Exhibit 99.1

AMERISERV FINANCIAL REPORTS EARNINGS FOR THE SECOND QUARTER AND FIRST SIX MONTHS OF 2014

JOHNSTOWN, PA AmeriServ Financial, Inc. (NASDAQ: ASRV) reported second quarter 2014 net income available to common shareholders of \$927,000, or \$0.05 per diluted common share. This compares to net income available to common shareholders of \$1,018,000, or \$0.05 per diluted common share, reported for the second quarter of 2013. For the six month period ended June 30, 2014, the Company reported net income available to common shareholders of \$1,804,000, or \$0.10 per diluted share. When compared to the first six months of 2013, net income available to common shareholders was down by \$218,000 or 10.8% while diluted earnings per share declined by a lesser amount of \$0.01, or 9.1%, as total shares outstanding were lower in 2014 due to the success of the Company's common stock repurchase program which was completed in the second quarter of 2013. The following table highlights the Company's financial performance for both the three and six month periods ended June 30, 2014 and 2013:

	Second Quarter 2014	Second Quarter 2013	Six Months Ended June 30, 2014	Six Months Ended June 30, 2013
Net income	\$979,000	\$1,070,000	\$1,909,000	\$2,126,000
Net income available to common shareholders	\$927,000	\$1,018,000	\$1,804,000	\$2,022,000
Diluted earnings per share	\$ 0.05	\$ 0.05	\$ 0.10	\$0.11

Glenn L. Wilson, President and Chief Executive Officer, commented on the second quarter 2014 financial results: Our strategic focus on growing our loan portfolio while maintaining strong asset quality continues to show favorable results. Over the past twelve months, we have increased total loans by \$53 million, or 7.10%, to a record level of \$805 million. This has been an important factor contributing to the growth in net interest income that AmeriServ Financial has achieved so far in 2014. Additionally, our asset quality metrics continue to be outstanding as non-performing assets are only 0.56% of total loans and our allowance for loan losses provided 256% coverage of non-performing loans at June 30, 2014.

The Company's net interest income in the second quarter of 2014 increased by \$363,000, or 4.5%, from the prior year's second quarter and for the first six months of 2014 increased by \$846,000, or 5.3%, when compared to the first six months of 2013. The Company's net interest margin of 3.52% for the first six months of 2014 was two basis points lower than the net interest margin of 3.54% for the first half of 2013. There was a similar net interest margin decline of three basis points when the second quarter of 2014 is compared to the prior year second quarter. We believe that this performance demonstrates that the recent pace of net interest margin contraction has slowed from the pace of margin decline experienced over the previous two years. The Company has been able to mitigate this net interest margin pressure and to increase net interest income by both growing its earning assets and reducing its cost of funds. Specifically, the earning asset growth has occurred in the loan portfolio as total loans averaged \$791 million in the first half of 2014 which is \$63 million, or 8.7%, higher than the \$728 million average for the first half of 2013. This loan growth reflects the successful results of the Company's more intensive sales calling efforts, with an emphasis on generating commercial loans and owner occupied commercial real estate loans, which qualify as Small Business Lending Fund (SBLF) loans, particularly through its loan production offices. As a result of this growth in SBLF qualified loans, the Company has locked in the lowest preferred dividend rate available under the program of 1% until the first quarter of 2016. Interest income in 2014 has also benefitted from reduced premium amortization on mortgage backed securities due to slower mortgage prepayment speeds. Total interest expense for the first six months of 2014 declined by \$97,000 from the first six months of 2013 due to the Company's proactive efforts to reduce deposit costs. Even with this reduction in deposit costs, the Company still experienced growth in deposits which reflects the loyalty of our core deposit base and ongoing efforts to cross sell new loan customers into deposit products. Specifically, total deposits averaged a record level of \$866 million for the first half of 2014 which is \$28 million, or 3.3%, higher than the \$839 million average in the first half of 2013.

The Company did not record a provision for loan losses in the second quarter of 2014 as compared to a \$150,000 provision recorded in the second quarter of 2013. For the six month period in 2014, the Company also did not record a provision for loan losses compared to a \$100,000 negative provision in the first six months of 2013. The Company continued to maintain outstanding asset quality in the first half of 2014. At June 30, 2014, non-performing assets totaled \$4.5 million, or 0.56%, of total loans which is comparable with the level they have averaged for the past six quarters. The Company experienced net loan recoveries in both the second quarter of 2014 and 2013. For the six month periods, there were modest net loan recoveries of \$46,000, or 0.01%, of total loans in 2014 compared to net loan charge-offs of \$1.3 million, or 0.37% of total loans in 2013. When determining the provision for loan losses, the Company considers a number of factors, some of which include periodic credit reviews, non-performing assets, loan delinquency and charge-off trends, concentrations of credit, loan volume trends and broader local and national economic trends. In summary, the allowance for loan losses provided a strong 256% coverage of non-performing loans, and was 1.26% of total loans at June 30, 2014, compared to 327% of non-performing loans, and 1.29% of total loans, at December 31, 2013.

Total non-interest income in the second quarter of 2014 decreased by \$437,000, or 10.7%, from the prior year's second quarter and for the first six months of 2014 decreased by \$721,000, or 9.1%, when compared to the first six months of 2013. The 2014 declines reflect reduced revenue from residential mortgage banking activities due to lower refinance activity as a result of higher mortgage rates and reduced purchase activity particularly in the first quarter of 2014. This caused gains realized on residential mortgage loan sales into the secondary market and other mortgage related fees to decrease by a total of \$138,000 for the second quarter and \$507,000 for the first six months of 2014. Other factors contributing to the non-interest income decline in the second quarter of 2014 included a \$203,000 decrease in bank owned life insurance revenue due to the receipt of a death claim in the prior year and a \$78,000 loss realized on the sale of an other real estate owned property which contributed to the decline in other income in the second quarter of 2014. For the six month period, these negative items were partially offset by increased fees from our trust and wealth management businesses and increased gains realized on the sale of investment securities. Specifically, trust

and investment advisory fees increased by \$100,000, or 2.6%, for first half of 2014 due to increased assets under management which reflects both successful new business development activities and market appreciation of existing assets. Gains realized on the sale of investment securities increased by \$106,000 for the first six months of 2014 as the Company took advantage of market opportunities to sell certain rapidly prepaying mortgage backed securities. At June 30, 2014, the Company's available for sale investment securities portfolio still had a market value that exceeded its book value by approximately \$3.0 million.

Total non-interest expense in the second quarter of 2014 increased by \$178,000, or 1.7%, from the prior year's second quarter and for the first six months of 2014 increased by \$294,000, or 1.4%, when compared to the first six months of 2013. Salaries and employee benefits were down modestly between periods as the benefits of lower pension expense and incentive compensation expense were partially offset by increased health insurance premiums. Professional fees increased by \$314,000 in the second quarter of 2014 and \$587,000 for the six month period due to higher legal costs and new recurring costs related to outsourcing our computer operations and statement processing to a third party vendor. The overall cost savings benefit from outsourcing these services is captured in lower personnel costs in these departments and reduced software expense which is a key factor contributing to the decline in other expenses of \$75,000 for the second quarter and \$322,000 for the six month period in 2014. Finally, the Company recorded an income tax expense of \$812,000, or an effective tax rate of 29.8%, in the first half of 2014 compared to income tax expense of \$864,000, or an effective tax rate of 28.9%, for the first half of 2013. The effective tax rate was modestly lower in 2013 due to an increased level of tax free earnings from bank owned life insurance.

The Company had total assets of \$1.06 billion, shareholders' equity of \$116 million, a book value of \$5.05 per common share and a tangible book value of \$4.38 per common share at June 30, 2014. The Company has increased its tangible book value per share by 8.7% over the past twelve months. The Company continued to maintain strong capital ratios that exceed the regulatory defined well capitalized status with a risk based capital ratio of 15.23%, an asset leverage ratio of 11.56% and a tangible common equity to tangible assets ratio of 7.83% at June 30, 2014.

-

This news release may contain forward-looking statements that involve risks and uncertainties, as defined in the Private Securities Litigation Reform Act of 1995, including the risks detailed in the Company's Annual Report and Form 10-K to the Securities and Exchange Commission. Actual results may differ materially.
