Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.
For the quarterly period ended June 30, 2009, or

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.
For the transition period from _____ to _____
Commission file number: 0-2757

THE MONARCH CEMENT COMPANY

(Exact name of registrant as specified in its charter)

KANSAS

(state or other jurisdiction of incorporation
or organization)

48-0340590

(IRS employer identification no.)

P.O. BOX 1000, HUMBOLDT, KANSAS
(address of principal executive offices)

66748-0900
(zip code)

Registrant's telephone number, including area code: (620) 473-2222

(former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
YES NO

Edgar Filing: MONARCH CEMENT CO - Form 10-Q

As of July 30, 2009, there were 2,527,367 shares of Capital Stock, par value \$2.50 per share outstanding and 1,496,831 shares of Class B Capital Stock, par value \$2.50 per share outstanding.

PART I - FINANCIAL INFORMATION

The condensed consolidated financial statements included in this report have been prepared by our Company without audit. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. Our Company believes that the disclosures are adequate to make the information presented not misleading. The accompanying consolidated financial statements reflect all adjustments that are, in the opinion of management, necessary for a fair statement of the results of operations for the interim periods presented. Those adjustments consist only of normal, recurring adjustments. The condensed consolidated balance sheet of the Company as of December 31, 2008 has been derived from the audited consolidated balance sheet of the Company as of that date. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in our Company's most recent annual report on Form 10-K for 2008 filed with the Securities and Exchange Commission. The results of operations for the period are not necessarily indicative of the results to be expected for the full year.

Item 1. Financial Statements

THE MONARCH
CEMENT
COMPANY AND
SUBSIDIARIES
NOTES TO THE
CONDENSED
CONSOLIDATED
FINANCIAL
STATEMENTS
June 30, 2009
(Unaudited), and
December 31,
2008

- For a summary of accounting policies, the reader should refer to Note 1 of the consolidated financial statements included in our Company's most recent annual report on Form 10-K.
- Certain reclassifications have been made to the 2008 financial statements to conform to the current year presentation. These reclassifications had no effect on net earnings.
- For the six months ended June 30, 2009, we incurred a temporary LIFO liquidation gain due to reductions in finished cement and work in process inventory of \$.1 million which we expect to be restored by the end of the year. The temporary LIFO liquidation gain has been deferred as a component of accrued liabilities. We did not have any temporary LIFO liquidation gains during the six months ended June 30, 2008. For the three months ended June 30, 2009, we restored \$.2 million of the LIFO liquidation incurred in the first 3 months of 2009. We did not have any temporary LIFO liquidation gains during the three months ended June 30, 2008.
- Basic earnings per share of capital stock has been calculated based on the weighted average shares outstanding during each of the reporting periods. The weighted average number of shares outstanding was 4,024,198 and 4,026,958 in the second quarter of 2009 and 2008, respectively. The weighted average number of shares outstanding was 4,024,198 and 4,026,958 in the first six months of 2009 and 2008, respectively. The Company has no common stock equivalents and therefore, does not report diluted earnings per share.
- Our Company groups its operations into two lines of business - Cement Business and Ready-Mixed Concrete Business. The "Cement Business" refers to our manufacture and sale of cement and "Ready-Mixed Concrete Business" refers to our ready-mixed concrete, concrete products, precast concrete construction, and sundry building materials business. Corporate assets for 2009 and 2008 include cash and cash equivalents, deferred income taxes, investments and other assets. Following is information for each line for the periods indicated:

	Cement Business	Ready-Mixed Concrete Business	Adjustments and Eliminations	Consolidated

Unrecognized net loss	-	-	201,202	216,151
Net periodic expense	\$ 577,812	\$ 153,651	\$ 797,919	\$ 664,521

As previously disclosed in our financial statements for the year ended December 31, 2008, Monarch expects to contribute approximately \$1,880,000 to the pension fund in 2009. As of June 30, 2009, we have contributed about \$550,000 and anticipate contributing an additional \$1,330,000 to this plan in 2009 for a total of \$1,880,000. The other benefits consist of postretirement benefits that are self-insured by Monarch and are paid out of Monarch's general assets. As previously disclosed in our financial statements for the year ended December 31, 2008, Monarch expects expenditures of approximately \$1,560,000 for this plan in 2009. As of June 30, 2009, we have spent about \$760,000 and anticipate spending an additional \$800,000 on this plan in 2009 for a total of \$1,560,000.

7. The Company or one of its subsidiaries files income tax returns in the U.S. Federal jurisdiction and various state jurisdictions. With few exceptions, the Company is no longer subject to U.S. Federal or state income tax examinations by tax authorities for years before 2005.
8. As of June 30, 2009, the amount of accounts payable related to property, plant and equipment was \$272,322 compared to December 31, 2008 which was \$221,914.
9. Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) 157, "Fair Value Measurements" establishes a single definition of fair value and a framework for measuring fair value, sets out a fair value hierarchy to be used to classify the source of information used in fair value measurements and requires new disclosures of assets and liabilities measured at fair value based on their level in the hierarchy. The standard describes three levels of inputs that may be used to measure fair value. Level 1 uses quoted prices in active markets for identical assets or liabilities. Level 2 uses observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in active markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 3 uses unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. SFAS 157 is effective on a prospective basis for all fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. In February 2008, the FASB issued Staff Positions (FSP) 157-1 which removed certain leasing transactions from its scope and FSP 157-2 which partially deferred the effective date of SFAS 157 for one year for certain non-financial assets and liabilities to fiscal years beginning after November 15, 2008. The Company's adoption of FSP 157-2 on January 1, 2009 did not have a material impact on the consolidated financial statements. In October 2008, the FASB issued FSP FAS 157-3, "Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active". This FSP provides additional guidance regarding the application of SFAS 157, "Fair Value Measurements", in an inactive market and illustrates how an entity would determine fair value when the market for a financial asset is not active. FSP FAS 157-3 is effective immediately upon issuance and applies to prior periods for which financial statements have not been issued. We adopted the provisions of FSP FAS 157-3 as of December 31, 2008. The adoption of this standard did not have a material impact on our consolidated financial statements. The Company also adopted FSP FAS 157-4, "Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly", on April 1, 2009, which provides guidance on how to determine the fair value of assets and liabilities when the volume and level of activity for the asset or liability has significantly decreased when compared with normal market activity for the asset or liability as well as guidance on identifying circumstances that indicate a transaction is not orderly. The adoption of this standard did not have a material impact on our consolidated financial statements.

Edgar Filing: MONARCH CEMENT CO - Form 10-Q

Fair value is the estimated amount at which financial assets or liabilities could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Cash and cash equivalents, short-term investments, receivables, accounts payable and long-term debt have carrying values that approximate fair values. Investment fair values equal quoted market prices, if available. If quoted market prices are not available, fair value is estimated based on quoted market prices of similar securities. If it is not practicable to estimate the fair value of an investment, the investment is recorded at cost and evaluated quarterly for events that may adversely impact its fair value.

The following table summarizes the bases used to measure certain assets at fair value on a recurring basis in the balance sheet:

Edgar Filing: MONARCH CEMENT CO - Form 10-Q

		Fair Value Measurements at Reporting Date Using:		
		Quoted Prices		
		in Active	Significant	
		Markets for	Other	Significant
		Identical	Observable	Unobservable
		Assets	Inputs	Input
		(Level 1)	(Level 2)	(Level 3)
June 30, 2009	Balance			
Assets:				
Available-for-sale securities	\$ 13,765,275	\$ 13,765,275	\$ -	\$ -
Total	\$ 13,765,275	\$ 13,765,275	\$ -	\$ -
December 31, 2008				
Assets:				
Available-for-sale securities	\$ 10,939,044	\$ 10,939,044	\$ -	\$ -
Total	\$ 10,939,044	\$ 10,939,044	\$ -	\$ -

The Company has no liabilities in either year requiring remeasurement to fair value on a recurring basis in the balance sheet. The Company has no additional assets or liabilities in either year requiring remeasurement to fair value on a non-recurring basis in the balance sheet.

The following table shows the gross unrealized losses and fair value of the Company's investments with unrealized losses that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at June 30, 2009:

Description of Securities	Less than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Marketable equity securities	\$ 3,626,082	\$ 1,149,938	\$ -	\$ -	\$ 3,626,082	\$ 1,149,938
Investments in equity securities carried at cost	1,434,500	223,100	-	-	1,434,500	223,100
Total	\$ 5,060,582	\$ 1,373,038	\$ -	\$ -	\$ 5,060,582	\$ 1,373,038

Due to the adverse market conditions, the Company's investments in marketable equity securities carried at fair value were evaluated for impairment by comparing the specifically identified cost of each purchase to market price. As a result of these evaluations, the Company did not identify any other-than-temporary impairments in investments which would have resulted in a recognized loss in earnings of equity investments. The Company did identify some specific purchases of marketable equity securities that were not other-than-temporarily impaired resulting in the recognition of unrealized losses (see table above). When the Company evaluated impairment by comparing the specifically identified cost of each purchase to market price as of July 31, 2009, these securities had recovered 100% of their June 30, 2009 temporary impairments excluding the investments in the common stock of one company, a producer of construction aggregates, construction materials and cement. By July 31, 2009, using the specific identification method, the stock in this company had recovered 22% of its June 30, 2009 temporary impairment. The severity of the impairment for that company's common stock (fair value as of July 31, 2009 is approximately 24 percent less than cost) and the duration of the impairment (less than 6 months) correlate with the continued weakening of the industry. The Company evaluated the near-term prospects of all of the issuers in relation to the severity and

duration of the impairments. Based on that evaluation and the Company's ability and intent to hold these investments for a reasonable period of time sufficient for a forecasted recovery of the entire cost bases of the securities, the Company does not consider those investments to be other-than-temporarily impaired at June 30, 2009.

The Company owns stock in two privately-owned companies accounted for by the cost method; one in the brick industry and the other in the ethanol production industry. Due to continued adverse market conditions, these investments were evaluated for impairment based on average cost and specific identification, respectively. As a result of those evaluations, the Company identified an unrealized loss on the brick industry investment of \$.2 million (see table above). The severity of the impairment (fair value is approximately 13% less than cost) and the duration of the impairment (less than 9 months) correlate with the weak performance within its industry. Based on the Company's evaluation through a discounted cash flow valuation of the investee and the Company's ability and intent to hold the investment for a reasonable period of time sufficient for a forecasted recovery of the entire cost bases of the securities, the Company does not consider this investment to be other-than-temporarily impaired at June 30, 2009. The aggregate carrying cost of the Company's cost-method investments totaled \$2.0 million at June 30, 2009 and December 31, 2008. The aggregate cost after impairments of the Company's cost-method investments totaled \$1.8 million at June 30, 2009 and December 31, 2008.

The investment results for June 30, 2009 and December 31, 2008 are as follows:

	06/30/2009	12/31/2008
Fair value of equity securities	\$ 15,564,224	\$ 12,740,244
Cost of equity securities	13,024,224	10,760,244
Net unrealized gains	\$ 2,540,000	\$ 1,980,000
Unrealized gain (loss) recorded in equity		
Equity securities carried at fair value	\$ 1,747,000	\$ 1,411,000
Equity securities carried at cost	(223,000)	(223,000)
Deferred income taxes	1,016,000	792,000
	\$ 2,540,000	\$ 1,980,000
Proceeds from sale of equity securities	\$ 933,870	\$ -
Realized gains on equity securities	\$ 69,565	\$ -
Realized losses due to other-than-temporary impairment of equity securities	\$ -	\$ (4,157,612)

10. In April 2009, the FASB issued FSP No. FAS 107-1 and Accounting Principles Board (APB) Opinion 28-1, "Interim Disclosures about Fair Value of Financial Instruments, an amendment of FASB Statement No. 107." This FSP essentially expands the disclosure about the fair value of financial instruments that were previously required only annually to also be required for interim period reporting. In addition, the FSP requires certain additional disclosures regarding the methods and significant assumptions used to estimate the fair value of financial instruments. This FSP was effective for the Company beginning April 1, 2009 on a prospective basis. The adoption of FSP FAS 107-1 and APB 28-1 did not have a financial impact on the Company's Consolidated Financial Statements. See Note 9 for disclosures required by this standard.

In April 2009, the FASB issued FSP FAS 115-2 and FAS 124-2, "Recognition and Presentation of Other-Than-Temporary Impairments". FSP FAS 115-2 and 124-2 amend the other-than-temporary impairment ("OTTI") guidance for evaluating and recognizing impairment of debt securities in accordance with accounting principles generally accepted in the United States ("GAAP") and expand the disclosure requirements in interim and annual financial statements for both debt and equity securities to enable users to understand the types of securities held, including information about investments in an unrealized loss position, the reasons that a portion of an OTTI of a debt security was not recognized in earnings and the methodology and significant inputs used to calculate the portion of the total OTTI that was recognized in earnings. These FSPs require that if an entity intends to sell, or more likely

than not will be required to sell, a debt security before recovery of its amortized cost basis, the OTTI shall be recognized in earnings. If neither of these factors applies, the portion of the OTTI representing the credit loss shall be recognized in earnings and the remaining portion of the OTTI shall be recognized in other comprehensive loss. FSP FAS 115-2 and 124-2 are effective for interim or annual periods ending after June 15, 2009. The adoption of FSP FAS 115-2 and FAS 124-2 did not impact the Company's financial position, results of operations or cash flows. See Note 9 for disclosures required by this standard.

In May 2009, the FASB issued SFAS No. 165, "Subsequent Events", which establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. SFAS 165 is effective for interim or annual periods ending after June 15, 2009 on a prospective basis. On June 30, 2009, the Company adopted the provisions of SFAS 165. The adoption of SFAS 165 did not have a material impact on the Company's consolidated financial statements. See Note 12 for disclosures required by this standard.

In June 2009, the FASB issued SFAS No. 168, "The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles". SFAS No. 168 identifies the FASB Accounting Standards Codification as the authoritative source of generally accepted accounting principles in the United States. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under federal securities laws are also sources of authoritative GAAP for SEC registrants. SFAS No. 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009. We do not expect adoption to have a material impact on our consolidated financial statements.

Effective January 1, 2009, the Company adopted SFAS 160, "Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51". Upon adoption, minority interest previously presented in the mezzanine section of the balance sheet has been retrospectively reclassified as noncontrolling interest within equity. In addition, the consolidated net income and comprehensive income (loss) presented in the statements of income have been retrospectively revised to include the net loss attributable to the noncontrolling interest. Beginning January 1, 2009, losses attributable to the noncontrolling interest have been allocated to the noncontrolling interest even if the carrying amount of the noncontrolling interest is reduced below zero. Any changes in ownership after January 1, 2009, that did not result in a loss of control have been prospectively accounted for as equity transactions in accordance with SFAS 160.

In March 2008, the FASB issued SFAS 161, "Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133". FASB Statement No. 133, "Accounting for Derivative Instruments and Hedging Activities", establishes, among other things, the disclosure requirements for derivative instruments and for hedging activities. This statement amends the disclosure requirements of SFAS 133 to provide an enhanced understanding of how and why derivative instruments are used, how they are accounted for and their effect on an entity's financial condition, performance and cash flows. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. For the Company, SFAS 161 is effective beginning January 1, 2009. Since the Company does not participate in hedging activities and does not use derivative instruments, the Company's adoption of SFAS 161 on January 1, 2009 did not have any impact on our disclosures or our consolidated financial statements.

Effective January 1, 2009, the Company adopted SFAS No. 141R (revised 2007), "Business Combinations", which replaced SFAS 141. SFAS 141R retains the fundamental requirements of SFAS 141, but revises certain principles, including the definition of a business combination, the recognition and measurement of assets acquired and liabilities assumed in a business combination, the accounting for goodwill, and financial statement disclosure. SFAS 141R to date did not have any impact on our disclosures or our consolidated financial statements, but will be applicable to the Company for business combinations that may occur in the future.

Other, net contains miscellaneous nonoperating income (expense) items other than interest income, interest expense, gains on equity investments and dividend income. There were no material items in other, net for the first six months of 2009. Material items in other, net included income from oil properties of \$207,372 and income from scrap sales of \$159,748 for the first six months of 2008. There were no material items in other, net for the three months ending June 30, 2009. For the three months ending June 30, 2008, material items in other, net included income from oil properties of \$118,017 and income from scrap sales of \$84,493.

12. Subsequent events have been evaluated through August 10, 2009, which is the date the financial statements were issued. During this period, no material recognizable subsequent events were identified.

ITEM 2.
MANAGEMENT'S
DISCUSSION
AND ANALYSIS
OF FINANCIAL
CONDITION AND
RESULTS OF
OPERATIONS

FORWARD-LOOKING STATEMENTS

Certain statements under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this Form 10-Q report filed with the Securities and Exchange Commission, constitute "forward-looking statements". Except for historical information, the statements made in this report are forward-looking statements that involve risks and uncertainties. You can identify these statements by forward-looking words such as "should", "expect", "anticipate", "believe", "intend", "may", "hope", "forecast" or similar words. In particular, statements with respect to variations in future demand for our products in our market area or the future activity of federal and state highway programs and other major construction projects, the timing, scope, cost and benefits of our proposed and recently completed capital improvements and expansion plans, including the resulting increase in production capacity, our forecasted cement sales, the timing and source of funds for the repayment of our revolving line of credit, our ability to pay dividends at the current level, our anticipated expenditures for benefit plans, and our anticipated increase in solid fuels and electricity required to operate our facilities and equipment are all forward-looking statements. You should be aware that forward-looking statements involve known and unknown risks, uncertainties, and other factors that may affect the actual results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others:

- general economic and business conditions;
- competition;
- raw material and other operating costs;
- costs of capital equipment;
- changes in business strategy or expansion plans;
- demand for our Company's products;
- cyclical and seasonal nature of our business;
- the effect of weather on our business;
- the effect of environmental and other government regulations;
- the availability of credit at reasonable prices; and
- the effect of federal and state funding on demand for our products.

RESULTS OF OPERATIONS - CRITICAL ACCOUNTING POLICIES

Reference is made to the Management's Discussion and Analysis of Financial Condition and Results of Operations - Accounting Policies incorporated herein by reference to Item 7 of the Company's Annual Report on Form 10-K for the year ended December 31, 2008 for accounting policies which are considered by management to be critical to an understanding of the Company's financial statements.

RESULTS OF OPERATIONS - OVERVIEW

Our products are used in residential, commercial and governmental construction. In recent years, the Company has spent substantial sums on major plant modifications designed to increase our cement production capacity to meet our customers' needs and to improve our production processes. Improvements are planned over the next few years to further improve our production processes, particularly in the handling and processing of raw materials.

The residential construction slowdown which began during 2008 continued in 2009 to suppress the demand for cement and ready-mixed concrete. A reduction in cement sales, and accordingly ready-mix concrete sales, was projected by the Portland Cement Association. Prior to the second quarter of 2009, most of our market had not experienced the reduction as severely as other areas of the country. However, demand has now become increasingly suppressed in some areas of our market as well.

Based on sales forecasts and inventory levels at the beginning of 2008, the Company elected to reduce cement production in the first quarter of 2008 and use that opportunity to undertake major plant repairs and maintenance, largely using our own production personnel. Based on sales forecasts and inventory levels at the beginning of 2009, the Company elected again to reduce cement production in the first quarter and early in the second quarter of 2009 to undertake additional major plant repairs and maintenance, largely using our own production personnel. The Company normally performs repairs and maintenance every winter, but the decision to use employees or outside contractors is determined by anticipated sales demand, whether we have the internal expertise and our inventory target levels. These shutdowns adversely impacted our gross profit margins in the first six months of 2008 and 2009, although not as adversely in 2009.

RESULTS OF OPERATIONS - SECOND QUARTER OF 2009 COMPARED TO SECOND QUARTER OF 2008

Consolidated net sales for the three months ended June 30, 2009, decreased by \$6.8 million when compared to the three months ended June 30, 2008. Sales in our Cement Business were lower by \$4.1 million and sales in our Ready-Mixed Concrete Business were lower by \$2.7 million. Cement Business sales decreased \$4.1 million due to a 20.8% decrease in volume sold. Increases in construction contract sales of \$2.2 million helped reverse the declines in other areas of the Ready-Mix Concrete Business. Ready-mixed concrete sales decreased \$3.9 million due to a 25.6% decline in cubic yards sold. Block, brick and other sundry item sales declined by \$1.0 million.

Consolidated cost of sales for the three months ended June 30, 2009, decreased by \$6.1 million when compared to the three months ended June 30, 2008. Cost of sales in our Cement Business was lower by \$3.0 million and cost of sales in our Ready-Mixed Concrete Business was lower by \$3.1 million. Cement Business cost of sales decreased primarily due to the 20.8% decrease in volume sold. Ready-Mixed Concrete Business cost of sales decreased primarily due to the 25.6% decrease in cubic yards of ready mix sold.

As a result of the above sales and cost of sales factors, our overall gross profit rate for the three months ended June 30, 2009 was 22.8% versus 20.9% for the three months ended June 30, 2008. The gross profit rate for the Cement Business improved from 33.6% for the three months ended June 30, 2008 to 35.4% for the three months ended June 30, 2009. The gross profit rate for the Ready-Mixed Concrete Business improved from 10.3% for the three months ended June 30, 2008 to 13.3% for the three months ended June 30, 2009.

Selling, general, and administrative expenses increased by .8% for the three months ended June 30, 2009 compared to the three months ended June 30, 2008. These costs are normally considered fixed costs that do not vary significantly with changes in sales volume.

The effective tax rates for the three months ended June 30, 2009 and 2008 were 28.1% and 28.8%, respectively. The Company's effective tax rate differs from the federal and state statutory income tax rate primarily due to the effects of percentage depletion, domestic production activities deduction and valuation allowance. Taxes for the current year are estimated based on prior years' effective tax rates.

RESULTS OF OPERATIONS - FIRST SIX MONTHS OF 2009 COMPARED TO THE FIRST SIX MONTHS OF 2008

Consolidated net sales for the six months ended June 30, 2009, decreased by \$6.6 million when compared to the six months ended June 30, 2008. Sales in our Cement Business were lower by \$3.7 million and sales in our Ready-Mixed Concrete Business were lower by \$2.9 million. Cement Business sales decreased \$3.4 million due to a 11.7% decline in volume sold and decreased \$.3 million due to price decreases. The Ready-Mixed Concrete Business sales decrease was primarily due to a 17.1% decline in cubic yards of ready mix sold resulting in a \$4.2 million decline in sales partially offset \$.5 million due to a 2.5% increase in cubic yard prices. In addition, block, brick and other sundry item sales declined by \$.9 million and construction contract sales increased \$1.7 million.

Consolidated cost of sales for the six months ended June 30, 2009, decreased by \$5.0 million when compared to the six months ended June 30, 2008. Cost of sales in our Cement Business was lower by \$2.2 million and cost of sales in our Ready-Mixed Concrete Business was lower by \$2.8 million. Cement Business cost of sales decreased primarily due to the 11.7% decrease in volume sold. Ready-Mixed Concrete Business cost of sales decreased primarily due to the 17.1% decrease in cubic yards of ready mix sold and a significant reduction in diesel fuel prices.

As a result of the above sales and cost of sales factors, our overall gross profit rate for the six months ended June 30, 2009 was 14.2% versus 15.1% for the six months ended June 30, 2008. The gross profit rate for the Cement Business declined from 24.1% for the six months ended June 30, 2008 to 21.7% for the six months ended June 30, 2009. The gross profit rate for the Ready-Mixed Concrete Business increased slightly from 8.4% for the six months ended June 30, 2008 to 8.8% for the six months ended June 30, 2009.

Selling, general, and administrative expenses increased by 3.3% during the first six months of 2009 compared to the first six months of 2008. These costs are normally considered fixed costs that do not vary significantly with changes in sales volume. This increase is primarily due to expenses related to pension expenses.

The effective tax rates for the six months ended June 30, 2009 and 2008 were 28.4% and 28.8%, respectively. The Company's effective tax rate differs from the federal and state statutory income tax rate primarily due to the effects of percentage depletion, domestic production activities deduction and valuation allowance. Taxes for the current year are estimated based on prior years' effective tax rates.

LIQUIDITY

The Company considers all liquid investments with original maturities of three months or less to be cash equivalents. At June 30, 2009 and December 31, 2008, cash equivalents consisted primarily of money market investments and repurchase agreements with various banks which are not guaranteed by the FDIC. The financial institutions holding the Company's cash accounts are participating in the FDIC's Transaction Account Guarantee Program. Under that program, through December 31, 2009, all non interest-bearing transaction accounts are fully guaranteed by the FDIC for the entire amount in the account.

We are able to meet our cash needs primarily from a combination of operations and bank loans.

Net cash used for operating activities totaled \$.1 million for the six months ended June 30, 2009, an increase in the use of cash of \$6.4 million as compared with the six months ended June 30, 2008. Net income decreased \$1.5 million from 2008 to 2009 primarily due to the decline in overall sales volume combined with a 2.7% decline in the gross profit margin in the Cement Business. Receivables increased more in the first six months of 2008 than 2009 due primarily to a greater increase in June sales in 2008 over December sales in 2007 compared to the increase in June sales in 2009 over December sales in 2008. While the Company reduced production in the first quarter of 2008 and 2009, inventories increased more in the first six months of 2009 than the first six months of 2008. Finished cement inventory increased \$2.5 million and work-in-process increased \$.3 million during the first six months of 2009 while

finished cement decreased \$1.6 million and work-in-process decreased \$1.8 million during the first six months of 2008. Less cash was used in the first six months of 2008 than 2009 due to the \$4.2 million increase in payables during the first six months of 2008 as compared to the \$.4 million increase in payables for 2009.

Net cash used for investing activities totaled \$4.4 million in the first six months of 2009 while \$10.2 million was used in the first six months of 2008. The \$5.8 million decrease in net cash used for investing activities for the six months of 2008 compared to the first six months of 2009 is principally due to using \$2.3 million in cash for a business acquisition in the first six months of 2008 that did not occur in the corresponding period of 2009, disposing of equity investments in 2009 which provided \$.9 million while no investments were disposed of in 2008, and receiving \$2.1 million for short-term investments that matured in 2009 while none matured in the corresponding period of 2008.

Net cash provided by financing activities totaled \$4.5 million for the six months ending June 30, 2009 while financing activities provided \$3.2 million during the same period in 2008. The \$1.3 million increase in cash provided in 2009 over 2008 was primarily the result of the \$2.1 million increase in the line of credit by the end of the second quarter of 2009 over the same period in 2008. In 2009, these loans were used to cover increases in receivables, inventories, and equity investments plus approximately \$4.4 million for cash expenditures on property, plant and equipment. In 2008, these loans were used to cover increases in receivables and equity investments plus approximately \$4.7 million for cash expenditures on property, plant and equipment.

In December 2008, Monarch renewed and modified the loan agreement with its current lender, Bank of Oklahoma, N.A., under similar terms as the prior agreement. Monarch's current unsecured credit commitment consists of a \$25.0 million term loan maturing December 31, 2014 and a \$15.0 million line of credit maturing December 31, 2009. The term loan bears a floating interest rate based on the lender's National Prime rate less .75% with a 3.00% interest rate minimum or floor. The line of credit bears a floating interest rate based on the lender's National Prime rate less 1.25% with a 2.50% interest rate minimum or floor. The loan agreement contains a financial covenant related to net worth which the Company was in compliance with at the end of the second quarter of 2009. Prior to the renewal, interest on the Company's term loan was variable and was based on the JP Morgan Chase prime rate less .75%. Interest on the line of credit varied with the lender's National Prime rate less 1.25% for 2008. As of June 30, 2009, we had borrowed \$15.9 million on the term loan and \$9.2 million on the line of credit leaving a balance available on the line of credit of \$5.8 million. The annual weighted average interest rate we paid on the term loan during the second quarter of 2009 and 2008 was 3.25% and 4.35%, respectively, and for the first six months of 2009 and 2008 was 3.25% and 4.91%, respectively. The annual weighted average interest rate we paid on the line of credit during the second quarter of 2009 and 2008 was 2.75% and 3.85%, respectively, and for the first six months of 2009 and 2008 was 2.75% and 4.41%, respectively. As of June 30, 2009, the applicable interest rate was 3.25% on the term loan and 2.75% on the line of credit. The term loan was used to help finance the expansion project at our cement manufacturing facility. The line of credit was used to cover operating expenses primarily during the first six months of the year due to the seasonality of our business and for capital expenditures. Our Board of Directors has given management the authority to borrow an additional \$10 million, for a maximum of \$50 million. We have not discussed additional financing with any banks or other financial institutions; therefore, no assurances can be given that we will be able to obtain this additional borrowing on favorable terms, if at all.

The Company has projects in the planning and design phases in addition to projects already in progress. For discussion of these projects, see paragraph two under "Capital Resources" below. We anticipate capital expenditures for 2009 to be higher than 2008 levels, but we do not anticipate the need for additional bank financing other than that available under the existing line of credit.

For several years the Company has paid a \$.20 per share dividend in January, March, June and September. Beginning with the April 2006 Board of Directors meeting, the Board elected to increase these dividends to \$.21 per share; at the April 2007 Board of Directors meeting, the Board increased the dividend to \$.22 per share; and at the April 2008 Board of Directors meeting, the Board increased the dividend to \$.23 per share. Under the terms and conditions of our loan agreement, the Company is required to maintain a tangible net worth of \$90 million and an

adjusted tangible net worth, which is tangible net worth before other comprehensive income, of \$95 million. The Company was in compliance with these requirements at the end of the second quarter of 2009. Although dividends are declared at the Board's discretion and could be impacted by the minimum net worth requirements of the Company's loan agreement, we believe earnings will support the continued payment of dividends at the current level.

The Company has been required to make a pension contribution each of the past two years. In 2008 and 2007, the Company contributed approximately \$1.4 million and \$.7 million, respectively, to the pension fund. The decline in the bond and stock markets in 2008 significantly reduced the value of our pension funds at December 31, 2008. Based on the pension laws currently in effect, the resulting increase in minimum funding requirements could cause a negative impact to our liquidity.

FINANCIAL CONDITION

Total assets as of June 30, 2009 were \$181.2 million, an increase of \$6.4 million since December 31, 2008. Increases in receivables and finished cement inventory are common during the first six months of the year due to the seasonality of our business (see "Seasonality" below). Receivables and finished cement inventory increased approximately \$2.7 million and \$2.4 million, respectively. Fuel, gypsum, paper sacks and other inventory increased \$.9 million primarily due to purchases of coal and petroleum coke exceeding amounts consumed in the production process. Operating and maintenance supplies inventory increased \$.4 million due to purchases of specialized repair supplies related to the recently completed construction in the production facilities. Management continually evaluates the lead time to obtain repair parts which are critical to its cement operations in determining which parts to keep in inventory. Prepaid expenses increased by \$.5 million primarily due to insurance deposits. Investments increased due to the purchase of \$2.2 million of equity investments, net of disposals plus an unrealized gain of approximately \$.3 million.

Indebtedness increased \$7.7 million during the first six months of 2009 primarily due to funding the increases in receivables, inventories, and equity investments just discussed plus approximately \$4.4 million for cash expenditures for property, plant and equipment.

Cash dividends liability, which is included in accrued liabilities, decreased by \$1.9 million from December 31, 2008 to June 30, 2009 due to the timing of when dividends are declared and paid.

CAPITAL RESOURCES

The Company regularly invests in miscellaneous equipment and facility improvements in both the Cement Business and Ready-Mixed Concrete Business. Capital expenditures during the first six months of 2009 included expenditures on a new fuel handling system. We also invested in routine equipment purchases during the first six months of 2009, primarily in the Ready-Mixed Concrete Business. During the first six months of 2009, cash expenditures for property, plant and equipment totaled approximately \$4.4 million, excluding the amounts that are included in accounts payable.

The Company is currently installing a fuel handling system which is expected to be completed in the third quarter of 2009 at a cost of approximately \$4.0 million. Projects in the planning and design phases include an overland conveyor system to improve efficiencies in moving raw materials. This conveyor system and projects related thereto are expected to cost approximately \$15.0 million to \$25.0 million depending on the exact components of the project undertaken and the volatility of certain material costs, particularly steel. Management has the discretion to postpone components of the project and the discretion to undertake part or the entire project. The overland conveyor system and projects related to it are estimated to take twenty-four to thirty-six months to complete after the first purchase order is issued, which is not expected to occur until 2010. The Company also plans to invest in other miscellaneous equipment and facility improvements in both the Cement Business and Ready-Mixed Concrete Business in 2009. These expenditures are expected to reach approximately \$12.0 million during 2009 and will be

funded with a mixture of cash from operations and temporary bank loans. We do not anticipate the need for additional bank financing beyond the amount available through our existing revolving line of credit.

MARKET RISK

Market risks relating to the Company's operations result primarily from changes in demand for our products. Construction activity, particularly in the residential market, has been adversely impacted by the global financial crisis even though interest rates continue to be at low levels. A continuation of the financial crisis, including a scarcity of credit, or a significant increase in interest rates could lead to a further reduction in construction activities in both the residential and commercial market. Budget shortfalls during economic slowdowns could cause money to be diverted away from highway projects, schools, detention facilities and other governmental construction projects. Reduction in construction activity lowers the demand for cement, ready-mixed concrete, concrete products and sundry building materials. As demand decreases, competition to retain sales volume could create downward pressure on sales prices. The manufacture of cement requires a significant investment in property, plant and equipment and a trained workforce to operate and maintain this equipment. These costs do not materially vary with the level of production. As a result, by operating at or near capacity, regardless of demand, companies can reduce per unit production costs. The continual need to control production costs encourages overproduction during periods of reduced demand.

INFLATION

Inflation directly affects the Company's operating costs. The manufacture of cement requires the use of a significant amount of energy. The Company burns primarily solid fuels, such as coal and petroleum coke, and to a lesser extent natural gas, in its kilns. Increases above the rate of inflation in the cost of these solid fuels, natural gas, or in the electricity required to operate our cement manufacturing equipment could adversely affect our operating profits. Prices of the specialized replacement parts and equipment the Company must continually purchase tend to increase directly with the rate of inflation causing manufacturing costs to increase.

ENVIRONMENTAL REGULATIONS

The American Clean Energy and Security Act of 2009 (ACES), a.k.a H.R.2454, a.k.a. Waxman-Markey was passed by the House of Representatives on June 26, 2009. This legislation proposes to encourage the limitation and or reduction of carbon dioxide, using a method of cap and trade. The Senate is expected to address climate change issues in September. As part of the chemical process involved in the production of portland cement, carbon dioxide is driven off of raw materials. Management is studying practices and technology which may reduce or sequester carbon dioxide emissions. The effect of environmental regulations, and/or noncompliance thereof, may increase taxes, penalties, and the cost of production, as well as require additional capital expenditures for equipment.

On April 21, 2009 the Environmental Protection Agency (EPA) proposed modifications to National Emission Standard for Hazardous Air Pollutants (NESHAP) which would set limits for certain emissions from portland cement kilns. Under the proposal the limits would not be fully implemented until 2013. Management is reviewing this proposal and the best available technology which may achieve compliance if the final rule is promulgated in its present form. Additional capital expenditures may be required to attain the proposed limits.

SEASONALITY

Portland cement is the basic material used in the production of ready-mixed concrete that is used in highway, bridge and building construction. These construction activities are seasonal in nature. During winter months when the ground is frozen, groundwork preparation cannot be completed. Cold temperatures affect concrete set-time, strength and durability, limiting its use in winter months. Dry ground conditions are also required for construction activities to proceed. During the summer, winds and warmer temperatures tend to dry the ground quicker creating fewer delays in construction projects.

Variations in weather conditions from year-to-year significantly affect the demand for our products during any particular quarter; however, our Company's highest revenue and earnings historically occur in its second and third fiscal quarters, April through September.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company invests in equity investments which are subject to market fluctuations. The Company had \$15.6 million of equity securities, primarily of publicly traded entities, as of June 30, 2009. The aggregate amount of securities carried at cost, for which the Company has not elected the fair value option, was \$1.8 million as of June 30, 2009. The remaining \$13.8 million in equity investments, which are stated at fair market value, are not hedged and are exposed to the risk of changing market prices. The Company classifies all securities as "available-for-sale" for accounting purposes and marks them to market on the balance sheet at the end of each period unless they are securities for which the Company has not elected the fair value option. Securities carried at cost are adjusted for impairment, if conditions warrant. Management estimates that its publicly traded investments will generally be consistent with trends and movements of the overall stock market excluding any unusual situations. An immediate 10% change in the market price of our equity securities would have a \$.9 million effect on comprehensive income. At June 30, 2009, the Company evaluated all of its equity investments for impairment. The results of those evaluations are discussed in Note 9 of Notes to the Condensed Consolidated Financial Statements.

The Company also has \$25.1 million of bank loans as of June 30, 2009. Interest rates on the Company's term loan and line of credit are variable, subject to interest rate minimums or floors, and are based on the lender's National Prime rate less .75% and lender's National Prime rate less 1.25%, respectively.

Item 4. Controls and Procedures

The Company maintains disclosure controls and procedures (as defined in Rules 13a-5(e) and 15d-15(e) under the Securities Exchange Act of 1934) that are designed to ensure that information required to be disclosed in the Company's reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to the Company's management, including its President and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

As of the end of the period covered by this report, an evaluation was carried out by the Company's management, including its President and Chairman of the Board of Directors and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures (as defined in Rules 13a-5(e) or 15d-15(e) under the Exchange Act). Based upon that evaluation, the Company's President and Chairman of the Board of Directors and Chief Financial Officer concluded that these disclosure controls and procedures were effective as of the end of the period covered by this report.

There were no changes in our internal control over financial reporting that occurred during the quarter ended June 30, 2009 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company and Tulsa Dynaspan, Inc. (TDI) a subsidiary of the Company, were defendants in a case brought by David Markle, Richard Evilsizer, and five other named plaintiffs, filed in the District Court of Tulsa County, Oklahoma, on December 29, 2004 and amended on January 19, 2005, January 6, 2006, August 18, 2006, and January 12, 2007. Prior to the August 18, 2006 amendment, Plaintiffs dismissed claims they had previously asserted for defamation and various business torts, derivative claims brought on behalf of the Company, and claims to ownership of an invention relating to parking garage construction. Markle and Evilsizer remained as Plaintiffs; the five other original Plaintiffs remained in the action only as counterclaim defendants. Plaintiffs sought an award of actual and exemplary damages from the Company, one of its directors and four of TDI's directors for alleged breach of fiduciary duties owed to TDI, based upon derivative and breach of contract claims. The Company asserted a counterclaim based upon breach of contract against Markle and TDI asserted counterclaims based upon breach of fiduciary duty, misappropriation, violations of the Computer Fraud and Abuse Act and the Oklahoma Trade Secrets Act, unjust enrichment, and various business torts against all of the original plaintiffs. Plaintiffs also sought an order from the Court that the Company purchase Plaintiffs' shares of TDI stock for fair value. On April 10, 2007, the Court heard arguments on various motions and subsequently entered the following orders: Monarch and the individual directors' motion for summary judgment dismissing all of Plaintiffs' claims was granted; Monarch's motion for summary judgment on its pre-termination competition claim against Markle was granted; TDI's motion for summary judgment against Plaintiffs for unjust enrichment and breach of fiduciary duty was granted; Markle's motion for partial summary judgment on the non-compete agreement executed by the parties was denied. Additional hearings to establish TDI's and Monarch's damages were necessary; all of Plaintiffs' claims were dismissed. Because of the failure of certain plaintiffs to participate in a pretrial conference the proceedings were bifurcated. Markle and Evilsizer later filed bankruptcy. Complaints to collect damages from Markle and Evilsizer were filed in the Bankruptcy courts. Monarch claims against Markle in bankruptcy were dismissed as duplicative; TDI's claim against Markle and Monarch's claim against Evilsizer remained pending. A hearing on actual and punitive damages against Parking Builders, GBS and ENCO was held on February 1, 2008. On February 29, 2008, TDI was awarded \$3,117,574 in actual damages and an additional \$3,117,574 in punitive damages against GBS and ENCO; TDI was awarded \$1,614,720 in actual damages and an additional \$1,614,720 in punitive damages against Parking Builders. No assurances can be given as to the collectability of these damage awards. TDI has settled its claims against Martin and Bobbitt. A judgment has been entered against Markle and in favor of TDI in the amount of \$3.0 million. No assurances can be given as to the collectability of the judgment. TDI has agreed to accept a lesser amount in full satisfaction provided Markle pays cash by a date certain. The action against Evilsizer remains pending.

By letter dated April 27, 2009, the Company was notified by the Kansas Department of Health and Environment (KDHE) of allegations by KDHE that the Company has performed multiple modifications and alterations at the Company's facility for which the Company did not apply for or obtain the KDHE construction permits required by the Kansas Air Quality Act and related regulations. KDHE also alleged that the Company did not apply for or obtain from KDHE the necessary permits for modifications or alterations to a facility that are significant for Prevention of Significant Deterioration (PSD). Based on these allegations, KDHE proposes to assess a civil penalty of \$351,000, and to require the Company to submit a new, complete PSD permit application, including therein a proposal by the Company for installation of air emission controls to achieve Best Available Control Technology (BACT) as provided in applicable regulations. The Company does not agree with certain of KDHE's factual and legal allegations, and is attempting to resolve these issues through negotiation and mutual agreement between the Company and KDHE. The Company reserves all legal rights in the event such a resolution cannot be reached.

Item 4. Submission of Matters to a Vote of Security Holders

At the annual meeting of the stockholders of The Monarch Cement Company held on April 8, 2009, the stockholders elected four Class II Directors, namely, Byron J. Radcliff, Michael R. Wachter, Walter H. Wulf, Jr., and Walter H. Wulf, III to serve terms expiring at the annual meeting of stockholders in 2012. No other matters were voted upon at the annual meeting. Class III Directors, namely, Jack R. Callahan, Ronald E. Callaway, Robert M. Kissick and Byron K. Radcliff and Class I Directors, namely, David L. Deffner, Gayle C. McMillen, and Richard N. Nixon, continue to serve terms expiring at the annual meetings of stockholders in 2010 and 2011, respectively.

The following is a summary of votes cast in the election of Directors at the annual meeting:

	For	Withhold Authority/ Against	Abstentions/Broker Non-votes
Byron J. Radcliff	14,747,556	113,192	-
Michael R. Wachter	15,024,591	113,192	-
Walter H. Wulf, Jr.	14,771,114	113,192	-
Walter H. Wulf, III	14,771,250	113,192	-

Item 6. Exhibits

31.1 Certificate of the President and Chairman of the Board pursuant to Section 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934.

31.2 Certificate of the Chief Financial Officer pursuant to Section 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934.

32.1 18 U.S.C. Section 1350 Certificate of the President and Chairman of the Board dated August 10, 2009.

32.2 18 U.S.C. Section 1350 Certificate of the Chief Financial Officer dated August 10, 2009.

S I G N A T U R E S

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

The Monarch Cement Company
(Registrant)

Date August 10, 2009

/s/ Walter H. Wulf, Jr.
Walter H. Wulf, Jr.
President and
Chairman of the Board

Date August 10, 2009

/s/ Debra P. Roe
Debra P. Roe, CPA
Chief Financial Officer and
Assistant Secretary-Treasurer

EXHIBIT INDEX

Exhibit Number	Description
31.1	Certificate of the President and Chairman of the Board pursuant to Section 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934.
31.2	Certificate of the Chief Financial Officer pursuant to Section 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934.
32.1	18 U.S.C. Section 1350 Certificate of the President and Chairman of the Board dated August 10, 2009.
32.2	18 U.S.C. Section 1350 Certificate of the Chief Financial Officer dated August 10, 2009.
