**REPUBLIC BANCORP INC. AND SUBSIDIARIES**

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

**Note 1 - Basis of Presentation**

The accompanying unaudited consolidated financial statements of Republic Bancorp Inc. and Subsidiaries (the "Company") have been prepared in accordance with U. S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes necessary for a comprehensive presentation of financial position, results of operations and cash flow activity required by U. S. generally accepted accounting principles for complete financial statements. In the opinion of management, all normal recurring adjustments necessary for a fair presentation of results have been included. Operating results for the three months ended March 31, 2006 are not necessarily indicative of the results that may be expected for the year ending December 31, 2006. The balance sheet as of December 31, 2005 was derived from the audited financial statements as of that date. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2005.

Management makes estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and accompanying notes, as well as the amounts of revenues and expenses reported during the periods covered by those financial statements and accompanying notes. Actual results could differ from these estimates.

**Note 2 - Principles of Consolidation**

The consolidated financial statements include the accounts of the parent company, Republic Bancorp Inc. and its wholly owned bank subsidiary, Republic Bank (including its wholly-owned subsidiaries Quincy Investment Services, Inc., Republic Bank Real Estate Finance, LLC and Republic Management Company, Inc.). All significant intercompany accounts and transactions have been eliminated in consolidation.

**Note 3 - Consolidated Statements of Cash Flows**

Supplemental disclosures of cash flow information for the three months ended March 31, include:

(In thousands)	<u>2006</u>	<u>2005</u>
Cash paid during the period for:		
Interest	\$ 50,254	\$ 37,383
Income taxes	\$ 1,750	\$ 250
Non-cash investing activities:		
Loan charge-offs	\$ 1,720	\$ 1,700
Loans transferred to other real estate owned	\$ 3,814	\$ 3,195

Certain reclassifications have been made within the operating activities section of the consolidated statement of cash flows for the three months ended March 31, 2005 in order to conform to the 2006 presentation.

**Note 4 - Comprehensive Income**

The following table sets forth the computation of comprehensive income:

(In thousands)	Three Months Ended March 31,	
	2006	2005

Edgar Filing: REPUBLIC BANCORP INC - Form 10-Q

Net income	\$	16,417	\$	17,307
Unrealized holding losses on securities, net of tax (credit) of (\$1,500) and (\$4,036), respectively		(2,785)		(7,495)
Reclassification adjustment for gains included in net income, net of tax of \$22 and \$152, respectively		(40)		(283)
Net unrealized losses on securities, net of tax		(2,825)		(7,778)
Comprehensive income	\$	13,592	\$	9,529

**Note 5 - Intangible Assets**

The following table summarizes the Company's core deposit intangible asset which is subject to amortization:

(In thousands)	March 31, 2006	December 31, 2005
Core Deposit Intangible Asset:		
Gross carrying amount	\$ 10,883	\$ 10,883
Accumulated amortization	8,089	7,880
Net book value	\$ 2,794	\$ 3,003

Amortization expense on the core deposit intangible asset totaled \$209,000 and \$253,000 for the quarters ended March 31, 2006 and 2005, respectively. The Company expects core deposit intangible amortization expense to be \$861,000, \$868,000, \$690,000, \$156,000 and \$156,000 for each of the years ending December 31, 2006, 2007, 2008, 2009 and 2010, respectively.

**Note 6 - Earnings Per Share**

The following table sets forth the computation of basic and diluted earnings per share:

(In thousands, except per share data)	Three Months Ended March 31,	
	2006	2005 <sup>(1)</sup>
Numerator for basic and diluted earnings per share:		
Net income	\$ 16,417	\$ 17,307
Denominator for basic earnings per share - weighted-average shares	74,862	77,433
Effect of dilutive securities:		
Stock options	638	824
Warrants	52	65
Dilutive potential common shares	690	889
Denominator for diluted earnings per share—adjusted weighted-average shares for assumed conversions	75,552	78,322
Basic earnings per share	\$ .22	\$ .22
Diluted earnings per share	\$ .22	\$ .22

<sup>(1)</sup> Share amounts for period presented have been adjusted to reflect the issuance of stock dividends.

**Note 7 - Segment Information**

The Company's operations are managed as three major business segments: (1) commercial banking, (2) retail banking and (3) mortgage banking. The commercial banking segment consists of commercial lending to small- and medium-sized companies, primarily in the form of commercial real estate and Small Business Administration (SBA) loans. The retail banking segment consists of home equity lending, other consumer lending and the deposit-gathering functions. Deposits and consumer loan products are offered through 81 retail branch offices of Republic Bank, which are staffed by personal bankers and loan originators. The mortgage banking segment is comprised of mortgage loan production. Mortgage loan production is conducted in all offices of Republic Bank. Treasury and Other is comprised of balance sheet management activities that include the securities portfolio, residential real estate mortgage portfolio loans and non-deposit funding. Treasury and Other also includes unallocated corporate expenses such as corporate overhead, including accounting, data processing, human resources, operation costs and any corporate debt.

The following table presents the financial results of each business segment for the three months ended March 31, 2006 and 2005.

(In thousands)	Commercial	Retail	Mortgage	Treasury and Other	Consolidated
<b>For the Three Months Ended March 31, 2006</b>					
Net interest income from external customers	\$ 30,730	\$ (8,392)	\$ 2,393	\$ 13,957	\$ 38,688

(1) Capital is allocated as a percentage of assets of 10% and 5% for the commercial and mortgage banking segments, respectively and is allocated as a percentage of deposits of 5% for the retail segment.

n/m <sup>3</sup>/<sub>4</sub> Not meaningful

**Note 8 - Stock Based Compensation**

The Company maintains various stock-based compensation plans that provide for its ability to grant stock options, stock warrants and restricted shares to selected employees and directors.

Effective January 1, 2003, the Company adopted the fair value method of recording stock options under SFAS 123, *Accounting for Stock-Based Compensation*. In accordance with the transitional guidance of SFAS 148, *Accounting for Stock-Based Compensation - Transition and Disclosure*, the fair value method of accounting for stock options was applied prospectively to awards granted subsequent to January 1, 2003. Since 2003, the Company has generally awarded restricted stock in lieu of stock option grants. Effective January 1, 2006, the Company adopted SFAS No. 123 (revised), *Share-Based Payment* (SFAS 123(R)) utilizing the modified prospective approach.

Under the modified prospective approach, SFAS 123(R) applies to new awards and to awards that were outstanding on January 1, 2006 that are subsequently modified, repurchased or cancelled. Under the modified prospective approach, compensation cost recognized in the first quarter of fiscal 2006 includes compensation cost for all share-based payments granted prior to, but not yet vested as of January 1, 2006, based on the grant-date fair value estimated in accordance with the original provisions of SFAS 123, and compensation cost for all share-based payments granted subsequent to January 1, 2006, based on the grant-date fair value estimated in accordance with the provisions of SFAS 123(R). Accordingly, prior periods were not restated to reflect the impact of adopting the new standard.

The Company utilizes a Black-Scholes option-pricing model to value options and warrants granted to employees and non-employee directors in accordance with SFAS 123 and SFAS 123(R). There have been no grants of warrants and no significant grants of options since 2002. The fair value of restricted stock awards is determined based on the closing trading price of the Company's shares on the grant date. Stock-based compensation expense is recognized on a straight-line basis over the vesting period, which is equivalent to the requisite service period. Upon retirement, employees forfeit any unvested awards.

The adoption of SFAS 123(R) did not have a significant impact on income before income taxes or net income for the three months ended March 31, 2006 and had no impact on basic or dilutive earnings per share.

The Company receives a tax deduction for certain stock option and stock warrant exercises during the period the options and warrants are exercised, generally for the excess of the price at which the options and warrants are sold over the exercise prices. The Company also receives an additional tax deduction for restricted stock that vests at a market price in excess of the price at the date of grant. Prior to the adoption of SFAS 123(R), the Company reported all tax benefits resulting from stock-based compensation as operating cash flows in the consolidated statements of cash flows. In accordance with SFAS 123(R), for the three months ended March 31, 2006, the Company reported the tax benefits in excess of recognized compensation expense, which totaled \$210,000, as financing cash flows on the consolidated statement of cash flows.

The Company has elected to adopt the alternative transition method provided in the Financial Accounting Standards Board Staff Position No. FAS 123(R)-3 (FSP-123(R)-3) "Transition Election Related to Accounting for Tax Effects of Share-Based Payment Awards" for calculating the tax effects of stock-based compensation under SFAS No. 123(R). The alternative transition method includes simplified methods to establish the beginning balance of the additional paid-in capital pool (APIC pool) related to the tax effects of employee stock-based compensation, and to determine the subsequent impact on the APIC pool and consolidated statements of cash flows of the tax effects of employee stock-based compensation awards that are outstanding and fully or partially unvested upon adoption of SFAS No. 123(R).

The compensation cost that has been charged to expense for the Company's stock-based compensation plans was \$386,000 and \$518,000 for the three months ended March 31, 2006 and 2005, respectively. Such expense is included

in salaries and employee benefits on the consolidated statements of income. The total income tax benefit recognized in the income statement for the stock-based compensation arrangements was \$135,000 and \$181,000 for the first quarters ended March 31, 2006 and 2005, respectively.

**Note 8 - Stock Based Compensation (Continued)**

The following table presents net income and earnings per share had compensation cost for the Company's stock-based compensation plans been determined in accordance with SFAS No. 123(R) for all outstanding and unvested awards for the three months ended March 31, 2005.

	Three Months Ended March 31 2005	
(Dollars in thousands, except per share data)		
Net income (as reported)	\$	17,307
Add: Stock-based employee compensation expense included in reported net income, net of related tax effects		337
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects		(418)
Net income (pro forma)	\$	17,226
Basic earnings per share (as reported)	\$	.22
Basic earnings per share (pro forma)		.22
Diluted earnings per share (as reported)	\$	.22
Diluted earnings per share (pro forma)		.22

*Stock Options*

The Company awards stock options to officers and key employees under the 1998 Stock Option Plan (1998 Plan) and the 1997 Stock Option Plan (1997 Plan). The 1998 Plan, which was approved by the Company's shareholders and adopted effective February 19, 1998, and was amended April 26, 2000, authorizes the issuance of up to 4,207,456 options to purchase common shares at exercise prices equal to the market value of the Company's common stock on the date of grant. Of the 4,207,456 options to purchase common shares under the 1998 Stock Option Plan, up to 1,948,717 options may be issued pursuant to options which may be granted under the Voluntary Management Stock Accumulation Program which was also approved by the Company's shareholders and adopted effective February 19, 1998. Options are exercisable according to a four-year vesting schedule whereby 25% vest annually, based on the one through four year anniversary of the grant date. Options granted pursuant to the Voluntary Management Stock Accumulation Program fully vest after the third anniversary date of the option grant date. All options have a maximum contractual life of ten years from the date of grant. At March 31, 2006 and December 31, 2005, options available for future grant under the 1998 Stock Option Plan totaled 1,110,153 and 1,106,021, respectively. Options available for future grant under the 1997 Stock Option Plan totaled 451,066 at both March 31, 2006 and December 31, 2005.

The following table presents stock option activity for the three months ended March 31, 2006:

Number of Options	Weighted- Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (in thousands)
----------------------	---	---	---

Edgar Filing: REPUBLIC BANCORP INC - Form 10-Q

Outstanding at January 1, 2006	2,367,472	\$	7.05		
Granted	-		-		
Exercised	(59,598)		4.96		
Forfeited, cancelled and expired	(4,132)		8.25		
Outstanding at March 31, 2006	2,303,742	\$	7.10	3.7	\$ 11,375
Exercisable at March 31, 2006	2,296,387	\$	7.09	3.7	\$ 11,367

The total intrinsic value of options exercised during the three months ended March 31, 2006 and 2005 was \$428,000 and \$672,000, respectively. Net cash proceeds from the exercise of stock options were \$295,000 for the three months ended March 31, 2006. The actual income tax benefit realized from stock option exercises was \$147,000 for the same period. As of March 31, 2006, the unrecognized compensation cost related to unvested options outstanding was insignificant and the impact of forfeitures on both the expense recognized and the remaining unrecognized expense is insignificant.

**Note 8 - Stock Based Compensation (Continued)***Stock Warrants*

The Company has a Director Compensation Plan that was approved by its shareholders and provides for its ability to issue 1,500 warrants annually to each of the Company's outside directors. Stock warrants were granted at exercise prices equal to the market value of the Company's common stock on the date of grant, were immediately exercisable, and had maximum contractual lives of ten years. At March 31, 2006, 164,241 warrants were outstanding with exercise prices ranging from \$3.90 to \$9.97. Starting in 2003, in lieu of warrants, an annual retainer payable in common stock was issued to each director. At March 31, 2006, the aggregate intrinsic value of warrants outstanding was \$800,000. The total intrinsic value of warrants exercised in the three months ended March 31, 2006 was \$180,000. The actual income tax benefit realized from stock warrant exercises was \$63,000 for the same period.

*Incentive Stock Plan*

The Company's Incentive Stock Plan, which was approved by the Company's shareholders, authorizes the grant of restricted common shares so that the total number of restricted shares that may be outstanding at any time under the Plan shall not exceed five percent of the issued and outstanding common stock of the Company. At March 31, 2006, the maximum number of authorized shares allowed for grant totaled 3,734,221. Restriction periods for these shares exist for a period of one to four years. Restricted shares are forfeited if employment is terminated before the restriction period expires. As of March 31, 2006 and December 31, 2005, 758,449 and 795,998 common shares, respectively, have been awarded and are still subject to restrictions under the Incentive Stock Plan. Compensation expense is recognized over the restriction period and included in salaries and employee benefits expense in the consolidated statements of income.

The following table summarizes the restricted (nonvested) shares for the three months ended March 31, 2006:

	Shares	Weighted-Average Grant Date Fair Value
Nonvested at January 1, 2006	795,998	\$ 11.811
Granted	91,144	12.270
Vested	(118,366)	12.817
Forfeited	(10,327)	11.809
Nonvested at March 31, 2006	758,449	\$ 11.709

Compensation expense for restricted stock totaled \$338,000 and \$516,000 for the three months ended March 31, 2006 and 2005, respectively. As of March 31, 2006, there was \$4.3 million of unrecognized compensation cost related to restricted stock. That cost is expected to be recognized over a weighted-average period of 1.86 years. The total fair value of shares that vested during the first quarter ended March 31, 2006 was \$1.4 million based on the market value on the date of vesting.

*Stock Repurchases*

The Company has a policy of repurchasing shares on the open market to satisfy stock option exercises and restricted stock awards. During the three months ended March 31, 2006, the Company repurchased 449,700 shares at a weighted average repurchase price of \$12.17 per share.

**Note 9 - Off-Balance Sheet Instruments**

In the normal course of business, the Company becomes a party to transactions involving financial instruments with off-balance sheet risk to meet the financing needs of its customers and to manage its own exposure to interest rate risk. These financial instruments include commitments to extend credit and standby letters of credit that are not reflected in the consolidated financial statements. The contractual amounts of these instruments express the extent of the Company's involvement in these transactions as of the balance sheet date. These instruments involve, to varying degrees, elements of credit risk, market risk and liquidity risk in excess of the amount recognized in the consolidated balance sheets. However, management believes that they do not represent unusual risks for the Company.

Commitments to extend credit are legally binding agreements to lend cash to a customer as long as there is no breach of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a fee. Standby letters of credit guarantee the performance of a customer to a third party. The Company issues these guarantees primarily to support public and private borrowing arrangements, real estate construction projects, bond financing and similar transactions.

**Note 9 - Off-Balance Sheet Instruments (Continued)**

The credit risk associated with commitments to extend credit and standby letters of credit is essentially the same as that involved with direct lending. Therefore, these instruments are subject to the Company's loan review and approval procedures and credit policies. Based upon management's credit evaluation of the counterparty, the Company may require the counterparty to provide collateral as security for the agreement, including real estate, accounts receivable, inventories and investment securities. The maximum credit risk associated with these instruments equals their contractual amounts and assumes that the counterparty defaults and the collateral proves to be worthless. The total contractual amounts of commitments to extend credit and standby letters of credit do not necessarily represent future cash requirements, since many of these agreements may expire without being drawn upon. During 2004, the Company reclassified \$2.8 million of its allowance for loan losses to a separate allowance for probable credit losses inherent in unfunded loan commitments. The separate allowance is included in "accrued expenses and other liabilities" and the balance was \$1.9 million at March 31, 2006. Deferred revenue recorded for standby letters of credit was \$236,000 and \$342,000 at March 31, 2006 and December 31, 2005, respectively.

The following table presents the contractual amounts of the Company's off-balance sheet financial instruments outstanding at March 31, 2006 and December 31, 2005.

(In thousands)	March 31, 2006	December 31, 2005
Financial instruments whose contract amounts represent credit risk:		
Commitments to fund residential real estate loans	\$ 155,372	\$ 201,846
Commitments to fund commercial real estate construction loans and lines of credit	347,482	375,054
Commitments to fund the pipeline of commercial real estate loans	160,539	225,878
Other unused commitments to extend credit	418,378	418,158
Standby letters of credit	119,665	125,338

**Note 10 - Legal Proceedings**

The Company's subsidiary is a party to litigation and claims arising in the normal course of its activities. Although the amount of ultimate liability, if any, with respect to such matters cannot be determined with reasonable certainty, management, after consultation with legal counsel, believes that the aggregate liability, if any, resulting from such matters would not have a material adverse effect on the Company's consolidated financial condition.

## **ITEM 2: Management's Discussion and Analysis of Financial Condition and Results of Operations**

### **EARNINGS PERFORMANCE**

The Company reported net income for the quarters ended March 31, 2006 and March 31, 2005 of \$16.4 million and \$17.3 million, respectively. Diluted earnings per share for the first quarter of 2006 were \$.22, consistent with the first quarter of 2005. Annualized returns on average assets and average shareholders' equity for the quarter ended March 31, 2006 were 1.07% and 16.01%, respectively.

### **RESULTS OF OPERATIONS**

#### **Net Interest Income**

The following discussion should be read in conjunction with Tables 1 and 2 on pages 13-14, which identify and quantify the components impacting net interest income for the three months ended March 31, 2006 and 2005.

Net interest income, on a fully taxable equivalent (FTE) basis, was \$39.5 million for the first quarter of 2006 compared to \$39.2 million for the first quarter of 2005, an increase of 1%. The increase was primarily the result of a 6% increase in average earning assets for the quarter ended March 31, 2006, compared to the first quarter of 2005. The net interest margin (FTE) was 2.67% for the quarter ended March 31, 2006, a decrease of 12 basis points from 2.79% during the first quarter of 2005. The decrease in the margin was primarily attributable to the Company's yield on earning assets increasing less than the increase in the cost of funds on interest-bearing liabilities.

Average interest earning assets increased \$312 million, or 6%, as the average total securities increased \$167 million, or 17%, and the average portfolio loan balance increased \$235 million, or 5%, during the first quarter of 2006 compared to the three months ended March 31, 2005. The increase in the average portfolio loan balance reflects a \$144 million, or 9%, increase in average commercial loans, a \$97 million, or 5%, increase in average residential real estate mortgage loans and a \$6 million, or 1%, decrease in average installment loans. Average total interest bearing liabilities increased \$329 million for the first quarter of 2006 compared to the three months ended March 31, 2005 due to a \$65 million increase in total average interest-bearing deposits, a \$173 million increase in average short-term borrowings and a \$91 million increase in average long-term FHLB advances and security repurchase agreements.

The Company expects the second quarter of 2006 to continue to be challenging for its net interest margin. Increases in the cost of funds on deposits could be higher than in the first quarter of 2006 due primarily to a higher level of retail certificates of deposit maturing and repricing during the quarter. Maturities of retail certificates of deposit during the first quarter of 2006 totaled \$165 million at an average cost of funds of 2.97%. Expected maturities of retail certificates of deposit total \$269 million for the second quarter of 2006 at an average cost of funds of 3.41%.

<sup>(2)</sup> Non-accrual loans and overdrafts are included in average balances.

### **Noninterest Income**

Total noninterest income decreased \$3.8 million for the quarter ended March 31, 2006, compared to the same period in 2005. The decrease was primarily due to lower levels of mortgage banking income. Details of mortgage banking income are presented below. Exclusive of mortgage banking income, noninterest income was \$5.4 million for the quarter ended March 31, 2006, an increase of \$231,000, or 4%, compared to the first quarter of 2005. The increase was due primarily to a 12% increase in service charges. The Company sold \$7.8 million of the guaranteed portion of SBA loans during the quarter ended March 31, 2006, resulting in gains of \$548,000. During the quarter ended March 31, 2005, the Company sold \$7.3 million of SBA loans for gains of \$392,000.

### **Mortgage Banking Income**

The Company closed \$225 million in single-family residential mortgage loans in the first quarter of 2006, a decrease of 35% compared to \$345 million closed in the same period last year. Refinancings for both the first quarters of 2006 and 2005 represented 46% of total closings.

For the three months ended March 31, 2006, mortgage banking income decreased \$4.0 million, or 68%, to \$1.8 million from \$5.8 million a year earlier. The decrease was primarily due to lower levels of mortgage loans sold to the secondary market. Sales of mortgage loans held for sale were \$79 million during the first quarter of 2006 compared to \$174 million in the first quarter of 2005. The ratio of mortgage loan production income to mortgage loans sold was 2.97% for the first quarter of 2006, compared to 2.88% for the first of quarter 2005.

Mortgage banking income includes fee revenue derived from the loan origination process (e.g., points collected), gains on the sale of mortgage loans and the related mortgage servicing rights released concurrently with the underlying loans sold (mortgage loan production revenue), net of commissions, incentives and deferred mortgage loan origination costs and fees for mortgage loans held for sale and residential real estate loans as accounted for under FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases* (SFAS 91). Mortgage loan production revenue totaled \$2.3 million and \$5.0 million for the first quarters of 2006 and 2005, respectively. Commissions and incentives paid were \$2.1 million and \$3.0 million for the first quarters of 2006 and 2005, respectively. The SFAS 91 credit totaled \$1.6 million and \$1.7 million for the first quarters of 2006 and 2005, respectively.

During the first quarter of 2005, mortgage banking income also includes gains on sale of residential real estate loans totaling \$2.1 million. Residential real estate loan sales totaled \$126.6 million for the first quarter of 2005. There were no sales of residential real estate loans during the first quarter of 2006.

During the quarter ended March 31, 2006, the Company had mortgage loan applications of \$466 million and at March 31, 2006, the Company's mortgage loan pipeline of applications in process was \$320 million. The Company estimates that mortgage loan closings will increase 25% to 30% for the quarter ended June 30, 2006 compared to the first quarter of 2006.

**Noninterest Expense**

Total noninterest expense for the quarter ended March 31, 2006, decreased \$1.9 million, or 8%, to \$21.0 million compared to \$22.9 million for the first quarter of 2005. The decrease was primarily a result of a decrease of \$1.1 million in salaries and employee benefits and a decrease of \$604,000 in other noninterest expense primarily reflecting lower voice and data communication expenses, loan collection expenses and advertising expenses.

**BALANCE SHEET ANALYSIS****ASSETS**

At March 31, 2006, the Company had \$6.2 billion in total assets, an increase of \$162 million, or 3%, from \$6.1 billion at December 31, 2005. The increase is primarily the result of an increase in the Company's total portfolio loans and securities available for sale.

**Investment Securities**

The Company's investment securities portfolio serves as a secondary source of earnings and contributes to the management of interest rate risk and liquidity risk. The Company's securities portfolio is comprised principally of U.S. Government agency securities, municipal securities, collateralized mortgage obligations and mortgage-backed securities. At March 31, 2006, fixed rate investment securities within the portfolio, excluding municipal securities, totaled \$873.6 million compared to \$816.3 million at December 31, 2005. At March 31, 2006, \$501.7 million of these fixed rate mortgage-backed securities and collateralized mortgage obligations were collateralized with 5/1, 7/1 and 10/1 hybrid adjustable rate mortgage loans which provide for an interest rate reset cap of 2% to 5% at the first reset date. This compares to \$521.8 million at December 31, 2005.

Investment securities available for sale totaled \$926.9 million at March 31, 2006, a \$65.3 million increase from \$861.6 million at December 31, 2005. The increase in the Company's securities available for sale portfolio was primarily due to the purchase of callable U. S. Government agency securities during the first quarter of 2006. The investment securities available for sale portfolio constituted 14.8% of the Company's total assets at March 31, 2006, compared to 14.2% at December 31, 2005.

Investment securities held to maturity totaled \$222.2 million at March 31, 2006, a \$5.1 million decrease from \$227.3 million at December 31, 2005. The investment securities held to maturity portfolio consists of collateralized mortgage obligations and mortgage-backed securities collateralized with 7/1 and 10/1 hybrid adjustable rate mortgage loans. The investment securities held to maturity portfolio constituted 3.6% of the Company's total assets at March 31, 2006 compared to 3.7% at December 31, 2005.

The following table details the composition, amortized cost and fair value of the Company's investment securities portfolio at March 31, 2006:

(In thousands)	Gross Amortized Cost	Investment Securities		Fair Value
		Gross Unrealized Gains	Gross Unrealized Losses	
Securities Available For Sale (Estimated Fair Value):				
U.S. Government agency securities	\$ 351,751	\$ -	\$ 8,389	\$ 343,362
Collateralized mortgage obligations	275,240	211	6,808	268,643
Mortgage-backed securities	101,029	4	2,536	98,497
Municipal and other securities	219,018	67	2,675	216,410
Total securities available for sale	\$ 947,038	\$ 282	\$ 20,408	\$ 926,912

Securities Held To Maturity (At Cost):					
Collateralized mortgage obligations	\$	189,356	\$	16	\$ 7,005 \$ 182,367
Mortgage-backed securities		32,857		-	1,053 31,804
Total securities held to maturity	\$	222,213	\$	16	\$ 8,058 \$ 214,171

16

---

**Investment Securities (continued)**

The Company believes that the unrealized losses in the previous table are temporary. At March 31, 2006, all of the unrealized losses in the securities portfolio were comprised of investment grade municipalities, private label securities rated “AAA” by the major rating agencies and securities issued by U.S. Government agencies. The Company believes that the price movements in these securities are dependent upon the movement in market interest rates, particularly given the negligible inherent credit risk for these securities. The Company has the ability and intent to hold all securities that are in an unrealized loss position until maturity or market price recovery.

Certain securities with a carrying value of \$817.8 million and \$789.4 million at March 31, 2006 and December 31, 2005, respectively, were pledged to secure FHLB advances, security repurchase agreements and public deposits as required by law.

**Federal Home Loan Bank Stock**

As a member of the Federal Home Loan Bank (“FHLB”) of Indianapolis, the Company is required to own capital stock in the FHLB. The carrying value of the stock is at cost, or par. All transactions in the capital stock of the FHLB are executed at par. The balance of FHLB stock was \$80.5 million at March 31, 2006 and December 31, 2005.

**Mortgage Loans Held for Sale**

Mortgage loans held for sale were \$24.6 million at March 31, 2006, a decrease of \$13.7 million from \$38.3 million at December 31, 2005. Loans closed generally remain in loans held for sale for 30 to 60 days after closing. Residential mortgage loan closings during the first quarter of 2006 were \$225 million compared to \$337 million during the fourth quarter of 2005.

**Portfolio Loans**

Total portfolio loans were \$4.7 billion at March 31, 2006, an increase of \$119 million from \$4.6 billion at December 31, 2005, due to increases in the commercial and residential portfolio loan balances. The commercial portfolio loan balance was \$1.75 billion at March 31, 2006, an increase of \$57 million from \$1.7 billion at December 31, 2005. The increase was concentrated in real estate construction loans and commercial real estate mortgage loans.

The residential portfolio loan balance increased \$74 million during the first three months of 2006. During the first quarter of 2006, the Company retained \$178 million of mortgage loans originated, 38% of which were adjustable-rate mortgages. Loan pay-offs and principal repayments for the first three months of 2006 were \$86 million.

The installment loan portfolio decreased \$12 million during the first three months of 2006, primarily due to a decrease in home equity lines of credit.

The following table provides further information regarding the Company’s loan portfolio:

(Dollars in thousands)	March 31, 2006		December 31, 2005	
	Amount	Percent	Amount	Percent
Commercial loans:				
Commercial and industrial	\$ 27,639	0.6%	\$ 28,314	0.6%
Real estate construction	397,861	8.4	360,999	7.8
Commercial real estate mortgage	1,328,928	28.0	1,308,557	28.3
Total commercial loans	1,754,428	37.0	1,697,870	36.7
Residential real estate mortgages	2,267,385	47.8	2,193,128	47.4
Installment loans:				
Home equity lines of credit	371,955	7.8	390,373	8.4
Home equity term loans	179,578	3.8	170,352	3.7

Edgar Filing: REPUBLIC BANCORP INC - Form 10-Q

Other consumer loans	173,624	3.6	176,535	3.8
Total installment loans	725,157	15.2	737,260	15.9
Total portfolio loans	\$ 4,746,970	100.0%	\$ 4,628,258	100.0%

17

---

**Credit Quality**

The Company attempts to reduce the credit risk in its loan portfolio by focusing primarily on real estate-secured lending (i.e., commercial real estate mortgage and construction loans, residential real estate mortgage and construction loans, home equity loans and other consumer loans secured by real estate). As of March 31, 2006, such loans comprised approximately 99% of total portfolio loans. The Company's general policy is to originate conventional residential real estate mortgages with loan-to-value ratios of 80% or less; SBA-secured loans or real estate-secured commercial loans with loan-to-value ratios of 80% or less that are secured by personal guarantees; and home equity loans with combined first and second mortgages with loan-to-value ratios of 85% or less.

The majority of the Company's commercial loans are secured by real estate and are generally made to small and medium-size businesses. These loans are made at rates based on the prevailing prime interest rate as published in the Wall Street Journal or London Interbank Offered Rates ("LIBOR"), as well as fixed rates for terms generally ranging from three to five years. Management believes that the Company's historically low net charge-offs are reflective of its emphasis on real estate-secured lending and adherence to conservative underwriting standards.

The Company originates primarily conventional mortgage loans secured by residential properties, which conform to the underwriting guidelines for sale to Fannie Mae and Freddie Mac, or for conversion to mortgage-backed securities issued by the Government National Mortgage Association (GNMA).

**Non-Performing Assets**

Non-performing assets consist of non-accrual loans, restructured loans and other real estate owned (OREO). OREO represents real estate properties acquired by the Company through foreclosure or by deed in lieu of foreclosure. Commercial loans are generally placed on non-accrual status at the time the loan is 90 days or more past due, unless the loan is well-secured and in the process of collection. Residential real estate mortgage loans and installment loans are placed in non-accrual status at the time the loan is four scheduled payments past due or 90 days or more past the maturity date of the loan. In all cases, loans may be placed on non-accrual status earlier when, in the opinion of management, reasonable doubt exists as to the full, timely collection of interest or principal. All interest accrued but not collected for loans that are placed on non-accrual status is reversed and charged against current income. Any interest payments subsequently received on non-accrual loans are generally applied against the principal balance. Loans are considered restructured when the Company makes certain concessions to a financially troubled debtor that would not normally be considered. There were no loans 90 days or more past due still accruing interest at either March 31, 2006 or December 31, 2005.

The following table summarizes the Company's non-performing assets:

(Dollars in thousands)	March 31, 2006	December 31, 2005
Non-Performing Assets:		
Non-accrual loans:		
Commercial	\$ 26,395	\$ 27,344
Residential real estate mortgages	21,484	19,026
Installment	1,758	2,413
Total non-accrual loans	49,637	48,783
Other real estate owned:		
Commercial	6,287	8,575
Residential real estate mortgages	4,856	3,029
Installment	1,449	712
Total other real estate owned	12,592	12,316
Total non-performing assets	\$ 62,229	\$ 61,099

Edgar Filing: REPUBLIC BANCORP INC - Form 10-Q

Non-performing assets as a percentage of:

Portfolio loans and OREO	1.31%	1.32%
Total assets	1.00%	1.00%

18

---

At March 31, 2006, \$27.2 million, or 0.57% of total portfolio loans were 30-89 days delinquent, compared to \$27.4 million, or 0.59%, at December 31, 2005. The Company also maintains a list of potential problem loans (classified as watch and substandard, but excluding non-accrual and restructured loans) identified as requiring a higher level of attention by management where known information about possible borrower credit problems raises serious doubts as to the ability of such borrowers to comply with the repayment terms. As of March 31, 2006, total potential problem loans, excluding those categorized as non-accrual loans, were \$55.7 million, or 1.17% of total portfolio loans, compared to \$51.1 million, or 1.10% of total portfolio loans at December 31, 2005.

**Allowance for Loan Losses and Impaired Loans**

The allowance for loan losses represents the Company's estimate of probable credit losses related to specifically identified loans as well as probable credit losses inherent in the remainder of the loan portfolio that have been incurred as of the balance sheet date. The allowance for loan losses is maintained at a level the Company believes is adequate through the provision for loan losses.

Due to the inherent risks and uncertainties related to the operation of a financial institution, management must depend on estimates, appraisals and valuations of loans to prepare the Company's financial statements. Changes in economic conditions and the financial prospects of borrowers may result in abrupt changes to the estimates, appraisals or evaluations used. In addition, if actual circumstances and losses differ substantially from management's assumptions and estimates, the allowance for loan losses may not be sufficient to absorb all future losses, and net income could be adversely impacted.

At March 31, 2006 and December 31, 2005, the allowance for loan losses consists of a specific allocated component, a risk allocated component and an imprecision component. The components of the allowance for loan losses represent an estimation completed pursuant to either SFAS 5, *Accounting for Contingencies*, or SFAS 114, *Accounting By Creditors for Impairment of a Loan*. The specific risk allocated component of the allowance for loan losses reflects potential losses resulting from analyses developed through specific credit allocation for individual loans deemed impaired under SFAS 114. The risk allocated (SFAS 5) component of the allowance for loan losses reflects expected losses projected from historical loss experience for each loan category in the aggregate, but excluding loans individually determined to be impaired. The projected loss ratios utilized in the risk allocated component incorporate factors such as historical charge-off experience and current economic trends and conditions.

Actual loss ratios experienced in the future may vary from the projected loss ratios utilized in the risk allocated component. The uncertainty occurs because factors affecting the determination of probable losses inherent in the loan portfolio may exist which are not necessarily captured by the application of projected loss ratios or economic trends and other conditions. Therefore, an imprecision component of the allowance is additionally maintained to capture these probable losses inherent in the loan portfolio. The imprecision component reflects management's view that the allowance should recognize the margin for error inherent in the process of estimating expected loan losses inherent in the loan portfolio. Factors considered in evaluating the Company's imprecision component include, among other factors, imprecision in projected loss ratios and economic conditions. The imprecision component of the allowance was \$3.3 million at March 31, 2006 and December 31, 2005.

During the three months ended March 31, 2006, December 31, 2005 and March 31, 2005, the Company recorded provision for loan losses of \$1.4 million, \$1.5 million and \$1.5 million, respectively. The amount charged to the provision for loan losses remained consistent primarily as a result of a decrease in projected loss ratios being offset by the overall increase in loan balances.

The following table provides an analysis of the allowance for loan losses:

	Three Months Ended March 31,	
(Dollars in thousands)	2006	2005

Edgar Filing: REPUBLIC BANCORP INC - Form 10-Q

Allowance for loan losses:

Balance at January 1	\$	42,122	\$	41,818
Loans charged off		(1,720)		(1,700)
Recoveries of loans previously charged off		540		237
Net charge-offs		(1,180)		(1,463)
Provision charged to expense		1,400		1,500
Balance at March 31	\$	42,342	\$	41,855
Annualized net charge-offs as a percentage of average loans		.10%		.13%
Allowance for loan losses as a percentage of total portfolio loans outstanding at period-end		.89%		.93%
Allowance for loan losses as a percentage of non-performing loans		85.30%		129.34%

**Allowance for Loan Losses and Impaired Loans (Continued)**

SFAS 114 considers a loan impaired when it is probable that payment of principal and interest will not be collected in accordance with the contractual terms of the loan agreement. At March 31, 2006 and December 31, 2005, all non-accrual and restructured commercial loans were reviewed for impairment.

Information regarding the Company's impaired loans follows:

(In thousands)	March 31, 2006	December 31, 2005
Gross recorded investment in impaired loans (period-end)	\$ 26,395	\$ 27,344
Impaired loans requiring a specific allocated allowance	21,252	21,625
Specific impairment allowance	5,834	5,332

An impaired loan for which it is deemed necessary to record a specific allocated allowance may be written down to the fair value of the underlying collateral via a direct charge-off against the allowance for loan losses at the time it is determined the loan balance exceeds the fair value of the collateral. An impaired loan not requiring a specific allocated allowance represents a loan for which the fair value of the underlying collateral equals or exceeds the recorded investment in the loan. All impaired loans were evaluated using the fair value of the underlying collateral as the measurement method.

**Bank Owned Life Insurance**

Republic Bank has purchased separate account bank owned life insurance to fund future employee benefit costs. Increases in the cash surrender value resulting from investment returns are recorded in noninterest income.

**LIABILITIES**

Total liabilities were \$5.84 billion at March 31, 2006, a \$160 million, or 3% increase from \$5.68 billion at December 31, 2005. This increase was primarily due to increases in short-term borrowings and long-term security repurchase agreements.

**Deposits**

Total deposits decreased \$59 million to \$3.08 billion at March 31, 2006 from \$3.14 billion at December 31, 2005. Total retail deposits decreased \$30 million, or 1%, from December 31, 2005 as the Company continued to see a migration from savings and money market accounts into certificates of deposit. Wholesale deposits, which include municipal and brokered certificates of deposit, decreased \$29 million from December 31, 2005.

**Short-Term Borrowings**

Short-term borrowings with maturities of one year or less, along with the related average balances and interest rates for the three months ended March 31, 2006 and the year ended December 31, 2005, were as follows:

(Dollars in thousands)	March 31, 2006			December 31, 2005		
	Ending Balance	Average Balance	Average Rate During Period	Ending Balance	Average Balance	Average Rate During Year

Edgar Filing: REPUBLIC BANCORP INC - Form 10-Q

Federal funds purchased	\$ 531,000	\$ 554,839	4.55%	\$ 472,000	\$ 457,625	3.41%
Security repurchase agreements	187,153	223,017	3.26	237,300	268,056	3.11
Total short-term borrowings	\$ 718,153	\$ 777,856	4.18%	\$ 709,300	\$ 725,681	3.30%

Short-term security repurchase agreements are secured by certain securities with a carrying value of \$200.6 million at March 31, 2006.

**Short-Term FHLB Advances**

Short-term FHLB advances outstanding at March 31, 2006 and December 31, 2005, were as follows:

(Dollars in thousands)	March 31, 2006			December 31, 2005		
	Ending Balance	Average Balance	Average Rate During Period	Ending Balance	Average Balance	Average Rate During Year
Short-term FHLB advances	\$ 375,000	\$ 288,467	4.63%	\$ 218,000	\$ 234,930	3.40%

Republic Bank routinely borrows short-term advances from the Federal Home Loan Bank (FHLB) to fund mortgage loans held for sale and a portion of the investment securities portfolio. These advances are generally secured under a blanket security agreement by first mortgage loans and investment securities with an aggregate book value equal to at least 145% of the advances. Republic Bank had \$190.7 million and \$339.1 million available in unused borrowings with the FHLB at March 31, 2006 and December 31, 2005, respectively.

**Long-term FHLB Advances and Security Repurchase Agreements**

Long-term FHLB advances and security repurchase agreements outstanding at March 31, 2006 and December 31, 2005, were as follows:

(Dollars in thousands)	March 31, 2006		December 31, 2005	
	Ending Balance	Average Rate At Period-End	Ending Balance	Average Rate At Year-End
Long-term FHLB advances:				
Bullet advances	\$ 222,874	3.75%	\$ 226,748	3.77%
Putable advances	750,000	4.85	750,000	4.85
Total long-term FHLB advances	972,874	4.60	976,748	4.59
Long-term security repurchase agreements	574,197	3.39	512,684	3.10
Total long-term FHLB advances and security repurchase agreements	\$ 1,547,071	4.15%	\$ 1,489,432	4.08%

Republic Bank routinely utilizes long-term FHLB advances and security repurchase agreements to provide funding to minimize the interest rate risk associated with certain fixed rate commercial and residential mortgage portfolio loans and investment securities. The long-term FHLB advances are generally secured under a blanket security agreement by first mortgage loans and investment securities with an aggregate book value equal to at least 145% of the advances. The long-term security repurchase agreements are secured by certain securities with a carrying value of \$616.3 million.

The long-term FHLB advances and security repurchase agreements have original maturities ranging from May 2006 to March 2018.

**CAPITAL**

Shareholders' equity was \$406.5 million at March 31, 2006, compared to \$404.5 million at December 31, 2005. The increase in shareholders' equity during the first three months of 2006 resulted primarily from net income of \$16.4 million, offset by \$8.2 million in cash dividends to shareholders and \$5.5 million in stock repurchases.

The Company is subject to risk-based capital adequacy guidelines that measure capital relative to risk-weighted assets and off-balance sheet financial instruments. Capital adequacy guidelines issued by the Federal Reserve Board require bank holding companies to have a minimum total risk-based capital ratio of 8.00%, with at least half of total capital in

the form of Tier 1, or core capital. To be considered well-capitalized under the regulatory framework, minimum capital ratios of 10.00% for total risk-based capital, 6.00% for Tier 1 risk-based capital and 5.00% for Tier 1 leverage must be maintained.

**CAPITAL (Continued)**

As of March 31, 2006, the Company met all capital adequacy requirements to which it is subject. The Company's capital ratios were as follows:

	March 31, 2006	December 31, 2005
Total capital to risk-weighted assets <sup>(1)</sup>	12.18%	12.32%
Tier 1 capital to risk-weighted assets <sup>(1)</sup>	11.12	11.24
Tier 1 capital to average assets <sup>(1)</sup>	7.58	7.57

<sup>(1)</sup> As defined by the regulations.

As of March 31, 2006, the Company's total risk-based capital was \$510 million and Tier 1 risk-based capital was \$466 million, an excess of \$91 million and \$214 million, respectively, over the minimum guidelines prescribed by regulatory agencies for a well-capitalized institution. In addition, Republic Bank had regulatory capital ratios in excess of the minimum levels established for well-capitalized institutions.

**ACCOUNTING AND FINANCIAL REPORTING**

The Company's consolidated financial statements are prepared based on the application of accounting policies, the most significant of which are described in Note 1 to the consolidated financial statements included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2005. These policies require estimates and assumptions which may prove inaccurate or subject to variations. Changes in underlying factors, assumptions or estimates could have a material impact on the Company's future financial condition and results of operations. The most critical of these significant accounting policies is the policy for the allowance for loan losses. This policy is discussed more fully on pages 45 and 46 of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2005.

## **FORWARD-LOOKING STATEMENTS**

From time to time, we may communicate or publish forward-looking statements relating to such matters as possible or assumed future results of our operations, anticipated financial performance, business prospects, new products, and similar matters. These forward-looking statements are subject to risks and uncertainties. Also, when we use any of the words “appropriate,” “believes,” “considers,” “expects,” “plans,” “anticipates,” “estimates,” “seeks,” “intends,” “outlook,” “forecast,” “project,” “assume,” “achievable,” “potential,” “strategy,” “goal,” “trends,” and variations of such words and other similar expressions, we are making forward-looking statements.

We claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 for all of our forward-looking statements. While we believe that our forward-looking statements are reasonable, you should not place undue reliance on any such forward-looking statements, which speak only as of the date made. You should understand that the following important factors, in addition to those discussed elsewhere in this Quarterly Report on Form 10-Q, or in our filings with the SEC (which are accessible on the SEC’s website at [www.sec.gov](http://www.sec.gov) and on our website at [www.republicbancorp.com](http://www.republicbancorp.com)), or in our press releases, presentations or other public documents to which we refer, could affect our future results and performance. This could cause those results to differ materially from those expressed in our forward-looking statements. Factors that might cause such a difference include the following:

- significantly increased competition from banking and non-banking institutions;
- inflation and changes in the interest rate environment that reduce our margins or reduce the fair value of financial instruments;
- general political, industry and economic conditions, either domestically or internationally, that are different than expected;
- adverse developments concerning credit quality in our business segments that may result in increases in our provisions for loan losses, nonperforming assets, potential problem loans, net charge-offs and reserve for credit losses could cause earnings to decline;
- instruments, systems and strategies that are used to hedge or otherwise manage our exposure to various types of market, credit, operational and enterprise-wide risk could be less effective than anticipated, and we may not be able to effectively mitigate risk exposures in particular market environments or against particular types of risk;
- customer borrowing, repayment, investment and deposit practices generally may be less favorable than anticipated;
- the mix of interest rates and maturities of our interest earning assets and interest-bearing liabilities (primarily loans and deposits) may be less favorable than expected;
- interest rate margin compression may be greater than expected;
- adverse changes in the securities markets;
- legislative or regulatory changes, actions or reinterpretations that adversely affect our business;
- the ability to enter new markets successfully and capitalize on growth opportunities;
- effects of and changes in trade, monetary and fiscal policies and laws, including interest rate policies of the Federal Reserve Board;
- timely development of and acceptance of new products and services;
- changes in consumer spending, borrowing and savings habits;
- effect of changes in accounting policies and practices, as may be adopted by the bank regulatory agencies, the Financial Accounting Standards Board or other regulatory agencies;
- changes in our organization, compensation and benefit plans;
- costs and effects of new litigation or changes in existing litigation and unexpected or adverse outcomes in such litigation; and
- our success in managing the foregoing factors and the risks associated with or inherent in the foregoing.

The Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made to reflect the occurrence of unanticipated events.

23

---

**ITEM 3: Quantitative and Qualitative Disclosures About Market Risk**

**MARKET RISK MANAGEMENT**

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, foreign exchange rates and equity prices. The Company's market risk exposure is composed entirely of interest rate risk. Interest rate risk arises in the normal course of business to the extent that there is a difference between the amount of the Company's interest-earning assets and the amount of interest-bearing liabilities that are prepaid/withdrawn, reprice or mature in specified periods. Because the Company's business is subject to many factors beyond its control (see Forward-Looking Statements on previous page), in managing the Company's assets, liabilities and overall exposure to risk, management must rely on numerous estimates, evaluations and assumptions. Consequently, actual results could differ materially from those anticipated by management or expressed in the Company's press releases, presentations or other public documents.

**Asset and Liability Management**

The primary objective of asset and liability management is to maintain stability in the level of net interest income by producing the optimal yield and maturity mix of assets and liabilities within the interest rate risk limits set by the Company's Asset and Liability Management Committee (ALCO) and consistent with projected liquidity needs and capital adequacy requirements.

**Interest Rate Risk Management**

The Company's ALCO, which meets weekly, is responsible for reviewing the interest rate sensitivity position of the Company and establishing policies to monitor and limit exposure to interest rate risk. Senior management at Republic Bank is responsible for ensuring that the Bank's asset and liability management procedures adhere to corporate policies and risk limits established by its Board of Directors.

The Company utilizes two complementary quantitative tools to measure and monitor interest rate risk: static gap analysis and earnings simulation modeling. Each of these interest rate risk measurements has limitations, but the Company believes that when evaluated together, they provide a reasonably comprehensive view of the Company's exposure to interest rate risk.

*Static Gap Analysis:* Static gap analysis is utilized at the end of each month to measure the amount of interest rate risk embedded in the balance sheet as of a point in time. The Company undertakes this analysis by comparing the differences in the repricing characteristics of interest-earning assets and interest-bearing liabilities. A gap is defined as the difference between the principal amount of interest-earning assets and interest-bearing liabilities that reprice within a specified time period. This gap provides a general indication of the sensitivity of the Company's net interest income to interest rate changes. If more assets than liabilities reprice or mature in a given period, resulting in an asset sensitive position or positive gap, increases in market interest rates will generally benefit net interest income because earning asset rates will reflect the changes more quickly than rates paid on interest-bearing liabilities. Alternatively, if interest-bearing liabilities reprice more quickly than interest-earning assets, resulting in a liability sensitive position or negative gap, then increases in market interest rates will generally have an adverse impact on net interest income. At March 31, 2006, the cumulative one-year gap was a negative 6.99% of total earning assets.

The Company's current policy is to maintain a mix of assets and liabilities with repricing and maturity characteristics that reflect a moderate amount of short-term interest rate risk based on management's evaluation of current interest rate projections, customer credit demands and deposit preferences. The Company generally operates in a range of plus or minus 10% of total earning assets for the cumulative one-year gap. Management believes that this range reduces the vulnerability of net interest income to large shifts in market interest rates while allowing the Company to take advantage of fluctuations in current short-term rates. This range also complements the Company's strong retail mortgage banking franchise.

*Earnings Simulation:* On a monthly basis, the earnings simulation model is used to quantify the effects of various hypothetical changes in interest rates on the Company's projected net interest income over the ensuing twelve-month period. The model permits management to evaluate the effects of various parallel shifts of the U.S. Treasury yield curve, upward and downward, on expected net interest income in a stable interest rate environment (i.e., base net interest income).

As of March 31, 2006, the earnings simulation model projects the following change in net interest income from base net interest income, assuming an immediate parallel shift in market interest rates:

Change in market interest rates in basis points	+200	+100	+50	-50	-100	-200
Projected change in net interest income over next twelve months	-5.59%	-2.30%	-1.03%	1.44%	2.26%	-1.33%

These projected levels, which are well within the Company's policy limits, portray the Company's interest rate risk position as liability sensitive for a one-year horizon. The earnings simulation model assumes, among other things, that current balance sheet totals remain constant and all maturities and prepayments of interest-earning assets and interest-bearing liabilities are reinvested at current market rates.

### Mortgage Banking Hedging Activities

The Company implemented SFAS 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended, effective January 1, 2001. The Statement requires the Company to recognize all derivatives on the balance sheet at fair value. Derivatives that are not intended, or do not qualify, for special hedge accounting pursuant to SFAS 133 are adjusted to fair value through income. If the derivative qualifies for special hedge accounting, depending on the nature of the hedge, changes in the fair value of derivatives will either be offset against the change in fair value of the hedged assets, liabilities, or firm commitments through earnings or recognized in other comprehensive income until the hedged item is recognized in earnings. The ineffective portion of a derivative's change in fair value will be immediately recognized in earnings.

The Company's hedging program utilizes mandatory forward commitments to hedge the change in fair value of mortgage loans held for sale. At March 31, 2006, the Company elected to not apply special hedge accounting and accordingly recorded the mortgage loans held for sale at the lower of cost or market. There was no impact to mortgage banking income for the first quarter of 2006 as a result of this election.

At March 31, 2006, the Company had outstanding \$28.7 million of commitments to fund residential real estate loan applications with agreed-upon rates ("Interest Rate Lock Commitments" or "IRLCs"). IRLCs subject the Company to market risk due to fluctuations in interest rates. At March 31, 2006, the Company had outstanding mandatory forward commitments to sell \$51.6 million of residential mortgage loans. These mandatory forward commitments were utilized to offset the change in the value of \$24.2 million of mortgage loans held for sale and \$27.4 million of IRLCs. The outstanding forward commitments to sell mortgage loans are expected to settle in the second quarter of 2006 without producing any material gains or losses.

IRLCs are defined as derivatives under SFAS 133. Price risk associated with IRLCs is managed primarily through the use of other derivative instruments, such as mandatory forward commitments. Because IRLCs are defined as derivative instruments under SFAS 133, IRLCs and the associated mandatory forward commitments are recorded at fair value under SFAS 133. Gains and losses on mortgage-banking related derivative instruments are included in mortgage banking income on the income statement. The fair value of IRLCs was a loss of \$101,000 at March 31, 2006. The fair value of the associated mandatory forward commitments was a gain of \$96,000 at March 31, 2006. The Company does not enter into derivative transactions for purely speculative purposes.

### Interest Rate Swap Transactions

During the second quarter of 2004, the Company entered into interest rate swap transactions with a total notional amount of \$73.3 million as part of its asset/liability management activities and associated management of interest rate risk. Using interest rate swaps, the Company's interest rate sensitivity is adjusted to maintain a desired interest rate risk profile. Interest rate swaps involve the exchange of fixed-rate and variable-rate payments without the exchange of the underlying notional amount on which the interest payments are calculated. Maximizing hedge effectiveness is the primary consideration in choosing the specific liability to be hedged. The Company's interest rate swap transactions are used to adjust the interest rate sensitivity of certain long-term fixed-rate FHLB advances and security repurchase agreements (interest-bearing liabilities) and will not need to be replaced at maturity, since the corresponding liability will mature along with the interest rate swap.

The interest rate swaps are designated as fair value type hedges. As required by SFAS 133, all interest rate derivatives are recorded at fair value as other assets or liabilities on the balance sheet. The hedging relationship involving the interest-bearing liabilities and the interest rate swaps meet the conditions of SFAS 133 to assume no ineffectiveness in the hedging relationship. As a result, changes in the fair value of the interest rate swaps and the interest-bearing instruments off-set with no impact on income.

Interest expense on interest rate swaps used to manage interest rate exposure is recorded on an accrual basis as an adjustment to the yield of the designated hedged exposures over the periods covered by the contracts. This matches the income recognition treatment of that exposure, liabilities carried at historical cost, with interest recorded on an

accrual basis.

25

---

Interest Rate Swap Transactions (Continued)

The notional amounts, fair value, maturity and weighted-average pay and receive rates for the swap position at March 31, 2006 are summarized as follows:

(Dollars in thousands)	Year of Maturity			Total
	2006	2007	2008	
Receive fixed/pay floating swaps: <sup>(1)</sup>				
Notional amount	\$ -	\$ 36,300	\$ 37,000	\$ 73,300
Fair value gain/(loss)	-	(1,058)	(1,440)	(2,498)
Weighted average:				
Receive rate	-%	2.92%	3.24%	3.08%
Pay rate	-	4.32%	4.95%	4.64%

(1) Variable interest rates - which generally are based on the one-month and three-month LIBOR in effect on the date of repricing.

Additional quantitative and qualitative disclosures about market risk are discussed throughout Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations beginning on page 12 of this report.

#### **ITEM 4: Controls and Procedures**

##### **Internal Controls**

There have been no changes in the Company's internal control over financial reporting during the Company's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

##### **Disclosure Controls And Procedures**

The Company maintains disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) that are designed to provide reasonable assurance that the information required to be disclosed in the reports it files with the SEC is collected and then processed, summarized and disclosed within the time periods specified in the rules of the SEC. Under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, the Company has evaluated the effectiveness of the design and operation of its disclosure controls and procedures as of the end of the period covered by this report. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that these procedures are effective.

**PART II -****OTHER INFORMATION****Item 1. Legal Proceedings**

The Company's subsidiary is a party to litigation and claims arising in the normal course of its activities. Although the amount of ultimate liability, if any, with respect to such matters cannot be determined with reasonable certainty, management, after consultation with legal counsel, believes that the aggregate liability, if any, resulting from such matters would not have a material adverse effect on the Company's consolidated financial condition.

**Item 2. Purchases of Equity Securities by the Issuer and Affiliated Purchasers**

Republic Bancorp Inc. shares repurchased during the quarter ended March 31, 2006 were as follows:

<u>Period</u>	<u>Total Shares Purchased</u>	<u>Average Price Paid Per Share</u>	<u>Shares Purchased as Part of Publicly Announced Plans<sup>(1)</sup></u>	<u>Maximum Shares Available to be Purchased Under the Plans<sup>(1)</sup></u>
