ITEM 1.01 ENTRY TO A MATERIAL DEFINITIVE AGREEMENT

On January 28, 2005, The Procter & Gamble Company ("Company" or "P&G") announced its proposed merger with The Gillette Company ("Gillette"). The closing of the transaction, which is subject to shareholder and regulatory approval and other conditions, is expected to occur in fall, 2005. P&G's Board of Directors and management are confident that combining P&G and Gillette will create substantial and sustainable shareholder value over the long term. Near term, the Company must focus on the successful integration of the Gillette business and delivery of growth and cost synergies, while maintaining momentum in the core businesses. The dilutive impact of the acquisition is expected to reduce P&G earnings by 25 to 35 cents per share in the first year following closing, and 5 to 10 cents per share in the second year following closing. In the third year following closing, the acquisition is expected to add 1 to 5

cents per share.

The near term impacts of the proposed transaction caused the Board's Compensation & Leadership Development Committee ("Committee") to re-consider certain aspects of P&G's incentive compensation programs, during meetings on May 19, 2005 and June 14, 2005. Subject to closing of the transaction, the Committee approved at its June 14, 2005, meeting modifications to the Company's Short Term Achievement Reward Program ("STAR") and Business Growth Program ("BGP") as described below and in the documents attached hereto.

STAR is the Company's annual incentive program. Awards are made within the authority of the Additional Remuneration Plan, which dates back to 1949, and the 2001 Stock and Incentive Compensation Plan ("2001 Stock Plan"). Historically, STAR awards have been based on two factors -- overall Company results and specific business unit results. In view of the importance of successfully integrating the Gillette acquisition, an additional factor will be used in determining STAR awards beginning fiscal year 2005/06. This 'Gillette Factor' will be determined by assessing performance during the fiscal year on various metrics related to integration goals including: sustaining the overall health of both the P&G and Gillette businesses during this period (based on market share and earnings progress); achieving sales, research and administrative budget and synergy objectives; meeting enrollment reduction targets; and staying within integration cost and restructuring estimates. This will put payments for all STAR participants at risk based on the achievement of integration goals. Under the revised STAR plan, participants may end up earning more or less than they would have without this change.

BGP is a three-year performance program under the authority of the Additional Remuneration Plan and the 2001 Stock Plan. Approximately 35 senior executive officers were included in BGP for the period from July 1, 2004 through June 30, 2007. Each was assigned a target amount for the performance period. Taken together, stock options at target and BGP at target represent total long-term incentive compensation equal to the median long-term incentive of P&G's compensation survey group for comparable positions. The Committee determines actual BGP awards based on an assessment of Company performance versus pre-established financial measures for diluted earnings per share ("EPS") growth and operating total shareholder return ("OTSR").

The Committee believes P&G's compensation programs should continue to be directly linked to business results and remain consistent with shareholder interests following the Gillette merger. Accordingly, the Committee will discontinue the current three-year BGP cycle at the end of its first year (June 30, 2005). In its place, the Committee will establish a new three-year cycle, beginning July 1, 2005. The Committee will restart the program cycle so that senior management compensation for the combined company is linked more directly to the success of the Gillette integration. By starting a new BGP cycle, the Committee will ensure that management compensation reflects results of all the Company's businesses, including those acquired from Gillette. More specifically, management will be incented to minimize the dilution of EPS in the first two years following closing and deliver accretive EPS in the third year following closing. The program will pay out at target compensation levels for the full three-year period only if, by the third year following closing, the Company achieves its Operating Total Shareholder Return goal and delivers three-year 10% compound EPS growth for P&G's current business, while also achieving its accretion goal for Gillette. Consequently, management compensation will be at risk to achieve the profitable growth objectives of both Gillette and current P&G. Depending on actual results, participants may earn more or less than target.

The Committee has approved funding formulas covering STAR and BGP awards to named executive officers. These formulas qualify the payments as performance-based compensation under Section 162(m) of the Internal Revenue

Code, thereby preserving tax deductibility.

More detailed descriptions of STAR and BGP, as modified, are attached as Exhibit 10-1 hereto, together with related correspondence and grant materials.
