Forward-Looking Statements

Certain of the statements contained herein are forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as "anticipates," "intends," "plans," "seeks," "believes," "estimates," "expects," "projects," and similar references to future periods.

Forward-looking statements are based on management's current expectations and assumptions regarding future economic, competitive, legislative and other developments and their potential effect upon The Hartford Financial Services Group, Inc. and its subsidiaries (collectively, the "Company" or "The Hartford"). Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. Actual results could differ materially from expectations, depending on the evolution of various factors, including the risks and uncertainties identified below, as well as factors described in such forward-looking statements or in Part I, Item 1A, Risk Factors in The Hartford's 2018 Form 10-K Annual Report; and our other filings with the Securities and Exchange Commission ("SEC").

• Risks Relating to Economic, Political and Global Market Conditions:

challenges related to the Company's current operating environment, including global political, economic and market conditions, and the effect of financial market disruptions, economic downturns, changes in trade regulation including tariffs and other barriers or other potentially adverse macroeconomic developments on the demand for our products and returns in our investment portfolios;

market risks associated with our business, including changes in credit spreads, equity prices, interest rates, inflation rate, and market volatility;

the impact on our investment portfolio if our investment portfolio is concentrated in any particular segment of the economy;

the impacts of changing climate and weather patterns on our businesses, operations and investment portfolio including on claims, demand and pricing of our products, the availability and cost of reinsurance, our modeling data used to evaluate and manage risks of catastrophes and severe weather events, the value of our investment portfolios and credit risk with reinsurers and other counterparties;

the risks associated with the change in or replacement of the London Inter-Bank Offered Rate ("LIBOR") on the securities we hold or may have issued, other financial instruments and any other assets and liabilities whose value is tied to LIBOR;

Insurance Industry and Product-Related Risks:

the possibility of unfavorable loss development, including with respect to long-tailed exposures;

the significant uncertainties that limit our ability to estimate the ultimate reserves necessary for asbestos and environmental claims;

the possibility of a pandemic, earthquake, or other natural or man-made disaster that may adversely affect our businesses;

weather and other natural physical events, including the intensity and frequency of storms, hail, wildfires, flooding, winter storms, hurricanes and tropical storms, as well as climate change and its potential impact on weather patterns;

the possible occurrence of terrorist attacks and the Company's inability to contain its exposure as a result of, among other factors, the inability to exclude coverage for terrorist attacks from workers' compensation policies and limitations on reinsurance coverage from the federal government under applicable laws;

the Company's ability to effectively price its property and casualty policies, including its ability to obtain regulatory consents to pricing actions or to non-renewal or withdrawal of certain product lines;

actions by competitors that may be larger or have greater financial resources than we do;

technological changes, such as usage-based methods of determining premiums, advancements in automotive safety features, the development of autonomous vehicles, and platforms that facilitate ride sharing, which may alter demand for the Company's products, impact the frequency or severity of losses, and/or impact the way the Company markets, distributes and underwrites its products;

the Company's ability to market, distribute and provide insurance products and investment advisory services through current and future distribution channels and advisory firms;

the uncertain effects of emerging claim and coverage issues;

Financial Strength, Credit and Counterparty Risks:

risks to our business, financial position, prospects and results associated with negative rating actions or

downgrades in the Company's financial strength and credit ratings or negative rating actions or downgrades relating to our investments;

□

the impact on our statutory capital of various factors, including many that are outside the Company's control, which can in turn affect our credit and financial strength ratings, cost of capital, regulatory compliance and other aspects of our business and results;

3

losses due to nonperformance or defaults by others, including credit risk with counterparties associated with investments, derivatives, premiums receivable, reinsurance recoverables and indemnifications provided by third parties in connection with previous dispositions;

the potential for losses due to our reinsurers' unwillingness or inability to meet their obligations under reinsurance contracts and the availability, pricing and adequacy of reinsurance to protect the Company against losses;

regulatory limitations on the ability of the Company and certain of its subsidiaries to declare and pay dividends;

Risks Relating to Estimates, Assumptions and Valuations:

risk associated with the use of analytical models in making decisions in key areas such as underwriting, pricing, capital management, reserving, investments, reinsurance and catastrophe risk management;

the potential for differing interpretations of the methodologies, estimations and assumptions that underlie the Company's fair value estimates for its investments and the evaluation of other-than-temporary impairments on available-for-sale securities;

the potential for further impairments of our goodwill or the potential for changes in valuation allowances against deferred tax assets;

Strategic and Operational Risks:

the Company's ability to maintain the availability of its systems and safeguard the security of its data in the event of a disaster, cyber or other information security incident or other unanticipated event;

the potential for difficulties arising from outsourcing and similar third-party relationships;

the risks, challenges and uncertainties associated with capital management plans, expense reduction initiatives and other actions, which may include acquisitions, divestitures or restructurings;

failure to complete our proposed acquisition of The Navigators Group, Inc. may cause volatility in our securities;

risks associated with acquisitions and divestitures, including the challenges of integrating acquired companies or businesses or separating from our divested businesses, which may result in our inability to achieve the anticipated benefits and synergies and may result in unintended consequences;

difficulty in attracting and retaining talented and qualified personnel, including key employees, such as executives, managers and employees with strong technological, analytical and other specialized skills;

the Company's ability to protect its intellectual property and defend against claims of infringement;

Regulatory and Legal Risks:

the cost and other potential effects of increased regulatory and legislative developments, including those that could adversely impact the demand for the Company's products, operating costs and required capital levels;

unfavorable judicial or legislative developments;

the impact of changes in federal or state tax laws;

regulatory requirements that could delay, deter or prevent a takeover attempt that stockholders might consider in their best interests; and

the impact of potential changes in accounting principles and related financial reporting requirements.

Any forward-looking statement made by the Company in this document speaks only as of the date of the filing of this Form 10-Q. Factors or events that could cause the Company's actual results to differ may emerge from time to time, and it is not possible for the Company to predict all of them. The Company undertakes no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments or otherwise.

Part I - Item 1. Financial Statements

Item 1. Financial Statements

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
The Hartford Financial Services Group, Inc.
Hartford, Connecticut

Results of Review of Interim Financial Information

We have reviewed the accompanying condensed consolidated balance sheet of The Hartford Financial Services Group, Inc. and subsidiaries (the "Company") as of March 31, 2019, the related condensed consolidated statements of operations, comprehensive income (loss), changes in stockholders' equity, and cash flows for the three-month periods ended March 31, 2019 and 2018, and the related notes (collectively referred to as the "interim financial information"). Based on our reviews, we are not aware of any material modifications that should be made to the accompanying interim financial information for it to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheet of the Company as of December 31, 2018, and the related consolidated statements of operations, comprehensive income (loss), changes in stockholders' equity, and cash flows for the year then ended (not presented herein); and in our report dated February 22, 2019, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2018, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Basis for Review Results

This interim financial information is the responsibility of the Company's management. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our reviews in accordance with standards of the PCAOB. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Dollar amounts in millions, except for per share data, unless otherwise stated)

1. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The Hartford Financial Services Group, Inc. is a holding company for insurance and financial services subsidiaries that provide property and casualty insurance, group life and disability products and mutual funds and exchange-traded products to individual and business customers (collectively, "The Hartford", the "Company", "we" or "our").

On August 22, 2018, the Company announced it entered into a definitive agreement to acquire all outstanding common shares of The Navigators Group, Inc. ("Navigators Group"), a global specialty underwriter, for \$70 a share, or \$2.2 billion in cash, including transaction expenses. The transaction is expected to close in the second quarter of 2019, subject to customary closing conditions, including receipt of regulatory approvals. The Company signed an agreement with National Indemnity Company ("NICO"), a subsidiary of Berkshire Hathaway Inc., which, subject to regulatory approval and upon closing of the acquisition, will have Navigators Group subsidiaries enter into an aggregate excess of loss reinsurance agreement with NICO to cover unfavorable reserve development to Navigators Group reserves subject to the agreement, with limited exclusions. The reinsurance agreement will cover accident year 2018 and prior year reserves. The reinsurance agreement provides up to \$300 of coverage for potential unfavorable net loss reserve development in excess of \$1.916 billion which is \$100 above Navigators Group recorded reserves subject to the agreement of \$1.816 billion as of December 31, 2018.

On May 31, 2018, Hartford Holdings, Inc., a wholly owned subsidiary of the Company, completed the sale of the issued and outstanding equity of Hartford Life, Inc. ("HLI"), a holding company, for its life and annuity operating subsidiaries. For further discussion of this transaction, see Note 16 - Business Disposition and Discontinued Operations of Notes to Condensed Consolidated Financial Statements.

The Condensed Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") for interim financial information, which differ materially from the accounting practices prescribed by various insurance regulatory authorities. These Condensed Consolidated Financial Statements and Notes should be read in conjunction with the Consolidated Financial Statements and Notes thereto included in the Company's 2018 Form 10-K Annual Report. The results of operations for interim periods are not necessarily indicative of the results that may be expected for the full year.

The accompanying Condensed Consolidated Financial Statements and Notes are unaudited. These financial statements reflect all adjustments (generally consisting only of normal accruals) which are, in the opinion of management, necessary for the fair presentation of the financial position, results of operations and cash flows for the interim periods. The Company's significant accounting policies are summarized in Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to

Consolidated Financial Statements included in the Company's 2018 Form 10-K Annual Report.

Consolidation

The Condensed Consolidated Financial Statements include the accounts of The Hartford Financial Services Group, Inc., and entities in which the Company directly or indirectly has a controlling financial interest. Entities in which the Company has significant influence over the operating and financing decisions but does not control are reported using the equity method. All intercompany transactions and balances between The Hartford and its subsidiaries and affiliates that are not held for sale have been eliminated.

Discontinued Operations

The results of operations of a component of the Company are reported in discontinued operations when certain criteria are met as of the date of disposal, or earlier if classified as held-for-sale. When a component is identified for discontinued operations reporting, amounts for prior periods are retrospectively reclassified as discontinued operations. Components are identified as discontinued operations if they are a major part of an entity's operations and financial results such as a separate major line of business or a separate major geographical area of operations.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The most significant estimates include those used in determining property and casualty and group long-term disability insurance product reserves, net of reinsurance; evaluation of goodwill for impairment; valuation of investments and derivative instruments; valuation allowance on deferred tax assets; and contingencies relating to corporate litigation and regulatory matters.

Adoption of New Accounting Standards

Hedging Activities

On January 1, 2019, the Company adopted the Financial Accounting Standards Board's ("FASB") updated guidance for hedge accounting through a cumulative effect adjustment of less than \$1 to reclassify cumulative ineffectiveness on cash flow hedges from retained earnings to AOCI. The updates allow hedge accounting for new types of interest rate hedges of financial instruments and simplify documentation requirements to qualify for hedge accounting. In addition, any gain or loss from hedge

Table of Contents**THE HARTFORD FINANCIAL SERVICES GROUP, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)**

ineffectiveness is reported in the same income statement line with the effective hedge results and the hedged transaction. For cash flow hedges, the ineffectiveness is recognized in earnings only when the hedged transaction affects earnings; otherwise, the ineffectiveness gains or losses remain in AOCI. Under previous accounting, total hedge ineffectiveness was reported separately in realized capital gains and losses apart from the hedged transaction. The adoption did not affect the Company's financial position or cash flows or have a material effect on net income.

Leases

On January 1, 2019, the Company adopted the FASB's updated lease guidance. Under the updated guidance, lessees with operating leases are required to recognize a liability for the present value of future minimum lease payments with a corresponding asset for the right of use of the property. Prior to the new guidance, future minimum lease payments on operating leases were commitments that were not recognized as liabilities on the balance sheet. Leases are classified as financing or operating leases. Where the lease is economically similar to a purchase because The Hartford obtains control of the underlying

asset, the lease is classified as a financing lease and the Company recognizes amortization of the right of use asset and interest expense on the liability. Where the lease provides The Hartford with only the right to control the use of the underlying asset over the lease term and the lease term is greater than one year, the lease is an operating lease and the lease cost is recognized as rental expense over the lease term on a straight-line basis. Leases with a term of one year or less are also expensed over the lease term but not recognized on the balance sheet. On adoption, The Hartford recorded a lease payment obligation of \$160 for outstanding leases and a right of use asset of \$150, which is net of \$10 in lease incentives received, with no change to comparative periods. As permitted by the new guidance, as of the implementation date, the Company did not reassess whether expired or existing contracts are leases or contain leases, did not change the classification of expired or existing operating leases, and did not reassess initial direct costs for existing leases to determine if deferred costs should be written-off or recorded on adoption. The adoption did not impact net income or cash flows.

12

Table of Contents**THE HARTFORD FINANCIAL SERVICES GROUP, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)****3. SEGMENT INFORMATION**

The Company currently conducts business principally in five reporting segments including Commercial Lines, Personal Lines, Property & Casualty ("P&C") Other Operations, Group Benefits and Hartford Funds, as well as a Corporate category. The Company includes in the Corporate category discontinued operations related to the life and annuity business sold in May 2018, reserves for run-off structured settlement and terminal funding agreement liabilities, capital raising activities (including debt financing and related interest expense), certain purchase accounting adjustments related to goodwill and other expenses not allocated to the reporting segments. Corporate also includes investment management fees and expenses related to managing third party business, including management of the invested assets of Talcott Resolution Life, Inc. and its subsidiaries ("Talcott Resolution"). Talcott Resolution is the new holding company of the life and annuity business the Company sold in May 2018. In addition, Corporate includes a 9.7% ownership interest in the legal entity that acquired the sold life and annuity business. For further discussion of continued involvement in the life and annuity business sold in May 2018, see Note 16 - Business Disposition and Discontinued Operations of Notes to Condensed Consolidated Financial Statements.

The Company's revenues are generated primarily in the United States ("U.S."). Any foreign sourced revenue is immaterial.

4. FAIR VALUE MEASUREMENTS

The Company carries certain financial assets and liabilities at estimated fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants. Our fair value framework includes a hierarchy that gives the highest priority to the use of quoted prices in active markets, followed by the use of market observable inputs, followed by the use of unobservable inputs. The fair value hierarchy levels are as follows:

- Level 1 Fair values based primarily on unadjusted quoted prices for identical assets or liabilities, in active markets that the Company has the ability to access at the measurement date.
- Level 2 Fair values primarily based on observable inputs, other than quoted prices included in Level 1, or based on prices for similar assets and liabilities.

Fair values derived when one or more of the significant inputs are unobservable (including assumptions about risk). With little or no observable market, the determination of fair values uses considerable judgment and represents the Company's best estimate of an amount that could be realized in a market exchange for the asset or liability. Also included are securities that are traded within illiquid markets and/or priced by independent brokers.

The Company will classify the financial asset or liability by level based upon the lowest level input that is significant to the determination of the fair value. In most cases, both observable inputs (e.g., changes in interest rates) and unobservable inputs (e.g., changes in risk assumptions) are used to determine fair values that the Company has classified within Level 3.

Includes derivative instruments in a net positive fair value position after consideration of the accrued interest and impact of [1] collateral posting requirements which may be imposed by agreements and applicable law. See footnote 2 to this table for derivative liabilities.

[2] Includes derivative instruments in a net negative fair value position (derivative liability) after consideration of the accrued interest and impact of collateral posting requirements which may be imposed by agreements and applicable law.

[3] For additional information see the Contingent Consideration section below.

Fixed Maturities, Equity Securities, Short-term Investments, and Derivatives

Valuation Techniques

The Company generally determines fair values using valuation techniques that use prices, rates, and other relevant information evident from market transactions involving identical or similar instruments. Valuation techniques also include, where appropriate, estimates of future cash flows that are converted into a single discounted amount using current market expectations. The Company uses a "waterfall" approach

comprised of the following pricing sources and techniques, which are listed in priority order:

Quoted prices, unadjusted, for identical assets or liabilities in active markets, which are classified as Level 1. Prices from third-party pricing services, which primarily utilize a combination of techniques. These services utilize recently reported trades of identical, similar, or benchmark securities making adjustments for market observable inputs available through the reporting date. If there are no recently reported trades, they may use a discounted cash flow technique to develop a price using expected cash flows based upon the anticipated future performance of the underlying collateral discounted at an estimated market rate. Both techniques develop prices that consider the time value of

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

future cash flows and provide a margin for risk, including liquidity and credit risk. Most prices provided by third-party pricing services are classified as Level 2 because the inputs used in pricing the securities are observable. However, some securities that are less liquid or trade less actively are classified as Level 3. Additionally, certain long-dated securities, such as municipal securities and bank loans, include benchmark interest rate or credit spread assumptions that are not observable in the marketplace and are thus classified as Level 3. Internal matrix pricing, which is a valuation process internally developed for private placement securities for which the Company is unable to obtain a price from a third-party pricing service. Internal pricing matrices determine credit spreads that, when combined with risk-free rates, are applied to contractual cash flows to develop a price. The Company develops credit spreads using market based data for public securities adjusted for credit spread differentials between public and private securities, which are obtained from a survey of multiple private placement brokers. The market-based reference credit spread considers the issuer's financial strength and term to maturity, using an independent public security index and trade information, while the credit spread differential considers the non-public nature of the security. Securities priced using internal matrix pricing are classified as Level 2 because the inputs are observable or can be corroborated with observable data.

Independent broker quotes, which are typically non-binding, use inputs that can be difficult to corroborate with observable market based data. Brokers may use present value techniques using assumptions specific to the security types, or they may use recent transactions of similar securities. Due to the lack of transparency in the process that brokers use to develop prices, valuations that are based on independent broker quotes are classified as Level 3.

The fair value of derivative instruments is determined primarily using a discounted cash flow model or option model technique and incorporate counterparty credit risk. In some cases, quoted market prices for exchange-traded and OTC-cleared derivatives may be used and in other cases independent broker quotes may be used. The pricing valuation models primarily use inputs that are observable in the market or can be corroborated by observable market data. The valuation of certain derivatives may include significant inputs that are unobservable, such as volatility levels, and reflect the Company's view of what other market participants would use when pricing such instruments.

Valuation Controls

The fair value process for investments is monitored by the Valuation Committee, which is a cross-functional group of senior management within the Company that meets at least quarterly. The purpose of the committee is to oversee the pricing policy and procedures, as well as to approve changes to valuation methodologies and pricing sources. Controls and procedures used to assess third-party pricing services are reviewed by the Valuation Committee, including the results of annual due-diligence reviews.

There are also two working groups under the Valuation Committee: a Securities Fair Value Working Group ("Securities Working Group") and a Derivatives Fair Value Working Group

("Derivatives Working Group"). The working groups, which include various investment, operations, accounting and risk management professionals, meet monthly to review market data trends, pricing and trading statistics and results, and any proposed pricing methodology changes.

The Securities Working Group reviews prices received from third parties to ensure that the prices represent a reasonable estimate of the fair value. The group considers trading volume, new issuance activity, market trends, new regulatory rulings and other factors to determine whether the market activity is significantly different than normal activity in an active market. A dedicated pricing unit follows up with trading and investment sector professionals and challenges prices of third-party pricing services when the estimated assumptions used differ from what the unit believes a market participant would use. If the available evidence indicates that pricing from third-party pricing services or broker quotes is based upon transactions that are stale or not from trades made in an orderly market, the Company places little, if any, weight on the third party service's transaction price and will estimate fair value using an internal process, such as a pricing matrix.

The Derivatives Working Group reviews the inputs, assumptions and methodologies used to ensure that the prices represent a reasonable estimate of the fair value. A dedicated pricing team works directly with investment sector professionals to investigate the impacts of changes in the market environment on prices or valuations of derivatives. New models and any changes to current models are required to have detailed documentation and are validated to a second source. The model validation documentation and results of validation are presented to the Valuation Committee for approval.

The Company conducts other monitoring controls around securities and derivatives pricing including, but not limited to, the following:

- Review of daily price changes over specific thresholds and new trade comparison to third-party pricing services.
- Daily comparison of OTC derivative market valuations to counterparty valuations.

Review of weekly price changes compared to published bond prices of a corporate bond index.

Monthly reviews of price changes over thresholds, stale prices, missing prices, and zero prices.

Monthly validation of prices to a second source for securities in most sectors and for certain derivatives.

In addition, the Company's enterprise-wide Operational Risk Management function, led by the Chief Risk Officer, is responsible for model risk management and provides an independent review of the suitability and reliability of model inputs, as well as an analysis of significant changes to current models.

Valuation Inputs

Quoted prices for identical assets in active markets are considered Level 1 and consist of on-the-run U.S.

Treasuries, money market funds, exchange-traded equity securities, open-ended mutual funds, certain short-term investments, and exchange traded futures and option contracts.

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

Valuation Inputs Used in Levels 2 and 3 Measurements for Securities and Derivatives

Level 2

Primary Observable Inputs

Fixed Maturity Investments

Structured securities (includes ABS, CLOs, CMBS and RMBS)

- Benchmark yields and spreads
- Monthly payment information
- Collateral performance, which varies by vintage year and includes delinquency rates, loss severity rates and refinancing assumptions
- Credit default swap indices

Other inputs for ABS and RMBS:

- Estimate of future principal prepayments, derived from the characteristics of the underlying structure
- Prepayment speeds previously experienced at the interest rate levels projected for the collateral

Corporates

- Benchmark yields and spreads
- Reported trades, bids, offers of the same or similar securities
- Issuer spreads and credit default swap curves

Other inputs for investment grade privately placed securities that utilize internal matrix pricing:

- Credit spreads for public securities of similar quality, maturity, and sector, adjusted for non-public nature

U.S Treasuries, Municipals, and Foreign government/government agencies

- Benchmark yields and spreads
- Issuer credit default swap curves
- Political events in emerging market economies
- Municipal Securities Rulemaking Board reported trades and material event notices
- Issuer financial statements

Equity Securities

- Quoted prices in markets that are not active

Short-term Investments

- Benchmark yields and spreads
- Reported trades, bids, offers
- Issuer spreads and credit default swap curves
- Material event notices and new issue money market rates

Derivatives

Credit derivatives

- Swap yield curve
- Credit default swap curves

Equity derivatives

- Equity index levels
- Swap yield curve

Foreign exchange derivatives

- Swap yield curve
- Currency spot and forward rates
- Cross currency basis curves

Interest rate derivatives

Level 3

Primary Unobservable Inputs

- Independent broker quotes
- Credit spreads beyond observable curve
- Interest rates beyond observable curve

Other inputs for less liquid securities or those that trade less actively, including subprime RMBS:

- Estimated cash flows
- Credit spreads, which include illiquidity premium
- Constant prepayment rates
- Constant default rates
- Loss severity

- Independent broker quotes
- Credit spreads beyond observable curve
- Interest rates beyond observable curve

Other inputs for below investment grade privately placed securities:

- Independent broker quotes
- Credit spreads for public securities of similar quality, maturity, and sector, adjusted for non-public nature

- Credit spreads beyond observable curve
- Interest rates beyond observable curve

- For privately traded equity securities, internal discounted cash flow models utilizing earnings multiples or other cash flow assumptions that are not observable

Not applicable

Not applicable

- Independent broker quotes
- Equity volatility

Not applicable

- Swap yield curve
- Independent broker quotes
- Interest rate volatility

Table of Contents**THE HARTFORD FINANCIAL SERVICES GROUP, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)****Significant Unobservable Inputs for Level 3 - Securities****Assets**

accounted for at fair value on a recurring basis	Fair Value	Predominant Valuation Technique	Significant Unobservable Input	Minimum	Maximum	Weighted Average [1]	Impact of Increase in Input on Fair Value [2]
--	------------	---------------------------------	--------------------------------	---------	---------	----------------------	---

As of March 31, 2019

CLOs [3]	\$ 93	Discounted cash flows	Spread	256 bps	256 bps	256 bps	Decrease
CMBS [3]	\$ 2	Discounted cash flows	Spread (encompasses prepayment, default risk and loss severity)	9 bps	1,040 bps	180 bps	Decrease
Corporate [4]	\$ 294	Discounted cash flows	Spread	121 bps	656 bps	213 bps	Decrease
RMBS [3]	\$ 725	Discounted cash flows	Spread [6]	21 bps	407 bps	78 bps	Decrease
			Constant prepayment rate [6]	—%	16%	6%	Decrease [5]
			Constant default rate [6]	1%	6%	3%	Decrease
			Loss severity [6]	—%	100%	62%	Decrease

As of December 31, 2018

CMBS [3]	\$ 2	Discounted cash flows	Spread (encompasses prepayment, default risk and loss severity)	9 bps	1,040 bps	182 bps	Decrease
Corporate [4]	\$ 274	Discounted cash flows	Spread	145 bps	1,175 bps	263 bps	Decrease
RMBS [3]	\$ 815	Discounted cash flows	Spread [6]	12 bps	215 bps	86 bps	Decrease
			Constant prepayment rate [6]	1%	15%	6%	Decrease [5]
			Constant default rate [6]	1%	8%	3%	Decrease
			Loss severity [6]	—%	100%	61%	Decrease

[1] The weighted average is determined based on the fair value of the securities.

[2] Conversely, the impact of a decrease in input would have the opposite impact to the fair value as that presented in the table.

[3] Excludes securities for which the Company bases fair value on broker quotations.

[4] Excludes securities for which the Company bases fair value on broker quotations; however, included are broker priced lower-rated private placement securities for which the Company receives spread and yield information to corroborate the fair value.

[5] Decrease for above market rate coupons and increase for below market rate coupons.

Generally, a change in the assumption used for the constant default rate would have been accompanied by a directionally

[6] similar change in the assumption used for the loss severity and a directionally opposite change in the assumption used for constant prepayment rate and would have resulted in wider spreads.

Significant Unobservable Inputs for Level 3 - Derivatives

	Fair Value	Predominant Valuation Technique	Significant Unobservable Input	Minimum	Maximum	Weighted Average [1]	Impact of Increase in Input on Fair Value [2]
--	------------	---------------------------------	--------------------------------	---------	---------	----------------------	---

As of March 31, 2019

Equity Options	\$ 1	Option model	Equity volatility	12 %	20 %	18 %	Increase
----------------	------	--------------	-------------------	------	------	------	----------

As of December 31, 2018

Interest rate swaptions [3]	\$ 1	Option model	Interest rate volatility	3 %	3 %	3 %	Increase
-----------------------------	------	--------------	--------------------------	-----	-----	-----	----------

Equity options	\$ 3	Option model	Equity volatility	19 %	21 %	20 %	Increase
----------------	------	--------------	-------------------	------	------	------	----------

[1] The weighted average is determined based on the fair value of the derivatives.

Conversely, the impact of a decrease in input would have the opposite impact to the fair value as that presented in the table.

[2] Changes are based on long positions, unless otherwise noted. Changes in fair value will be inversely impacted for short positions.

[3] The swaptions presented are purchased options that have the right to enter into a pay-fixed swap.

The tables above exclude ABS and certain corporate securities for which fair values are predominately based on independent broker quotes. While the Company does not have access to the significant unobservable inputs that

independent brokers may use in their pricing process, the Company believes brokers likely

use inputs similar to those used by the Company and third-party pricing services to price similar instruments. As such, in their pricing models, brokers likely use estimated loss severity rates, prepayment rates, constant default rates and credit spreads. Therefore, similar to non-broker priced securities, increases in

Table of Contents**THE HARTFORD FINANCIAL SERVICES GROUP, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)**

these inputs would generally cause fair values to decrease. As of March 31, 2019, no significant adjustments were made by the Company to broker prices received.

Contingent Consideration

The acquisition of Lattice Strategies LLC ("Lattice") on July 29, 2016 requires the Company to make payments to former owners of Lattice of up to \$60 contingent upon growth in exchange-traded products ("ETP") assets under management ("AUM") over a period of four years beginning on the date of acquisition. The contingent consideration is measured at fair value on a quarterly basis by projecting future eligible ETP AUM over the contingency period to estimate the amount of expected payout. The future expected payout is discounted back to the valuation date using a risk-adjusted discount rate of 12.7%. The risk-adjusted discount rate is an internally generated and significant unobservable input to fair value.

The contingency period for ETP AUM growth ends July 29, 2020 and management adjusts the fair value of the contingent consideration when it revises its projection of ETP AUM for the acquired business. Before discounting to fair value, the Company estimates a total contingent consideration payout of \$41, of which \$10 was paid in January 2019 and another \$10 will be paid

in May 2019 given that ETP AUM reached \$2 billion during the first quarter of 2019. Accordingly, as of March 31, 2019, the fair value of \$29 reflects remaining consideration payable of \$31, assuming ETP AUM for the acquired business grows to approximately \$4.1 billion over the contingency period.

Level 3 Assets and Liabilities Measured at Fair Value on a Recurring Basis Using Significant Unobservable Inputs

The Company uses derivative instruments to manage the risk associated with certain assets and liabilities. However, the derivative instrument may not be classified with the same fair value hierarchy level as the associated asset or liability. Therefore, the realized and unrealized gains and losses on derivatives reported in the Level 3 rollforward may be offset by realized and unrealized gains and losses of the associated assets and liabilities in other line items of the financial statements.

[2] Amounts presented are for Level 3 only and therefore may not agree to other disclosures included herein.

Changes in unrealized gain/(loss) on fixed maturities, AFS are reported in changes in net unrealized gain on securities in the [3] Condensed Consolidated Statements of Comprehensive Income. Changes in interest rate derivatives are reported in changes in net gain on cash flow hedging instruments in the Condensed Consolidated Statements of Comprehensive Income.

Fair Value Option

The Company has elected the fair value option for certain securities that contain embedded credit derivatives with underlying credit risk primarily related to residential real estate, and these securities are included within Fixed Maturities, FVO on the Condensed Consolidated Balance Sheets. The Company reports changes in the fair value of these securities in net realized capital gains and losses.

As of March 31, 2019 and December 31, 2018, the fair value of assets and liabilities using the fair value option was \$20 and \$22, respectively, within the residential real estate sector.

For the three months ended March 31, 2019 and 2018 there were no realized capital gains (losses) related to the fair value of assets using the fair value option.

5. INVESTMENTS

Net Realized Capital Gains (Losses)

(Before tax)	Three Months Ended March 31, 2019 2018	
Gross gains on sales	\$ 44	\$ 19
Gross losses on sales	(21)	(57)
Equity securities [1]	132	16
Net OTTI losses recognized in earnings	(2)	—
Transactional foreign currency revaluation	—	1
Non-qualifying foreign currency derivatives	1	(3)
Other, net [2]	9	(6)
Net realized capital gains (losses)	\$ 163	\$(30)

[1] Includes all changes in fair value and trading gains and losses for equity securities.

[2] Includes gains (losses) on non-qualifying derivatives, excluding foreign currency derivatives, of \$14 and \$(10), respectively, for the three months ended March 31, 2019 and 2018.

Net realized capital gains (losses) from investment sales are reported as a component of revenues and are determined on a specific identification basis. Before tax, net gains (losses) on sales and impairments previously reported as unrealized gains (losses) in AOCI were \$21 and \$(38) for the three months ended March 31, 2019 and 2018, respectively. Proceeds from sales of AFS securities totaled \$4.3 billion for both the three months ended March 31, 2019 and 2018.

The net unrealized gain (loss) on equity securities included in net realized capital gains (losses) related to equity securities still held as of March 31, 2019, was \$68 for the three months ended March 31, 2019. The net unrealized gain (loss) on equity securities included in net realized capital gains (losses) related to equity securities still held as of March 31, 2018, was \$(14) for the three months ended March 31, 2018.

Recognition and Presentation of Other-Than-Temporary Impairments

The Company will record an other-than-temporary impairment ("OTTI") for fixed maturities if the Company intends to sell or it is more likely than not that the Company will be required to sell the security before a recovery in value. A corresponding charge is recorded in net realized capital losses equal to the difference between the fair value and amortized cost basis of the security.

The Company will also record an OTTI for those fixed maturities for which the Company does not expect to recover the entire amortized cost basis. For these securities, the excess of the amortized cost basis over its fair value is separated into the portion representing a credit OTTI, which is recorded in net realized capital losses, and the remaining non-credit amount, which is recorded in OCI. The credit OTTI amount is the excess of its amortized cost basis over the Company's best estimate of discounted expected future cash flows. The non-credit amount is the excess of the best estimate of the discounted expected future cash flows over the fair value. The Company's best estimate of discounted expected future cash flows becomes the new cost

basis and accretes prospectively into net investment income over the estimated remaining life of the security. Developing the Company's best estimate of expected future cash flows is a quantitative and qualitative process that incorporates information received from third-party sources along with certain internal assumptions regarding the future performance. The Company's considerations include, but are not limited to, (a) changes in the financial condition of the issuer and the underlying collateral, (b) whether the issuer is current on contractually obligated interest and principal payments, (c) credit ratings, (d) payment structure of the security and (e) the extent to which the fair value has been less than the amortized cost of the security.

For non-structured securities, assumptions include, but are not limited to, economic and industry-specific trends and fundamentals, security-specific developments, industry earnings multiples and the issuer's ability to restructure and execute asset sales.

For structured securities, assumptions include, but are not limited to, various performance indicators such as historical and projected default and recovery rates, credit ratings, current and projected delinquency rates, loan-to-value ("LTV") ratios, average cumulative collateral loss rates that vary by vintage year, prepayment speeds, and property value declines. These assumptions require the use of significant management judgment and include the probability of issuer default and estimates regarding timing and amount of expected recoveries which may include estimating the underlying collateral value.

[1] Represents the amount of cumulative non-credit OTTI losses recognized in OCI on securities that also had credit impairments. These losses are included in gross unrealized losses as of March 31, 2019 and December 31, 2018.

Fixed maturities, AFS, by Contractual Maturity Year

	March 31, 2019		December 31, 2018	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
One year or less	\$ 964	\$ 969	\$ 999	\$ 1,002
Over one year through five years	5,785	5,871	5,786	5,791
Over five years through ten years	7,259	7,391	6,611	6,495
Over ten years	12,444	13,066	12,629	12,820
Subtotal	26,452	27,297	26,025	26,108
Mortgage-backed and asset-backed securities	9,442	9,522	9,578	9,544
Total fixed maturities, AFS	\$ 35,894	\$ 36,819	\$ 35,603	\$ 35,652

Estimated maturities may differ from contractual maturities due to security call or prepayment provisions. Due to the potential for variability in payment speeds (i.e. prepayments or extensions), mortgage-backed and asset-backed securities are not categorized by contractual maturity.

Concentration of Credit Risk

The Company aims to maintain a diversified investment portfolio including issuer, sector and geographic stratification, where

applicable, and has established certain exposure limits, diversification standards and review procedures to mitigate credit risk. The Company had no investment exposure to any credit concentration risk of a single issuer greater than 10% of the Company's stockholders' equity as of _____ or December 31, 2018 other than U.S. government securities and certain U.S. government agencies.

in an unrealized loss position **\$ 13,885** **\$ 13,514** **\$ (371)** **\$ 5,272** **\$ 4,989** **\$ (283)** **\$ 19,157** **\$ 18,503** **\$ (654)**

As of March 31, 2019, AFS securities in an unrealized loss position consisted of 1,682 securities, primarily in the corporate and commercial real estate sectors, which were depressed primarily due to an increase in interest rates and/or widening of credit spreads since the securities were purchased. As of March 31, 2019, 98% of these securities were depressed less than 20% of cost or amortized cost. The decrease in unrealized losses during the three months ended March 31, 2019 was primarily attributable to tighter credit spreads and lower interest rates. Most of the securities depressed for twelve months or more relate to corporate securities and structured securities with exposure to commercial real estate. Corporate securities and commercial real estate securities were primarily depressed because current market spreads are wider and interest rates are higher than at the securities' respective purchase dates. The Company neither has an intention to sell nor does it expect to be required to sell the securities outlined in the preceding discussion.

Mortgage Loans**Mortgage Loan Valuation Allowances**

Mortgage loans are considered to be impaired when management estimates that, based upon current information and events, it is probable that the Company will be unable to collect amounts due according to the contractual terms of the loan agreement. The Company reviews mortgage loans on a quarterly basis to identify potential credit losses. Among other factors, management reviews current and projected macroeconomic trends, such as unemployment rates and property-specific factors such as rental rates, occupancy levels, LTV ratios and debt service coverage ratios ("DSCR"). In addition, the Company considers historical, current and projected delinquency rates and property values. Estimates of collectibility require the use of significant management judgment and include the probability and timing of borrower default and loss severity estimates. In addition, cash flow projections may change based upon new information about the borrower's ability to pay and/or the value of underlying collateral such as changes in projected property value estimates.

Table of Contents**THE HARTFORD FINANCIAL SERVICES GROUP, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)**

For mortgage loans that are deemed impaired, a valuation allowance is established for the difference between the carrying amount and estimated fair value. The mortgage loan's estimated fair value is most frequently the Company's share of the fair value of the collateral but may also be the Company's share of either (a) the present value of the expected future cash flows discounted at the loan's effective interest rate or (b) the loan's observable market price. A valuation allowance may be recorded for an individual loan or for a group of loans that have an LTV ratio of 90% or greater, a low DSCR or have other lower credit quality characteristics. Changes in valuation allowances are recorded in net realized capital gains and losses. Interest income on impaired loans is accrued to the extent it is deemed collectible and the borrowers continue to make payments under the original or restructured loan terms. The Company stops accruing interest income on loans when it is probable that the Company will not receive interest and principal payments according to the contractual terms of the loan agreement. The Company resumes accruing interest income when it determines that sufficient collateral exists to satisfy the full amount of the loan principal and interest payments and when it is probable cash will be received in the foreseeable future. Interest income on defaulted loans is recognized when received.

As of March 31, 2019, mortgage loans had an amortized cost of \$3.6 billion and carrying value of \$3.6 billion, with a valuation allowance of \$1. As of December 31, 2018, mortgage loans had an amortized cost of \$3.7 billion and carrying value of \$3.7 billion, with a valuation allowance of \$1.

As of March 31, 2019 and December 31, 2018, the carrying value of mortgage loans that had a valuation allowance was \$23. There were no mortgage loans held-for-sale as of March 31, 2019 or December 31, 2018. As of March 31, 2019, the Company had no mortgage loans that have had extensions or restructurings other than what is allowable under the original terms of the contract.

The following table presents the activity within the Company's valuation allowance for mortgage loans. These loans have been evaluated both individually and collectively for impairment. Loans evaluated collectively for impairment are immaterial.

Valuation Allowance Activity

	2019	2018
Balance, as of January 1	\$ (1)	\$ (1)
Reversals	—	—
Deductions	—	—
Balance, as of March 31	\$ (1)	\$ (1)

The weighted-average LTV ratio of the Company's mortgage loan portfolio was 52% as of March 31, 2019, while the weighted-average LTV ratio at origination of these loans was 61%. LTV ratios compare the loan amount to the value of the underlying property collateralizing the loan. The loan collateral values are updated no less than annually through reviews of the underlying properties. Factors considered in estimating property values include, among other things, actual and expected property cash flows, geographic market data and the ratio of the property's net operating income to its value. DSCR compares a property's net operating income to the borrower's principal and interest payments. As of March 31, 2019 and December 31, 2018, the Company held no delinquent commercial mortgage loans past due by 90 days or more.

Mortgage Servicing

The Company originates, sells and services commercial mortgage loans on behalf of third parties and recognizes servicing fees income over the period that services are performed. As of March 31, 2019, under this program, the Company serviced mortgage loans with a total outstanding principal of \$5.9 billion, of which \$3.5 billion was serviced on behalf of third parties and \$2.4 billion was retained and reported in total investments on the Company's Condensed Consolidated Balance Sheets. As of

Table of Contents**THE HARTFORD FINANCIAL SERVICES GROUP, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)**

December 31, 2018, the Company serviced mortgage loans with a total outstanding principal balance of \$6.0 billion, of which \$3.6 billion was serviced on behalf of third parties and \$2.4 billion was retained and reported in total investments on the Company's Condensed Consolidated Balance Sheets. Servicing rights are carried at the lower of cost or fair value and were zero as of March 31, 2019 and December 31, 2018, because servicing fees were market-level fees at origination and remain adequate to compensate the Company for servicing the loans.

Variable Interest Entities

The Company is engaged with various special purpose entities and other entities that are deemed to be VIEs primarily as an investor through normal investment activities but also as an investment manager.

A VIE is an entity that either has investors that lack certain essential characteristics of a controlling financial interest, such as simple majority kick-out rights, or lacks sufficient funds to finance its own activities without financial support provided by other entities. The Company performs ongoing qualitative assessments of its VIEs to determine whether the Company has a controlling financial interest in the VIE and therefore is the primary beneficiary. The Company is deemed to have a controlling financial interest when it has both the ability to direct the activities that most significantly impact the economic performance of the VIE and the obligation to absorb losses or right to receive benefits from the VIE that could potentially be significant to the VIE. Based on the Company's assessment, if it determines it is the primary beneficiary, the Company consolidates the VIE in the Company's Condensed Consolidated Financial Statements.

Consolidated VIEs

As of March 31, 2019 and December 31, 2018, the Company did not hold any securities for which it is the primary beneficiary.

Non-consolidated VIEs

The Company, through normal investment activities, makes passive investments in limited partnerships and other alternative investments. For these non-consolidated VIEs, the Company has determined it is not the primary beneficiary as it has no ability to direct activities that could significantly affect the economic performance of the investments. The Company's maximum exposure to loss as of March 31, 2019 and December 31, 2018 was limited to the total carrying value of \$1 billion, at each date, which are included in limited partnerships and other alternative investments in the Company's Condensed Consolidated Balance Sheets. As of March 31, 2019 and December 31, 2018, the Company has outstanding commitments totaling \$767 and \$718, respectively, whereby the Company is committed to fund these investments and may be called by the partnership during the commitment period to fund the purchase of new investments and partnership expenses. These investments are generally of a passive nature in that the Company does not take an active role in management. For further discussion of these investments, see Equity Method Investments within Note 6 - Investments of Notes to Consolidated Financial Statements included in the Company's 2018 Form 10-K Annual Report.

In addition, the Company also makes passive investments in structured securities issued by VIEs for which the Company is not the manager. These investments are included in ABS, CLOs,

CMBS and RMBS in the Available-for-Sale Securities table and fixed maturities, FVO, in the Company's Condensed Consolidated Balance Sheets. The Company has not provided financial or other support with respect to these investments other than its original investment. For these investments, the Company determined it is not the primary beneficiary due to the relative size of the Company's investment in comparison to the principal amount of the structured securities issued by the VIEs, the level of credit subordination which reduces the Company's obligation to absorb losses or right to receive benefits and the Company's inability to direct the activities that most significantly impact the economic performance of the VIEs. The Company's maximum exposure to loss on these investments is limited to the amount of the Company's investment.

Securities Lending, Repurchase Agreements and Other Collateral Transactions

The Company enters into securities financing transactions as a way to earn additional income or manage liquidity, primarily through securities lending and repurchase agreements.

Payables for Collateral on Investments

March 31, 2019	December 31, 2018
-------------------------------	------------------------------

	Fair Value	Fair Value
Securities Lending Transactions:		
Gross amount of securities on loan	\$ 675	\$ 820
Gross amount of associated liability for collateral received [1]	\$ 691	\$ 840

Repurchase agreements:

Gross amount of recognized liabilities for repurchase agreements	\$ 300	\$ 72
Gross amount of collateral pledged related to repurchase agreements [2]	\$ 303	\$ 73
Gross amount of recognized receivables for reverse repurchase agreements	\$ 83	\$ 64

Federal Home Loan Bank of Boston ("FHLBB") advance agreements:

Gross amount of recognized liabilities for FHLBB agreements	\$ 50	\$ —
Gross amount of collateral pledged related to FHLBB agreements [2]	\$ 60	\$ —

Cash collateral received is reinvested in fixed maturities, AFS and short-term investments which are included in the

[1] Condensed Consolidated Balance Sheets. Amount includes additional securities collateral received of \$1 and \$3 which are excluded from the Company's Condensed Consolidated Balance Sheets as of March 31, 2019 and December 31, 2018, respectively.

[2] Collateral pledged is included within fixed maturities, AFS and short-term investments in the Company's Condensed Consolidated Balance Sheets.

Securities Lending

Under a securities lending program, the Company lends certain fixed maturities within the corporate, foreign government/government agencies, and municipal sectors as well as equity securities to qualifying third-party borrowers in return for

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

collateral in the form of cash or securities. For domestic and non-domestic loaned securities, respectively, borrowers provide collateral of 102% and 105% of the fair value of the securities lent at the time of the loan. Borrowers will return the securities to the Company for cash or securities collateral at maturity dates generally of 90 days or less. Security collateral on deposit from counterparties in connection with securities lending transactions may not be sold or re-pledged, except in the event of default by the counterparty, and is not reflected on the Company's Condensed Consolidated Balance Sheets. Additional collateral is obtained if the fair value of the collateral falls below 100% of the fair value of the loaned securities. The agreements are continuous and do not have stated maturity dates and provide the counterparty the right to sell or re-pledge the securities loaned. If cash, rather than securities, is received as collateral, the cash is typically invested in short-term investments or fixed maturities and is reported as an asset on the Company's Condensed Consolidated Balance Sheets. Income associated with securities lending transactions is reported as a component of net investment income in the Company's Condensed Consolidated Statements of Operations.

Repurchase Agreements

From time to time, the Company enters into repurchase agreements to manage liquidity or to earn incremental income. A repurchase agreement is a transaction in which one party (transferor) agrees to sell securities to another party (transferee) in return for cash (or securities), with a simultaneous agreement to repurchase the same securities at a specified price at a later date. The maturity of these transactions is generally ninety days or less. Repurchase agreements include master netting provisions that provide both counterparties the right to offset claims and apply securities held by them with respect to their obligations in the event of a default. Although the Company has the contractual right to offset claims, the Company's current positions do not meet the specific conditions for net presentation.

Under repurchase agreements, the Company transfers collateral of U.S. government and government agency securities and receives cash. For repurchase agreements, the Company obtains cash in an amount equal to at least 95% of the fair value of the securities transferred. The agreements require additional collateral to be transferred when necessary and provide the counterparty the right to sell or re-pledge the securities transferred. The cash received from the repurchase program is typically invested in short-term investments or fixed maturities and is reported as an asset on the Company's Condensed Consolidated Balance Sheets. The Company accounts for the repurchase agreements as collateralized borrowings. The securities transferred under repurchase agreements are included in fixed maturities, AFS with the obligation to repurchase those securities recorded in other liabilities on the Company's Condensed Consolidated Balance Sheets.

From time to time, the Company enters into reverse repurchase agreements where the Company purchases securities and simultaneously agrees to resell the same or substantially the same securities. The maturity of these transactions is generally within one year. The agreements require additional collateral to be transferred to the Company when necessary and the Company has the right to sell or re-pledge the securities received. The Company accounts for reverse repurchase agreements as collateralized financing. The receivable for reverse repurchase agreements is included within short-term investments in the Company's Condensed Consolidated Balance Sheets.

Federal Home Loan Bank Advance Agreements

The Company's subsidiaries are members of the FHLBB which provides access to collateralized advance agreements. These agreements may be short or long-term with fixed or variable rates and can be used to earn incremental investment income. Contractual maturities of the FHLBB agreements are generally of 90 days or less. The amount of advances that can be taken is limited to a percentage of the fair value of the assets pledged as collateral which ranges from a high of 97% for U.S. government-backed fixed maturities maturing within 3 years to a low of 40% for A-rated commercial mortgage-backed fixed maturities maturing in 5 years or more. Membership to the FHLBB requires a minimum purchase of FHLBB common stock and is included within equity securities, at fair value in the Company's Condensed Consolidated Balance Sheets. As of March 31, 2019 and December 31, 2018, the Company held \$9 and \$10, respectively, of required investment in FHLBB common stock.

Other Collateral Transactions

The Company is required by law to deposit securities with government agencies in certain states in which it conducts business. As of March 31, 2019 and December 31, 2018, the fair value of securities on deposit was \$2.3 billion and \$2.2 billion, respectively.

As of March 31, 2019 and December 31, 2018, the Company pledged collateral of \$35 and \$47, respectively, of U.S. government securities and municipal securities or cash primarily related to certain bank loan participations

committed to through a limited partnership agreement. These amounts also include collateral related to letters of credit.

For disclosure of collateral in support of derivative transactions, refer to the Derivative Collateral Arrangements section in Note 6 - Derivatives of Notes to Condensed Consolidated Financial Statements.

6. DERIVATIVES

The Company utilizes a variety of OTC, OTC-cleared and exchange traded derivative instruments as a part of its overall risk management strategy as well as to enter into replication transactions. Derivative instruments are used to manage risk associated with interest rate, equity market, credit spread, issuer default, price, and currency exchange rate risk or volatility.

Replication transactions are used as an economical means to synthetically replicate the characteristics and performance of assets that are permissible investments under the Company's investment policies.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

Strategies that Qualify for Hedge Accounting

Some of the Company's derivatives satisfy hedge accounting requirements as outlined in Note 1 - Basis of Presentation and Significant Accounting Policies of Notes to Consolidated Financial Statements, included in The Hartford's 2018 Form 10-K Annual Report. Typically, these hedging instruments include interest rate swaps and, to a lesser extent, foreign currency swaps where the terms or expected cash flows of the hedged item closely match the terms of the swap. The interest rate swaps are typically used to manage interest rate duration of certain fixed maturity securities. The hedge strategies by hedge accounting designation include:

Cash Flow Hedges

Interest rate swaps are predominantly used to manage portfolio duration and better match cash receipts from assets with cash disbursements required to fund liabilities. These derivatives primarily convert interest receipts on floating-rate fixed maturity securities to fixed rates. The Company has also entered into interest rate swaps to convert the variable interest payments on the 3 month Libor + 2.125% junior subordinated debt to fixed interest payments. For further information, see the Junior Subordinated Debentures section within Note 13 - Debt of Notes to the Consolidated Financial Statements, included in The Hartford's 2018 Form 10-K Annual Report.

Foreign currency swaps are used to convert foreign currency-denominated cash flows related to certain investment receipts to U.S. dollars in order to reduce cash flow fluctuations due to changes in currency rates.

The Company also previously entered into forward starting swap agreements to hedge the interest rate exposure related to the future purchase of fixed-rate securities, primarily to hedge interest rate risk inherent in the assumptions used to price certain group benefits liabilities.

Non-qualifying Strategies

Derivative relationships that do not qualify for hedge accounting ("non-qualifying strategies") primarily include hedging and replication strategies that utilize credit default swaps. In addition, hedges of interest rate, foreign currency and equity risk of certain fixed maturities and equities do not qualify for hedge accounting. The non-qualifying strategies include:

Credit Contracts

Credit default swaps are used to purchase credit protection on an individual entity or referenced index to economically hedge against default risk and credit-related changes in the value of fixed maturity securities. Credit default swaps are also used to assume credit risk related to an individual entity or referenced index as a part of replication transactions. These contracts

require the Company to pay or receive a periodic fee in exchange for compensation from the counterparty should the referenced security issuers experience a credit event, as defined in the contract. The Company also enters into credit default swaps to terminate existing credit default swaps, thereby offsetting the changes in value of the original swap going forward.

Interest Rate Swaps, Swaptions and Futures

The Company uses interest rate swaps, swaptions and futures to manage interest rate duration between assets and liabilities in certain investment portfolios. In addition, the Company enters into interest rate swaps to terminate existing swaps, thereby offsetting the changes in value of the original swap going forward. As of March 31, 2019 and December 31, 2018, the notional amount of interest rate swaps in offsetting relationships was \$7.6 billion and \$7.1 billion, respectively.

Foreign Currency Swaps and Forwards

The Company enters into foreign currency swaps to convert the foreign currency exposures of certain foreign currency-denominated fixed maturity investments to U.S. dollars. The Company may at times enter into foreign currency forwards to hedge non-U.S. dollar denominated cash and, previously, equity securities.

Equity Index Options

The Company enters into equity index options to hedge the impact of a decline in the equity markets on the investment portfolio. The Company also enters into call options on equity securities to generate additional return.

Derivative Balance Sheet Classification

For reporting purposes, the Company has elected to offset within assets or liabilities based upon the net of the fair value amounts, income accruals, and related cash collateral receivables and payables of OTC derivative instruments executed in a legal entity and with the same counterparty under a master netting agreement, which

provides the Company with the legal right of offset. The following fair value amounts do not include income accruals or related cash collateral receivables and payables, which are netted with derivative fair value amounts to determine balance sheet presentation. The Company's derivative instruments are held for risk management purposes, unless otherwise noted in the following table. The notional amount of derivative contracts represents the basis upon which pay or receive amounts are calculated and is presented in the table to quantify the volume of the Company's derivative activity. Notional amounts are not necessarily reflective of credit risk.

Offsetting of Derivative Assets/Liabilities

The following tables present the gross fair value amounts, the amounts offset, and net position of derivative instruments eligible for offset in the Company's Condensed Consolidated Balance Sheets. Amounts offset include fair value amounts, income

accruals and related cash collateral receivables and payables associated with derivative instruments that are traded under a common master netting agreement, as described in the preceding discussion. Also included in the tables are financial collateral receivables and payables, which are contractually permitted to be offset upon an event of default, although are disallowed for offsetting under U.S. GAAP.

Cash Flow Hedges

For derivative instruments that are designated and qualify as cash flow hedges, the gain or loss on the derivative is reported as a component of OCI and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. All components of each derivative's gain or loss were included in the assessment of hedge effectiveness.

Derivatives in Cash Flow Hedging Relationships

As of March 31, 2019, the before tax deferred net gains on derivative instruments recorded in AOCI that are expected to be

31

Table of Contents**THE HARTFORD FINANCIAL SERVICES GROUP, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)**

reclassified to earnings during the next twelve months are \$7. This expectation is based on the anticipated interest payments on hedged investments in fixed maturity securities that will occur over the next twelve months, at which time the Company will recognize the deferred net gains (losses) as an adjustment to net investment income over the term of the investment cash flows.

During the three months ended March 31, 2019 and 2018, the Company had no net reclassifications from AOCI to earnings resulting from the discontinuance of cash-flow hedges due to forecasted transactions that were no longer probable of occurring.

Non-qualifying Strategies

For non-qualifying strategies, including embedded derivatives that are required to be bifurcated from their host contracts and accounted for as derivatives, the gain or loss on the derivative is recognized currently in earnings within net realized capital gains (losses).

Non-qualifying Strategies Recognized within Net Realized Capital Gains (Losses)

Credit Risk Assumed through Credit Derivatives

The Company enters into credit default swaps that assume credit risk of a single entity or referenced index in order to synthetically replicate investment transactions that are permissible under the Company's investment policies. The Company will receive periodic payments based on an agreed upon rate and notional amount and will only make a payment if there is a credit event. A credit event payment will typically be equal to the notional value of the swap contract less the value of the referenced security

issuer's debt obligation after the occurrence of the credit event. A credit event is generally defined as a default on contractually obligated interest or principal payments or bankruptcy of the referenced entity. The credit default swaps in which the Company assumes credit risk primarily reference investment grade single corporate issuers and baskets, which include standard diversified portfolios of corporate and CMBS issuers. The diversified portfolios of corporate issuers are established within sector concentration limits and may be divided into tranches that possess different credit ratings.

Table of Contents**THE HARTFORD FINANCIAL SERVICES GROUP, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)****Credit Risk Assumed Derivatives by Type**

[1] The average credit ratings are based on availability and are generally the midpoint of the available ratings among Moody's, S&P and Fitch. If no rating is available from a rating agency, then an internally developed rating is used.

[2] Notional amount is equal to the maximum potential future loss amount. These derivatives are governed by agreements and applicable law, which include collateral posting requirements. There is no additional specific collateral related to these contracts or recourse provisions included in the contracts to offset losses.

[3] The Company has entered into offsetting credit default swaps to terminate certain existing credit default swaps, thereby offsetting the future changes in value of, or losses paid related to, the original swap.

[4] Comprised of swaps of standard market indices of diversified portfolios of corporate and CMBS issuers referenced through credit default swaps. These swaps are subsequently valued based upon the observable standard market index.

[5] Excludes investments that contain an embedded credit derivative for which the Company has elected the fair value option. For further discussion, see the Fair Value Option section in Note 4 - Fair Value Measurements of Notes to Condensed Consolidated Financial Statements.

Derivative Collateral Arrangements

The Company enters into various collateral arrangements in connection with its derivative instruments, which require both the pledging and accepting of collateral. As of March 31, 2019 and December 31, 2018, the Company pledged cash collateral with a fair value of less than \$1 and \$4, respectively, associated with derivative instruments. The collateral receivable has been recorded in other assets or other liabilities on the Company's Condensed Consolidated Balance Sheets as determined by the Company's election to offset on the balance sheet. As of March 31, 2019 and December 31, 2018, the Company also pledged securities collateral associated with derivative instruments with a fair value of \$63 and \$67, respectively, which have been included in fixed maturities on the Condensed Consolidated Balance Sheets. The counterparties generally have the right to sell or re-pledge these securities.

In addition, as of March 31, 2019 and December 31, 2018, the Company has pledged initial margin of securities related to OTC-cleared and exchange traded derivatives with a fair value of \$85 and \$89, respectively, which are included within fixed maturities on the Company's Condensed Consolidated Balance Sheets.

As of March 31, 2019 and December 31, 2018, the Company accepted cash collateral associated with derivative instruments of \$18 and \$9, respectively, which was invested and recorded in the Company's Condensed Consolidated Balance Sheets in fixed maturities and short-term investments with corresponding amounts recorded in other investments or other liabilities as determined by the Company's election to offset on the balance sheet.

The Company also accepted securities collateral as of March 31, 2019 and December 31, 2018, with a fair value of \$3 and \$5, respectively, which the Company has the right to sell or repledge. As of March 31, 2019 and December 31, 2018, the Company had no repledged securities. During the same periods, the Company did not sell any securities held as collateral. In

Table of Contents**THE HARTFORD FINANCIAL SERVICES GROUP, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)**

addition, as of March 31, 2019 and December 31, 2018, non-cash collateral accepted was held in separate custodial accounts and was not included in the Company's Consolidated Balance Sheets.

Other reserve re-estimates, net	4	(2)

Total prior accident year development \$(11)\$(32)

Re-estimates of prior accident year reserves for the three months ended March 31, 2019

Workers' compensation reserves were reduced, principally in small commercial driven by lower than previously estimated claim severity for the 2014 and 2015 accident years.

General liability reserves were increased, primarily due to reserve increases in small commercial for accident years 2017 and 2018 due to higher frequency of high-severity bodily injury claims.

Package business reserves were increased, primarily due to increased severity on 2018 accident year property claims.

Automobile liability reserves were reduced, primarily driven by the emergence of lower estimated severity in personal automobile liability for accident year 2017.

Catastrophes reserves were reduced, primarily as a result of lower estimated net losses from 2017 hurricanes Harvey and Irma.

Table of Contents**THE HARTFORD FINANCIAL SERVICES GROUP, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)****Re-estimates of prior accident year reserves for the three months ended March 31, 2018**

Workers' compensation reserves were reduced in small commercial, primarily for accident years 2011 to 2015, as both claim frequency and medical claim severity have emerged favorably compared to previous reserve estimates.

General liability reserves were increased modestly, primarily due to an increase in reserves for specialty business within middle market for accident years 2009 to 2017, largely offset by a decrease in reserves for other lines within middle market, including premises and operations and products liability, principally for accident years 2015 and prior. Contributing to the

increase in reserves for specialty general liability reserves was an increase in large losses. Contributing to the reduction in reserves for other middle market lines was more favorable outcomes on litigated claims.

Package business reserves were increased primarily due to increased severity of 2017 accident year property claims.

Commercial property reserves were reduced, driven by an increase in estimated reinsurance recoverable on marine losses from the 2017 accident year.

Homeowners reserves were reduced, primarily in accident years 2013 to 2017, driven by lower than expected severity across multiple perils.

Group Life, Disability and Accident Products**Rollforward of Liabilities for Unpaid Losses and Loss Adjustment Expenses**

	For the three months ended March 31,	
	2019	2018
Beginning liabilities for unpaid losses and loss adjustment expenses, gross	\$8,445	\$8,512

Reinsurance recoverables	237	233
Ending liabilities for unpaid losses and loss adjustment expenses, gross	\$8,362	\$8,498

[1] Prior incurral year development represents the change in estimated ultimate incurred losses and loss adjustment expenses for prior incurral years on a discounted basis.

[2] Includes unallocated loss adjustment expenses of \$46, and \$41 for the three months ended March 31, 2019 and 2018, respectively, that are recorded in insurance operating costs and other expenses in the Condensed Consolidated Statements of Operations.

Re-estimates of prior incurral years reserves for the three months ended March 31, 2019

Group disability- Prior period reserve estimates decreased by approximately \$105 largely driven by group long-term disability claim recoveries higher than prior reserve assumptions and claim incidence lower than prior assumptions. New York Paid Family Leave also experienced favorable claim emergence compared to prior estimates

Group life and accident (including group life premium waiver)- Prior period reserve estimates decreased by approximately \$10 largely driven by lower than previously expected claim incidence in group life premium waiver.

Re-estimates of prior incurral years reserves for the three months ended March 31, 2018

Group disability- Prior period reserve estimates decreased by approximately \$85 largely driven by group long-term disability claim terminations (recoveries and claimant deaths) higher than prior reserve assumptions and claim incidence lower than prior assumptions.

Group life and accident (including group life premium waiver)- Prior period reserve estimates decreased by approximately \$40 largely driven by lower-than- previously expected claim incidence on group life, group life premium waiver, and group accidental death & dismemberment claims.

Gross decreases - tax positions in prior period	—	—
Balance, end of period	\$ 14	\$ 9

The entire amount of unrecognized tax benefits, if recognized, would affect the effective tax rate in the period of the release.

Other Tax Matters

As of March 31, 2019 the Company had alternative minimum tax (AMT) credit carryovers of \$839 which are reflected as a current income tax receivable within other assets in the accompanying Condensed Consolidated Balance Sheets. AMT credits may be used to offset a regular tax liability for any taxable year beginning after December 31, 2017, and are refundable at an amount equal to 50 percent of the excess of the minimum tax credit for the taxable year over the amount of credit allowable for the year against regular tax liability. Any remaining credits not used against regular tax liability are refundable in the 2021 tax year to be realized in 2022. For the three months ended March 31, 2019, the Company offset \$2 regular tax liability with AMT credits. Included within net deferred income taxes in the accompanying Condensed Consolidated Balance Sheet are \$459 of future tax benefits associated with the Company's U.S. net operating loss ("NOL") carryovers. Although the Company projects there will be sufficient future taxable income to fully recover the remainder of the NOL carryover, the Company's estimate of the likely realization may change over time. NOL carryovers, if unused, would expire between 2026 and 2036.

The federal audits have been completed through 2013, and the Company is not currently under examination for any open years. Management believes that adequate provision has been made in the condensed consolidated

financial statements for any potential adjustments that may result from tax examinations and other tax-related matters for all open tax years.

The Company classifies interest and penalties (if applicable) as income tax expense in the condensed consolidated financial statements. The Company recognized no interest expense for the three months ended March 31, 2019 and 2018. The Company had no interest payable as of March 31, 2019 and 2018. The Company does not believe it would be subject to any penalties in any open tax years and, therefore, has not recorded any accrual for penalties.

11. COMMITMENTS AND CONTINGENCIES

Management evaluates each contingent matter separately. A loss is recorded if probable and reasonably estimable. Management establishes liabilities for these contingencies at its "best estimate," or, if no one number within the range of possible losses is more probable than any other, the Company records an estimated liability at the low end of the range of losses.

Litigation

The Hartford is involved in claims litigation arising in the ordinary course of business, both as a liability insurer defending or providing indemnity for third-party claims brought against insureds and as an insurer defending coverage claims brought against it. The Hartford accounts for such activity through the establishment of unpaid loss and loss adjustment expense reserves. Subject to the uncertainties in the following discussion

under the caption "Asbestos and Environmental Claims," management expects that the ultimate liability, if any, with respect to such ordinary-course claims litigation, after consideration of provisions made for potential losses and costs of defense, will not be material to the consolidated financial condition, results of operations or cash flows of The Hartford.

The Hartford is also involved in other kinds of legal actions, some of which assert claims for substantial amounts. These actions include, among others, and in addition to the matters in the following discussion, putative state and federal class actions seeking certification of a state or national class. Such putative class actions have alleged, for example, underpayment of claims or improper underwriting practices in connection with various kinds of insurance policies, such as personal and commercial automobile, property, disability, life and inland marine. The

Table of Contents

THE HARTFORD FINANCIAL SERVICES GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

Hartford also is involved in individual actions in which punitive damages are sought, such as claims alleging bad faith in the handling of insurance claims or other allegedly unfair or improper business practices. Like many other insurers, The Hartford also has been joined in actions by asbestos plaintiffs asserting, among other things, that insurers had a duty to protect the public from the dangers of asbestos and that insurers committed unfair trade practices by asserting defenses on behalf of their policyholders in the underlying asbestos cases. Management expects that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses, will not be material to the consolidated financial condition of The Hartford. Nonetheless, given the large or indeterminate amounts sought in certain of these actions, and the inherent unpredictability of litigation, the outcome in certain matters could, from time to time, have a material adverse effect on the Company's results of operations or cash flows in particular quarterly or annual periods.

Asbestos and Environmental Claims –The Company continues to receive asbestos and environmental ("A&E") claims. Asbestos claims relate primarily to bodily injuries asserted by people who came in contact with asbestos or products containing asbestos. Environmental claims relate primarily to pollution and related clean-up costs.

The Company wrote several different categories of insurance contracts that may cover A&E claims. First, the Company wrote primary policies providing the first layer of coverage in an insured's liability program. Second, the Company wrote excess and umbrella policies providing higher layers of coverage for losses that exhaust the limits of underlying coverage. Third, the Company acted as a reinsurer assuming a portion of those risks assumed by other insurers writing primary, excess, umbrella and reinsurance coverages. Fourth, subsidiaries of the Company participated in the London Market, writing both direct insurance and assumed reinsurance business.

Significant uncertainty limits the ability of insurers and reinsurers to estimate the ultimate reserves necessary for unpaid gross losses and expenses related to environmental and particularly asbestos claims. The degree of variability of gross reserve estimates for these exposures is significantly greater than for other more traditional exposures.

In the case of the reserves for asbestos exposures, factors contributing to the high degree of uncertainty include inadequate loss development patterns, plaintiffs' expanding theories of liability, the risks inherent in major litigation, and inconsistent emerging legal doctrines. Furthermore, over time, insurers, including the Company, have experienced significant changes in the rate at which asbestos claims are brought, the claims experience of particular insureds, and the value of claims, making predictions of future exposure from past experience uncertain. Plaintiffs and insureds also have sought to use bankruptcy proceedings, including "pre-packaged" bankruptcies, to accelerate and increase loss payments by insurers. In addition, some policyholders have asserted new classes of claims for coverages to which an aggregate limit of liability may not apply. Further uncertainties include insolvencies of other carriers and unanticipated developments pertaining to the Company's ability to recover reinsurance for A&E claims. Management believes these issues are not likely to be resolved in the near future. In the case of the reserves for environmental exposures, factors contributing to the high degree of uncertainty include expanding

theories of liability and damages, the risks inherent in major litigation, inconsistent decisions concerning the existence and scope of coverage for environmental claims, and uncertainty as to the monetary amount being sought by the claimant from the insured.

The reporting pattern for assumed reinsurance claims, including those related to A&E claims, is much longer than for direct claims. In many instances, it takes months or years to determine that the policyholder's own obligations have been met and how the reinsurance in question may apply to such claims. The delay in reporting reinsurance claims and exposures adds to the uncertainty of estimating the related reserves.

It is also not possible to predict changes in the legal and legislative environment and their effect on the future development of A&E claims.

Given the factors described above, the Company believes the actuarial tools and other techniques it employs to estimate the ultimate cost of claims for more traditional kinds of insurance exposure are less precise in estimating reserves for A&E exposures. For this reason, the Company principally relies on exposure-based analysis to estimate the ultimate costs of these claims, both gross and net of reinsurance, and regularly evaluates new account information in assessing its potential A&E exposures. The Company supplements this exposure-based analysis with evaluations of the Company's historical direct net loss and expense paid and reported experience, and net loss and expense paid and reported experience by calendar and/or report year, to assess any emerging trends, fluctuations or characteristics suggested by the aggregate paid and reported activity.

While the Company believes that its current A&E reserves are appropriate, significant uncertainties limit the ability of insurers and reinsurers to estimate the ultimate reserves necessary for unpaid losses and related expenses. The ultimate liabilities, thus, could exceed the currently recorded reserves, and any such additional liability, while not

estimable now, could be material to The Hartford's consolidated operating results and liquidity.

As of March 31, 2019, the Company reported \$1.0 billion of net asbestos reserves and \$196 of net environmental reserves. While the Company believes that its current A&E reserves are appropriate, significant uncertainties limit our ability to estimate the ultimate reserves necessary for unpaid losses and related expenses. The ultimate liabilities, thus, could exceed the currently recorded reserves, and any such additional liability, while not reasonably estimable now, could be material to The Hartford's consolidated operating results and liquidity. Effective December 31, 2016, the Company entered into an A&E adverse development cover ("ADC") reinsurance agreement with NICO to reduce uncertainty about potential adverse development of A&E reserves. Under the ADC, the Company paid a reinsurance premium of \$650 for NICO to assume adverse net loss and allocated loss adjustment expense reserve development up to \$1.5 billion above the Company's existing net A&E reserves as of December 31, 2016 of approximately \$1.7 billion. The \$650 reinsurance premium was placed in a collateral trust account as security for NICO's claim payment obligations to the Company. Under retroactive reinsurance accounting, net adverse A&E reserve development after December 31, 2016 will result in an offsetting reinsurance recoverable up to the \$1.5 billion limit. Cumulative ceded losses up to the \$650 reinsurance premium

Table of Contents**THE HARTFORD FINANCIAL SERVICES GROUP, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)**

paid are recognized as a dollar-for-dollar offset to direct losses incurred. Cumulative ceded losses exceeding the \$650 reinsurance premium paid would result in a deferred gain. The deferred gain would be recognized over the claim settlement period in the proportion of the amount of cumulative ceded losses collected from the reinsurer to the estimated ultimate reinsurance recoveries. Consequently, until periods when the deferred gain is recognized as a benefit to earnings, cumulative adverse development of A&E claims after December 31, 2016 in excess of \$650 may result in significant charges against earnings. Furthermore, cumulative adverse development of A&E claims could ultimately exceed the \$1.5 billion treaty limit in which case any adverse development in excess of the treaty limit would be absorbed as a charge to earnings by the Company. In these scenarios, the effect of these charges could be material to the Company's consolidated operating results and liquidity. As of March 31, 2019, the Company has incurred \$523 in cumulative adverse development on A&E reserves that have been ceded under the ADC treaty with NICO, leaving approximately \$977 of coverage available for future adverse net reserve development, if any.

Derivative Commitments

Certain of the Company's derivative agreements contain provisions that are tied to the financial strength ratings, as set by nationally recognized statistical agencies, of the individual legal entity that entered into the derivative agreement. If the legal entity's financial strength were to fall below certain ratings, the

counterparties to the derivative agreements could demand immediate and ongoing full collateralization and in certain instances enable the counterparties to terminate the agreements and demand immediate settlement of all outstanding derivative positions traded under each impacted bilateral agreement. The settlement amount is determined by netting the derivative positions transacted under each agreement. If the termination rights were to be exercised by the counterparties, it could impact the legal entity's ability to conduct hedging activities by increasing the associated costs and decreasing the willingness of counterparties to transact with the legal entity. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a net liability position as of March 31, 2019 was \$68. For this \$68, the legal entities have posted collateral of \$61 in the normal course of business. Based on derivative market values as of March 31, 2019, a downgrade of one level below the current financial strength ratings by either Moody's or S&P would not require additional assets to be posted as collateral. Based on derivative market values as of March 31, 2019, a downgrade of two levels below the current financial strength ratings by either Moody's or S&P would require an additional \$8 of assets to be posted as collateral. These collateral amounts could change as derivative market values change, as a result of changes in our hedging activities or to the extent changes in contractual terms are negotiated. The nature of the collateral that we post, if required, is primarily in the form of U.S. Treasury bills, U.S. Treasury notes and government agency securities.

12. EQUITY

Capital Purchase Program ("CPP") Warrants

As of March 31, 2019 and December 31, 2018, respectively, the Company has 1.0 million and 1.9 million of CPP warrants outstanding and exercisable. The CPP warrants were issued in 2009 as part of a program established by the U.S. Department of the Treasury under the Emergency Economic Stabilization Act of 2008. The CPP warrants expire in June 2019.

CPP warrant exercises were 0.9 million and 0.1 million for the three months ended March 31, 2019 and 2018, respectively.

The declaration of common stock dividends by the Company in excess of a threshold triggers a provision in the Company's warrant agreement with The Bank of New York Mellon resulting in adjustments to the CPP warrant exercise price and the number of shares deliverable for each warrant exercised (the "Warrant Share Number").

Accordingly, the declaration of a common stock dividend during the three months ended March 31, 2019 resulted in an adjustment to the CPP warrant exercise price. The CPP warrant exercise price was \$8.791 as of March 31, 2019 and

\$8.836 as of December 31, 2018 and the Warrant Share Number was 1.1 as of March 31, 2019 and December 31, 2018. The exercise price will be settled by the Company withholding the number of common shares issuable upon exercise of the warrants equal to the value of the aggregate exercise price of the warrants so exercised

determined by reference to the closing price of the Company's common stock on the trading day on which the warrants are exercised and notice is delivered to the warrant agent.

Equity Repurchase Program

In February, 2019, the Company announced a \$1.0 billion share repurchase authorization by the Board of Directors which is effective through December 31, 2020. Based on projected holding company resources, the Company expects to use a portion of the authorization in 2019 but anticipates using the majority of the program in 2020. Any repurchase of shares under the equity repurchase program is dependent on market conditions and other factors. During the three months ended March 31, 2019, no common shares were repurchased.

16. BUSINESS DISPOSITION AND DISCONTINUED OPERATIONS

Sale of life and annuity business

On May 31, 2018, the Company's wholly-owned subsidiary, Hartford Holdings, Inc., completed the sale of its life and annuity business to a group of investors led by Cornell Capital LLC, Atlas Merchant Capital LLC, TRB Advisors LP, Global Atlantic Financial Group, Pine Brook and J. Safra Group. Under the terms of the sale agreement signed December 3, 2017, the investor group formed a limited partnership, Hopmeadow Holdings LP, that acquired HLI, and its life and annuity operating subsidiaries. The Hartford received a 9.7% ownership interest in the limited partnership. The life and annuity operations met the criteria for reporting as discontinued operations and are reported in the Corporate category through the date of sale.

The Hartford reported its 9.7% ownership interest in Hopmeadow Holdings LP, which is accounted for under the equity method, in other assets in the Condensed Consolidated Balance Sheet. The Hartford recognizes its share of income in other revenues in the Condensed Consolidated Statement of Operations on a three month delay, when financial information from the investee becomes available. The Company recognized \$28, before tax, of income for the three months ended March 31, 2019.

For further information on the sale, including ongoing transactions with the life and annuity business sold, see Note 20 - Business Dispositions and Discontinued Operations of Notes to Consolidated Financial Statements, included in The Hartford's 2018 Form 10-K Annual Report.

Part I - Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Dollar amounts in millions except for per share data, unless otherwise stated)

The Hartford provides projections and other forward-looking information in the following discussions, which contain many forward-looking statements, particularly relating to the Company's future financial performance. These forward-looking statements are estimates based on information currently available to the Company, are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and are subject to the cautionary statements set forth on pages 3 and 4 of this Form 10-Q. Actual results are likely to differ, and in the past have differed, materially from those forecast by the Company, depending on the outcome of various factors, including, but not limited to, those set forth in the following discussion; Part II, Item 1A, Risk Factors of this Quarterly Report on Form 10-Q; Part I, Item 1A, Risk Factors in The Hartford's 2018 Form 10-K Annual Report; and our other filings with the Securities and Exchange Commission. The Hartford undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future developments or otherwise. On August 22, 2018, the Company announced it entered into a definitive agreement to acquire all outstanding common shares of The Navigators Group, Inc. ("Navigators Group"), a global specialty underwriter, for \$70 a share, or \$2.2 billion in cash, including transaction expenses. The transaction is expected to close in the second quarter of 2019, subject to customary closing conditions, including receipt of regulatory approvals. The Company signed an agreement with National Indemnity Company ("NICO"), a subsidiary of Berkshire Hathaway Inc., which, subject to regulatory approval and upon closing of the acquisition, will have Navigators Group subsidiaries enter into an aggregate excess of loss reinsurance agreement with NICO to cover unfavorable reserve development to Navigators Group reserves subject to the agreement, with limited exclusions. The reinsurance agreement will cover accident year 2018 and prior year reserves. The reinsurance agreement, provides up to \$300 of coverage for potential unfavorable net loss reserve development in excess of \$1.916 billion which is \$100 above Navigators Group recorded reserves subject to the agreement of \$1.816 billion as of December 31, 2018. The reinsurance premium for this agreement is approximately \$91, before tax, or \$72, after tax, which will be recorded as a charge to net income in the period the transaction closes.

On May 31, 2018, Hartford Holdings, Inc., a wholly owned subsidiary of the Company, completed the sale of the issued and outstanding equity of Hartford Life, Inc. ("HLI"), a holding company, and its life and annuity operating subsidiaries. For discussion of this transaction, see Note 15 - Business Disposition and Discontinued Operations of Notes to Condensed Consolidated Financial Statements.

On February 16, 2018, The Hartford entered into a renewal rights agreement with the Farmers Exchanges, of the Farmers

Insurance Group of Companies, to acquire its Foremost-branded small commercial business sold through independent agents. Written premium from this agreement began in the third quarter of 2018.

Certain reclassifications have been made to historical financial information presented in Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") to conform to the current period presentation.

Distribution costs within the Hartford Funds segment that were previously netted against fee income are presented gross in insurance operating costs and other expenses.

The Hartford defines increases or decreases greater than or equal to 200% as "NM" or not meaningful.

KEY PERFORMANCE MEASURES AND RATIOS

The Company considers the measures and ratios in the following discussion to be key performance indicators for its businesses. Management believes that these ratios and measures are useful in understanding the underlying trends in The Hartford's businesses. However, these key performance indicators should only be used in conjunction with, and not in lieu of, the results presented in the segment discussions that follow in this MD&A. These ratios and measures may not be comparable to other performance measures used by the Company's competitors.

Part I - Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Definitions of Non-GAAP and Other Measures and Ratios

Assets Under Management ("AUM")- include mutual fund and exchange-traded products ("ETP") assets. AUM is a measure used by the Company's Hartford Funds segment because a significant portion of the Company's mutual fund and ETP revenues are based upon asset values. These revenues increase or decrease with a rise or fall in AUM whether caused by changes in the market or through net flows.

Book Value per Diluted Share excluding accumulated other comprehensive income ("AOCI")- is calculated based upon a non-GAAP financial measure. It is calculated by dividing (a) common stockholders' equity, excluding AOCI, after tax, by (b) common shares outstanding and dilutive potential common shares. Book value per diluted share is the most directly comparable U.S. GAAP ("GAAP") measure. The Company provides this measure to enable investors to analyze the amount of the Company's net worth that is primarily attributable to the Company's business operations. The Company believes it is useful to investors because it eliminates the effect of items in AOCI that can fluctuate significantly from period to period, primarily based on changes in interest rates.

Current Accident Year Catastrophe Ratio-a component of the loss and loss adjustment expense ratio, represents the ratio of catastrophe losses incurred in the current accident year (net of reinsurance) to earned premiums. A catastrophe is an event that causes \$25 or more in industry insured property losses and affects a significant number of property and casualty policyholders and insurers, as defined by the Property Claim Service office of Verisk. The current accident year catastrophe ratio includes the effect of catastrophe losses, but does not include the effect of reinstatement premiums.

Combined Ratio-the sum of the loss and loss adjustment expense ratio, the expense ratio and the policyholder dividend ratio. This ratio is a relative measurement that describes the related cost of losses and expenses for every \$100 of earned premiums. A combined ratio below 100 demonstrates underwriting profit; a combined ratio above 100 demonstrates underwriting losses.

Core Earnings- a non-GAAP measure, is an important measure of the Company's operating performance. The Company believes that core earnings provides investors with a valuable measure of the underlying performance of the Company's businesses because it reveals trends in our insurance and financial services businesses that may be obscured by including the net effect of certain realized capital gains and losses, certain loss on extinguishment of debt, integration and transaction costs in connection with an acquired business, gains and losses on reinsurance transactions, income tax benefit from a reduction in deferred income tax valuation allowance, and results of discontinued operations. Some realized capital gains and losses are primarily driven by investment decisions and external economic developments, the nature and timing of which are unrelated to the insurance and underwriting aspects of our business. Accordingly, core earnings excludes the effect of all realized gains and losses that tend to be variable from period to period based on capital market conditions. The Company believes, however, that some realized capital gains and losses are integrally related to our insurance operations, so core earnings includes net realized gains and losses such as net periodic settlements on credit derivatives. These net realized gains and losses are directly related to an offsetting item included in the income statement such as net investment income. Core earnings are net of preferred stock dividends declared since they are a cost of financing more akin to interest expense on debt and are expected to be a recurring expense as long as the preferred stock is outstanding. Net income (loss), net income (loss) available to common stockholders and income (loss) from continuing operations, net of tax, available to common stockholders are the most directly comparable U.S. GAAP measures to core earnings. Core earnings should not be considered as a substitute for net income (loss), net income (loss) available to common stockholders or income (loss) from continuing operations, net of tax, available to common stockholders and does not reflect the overall profitability of the Company's business. Therefore, the Company believes that it is useful for investors to evaluate net income (loss), net income (loss) available to common stockholders, income (loss) from continuing operations, net of tax, available to common stockholders and core earnings when reviewing the Company's performance.

Reconciliation of Net Income to Core Earnings

	Three Months Ended March 31, 2019 2018	
Net income	\$ 630	\$ 597
Preferred stock dividends	5	—
Net income available to common stockholders	625	597
Less: Net realized capital gains (losses) excluded from core earnings, before tax	160	(30)
Less: Integration and transaction costs associated with acquired business, before tax	(10)	(12)
Less: Income tax benefit (expense)	(32)	9
Less: Income from discontinued operations, after tax	—	169
Core earnings	\$ 507	\$ 461

45

Part I - Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Core Earnings Margin- a non-GAAP financial measure that the Company uses to evaluate, and believes is an important measure of, the Group Benefits segment's operating performance. Core earnings margin is calculated by dividing (a) core earnings by (b) revenues excluding buyouts and realized gains (losses). Net income margin is the most directly comparable U.S. GAAP measure. The Company believes that core earnings margin provides investors with a valuable measure of the performance of Group Benefits because it reveals trends in the business that may be obscured by the effect of buyouts and realized gains (losses) on revenues or obscured by the effect on net income of realized capital gains (losses), integration costs, and the impact of Tax Reform on net deferred tax assets. Core earnings margin should not be considered as a substitute for net income margin and does not reflect the overall profitability of Group Benefits. Therefore, the Company believes it is important for investors to evaluate both net income margin and core earnings margin when reviewing performance. A reconciliation of net income margin to core earnings margin is set forth in the Results of Operations section within MD&A - Group Benefits.

Expense Ratio- for the underwriting segments of Commercial Lines and Personal Lines is the ratio of underwriting expenses less fee income, to earned premiums. Underwriting expenses include the amortization of deferred policy acquisition costs ("DAC") and insurance operating costs and expenses, including certain centralized services costs and bad debt expense. DAC include commissions, taxes, licenses and fees and other incremental direct underwriting expenses and are amortized over the policy term.

The expense ratio for Group Benefits is expressed as the ratio of insurance operating costs and other expenses including amortization of intangibles and amortization of DAC, to premiums and other considerations, excluding buyout premiums.

The expense ratio for Commercial Lines, Personal Lines and Group Benefits does not include integration and other transaction costs associated with an acquired business.

Fee Income- is largely driven from amounts earned as a result of contractually defined percentages of assets under management in our Hartford Funds business. These fees are generally earned on a daily basis. Therefore, the growth in assets under management either through positive net flows or favorable market performance will have a favorable impact on fee income. Conversely, either negative net flows or unfavorable market performance will reduce fee income.

Loss and Loss Adjustment Expense Ratio- a measure of the cost of claims incurred in the calendar year divided by earned premium and includes losses and loss adjustment expenses incurred for both the current and prior accident years. Among other factors, the loss and loss adjustment expense ratio needed for the Company to achieve its targeted return on equity fluctuates from year to year based on changes in the expected investment yield over the claim settlement period, the timing of expected claim settlements and the targeted returns set by management based on the competitive environment.

The loss and loss adjustment expense ratio is affected by claim frequency and claim severity, particularly for shorter-tail property lines of business, where the emergence of claim frequency and severity is credible and likely indicative of ultimate losses. Claim frequency represents the percentage change in the

average number of reported claims per unit of exposure in the current accident year compared to that of the previous accident year. Claim severity represents the percentage change in the estimated average cost per claim in the current accident year compared to that of the previous accident year. As one of the factors used to determine pricing, the Company's practice is to first make an overall assumption about claim frequency and severity for a given line of business and then, as part of the rate-making process, adjust the assumption as appropriate for the particular state, product or coverage.

Loss and Loss Adjustment Expense Ratio before Catastrophes and Prior Accident Year Development-

a measure of the cost of non-catastrophe loss and loss adjustment expenses incurred in the current accident year divided by earned premiums. Management believes that the current accident year loss and loss adjustment expense ratio before catastrophes is a performance measure that is useful to investors as it removes the impact of volatile and unpredictable catastrophe losses and prior accident year development.

Loss Ratio, excluding Buyouts- utilized for the Group Benefits segment and is expressed as a ratio of benefits, losses and loss adjustment expenses to premiums and other considerations, excluding buyout premiums.

Since Group Benefits occasionally buys a block of claims for a stated premium amount, the Company excludes this buyout from the loss ratio used for evaluating the profitability of the business as buyouts may distort the loss ratio. Buyout premiums represent takeover of open claim liabilities and other non-recurring premium amounts.

Mutual Fund and Exchange-Traded Product Assets- are owned by the shareholders of those products and not by the Company and, therefore, are not reflected in the Company's consolidated financial statements except in instances where the Company seeds new investment products and holds an investment in the fund for a period of time. Mutual fund and ETP assets are a measure used by the Company primarily because a significant portion of the Company's Hartford Funds segment revenues are based upon asset values. These revenues increase or decrease with a rise or fall in AUM whether caused by changes in the market or through net flows.

New Business Written Premium- represents the amount of premiums charged for policies issued to customers who were not insured with the Company in the previous policy term. New business written premium plus renewal policy written premium equals total written premium.

Policies in Force- represents the number of policies with coverage in effect as of the end of the period. The number of policies in force is a growth measure used for Personal Lines and standard commercial lines within Commercial Lines and is affected by both new business growth and policy count retention.

Policy Count Retention- represents the ratio of the number of policies renewed during the period divided by the number of policies available to renew. The number of policies available to renew represents the number of policies, net of any cancellations, written in the previous policy term. Policy count retention is affected by a number of factors, including the percentage of renewal policy quotes accepted and decisions by the Company to non-renew policies because of specific policy underwriting concerns or because of a decision to reduce

Part I - Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

premium writings in certain classes of business or states. Policy count retention is also affected by advertising and rate actions taken by competitors.

Policyholder Dividend Ratio- the ratio of policyholder dividends to earned premium.

Prior Accident Year Loss and Loss Adjustment Expense Ratio- represents the increase (decrease) in the estimated cost of settling catastrophe and non-catastrophe claims incurred in prior accident years as recorded in the current calendar year divided by earned premiums.

Reinstatement Premiums- represents additional ceded premium paid for the reinstatement of the amount of reinsurance coverage that was reduced as a result of the Company ceding losses to reinsurers.

Renewal Earned Price Increase (Decrease)- Written premiums are earned over the policy term, which is six months for certain Personal Lines automobile business and twelve months for substantially all of the remainder of the Company's Property and Casualty business. Since the Company earns premiums over the six to twelve month term of the policies, renewal earned price increases (decreases) lag renewal written price increases (decreases) by six to twelve months.

Renewal Written Price Increase (Decrease)- for Commercial Lines, represents the combined effect of rate changes, amount of insurance and individual risk pricing decisions per unit of exposure on policies that renewed. For Personal Lines, renewal written price increases represent the total change in premium per policy since the prior year on those policies that renewed and includes the combined effect of rate changes, amount of insurance and other changes in exposure. For Personal Lines, other changes in exposure include, but are not limited to, the effect of changes in number of drivers, vehicles and incidents, as well as changes in customer policy elections, such as deductibles and limits. The rate component represents the change in rate filed with and approved by state regulators during the period and the amount of insurance represents the change in the value of the rating base, such as model year/vehicle symbol for automobiles, building replacement costs for property and wage inflation for workers' compensation. A number of factors affect renewal written price increases (decreases) including expected loss costs as projected by the Company's pricing actuaries, rate filings approved by state regulators, risk selection decisions made by the Company's underwriters and marketplace competition. Renewal written price changes reflect the property and casualty insurance market cycle. Prices tend to increase for a particular line of business when insurance carriers have incurred significant losses in that line of business in the recent past or the industry as a whole commits less of its capital to writing exposures in that line of business. Prices tend to decrease when recent loss experience has been favorable or when competition among insurance carriers increases. Renewal written price statistics are subject to change from period to period, based on a number of factors, including changes in actuarial estimates and the effect of subsequent cancellations and non-renewals, and modifications made to better reflect ultimate pricing achieved.

Return on Assets ("ROA"), Core Earnings- a non-GAAP financial measure that the Company uses to evaluate, and believes is an important measure of the Hartford Funds segment's

operating performance. ROA, core earnings is calculated by dividing core earnings by a daily average AUM. ROA is the most directly comparable U.S. GAAP measure. The Company believes that ROA, core earnings, provides investors with a valuable measure of the performance of the Hartford Funds segment because it reveals trends in our business that may be obscured by the effect of realized gains (losses). ROA, core earnings, should not be considered as a substitute for ROA and does not reflect the overall profitability of our Hartford Funds business. Therefore, the Company believes it is important for investors to evaluate both ROA, and ROA, core earnings when reviewing the Hartford Funds segment performance. A reconciliation of ROA to ROA, core earnings is set forth in the Results of Operations section within MD&A - Hartford Funds.

Underlying Combined Ratio- a non-GAAP financial measure, represents the combined ratio before catastrophes and prior accident year development. Combined ratio is the most directly comparable U.S. GAAP measure. The Company believes the underlying combined ratio is an important measure of the trend in profitability since it removes the impact of volatile and unpredictable catastrophe losses and prior accident year loss and loss adjustment expense reserve development. A reconciliation of combined ratio to underlying combined ratio is set forth in the Results of Operations section within MD&A - Commercial Lines and Personal Lines.

Underwriting Gain (Loss)- The Company's management evaluates profitability of the P&C businesses primarily on the basis of underwriting gain (loss). Underwriting gain (loss) is a before tax measure that represents earned premiums less incurred losses, loss adjustment expenses, amortization of DAC, underwriting expenses, amortization of other intangible assets and dividends to policyholders. Underwriting gain (loss) is influenced significantly by earned premium growth and the adequacy of the Company's pricing. Underwriting profitability over time is also greatly influenced by the Company's pricing and underwriting discipline, which seeks to manage exposure to loss through favorable risk selection and diversification, its management of claims, its use of reinsurance and its ability to manage its expense ratio, which it accomplishes through economies of scale and its management of acquisition costs and other underwriting expenses. Net income (loss) is the most directly comparable GAAP measure. The Company believes that underwriting gain (loss) provides investors with a valuable measure of before tax profitability derived from underwriting activities, which are managed separately from the Company's investing activities. A reconciliation of net income (loss) to underwriting gain (loss) is set forth in the Results of Operations section within MD&A - Commercial Lines, Personal Lines and Property & Casualty Other Operations.

Written and Earned Premiums- Written premium is a statutory accounting financial measure which represents the amount of premiums charged for policies issued, net of reinsurance, during a fiscal period. Earned premium is a U.S. GAAP and statutory measure. Premiums are considered earned and are included in the financial results on a pro rata basis over the policy period. Management believes that written premium is a perform
