PART 1 – FINANCIAL INFORMATION

ITEM 1 – FINANCIAL STATEMENTS

EVANS BANCORP, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

THREE MONTHS ENDED MARCH 31, 2015 AND 2014

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies followed by Evans Bancorp, Inc. (the "Company"), a financial holding company, and its two direct, wholly-owned subsidiaries: (i) Evans Bank, National Association (the "Bank"), and the Bank's subsidiaries, Evans National Leasing, Inc. ("ENL"), Evans National Holding Corp. ("ENHC") and Suchak Data Systems, LLC ("SDS"); and (ii) Evans National Financial Services, LLC ("ENFS"), and ENFS's subsidiary, The Evans Agency, LLC ("TEA"), and TEA's subsidiaries, Frontier Claims Services, Inc. ("FCS") and ENB Associates Inc. ("ENBA"), in the preparation of the accompanying interim unaudited consolidated financial statements conform with U.S. generally accepted accounting principles ("GAAP") and with general practice within the industries in which it operates. Except as the context otherwise requires, the Company and its direct and indirect subsidiaries are collectively referred to in this report as the "Company."

The accompanying consolidated financial statements are unaudited. In the opinion of management, all adjustments necessary for a fair presentation of the Company's financial position and results of operations for the interim periods have been made. During the three month period ended March 31, 2015, the Company revised the unaudited Consolidated Statement of Cash Flows for the three month period ended March 31, 2014 to correct errors of a \$40 thousand increase within "Depreciation and amortization", \$236 thousand increase within "Change in other assets affecting cash flow", and \$276 thousand decrease within "Change in other liabilities affecting cash flow" line items. The Company has assessed the materiality of this correction and concluded, based on qualitative and quantitative considerations, in accordance with Staff Accounting Bulletin No. 99, that the adjustments were not material to our previously reported financial statements.

The results of operations for the three month periods ended March 31, 2015 are not necessarily indicative of the results to be expected for the full year. The accompanying unaudited consolidated financial statements should be read in conjunction with the Audited Consolidated Financial Statements and the Notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2014.

2. SECURITIES

The amortized cost of securities and their approximate fair value at March 31, 2015 and December 31, 2014 were as follows:

e ,			

Available for sale securities with a total fair value of \$85.6 million and \$68.8 million at March 31, 2015 and December 31, 2014, respectively, were pledged as collateral to secure public deposits and for other purposes required or permitted by law.

The Company uses the Federal Home Loan Bank of New York ("FHLBNY") as its primary source of overnight funds and also has several long-term advances with FHLBNY. The Company had no borrowed funds as of March 31, 2015, and had a total of \$13.7 million in borrowed funds with FHLBNY at December 31, 2014. The Company has placed sufficient collateral in the form of residential and commercial real estate loans at FHLBNY that meet FHLB collateral requirements. As a member of the Federal Home Loan Bank ("FHLB") System, the Bank is required to hold stock in FHLBNY. The Bank held \$0.8 million and \$1.4 million in FHLBNY stock as of March 31, 2015 and December 31, 2014 at amortized cost. The Company regularly evaluates investments in FHLBNY for impairment, considering liquidity, operating performance, capital position, stock repurchase and dividend history. At this time, the Company does not believe any impairment in FHLBNY stock is warranted.

The scheduled maturities of debt and mortgage-backed securities at March 31, 2015 and December 31, 2014 are summarized below. All maturity amounts are contractual maturities. Actual maturities may differ from contractual maturities because certain issuers have the right to call or prepay obligations with or without call premiums.

Information regarding unrealized losses within the Company's available for sale securities at March 31, 2015 and December 31, 2014 is summarized below. The securities are primarily U.S. government-guaranteed agency securities or municipal securities. All unrealized losses are considered temporary and related to market interest rate fluctuations.

Management has assessed the securities available for sale in an unrealized loss position at March 31, 2015 and December 31, 2014 and determined the decline in fair value below amortized cost to be temporary. In making this determination, management considered the period of time the securities were in a loss position, the percentage decline in comparison to the securities' amortized cost, and the financial condition of the issuer (primarily government or government-sponsored enterprises). In addition, management does not intend to sell these securities and it is not more likely than not that the Company will be required to sell these securities before recovery of their amortized cost. Management believes the decline in fair value is primarily related to market interest rate fluctuations and not to the credit deterioration of the individual issuers.

The Company had not recorded any other-than-temporary impairment ("OTTI") charges as of March 31, 2015 and did not record any OTTI charges during 2014. Nevertheless, it remains possible that there could be deterioration in the asset quality of the securities portfolio in the future. The credit worthiness of the Company's portfolio is largely reliant on the ability of U.S. government sponsored agencies such as FHLB, Federal National Mortgage Association ("FNMA"), Government National Mortgage Association ("GNMA"), and Federal Home Loan Mortgage Corporation ("FHLMC"), and municipalities throughout New York State to meet their obligations. In addition, dysfunctional markets could materially alter the liquidity, interest rate, and pricing risk of the portfolio. The relatively stable past performance is not a guarantee for similar performance of the Company's securities portfolio going forward.

3. FAIR VALUE MEASUREMENTS

The Company follows the provisions of ASC Topic 820, "Fair Value Measurements and Disclosures." Those provisions relate to financial assets and liabilities carried at fair value and fair value disclosures related to financial assets and liabilities. ASC Topic 820 defines fair value and specifies a hierarchy of valuation techniques based on the nature of the inputs used to develop the fair value measures. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

There are three levels of inputs to fair value measurements:

- Level 1, meaning the use of quoted prices for identical instruments in active markets;
- Level 2, meaning the use of quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active or are directly or indirectly observable; and
- · Level 3, meaning the use of unobservable inputs.

Observable market data should be used when available.

FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE ON A RECURRING BASIS

The following table presents for each of the fair-value hierarchy levels as defined in this footnote, those financial instruments which are measured at fair value on a recurring basis at March 31, 2015 and December 31, 2014:

(in thousands)	Level 1	Level 2	Level 3	Fair Value
March 31, 2015 Securities available-for-sale: U.S. government agencies	\$ -	\$ 26,859	\$ -	\$ 26,859
States and political subdivisions Mortgage-backed securities Mortgage servicing rights	φ - - -	\$ 20,839 31,929 39,605	\$ - - 497	\$ 20,839 31,929 39,605 497
December 31, 2014 Securities available-for-sale: U.S. government agencies States and political subdivisions Mortgage-backed securities Mortgage servicing rights	\$ - - -	\$ 26,717 31,060 37,756	\$ - - - 518	\$ 26,717 31,060 37,756 518

Securities available for sale

Fair values for securities are determined using independent pricing services and market-participating brokers. The Company's independent pricing service utilizes evaluated pricing models that vary by asset class and incorporate available trade, bid and other market information for structured securities, cash flow and, when available, loan performance data. Because many fixed income securities do not trade on a daily basis, the evaluated pricing applications apply information as applicable through processes, such as benchmarking of like securities, sector groupings, and matrix pricing, to prepare evaluations. In addition, model processes, such as the Option Adjusted Spread model, are used to assess interest rate impact and develop prepayment scenarios. The models and the process take into account market convention. For each asset class, a team of evaluators gathers information from market sources and integrates relevant credit information, perceived market movements and sector news into the evaluated pricing applications and models. The company's service provider may occasionally determine that it does have not sufficient verifiable information to value a particular security. In these cases the Company will utilize valuations from another pricing service.

Management believes that it has a sufficient understanding of the third party service's valuation models, assumptions and inputs used in determining the fair value of securities to enable management to maintain an appropriate system of internal control. On a quarterly basis, the Company reviews changes in the market value of its security portfolio. Individual changes in valuations are reviewed for consistency with general interest rate movements and any known credit concerns for specific securities. Additionally, on an annual basis, the Company has its entire security portfolio priced by a second pricing service to determine consistency with another market evaluator. If, on the Company's review or in comparing with another servicer, a material difference between pricing evaluations were to exist, the Company would submit an inquiry to the service provider regarding the data used to value a particular security. If the Company determines it has market information that would support a different valuation than the initial evaluation it can submit a challenge for a change to that security's valuation. There were no material differences in valuations noted in the first quarter of 2015 or during fiscal year 2014.

Securities available for sale are classified as Level 2 in the fair value hierarchy as the valuation provided by the third-party provider uses observable market data.

Mortgage servicing rights

Mortgage servicing rights ("MSRs") do not trade in an active, open market with readily observable prices. Accordingly, the Company obtains the fair value of the MSRs using a third-party pricing provider. The provider determines the fair value by discounting projected net servicing cash flows of the remaining servicing portfolio. The valuation model used by the provider considers market loan prepayment predictions and other economic factors which management considers to be significant unobservable inputs. The fair value of MSRs is mostly affected by changes in mortgage interest rates since rate changes cause the loan prepayment acceleration factors to increase or decrease. Management has a sufficient understanding of the third party service's valuation models, assumptions and inputs used in

determining the fair value of MSRs to enable management to maintain an appropriate system of internal control. Mortgage servicing rights are classified within Level 3 of the fair value hierarchy as the valuation is model driven and primarily based on unobservable inputs.

The following table summarizes the changes in fair value for mortgage servicing rights during the three month periods ended March 31, 2015 and 2014, respectively:
