Disclaimer Regarding Forward-Looking Statements

This quarterly report includes forward-looking statements (within the meaning of Section 27A of the U.S. Securities Act of 1933 and Section 21E of the U.S. Securities Exchange Act of 1934) concerning Canon Inc. (the "Company") and its subsidiaries (collectively "Canon"). To the extent that statements in this quarterly report do not relate to historical or current facts, they constitute forward-looking statements. These forward-looking statements are based on the current assumptions and beliefs of Canon in light of the information currently available to them, and involve known and unknown risks, uncertainties and other factors. Such risks, uncertainties and other factors may cause Canon's actual results, performance, achievements or financial position to be materially different from any future results, performance, achievements or financial position expressed or implied by these forward-looking statements. Canon undertakes no obligation to publicly update any forward-looking statements after the date of this quarterly report. Investors are advised to consult any further disclosures by Canon in its subsequent filings with the U.S. Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934 and its other filings.

The risks, uncertainties and other factors referred to above include, but are not limited to, foreign currency exchange rate fluctuations; the uncertainty of Canon's ability to implement its plans to localize production and other measures to reduce the impact of foreign currency exchange rate fluctuations; uncertainty as to economic conditions in Canon's major markets; uncertainty of continued demand for Canon's high-value-added products; Canon's ability to continue to develop products and to market products that incorporate new technology on a timely basis, are competitively priced, and achieve market acceptance; the possibility of losses resulting from foreign currency transactions designed to reduce financial risks from changes in foreign currency exchange rates; disasters, outrages or similar events; and inventory risk due to disruptions in supply chains and shifts in market demand.

(2) Description of Business

Canon prepares quarterly consolidated financial statements in accordance with U.S. generally accepted accounting principles (U.S. GAAP). The conformity to U.S. GAAP is also applied to sections II. The Business .

Canon (consisting of the Company, 285 consolidated subsidiaries and 10 affiliates accounted for using the equity method, collectively, the Group) is engaged in the development, manufacture, sale and service primarily in the fields of office, consumer, industry and others. No material change in Canon's business has occurred during the three months ended March 31, 2012.

No additions or removals of significant group entities have occurred during the three months ended March 31, 2012.

II. The Business

(1) Risk Factors

No material changes are recognized pursuant to the risk factors of Canon's business indicated in the Annual Securities Report (Yukashoken houkokusho) of the previous fiscal year.

(2) Significant Business Contracts Entered into in the First Quarter of Fiscal 2012

No material contracts were entered into during the three months ended March 31, 2012.

(3) Operating Results

Looking back at the global economy in the first quarter of 2012, in the United States, the economy showed positive signs of recovery as consumer confidence picked up slightly while the European economy recorded negative growth reflecting the impact of the debt crisis on the real economy. Growth in emerging economies, such as China and India, slowed down somewhat due to lagging exports and investment while within Japan, production activities recovered from the previous year's earthquake in Japan and flooding in Thailand. The global economy as a whole realized moderate growth owing to a short-term alleviation of the downward risks related to the debt crisis in Europe and continued domestic demand in emerging economies.

As for the markets in which Canon operates amid these conditions, within the office equipment market, while demand for color multifunction devices (MFDs) continued to display growth, demand within the laser printer market cooled down mainly in Europe. With regard to the consumer products market, demand for digital single-lens reflex (SLR) cameras continued to realize robust growth in all regions. As for inkjet printers, although demand remained solid in emerging economies, sales overall declined due to product supply shortages and other factors. In the industry and others sector, although the market for semiconductor lithography equipment recorded solid growth, demand for equipment used to manufacture large-size liquid crystal display (LCD) panels remained sluggish.

The average values of the yen during the first quarter of the year were ¥79.72 to the U.S. dollar, a year-on-year appreciation of approximately ¥3, and ¥104.57 to the euro, a year-on-year appreciation of approximately ¥8.

Despite improvements in such factors as the downward risks of the global economy that were felt at the beginning of the year and the historically strong yen, the business environment remained harsh in the first quarter as business sentiment, mainly in Europe, worsened and the average values of the yen appreciated. Amid this environment, net sales totaled ¥829.2 billion, a year-on-year decrease of just 1.2%, owing to Group-wide efforts to achieve sales growth. The gross profit ratio declined by 1.3 points from the year-ago period to 47.1%, mainly due to the effects of the strong yen and product mix, while gross profit totaled ¥390.9 billion, a year-on-year decrease of 3.8%. Operating expenses decreased by 4.8% to ¥308.2 billion, owing to efforts to thoroughly reduce spending by controlling expenses more efficiently. As a result, first-quarter operating profit increased by 0.2% to ¥82.7 billion. Other income (deductions) achieved a turnaround of ¥10.5 billion owing to an improvement in foreign currency exchange losses, resulting in income before income taxes of ¥92.7 billion, an increase of 13.0% from the year-ago period. With net income attributable to Canon Inc. increasing by 11.0% to ¥61.5 billion for the quarter, operating profit, income before income taxes and net income attributable to Canon Inc. have realized year-on-year increases for three consecutive quarters.

Basic net income attributable to Canon Inc. stockholders per share was ¥51.53, an increase of ¥6.38 compared with the corresponding quarter of the previous year.

(3) Operating Results (continued)

Looking at Canon's quarterly performance by business unit, within the Office Business Unit, amid the admirable sales performance of color MFDs led by the imageRUNNER ADVANCE C5000/C2000 series, sales volumes of both monochrome and color MFDs increased from the year-ago period. In addition, sales of imagePRESS C7010VPS-series color MFDs for production printing, machines that were jointly developed by Canon and Océ, gained momentum and contributed to increased unit sales of production printing devices. As for laser printers, deteriorating business sentiment along with channel inventory adjustment led to a temporary slowdown in demand mainly in Europe and the United States. Additionally, affected by the appreciation of the yen, sales for the business unit totaled ¥438.0 billion, a decline of 8.9% year on year, while operating profit totaled ¥52.8 billion, a decrease of 16.2%.

Within the Consumer Business Unit, unit sales of digital SLR cameras recorded significant growth for such products as the competitively priced EOS Digital Rebel T3i (EOS 600D) and the advanced-amateur-model EOS 5D Mark II and EOS 60D, driven by efforts to boost production and expand sales in response to heightened demand. The EOS 5D Mark III, which was released in March 2012, displayed robust growth and also contributed to increased sales. As for compact digital cameras, sales of four new ELPH (IXUS)-series and six new PowerShot-series models launched in February this year recorded healthy growth. With regard to inkjet printers, sales volumes declined as the effects of the previous year's flooding in Thailand on production continued to be felt through February this year. Furthermore, the company successfully launched its Cinema EOS System lineup of professional cinematography products, targeting Hollywood and the broader motion picture and television production market, along with the new DreamLabo 5000, targeting the commercial photo printing market. As a result, sales for the Consumer Business Unit increased by 4.8% year on year to ¥303.5 billion, while operating profit increased by 17.1% to ¥46.7 billion.

In the Industry and Others Business Unit, i-line steppers recorded healthy sales thanks to active investment in semiconductor lithography equipment to produce digital semiconductor devices, which are used in smartphones. Unit sales of LCD lithography equipment, on the other hand, dropped substantially in the face of shrinking demand for equipment used in the production of large-size panels, an area in which Canon is particularly strong. Additionally, sales of equipment used to manufacture organic LED (Light-Emitting Diode) panels increased owing to active investment by organic LED panel manufacturers. Consequently, sales for the segment totaled ¥109.8 billion, an increase of 19.4%, while operating profit totaled ¥4.0 billion, a decrease of 39.5% from the year-ago period.

(3) **Operating Results (continued)**

First-quarter results by major geographic area are summarized as follows:

Japan

Owing to the recovery from the aftermath of the earthquake along with the acquisitions of domestic companies, net sales in Japan for the first quarter increased by 7.9% from the year-ago period to ¥669.4 billion. Operating profit dropped 16.2% year on year to ¥72.6 billion for the quarter.

Net sales outside Japan, declined in Americas and Europe due to the effects of the strong yen and harsh business environment in Europe, on the other hand, solid growth of digital SLR cameras and laser printers contributed to sales increase in Asia-Oceania.

Americas

Due to the severe appreciation of the yen against the U.S. dollar and slowed down market of laser printers, sales decreased by 3.0% from the year-ago period to ¥212.2 billion. Operating profit for the quarter totaled ¥4.2 billion, an increase of 305.0% year on year.

Europe

Sales for the quarter decreased by 11.9% from the same period of the previous year to ¥245.6 billion, due to the severe appreciation of the yen against the euro and cooled down market in laser printers caused by the harsh business environment. Operating profit in Europe decreased by 3.8% year on year to ¥10.9 billion for the quarter.

Asia and Oceania

Sales increased by 3.4% to ¥366.2 billion for the first quarter due to solid growth in emerging economies, including sales growth in digital SLR cameras. Operating profit in Asia and Oceania increased 46.0% to ¥20.8 billion for the quarter.

(3) Operating Results (continued)

Cash Flows

During the first quarter of 2012, cash flow from operating activities totaled ¥56.1 billion, a decrease of ¥15.8 billion compared with the year-ago period, owing to the effects of the optimizing of inventory levels in accordance with the recovery in production. Due to increased capital investment relevant to production, cash flow from investing activities increased ¥31.4 billion year on year to ¥77.9 billion. Accordingly, free cash flow totaled negative ¥21.8 billion, a decrease of ¥47.2 billion from the previous year.

Cash flow from financing activities recorded an outlay of ¥131.3 billion, mainly arising from the dividend payout and the repurchase of treasury stock. Owing to these factors, as well as the positive impact from foreign currency translation adjustments, cash and cash equivalents decreased by ¥127.7 billion year on year to ¥645.5 billion.

Management Issues to be Addressed

No material changes or issues with respect to business operations and finance have occurred during the three months ended March 31, 2012.

Research and Development Expenditures

Canon's research and development expenditures for the three months ended March 31, 2012 totaled ¥72.0 billion.

Notes to Consolidated Financial Statements

(1) Basis of Presentation and Significant Accounting Policies

(a) Basis of Presentation

The Company issued convertible debentures in the United States in May 1969 and established a program in which its American Depositary Receipts (ADRs) were traded in the U.S. over-the-counter market. Since then, under the U.S. Securities Act of 1933 and the U.S. Securities Exchange Act of 1934, the Company has prepared its annual consolidated financial statements in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and filed them with the U.S. Securities and Exchange Commission on Form 20-F. The Company's ADRs were listed on the NYSE in September 2000 after being quoted on NASDAQ from February 1972 to September 2000.

Canon's consolidated financial statements are prepared in accordance with the recognition and measurement criteria of accounting principles generally accepted in the United States. Certain disclosures have been omitted.

The number of consolidated subsidiaries and affiliated companies that were accounted for on the equity method basis as of March 31, 2012 and December 31, 2011 are summarized as follows:

	March 31, 2012	December 31, 2011
Consolidated subsidiaries	285	277

(b) Principles of Consolidation

The consolidated financial statements include the accounts of the Company, its majority owned subsidiaries and those variable interest entities where the Company or its consolidated subsidiaries are the primary beneficiaries. All significant intercompany balances and transactions have been eliminated.

(c) Recently Issued Accounting Guidance

In June 2011, the FASB issued an amendment which requires presentation of net income and other comprehensive income in one continuous statement or in two separate but consecutive statements, which is applied retrospectively for all periods presented. Canon adopted this amended guidance from the quarter beginning January 1, 2012. This adoption did not have a material impact on Canon's consolidated results of operations and financial condition.

(2) Investments (continued)

Maturities of available-for-sale debt securities and fund trusts included in short-term investments and investments in the accompanying consolidated balance sheets were as follows at March 31, 2012:

	Millions of yen	
	Cost	Fair value
Due within one year	30	30
Due after one year through five years	953	973
Due after five years through ten years	1,693	1,680
	2,676	2,683

Realized gains and losses are determined using the average cost method and are reflected in earnings. The gross realized losses, including write-downs for impairments that were other than temporary, were not significant for the three months ended March 31, 2012 and 2011. The gross realized gains were not significant for the three months ended March 31, 2012 and 2011.

At March 31, 2012, substantially all of the available-for-sale securities with unrealized losses had been in a continuous unrealized loss position for less than twelve months.

Time deposits with original maturities of more than three months are ¥131,557 million and ¥125,497 million at March 31, 2012 and December 31, 2011, respectively, and are included in short-term investments in the accompanying consolidated balance sheets.

Aggregate cost of non-marketable equity securities accounted for under the cost method totaled ¥15,403 million and ¥14,583 million at March 31, 2012 and December 31, 2011, respectively. These investments were not evaluated for impairment at March 31, 2012 and December 31, 2011, respectively, because (a) Canon did not estimate the fair value of those investments as it was not practicable to estimate the fair value of the investments and (b) Canon did not identify any events or changes in circumstances that might have had significant adverse effects on the fair value of those investments.

Reclassifications from accumulated other comprehensive income (loss) for gains and losses realized in net income was not significant for the three months ended March 31, 2012 and 2011.

(9) Derivatives and Hedging Activities

Risk management policy

Canon operates internationally, exposing it to the risk of changes in foreign currency exchange rates. Derivative financial instruments are comprised principally of foreign exchange contracts utilized by the Company and certain of its subsidiaries to reduce the risk. Canon assesses foreign currency exchange rate risk by continually monitoring changes in the exposures and by evaluating hedging opportunities. Canon does not hold or issue derivative financial instruments for trading purposes. Canon is also exposed to credit-related losses in the event of non-performance by counterparties to derivative financial instruments, but it is not expected that any counterparties will fail to meet their obligations. Most of the counterparties are internationally recognized financial institutions and selected by Canon taking into account their financial condition, and contracts are diversified across a number of major financial institutions.

Foreign currency exchange rate risk management

Canon's international operations expose Canon to the risk of changes in foreign currency exchange rates. Canon uses foreign exchange contracts to manage certain foreign currency exchange exposures principally from the exchange of U.S. dollars and euros into Japanese yen. These contracts are primarily used to hedge the foreign currency exposure of forecasted intercompany sales and intercompany trade receivables that are denominated in foreign currencies. In accordance with Canon's policy, a specific portion of foreign currency exposure resulting from forecasted intercompany sales are hedged using foreign exchange contracts which principally mature within three months.

Cash flow hedge

Changes in the fair value of derivative financial instruments designated as cash flow hedges, including foreign exchange contracts associated with forecasted intercompany sales, are reported in accumulated other comprehensive income (loss). These amounts are subsequently reclassified into earnings through other income (deductions) in the same period as the hedged items affect earnings. Substantially all amounts recorded in accumulated other comprehensive income (loss) as of March 31, 2012 are expected to be recognized in earnings over the next twelve months. Canon excludes the time value component from the assessment of hedge effectiveness. Changes in the fair value of a foreign exchange contract for the period between the date that the forecasted intercompany sales occur and its maturity date are recognized in earnings and not considered hedge ineffectiveness.

Derivatives not designated as hedges

Canon has entered into certain foreign exchange contracts to primarily offset the earnings impact related to fluctuations in foreign currency exchange rates associated with certain assets denominated in foreign currencies. Although these foreign exchange contracts have not been designated as hedges as required in order to apply hedge accounting, the contracts are effective from an economic perspective. The changes in the fair value of these contracts are recorded in earnings immediately.

(10) Commitments and Contingent Liabilities**Commitments**

As of March 31, 2012, commitments outstanding for the purchase of property, plant and equipment approximated ¥55,606 million, and commitments outstanding for the purchase of parts and raw materials approximated ¥79,638 million.

Canon occupies sales offices and other facilities under lease arrangements accounted for as operating leases. Deposits made under such arrangements aggregated ¥13,338 million and ¥14,171 million at March 31, 2012 and December 31, 2011, respectively, and are included in noncurrent receivables in the accompanying consolidated balance sheets.

Future minimum lease payments required under noncancelable operating leases are ¥23,329 million (within one year) and ¥53,902 million (after one year), at March 31, 2012.

Guarantees

Canon provides guarantees for bank loans of its employees, affiliates and other companies. The guarantees for the employees are principally made for their housing loans. The guarantees of loans of its affiliates and other companies are made to ensure that those companies operate with less financial risk.

For each guarantee provided, Canon would have to perform under a guarantee if the borrower defaults on a payment within the contract periods of 1 year to 30 years, in the case of employees with housing loans, and of 1 year to 10 years, in the case of affiliates and other companies. The maximum amount of undiscounted payments Canon would have had to make in the event of default is ¥14,759 million at March 31, 2012. The carrying amounts of the liabilities recognized for Canon's obligations as a guarantor under those guarantees at March 31, 2012 were not significant.

Canon also issues contractual product warranties under which it generally guarantees the performance of products delivered and services rendered for a certain period or term. Estimated product warranty costs are recorded at the time revenue is recognized and are included in selling, general and administrative expenses. Estimates for accrued product warranty costs are based on historical experience. Changes in accrued product warranty cost for the three months ended March 31, 2012 and 2011 is summarized as follows:

Legal proceedings

Canon is involved in various claims and legal actions arising in the ordinary course of business. Canon has recorded provisions for liabilities when it is probable that liabilities have been incurred and the amount of loss can be reasonably estimated. Canon reviews these provisions at least quarterly and adjusts these provisions to reflect the impact of the negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular case. Based on its experience, although litigation is inherently unpredictable, Canon believes that any damage amounts claimed in outstanding matters are not a meaningful indicator of Canon's potential liability. In the opinion of management, any reasonably possible range of losses from outstanding matters would not have a material adverse effect on Canon's consolidated financial position, results of operations, or cash flows.

(11) Disclosures about the Fair Value of Financial Instruments and Concentrations of Credit Risk***Fair value of financial instruments***

The estimated fair values of Canon's financial instruments at March 31, 2012 and December 31, 2011 are set forth below. The following summary excludes cash and cash equivalents, trade receivables, finance receivables, noncurrent receivables, short-term loans, trade payables and accrued expenses for which fair values approximate their carrying amounts. The summary also excludes investments which are disclosed in Note 2.

	Millions of yen			
	March 31, 2012		December 31, 2011	
	Carrying amount	Estimated fair value	Carrying amount	Estimated fair value
Long-term debt, including current installments	(6,685)	(6,669)	(7,070)	(7,053)
Foreign exchange contracts:				
Assets	829	829	4,718	4,718
Liabilities	(12,620)	(12,620)	(2,610)	(2,610)

The following methods and assumptions are used to estimate the fair value in the above table.

Long-term debt

Canon's long-term debt instruments are classified as Level 2 instruments and valued based on the present value of future cash flows associated with each instrument discounted using current market borrowing rates for similar debt instruments of comparable maturity. The levels are more fully described in Note 12.

Foreign exchange contracts

The fair values of foreign exchange contracts are measured based on the market price obtained from financial institutions.

Limitations of fair value estimates

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Concentrations of credit risk

At March 31, 2012 and December 31, 2011, one customer accounted for approximately 18% and 17% of consolidated trade receivables, respectively. Although Canon does not expect that the customer will fail to meet its obligations, Canon is potentially exposed to concentrations of credit risk if the customer failed to perform according to the terms of the contracts.

(12) Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. A three-level fair value hierarchy that prioritizes the inputs used to measure fair value is as follows:

- Level 1 - Inputs are quoted prices in active markets for identical assets or liabilities.
 Level 2 - Inputs are quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs that are derived principally from or corroborated by observable market data by correlation or other means.
 Level 3 - Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable, which reflect the reporting entity's own assumptions about the assumptions that market participants would use in establishing a price.

Assets and liabilities measured at fair value on a recurring basis

The following tables present Canon's assets and liabilities that are measured at fair value on a recurring basis consistent with the fair value hierarchy at March 31, 2012 and December 31, 2011.

Level 1 investments are comprised principally of Japanese equity securities, which are valued using an unadjusted quoted market price in active markets with sufficient volume and frequency of transactions. Level 2 cash and cash equivalents are valued based on market approach, using quoted prices for identical assets in markets that are not active. Level 3 investments are mainly comprised of corporate bonds, which are valued based on cost approach, using unobservable inputs as the market for the assets was not active at the measurement date.

Derivative financial instruments are comprised of foreign exchange contracts. Level 2 derivatives are valued using quotes obtained from counterparties or third parties, which are periodically validated by pricing models using observable market inputs, such as foreign currency exchange rates and interest rates, based on market approach.

The following table presents the changes in Level 3 assets measured on a recurring basis, consisting primarily of corporate bonds, for the three months ended March 31, 2012 and 2011.

Finance receivables represent financing leases which consist of sales-type leases and direct-financing leases resulting from the marketing of Canon's and complementary third-party products primarily in foreign countries. These receivables typically have terms ranging from 1 year to 8 years. Finance receivables are ¥196,969 million and ¥204,428 million at March 31, 2012 and 2011, respectively. Finance receivables which are individually evaluated for impairment at March 31, 2012 and 2011 are not significant.

Balance at March 31, 2011	8,227

Canon has policies in place to ensure that its products are sold to customers with an appropriate credit history, and continuously monitors its customers' credit quality based on information including length of period in arrears, macroeconomic conditions, initiation of legal proceedings against customers and bankruptcy filings. The allowance for credit losses of finance receivables are evaluated collectively based on historical experience of credit losses. An additional reserve for individual accounts is recorded when Canon becomes aware of a customer's inability to meet its financial obligations, such as in the case of bankruptcy filings. Finance receivables which are past due at March 31, 2012 and December 31, 2011 are not significant.
