuations are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market. Valuations are obtained from third party pricing services or inputs that are observable or derived principally from or corroborated by observable market data.

Level 3 – Valuations are generated from techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company's assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of option pricing models, discounted cash flow models, spread-based models, and similar techniques, using the best information available in the circumstances.

Determination of Fair Value

Under SFAS 157, the Company bases fair values on the price that would be received to sell an asset (exit price) or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is the Company's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements, in accordance with the fair value hierarchy in SFAS 157.

Fair value measurements for assets and liabilities where there exists limited or no observable market data, are often calculated using the Company's own estimates, based on current interest rates, credit spreads, liquidity premium or discount, the economic and competitive environment, unique characteristics of the asset or liability and other pertinent factors. Therefore, the results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there may be inherent weaknesses in

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited)-Continued

any calculation technique. Further, changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results of current or future values.

The Company's own estimates of fair value are derived in a number of ways including, but not limited to: 1) pricing provided by brokers, where the price indicates reliability as to value; 2) fair values of comparable securities incorporating a spread adjustment for maturity differences, collateralization, credit quality, liquidity and other items, if applicable; 3) discounted cash flow models and margin spreads; 4) bond yield curves; 5) Trace trade quotes; 6) observable market prices and exchange quotes not provided by our pricing service; 7) statement values provided to the Company by fund managers; and 8) option pricing models.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value and for estimating fair value for financial instruments not recorded at fair value in accordance with SFAS 107.

Assets

Securities Available for Sale

Securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are determined as described in the preceding paragraphs.

Short-Term Financial Assets

Short-term financial assets include cash and other short-term investments and are carried at historical cost. The carrying amount is a reasonable estimate of the fair value because of the relatively short time between the purchase of the instrument and its expected repayment or maturity.

Loans

The Company does not record loans at fair value. As such, valuation techniques discussed herein for loans are primarily for estimating fair value for SFAS 107 disclosure purposes.

The fair value estimates of mortgage loans and policy loans are calculated by discounting contractual cash flows using discount rates that are estimates of current pricing for loans with similar characteristics and remaining maturity.

Fair values of mortgage loans on real estate properties are calculated by discounting contractual cash flows, using discount rates based on current industry pricing or the Company's estimate of an appropriate risk-adjusted discount rate for loans of similar size, type, remaining maturity and repricing characteristics.

The Company also has loans made to policyholders. These loans cannot exceed the cash surrender value of the policy. Fair value is calculated by discounting contractual cash flows, using discount rates based on the Company's estimate of appropriate risk-adjusted discount rates for these loans.

Liabilities

Investment-Type Liabilities Included in Policyholder Account Balances and Other Policyholder Funds

Fair values for liabilities under investment-type insurance contracts are based upon historical cost. The fair values of investment-type insurance contracts included with policyholder account balances for fixed deferred annuities and other policyholder funds for supplementary contracts without life contingencies are estimated to be their cash surrender values. In accordance with SFAS 107, the fair values of deposits with no stated maturity are equal to the amount payable on demand at the measurement date.

Notes Payable

All of the amounts included within Notes Payable were in short-term borrowings at September 30, 2008 and December 31, 2007. The carrying amount of these borrowings was a reasonable estimate of fair value because of the relatively short time between the origination of the borrowings and their expected repayment and maturities. See Note 6 - Notes Payable for an explanation of the terms of the debt outstanding.

Kansas City Life Insurance Company**Notes to Consolidated Financial Statements (Unaudited)-Continued***Categories Reported at Fair Value*

The following table presents categories reported at fair value on a recurring basis. See page 12 for a discussion of definitions of the levels included in this table.

	September 30, 2008			
	Total	Level 1	Level 2	Level 3
Fixed maturities and equity securities available for sale	\$ 2,459,452	\$ 29,477	\$ 2,330,156	\$ 99,819
Total	\$ 2,459,452	\$ 29,477	\$ 2,330,156	\$ 99,819
	December 31, 2007			
	Total	Level 1	Level 2	Level 3
Fixed maturities and equity securities available for sale	\$ 2,690,222	\$ 15,110	\$ 2,546,388	\$ 128,724
Total	\$ 2,690,222	\$ 15,110	\$ 2,546,388	\$ 128,724

The changes in Level 3 asset and liabilities measured at fair value on a recurring basis for the third quarters and nine months ended September 30, 2008 are summarized below:

	Quarter ended September 30 Securities Available For Sale	Nine Months ended September 30 Securities Available For Sale
Balance, beginning of period	\$ 106,172	\$ 128,724
Total gains or losses (realized and unrealized)		
Included in earnings	—	374
Included in other comprehensive loss	(2,452)	(6,357)
Purchases	3,634	8,527
Disposals	(9,545)	(35,175)
Transfers in	12,825	25,415
Transfers out	(10,831)	(21,573)
Non-trading activity	16	(116)
Balance, end of period	\$ 99,819	\$ 99,819
Net losses included in net loss relating to assets held at September 30, 2008	\$(2,505)	\$(5,553)

Kansas City Life Insurance Company**Notes to Consolidated Financial Statements (Unaudited)-Continued**

The table below is a summary of fair value estimates as of September 30, 2008 and December 31, 2007 for financial instruments, as defined by SFAS 107. In accordance with SFAS 107, the Company has not included assets and liabilities that are not financial instruments in this disclosure. The total of the fair value calculations presented do not represent, and should not be construed to represent, the underlying value of the Company.

	September 30, 2008		December 31, 2007	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Investments:				
Fixed maturity and equity securities available for sale	\$2,459,452	\$2,459,452	\$2,690,222	\$2,690,222
Mortgage loans	444,920	444,087	450,148	464,211
Policy loans	89,209	89,209	92,803	92,803
Cash and short-term investments	38,147	38,147	48,680	48,680
Liabilities:				
Individual and group annuities	959,080	939,286	987,014	963,626
Notes payable	7,555	7,555	10,400	10,400
Supplementary contracts without life contingencies	62,716	57,654	67,258	67,296

4. UNREALIZED LOSSES ON SECURITIES

The Company reviews all security investments, specifically assesses all investments with greater than 10% declines in fair value and, in general, monitors all security investments as to ongoing risk. These risks are fundamentally evaluated through both a qualitative and quantitative analysis of the issuer. The Company prepares a formal review document no less often than quarterly of all investments with greater than 20% declines in fair value for six months or more, investments that have previously been written down and that remain in an unrealized loss position, and selected investments that have changed significantly from a previous period and that have a decline in fair value greater than 10% of amortized cost.

The Company has a policy and process in place to identify securities that could potentially have an impairment that is other-than-temporary. This process involves monitoring market events and other items that could impact issuers. The evaluation includes but is not limited to such factors as the issuer's stated intent and ability to make all principal and interest payments when due, near-term business prospects, cash flow and liquidity, credit ratings, business climate, management changes and litigation and government actions. This process also involves monitoring several factors including late payments, downgrades by rating agencies, key financial ratios, financial statements, revenue forecasts, asset quality and cash flow projections, as indicators of credit issues.

The Company considers relevant facts and circumstances in evaluating whether the impairment of a security is other-than-temporary. Relevant facts and circumstances considered include but are not limited to: (1) the current fair value of the security as compared to cost; (2) the extent and

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

the length of time the fair value has been below cost; (3) the financial position of the issuer, including the current and future impact of any specific events, material declines in the issuer's revenues, margins, cash positions, liquidity issues, asset quality, debt levels and income results; (4) consideration of information or evidence that supports timely recovery; and (5) other business factors related to the issuer's industry.

There are a number of significant risks and uncertainties inherent in the process of monitoring impairments and determining if an impairment is other-than-temporary. These risks and uncertainties include but are not limited to: (1) the risk that the Company's assessment of an issuer's ability to meet all of its contractual obligations will change based on changes in the credit characteristics of that issuer; (2) the risk that the economic outlook will be worse than expected or have more of an impact on the issuer than anticipated; (3) the risk that fraudulent information could be provided to the Company's credit, investment and accounting professionals who determine the fair value estimates and accounting treatment for securities; and (4) the risk that inaccurate or misleading

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited)-Continued

information could be provided to the Company's investment professionals who determine the fair value estimates. Any of these situations could result in a charge to income in a future period. If the Company determines that a security is other-than-temporarily impaired, the difference between amortized cost and fair value would be charged to income as a realized investment loss, resulting in a reduction to the cost basis of the underlying investment.

As of September 30, 2008, the Company had gross unrealized losses of \$173.0 million on investment securities, including fixed maturity and equity securities that had a fair value of \$1.7 billion. As of December 31, 2007, the Company had gross unrealized losses of \$47.0 million on investment securities, including fixed maturity and equity securities that had a fair value of \$1.3 billion. The increase in unrealized losses was primarily attributable to increased credit and liquidity risk discounts in the pricing of financial assets during the nine months ended September 30, 2008. Although these changes affected the broad financial markets, specific sectors, security issuers and security issues were affected differently.

The following table provides information regarding unrealized losses on fixed maturity and equity security investment securities available for sale, as of September 30, 2008.

	Less than 12 months		12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Bonds:

Total	\$ 1,199,444	\$ 92,244	\$ 489,672	\$ 80,778	\$ 1,689,116	\$ 173,022

¹ Federal agency securities are not backed by the full faith and credit of the U.S. Government.

All securities in the table are expected to continue to perform to the contractual terms, which may be at maturity.

As part of the required accounting for unrealized gains and losses, the Company also adjusts the DAC and VOBA assets to recognize the adjustment to those assets as if the unrealized gains and losses from securities classified as available-for-sale actually had been realized.

16

Kansas City Life Insurance Company**Notes to Consolidated Financial Statements (Unaudited)-Continued****5. COMPREHENSIVE INCOME (LOSS)**

Comprehensive loss for the third quarter of 2008 was \$37.6 million, which consisted of net loss of \$15.2 million and other comprehensive loss of \$22.4 million. The increase in other comprehensive loss was largely due to an increase in unrealized losses, which was primarily attributable to increased credit and liquidity risk discounts in the pricing of financial assets during the quarter ended September 30, 2008. Although these changes affected the broad financial markets, specific sectors, security issuers and security issues were affected differently. Comprehensive income for the third quarter of 2007 was \$19.7 million, which consisted of net income of \$9.1 million and other comprehensive income of \$10.6 million. The other comprehensive income was due primarily to an increase in unrealized investment gains as a result of a decrease in interest rates during the quarter.

Comprehensive loss was \$83.7 million for the nine months ended September 30, 2008, which consisted of net loss of \$9.9 million and other comprehensive loss of \$73.8 million. Comprehensive income was \$18.6 million for the nine months ended September 30, 2007, which consisted of net income of \$29.2 million and other comprehensive loss of \$10.6 million. The change in other comprehensive loss in 2008 versus 2007 was due primarily to an increase in unrealized losses, primarily attributable to increased credit and liquidity risk discounts in the pricing of financial assets.

6. NOTES PAYABLE

The following table provides information for Notes Payable.

	September 30 2008	December 31 2007
Federal Home Loan Bank (FHLB) loans with various maturities and a weighted average interest rate, currently 2.28% , (4.87% at December 31, 2007) secured by mortgage-backed securities totaling \$123,475 (\$135,355 at December 31, 2007).	\$ 7,555	\$ 10,400
	\$ 7,555	\$ 10,400

As a member of the FHLB with a capital investment of \$5.3 million, the Company has the ability to borrow on a collateralized basis from the FHLB. The Company received dividends on the capital investment in the FHLB of \$0.1 million in the third quarter of 2008 and \$0.3 million in the nine-month period ended September 30, 2008. Dividends received in the third quarter of 2007 were \$0.1 million and \$0.2 million in the nine-month period ended September 30, 2007.

The Company has unsecured revolving lines of credit of \$60.0 million with two major commercial banks with no balances outstanding and which are at variable interest rates, currently 2.70%. Lines of credit totaling \$20.0 million will expire in May of 2009 and the remaining \$40.0 million will expire in November of 2008. The Company anticipates renewing these lines as they come due.

All borrowings are used to enhance liquidity and investment strategies. Notes payable of \$2.1 million and \$5.5 million mature and are due in 2008 and 2009, respectively.

7. INCOME PER SHARE

Due to the Company's capital structure and the absence of other potentially dilutive securities, there is no difference between basic and diluted earnings per common share for any of the periods reported. The average number of shares outstanding was 11,518,053 and 11,842,494 for the quarters ended September 30, 2008 and 2007, respectively. The average number of shares outstanding was 11,605,979 and 11,851,906 for the nine months ended September 30, 2008 and 2007, respectively.

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited)-Continued

8. INCOME TAXES

The third quarter income tax benefit was \$8.3 million or 35% of income before tax for 2008, versus an income tax expense of \$3.8 million or 29% of income before tax for the prior year period. The income tax benefit for the nine months ended September 30, 2008 was \$5.7 million or 36% of income before tax for 2008, versus \$12.5 million or 30% of income before tax for the prior year period.

The effective income tax rate in the third quarter of 2008 was equal to the prevailing corporate federal income tax rate of 35%, primarily due to the benefit of a reduction in the income tax contingency being equally offset by prior year taxes. The impact of reducing the income tax contingency was a benefit of approximately 1% of income before tax. The impact of the true-up of prior year taxes was an expense of approximately 1% of income before tax. The effective income tax rate in the third quarter of 2007 was lower than the prevailing corporate federal income tax rate of 35% primarily due to income tax credits generated from the Company's investments in affordable housing. The effect of the affordable housing tax credits on the effective tax rate in the third quarter of 2008 was a benefit of approximately 2% of income before tax.

The effective tax rate in the nine months ended September 30, 2008 was greater than the prevailing corporate federal income tax rate of 35% due to a 3% rate benefit resulting primarily from dividends received deduction, a reduction in tax contingency and affordable housing tax credits, partially offset by a 2% decrease in rate benefit resulting from prior year taxes. The effective income tax rate in the nine months ended September 30, 2007 was lower than the prevailing corporate federal income tax rate of 35% primarily due to income tax credits generated from the Company's investments in affordable housing. The effect of the affordable housing tax credits on the effective tax rate in the nine months of 2007 was a benefit of approximately 2% of income before tax.

9. SEGMENT INFORMATION

The Company has three reportable business segments, which are defined based on the nature of the products and services offered: Individual Insurance, Group Insurance and Old American. The Individual Insurance segment consists of individual insurance products for both Kansas City Life and Sunset Life. The Individual Insurance segment is marketed through a nationwide sales force of independent general agents. The Group Insurance segment consists of sales of group life, dental, vision and disability products. This segment is marketed through a nationwide sales force of independent general agents, group brokers and third-party marketing arrangements. Old American consists of individual insurance products designed primarily as final expense products. These products are marketed through a nationwide general agency sales force with exclusive territories, using direct response marketing to supply agents with leads.

Separate investment portfolios are maintained for each of the three life insurance companies of the Company. However, investment assets and income are allocated to the Group Insurance segment based upon its cash flows and future policy benefit liabilities. Home office functions are fully integrated for all segments in order to maximize economies of scale. Therefore, operating expenses are allocated to the segments based upon internal cost studies, which are consistent with industry cost methodologies.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Inter-segment revenues are not material. The Company operates in the United States and no individual customer accounts for 10% or more of the Company's revenue.

Kansas City Life Insurance Company**Notes to Consolidated Financial Statements (Unaudited)-Continued**

The following schedule provides the financial performance of each of the three reportable operating segments of the Company.

		Individual <u>Insurance</u>	Group <u>Insurance</u>	Old <u>American</u>	Intercompany <u>Eliminations</u> ¹	<u>Total</u>
Insurance revenues:						
Third quarter:	2008	\$ 31,214	\$ 12,268	\$ 15,446	\$ (119)	\$ 58,809
	2007	31,215	11,348	15,495	(149)	57,909
Nine months:	2008	\$ 94,384	\$ 36,235	\$ 46,175	\$ (415)	\$ 176,379
	2007	93,168	34,142	46,870	(450)	173,730
Net investment income:						
Third quarter:	2008	\$ 41,057	\$ 134	\$ 3,146	\$ —	\$ 44,337
	2007	43,416	132	3,321	—	46,869
Nine months:	2008	\$ 126,393	\$ 389	\$ 9,634	\$ —	\$ 136,416
	2007	132,336	319	9,969	—	142,624
Net income (loss):						
Third quarter:	2008	\$ (14,290)	\$ (471)	\$ (417)	\$ —	\$ (15,178)
	2007	8,602	(553)	1,082	—	9,131
Nine months:	2008	\$ (8,483)	\$ (1,550)	\$ 134	\$ —	\$ (9,899)
	2007	27,035	(1,114)	3,328	—	29,249

¹ Elimination entries to remove intercompany transactions for life and accident and health insurance were as follows: insurance revenues from the Group Insurance segment and operating expenses from the Individual Insurance segment were eliminated to arrive at Consolidated Statements of Income.

10. PENSIONS AND OTHER POSTRETIREMENT BENEFITS

Net periodic benefit cost	\$ 1,358	\$ 1,469	\$ 1,446	\$ 1,468

11. SHARE-BASED PAYMENT

The Company has a long-term incentive plan for senior management that awards participants for the increase in the share price of the Company's common stock through units (phantom shares) assigned by the Board of Directors. The awards are calculated over three-year intervals on a calendar year basis. At the conclusion of each three-year interval, participants will receive awards based on the increase in the share price during a defined measurement period, times the number of units. The increase in the share price will be determined based on the change in the share price from the beginning to the end of the three-year interval. Dividends are accrued and paid at the end of each three-year interval to the extent that they exceed negative stock price appreciation. Plan payments are contingent on the continued employment of the participant unless termination is due to a qualifying event such as death, disability or retirement.

The plan made a payment of \$0.1 million to plan participants for the three-year interval ended December 31, 2007 during the first nine months of 2008. A payment of \$1.0 million was made in the first nine months of 2007 for the three-year interval ended December 31, 2007. No payments were made in the third quarters of 2008 or 2007.

At each reporting period, an estimate of the share-based compensation expense is accrued, utilizing the share price at the period end. The cost of compensation accrued as an operating expense was \$1.4 million in the third quarter of 2008 and the associated tax benefit was \$0.5 million. The cost of compensation credited as an operating expense in the third quarter of 2007 was \$0.2 million, with an associated tax expense of less than \$0.1 million. The cost of compensation accrued as an operating expense for the nine-month period ended September 30, 2008 was \$1.8 million, with an associated tax benefit of \$0.6 million. The cost of compensation credited as an operating expense for the nine-month period ended September 30, 2007 was \$0.3 million, with an associated tax expense of \$0.1 million.

12. COMMITMENTS

In the normal course of business, the Company has open purchase and sale commitments. At September 30, 2008, the Company had purchase commitments to fund mortgage loans and other investments of \$5.4 million. Subsequent to September 30, 2008, the Company entered into commitments to fund additional mortgage loans of \$0.3 million and to complete sale commitments of \$0.7 million.

13. CONTINGENT LIABILITIES

The life insurance industry, including the Company, has been subject to an increase in litigation in recent years. Such litigation has been pursued on behalf of purported classes of policyholders and other claims and legal actions in jurisdictions where juries often award punitive damages, which are grossly disproportionate to actual damages.

Although no assurances can be given and no determinations can be made at this time, management believes that the ultimate liability, if any, with respect to these claims and actions, would have no material effect on the Company's business, results of operations or financial position.

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited)-Continued

14. GUARANTEES AND INDEMNIFICATIONS

The Company is subject to various indemnification obligations issued in conjunction with certain transactions, primarily assumption reinsurance agreements, stock purchase agreements, mortgage servicing agreements, construction and lease guarantees and borrowing agreements whose terms range in duration and often are not explicitly defined. Generally, a maximum obligation is not explicitly stated. Therefore, the overall maximum amount of the obligation under the indemnifications cannot be reasonably estimated. While we are unable to estimate with certainty the ultimate legal and financial liability with respect to these indemnifications, we believe the likelihood is remote that material payments would be required under such indemnifications. The Company believes that such indemnifications would not result in a material adverse effect on the financial position or results of operations.

15. SUBSEQUENT EVENT

Subsequent to September 30, 2008, the credit and liquidity crisis in the United States and throughout the global financial system continued to generate substantial volatility in the financial markets and the banking system. Should this environment and similar events continue, such subsequent events could have a significant impact on the Company's investment portfolio. The Company has continued to monitor this subsequent event activity and has concluded that the assessment of other-than-temporary impairment as of September 30, 2008 has not changed.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Except as otherwise noted, amounts are stated in thousands, except share data.

Management's Discussion and Analysis of Financial Condition and Results of Operations is intended to provide in narrative form the perspective of the management of Kansas City Life Insurance Company (the Company) on its financial condition, results of operations, liquidity and certain other factors that may affect its future results. The following is a discussion and analysis of the results of operations for the third quarter and nine months ended September 30, 2008 and 2007 and the financial condition of the Company as of September 30, 2008. This discussion should be read in conjunction with the consolidated financial statements and accompanying notes included in this document, as well as the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

Overview

Kansas City Life Insurance Company is a financial services company that is predominantly focused on sales and administration of life and annuity insurance products. The Company primarily consists of three life insurance companies. Kansas City Life Insurance Company (Kansas City Life) is the parent company. Sunset Life Insurance Company of America (Sunset Life) and Old American Insurance Company (Old American) are wholly-owned subsidiaries.

Kansas City Life markets individual insurance products, including traditional, interest sensitive and variable products through a nationwide sales force of independent general agents and third-party marketing arrangements. Kansas City Life also markets group insurance products, which include life, dental and disability products through a nationwide sales force of independent general agents, group brokers and third-party marketing arrangements. Kansas City Life operates in 48 states and the District of Columbia.

Sunset Life is a life insurance company that maintains its current block of business, but does not produce new sales. Sunset Life is included in the Individual Insurance segment and its individual insurance products include traditional and interest sensitive products. Sunset Life operates in 43 states and the District of Columbia.

Old American sells final expense insurance products nationwide through a general agency system, with exclusive territories, using direct response marketing to supply agents with leads. Old American's administrative and accounting operations are part of the Company's home office but it operates and maintains a separate and independent field force. Old American operates in 46 states and the District of Columbia.

The Company operates in the life insurance sector of the financial services industry in the United States. This industry is highly competitive with respect to pricing, selection of products and quality of service. No single competitor or any small group of competitors dominates any of the markets in which the Company operates. General economic conditions may affect future results. Interim results are not necessarily indicative of results for the entire year and should be read in conjunction with the Company's 2007 Annual Report on Form 10-K, as filed with the Securities and Exchange Commission.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The Company earns revenues primarily from premiums received from the sale of life, annuity and accident and health policies, from earnings on its investment portfolio and from the sale of investment assets. For financial statement purposes, revenues from the sale of traditional life insurance and annuity products and supplemental contracts with life contingencies are reported as premium income. Considerations for supplemental contracts with life contingencies are reported as part of other revenues. However, deposits received from the sale of interest sensitive products, namely universal life insurance products, deferred annuities, and annuities and supplemental contracts without life contingencies are not reported as premium revenues, but are instead reported as additions to the policyholders' account balances and are reflected as deposits in the Statements of Cash Flows. Accordingly, revenues on these products are recognized over time in the form of contract charges assessed against policyholder account balances, charges assessed on the early surrender of policyholder account balances and other charges deducted from policyholders' balances.

The Company's profitability depends on many factors, which include but are not limited to:

- The sales of life, annuity, and accident and health products;
- The rate of morbidity, disability and incurrence of other policyholder benefits;
- The rate of mortality, lapse and surrenders of future policy benefits and policyholder account balances;
- Persistency of existing insurance policies;
- Interest rates credited to policyholders;
- The effectiveness of reinsurance programs;
- The amount of investment assets under management;
- Investment spreads earned on policyholder account balances;
- The ability to maximize investment returns and minimize risks such as interest rate risk, credit risk and equity risk;
- Timely and cost-effective access to liquidity;
- Management of distribution costs and operating expenses.

Strong competition presents a challenge from a new sales perspective. However, the Company's continued focus is on delivering competitive products, superior customer service, financial strength and superior sales and marketing support to customers and agents. The Company places an emphasis on expanding sales of individual life insurance products.

The Company generates cash largely through premiums and deposits collected through the sale of insurance products, through the sale of universal life-type and deposit-type products and through investment activity. The principal uses of cash are for the insurance operations, including the purchase of investments, payment of insurance benefits, operating expenses, dividends, income taxes, withdrawals from policyholder accounts and costs related to acquiring new business.

Starting in 2007 and continuing into 2008, negative market conditions have significantly impacted the financial markets and accordingly, the Company's investments and revenues. The interest rate and credit environment continues to present a significant challenge to the markets as a whole and specifically to companies invested in fixed maturity and equity securities. These negative conditions may persist into the future as the credit and equity markets continue to be severely challenged, particularly in the financial services sector. The Company is broadly diversified and has high quality investments, as 94% of all fixed maturity securities were investment grade at September 30, 2008. However, as a result of the consolidations currently occurring in the financial services sector, diversification in this sector will be a challenge until greater market stabilization occurs. In addition, the U.S. Government's entrance into private company arrangements and specific guarantees may add further complications to a variety of issues, yet to be fully determined.

The largest factor in the lower net income for the third quarter of 2008 compared to the third quarter of 2007 was realized investment losses. The Company had a net realized loss of \$29.3 million in the third quarter of 2008 compared to a \$1.3 million net realized gain in the third quarter of 2007. In the third quarter of 2008, write-downs of investments due to the recognition of other-than-temporary impairments totaled \$32.5 million. There were no investments written down for other-than-temporary impairments during the third quarter of 2007. The decline in net income for the first nine months of 2008 compared to the same period in 2007 was primarily due to realized investment losses. The Company had a net realized loss of \$37.6 million in the first nine months of 2008 compared to a \$6.5 million gain a year ago. Write-downs of other-than-temporarily impaired investments totaled \$42.7 million, for the first nine months of 2008, while no investments were written down during the first nine

months of 2007.

Significant Risks

The Company is subjected to a variety of risk factors that may affect current and future results. Risk factors and cautionary factors that may affect future results were identified in Item 1A. of the Company's 2007 Annual Report on Form 10-K, as filed with the Securities and Exchange Commission. Please refer to the Company's 2007 Form 10-K at the Company's website www.kclife.com. Risk factors that are specifically pertinent to the current-period financial statements are listed below.

23

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The Company's investments are subject to market and credit risks.

The Company's invested assets, primarily including fixed income securities, are subject to customary risks of credit defaults and changes in market values.

Interest rate fluctuations could negatively affect the Company's spread income or otherwise impact its business.

Because the profitability of fixed annuity and interest-sensitive whole life, universal life and fixed portion of variable universal life insurance business depends in part on interest rate spreads, interest rate fluctuations could negatively affect profitability. Changes in interest rates may reduce both the profitability from spread businesses and the return on invested capital.

Some of the Company's products, principally fixed annuities and interest-sensitive whole life, universal life and the fixed portion of variable universal life insurance, have interest rate guarantees that expose the Company to the risk that changes in interest rates will reduce the "spread," or the difference between the amounts the Company is required to credit to policyholders under contracts and the amounts earned by the Company on general account investments. Declines in spread or instances where the returns on the general account investments are not sufficient to support the interest rate guarantees on these products could have a material adverse effect on the results of operations.

The Company is entitled to reset the interest rates on fixed-rate annuities but only at limited, pre-established intervals. Because many of the Company's policies have guaranteed minimum interest or crediting rates, spreads could decrease and potentially become negative.

Increases in interest rates may cause increased surrenders and withdrawals of insurance products. These outflows may require investment assets to be sold at a time when the prices of those assets are lower because of the increase in market interest rates, which may result in realized investment losses.

Changes in interest rates may also impact the business in other ways. Lower interest rates may result in lower sales of certain of the Company's insurance products. Higher interest rates may create a less favorable environment for the origination of mortgage loans. Higher interest rates may also result in lower sales of variable products.

While the Company develops and maintains asset/liability management programs and procedures designed to mitigate the effect on spread income in rising or falling interest rate environments, no assurance can be given that changes in interest rates will not affect such spreads.

Equity market volatility could negatively impact the Company's business.

The amount of policy fees received from variable products is affected by the performance of the equity markets, increasing or decreasing as markets rise or fall. Equity market volatility can also affect the profitability of variable products in other ways, in particular as a result

of guarantees embedded in these products.

The Company's policy claims fluctuate from period to period, resulting in earnings volatility.

The Company's financial results may fluctuate from period to period due to fluctuations in policy claims incurred by the Company. However, the Company reinsures a significant amount of the mortality risk on fully underwritten and newly issued, individual life insurance contracts.

The Company could be forced to sell investments at a loss to meet policyholder withdrawals.

Many of the products offered by the Company allow policyholders and contract holders to withdraw their funds under defined circumstances. The Company manages liabilities and configures the investment portfolio so as to provide and maintain sufficient liquidity to support anticipated withdrawal demands and contract benefits and maturities. While the Company owns a significant amount of liquid assets, a certain portion of investment assets are relatively illiquid. If the Company experiences unanticipated withdrawal or surrender activity, the Company could exhaust all other sources of liquidity and be forced to liquidate other assets, perhaps on unfavorable terms. If the Company is forced to dispose of assets on unfavorable terms, it could have an adverse effect on the Company's financial condition.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The Company's results may be negatively affected should actual experience differ from management's assumptions and estimates.

In the conduct of business, the Company makes certain assumptions regarding the mortality, persistency, expenses, interest rates, tax liability, business mix, or other factors appropriate to the type of business it expects to experience in future periods. These assumptions are also used to estimate the amounts of deferred policy acquisition costs, value of business acquired, policy reserves and accruals, future earnings, and various components of the Company's balance sheet. These assumptions are used in the operations of the Company's business in making decisions crucial to the success of the Company, including the pricing of products and expense structures relating to products. The Company's actual experience, as well as changes in estimates are used to prepare the Company's income statements. To the extent the Company's actual experience varies from period to period, deviations in our financial statements will result.

Cautionary Statement on Forward-Looking Information

This report reviews the Company's financial condition and results of operations, and historical information is presented and discussed. Where appropriate, factors that may affect future financial performance are also identified and discussed. Certain statements made in this report include "forward-looking statements" that fall within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include any statement that may predict, forecast, indicate or imply future results, performance or achievements rather than historical facts and may contain words like "believe," "expect," "estimate," "project," "forecast," "anticipate," "plan," "will," "shall," and other words, phrases or expressions similar meaning.

Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those contemplated by the forward-looking statements. Factors that could cause the Company's future results to differ materially from expected results include, but are not limited to:

- Changes in general economic conditions, including the performance of financial markets and interest rates;
- Increasing competition and changes in customer behavior, which may affect the Company's ability to sell its products and retain business;
- Customer and agent response to new products, distribution channels and marketing initiatives;
- Fluctuations in experience regarding current mortality, morbidity, persistency and interest rates relative to expected amounts used in pricing the Company's products;
- Changes in assumptions related to deferred acquisition costs and the value of business acquired;
- Regulatory, accounting or tax changes that may affect the cost of, or the demand for, the Company's products or services;
- Unanticipated changes in industry trends and ratings assigned by nationally recognized rating organizations.

The Company cannot give assurances that such statements will prove to be correct. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results.

Consolidated Results of Operations

Summary of Results

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The Company incurred a net loss of \$15.2 million in the third quarter of 2008, compared to \$9.1 million in net income in the third quarter of 2007. Net loss per share was \$1.30 versus net income per share of \$0.77 in last year's third quarter. The net loss for the nine months was \$9.9 million, compared to last year's net income of \$29.2 million. Net loss per share was \$0.85, compared to \$2.47 net income per share one year ago.

The primary factor in the decline in the third quarter results was net realized investment losses, which totaled \$29.3 million in 2008 versus a \$1.3 million net investment gain in 2007. In addition, net investment income decreased \$2.5 million or 5%, policyholder benefits increased \$2.1 million or 5% and operating expenses increased \$4.6 million or 23% versus a year ago. Partially offsetting these, total insurance revenues increased \$0.9 million or 2%, other revenues increased \$1.6 million or 59% and interest credited to policyholder account balances decreased \$0.9 million or 4%.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The decline in net income for the nine months versus the same period one year ago largely resulted from realized investment losses. The Company had a net realized investment loss of \$37.6 million in 2008 versus a net realized investment gain of \$6.5 million in 2007. Net investment income decreased \$6.2 million or 4%, policyholder benefits increased \$8.2 million or 6% and operating expenses increased \$5.1 million or 8%. These were partially offset by a \$2.6 million or 2% increase in total insurance revenues and a \$3.0 million or 4% decrease in interest credited to policyholder account balances.

Sales

The Company measures sales in terms of new premiums and deposits. Premiums are included in insurance revenues in the Consolidated Statements of Income, while deposits are shown as a Financing Activity in the Consolidated Statements of Cash Flows. The first set of tables below reconciles premiums included in insurance revenues and provides detail by new and renewal business. New premiums are also detailed by product. The second set of tables reconciles deposits with the Consolidated Statements of Cash Flows and provides detail by new and renewal deposits by product.

The Company's marketing plan has been to focus its primary growth strategies on individual life insurance business in both the Individual Insurance and Old American segments. This growth strategy includes new premiums for individual life products and new deposits for universal life and variable universal life products. The marketing plan includes strategies to grow the business through its existing sales force and the addition of new agents and general agents. The Company believes that growth in both the number of general agents and agents is essential to this strategy. Accordingly, the Company has placed an emphasis on recruiting new general agents and agents over the past two years and providing more training and direct support within the field. In addition, the growth strategy also encourages a product mix that includes both life and annuity products.

The Company also markets a series of group products, as identified in the Group Insurance segment discussed below. These products include group life, dental and disability products. The primary growth strategies for this segment include increased productivity of the existing group representatives and continued expansion of the group distribution system. Further, growth is to be supported by the addition of new products to the portfolio, particularly voluntary-type products which tend to be more profitable.

Consolidated total premiums increased 4% in the third quarter versus the same period in the prior year as total new premiums increased 21% and total renewal premiums increased 1%. New premiums increased \$1.5 million, reflecting a \$0.7 million increase in both immediate annuity and group dental premiums. The increase in annuity premiums reflects changes in consumer preferences. New individual life premiums increased 9%, which includes an 11% increase in new premiums in the Old American segment. New group life premiums increased 19% and new group accident and health premiums increased 22%, the latter reflecting the increase in dental premiums.

Total premiums for the nine months increased 3% versus a year ago. Total new premiums increased 23% while total renewal premiums declined 1%. New premiums increased \$5.2 million, largely due to a \$3.5 million increase in immediate annuity premiums. The increase in annuity premiums reflects changes in consumer preferences. New individual life premiums increased 7%, which includes a 12% increase in new premiums in the Old American segment. The increase in new premiums at the Old American segment reflects a combination of product, compensation and distribution expansion. New group life premiums increased 45% and new group accident and health premiums increased 7%, the latter including a \$1.7 million or 35% increase in new dental premiums. These improvements reflect an increase in the number of sales representatives, the realignment of sales territories, and enhanced product features within the dental product line. The Company exited the stop loss market during 2006 but continued to process existing business until the stop loss contracts expired in 2007. Excluding this product line from 2007 premiums would result in a 5% increase in total premiums, a 37% increase in total new premiums and a 57% increase in new group accident and health premiums. The increase in new group accident and health premiums was largely due to the increase in group dental premiums. The slight decline in total renewal premiums was largely the result of a 2% decline in total individual life renewal premiums.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

	Quarter ended September 30

Total new deposits declined \$3.1 million or 16% in the third quarter and \$2.5 million or 5% in the nine months compared with the prior year. New universal life sales increased 4% in the third quarter but decreased 7% in the nine months. New variable universal life sales increased 4% in the third quarter but declined 20% in the nine months. New fixed deferred annuities decreased \$2.2 million or 25% in the third quarter and \$2.8 million or 13% in the nine months. New variable annuity deposits decreased \$1.0 million or 15% in the third quarter but increased \$1.2 million or 6% in the nine months. The declines reflect the difficult economic environment, increased competition, and the continued impact of alternative products in the marketplace. Renewal deposits increased \$0.4 million or 1% in the third quarter but decreased \$5.0 million or 5% in the nine months. For the third quarter, renewal universal life and fixed deferred annuity deposits increased, while variable annuity and variable universal life deposits decreased. For the nine months, renewal universal life, variable universal life and variable annuity deposits decreased while fixed deferred annuity deposits increased.

Insurance Revenues

Insurance revenues consist of premiums from traditional insurance products, and contract charges less reinsurance ceded. In the third quarter of 2008, total insurance revenues increased 2%, reflecting a 4% increase in total premiums. This was partially offset by a 3% decrease in contract charges and a 1% increase in reinsurance ceded. Total annuity premiums increased 41%, total individual life premiums increased 2% and total accident and health premiums increased 5%. Total group life premiums increased 7%. Total individual life premiums rose 4% from the Individual Insurance segment and declined 1% from the Old American segment. For the nine months, total insurance revenues increased 2% as premiums increased 3%, reinsurance ceded declined 3% and contract charges decreased 3%. The increase in premiums resulted from a 64% increase in total annuity premiums and a 1% increase in total accident and health premiums. Total individual life premiums declined 1% compared to one year ago and total group life premiums increased 7%. Total individual life premiums increased 1% from the Individual Insurance segment and declined 2% from the Old American segment.

Contract charges consist of fees charged on universal life-type, deposit-type or investment-type products. Total contract charges declined 3% in the both the third quarter and the nine months. Policy charges declined in both the third quarter and nine months, resulting from a decline in policyholder account balances and increased sales of certain products where the contract charges are not recognized in income immediately but are deferred as unearned revenues and are amortized into income similar to the amortization of deferred acquisitions costs (DAC). Another contributing factor in the decrease in year-to-date contract charges was the unlocking of DAC assumptions in the second quarter of 2008, which further reduced current period recognition of these revenues. The resulting increase in unearned revenues will be recognized into income in proportion to the expected future gross profits of the business.

Reinsurance ceded increased 1% in the third quarter but decreased 3% in the nine months. The decrease in the nine months was largely due to a reduction in reinsurance ceded on group products, largely due to the elimination of the stop loss business. The decline in stop loss reinsurance totaled \$2.1 million for the nine months. Reinsurance ceded also declined in the Old American segment, reflecting the runoff of a large closed block of reinsured business.

Investment Revenues

Net investment income declined 5% in the third quarter and 4% in the nine months compared with the same periods one year ago. Net investment income results were primarily impacted by changes in the Company's invested asset base and yields available on the portfolio. In addition, expenses associated with investment income declined, impacting results.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Gross investment income in the third quarter declined \$3.3 million or 7% compared with the same period in 2007. This decrease primarily resulted from a \$1.9 million decline in gross investment income on reduced investment assets and a \$1.4 million decline from lower investment yields. Gross investment income in the nine months declined \$6.4 million or 4% compared with a year ago. This decrease primarily resulted from a \$5.7 million decline in gross investment income on reduced investment assets. Gross investment income decreased \$0.7 million as a result of decreased yields. The decline in yields includes reductions due to lower rate resets of floating rate notes, maturities and calls on securities with yields greater than the portfolio average and reduced returns on non-fixed-

maturity investments. The decline in investment assets reflects declines in book value largely resulting from a decline in asset values.

Investment expenses decreased \$0.7 million or 22% for the third quarter and \$0.2 million or 3% for the nine months. The decrease in the third quarter was primarily due to a decrease in real estate investment expenses. The decrease for the nine months was largely the result of a \$0.9 million decrease in real estate investment expenses that was partially offset by a \$0.5 million increase in interest expense on short-term borrowed money. The Company has an investment in the Federal Home Loan Bank from which it is allowed to borrow money at favorable interest rates. The Company periodically borrows and subsequently reinvests these proceeds in higher-yielding investments. The Company had increased its borrowings during the first quarter of 2008 and subsequently reduced these borrowings.

The Company recorded net realized investment losses of \$29.3 million in the third quarter of 2008 compared with \$1.3 million in net investment gains in the third quarter of 2007. Investment losses of \$32.5 million were due to write-downs of certain investment securities that were considered other-than-temporarily impaired. These were partially offset by \$1.4 million of investment gains realized on securities called. The financial sector has been hit hard by economic pressures and sub-prime residential mortgage issues. These pressures have resulted in large price dislocations that have affected many securities and companies in the financial sector. The realized investment gains in the third quarter of 2007 were largely due to sales of real estate properties, which generated gains of \$1.2 million.

Net realized investment losses for the nine months totaled \$37.6 million in 2008 compared to \$6.5 million in net realized investment gains in 2007. Investment losses of \$42.7 million were due to write-downs of investment securities during the nine months, \$32.5 million from the third quarter and \$10.2 million from the second quarter. These were partially offset by \$0.7 million of investment gains realized on the sale of real estate and \$2.6 million of investment gains realized on securities called put and other. The net realized investment gain in the nine months of 2007 was largely due to the sale of real estate properties, which generated realized investment gains of \$4.7 million, \$1.9 million gain from the sale of Generations Bank and \$0.5 million in net gains realized on investment securities called put and other.

The Company's analysis of securities for the quarter ended September 30, 2008 resulted in the determination that ten fixed-maturity issuers (twelve specific securities) had other-than-temporary impairments and were written down by a combined \$32.5 million in the third quarter. The total fair value of the affected securities after the write-downs was \$17.9 million. No other-than-temporary impairments were identified during the third quarter of 2007.

Following is a description of the securities that were written down during the third quarter of 2008. 1) Two of the securities were preferred stocks of government-sponsored agencies that were written down by a total of \$6.5 million. These entities buy and hold mortgages and issue and sell guaranteed mortgage-backed securities to facilitate housing ownership. They are now operated in conservatorship by the U.S. government and their existing common and preferred stock securities are severely diluted. Dividend payments have been suspended, driving the fair value of these securities down. 2) Two securities from the same issuer were from an investment banking firm that filed for bankruptcy during the third quarter of 2008 and was written down by a total of \$9.2 million. This firm was part of the financial industry that was hit hard by the mortgage credit crisis. After a severe decline in equity valuations, the inability to obtain short-term funding and the failure to find an acquirer forced this firm to file for Chapter 11 bankruptcy. 3) Two securities were collateralized debt obligations (CDOs) that were written down by a total of \$5.1 million. These securities have been impacted by the rapid rise in delinquencies and foreclosures in the sub-prime and alt-a mortgage markets, along with a decline in the fair value of securities issued by financial institutions. Ongoing CDO liquidations and investor selling have caused extreme declines in market valuations, regardless of individual security performance. 4) Two securities, one issuer a parent organization of the other, are financial guarantee insurance companies that provide credit enhancement for bond issuers as well as investment management services and were written down by a total of \$4.9 million. These issuers have also experienced declines in value related to the mortgage credit crisis and have recently been downgraded to a negative outlook. 5) One security was from the auto industry and is a supplier of auto parts for light trucks and sport-utility vehicles. The deteriorating truck and sport-utility vehicle markets of the auto industry combined with the sharp decline in value and recent ratings declines resulted in a \$2.1 million write-down. 6) One security was written down \$1.1 million as continued price deterioration occurred on this security that was previously written down. This issuer is primarily in the radio and advertising business. 7) One security provides custom-tailored financing to private and corporate owners of real estate nationwide. This security had a recent rating decline to below investment grade status combined with continued price deterioration and was written down \$2.8 million. 8) One security was a bank holding company that recently filed for bankruptcy. This holding company was the parent of a large nationwide bank that was recently taken over by

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

the Office of Thrift Supervision who appointed the Federal Deposit Insurance Corporation (FDIC) as its receiver. As a result of the bankruptcy filing, this security was written down \$0.8 million.

The Company's analysis of securities for the quarter ended June 30, 2008 resulted in the determination that seven fixed-maturity issuers had other-than-temporary impairments. These securities were written down by a combined \$10.2 million in the second quarter. The total fair value of the affected securities after the write-downs was \$16.8 million. No other-than-temporary impairments were identified during the second quarter of 2007.

Following is a description of the securities that were written down during the second quarter of 2008: 1) Three of the securities were written down by a total of \$3.3 million, primarily as a result of declines in price and rating agency downgrades on debt issues from issuers that have recently completed leveraged buyout (LBO) transactions. These LBO transactions greatly increased the debt level of each issuer. One of these securities had been written down previously. 2) Two securities were collateralized debt obligations (CDOs) and were written down by \$2.8 million, primarily due to price declines that had persisted for periods longer than the Company considered temporary. 3) One security was written down by \$3.3 million due to combination of a decline in price that had persisted for a period longer than the Company considered temporary, rating agency downgrades and a debt restructuring during the quarter. 4) The final security was written down by \$0.8 million due to a combination of a decline in price that had persisted for a period longer than the Company considered temporary and a further deterioration in fair value during the second quarter of 2008.

The following table provides detail concerning realized investment gains and losses for the third quarter and nine month periods of 2008 and 2007.

	Quarter ended September 30		Nine Months ended September 30	
	2008	2007	2008	2007

Investment Accounting Policy and Analysis of Investments

The Company seeks to protect policyholders' benefits by optimizing risk and return on an ongoing basis through managing asset and liability cash flows, monitoring credit risk, avoiding high levels of investments that may be redeemed by the issuer, maintaining sufficiently liquid investments and avoiding undue asset concentrations through diversification, among other things. The Company has three primary sources of

investment risk:

- Credit risk, relating to the uncertainty associated with the continued ability of a given obligor to make timely payments of principal and interest;
- Interest rate risk, relating to the market price and/or cash flow associated with changes in market yield and curves; and
- Equity risk, relating to the adverse fluctuations in a particular equity position.

30

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The Company's ability to manage these risks is essential to the success of the organization. In particular, the Company devotes considerable resources to the credit analysis of each new investment and the ongoing credit positions. The majority of the Company's investments are exposed to varying degrees of credit risk. Credit risk is the risk that the value of the investment may decline due to deterioration in the financial strength of the issuer and that the timely or ultimate payment of principal or interest might not occur. A default by an issuer usually involves some loss of principal to the investor. Losses can be mitigated by timely sales of affected securities or by active involvement in a restructuring process. However, there can be no assurance that the efforts of an investor will lead to favorable outcomes in a bankruptcy or restructuring. Credit risk is managed primarily through industry, issuer, structure and asset diversification. In addition, the Company's Investment Committee is appointed by the Board of Directors and is responsible for establishing investment policies and approving or authorizing all investments.

¹ Federal agency securities are not backed by the full faith and credit of the U.S. Government.

At December 31, 2007, the Company had \$45.2 million in gross unrealized losses on fixed maturities which were offset by \$57.1 million in gross unrealized gains. At September 30, 2008, the Company's unrealized losses had increased to \$167.2 million and were partially offset by \$23.1 million in gross unrealized gains. Approximately 61% of the gross unrealized losses at September 30, 2008 were in the category of corporate obligations. The financial sector was the single largest contributor to that category, primarily due to the direct and indirect impact of the troubled residential real estate and mortgage markets. In addition, at September 30, 2008, corporate private-labeled mortgage-backed securities, also related to the residential real estate and mortgage industries, accounted for 23% of the gross unrealized losses. This represented an increase from 11% at December 31, 2007.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The following table identifies fixed maturity securities available for sale by rating.

Equivalent S&P Rating	September 30, 2008		December 31, 2007	
	Fair Value	% of Total	Fair Value	% of Total
AAA	\$796,439	33 %	\$885,230	34 %

Total investment grade	2,278,284	94 %	2,470,223	94 %
BB	89,830	4 %	115,493	4 %
Other	43,514	2 %	45,357	2 %
Total below investment grade	133,344	6 %	160,850	6 %
	\$2,411,628	100 %	\$2,631,073	100 %

As of September 30, 2008 and December 31, 2007, 94% of all fixed maturity securities were investment grade, reflecting the high quality of securities maintained by the company.

Analysis of Unrealized Losses on Securities

The Company reviews all security investments, specifically assesses all investments with greater than 10% declines in fair value and, in general, monitors all security investments as to ongoing risk. These risks are fundamentally evaluated through both a qualitative and quantitative analysis of the issuer. The Company also prepares a formal review document no less often than quarterly of all investments with greater than 20% declines in fair value for six months or more, investments that have previously been written down and that remain in an unrealized loss position, and selected investments that have changed significantly from a previous period and that have a decline in fair value greater than 10% of amortized cost.

The Company has a policy and process in place to identify securities that could potentially have an impairment that is other-than-temporary. This process involves monitoring market events and other items that could impact issuers such as:

- Intent and ability to make all principal and interest payments when due
- Near-term business prospects
- Cash flow and liquidity
- Credit ratings
- Business climate
- Management changes
- Litigation and government actions
- Other similar factors

This process also involves monitoring several factors including late payments, downgrades by rating agencies, asset quality, key financial ratios, financial statements, revenue forecasts and cash flow projections, as indicators of credit issues.

All securities are reviewed to determine whether impairments should be recorded. This process includes an assessment of the credit quality of each investment in the entire securities portfolio. Additional reporting and review procedures are conducted for those securities where fair value is less than 90% of amortized cost. Further, detailed analysis is performed for each issue or issues having experienced a formal restructuring or where the security has experienced material deterioration in fair value or where the fair value is less than 80% of amortized cost.

The Company considers relevant facts and circumstances in evaluating whether the impairment of a security is other-than-temporary. Relevant facts and circumstances considered include but are not limited to: (1) the current

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

fair value of the security as compared to cost; (2) the extent and the length of time the fair value has been below cost; (3) the financial position of the issuer, including the current and future impact of any specific events, material declines in the issuer's revenues, margins, cash positions, liquidity issues, debt levels and income results; (4) significant management or organizational changes; (5) significant uncertainty regarding the issuer's industry; (6) violation of financial covenants; (7) consideration of information or evidence that supports timely recovery; and (8) other business factors related to the issuer's industry.

There are a number of significant risks and uncertainties inherent in the process of monitoring impairments and determining if an impairment is other-than-temporary. These risks and uncertainties include but are not limited to:

- Risk that the Company's assessment of an issuer's ability to meet all of its contractual obligations will change based on changes in the credit characteristics of that issuer;
- Risk that the economic outlook will be worse than expected or have more of an impact on the issuer than anticipated;
- Risk that fraudulent information could be provided to the Company's credit, investment and accounting professionals who determine the fair value estimates and accounting treatment for securities;
- Risk that new information obtained by the Company or changes in other facts and circumstances may lead the Company to change its intent to hold the security to maturity or until it recovers in value;
- The risk that inaccurate or misleading information could be provided to the Company's investment professionals who determine the fair value estimates.

Any of these situations could result in a charge to income in a future period. If the Company determines that a security is other-than-temporarily impaired, the difference between amortized cost and fair value is charged to income as a realized investment loss, resulting in a permanent reduction to the cost basis of the underlying investment.

The following table provides information regarding investment securities with unrealized losses on fixed maturity and equity security investments available for sale, as of September 30, 2008.

At September 30, 2008, approximately 53% of the gross unrealized losses from the fixed maturity portfolio was attributable to securities having gross unrealized losses of less than 12 months. This compares to December 31, 2007, when 31% of the gross unrealized losses were less than 12 months. The financial sector in corporate obligations and corporate private-labeled mortgage-backed securities experienced the largest changes during the nine months.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The following table summarizes the fixed maturity securities with unrealized losses as of September 30, 2008 and December 31, 2007 by ratio of unrealized loss to amortized cost.

	September 30, 2008		Gross

Six months or more and less than twelve months	—	—	—
Twelve months or greater	—	—	—
Total below investment grade	10,039	6,997	3,042
Unrealized losses greater than 20%	19,285	13,935	5,350
Total unrealized losses	\$1,308,778	\$1,263,609	\$45,169

Total unrealized losses on fixed maturity securities at September 30, 2008 were \$167.2 million. The Company segments these unrealized losses into three primary categories. The first category includes total unrealized losses of 10% or less of amortized cost, which totaled \$54.2 million or 32% of the total unrealized losses on fixed

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

maturity securities. The second category reflects total unrealized losses of 20% or less and greater than 10%. This category totaled \$51.6 million or 31% of the total unrealized losses. The third category includes total unrealized losses greater than 20%. This category totaled \$61.4 million or 37% of the total.

Securities with unrealized losses greater than 20% are also monitored based upon whether the securities are investment grade or below investment grade. Securities in the investment grade category had \$54.9 million in unrealized losses, while securities rated below investment grade had \$6.5 million in unrealized losses at September 30, 2008.

In addition, securities having unrealized losses greater than 20% are further evaluated based upon the length of time that they have been above the 20% unrealized loss threshold. Securities in this classification are divided into three different categories, including less than six months, six months or more and less than twelve months, and twelve months or greater. The Company had investment grade securities with unrealized losses of greater than 20% that totaled \$47.7 million and \$7.2 million for less than six months and six or more and less than twelve-month periods, respectively, at September 30, 2008. The Company also had below investment grade securities with unrealized losses of greater than 20% that totaled \$6.5 million for less than six months. The Company had no securities below investment grade with unrealized losses of greater than 20% for six months or more and less than twelve month periods and twelve months or greater, respectively, at September 30, 2008.

Total unrealized losses on fixed maturity securities at December 31, 2007 were \$45.2 million. The Company segments these unrealized losses into three primary categories. The first category includes total unrealized losses of 10% or less of amortized cost, which totaled \$30.5 million or 67% of the total unrealized losses on fixed maturity securities. The second category reflects total unrealized losses of 20% or less and greater than 10%. This category totaled \$9.3 million or 21% of the total unrealized losses. The third category shows total unrealized losses greater than 20%. This category totaled \$5.4 million or 12% of the total.

Securities with unrealized losses greater than 20% are also monitored based upon whether the securities are above or below investment grade. Investment grade securities in this category had \$2.3 million in unrealized losses, while securities rated below investment grade had \$3.0 million in unrealized losses at December 31, 2007.

In addition, securities having unrealized losses greater than 20% are further evaluated based upon the length of time that they have been above the 20% unrealized loss threshold. Securities in this classification are divided into three different categories, including less than six months, six months or more and less than 12 months, and 12 months or greater. The Company had investment grade securities with unrealized losses of greater than 20% that totaled \$2.3 million for less than six months at December 31, 2007. The Company had no investment grade or below investment grade securities with unrealized losses of greater than 20% for six months or more and less than twelve months. The Company had below investment grade securities with unrealized losses of greater than 20% that totaled \$3.0 million for less than six months. The Company had no below investment grade securities with unrealized losses of more than 20% for twelve months or greater at December 31, 2007.

The following table provides information on fixed maturity securities with gross unrealized losses by rating as of September 30, 2008.

Equivalent S&P Rating	Fair		Gross Unrealized	
	Value	%	Losses	%
AAA	\$542,725	33 %	\$51,567	31 %

Other	26,930	2 %	2,892	6 %		
Total below investment grade	74,705	6 %	8,211	18 %		
	\$1,263,609	100 %	\$45,169	100 %		

As of September 30, 2008, 95% of the fair value for fixed maturity securities with gross unrealized losses were investment grade compared to 94% at December 31, 2007.

The following tables provide the distribution of maturities for fixed maturity investment securities available for sale with unrealized losses as of September 30, 2008 and December 31, 2007. Expected maturities may differ from these contractual maturities since borrowers may have the right to call or prepay obligations.

	September 30, 2008	
	Fair Value	Gross Unrealized Losses
Fixed maturity security securities available for sale:		
Due in one year or less	\$56,426	\$1,290
Due after one year through five years	324,339	24,111
Due after five years through ten years	575,529	54,416
Due after ten years	321,297	41,809
Total	1,277,591	121,626
Mortgage and asset-backed securities	387,912	42,213
Redeemable preferred stocks	11,739	3,336
Total	\$1,677,242	\$167,175

	December 31, 2007	
	Fair Value	Gross Unrealized Losses
Fixed maturity security securities available for sale:

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Following is a discussion of securities whose fair value had been less than 80% of amortized cost for at least six months as of September 30, 2008. The Company has evaluated three fixed-maturity securities in this category, and prepared detailed analyses on these positions. The Company has evaluated and considered a wide variety of factors to determine whether these positions are other-than-temporarily impaired. One security is a senior tranche of a MBS structure backed by conforming alt-a mortgages on residential properties. Regardless of individual deal performance and vintage, alt-a mortgages have suffered indiscriminate price depreciation in the current market. The second security is a midwest multi-bank holding company that has suffered as part of the residential mortgage crisis that began in 2007. This bank has one of the highest capital ratios within its peer group. It has a broad retail banking network with broad geographic diversification and sizeable core deposit base. The third security is part of an international banking institution that has experienced the effects of the global credit deterioration and the U.S. residential mortgage crises. In spite of recent net losses and disruption in generating new revenue, the issuers continue to hold investment grade ratings and maintain high-quality investment portfolios, substantial statutory capital, more than sufficient claims paying resources, and they continue to meet current contractual obligations.

The Company has written down certain investments in previous periods. Securities previously written down and still owned as of September 30, 2008 and December 31, 2007 are identified in the tables below.

	September 30, 2008		
	Carrying Amount	Fair Value	Unrealized gain/(loss)
Time owned since write-down:			
Less than six months	\$29,586	\$26,704	\$(2,882)
Six months or more and less than twelve months	3,180	2,400	(780)
Twelve months or greater	1,936	2,012	76
Total	\$34,702	\$31,116	\$(3,586)

	December 31, 2007		
	Carrying Amount	Fair Value	Unrealized gain/(loss)
Time owned since write-down:			
Less than six months	\$ 6,136	\$ 6,136	\$ —
Six months or more and less than twelve months	—	—	—
Twelve months or greater	483	1,003	520
Total	\$ 6,619	\$ 7,139	\$ 520

The Company is exposed to risk that issuers of securities owned by the Company will default or that interest rates, or credit spreads or liquidity factors will change and cause a decrease in the value of its investments. With mortgage-backed securities, the Company is also exposed to prepayment and extension risks. As interest rates change, the rate at which these securities pay down principal may change. These risks are mitigated by investing in high-quality, investment-grade securities and managing the maturities and cash flows of investments and liabilities to the greatest extent possible.

Concerns arose during the second half of 2007 regarding subprime mortgage loan defaults. Market dislocations have exacerbated this issue as some sources of liquidity, such as asset-backed commercial paper, auction-rate markets and bank financing have contracted. Demand for investments securitized by home loans has also fallen significantly, making it more difficult for mortgage loan originators to sell their loans profitably. Home prices continue to fall, which hinders potential sales and loan refinancings that might otherwise avert defaults. These issues have largely been centered around increasing delinquencies and default rates by subprime borrowers. Many investors have shunned securities backed by home loans, regardless of the actual quality of the underlying assets, sending market values for this entire class of securities downward. The Company closely monitors its investments in securities classified as subprime. Subprime securities include all bonds or portions of bonds where the underlying collateral is made up of home equity loans or first mortgage loans to borrowers whose credit scores at the time of origination were lower than the level recognized in the market as prime. The Company's classification of subprime does not include alt-a or jumbo loans, unless the collateral otherwise meets the preceding definition. At September 30, 2008, the Company had investments with subprime residential mortgage exposure of \$27.5 million and a related \$6.0 million unrealized loss. This exposure amounted to less than 1% of

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

the Company's invested assets and all such assets were valued based on external pricing sources. These investments fall under the Company's normal process for evaluation of other-than-temporarily impaired securities.

Other Revenues

Other revenues consist primarily of supplemental contract considerations, policyholder dividends left with the Company to accumulate and income received on the sale of low income housing tax credit ("LIHTC") investments. Other revenues increased \$1.6 million or 59% in the third quarter and \$0.7 million or 7% in the nine months compared to a year ago. The increase in the third quarter was largely due to additional sales of LIHTC investments and the timing of receipt on those sales. The increase in the nine months was due to the additional sales of LIHTC investments.

Policyholder Benefits

Policyholder benefits consist of death benefits (mortality), annuity benefits, accident and health benefits, surrenders and the associated increase or decrease in reserves for future policy benefits. For the periods presented, the largest component of policyholder benefits was death benefits. Death benefits reflect mortality results. Mortality will fluctuate from period-to-period and has remained within pricing expectations for the periods presented.

Policyholder benefits increased \$2.1 million or 5% in the third quarter compared to a year ago. This increase was due to several factors. Dental benefits increased, related to greater amounts of business and higher loss ratios. Benefit and contract reserves increased from immediate annuity sales, as reserves are established virtually on a one-for-one basis with premiums. Lastly, supplemental contract payments and annuity benefits increased. These increases were partially offset by a decrease in death benefits.

Policyholder benefits increased \$8.2 million or 6% in the nine months versus one year ago. The increase in the nine months was primarily due to the increase in benefit and contract reserves and higher dental benefits, as discussed above. In addition, death benefits increased in the nine months.

In 2007, the Company introduced a guaranteed minimum withdrawal benefit (GMWB) rider for variable annuity contracts that is considered to be a financial derivative, and as such is accounted for at fair value. These annuity riders had an increase in value of \$1.0 million in the third quarter and \$1.3 million in the first nine months of 2008, largely due to changes in the equity and credit markets. The value of the riders will fluctuate depending on market conditions.

Interest Credited to Policyholder Account Balances

Interest is credited to policyholder account balances according to contractual agreements. There are minimum levels assumed in certain contracts as well as adjustments made to reflect current market availability. Accordingly, the Company reviews and adjusts crediting rates as necessary to either market availability or contractual minimums. Interest credited to policyholder account balances decreased \$0.9 million or 4% in the third quarter and \$3.0 million or 4% in the nine months, compared with a year ago. Amounts credited are a function of account balances available multiplied by an appropriate crediting rate. As account balances decline, so will the amount of interest credited to policyholder account balances. In addition, the Company reduced crediting rates on selected products to remain in line with rates available in the market. Interest was credited to policyholder account balances for universal life, fixed deferred annuities and other investment-type products.

Amortization of Deferred Acquisition Costs (DAC) and Value of Business Acquired (VOBA)

Certain life insurance and annuity products require that DAC is amortized in proportion to the expected future gross profits. Profit expectations are based upon assumptions of future interest spreads, mortality margins, expense margins and policy and premium persistency experience. At

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

least annually, a review is performed of the assumptions related to profit expectations. If it is determined the assumptions should be revised, the impact of the changes is recorded as a change in DAC amortization in the current period due to an unlocking adjustment. A similar analysis is performed on VOBA at least annually and, if necessary, adjustments are made in the current period VOBA amortization.

The amortization of DAC and VOBA decreased \$0.2 million or 2% in the third quarter and was relatively flat in the nine months compared to a year ago. Amortization of DAC was flat in the third quarter and increased \$1.8 million or 8% in the nine months versus a year ago. In the third quarter, DAC amortization from variable products increased, reflecting the impact of the negative fluctuations within the financial markets. Also, DAC amortization increased for the Old American segment as recently issued insurance policies with higher commission rates terminated, releasing higher DAC amounts. Partially offsetting these increases was a reduction in amortization of

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

certain policyholder accounts due to higher withdrawals in the prior year. The increase in the nine months was largely the result of three factors. First, DAC amortization increased on variable products due to the market fluctuations of the account balances. Second, the termination of certain Old American policies with higher associated DAC amount from higher commission rates resulted in increased amortization. Third, partially offsetting these increases higher withdrawals on a specific block of policies in the prior year reduced amortization in 2007. In addition, DAC amortization was reduced \$3.0 million in the second quarter of 2008 due to unlocking, primarily related to interest margins and mortality experience on selected products. In the second quarter of 2007, unlocking totaled \$3.4 million and was primarily related to unlocking adjustments for interest spreads and mortality margins.

VOBA is amortized in concert with each purchased block of business. Generally, as policies run off, the amortization will decline over time. In addition, VOBA is evaluated each period for unlocking adjustments. The amortization of VOBA declined \$0.2 million or 14% in the third quarter, reflecting normal amortization. VOBA amortization decreased \$1.8 million or 25% in the nine months. This decline can largely be attributed to a decrease in the unlocking adjustment from \$1.1 million in the second quarter of 2007 to \$0.2 million in the second quarter of 2008. The unlocking adjustment in the second quarter of 2007 was related to a reduction in the mortality margins while the unlocking adjustment in the second quarter of 2008 was related to a change in the policy surrender assumptions.

Operating Expenses

Operating expenses consist of commissions and production allowances, net of the capitalization of commission and production allowances, and expenses from the Company's operations. Operating expenses increased \$4.6 million or 23% in the third quarter and \$5.1 million or 8% in the nine months. The increase in the third quarter was primarily due to the following: 1) salaries increased \$1.2 million, largely due to the accrual of the share-based compensation expense as discussed in Note 11. Share-Based Payment; 2) employee benefits increased \$1.4 million, primarily reflecting a reduction of benefit accruals in the prior year; and 3) expenses associated with sales of LIHTC investments increased \$0.7 million. . The largest factors contributing to the increase in the nine months were the following: 1) salaries increased \$1.7 million, largely due to the accrual of the share-based compensation expense mentioned above; 2) employee benefits increased \$0.2 million, primarily due to the reduction of benefit accruals in the prior year; 3) expenses associated with sales of LIHTC investments during 2008 increased \$0.4 million; and 4) outside labor and services increased \$0.3 million .

Income Taxes

The third quarter income tax benefit was \$8.3 million or 35% of income before tax for 2008, versus an income tax expense of \$3.8 million or 29% of income before tax for the prior year period. The income tax benefit for the nine months ended September 30, 2008 was \$5.7 million or 36% of income before tax for 2008, versus \$12.5 million or 30% of income before tax for the prior year period.

The effective income tax rate in the third quarter was equal to the prevailing corporate federal income tax rate of 35%, primarily due to the benefit of a reduction in the income tax contingency being equally offset by prior year taxes. The impact of reducing the income tax contingency was a benefit of approximately 1% of income before tax. The impact of the true-up of prior year taxes was an expense of approximately 1% of income before tax. The effective income tax rate in the third quarter of 2007 was lower than the prevailing corporate federal income tax rate of 35% primarily due to income tax credits generated from the Company's investments in affordable housing. The effect of the affordable housing tax credits on the effective tax rate in the third quarter was a benefit of approximately 2% of income before tax.

The effective tax rate in the nine months ended September 30, 2008 was greater than the prevailing corporate federal income tax rate of 35% due to a 3% rate benefit resulting primarily from dividends received deduction, a reduction in tax contingency and affordable housing tax credits, partially offset by a 2% decrease in rate benefit resulting from prior year taxes. The effective income tax rate in the nine months ended September 30, 2007 was lower than the prevailing corporate federal income tax rate of 35% primarily due to income tax credits generated from the Company's investments in affordable housing. The effect of the affordable housing tax credits on the effective tax rate in the nine months was a benefit of approximately 2% of income before tax.

Operating Results by Segment

The Company has three reportable business segments, which are defined based on the nature of the products and services offered: Individual Insurance, Group Insurance and Old American. The Individual Insurance segment consists of individual insurance products for both Kansas City Life and Sunset Life. The Individual

41

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Insurance segment is marketed through a nationwide sales force of independent general agents and third-party marketing arrangements. The Group Insurance segment consists of sales of group life, group disability, and dental products. This segment is marketed through a nationwide sales force of independent general agents, group brokers and third-party marketing arrangements. Old American consists of individual insurance products designed primarily as final expense products. These products are marketed through a nationwide general agency sales force with exclusive territories, using direct response marketing to supply agents with leads. Refer to Note 9 - Segment Information in the Notes to the Consolidated Financial Statements (Unaudited).

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Individual Insurance

The following table presents financial data of the Individual Insurance business segment for the third quarters and nine months ended September 30, 2008 and 2007:

	Quarter ended September 30		Nine Months ended September 30	
	2008	2007	2008	2007
Insurance revenues:				
Premiums	\$ 14,521	\$ 13,411	\$ 44,518	\$ 40,939
Contract charges	27,227	28,058	81,054	83,238
Reinsurance ceded	(10,534)	(10,254)	(31,188)	(31,009)
Total insurance revenues	31,214	31,215	94,384	93,168
Investment revenues:

Total deposits	\$ 147,374	(5)	\$ 154,914	1

The net loss for this segment in the third quarter was \$14.3 million, a decrease of \$22.9 million from \$8.6 million of net income in the third quarter of 2007. The loss for the nine months was \$8.5 million, a decrease of \$35.5 million compared with \$27.0 million of net income in 2007. The decline in the third quarter was driven by \$28.0 million in realized investment losses. Also contributing to the decline was a \$2.4 million decrease in net investment income, a \$1.1 million increase in policyholder benefits, and a \$4.4 million increase in operating expenses. Partially offsetting these, other revenues increased \$1.6 million and interest credited to policyholder account balances decreased \$0.9 million. The decrease in net income for the nine months was largely due to \$35.9 million in realized investment losses. Also, net investment income declined \$5.9 million, policyholder benefits increased \$4.2 million and operating expenses increased \$5.0 million. Partially offsetting these unfavorable changes, interest credited on policyholder account balances decreased \$3.0 million and total insurance revenues increased \$1.2 million.

Insurance revenues for this segment were flat in the third quarter and increased 1% in the nine months compared with last year. In the third quarter, total premiums increased 8%, largely due to greater immediate annuity sales. Contract charges declined 3% and reinsurance ceded increased 3% in the third quarter, compared with a year ago. In the nine months, total premiums increased 9% on the strength of increased immediate annuity sales. Contract charges declined 3% and reinsurance ceded increased 1% versus last year. While total contract charges did not fluctuate significantly in the third quarter and nine months, two of the components had fluctuations. First, deferred revenue declined in both the third quarter and nine months compared to a year ago, as the Company has experienced increased sales of certain products where expense loads are deferred and amortized into earnings in future periods. Changes in unlocking at second quarter of 2008 also contributed to the decrease in year-to-date deferred revenue. Second, reserve loads decreased 18% in the third quarter and 9% in the nine months, also resulting from increased sales of products where expense loads are deferred.

New individual life premiums increased 6% and new immediate annuity premiums increased 41% compared with the third quarter of 2007. Total renewal premiums increased 3% in the third quarter. For the nine months, new individual life premiums rose 2% and new immediate annuity premiums increased 64% versus last year. Renewal premiums were flat the nine months, compared to last year. The increase in annuity premiums reflects changes in consumer preferences. Total new deposits declined 16% in the third quarter as both new universal life and new

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

variable universal life deposits increased 4% compared to a year ago. These increases were offset by a 25% decrease in new fixed deferred annuity deposits and a 15% decrease in new variable annuity deposits. Total new

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

deposits decreased 5% for the nine months, as universal life deposits declined 7%, variable universal life deposits declined 20% and fixed deferred annuity deposits decreased 13%. These declines were partially offset by a 6% increase in variable annuity deposits. Renewal deposits increased 1% in the third quarter but declined 5% in the nine months, compared to a year ago. For the quarter, renewal deposits increased for universal life and fixed deferred annuities while renewal deposits declined for variable universal life and variable annuities. For the nine months, renewal deposits declined for universal life, variable universal life and variable annuities, while fixed deferred annuity deposits increased. The declines in deposits can largely be attributed to the difficult economic environment, increased competition, and the continued impact of alternative products.

Net investment income decreased 5% in the third quarter and 4% in the nine months, primarily due to reduced investment assets and lower yields available in the market. This segment experienced a \$28.0 million realized investment loss in the third quarter of 2008, versus a \$1.4 million investment gain in 2007. Write-downs of certain investment securities totaled \$30.9 million in the third quarter and \$40.7 million in the first nine months of 2008. The financial sector has been hit hard by economic pressures and sub-prime residential issues. These pressures have resulted in large price dislocations that have affected many securities and companies in the financial sector. Accordingly, the Company has written down as other-than-temporarily impaired certain investments in the second and third quarters of 2008.

The Company's analysis of securities for the quarter ended September 30, 2008 resulted in the determination that investments in ten fixed-maturity issuers (twelve specific securities) had other-than-temporary impairments affecting the Individual Insurance segment. These securities were written down by a combined \$30.9 million in the third quarter. The total fair value of the affected securities after the write-downs was \$16.5 million. No other-than-temporary impairments were identified during the third quarter of 2007.

Following is a description of the securities that were written down during the third quarter of 2008. 1) Two of the securities were preferred stocks of government-sponsored agencies that were written down by a total of \$6.5 million. These entities buy and hold mortgages and issue and sell guaranteed mortgage-backed securities to facilitate housing ownership. They are now operated in conservatorship by the U.S. government and their existing common and preferred stock securities are severely diluted. Dividend payments have been suspended, driving the fair value of these securities down. 2) Two securities from the same issuer were from an investment banking firm that filed for bankruptcy during the third quarter of 2008 and was written down by a total of \$9.2 million. This firm was part of the financial industry that was hit hard by the mortgage credit crisis. After a severe decline in equity valuations, the inability to obtain short-term funding and the failure to find an acquirer forced this firm to file for Chapter 11 bankruptcy. 3) Two securities were collateralized debt obligations (CDOs) that were written down by a total of \$5.1 million. These securities have been impacted by the rapid rise in delinquencies and foreclosures in the sub-prime and alt-a mortgage markets, along with a decline in the fair value of securities issued by financial institutions. Ongoing CDO liquidations and investor selling have caused extreme declines in market valuations, regardless of individual security performance. 4) Two securities, one issuer a parent organization of the other, are financial guarantee insurance companies that provide credit enhancement for bond issuers as well as investment management services and were written down by a total of \$3.9 million. These issuers have also experienced declines in value related to the mortgage credit crisis and have recently been downgraded to a negative outlook. 5) One security was from the auto industry and is a supplier of auto parts for light trucks and sport-utility vehicles. The deteriorating truck and sport-utility vehicle markets of the auto industry combined with the sharp decline in value and recent ratings declines resulted in a \$2.1 million write-down. 6) One security was written down \$1.1 million as continued price deterioration occurred on this security that was previously written down. The issuer is primarily in the radio and advertising business. 7) One security provided custom-tailored financing to private and corporate owners of real estate nationwide. This security had a recent rating decline to below investment grade status combined with continued price deterioration and was written down \$2.3 million. 8) One security was a bank holding company that recently filed for bankruptcy. This holding company was the parent of a large nationwide bank that was recently taken over by the Office of Thrift Supervision who appointed the FDIC as its receiver. As a result of the bankruptcy filing, this security was written down \$0.8 million.

The Company's analysis of securities for the quarter ended June 30, 2008 resulted in the determination that seven fixed-maturity securities had other-than-temporary impairments affecting the Individual Insurance. These securities were written down by a combined \$9.7 million in the second quarter. The total fair value of the affected securities after the write-downs was \$15.2 million. No other-than-temporary impairments were identified during the second quarter of 2007.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Following is a description of the securities that were written down during the second quarter of 2008: 1) Three of the securities were written down by a total of \$3.0 million, primarily as a result of declines in price and rating agency downgrades on debt issues from issuers that have recently completed leveraged buyout (LBO) transactions. These LBO transactions greatly increased the debt level of each issuer. One of these securities had been written down previously 2) Two securities were collateralized debt obligations (CDOs) and were written down by \$2.6 million, primarily due to price declines that had persisted for periods longer than the Company considered temporary. 3) One security was written down by \$3.3 million due to combination of a decline in price that had persisted for a period longer than the Company considered temporary, rating agency downgrades and a debt restructuring during the quarter; 4) The final security was written down by \$0.8 million due to a combination of a decline in price that had persisted for a period longer than the Company considered temporary and a further deterioration in fair value during the second quarter of 2008.

This segment experienced \$35.9 million in net realized investment losses in the first nine months of 2008 versus \$6.6 million in net realized gains in the same period a year earlier. The realized investment losses in the current year were largely due to \$40.7 million in write-downs of certain investment securities. As previously discussed, the general economic conditions and reduced value of financial assets contributed to the write-downs of these investments. The gains in 2007 were largely due to the sale of certain real estate properties and the sale of Generations Bank. No investments were written down during the first nine months of 2007.

Other revenues increased \$1.6 million or 59% in the third quarter and \$0.7 million or 7% in the nine months compared to a year ago. The increase in the third quarter was largely due to additional sales of LIHTC investments and the timing of receipt on those sales compared with sales one year ago. The increase in the nine months was due to the additional sales of LIHTC investments.

Policyholder benefits increased 5% in the third quarter and 6% in the nine months, compared to the prior year. The increase for the third quarter was largely due to an increase in other benefits, primarily in supplementary contract payments and annuity benefits. The increase for the nine months was largely due to an increase in benefit and contract reserves, primarily resulting from the increase in immediate annuity premiums, where reserves are established virtually on a one-for-one basis with premiums. Annuity benefits and supplemental contracts also increased during the nine months, versus a year ago.

Interest is credited to policyholder account balances according to terms of the policy. There are minimum rates of crediting prescribed in certain policies as well as adjustments that can be made to the initial crediting rate. Accordingly, the Company reviews and as necessary adjusts crediting rates on policies. Interest credited to policyholder account balances decreased \$0.9 million or 4% in the third quarter and \$3.0 million or 4% in the nine months compared with a year ago. Amounts credited are a function of account balances and the rate of crediting. The decrease in interest credited to policyholder account balances was largely due to a 2% decline in policyholder account balances.

The amortization of DAC and VOBA decreased 5% in the third quarter and 3% in the nine months. Amortization of DAC decreased \$0.2 million in the third quarter but increased \$1.2 million or 8% versus a year ago. The slight decrease in the third quarter was largely due to the increase in DAC amortization related to market fluctuations related to variable products that was offset by a decrease in amortization in the prior year due to higher withdrawals of certain policyholder accounts. The increase in the nine months was also due to the increase in DAC amortization related to market fluctuations on variable products that was partially offset by reduced amortization related to higher withdrawals of certain policyholder accounts in the prior year, as mentioned above. DAC amortization was reduced \$3.0 million in the second quarter of 2008 due to unlocking, primarily related to interest margins and mortality experience on selected products. In the second quarter of 2007, unlocking totaled \$3.4 million and was primarily related to unlocking adjustments for interest spreads and mortality margins.

VOBA is amortized in concert with each purchased block of business. Accordingly, as policies run off, the amortization will decline over time. The amortization of VOBA declined 21% in the third quarter, reflecting normal amortization. VOBA amortization decreased 34% in the first nine months of 2008 compared with 2007. This decline can largely be attributed to a decrease in the unlocking adjustment from \$1.0 million in the second quarter of 2007 to \$0.2 million in the second quarter of 2008. The unlocking adjustment in the second quarter of 2007 was related to the assumptions for mortality margins. The unlocking adjustment in the second quarter of 2008 was related to a change in the policy surrender

assumptions.

46

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Operating expenses consist of commissions and production allowances, net of the capitalization of commission and production allowances, and expenses from the Company's operations. Operating expenses increased \$4.4 million or 34% in the third quarter and \$5.0 million or 12% in the nine months. The increase in the third quarter was primarily due to the following: 1) salaries increased \$1.2 million, largely due to the accrual of the share-based compensation expense as discussed in Note 11. Share-Based Payment; 2) employee benefits increased \$1.4 million, largely reflecting a reduction of benefit accruals in the prior year; and 3) expenses associated with the sales of LIHTC investments increased \$0.7 million. The largest factors contributing to the increase in the nine months were the following: 1) salaries increased \$1.7 million, largely due to the accrual of the share-based compensation expense mentioned above; 2) employee benefits increased \$0.4 million primarily due to the reduction of benefit accruals in the prior year; 3) expenses associated with sales of LIHTC investments during 2008 increased \$0.4 million; and 4) outside labor and services increased \$0.3 million.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Group Insurance

The following table presents financial data of the Group Insurance business segment for the third quarters and nine months ended September 30, 2008 and 2007:

	Quarter ended September 30		Nine Months ended September 30	
	2008	2007	2008	2007
Insurance revenues:				
Premiums	\$ 14,162	\$ 13,279	\$ 41,811	\$ 40,513
Reinsurance ceded	(1,894)	(1,931)	(5,576)	(6,371)

48

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The net loss for this segment totaled \$0.5 million for the third quarter of 2008 compared with a \$0.6 million loss in 2007. A \$0.9 million increase in premiums was offset by a \$0.9 million increase in policyholder benefits, largely in the dental line. The net loss for the nine months was \$1.6 million versus a \$1.1 million loss one year ago. The decline was primarily attributable to a \$2.6 million increase in policyholder benefits, which was largely due to a \$3.0 million increase in dental benefits. Operating expenses increased \$0.3 million versus last year. Partially offsetting these increases, total insurance revenues increased \$2.1 million or 6% from the prior year.

Total insurance revenues for the Group Insurance segment increased \$0.9 million or 8% in the third quarter compared to last year. This improvement was the result of a 7% increase in premiums and a 2% decline in reinsurance ceded. Total new premiums increased 21% and renewal premiums increased 3% during the quarter. New dental premiums increased 44% and new group life premiums rose 18%. These improvements reflect an increase in the number of sales representatives, the realignment of sales territories, and enhanced product features within the dental product line.

Total insurance revenues for the nine months increased \$2.1 million or 6%, as premiums increased 3% and reinsurance ceded decreased 12%. Total new premiums increased 12% and renewal premiums increased 1% compared to a year ago. New group life premiums increased 45%, new dental premiums rose 35% and new disability premiums increased 18%. As mentioned above, these improvements reflect an increase in the number of sales representatives, the realignment of sales territories, and enhanced product features within the dental product line. This segment exited the stop loss market during 2006 but continued to process existing business until the stop loss contracts expired in 2007. Excluding this line from the ongoing product lines, total premiums increased 10% and total new premiums increased 55%. The \$0.8 million or 12% decrease in reinsurance premiums was primarily due to the termination of the stop loss business. A major portion of the stop loss premiums was reinsured in order to manage the potential risks associated with this product line.

The increase in benefits in the dental product line reflects, in part, the increase in new dental business over the past year. It is typical for new dental business to report an increase in benefits in the first policy year. As the business ages, the benefit ratio falls more in line with renewal expectations. Management monitors this ratio on an ongoing basis and adjusts future renewal premiums, as necessary, in order to achieve profitability expectations on individual groups.

Operating expenses consist of commissions, fees to third party marketing and administrative organizations, and expenses from the Company's operations. Operating expenses were flat in the third quarter and increased 2% in the nine months. The increase in the nine months was largely due to a 4% increase in commissions and production allowances.

Improvement efforts for this segment continue to be focused in three primary areas. First, emphasis is placed on the growth of the in-force business. Increased productivity from existing group representatives and the continued expansion of the group distribution system are priorities for growth. Second, improvement in administrative efficiency is targeted through the increased use of technology, which should ultimately reduce expenses. Finally, this segment has recently added an array of voluntary products to the portfolio. These tend to be more profitable and are expected to become a larger share of the group marketplace.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Old American Insurance Company

The following table presents financial data of the Old American Insurance Company business segment for the third quarters and nine months ended September 30, 2008 and 2007:

	Quarter ended September 30		Nine Months ended September 30	
	2008	2007	2008	2007
Insurance revenues:				
Premiums	\$ 16,297	\$ 16,503	\$ 48,896	\$ 50,022
Reinsurance ceded	(851)	(1,008)	(2,721)	(3,152)
Total insurance revenues	15,446	15,495	46,175	46,870
Investment revenues:				
Net investment income	3,146	3,321	9,634	9,969
Realized investment losses	(1,311)	(25)	(1,733)	(53)
Other revenues	—	2	1	7
Total revenues	17,281	18,793	54,077	56,793
Policyholder benefits	11,035	10,931	33,780	32,437
Amortization of deferred acquisition costs and value of business acquired	3,326	3,166	9,974	9,433
Operating expenses	3,371	3,150	9,921	10,166
Total benefits and expenses	17,732	17,247	53,675	52,036
Income (loss) before income tax expense (benefit)	(451)	1,546	402	4,757
Income tax expense (benefit)	(34)	464	268	1,429
Net (loss) income	\$(417)	\$ 1,082	\$ 134	\$ 3,328

Premium information is provided in the table below.

	Quarter ended September 30			
	2008	%	2007	%
New premiums	\$ 1,861	11	\$ 1,680	8
Renewal premiums	14,436	(3)	14,823	(4)
Total premiums	\$ 16,297	(1)	\$ 16,503	(3)

	Nine Months ended September 30			
	2008	%	2007	%
New premiums	\$ 5,430	12	\$ 4,846	2
Renewal premiums	43,466	(4)	45,176	(4)
Total premiums	\$ 48,896	(2)	\$ 50,022	(3)

Net loss for this segment was \$0.4 million in the third quarter of 2008 compared to \$1.1 million in net income in the prior year. The largest factor in the decline was a \$1.3 million realized loss compared to a small realized loss in last year's third quarter. The decline in net income for the third quarter reflected \$0.2 million or 7% increase in operating expenses, a \$0.2 million or 5% increase in amortization of deferred acquisition costs and value of business acquired and a \$0.1 million or 1% increase in policyholder benefits. Net income for the nine months was \$0.1 million versus \$3.3 million for the same period in 2007. The decline in net income reflected increases of \$1.7 million in realized investment losses and \$1.3 million or 4% increase in policyholder benefits, along with a \$0.7

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

million or 1% decline in insurance revenues. These were partially offset by a \$0.2 million or 2% decrease in operating expenses.

Insurance revenues were flat in the third quarter and declined 1% in the nine months compared with the prior year. Total new premiums increased \$0.2 million or 11% in the third quarter and \$0.6 million or 12% in the nine months, while total renewal premiums declined \$0.4 million or 3% in the third quarter and \$1.7 million or 4% in the nine months. The increase in new premiums reflects a combination of product, compensation and distribution changes, which continue to improve this segment's competitive position. Old American continues to focus on the recruitment and development of new agencies and agents, along with a continued focus on improved production from existing agencies and agents.

Net investment income declined \$0.2 million or 5% in the third quarter and \$0.3 million or 3% in the nine months compared with 2007. These declines primarily reflect reduced investment assets and a reduction in yields available in the market. Old American also had a \$1.3 million realized investment loss in the third quarter and a \$1.7 million realized loss in the nine months.

The Company's analysis of securities for the quarter ended September 30, 2008 resulted in the determination that an investment in two issuers of fixed-maturity securities had other-than-temporary impairment affecting the Old American segment. These investments were written down by \$1.5 million in the third quarter. The fair value of the investments after the write-downs were \$1.5 million. No other-than-temporary impairments were identified during the third quarter of 2007. Following is a description of the securities that were written down during the third quarter of 2008. 1) Two securities, one issuer a parent organization of the other, are financial guarantee insurance companies that provide credit enhancement for bond issuers as well as investment management services and were written down by a total of \$1.0 million. These issuers have also experienced declines in value related to the mortgage credit crisis and have recently been downgraded to a negative outlook. 2) One security that provides custom-tailored financing to private and corporate owners of real estate nationwide. This security had a recent rating decline to below investment grade status combined with continued price deterioration and was written down \$0.5 million.

The Company's analysis of securities for the quarter ended June 30, 2008 resulted in the determination that three fixed-maturity securities had other-than-temporary impairments affecting the Old American segment. These securities were written down by a combined \$0.5 million in the second quarter. The total fair value of the affected securities after the write-downs was \$1.6 million. No other-than-temporary impairments were identified during the second quarter of 2007.

Following is a description of the securities that were written down during the second quarter of 2008: 1) One security was written down by \$0.2 million, primarily as a result of a decline in price on a debt security from an issuer that recently completed a leveraged buyout (LBO) transaction. This security had been written down previously; 2) a collateralized debt obligation (CDO) security was written down by \$0.2 million, primarily due to a price decline that had persisted for a period longer than the Company considered temporary. The security was below cost by 20% or more for at least six consecutive months. 3) The final security was written down by \$0.1 million due to a combination of a decline in price that had persisted for a period longer than the Company considered temporary and a further deterioration in fair value during the second quarter of 2008.

Policyholder benefits increased \$0.1 million or 1% in the third quarter and \$1.3 million or 4% in the nine months versus last year. The increase in the third quarter was due to increased surrenders and an increase in benefit and contract reserves. The increase in the nine months was due to higher death benefits, which increased \$1.6 million or 6% in the nine months compared with the prior year. Surrenders increased \$0.5 million or 14% in the nine months. Partially offsetting these increases was a \$0.7 million decrease in benefit and contract reserves.

Amortization of deferred acquisition costs and value of business acquired increased \$0.2 million or 5% in the third quarter and \$0.5 million or 6% in the nine months compared to a year ago. The increases in both the third quarter and nine months were due to an increase in DAC

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

amortization as recently issued insurance policies with higher commission rates terminated, releasing higher DAC amounts.

Operating expenses consist of commissions and production allowances, net of the capitalization of commission and production allowances, and expenses from the Company's operations. These expenses increased \$0.2 million or 7% in the third quarter but decreased \$0.2 million or 2% in the nine months, compared to a year ago.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The increase in the third quarter was primarily due to increased commissions and allowances, which reflects the increase in new premiums. The decrease in the nine months was largely the result of a decline in employee salaries and benefits.

Liquidity and Capital Resources

Statements made in the Company's 2007 Annual Report on Form 10-K remain pertinent, as the Company's liquidity position is materially unchanged from year-end 2007.

The Company meets liquidity requirements primarily through positive cash flows from operations. The Company had a cash outflow from operating activities of \$4.0 million during the first nine months of 2008., versus a \$3.7 million inflow for the same period in 2007. However, management believes that the Company has sufficient sources of liquidity to satisfy operational requirements and to finance expansion plans and strategic initiatives for the remainder of 2008 and into 2009. Primary sources of cash flow are premiums, other insurance considerations and deposits, receipts for policyholder accounts, investment sales and maturities, investment income and access to credit from other financial institutions. In addition, the Company has credit facilities that are available for additional working capital needs or investment opportunities. The principal uses of cash are for the insurance operations, including the purchase of investments, payment of insurance benefits, operating expenses, dividends, income taxes, withdrawals from policyholder accounts and costs related to acquiring new business. There can be no assurance that the Company will continue to generate cash flows at or above current levels or that the ability to borrow under the current credit facilities will be maintained.

The current economic climate has tightened the financial and liquidity conditions of policy owners. Potential increasing inflationary conditions, recessionary indicators and the stressed conditions facing many home owners may produce the need for individual policy owner liquidity and could result in increased surrenders and policy loans on existing policies. The Company performs cash flow testing and adds various levels of stress testing to potential surrender and policy loan levels in order to assess current and near-term cash and liquidity needs. In the event of increased surrenders and other cash needs, the Company has several sources of cash flow, as mentioned above, to meet these needs.

Cash from operations decreased \$7.7 million versus the same period a year ago. Several factors contributed to this decline. Cash benefit payments, largely from death claims, increased \$4.2 million while cash received from gross investment income declined \$8.5 million. Partially offsetting these items was a \$4.5 million increase in premium receipts. Cash is also affected by increases and decreases in the Company's net receivables and net payables. Reinsurance receivables established at the time claims are paid increased \$2.7 million and trade receivables increased \$3.7 million. Partially offsetting these, accrued employee and agent benefits decreased \$5.7 million compared to a year ago.

Net cash provided from investing activities was \$42.5 million, down from \$85.5 million for the same period in 2007. The Company's new investments in fixed maturity and equity securities were \$207.0 million for the nine months, up from \$194.4 million a year ago. New investments in mortgage loans were \$34.6 million for the nine months, compared with \$50.4 million last year. During the first nine months of 2008, the Company increased its purchases of real estate to \$24.5 million, versus \$2.5 million in 2007. Sales and maturities of fixed maturity and equity securities totaled \$238.3 million for the first nine months, a 13% decrease versus a year ago. The Company had \$39.8 million in mortgage loan maturities and principal paydowns for the nine months, compared to \$45.7 million last year. During the first nine months of 2008, the Company had sales of real estate investments of \$20.7 million, down from \$22.0 million a year ago. In addition, the sale of Generations Bank resulted in proceeds of \$10.1 million in 2007.

Net cash used for financing activities was \$42.7 million for the nine months, compared with \$82.0 million in cash used a year ago. This change was primarily the result of three items. First, withdrawals on policyholder account balances net of related deposits were \$37.8 million, a decrease of \$34.8 million over the prior year. Second, dividends paid to stockholders were \$9.4 million in the first nine months of 2008, compared to

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

\$33.3 million a year ago. Dividends in the first nine months of 2007 included both a one-time special dividend and the regular quarterly dividends. Third, the net acquisition of treasury stock totaled \$14.2 million, reflecting net purchases from employee benefit plans of \$8.6 million and the stock repurchase program of \$5.5 million.

The above information excludes net proceeds from variable insurance products. These proceeds are segregated into separate accounts and are not held in the Company's general investments because the policyholders, rather than the Company, assume the underlying investment risks.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Debt and Short-term Borrowing

The Company and certain subsidiaries have access to borrowing capacity through their membership affiliation with the Federal Home Loan Bank of Des Moines (FHLB). At September 30, 2008, outstanding balances in notes payable to the FHLB were \$7.6 million. All outstanding balances have maturities of less than one year and are secured by financial assets.

Borrowings were \$7.6 million at September 30, 2008, down from \$10.4 million at year-end 2007. The decrease in borrowings was due to net paydowns of \$2.8 million in borrowings from FHLB in the first nine months of the year. The Company has access to unsecured revolving lines of credit of \$60.0 million with two major commercial banks with no balances outstanding. Lines of credit totaling \$20.0 million will expire in May of 2009 and the remaining \$40.0 million will expire in November 2008. The Company anticipates renewing these lines of credit as they become due.

Capital Resources

The Company considers existing capital resources to be more than adequate to support the current level of business activities. In addition, the Company's statutory equity exceeds the minimum capital deemed necessary to support its insurance business, as determined by the risk based capital calculations and guidelines established by the National Association of Insurance Commissioners.

The following table shows the capital adequacy for the Company.

	September 30 2008		December 31 2007	
Total assets less separate accounts	\$3,742,120		\$3,931,715	
Total stockholders' equity	577,167		684,401	
Ratio of stockholders' equity to assets less separate accounts	15	%	17	%

The ratio of equity to assets less separate accounts has remained relatively constant. Unrealized investment losses on available for sale securities, which are included as a part of stockholders' equity, totaled \$66.1 million at September 30, 2008 (net of securities gains and losses, related taxes, policyholder account balances and deferred acquisition costs). This represents an increase of \$73.8 million in losses from the \$7.6 million unrealized investment gains at year-end 2007.

Stockholders' equity decreased \$107.2 million from year-end. The decrease was largely due to increases in unrealized investment losses, payments of stockholder dividends and an increase in treasury stock. The Company has defined contribution plans for employees and agents whereby shares of Company stock may be purchased or sold. Also, the Company makes contributions to these plans through Company stock. These transactions are accounted for as purchases and sales of treasury stock. Accordingly, in the first nine months of 2008, the benefit plans purchased 285,888 shares of treasury stock for \$13.7 million and sold 116,135 shares of treasury stock for \$5.1 million.

During the first nine months of 2008, the Company purchased 119,841 of its shares under the stock repurchase program for \$5.5 million. Under this program, the Company may purchase up to one million shares on the open market through January 2009.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

On October 27, 2008, the Board of Directors declared a quarterly dividend of \$0.27 per share, unchanged from the prior year that will be paid November 11, 2008 to stockholders of record as of November 6, 2008.

Current legislative activities are not expected to have a significant impact on the ongoing operations of the Company.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

In the most recent reporting periods, extreme occurrences of volatility beyond historical norms have impacted the markets for the Company's fixed income and equity securities. This volatility has impacted liquidity, credit risk, fair value of investments and the term structure of interest rates. These extreme events have not abated and

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

prolonged periods of such volatility represent a new, heightened risk for all financial institutions. These ongoing events could negatively affect the Company and policyholder activity, such as a reduction in sales, increased policy surrenders and increased policy loans.. The Company has factored these heightened risks into its risk management processes and its disclosures of financial condition.

Please refer to the Company's 2007 Annual Report on Form 10-K for a more complete discussion of quantitative and qualitative disclosures about market risk.

Item 4. Controls and Procedures

As required by Exchange Act Rule 13a-15(b), Kansas City Life Insurance Company management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation as of the end of the period covered by this report, of the effectiveness of the Company's disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report. As required by Exchange Act 13a-15(d), Kansas City Life Insurance Company management, including the Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of the Company's internal control over financial reporting to determine whether any changes occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect the Company's internal control over financial reporting. Based on that evaluation, there has been no such change during the period covered by this report.

Part II: Other Information

Item 1. Legal Proceedings

The life insurance industry, including the Company and its subsidiaries, has been subject to an increase in litigation in recent years. Such litigation has been pursued on behalf of purported classes of insurance purchasers, often questioning the conduct of insurers in the marketing of their products.

In addition to the above, the Company and its subsidiaries are defendants in, or subject to other claims or legal actions. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive damages. Although no assurances can be given and no determinations can be made at this time, management believes that the ultimate liability, if any, with respect to these other claims and legal actions would have no material effect on the Company's business, results of operations or financial position.

For Immediate Release: October 30, 2008, press release reporting financial results for the third quarter of 2008.

Kansas City Life Announces Third Quarter 2008 Results

Kansas City Life Insurance Company recorded a net loss of \$15.2 million or \$1.30 per share for the third quarter ended September 30, 2008, principally due to net realized losses on investments totaling \$29.3 million or \$19.0 million after tax. The loss for the quarter compares to net income of \$9.1 million or \$0.77 per share for the third quarter one year earlier. The net loss for the nine months totaled \$9.9 million or \$0.85 per share. Excluding the impact of net realized losses on investments, net earnings after tax were \$3.9 million for the quarter and \$14.5 million through the nine months. This compares to \$8.3 million and \$25.0 million for the same periods in 2007, respectively.

The net realized loss for the quarter was the result of the broad and deep economic downturn that has reduced the value of virtually all financial assets, heightened by the recent default and regulatory takeover of high-profile federal agencies and financial institutions. Specifically, Kansas City Life wrote-down \$32.5 million in securities during the quarter, resulting in a net impact of \$20.0 million on earnings after taxes and the effect on deferred acquisition costs. Kansas City Life has historically maintained an exceptionally strong capital position and a well diversified investment portfolio to persist through economic cycles. While diversification is a key to mitigating investment risk, it also requires exposure to broad sectors of the economy and general market risks. The continuing strength of the Company's capital and asset quality, along with diversification and other elements of the risk management processes employed, provide the basis for Kansas City Life to persevere through this cycle of economic uncertainty and to take advantage of opportunities offered through such periods.

In spite of the investment climate, insurance revenues improved in both the quarter and nine months due to increases in new premiums in several product lines. Total new premiums increased 21% for the quarter, including a 9% increase in individual life sales, a 41% increase in immediate annuity premiums, a 19% increase in group life insurance sales and a 22% increase in new group accident and health premiums. New deposits on both universal life and variable universal life products increased 4%, while deposits from fixed deferred annuities declined 25% and variable annuities declined 15%. Renewal premiums and renewal deposits both increased 1% in the third quarter, reflecting the impact of increased new sales in prior periods.

Total new premiums increased 23% for the nine-month period, including a 7% increase in individual life sales, a 64% increase in immediate annuities, a 45% increase in group life insurance sales, and a 7% increase in new group accident and health premiums. New deposits for the nine months were mixed. New universal life deposits decreased 7% and new fixed deferred annuity sales declined 13%, while total new variable product sales increased 4% on the strength of increased new variable annuities. Renewal premiums decreased 1% and renewal deposits declined 5% for the nine months. The Company continues to focus significant efforts on recruiting new agents and general agents and has focused more resources directly in the field to assist with the sales efforts.

Reduced investment assets for the comparative periods was the primary reason for a decline in net investment income of 5% and 4% in the third quarter and nine months, respectively, from the prior year. Meanwhile, policyholder benefits increased 5% in the third quarter and 6% for the nine months, primarily due to an increase in group accident and health benefits and increased reserves from the greater sale of immediate

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

annuities. Partially offsetting these unfavorable changes, death benefits, individual life surrenders and interest credited to policyholder account balances all declined in the third quarter. Operating expenses increased \$4.6 million in the third quarter and \$5.1 million in the nine months, primarily reflecting changes in accrued employee benefit costs and salaries.

On October 27, 2008, the Kansas City Life Board of Directors declared a quarterly dividend of \$0.27 per share, payable on November 11, 2008 to stockholders of record on November 6, 2008.

In spite of being in the downward trend of the current economic cycle, Kansas City Life continues to maintain a steady course. The Company is well capitalized, has no long-term debt obligations, has strong asset quality, and ample cash flow and external liquidity resources. Further, the Company remains deeply committed to providing Security Assured to existing and many future generations of prospective policyholders.

Kansas City Life Insurance Company (NASDAQ: KCLI) was established in 1895 and is based in Kansas City, Missouri. The Company's primary business is providing financial protection through the sale of life insurance and annuities. The Company's revenues were \$439.2 million in 2007, and assets and life insurance in force were \$4.4 billion and \$31.1 billion, respectively, as of December 31, 2007. The Company operates in 49 states and the District of Columbia. For more information, please visit www.kclife.com.
