FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the quarterly period ended June 30, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

Commission File No. 1-11083

BOSTON SCIENTIFIC CORPORATION

(Exact name of registrant as specified in its charter)

DELAWARE

04-2695240

(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

300 BOSTON SCIENTIFIC WAY, MARLBOROUGH, MASSACHUSETTS 01752-1234

(Address of principal executive offices) (zip code)

(508) 683-4000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒

Accelerated filer ☐

Non-Accelerated filer ☐ (Do not check if a smaller reporting company)

Smaller reporting company ☐

Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Shares outstanding

Class as of July 25, 2018

Common Stock, \$0.01 par value 1,382,924,777

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE A – BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements of Boston Scientific Corporation have been prepared in accordance with accounting principles generally accepted in the United States (U.S. GAAP) and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. When used in this report, the terms, "we," "us," "our," and "the Company" mean Boston Scientific Corporation and its divisions and subsidiaries. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) considered necessary for fair presentation have been included. Operating results for the three and six months ended June 30, 2018 are not necessarily indicative of the results that may be expected for the year ending December 31, 2018. For further information, refer to the consolidated financial statements and footnotes thereto included in Item 8 of our most recent Annual Report on Form 10-K.

Amounts reported in millions within this report are computed based on the amounts in thousands. As a result, the sum of the components reported in millions may not equal the total amount reported in millions due to rounding. Certain columns and rows within tables may not add due to the use of rounded numbers. Percentages presented are calculated from the underlying numbers in dollars. Prior year balances were subject to rounding.

Revision of Reportable Segments

Effective January 1, 2018, following organizational changes to align the company's business and organization structure focused on active implantable devices, we revised our reportable segments, in accordance with FASB ASC Topic 280, Segment Reporting. The revision reflects a reclassification of our Neuromodulation business from our Medical Surgical (MedSurg) segment to our newly created Rhythm and Neuro segment. We have revised prior year amounts to conform to the current year's presentation (as denoted with an asterisk throughout *). There was no revision to operating segments or reporting units as a result of the organizational change. See Note C – Goodwill and Other Intangible Assets and Note K – Segment Reporting for further details.

Subsequent Events

We evaluate events occurring after the date of our most recent accompanying unaudited condensed consolidated balance sheet for potential recognition or disclosure in our financial statements. We did not identify any material subsequent events requiring adjustment to our accompanying unaudited condensed consolidated financial statements (recognized subsequent events) for the three and six months ended June 30, 2018. Those items requiring disclosure (unrecognized subsequent events) in the financial statements have been disclosed accordingly. Refer to Note B – Acquisitions and Strategic Investments and Note I – Commitments and Contingencies for more information.

Accounting Standards Implemented Since December 31, 2017

ASC Update No. 2014-09

In May 2014, the FASB issued FASB ASC Topic 606, Revenue from Contracts with Customers (Topic 606), which was subsequently updated. We adopted the standard as of January 1, 2018, using the modified retrospective method. Under this method, we applied FASB ASC Topic 606 to contracts that were not complete as of January 1, 2018 and recognized the cumulative effect of initially applying the standard as an adjustment to the opening balance of retained earnings. Results for reporting periods beginning after January 1, 2018 are presented in accordance with FASB ASC Topic 606. Prior period amounts are not adjusted and are reported in accordance with legacy GAAP requirements in

FASB ASC Topic 605, Revenue Recognition.

Due to the adoption of FASB ASC Topic 606, we recorded a net reduction to retained earnings of \$177 million on January 1, 2018, primarily related to the cost of providing non-contractual post-implant support to certain customers, which we historically deemed immaterial in the context of the arrangement. Upon the adoption of FASB ASC Topic 606, when we sell a device with an implied non-contractual post-implant support obligation, we forward accrue the cost of the service within Selling, general and administrative expenses and recognize it at the point in time the associated revenue is earned. We release the accrual over the related service period. These costs were previously expensed as incurred due to such service obligation being non-contractual.

The impact of adopting FASB ASC Topic 606 on our unaudited condensed consolidated balance sheets resulted in an increase in Other current liabilities of \$58 million and an increase in Other long-term liabilities of \$205 million as of June 30, 2018, as a result of accruing for our post-implant support obligation. We also recorded deferred tax assets primarily related to post-implant

Table of Contents

support, resulting in an increase in Other long-term assets of \$12 million and a reduction in Deferred income taxes of \$41 million. The remaining impact of adopting FASB ASC Topic 606 was not material to our financial position or results of operations.

Refer to Note L – Revenue for additional details.

ASC Update No. 2016-01

In January 2016, the FASB issued ASC Update No. 2016-01, Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. The purpose of Update No. 2016-01 is to improve financial reporting for financial instruments by reducing the number of items recorded to other comprehensive income. We adopted Update No. 2016-01 in the first quarter of 2018, using both the modified retrospective and prospective methods. For publicly-held securities, we used the modified retrospective approach. Unrealized gains and losses previously recorded to Other comprehensive income (loss) were reclassified to retained earnings and all future fair value changes will be recorded to Net income (loss). For privately-held securities, we elected the measurement alternative approach for our existing investments, which is applied prospectively upon adoption. This approach requires entities to measure their investments at cost minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or a similar investment of the same issuer. The adoption of the standard did not have a material impact on our financial position or results of operations. The actual impact to future periods resulting from fair value changes of our equity investments is difficult to predict as it will depend on their future performance.

ASC Update No. 2016-16

In October 2016, the FASB issued ASC Update No. 2016-16, Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory. The purpose of Update No. 2016-16 is to allow an entity to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs, as opposed to waiting until the asset is sold to a third party, or impaired. Update No. 2016-16 was effective for annual periods beginning after December 15, 2017, including interim periods within those annual periods. We adopted Update No. 2016-16 prospectively in the first quarter of 2018 and recognized a net reduction to opening retained earnings of \$55 million for income tax consequences not previously recognized for intra-entity transfers of assets other than inventories. All future income tax consequences of intra-entity transfers of assets other than inventories will be recognized through Income tax expense (benefit).

ASC Update No. 2017-12

In August 2017, the FASB issued ASC Update No. 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. The purpose of Update No. 2017-12 is to simplify the application of hedge accounting and better align financial reporting of hedging relationships with risk management objectives. Update No. 2017-12 was effective for annual periods beginning after December 15, 2018, including interim periods within those annual periods. We early adopted Update No. 2017-12 in the first quarter of 2018. The adoption of the standard had no impact on our financial position or results of operations.

NOTE B – ACQUISITIONS AND STRATEGIC INVESTMENTS

2018 Acquisitions

Claret Medical, Inc.

On July 20, 2018, we announced the signing of our agreement to acquire Claret Medical, Inc. (Claret Medical), a privately-held company that has developed and commercialized the Sentinel™ Cerebral Embolic Protection System. The device is used to protect the brain during certain interventional procedures, predominately in patients undergoing transcatheter aortic valve replacement (TAVR). The transaction price consists of an upfront cash payment of \$220 million, as well as a potential reimbursement-based milestone payment of up to \$50 million. The acquisition is projected to close during the third quarter of 2018, subject to customary closing conditions. Upon closing, Claret Medical will be integrated into our Interventional Cardiology business.

Cryterion Medical, Inc.

On July 5, 2018, we announced the closing of our acquisition of Cryterion Medical, Inc. (Cryterion), a privately-held company developing a single-shot cryoablation platform for the treatment of atrial fibrillation. We have been an investor in Cryterion since its inception in 2016 and the transaction price to acquire the approximately 65 percent we did not already own was an upfront cash payment of \$202 million. We are in the process of integrating Cryterion into our Electrophysiology business.

Table of Contents

NxThera, Inc.

On April 30, 2018, we announced the closing of our acquisition of NxThera, Inc. (NxThera), a privately-held company that developed the Rezûm™ System, a minimally invasive therapy in a growing category of treatment options for patients with benign prostatic hyperplasia (BPH). The transaction consists of an upfront cash payment of \$306 million, and up to an additional \$100 million in potential commercial milestone payments over the next four years. We had an existing minority investment in NxThera, which resulted in a net upfront cash payment of approximately \$240 million upon closing and a potential additional milestone payment of up to approximately \$85 million. We are in the process of integrating NxThera into our Urology and Pelvic Health business.

nVision Medical Corporation

On April 16, 2018, we announced the closing of our acquisition of nVision Medical Corporation (nVision), a privately-held company focused on women's health. nVision developed the first and only device cleared by the U.S. Food and Drug Administration (FDA) to collect cells from the fallopian tubes, offering a potential platform for earlier diagnosis of ovarian cancer. The transaction consists of an upfront cash payment of \$150 million, and up to an additional \$125 million in potential clinical and commercial milestones over four years. We are in the process of integrating nVision into our Urology and Pelvic Health business.

In addition, we completed other individually immaterial acquisitions during the first six months of 2018 for total consideration of \$50 million in cash at closing plus aggregate contingent consideration of up to \$10 million.

Purchase Price Allocation

We accounted for these acquisitions as business combinations, and in accordance with FASB ASC Topic 805, Business Combinations, we recorded the assets acquired and liabilities assumed at their respective fair values as of the acquisition dates. The components of the aggregate preliminary purchase prices are as follows:

(in millions)

Payments for acquisitions, net of cash acquired	\$419
Fair value of contingent consideration	140
Fair value of prior interests	81
	\$639

The following summarizes the preliminary purchase price allocations for the acquisitions as of June 30, 2018:

(in millions)

Goodwill	\$273
Amortizable intangible assets	418
Other assets acquired	53
Liabilities assumed	(5)
Deferred tax liabilities	(99)
	\$639

We allocated a portion of the preliminary purchase prices to specific intangible asset categories as follows:

	Amount Assigned (in millions)	Amortization Period (in years)	Risk-Adjusted Discount Rates used in Purchase Price Allocation
Amortizable intangible assets:			
Technology-related	\$ 410	10 - 13	17% - 23%
Other intangible assets	7	6 - 13	13% - 15%

\$ 418

Table of Contents

2017 Acquisitions

Symetis SA

On May 16, 2017, we announced the closing of our acquisition of Symetis SA (Symetis), a privately-held Swiss structural heart company focused on minimally-invasive transcatheter aortic valve replacement devices, for approximately \$430 million in cash. We are in the process of integrating Symetis into our Interventional Cardiology business.

Purchase Price Allocation

We accounted for the acquisition of Symetis as a business combination, and in accordance with FASB ASC Topic 805, we recorded the assets acquired and liabilities assumed at their respective fair values as of the acquisition date. The purchase price was comprised of the following component:

(in millions)

Payment for acquisition, net of cash acquired \$391

The following summarizes the purchase price allocation for the Symetis acquisition as of June 30, 2018:

(in millions)

Goodwill	\$183
Amortizable intangible assets	278
Other assets acquired	25
Liabilities assumed	(95)
	\$391

We allocated a portion of the purchase price to specific intangible asset categories as follows:

	Amount Assigned (in millions)	Amortization Period (in years)	Risk-Adjusted Discount Rates used in Purchase Price Allocation
Amortizable intangible assets:			
Technology-related	\$ 268	13	24%
Other intangible assets	10	2-13	24%
	\$ 278		

Our technology-related intangible assets consist of technical processes, intellectual property and institutional understanding with respect to products and processes that we will leverage in future products or processes and will carry forward from one product generation to the next. We used the multi-period excess earnings method, a form of the income approach, to derive the fair value of the technology-related intangible assets and are amortizing them on a straight-line basis over their assigned estimated useful lives.

Goodwill was primarily established due to synergies expected to be gained from leveraging our existing operations as well as revenue and cash flow projections associated with future technologies and has been allocated to our reportable segments based on the relative expected benefit. Based on preliminary estimates updated for applicable regulatory changes, the goodwill recorded relating to our 2018 and 2017 acquisitions is not deductible for tax purposes.

Contingent Consideration

Within the Contingent consideration expense (benefit) caption of our accompanying unaudited condensed consolidated statements of operations, we recorded a net benefit of \$4 million during the second quarter of 2018, a net

benefit of \$24 million during the second quarter of 2017, a net expense of \$1 million during the first six months of 2018 and a net benefit of \$74 million during the first six months of 2017 related to the changes in fair value of our contingent consideration liability. We made contingent consideration payments of \$9 million during the first six months of 2018 and \$28 million during the first six months of 2017.

Table of Contents

Changes in the fair value of our contingent consideration liability were as follows:
(in millions)

Balance as of December 31, 2017	\$ 169
Amounts recorded related to new acquisitions	140
Purchase price adjustments related to prior acquisitions	(22)
Contingent consideration expense (benefit)	1
Contingent consideration payments	(9)
Balance as of June 30, 2018	\$ 279

As of June 30, 2018, the maximum amount of future contingent consideration (undiscounted) that we could be required to pay was approximately \$1.532 billion.

The recurring Level 3 fair value measurements of our contingent consideration liability include the following significant unobservable inputs:

Contingent Consideration Liability	Fair Value as of June 30, 2018	Valuation Technique	Unobservable Input	Range
R&D and Commercialization-based Milestones	\$159 million	Discounted Cash Flow	Discount Rate Projected Year of Payment	3 % - 4% 2018 - 2022
Revenue-based Payments	\$120 million	Discounted Cash Flow	Discount Rate Projected Year of Payment	11 % - 15% 2018 - 2026

Projected contingent payment amounts related to some of our research and development (R&D), commercialization-based and revenue-based milestones are discounted back to the current period using a discounted cash flow model. Projected revenues are based on our most recent internal operational budgets and strategic plans. Increases or decreases in projected revenues, probabilities of payment, discount rates or the time until payment is made may result in significantly lower or higher fair value measurements.

Strategic Investments

On January 24, 2018, we closed an investment and entered into an acquisition option agreement with Millipede, Inc. (Millipede), a privately-held company that has developed the IRIS Transcatheter Annuloplasty Ring System for the treatment of severe mitral regurgitation. Under the terms of the agreements, we have purchased a portion of the outstanding shares of Millipede along with newly issued shares of the company for a total consideration of \$90 million. We also have the option to acquire the remaining shares of the company at any time prior to the completion of a first-in-human clinical study that meets certain parameters. Upon the completion of the clinical study, Millipede has the option to compel us to acquire the remaining shares of the company. Each company's option period expires by the end of 2019. Completion of this acquisition would result in an additional \$325 million payment by us at closing with a further \$125 million becoming payable upon achievement of a commercial milestone.

On November 1, 2017, we entered into a definitive agreement with an investee company where we could have been obligated to pay \$145 million in cash up-front and a maximum of \$130 million in contingent payments to acquire the investee. The agreement contained a provision, expiring October 31, 2019, allowing the investee company to sell the remaining equity interests of the investee company to us upon achievement of a regulatory milestone and an option allowing us to acquire the remaining equity interests. We sent a notice of termination to the investee company in the second quarter of 2018.

Table of Contents

The aggregate carrying amount of our strategic investments were comprised of the following categories:

(in millions)	As of	
	June 30, 2018	December 31, 2017
Equity method investments	\$281	\$ 209
Measurement alternative investments	82	81
Publicly-held securities	1	15
Notes receivable	18	47
	\$382	\$ 353

These investments are classified as Other long-term assets within our accompanying unaudited condensed consolidated balance sheets, in accordance with U.S. GAAP and our accounting policies.

As of June 30, 2018, the book value of our equity method investments exceeded our share of the book value of the investees' underlying net assets by approximately \$328 million, which represents amortizable intangible assets, in-process research and development, deferred tax liabilities and goodwill.

NOTE C – GOODWILL AND OTHER INTANGIBLE ASSETS

The gross carrying amount of goodwill and other intangible assets and the related accumulated amortization for intangible assets subject to amortization and accumulated write-offs of goodwill are as follows:

(in millions)	As of June 30, 2018		As of December 31, 2017	
	Gross Carrying Amount	Accumulated Amortization/Write-offs	Gross Carrying Amount	Accumulated Amortization/Write-offs
Amortizable intangible assets				
Technology-related	\$9,698	\$ (5,032)	\$9,386	\$ (4,880)
Patents	517	(384)	517	(379)
Other intangible assets	1,640	(897)	1,633	(838)
	\$11,855	\$ (6,314)	\$11,536	\$ (6,097)
Unamortizable intangible assets				
Goodwill	\$17,142	\$ (9,900)	\$16,898	\$ (9,900)
In-process research and development (IPR&D)	273	—	278	—
Technology-related	120	—	120	—
	\$17,535	\$ (9,900)	\$17,295	\$ (9,900)

Effective January 1, 2018, we reclassified our Neuromodulation operating segment and associated goodwill balance from our Medsurg reportable segment to our Rhythm and Neuro reportable segment as discussed in Note A – Basis of Presentation. This change did not trigger a goodwill impairment assessment or impact our total goodwill carrying value. The following represents our goodwill balance by global reportable segment:

(in millions)	Rhythm			
	MedSurg	and Neuro	Cardiovascular	Total
Balance as of December 31, 2017	\$ 2,877	\$417	\$ 3,704	\$6,998
Impact of reportable segment revisions	(1,379)	1,379	—	—
	(2)	(22)	(5)	(29)

Impact of foreign currency fluctuations and other changes in carrying amount

Goodwill acquired	248	25	—	273
Balance as of June 30, 2018	\$ 1,744	\$ 1,799	\$ 3,699	\$ 7,242

Table of Contents

Goodwill Impairment Testing

In the second quarter of 2018, we performed our annual goodwill impairment test for all of our reporting units and concluded the fair value of each reporting unit exceeded its carrying value. Based on the criteria prescribed in FASB ASC Topic 350, Intangibles - Goodwill and Other, we assess goodwill for impairment at the reporting unit level, which is defined as an operating segment or one level below an operating segment, referred to as a component. For our 2018 and 2017 annual impairment assessments, we identified seven reporting units: Interventional Cardiology, Peripheral Interventions, Cardiac Rhythm Management, Electrophysiology, Endoscopy, Urology and Pelvic Health and Neuromodulation. We aggregated the Cardiac Rhythm Management and Electrophysiology reporting units, components of the Rhythm Management operating segment, based on the criteria prescribed in FASB ASC Topic 350.

In performing the goodwill impairment assessment, we utilized both the optional qualitative assessment and the quantitative approach prescribed under FASB ASC Topic 350. In 2018, we performed a qualitative assessment for our Urology and Pelvic Health and Neuromodulation reporting units since their fair values have historically exceeded carrying value by greater than 100 percent. The remaining reporting units were quantitatively tested for impairment. For the reporting units subject to a qualitative assessment, if it is determined that it is more likely than not that the fair value of the reporting unit is less than its carrying value, the quantitative approach of the goodwill impairment test is necessary. In 2018, for all reporting units tested using the qualitative assessment, we concluded that it was unnecessary to perform the quantitative impairment test. For all reporting units tested using the quantitative approach, we concluded that the fair value of each reporting unit exceeded its carrying value. Refer to Critical Accounting Policies and Estimates within Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our most recent Annual Report on Form 10-K for further discussion of our annual goodwill impairment testing.

NOTE D – HEDGING ACTIVITIES AND FAIR VALUE MEASUREMENTS

Derivative Instruments and Hedging Activities

We address market risk from changes in foreign currency exchange rates and interest rates through risk management programs which include the use of derivative financial instruments. We operate these programs pursuant to documented corporate risk management policies and do not enter into derivative transactions for speculative purposes. Our derivative instruments do not subject our earnings to material risk, as the gains or losses on these derivatives generally offset losses or gains recognized on the hedged item.

We manage concentration of counterparty credit risk by limiting acceptable counterparties to major financial institutions with investment grade credit ratings, limiting the amount of credit exposure to individual counterparties and by actively monitoring counterparty credit ratings and the amount of individual credit exposure. We also employ master netting arrangements that limit the risk of counterparty non-payment on a particular settlement date to the net gain that would have otherwise been received from the counterparty. Although not completely eliminated, we do not consider the risk of counterparty default to be significant as a result of these protections. Further, none of our derivative instruments are subject to collateral or other security arrangements, nor do they contain provisions that are dependent on our credit ratings from any credit rating agency.

Our risk from changes in currency exchange rates consists primarily of monetary assets and liabilities, forecast intercompany and third-party transactions and net investments in certain subsidiaries. We manage currency exchange rate risk at a consolidated level to reduce the cost of hedging by taking advantage of offsetting transactions. We employ derivative instruments, primarily forward currency contracts, to reduce the risk to our earnings and cash flows associated with changes in currency exchange rates.

The success of our currency risk management program depends, in part, on forecast transactions denominated primarily in British pound sterling, Euro and Japanese yen. We may experience unanticipated currency exchange gains or losses to the extent the actual activity is different than forecast. In addition, changes in currency exchange rates related to any unhedged transactions may impact our earnings and cash flows.

Table of Contents

Certain of our currency derivative instruments are designated as cash flow hedges under FASB ASC Topic 815, Derivatives and Hedging and are intended to protect the U.S. dollar value of forecasted transactions. The gain or loss on a derivative instrument designated as a cash flow hedge is recorded in Other comprehensive income (loss), net of tax (OCI) and is included in the Accumulated other comprehensive income (loss), net of tax (AOCI) caption of our unaudited condensed consolidated balance sheets until the underlying third-party transaction occurs. When the related third-party transaction occurs, we recognize the gain or loss in earnings within the Cost of products sold caption of our unaudited condensed consolidated statements of operations. In the event the hedging relationship is no longer effective, or if the hedged forecast transaction becomes no longer probable of occurring, we reclassify the amount of gains or losses on the derivative instrument designated as a cash flow hedge to earnings at that time.

We also use forward currency contracts that are not part of designated hedging relationships under FASB ASC Topic 815 as a part of our strategy to manage our exposure to currency exchange rate risk related to monetary assets and liabilities and related forecast transactions. These non-designated currency forward contracts have an original time to maturity consistent with the hedged currency transaction exposures, generally less than one year, and are marked-to-market with changes in fair value recorded to earnings and reflected within the Other, net caption of our unaudited condensed consolidated statements of operations.

Our interest rate risk relates primarily to U.S. dollar borrowings partially offset by U.S. dollar cash investments. We use interest rate derivative instruments to manage our earnings and cash flow exposure to changes in interest rates. Under these agreements we and the counterparty, at specified intervals, exchange the difference between fixed and floating interest amounts calculated by reference to an agreed-upon notional principal amount. We designate these derivative instruments either as fair value or cash flow hedges under FASB ASC Topic 815.

The changes in the fair value of interest rate derivatives designated as fair value hedges and the changes in the fair value of the underlying hedged debt instrument generally offset and are recorded within the Interest expense caption of our unaudited condensed consolidated statements of operations. We record the changes in the fair value of interest rate derivatives designated as cash flow hedges within OCI, which is included within the AOCI caption of our unaudited condensed consolidated balance sheets until the underlying hedged transaction occurs, at which time we recognize the gain or loss within Interest expense. In the event the hedging relationship is no longer effective, or if the hedged forecast transaction becomes no longer probable of occurring, we reclassify the amount of gains or losses on the interest rate derivative designated as a cash flow hedge to earnings at that time.

We are amortizing the realized gains or losses from interest rate derivative instruments previously designated as fair value or cash flow hedges into earnings as a component of Interest expense over the remaining term of the hedged item in accordance with FASB ASC Topic 815, so long as the hedge relationship remains effective. Prior to the adoption of ASC Update No. 2017-12, Derivatives and Hedging (Topic 815), the ineffective portion, if any, of our interest rate derivatives designated as either fair value or cash flow hedges was recognized in earnings in the period in which the hedging relationship exhibited ineffectiveness.

Certain of our currency forward contracts are designated as net investment hedges under FASB ASC Topic 815 and are intended to hedge a portion of our net investments in certain of our European, Swiss and Japanese operating entities. We have elected to use the spot method to assess effectiveness for our derivatives that are designated as net investment hedges. Under the spot method, the change in fair value attributable to changes in the spot rate is recorded in the Foreign currency translation adjustment (CTA), which is included within the AOCI caption of our unaudited condensed consolidated balance sheets. Therefore, the spot-forward difference is excluded from the assessment of effectiveness and accounted for separately.

Consistent with FASB ASC Topic 815, we have elected to amortize the excluded spot-forward difference associated with the currency forward contracts as calculated at the date of designation. Amortization will be recognized on a

straight-line basis over the term of the currency forward contracts from the AOCI caption of our unaudited condensed consolidated balance sheets to reported earnings as a reduction of Interest expense.

The following table presents the contractual amounts of our derivative instruments outstanding:

(in millions)	FASB ASC Topic 815 Designation	As of	
		June 30, 2018	December 31, 2017
Forward currency contracts	Cash flow hedge	\$4,205	\$ 3,252
Forward currency contracts	Net investment hedge	1,455	—
Forward currency contracts	Non-designated	2,635	2,671
Total Notional Outstanding		\$8,295	\$ 5,923

Table of Contents

The remaining time to maturity as of June 30, 2018 is within 60 months for all designated forward currency contracts and generally less than one year for all non-designated forward currency contracts.

We had no interest rate derivative instruments outstanding as of June 30, 2018 and December 31, 2017.

The following presents the effect of our derivative instruments designated as cash flow hedges and net investment hedges under FASB ASC Topic 815 on our accompanying unaudited condensed consolidated statements of operations:

(in millions)	Unaudited Condensed Consolidated Statements of Operations		Effective Amount Recognized in OCI			Effective Amount Reclassified from AOCI into Earnings		
	Location	Total	Pre-Tax Gain (Loss)	Tax Benefit (Expense)	Gain (Loss) Net of Tax	Pre-Tax (Gain) Loss	Tax (Benefit) Expense	(Gain) Loss Net of Tax
Three Months Ended June 30, 2018								
Forward currency contracts	Cost of products sold	\$ 739	\$ 194	\$ (44)	\$ 151	\$ 10	\$ (2)	\$ 7
Forward currency contracts	Interest expense	(57)	21	(5)	16	(7)	2	(5)
			\$ 215	\$ (48)	\$ 167	\$ 3	\$ (1)	\$ 2
Three Months Ended June 30, 2017								
Forward currency contracts	Cost of products sold	\$ 632	\$ (6)	\$ 2	\$ (4)	\$ (27)	\$ 10	\$ (17)
			\$ (6)	\$ 2	\$ (4)	\$ (27)	\$ 10	\$ (17)
Six Months Ended June 30, 2018								
Forward currency contracts	Cost of products sold	\$ 1,411	\$ 77	\$ (17)	\$ 59	\$ 25	\$ (6)	\$ 19
Forward currency contracts	Interest expense	(119)	21	(5)	16	(7)	2	(5)
			\$ 97	\$ (22)	\$ 76	\$ 18	\$ (4)	\$ 14
Six Months Ended June 30, 2017								
Forward currency contracts	Cost of products sold	\$ 1,282	\$ (64)	\$ 23	\$ (41)	\$ (55)	\$ 21	\$ (34)
Interest rate derivative contracts	Interest expense	(115)	—	—	—	(1)	—	(1)
			\$ (64)	\$ 23	\$ (41)	\$ (56)	\$ 21	\$ (35)

For our outstanding net investment hedges, the net gain or loss reclassified from AOCI to earnings as a reduction of Interest expense represents the straight-line amortization of the excluded component as calculated at the date of

designation. This initial value has been excluded from the assessment of effectiveness in accordance with FASB ASC Topic 815.

Table of Contents

As of June 30, 2018, pre-tax net gains or losses for our derivative instruments designated, or previously designated, as fair value and cash flow hedges under FASB ASC Topic 815 that may be reclassified to earnings within the next twelve months are presented below (in millions):

Designated Derivative Instrument	FASB ASC Topic 815 Designation	Location in Unaudited Condensed Consolidated Statements of Operations	Amount of Pre-Tax Gain (Loss) that may be Reclassified to Earnings
Interest rate derivative contracts	Fair value hedge	Interest expense	\$ 12
Interest rate derivative contracts	Cash flow hedge	Interest expense	1
Forward currency contracts	Cash flow hedge	Cost of products sold	11
Forward currency contracts	Net investment hedge	Interest expense	41

Net gains and losses on currency hedge contracts not designated as hedging instruments offset by net gains and losses from currency transaction exposures are presented below:

(in millions)	Location in Unaudited Condensed Consolidated Statements of Operations	Three Months Ended June 30,		Six Months Ended June 30,	
		2018	2017	2018	2017

Net gain (loss) on currency transaction exposures	Other, net	(33)	(13)	(17)	4
Net currency exchange gain (loss)		\$(1)	\$(8)	\$(9)	\$(8)

Table of Contents

Fair Value Measurements

FASB ASC Topic 815 requires all derivative instruments to be recognized at their fair values as either assets or liabilities on the balance sheet. We determine the fair value of our derivative instruments using the framework prescribed by FASB ASC Topic 820, Fair Value Measurements and Disclosures and considering the estimated amount we would receive or pay to transfer these instruments at the reporting date when taking into account current currency exchange rates, interest rates, the creditworthiness of the counterparty for unrealized gain positions and our own creditworthiness for unrealized loss positions. In certain instances, we may utilize financial models to measure fair value of our derivative instruments. In doing so, we use inputs that include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, other observable inputs for the asset or liability and inputs derived principally from, or corroborated by, observable market data by correlation or other means. The following are the balances of our derivative assets and liabilities:

		As of	
(in millions)	Location in Unaudited Condensed Consolidated Balance Sheets (1)	June 30, 2018	December 31, 2017
Derivative Assets:			
Designated Derivative Instruments			
Forward currency contracts	Other current assets	\$24	\$ 7
Forward currency contracts	Other long-term assets	94	57
Net investment hedges	Other long-term assets	21	—
		139	64
Non-Designated Derivative Instruments			
Forward currency contracts	Other current assets	64	18
Total Derivative Assets		\$202	\$ 82
Derivative Liabilities:			
Designated Derivative Instruments			
Forward currency contracts	Other current liabilities	\$9	\$ 37
Forward currency contracts	Other long-term liabilities	10	33
		19	69
Non-Designated Derivative Instruments			
Forward currency contracts	Other current liabilities	26	21
Total Derivative Liabilities		\$45	\$ 90

(1) We classify derivative assets and liabilities as current when the settlement date of the derivative contract is one year or less.

Recurring Fair Value Measurements

On a recurring basis, we measure certain financial assets and financial liabilities at fair value based upon quoted market prices. Where quoted market prices or other observable inputs are not available, we apply valuation techniques to estimate fair value. FASB ASC Topic 820 establishes a three-level valuation hierarchy for disclosure of fair value measurements. The category of a financial asset or a financial liability within the valuation hierarchy is based upon the lowest level of input that is significant to the measurement of fair value. The three levels of the hierarchy are defined as follows:

Level 1 – Inputs to the valuation methodology are quoted market prices for identical assets or liabilities.

Level 2 – Inputs to the valuation methodology are other observable inputs, including quoted market prices for similar assets or liabilities and market-corroborated inputs.

Level 3 – Inputs to the valuation methodology are unobservable inputs based on management's best estimate of inputs market participants would use in pricing the asset or liability at the measurement date, including assumptions about

risk.

17

Table of Contents

Assets and liabilities measured at fair value on a recurring basis consist of the following:

(in millions)	As of				December 31, 2017			
	June 30, 2018							
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Assets								
Money market and government funds	\$49	\$—	\$—	\$49	\$21	\$—	\$—	\$21
Publicly-held securities	1	—	—	1	15	—	—	15
Forward currency contracts	—	202	—	202	—	82	—	82
	\$50	\$202	\$—	\$253	\$36	\$82	\$—	\$118
Liabilities								
Forward currency contracts	\$—	\$45	\$—	\$45	\$—	\$90	\$—	\$90
Accrued contingent consideration	—	—	279	279	—	—	169	169
	\$—	\$45	\$279	\$324	\$—	\$90	\$169	\$259

Our investments in money market and government funds are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices. These investments are classified as Cash and cash equivalents within our accompanying unaudited condensed consolidated balance sheets, in accordance with U.S. GAAP and our accounting policies. In addition to \$49 million invested in money market and government funds as of June 30, 2018, we had \$159 million in interest bearing and non-interest bearing bank accounts. In addition to \$21 million invested in money market and government funds as of December 31, 2017, we had \$167 million in interest bearing and non-interest bearing bank accounts.

Our recurring fair value measurements using Level 3 inputs relate solely to our contingent consideration liability. Refer to Note B – Acquisitions and Strategic Investments for a discussion of the changes in the fair value of our contingent consideration liability.

Non-Recurring Fair Value Measurements

We hold certain assets and liabilities that are measured at fair value on a non-recurring basis in periods subsequent to initial recognition. The fair value of a measurement alternative investment is not estimated if there are no identified events or changes in circumstances that may have a significant adverse effect on the fair value of the investment. Refer to Note B – Acquisitions and Strategic Investments for a discussion of our strategic investments.

Refer to Note C – Goodwill and Other Intangible Assets for a discussion of the fair values.

The fair value of our outstanding debt obligations was \$6.702 billion as of June 30, 2018 and \$5.945 billion as of December 31, 2017. We determined fair value by using quoted market prices for our publicly registered senior notes, classified as Level 1 within the fair value hierarchy, amortized cost for commercial paper and face value for term loans and credit facility borrowings outstanding. Refer to Note E – Borrowings and Credit Arrangements for a discussion of our debt obligations.

Table of Contents

NOTE E – BORROWINGS AND CREDIT ARRANGEMENTS

We had total debt of \$6.493 billion as of June 30, 2018 and \$5.616 billion as of December 31, 2017. The debt maturity schedule for the significant components of our long-term debt obligations is presented below:

(in millions, except interest rates)	Issuance Date	Maturity Date	As of		Semi-annual Coupon Rate
			June 30, 2018	December 31, 2017	
October 2018 Notes	August 2013	October 2018	—	††	2.650%
January 2020 Notes	December 2009	January 2020	850	850	6.000%
May 2020 Notes	May 2015	May 2020	600	600	2.850%
May 2022 Notes	May 2015	May 2022	500	500	3.375%
October 2023 Notes	August 2013	October 2023	450	450	4.125%
May 2025 Notes	May 2015	May 2025	750	750	3.850%
March 2028 Notes	February 2018	March 2028	1,000	—	4.000%
November 2035 Notes	November 2005	November 2035	350	350	7.000%
January 2040 Notes	December 2009	January 2040	300	300	7.375%
Unamortized Debt Issuance Discount and Deferred Financing Costs		2020 - 2040	(32)	(24)	
Unamortized Gain on Fair Value Hedges		2020 - 2023	32	38	
Capital Lease Obligation		Various	8	1	
Long-term debt			\$4,808	\$ 3,815	

As of December 31, 2017, \$600 million under the October 2018 Notes was outstanding and classified as short-term debt.

Note: The table above does not include unamortized amounts related to interest rate contracts designated as cash flow hedges.

Revolving Credit Facility

As of June 30, 2018 and December 31, 2017, we maintained a \$2.250 billion revolving credit facility (the 2017 Facility) with a global syndicate of commercial banks that matures on August 4, 2022. This facility provides backing for the commercial paper program described below. There were no amounts borrowed under our revolving credit facility as of June 30, 2018 and December 31, 2017.

The 2017 Facility requires that we maintain certain financial covenants, as follows:

	Covenant Requirement	Actual
	as of June 30, 2018	as of June 30, 2018
Maximum leverage ratio (1)	3.5 times	2.4 times

(1) Ratio of total debt to consolidated EBITDA, as defined by the credit agreement, for the preceding four consecutive fiscal quarters.

The 2017 Facility provides for an exclusion from the calculation of consolidated EBITDA, as defined by the agreement, through maturity, of any non-cash charges and up to \$500 million in restructuring charges and restructuring-related expenses related to our current or future restructuring plans. As of June 30, 2018, we had \$400 million of the restructuring charge exclusion remaining. In addition, any cash litigation payments (net of any cash litigation receipts), as defined by the 2017 Facility, are excluded from the calculation of consolidated EBITDA, as defined in the 2017 Facility, provided that the sum of any excluded net cash litigation payments does not exceed \$2.624 billion in the aggregate. As of June 30, 2018, we had \$1.526 billion of the legal exclusion remaining.

Any inability to maintain compliance with these covenants could require us to seek to renegotiate the terms of our credit facility or seek waivers from compliance with these covenants, both of which could result in additional borrowing costs. Further, there can be no assurance that our lenders would agree to such new terms or grant such waivers on terms acceptable to us. In this case, all credit facility commitments would terminate and any amounts borrowed under the facility would become immediately due and payable. Furthermore, any termination of our credit facility may negatively impact the credit ratings assigned to our commercial paper program which may impact our ability to refinance any then outstanding commercial paper as it becomes due and payable.

Table of Contents

Commercial Paper

As of June 30, 2018, we had \$1.685 billion of commercial paper outstanding and \$1.197 billion outstanding as of December 31, 2017. Our commercial paper program is backed by the 2017 Facility, which allows us to have a maximum of \$2.250 billion in commercial paper outstanding. Outstanding commercial paper directly reduces borrowing capacity available under the 2017 Facility. As of June 30, 2018, the commercial paper issued and outstanding had a weighted average maturity of 46 days and a weighted average yield of 2.58 percent. As of December 31, 2017, the commercial paper issued and outstanding had a weighted average maturity of 38 days and a weighted average yield of 1.85 percent.

Senior Notes

We had senior notes outstanding of \$4.800 billion as of June 30, 2018 and \$4.400 billion as of December 31, 2017.

In February 2018, we completed an offering of \$1.000 billion in aggregate principal amount of 4.000% senior notes, due March 2028. We used a portion of the net proceeds from the offering to repay the \$600 million plus accrued interest of our 2.650% senior notes due in October 2018. The remaining proceeds were used to repay a portion of our outstanding commercial paper.

Our senior notes were issued in public offerings, are redeemable prior to maturity and are not subject to sinking fund requirements. Our senior notes are unsecured, unsubordinated obligations and rank on parity with each other. These notes are effectively junior to borrowings under our credit and security facility, and to the extent borrowed by our subsidiaries, to liabilities of our subsidiaries (see Other Arrangements below).

Other Arrangements

As of June 30, 2018 and December 31, 2017, we maintained a \$400 million credit and security facility secured by our U.S. trade receivables maturing in February 2019. We had no outstanding borrowings as of June 30, 2018 and December 31, 2017 under our credit and security facility.

We have accounts receivable factoring programs in certain European countries and with commercial banks in Japan which include promissory notes discounting programs. We account for our factoring programs as sales under FASB ASC Topic 860, Transfers and Servicing. We have no retained interest in the transferred receivables, other than collection and administration, and once sold, the accounts receivable are no longer available to satisfy creditors in the event of bankruptcy. Amounts de-recognized for accounts and notes receivable, which are excluded from Trade accounts receivable, net in the accompanying unaudited condensed consolidated balance sheets, are aggregated by contract denominated currency below (in millions):

Factoring Arrangements	As of June 30, 2018			As of December 31, 2017		
	Capacity (1)	Amount De-recognized	Average Interest Rate	Capacity (1)	Amount De-recognized	Average Interest Rate
Euro denominated	\$442	\$ 161	1.5 %	\$456	\$ 171	1.8 %
Yen denominated (2)	\$470	\$ 216	0.5 %	\$195	\$ 157	1.3 %

(1) The capacities are translated from local currency to U.S. dollar using the spot rates on the last business day of each period.

The factoring arrangements denominated in Japanese yen consist of two arrangements, one with a maximum (2) capacity of 22.000 billion yen, which has been discontinued as of June 30, 2018, and a new arrangement with a maximum capacity of 30.000 billion yen entered into during March 2018.

Debt Covenants Compliance

As of and through June 30, 2018, we were in compliance with all the required covenants related to our debt obligations. For additional information regarding the terms of our debt agreements, refer to Note E - Borrowings and Credit Arrangements of the consolidated financial statements in our most recent Annual Report on Form 10-K.

NOTE F – RESTRUCTURING-RELATED ACTIVITIES

2016 Restructuring Plan

On June 6, 2016, our Board of Directors approved and we committed to a restructuring initiative (the 2016 Restructuring Plan). The 2016 Restructuring Plan is intended to develop global commercialization, technology and manufacturing capabilities in key growth markets and build on our Plant Network Optimization (PNO) strategy, which is intended to simplify our manufacturing plant structure by transferring certain production lines among facilities and expanding operational efficiencies in support of our

Table of Contents

operating income margin goals. Key activities under the 2016 Restructuring Plan include strengthening global infrastructure through evolving global real estate assets and workplaces, developing global commercial and technical competencies, enhancing manufacturing and distribution expertise in certain regions and continuing implementation of our PNO strategy. These activities were initiated in the second quarter of 2016 and are expected to be substantially complete by the end of 2018. We revised the original estimate for the costs and savings associated with the program in the first quarter of 2018, as approved by the Board of Directors.

The following table provides a summary of our estimates of costs associated with the 2016 Restructuring Plan by major type of cost:

Type of cost	Total Estimated Amount Expected to be Incurred
Restructuring charges:	
Termination benefits	\$105 million to \$115 million
Other (1)	\$35 million to \$60 million
Restructuring-related expenses:	
Other (2)	\$135 million to \$150 million
	\$275 million to \$325 million

(1) Consists primarily of consulting fees and costs associated with contract cancellations.

(2) Comprised of other costs directly related to the 2016 Restructuring Plan, including program management, accelerated depreciation, fixed asset write-offs and costs to transfer product lines among facilities.

Approximately \$250 million to \$300 million of these charges are estimated to result in cash outlays.

The following presents these costs (credits) by major type and line item within our accompanying unaudited condensed consolidated statements of operations (in millions):

Three Months Ended June 30, 2018	Termination Benefits	Transfer Costs	Other	Total
Restructuring charges (credits)	\$ 2	\$ —	\$ 2	\$ 5
Restructuring-related expenses:				
Cost of products sold	—	16	—	16
Selling, general and administrative expenses	—	—	(5)	(5)
	—	16	(5)	11
	\$ 2	\$ 16	\$ (3)	\$ 15

The following table presents cumulative restructuring and restructuring-related charges as of June 30, 2018, by major type:

(in millions)	2016 Restructuring Plan
Termination benefits	\$ 63
Other (1)	18
Total restructuring charges	82
Transfer costs	83
Other (2)	19
Restructuring-related expenses	102
	\$ 184

(1) Consists primarily of consulting fees and costs associated with contract cancellations.

(2) Comprised of other costs directly related to our Restructuring Plan, including program management, accelerated depreciation, fixed asset write-offs and costs to transfer product lines among facilities.

Cash payments were made using cash generated from operations and are comprised of the following:

(in millions)	2016 Restructuring Plan

NOTE H – INCOME TAXES

Our effective tax rate from continuing operations is presented below:

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2018	2017	2018	2017
Effective tax rate from continuing operations	(60.3)%	(60.3)%	(27.3)%	(10.1)%

The change in our reported tax rates for the first six months of 2018, as compared to the same period in 2017, relates primarily to the impact of certain receipts and charges that are taxed at different rates than our effective tax rate, including intangible asset impairment charges, acquisition-related items, restructuring items, litigation-related items, as well as certain discrete tax items including the effective settlement of our transfer pricing dispute with the Internal Revenue Service (IRS) for the 2001 through 2010 tax years and the impacts of the Tax Cuts and Jobs Act (TCJA), enacted on December 22, 2017.

On June 6, 2018, a decision was entered by the United States Tax Court resolving all disputes related to the transfer pricing issues for Guidant Corporation's 2001 through 2006 tax years and our 2006 and 2007 tax years as well as the tax issues related to our 2006 transaction with Abbott Laboratories. Additionally, on May 24, 2018, we resolved all issues with the IRS Office of Appeals for our 2008 through 2010 tax years, including the transfer pricing issue and other unrelated issues. The final settlement calculation included certain elections made in these relevant years and resulted in a final net tax payment of \$303 million plus \$307 million

Table of Contents

of estimated interest, which was remitted to the IRS on June 15, 2018. Due to the final settlement of these disputes, we recorded a net tax benefit of \$250 million as of June 30, 2018.

We currently expect to resolve the IRS examination of our 2011 through 2013 tax years before the end of 2018. We expect that the exam will be concluded utilizing the same transfer pricing methodologies employed in the 2001 through 2010 tax years. We believe we have recorded sufficient reserves with respect to these periods and therefore do not expect to recognize any additional charges related to the resolution of the 2011 through 2013 tax years.

As of June 30, 2018, we had \$506 million of gross unrecognized tax benefits, of which a net \$432 million, if recognized, would affect our effective tax rate. As of December 31, 2017, we had \$1.238 billion of gross unrecognized tax benefits, of which a net \$1.150 billion, if recognized, would affect our effective tax rate. The change in our gross unrecognized tax benefit is primarily related to reaching settlements with tax authorities.

We recognize interest and penalties related to income taxes as a component of income tax expense. We had \$78 million accrued for gross interest and penalties as of June 30, 2018 and \$655 million as of December 31, 2017. The change in our accrued interest and penalties is primarily related to reaching settlements with tax authorities. We recognized net tax expense related to interest and penalties of \$2 million in the second quarter of 2018, \$13 million in the second quarter of 2017, \$19 million during the first six months of 2018 and \$26 million during the first six months of 2017.

It is reasonably possible that within the next 12 months we will resolve multiple issues with foreign, federal and state taxing authorities, in which case we could record a reduction in our balance of unrecognized tax benefits of up to approximately \$221 million.

There are a number of key provisions under the TCJA that impact us and we continue to monitor and analyze the ramifications of the new law as the implementation is executed. The final impact of the TCJA may differ from the estimates reported due to, among other things, changes in interpretations and assumptions made by us, additional guidance that may be issued by the U.S. Department of the Treasury and actions that we may take as a result. The TCJA reduces the US Federal corporate income tax rate from 35 percent to 21 percent, requires companies to pay a one-time transition tax on earnings of certain foreign subsidiaries that were previously tax deferred, and creates new taxes on certain foreign sourced earnings. Due to insufficient guidance, as well as the availability of information to accurately analyze the impact of the TCJA, we have made a reasonable estimate of the effects, as described below, and in other cases we have not been able to make a reasonable estimate and continue to account for those items based on our existing accounting under FASB ASC Topic 740, Income Taxes and the provisions of the tax laws that were in effect immediately prior to enactment. In the second quarter of 2018, we recognized an additional tax benefit of \$28 million related to settling our transfer pricing dispute with the IRS. In the first six months of 2018, we recognized an additional tax benefit of \$37 million, resulting in a total provisional estimate of \$824 million related to the TCJA.

We are required to record deferred tax assets and liabilities based on the enacted tax rates at which they are expected to reverse in the future. Therefore, any U.S. related deferred taxes were re-measured from 35 percent down to 21 percent based on the recorded balances as of December 31, 2017. The analysis included a preliminary assessment on the deductibility of certain amounts for which deferred tax assets may have been recorded. However, we are still analyzing certain aspects of the TCJA and refining our calculations based on the available information, which could potentially affect the measurement of these balances or give rise to new deferred tax amounts. As of June 30, 2018, we have not adjusted our provisional estimate related to re-measurement of our deferred tax balances. As of December 31, 2017, we recorded an estimated tax benefit of approximately \$99 million.

We are required to calculate a one-time transition tax based on our total post-1986 foreign earnings and profits (E&P) that we previously deferred from U.S. income taxes. As a result of settling our various tax audits, the revised

provisional amount of transition tax is approximately \$866 million. We anticipate offsetting this liability against existing tax attributes reducing the required payment to approximately \$506 million, which will be remitted over an eight-year period. We remitted the first estimated installment payment in the second quarter of 2018. We have not yet completed our calculation of the total post-1986 E&P for these foreign subsidiaries, and we continue to refine the analysis. We expect that our undistributed foreign earnings as of December 31, 2017 will remain indefinitely reinvested in our foreign operations. Accordingly, no income taxes beyond the federal and state impact of the transition tax have been provided for these undistributed foreign earnings or any additional outside basis difference inherent in these entities. Determining the amount of unrecognized deferred tax liability related to any remaining undistributed foreign earnings and additional outside basis difference in these entities is not practicable.

We are subject to a territorial tax system under the TCJA, in which we are required to provide for tax on Global Intangible Low Taxed Income (GILTI) earned by certain foreign subsidiaries. Additionally, we are required to make an accounting policy election to either recognize deferred taxes for temporary basis differences expected to reverse as GILTI in future years or provide for the tax expense related to GILTI in the year the tax is incurred as a period expense. As of June 30, 2018, we are still evaluating the

Table of Contents

effects of the GILTI provisions as guidance and interpretations continue to emerge. Therefore, we have not determined our accounting policy on the GILTI provisions. However, Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 118 requires that we reflect the impact of the GILTI provisions as a period expense until the accounting policy is finalized. Therefore, we have included the provisional estimate of GILTI related to current-year operations in our estimated annual effective tax rate only and will be updating the impact and accounting policy as the analysis related to the GILTI provisions is completed.

NOTE I – COMMITMENTS AND CONTINGENCIES

The medical device market in which we primarily participate is largely technology driven. As a result, intellectual property rights, particularly patents and trade secrets, play a significant role in product development and differentiation. Over the years, there has been litigation initiated against us by others, including our competitors, claiming that our current or former product offerings infringe patents owned or licensed by them. Intellectual property litigation is inherently complex and unpredictable. In addition, competing parties frequently file multiple suits to leverage patent portfolios across product lines, technologies and geographies and to balance risk and exposure between the parties. In some cases, several competitors are parties in the same proceeding, or in a series of related proceedings, or litigate multiple features of a single class of devices. These forces frequently drive settlement not only for individual cases, but also for a series of pending and potentially related and unrelated cases. Although monetary and injunctive relief is typically sought, remedies and restitution are generally not determined until the conclusion of the trial court proceedings and can be modified on appeal. Accordingly, the outcomes of individual cases are difficult to time, predict or quantify and are often dependent upon the outcomes of other cases in other geographies.

During recent years, we successfully negotiated closure of several long-standing legal matters and have received favorable rulings in several other matters; however, there continues to be outstanding intellectual property litigation. Adverse outcomes in one or more of these matters could have a material adverse effect on our ability to sell certain products and on our operating margins, financial position, results of operations and/or liquidity.

In the normal course of business, product liability, securities and commercial claims are asserted against us. Similar claims may be asserted against us in the future related to events not known to management at the present time. We maintain an insurance policy providing limited coverage against securities claims and we are substantially self-insured with respect to product liability claims and fully self-insured with respect to intellectual property infringement claims. The absence of significant third-party insurance coverage increases our potential exposure to unanticipated claims or adverse decisions. Product liability claims, securities and commercial litigation and other legal proceedings in the future, regardless of their outcome, could have a material adverse effect on our financial position, results of operations and/or liquidity.

In addition, like other companies in the medical device industry, we are subject to extensive regulation by national, state and local government agencies in the U.S. and other countries in which we operate. From time to time we are the subject of qui tam actions and governmental investigations often involving regulatory, marketing and other business practices. These qui tam actions and governmental investigations could result in the commencement of civil and criminal proceedings, substantial fines, penalties and administrative remedies and have a material adverse effect on our financial position, results of operations and/or liquidity.

In accordance with FASB ASC Topic 450, Contingencies, we accrue anticipated costs of settlement, damages, losses for product liability claims and, under certain conditions, costs of defense, based on historical experience or to the extent specific losses are probable and estimable. Otherwise, we expense these costs as incurred. If the estimate of a probable loss is a range and no amount within the range is more likely, we accrue the minimum amount of the range.

Our accrual for legal matters that are probable and estimable was \$1.264 billion as of June 30, 2018 and \$1.612 billion as of December 31, 2017 and includes certain estimated costs of settlement, damages and defense. A portion of our legal accrual is funded and included in our restricted cash and restricted cash equivalent balances of \$787 million as of June 30, 2018 and \$829 million as of December 31, 2017, as disclosed in Note G – Supplemental Balance Sheet Information. Litigation-related net charges (credits) were immaterial in the second quarter and first six months of 2018. We recorded litigation-related net charges of \$205 million in the second quarter of 2017 and \$208 million in the first six months of 2017. We continue to assess certain litigation and claims to determine the amounts, if any, that management believes will be paid as a result of such claims and litigation and, therefore, additional losses may be accrued and paid in the future, which could materially adversely impact our operating results, cash flows and/or our ability to comply with our debt covenants.

Table of Contents

In management's opinion, we are not currently involved in any legal proceedings other than those disclosed in our most recent Annual Report on Form 10-K, our Quarterly Report on Form 10-Q for the period ended March 31, 2018 and those specifically identified below, which, individually or in the aggregate, could have a material adverse effect on our financial condition, operations and/or cash flows. Unless included in our legal accrual or otherwise indicated below, a range of loss associated with any individual material legal proceeding cannot be estimated.

Patent Litigation

On November 20, 2017, The Board of Regents, University of Texas System (UT) and TissueGen. Inc., served a lawsuit against us in the Western District of Texas. The complaint against us alleges patent infringement of two U.S. patents owned by UT, relating to "Drug Releasing Biodegradable Fiber Implant" and "Drug Releasing Biodegradable Fiber for Delivery of Therapeutics," and affects the manufacture, use and sale of our Synergy™ Stent System. On March 12, 2018, the court dismissed the action and transferred it to the United States District Court for the District of Delaware. UT has appealed the decision.

Product Liability Litigation

As of July 24, 2018, approximately 49,500 product liability cases or claims related to transvaginal surgical mesh products designed to treat stress urinary incontinence and pelvic organ prolapse have been asserted against us. The pending cases are in various federal and state courts in the U.S. and include eight putative class actions. There were also fewer than 25 cases in Canada, inclusive of one certified and three putative class actions and fewer than 25 claims in the United Kingdom. Generally, the plaintiffs allege personal injury associated with use of our transvaginal surgical mesh products. The plaintiffs assert design and manufacturing claims, failure to warn, breach of warranty, fraud, violations of state consumer protection laws and loss of consortium claims. Over 3,100 of the cases have been specially assigned to one judge in state court in Massachusetts. On February 7, 2012, the Judicial Panel on Multi-District Litigation (MDL) established MDL-2326 in the U.S. District Court for the Southern District of West Virginia and transferred the federal court transvaginal surgical mesh cases to MDL-2326 for coordinated pretrial proceedings. During the fourth quarter of 2013, we received written discovery requests from certain state attorneys general offices regarding our transvaginal surgical mesh products. We have responded to those requests. As of July 24, 2018, we have entered into master settlement agreements in principle or are in the final stages of entering one with certain plaintiffs' counsel to resolve an aggregate of approximately 48,000 cases and claims. These master settlement agreements provide that the settlement and distribution of settlement funds to participating claimants are conditional upon, among other things, achieving minimum required claimant participation thresholds. Of the approximately 48,000 cases and claims, approximately 27,000 have met the conditions of the settlement and are final. All settlement agreements were entered into solely by way of compromise and without any admission or concession by us of any liability or wrongdoing.

We have established a product liability accrual for known and estimated future cases and claims asserted against us as well as with respect to the actions that have resulted in verdicts against us and the costs of defense thereof associated with our transvaginal surgical mesh products. While we believe that our accrual associated with this matter is adequate, changes to this accrual may be required in the future as additional information becomes available. While we continue to engage in discussions with plaintiffs' counsel regarding potential resolution of pending cases and claims and intend to vigorously contest the cases and claims asserted against us, that do not settle, the final resolution of the cases and claims is uncertain and could have a material impact on our results of operations, financial condition and/or liquidity. Initial trials involving our transvaginal surgical mesh products have resulted in both favorable and unfavorable judgments for us. We do not believe that the judgment in any one trial is representative of potential outcomes of all cases or claims related to our transvaginal surgical mesh products.

Governmental Investigations and Qui Tam Matters

On February 23, 2015, a judge for the Court of Modena (Italy) ordered a trial for Boston Scientific SpA and three of its employees, as well as numerous other defendants charged in criminal proceedings. The charges arise from allegations that the defendants made improper donations to certain health care providers and other employees of the Hospital of Modena in order to induce them to conduct unauthorized clinical trials, as well as related government fraud in relation to the financing of such clinical trials. A trial began on February 24, 2016 and is ongoing. On November 10, 2017, the Court issued a ruling that convicted one Boston Scientific employee but acquitted two others, and levied a fine of €245 thousand against us and imposed joint and several civil damages of €620 thousand on all defendants. We continue to deny these allegations, timely appealed the decision on May 10, 2018 and intend to continue to defend ourselves vigorously.

Table of Contents

Other Proceedings

On May 16, 2018, Arthur Rosenthal et al., filed a plenary summons against Boston Scientific Corporation and Boston Scientific Limited the High Court of Ireland alleging that payments are due pursuant a transaction agreement regarding Labcoat Limited.

Refer to Note H – Income Taxes for information regarding our tax litigation.

Matters Concluded Since December 31, 2017

On October 28, 2016, the Regents of the University of California filed a patent infringement action against us in the U.S. District Court for the Northern District of California alleging that two U.S. patents (Lesh) owned by the Regents of the University of California are infringed by certain of our catheters and other devices used to treat atrial fibrillation. The Company and the Regents settled the matter, and the case was dismissed on June 20, 2018.

NOTE J – WEIGHTED AVERAGE SHARES OUTSTANDING

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
(in millions)	2018	2017	2018	2017
Weighted average shares outstanding - basic	1,380.5	1,369.8	1,378.5	1,367.6
Net effect of common stock equivalents	18.3	21.3	19.3	23.0
Weighted average shares outstanding - assuming dilution	1,398.9	1,391.1	1,397.8	1,390.6

The impact of stock options outstanding with exercise prices greater than the average fair market value of our common stock was immaterial for all periods presented.

We issued approximately two million shares of our common stock in the second quarter of 2018, one million shares of our common stock in the second quarter of 2017 and eight million shares of our common stock in the first six months of 2018 and 2017, following the exercise of underlying stock options, vesting of deferred stock units or purchases under our employee stock purchase plan. We did not repurchase any shares of our common stock during the first six months of 2018 or 2017.

NOTE K – SEGMENT REPORTING

We have three reportable segments comprised of MedSurg, Rhythm and Neuro, and Cardiovascular, which represent an aggregation of our operating segments.

Each of our reportable segments generates revenues from the sale of medical devices. We measure and evaluate our reportable segments based on segment net sales and operating income, excluding intersegment profits. In 2017, we updated our presentation of segment net sales and operating income to include the impact of foreign currency fluctuations, since our chief operating decision maker (CODM) reviews operating results both including and excluding the impact of foreign currency fluctuations, and the following presentation more closely aligns to our unaudited condensed consolidated financial statements. We exclude from segment operating income certain corporate-related expenses and certain transactions or adjustments that our CODM considers to be non-operational, such as amounts related to amortization expense, intangible asset impairment charges, acquisition-related items, restructuring and restructuring-related items and litigation-related items. Although we exclude these amounts from segment operating income, they are included in reported Income (loss) before income taxes on the unaudited condensed consolidated statements of operations and are included in the reconciliation below.

Table of Contents

Effective January 1, 2018, following organizational changes to align the company's business and organization structure focused on active implantable devices, we revised our reportable segments, in accordance with FASB ASC Topic 280, Segment Reporting. The revision reflects a reclassification of our Neuromodulation business from our MedSurg segment to our newly created Rhythm and Neuro segment. We have revised prior year amounts to conform to the current year's presentation (as denoted with an asterisk throughout *). There was no revision to operating segments or reporting units as a result of the organizational change.

A reconciliation of the totals reported for the reportable segments to the applicable line items in our accompanying unaudited condensed consolidated statements of operations is as follows:

(in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Net sales				
MedSurg*	\$751	\$680	\$1,462	\$1,321

	\$2,490	\$2,257	\$4,870	\$4,418
Emerging Markets (1)	\$276	\$226	\$531	\$434

Emerging Markets is defined as certain countries that we believe have strong growth potential based on their (1) economic conditions, healthcare sectors and our global capabilities. Currently, we include 20 countries in our definition of Emerging Markets.

We sell our products primarily through a direct sales force. In certain international markets, we sell our products through independent distributors. We consider revenue to be earned when all of the following criteria are met:

- We have a contract with a customer that creates enforceable rights and obligations,
- Promised products or services are identified,
- The transaction price, or the amount we expect to receive, is determinable and
- We have transferred control of the promised items to the customer.

Transfer of control is evidenced upon passage of title and risk of loss to the customer unless we are required to provide additional services. We treat shipping and handling costs performed after a customer obtains control of the good as a fulfillment cost and record these costs as a selling expense when incurred. We recognize revenue from consignment arrangements based on product usage, or implant, which indicates that the sale is complete. We recognize a receivable at the point in time we have an unconditional right to payment. Payment terms are typically 30 days in the U.S. but may be longer in international markets.

Deferred Revenue

We record a contract liability, or deferred revenue, when we have an obligation to provide a product or service to the customer and payment is received or due in advance of our performance. When we sell a device with a future service obligation, we defer revenue on the unfulfilled performance obligation and recognize this revenue over the related service period. Many of our Cardiac Rhythm Management (CRM) product offerings combine the sale of a device with our LATITUDE™ Patient Management System, which represents a future service obligation. Generally, we do not have observable evidence of the standalone selling price related to our future service obligations; therefore, we estimate the selling price using an expected cost plus a margin approach. We allocate the transaction price using the relative standalone selling price method. The use of alternative estimates could result in a different amount of revenue deferral.

Contract liabilities are classified within Other current liabilities and Other long-term liabilities on our accompanying unaudited condensed consolidated balance sheets. Our deferred revenue balance was \$384 million as of June 30, 2018 and \$411 million as of January 1, 2018. Our contractual liabilities are primarily composed of deferred revenue related to the LATITUDE Patient Management System. Revenue is recognized over the average service period which is based on device and patient longevity. We recognized revenue of \$26 million during the second quarter of 2018 and \$53 million during the first six months of 2018 that was included in the above January 1, 2018 contract liability balance. We have elected not to disclose the transaction price allocated to unsatisfied performance obligations when the original expected contract duration is one year or less. In addition, we have not identified material unfulfilled

performance obligations for which revenue is not currently deferred.

Variable Consideration

We generally allow our customers to return defective, damaged and, in certain cases, expired products for credit. We base our estimate for sales returns upon historical trends and record the amount as a reduction to revenue when we sell the initial product. In addition, we may allow customers to return previously purchased products for next-generation product offerings. For these transactions, we defer recognition of revenue on the sale of the earlier generation product based upon an estimate of the amount of product to be returned when the next-generation products are shipped to the customer. Uncertain timing of next-generation product approvals, variability in product launch strategies, product recalls and variation in product utilization all affect our estimates related to sales returns and could cause actual returns to differ from these estimates.

Table of Contents

We also offer sales rebates and discounts to certain customers. We treat sales rebates and discounts as a reduction of revenue and classify the corresponding liability as current. We estimate rebates for products where there is sufficient historical information available to predict the volume of expected future rebates. If we are unable to reasonably estimate the expected rebates, we record a liability for the maximum rebate percentage offered. We have entered certain agreements with group purchasing organizations to sell our products to participating hospitals at negotiated prices. We recognize revenue from these agreements following the same revenue recognition criteria discussed above.

Capitalized Contract Costs

We capitalize commission fees related to contracts with customers when the associated revenue is expected to be earned over a period that exceeds one year. Deferred commissions are primarily related to the sale of devices enabled with our LATITUDE™ Patient Management System. We have elected to expense commission costs when incurred for contracts with an expected duration of one year or less. Capitalized commission fees are amortized over the period the associated products or services are transferred. Similarly, we capitalize certain recoverable costs related to the delivery of the LATITUDE Remote Monitoring Service. These fulfillment costs are amortized over the average service period. Our total capitalized contract costs are immaterial to our unaudited condensed consolidated financial statements.

NOTE M – CHANGES IN OTHER COMPREHENSIVE INCOME

The following tables provide the reclassifications out of Other comprehensive income (loss), net of tax:

(in millions)	Foreign Currency Translation Adjustments	Unrealized Gains/Losses on Derivative Financial Instruments	Defined Benefit Pension Items/Other	Total
Balance as of March 31, 2018	\$ (22)	\$ (79)	\$ (27)	\$ (128)

Balance as of June 30, 2017	\$ (58)	\$ 31	\$ (4)	\$ (22)	\$(53)

Refer to Note D – Hedging Activities and Fair Value Measurements for further detail on the reclassifications related to derivatives.

We adopted Update No. 2016-01 in the first quarter of 2018, and as a result of adopting the standard, we recorded a cumulative effect adjustment to retained earnings for unrealized gains and losses for available-for-sale securities previously recorded to Accumulated other comprehensive income (loss), net of tax.

The gains and losses on defined benefit and pension related items before reclassifications and gains and losses on defined benefit and pension items reclassified from Accumulated other comprehensive income (loss), net of tax were reduced by immaterial income tax impacts in the second quarter and first six months of 2018 and 2017.

NOTE N – NEW ACCOUNTING PRONOUNCEMENTS

Periodically, new accounting pronouncements are issued by the FASB or other standard setting bodies. Recently issued standards typically do not require adoption until a future effective date. Prior to their effective date, we evaluate the pronouncements to determine the potential effects of adoption on our unaudited condensed consolidated financial statements.

Table of Contents

Standards to be Implemented

ASC Update No. 2016-02

In February 2016, the FASB issued ASC Update No. 2016-02, Leases (Topic 842). The purpose of Update No. 2016-02 is to increase the transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet, including those previously classified as operating leases under current U.S. GAAP and disclosing key information about leasing arrangements. Update No. 2016-02 is effective for annual periods beginning after December 15, 2018, including interim periods within those annual periods. Early adoption is permitted and a modified retrospective approach is required. While we are still in the process of determining the effect that the new standard will have on our financial position and results of operations, we expect to recognize additional assets and corresponding liabilities on our consolidated balance sheets, as a result of our operating lease portfolio as it exists at the date we adopt the new standard. Please refer to Note F - Lease and Other Purchase Obligations in our most recent Annual Report on Form 10-K for information regarding our most current lease activity. Additionally, we are in the process of implementing a new lease administration and lease accounting system, and updating our controls and procedures for maintaining and accounting for our lease portfolio under the new standard. As a result, we anticipate adopting the new standard on January 1, 2019.

ASC Update No. 2016-13

In June 2016, the FASB issued ASC Update No. 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The purpose of Update No. 2016-13 is to replace the current incurred loss impairment methodology for financial assets measured at amortized cost with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information, including forecasted information, to develop credit loss estimates. Update No. 2016-13 is effective for annual periods beginning after December 15, 2019, including interim periods within those annual periods. Early adoption is permitted for annual periods beginning after December 15, 2018. We are in the process of determining the effect that the adoption will have on our financial position and results of operations.

ASC Update No. 2018-09

In July 2018, the FASB issued ASC Update No. 2018-09, Codification Improvements. The purpose of Update No. 2018-09 is to clarify, correct errors in or make minor improvements to the Codification. The amendments make the Codification easier to understand and apply by eliminating inconsistencies and providing clarifications. The transition and effective date guidance is based on the facts and circumstances of each amendment. Some of the amendments in Update No. 2018-09 do not require transition guidance and are effective upon issuance. However, many of the amendments in Update No. 2018-09 do have transition guidance with an effective date of annual periods beginning after December 15, 2018. We are in the process of determining the effect that the adoption will have on our financial position and results of operations.

No other new accounting pronouncements, issued or effective, during the period had or are expected to have a material impact on our unaudited condensed consolidated financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

Boston Scientific Corporation is a global developer, manufacturer and marketer of medical devices that are used in a broad range of interventional medical specialties. Our mission is to transform lives through innovative medical solutions that improve the health of patients around the world. Our products and technologies are used to diagnose or treat a wide range of medical conditions, including cardiovascular, digestive, respiratory, urological, pelvic health and neurological conditions. We continue to innovate in these areas and are intent on extending our innovations into new geographies and high-growth adjacency markets. When used in this report, the terms, "we," "us," "our," and "the Company" mean Boston Scientific Corporation and its divisions and subsidiaries.

Financial Summary

Three Months Ended June 30, 2018

Our net sales for the second quarter of 2018 were \$2.490 billion, as compared to net sales of \$2.257 billion for the second quarter of 2017, an increase of \$233 million, or 10.3 percent. Our operational net sales, which exclude a 170 basis point impact of foreign currency fluctuations, increased \$196 million, or 8.6 percent, as compared to the same period in the prior year.¹ This increase in the second quarter of 2018 included operational net sales of \$15 million, with no prior year period related net sales, due to the acquisition of Symetis SA (Symetis) during the second quarter of 2017. Refer to Quarterly Results and Business Overview for a discussion of our net sales by global business.

Our reported net income for the second quarter of 2018 was \$555 million, or \$0.40 per diluted share. Our reported results for the second quarter of 2018 included certain charges and/or credits totaling \$13 million (after-tax), or \$0.01 per diluted share. Excluding these items, adjusted net income for the second quarter of 2018 was \$568 million, or \$0.41 per diluted share.¹

Our reported net income for the second quarter of 2017 was \$146 million, or \$0.11 per diluted share. Our reported results for the second quarter of 2017 included certain charges and/or credits totaling \$298 million (after-tax), or \$0.21 per diluted share. Excluding these items, adjusted net income for the second quarter of 2017 was \$444 million, or \$0.32 per diluted share.¹

¹Operational net sales, which exclude the impact of foreign currency fluctuations, and adjusted net income and adjusted net income per share, which exclude certain items required by generally accepted accounting principles in the United States (U.S. GAAP), are not prepared in accordance with U.S. GAAP and should not be considered in isolation from, or as a replacement for, the most directly comparable GAAP measure. Refer to Additional Information for a discussion of management's use of these non-GAAP financial measures.

Table of Contents

The following is a reconciliation of our results of operations prepared in accordance with U.S. GAAP to those adjusted results considered by management. Refer to Quarterly Results and Business Overview for a discussion of each reconciling item:

	Three Months Ended June 30, 2018	
(in millions, except per share data)	Net income	Impact per share
GAAP net income (loss)	\$555	\$0.40
Non-GAAP adjustments:		
Amortization expense	130	0.09
Intangible asset impairment charges	30	0.02
Acquisition-related net charges (credits)	9	0.01
Restructuring and restructuring-related net charges (credits)	13	0.01
Discrete tax items	(168)	(0.12)
Adjusted net income	\$568	\$0.41

	Three Months Ended June 30, 2017	
(in millions, except per share data)	Net income	Impact per share
GAAP net income (loss)	\$146	\$0.11
Non-GAAP adjustments:		
Amortization expense	121	0.09
Acquisition-related net charges (credits)	(1)	0.00
Restructuring and restructuring-related net charges (credits)	13	0.01
Litigation-related net charges (credits)	131	0.09
Investment impairment charges	34	0.02
Adjusted net income	\$444	\$0.32

Table of Contents

Six Months Ended June 30, 2018

Our net sales for the first six months of 2018 were \$4.870 billion, as compared to net sales of \$4.418 billion for the first six months of 2017, an increase of \$452 million, or 10.2 percent. Our operational net sales, which exclude a 280 basis point impact of foreign currency fluctuations, increased \$332 million, or 7.4 percent, as compared to the same period in the prior year.¹ This increase included operational net sales of approximately \$36 million in the first six months of 2018, with no prior year period related net sales, due to the acquisition of Symetis. Refer to Quarterly Results and Business Overview for a discussion of our net sales by global business.

Our reported net income for the first six months of 2018 was \$853 million, or \$0.61 per diluted share. Our reported results for the first six months of 2018 included certain charges and/or credits totaling \$170 million (after-tax), or \$0.12 per diluted share. Excluding these items, adjusted net income for the first six months of 2018 was \$1.023 billion, or \$0.73 per diluted share.¹

Our reported net income for the first six months of 2017 was \$436 million, or \$0.31 per diluted share. Our reported results for the first six months of 2017 included certain charges and/or credits totaling \$405 million (after-tax), or \$0.29 per diluted share. Excluding these items, adjusted net income for the first six months of 2017 was \$841 million, or \$0.60 per diluted share.¹

¹Operational net sales, which exclude the impact of foreign currency fluctuations, and adjusted net income and adjusted net income per share, which exclude certain items required by U.S. GAAP, are not prepared in accordance with U.S. GAAP and should not be considered in isolation from, or as a replacement for, the most directly comparable GAAP measure. Refer to Additional Information for a discussion of management's use of these non-GAAP financial measures.

Table of Contents

The following is a reconciliation of our results of operations prepared in accordance with U.S. GAAP to those adjusted results considered by management. Refer to Quarterly Results and Business Overview for a discussion of each reconciling item:

	Six Months Ended June 30, 2018	
(in millions, except per share data)	Net income (loss)	Impact per share

Acquisition-related net charges (credits)	29	0.02
Restructuring and restructuring-related net charges (credits)	35	0.02
Investment impairment charges	5	0.00
Discrete tax items	(177)	(0.13)
Adjusted net income	\$1,023	\$0.73

	Six Months Ended June 30, 2017	
(in millions, except per share data)	Net income (loss)	Impact per share
GAAP net income (loss)	\$436	\$0.31
Non-GAAP adjustments:		
Amortization expense	243	0.17
Acquisition-related net charges (credits)	(33)	(0.02)
Restructuring and restructuring-related net charges (credits)	28	0.02
Litigation-related net charges (credits)	133	0.10
Investment impairment charges	34	0.02
Adjusted net income	\$841	\$0.60

Cash used for operating activities was \$210 million for the first six months of 2018. As of June 30, 2018, we had total debt of \$6.493 billion, Cash and cash equivalents of \$208 million and a working capital deficit of \$825 million. Refer to Liquidity and Capital Resources for further discussion.

Table of Contents

Quarterly Results and Business Overview

The following section describes an overview of our product offerings and results of operations by business unit. For additional information on our businesses and their product offerings, see Item 1. Business of our most recent Annual Report on Form 10-K.

Net Sales

The following table provides our net sales by business and the relative change in growth on a reported basis and operational basis.

	Three Months Ended June 30,		Change

Effective January 1, 2018, following organizational changes to align the company's business and organization structure focused on active implantable devices, we revised our reportable segments, in accordance with FASB ASC Topic 280, Segment Reporting. The revision reflects a reclassification of our Neuromodulation business from our

Medical Surgical (MedSurg) segment to our newly created Rhythm and Neuro segment. We have revised prior year amounts to conform to the current year's presentation (as denoted with an asterisk throughout *). There was no revision to operating segments or reporting units as a result of the organizational change.

Table of Contents

MedSurg

Endoscopy

Our Endoscopy business develops and manufactures devices to diagnose and treat a broad range of gastrointestinal (GI) and pulmonary conditions with innovative, less invasive technologies.

Our net sales of Endoscopy products of \$442 million represented approximately 18 percent of our consolidated net sales for the second quarter of 2018. Our Endoscopy net sales increased \$42 million, or 10.6 percent, in the second quarter of 2018, as compared to the same period in the prior year. Our operational net sales, which exclude a 170 basis point impact of foreign currency fluctuations, increased 8.9 percent, as compared to the same period in the prior year. This year-over-year increase was primarily driven by growth in our hemostasis franchise featuring our Resolution 360™ Clips, our biliary franchise with both our SpyGlass™ DS Direct Visualization System and AXIOS™ Stent and Electrocautery Enhanced Delivery System, and our infection prevention products and pathology services.

Urology and Pelvic Health

Our Urology and Pelvic Health business develops and manufactures devices to treat various urological and pelvic conditions for both male and female anatomies, including kidney stones, benign prostatic hyperplasia, erectile dysfunction, male incontinence, pelvic floor disorders, abnormal uterine bleeding and uterine fibroids and polyps.

Our net sales of Urology and Pelvic Health products of \$308 million represented approximately 12 percent of our consolidated net sales for the second quarter of 2018. Urology and Pelvic Health net sales increased \$28 million, or 10.1 percent in the second quarter of 2018, as compared to the same period in the prior year. Our operational net sales, which exclude a 100 basis point impact of foreign currency fluctuations, increased 9.1 percent, as compared to the same period in the prior year. This year-over-year increase was primarily attributable to growth in sales of our kidney stone products, including our LithoVue™ Digital Flexible Ureteroscope, our men's health products, and our benign prostatic hyperplasia (BPH) business, including the Rezūm™ System purchased as part of our NxThera, Inc. acquisition on April 30, 2018.

Rhythm and Neuro

Cardiac Rhythm Management

Our Cardiac Rhythm Management (CRM) business develops and manufactures a variety of implantable devices that monitor the heart and deliver electricity to treat cardiac abnormalities.

Our net sales of CRM products of \$494 million represented approximately 20 percent of our consolidated net sales for the second quarter of 2018. Our net sales of CRM products increased \$15 million, or 3.0 percent, in the second quarter of 2018, as compared to the same period in the prior year. Our operational net sales, which exclude a 180 basis point impact of foreign currency fluctuations, increased 1.2 percent, as compared to the same period in the prior year. This year-over-year increase was primarily driven by strong growth across our defibrillator portfolio due to building momentum in the commercialization of our global HeartLogic™ Heart Failure (HF) Diagnostic and continued market penetration for our EMBLEM™ Subcutaneous Implantable Cardiac Defibrillator (S-ICD) System. Our defibrillator portfolio growth was partially offset by some market share loss in our pacemaker portfolio.

Electrophysiology

Our Electrophysiology business develops and manufactures less-invasive medical technologies used in the diagnosis and treatment of rate and rhythm disorders of the heart, including a broad portfolio of therapeutic and diagnostic catheters and variety of capital equipment used in the electrophysiology lab.

Our net sales of Electrophysiology products of \$79 million represented approximately three percent of our consolidated net sales for the second quarter of 2018. Our Electrophysiology net sales increased \$12 million, or 18.5 percent, in the second quarter of 2018, as compared to the same period in the prior year. Our operational net sales, which exclude a 270 basis point impact of foreign currency fluctuations, increased 15.8 percent, as compared to the same period in the prior year. This year-over-year increase was primarily driven by a continued global expansion of our next generation Rhythmia™ Mapping System, Rhythmia HDx™, along with Rhythmia-related therapeutic and diagnostic catheters, and accessories.

Table of Contents

Neuromodulation

Our Neuromodulation business develops and manufactures devices to treat various neurological movement disorders and manage chronic pain.

Our net sales of Neuromodulation products of \$202 million represented approximately eight percent of our consolidated net sales for the second quarter of 2018. Neuromodulation net sales increased \$48 million, or 31.5 percent, in the second quarter of 2018, as compared to the same period in the prior year. Our operational net sales, which exclude a 90 basis point impact of foreign currency fluctuations, increased 30.6 percent, as compared to the same period in the prior year. This year-over-year increase was primarily driven by the launch of Spectra WaveWriter™ Spinal Cord Stimulator (SCS) Systems in conjunction with the expansion of the our Vercise™ Deep Brain Stimulation (DBS) System in the U.S. combined with an increase in international sales.

Cardiovascular

Interventional Cardiology

Our Interventional Cardiology business develops and manufactures technologies for diagnosing and treating coronary artery disease and other cardiovascular disorders including structural heart conditions.

Our net sales of Interventional Cardiology products of \$662 million represented approximately 27 percent of our consolidated net sales for the second quarter of 2018. Our Interventional Cardiology net sales increased \$58 million, or 9.6 percent, in the second quarter of 2018, as compared to the same period in the prior year. Our operational net sales, which exclude a 200 basis point impact of foreign currency fluctuations, increased 7.6 percent, as compared to the same period in the prior year. This year-over-year increase was primarily driven by sales of our WATCHMAN™ Left Atrial Appendage Closure (LAAC) Technology, and our ACURATE™ transcatheter aortic valve replacement (TAVR) platform acquired as part of the Symetis acquisition in May 2017, along with our complex percutaneous coronary interventions (PCI) product offerings. Growth in the quarter was partially offset by declines in sales of our drug-eluting coronary stent (DES) product offerings.

Peripheral Interventions

Our Peripheral Interventions business develops and manufactures products used to diagnose and treat peripheral arterial diseases, including a broad line of medical devices used in percutaneous transluminal angioplasty (PTA) and peripheral vascular diseases, as well as products to diagnose, treat and ease various forms of cancer.

Our net sales of Peripheral Interventions products of \$304 million represented approximately 12 percent of our consolidated net sales for the second quarter of 2018. Our Peripheral Interventions net sales increased \$29 million, or 10.8 percent, in the second quarter of 2018, as compared to the same period in the prior year. Our operational net sales, which exclude a 210 basis point impact of foreign currency fluctuations, increased 8.7 percent, as compared to the same period in the prior year. This year-over-year increase was primarily driven by growth in our drug-eluting products, PTA balloon catheters, atherectomy technologies and interventional oncology product solutions.

Emerging Markets

As part of our strategic imperatives to drive global expansion, we are seeking to grow net sales and market share by expanding our global presence, including in Emerging Markets. We define Emerging Markets as including 20 countries that we believe have strong growth potential based on their economic conditions, healthcare sectors and our global capabilities. We have increased our investment in infrastructure in these countries in order to maximize

opportunities. Our Emerging Markets net sales represented 11.1 percent of our consolidated net sales in the second quarter of 2018 and 10.0 percent in the second quarter of 2017. In the second quarter of 2018, our Emerging Market net sales grew 22.0 percent on a reported basis and, excluding a 90 basis point impact of foreign currency fluctuations, grew 21.1 percent on an operational basis, both as compared to the same period in the prior year.

Table of Contents

Gross Profit

Our Gross profit was \$1.751 billion for the second quarter of 2018, \$1.625 billion for the second quarter of 2017, \$3.458 billion for the first six months of 2018 and \$3.136 billion for the first six months of 2017. The following is a reconciliation of our gross profit margins and a description of the drivers of the change from period to period:

	Three Months	Six Months
Gross profit margin - period ended June 30, 2017	72.0%	71.0%
Manufacturing cost reductions	0.8	1.2
Sales pricing and mix	(0.3)	0.1
Net impact of foreign currency	(1.6)	(1.8)
All other, including inventory changes and other period expense	(0.6)	0.5
Gross profit margin - period ended June 30, 2018	70.3%	71.0%

The primary factors contributing to the decrease in our gross profit margin during the second quarter of 2018, as compared to the same period in 2017, were the negative impacts from foreign currency fluctuations partially offset by the positive impacts of cost reductions resulting from our process improvement programs and restructuring programs. Gross profit margin remained relatively flat during the first six months of 2018, as compared to the same period in 2017.

Operating Expenses

The following table provides a summary of certain of our operating expenses:

	Three Months Ended June 30, 2018		2017		Six Months Ended June 30, 2018		2017	
	% of		% of		% of		% of	
(in millions)	\$	Net	\$	Net	\$	Net	\$	Net
	Sales		Sales		Sales		Sales	
Selling, general and administrative expenses	886	35.6%	815	36.0%	1,746	35.9%	1,609	36.4%
Research and development expenses	275	11.0%	244	10.8%	536	11.0%	480	10.9%
Royalty expense	17	0.7%	17	0.8%	35	0.7%	34	0.8%

Selling, General and Administrative (SG&A) Expenses

In the second quarter of 2018, our SG&A expenses increased \$71 million, or approximately nine percent, as compared to the second quarter of 2017 and were 40 basis points lower as a percentage of net sales. In the first six months of 2018, our SG&A expenses increased \$137 million, or approximately nine percent, as compared to the first six months of 2017 and were 50 basis points lower as a percentage of net sales. The decrease in SG&A as a percentage of sales was primarily driven by the benefit of our targeted initiatives focused on reducing SG&A, including end-to-end business process streamlining and automation, expansion of global shared services and leveraging global sourcing.

Research and Development (R&D) Expenses

We remain committed to advancing medical technologies and investing in meaningful R&D projects across our businesses. In the second quarter of 2018, our R&D expenses increased \$31 million, or approximately 13 percent, as compared to the second quarter of 2017. In the first six months of 2018, our R&D expenses increased \$56 million, or approximately 12 percent, as compared to the first six months of 2017. Our R&D expenses remained relatively flat at approximately 11 percent of net sales in the second quarter and first six months of 2018 and 2017. R&D expenses increased as a result of investments across our businesses in order to maintain a healthy pipeline of new products that

we believe will contribute to profitable sales growth.

Royalty Expense

Our Royalty expense was \$17 million in the second quarter of 2018 and 2017. In the first six months of 2018, our Royalty expense increased \$1 million, or approximately three percent, as compared to the first six months of 2017. Our Royalty expense remained relatively flat at approximately one percent of net sales in the second quarters and first six months of 2018 and 2017.

Table of Contents

Amortization Expense

Our Amortization expense was \$147 million in the second quarter of 2018, as compared to \$142 million in the second quarter of 2017 and \$288 million in the first six months of 2018, as compared to \$285 million in the first six months of 2017. Amortization expense is excluded by management for purposes of evaluating operating performance.

Intangible Asset Impairment Charges

We incurred Intangible asset impairment charges for technology-related intangible assets of \$34 million in the second quarter of 2018 and \$35 million in the first six months of 2018. We did not incur any Intangible asset impairment charges in the second quarter or first six months of 2017. Intangible asset impairment charges are excluded by management for purposes of evaluating operating performance.

Contingent Consideration Expense (Benefit)

We recorded a net benefit of \$4 million during the second quarter of 2018, a net benefit of \$24 million during the second quarter of 2017, a net expense of \$1 million during the first six months of 2018 and a net benefit of \$74 million during the first six months of 2017 related to the change in fair value of our contingent consideration liability. Refer to Note B – Acquisitions and Strategic Investments to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report on Form 10-Q for additional details related to our contingent consideration expenses. Contingent consideration expense (benefit) is excluded by management for purposes of evaluating operating performance.

Restructuring and Restructuring-related Activities

The following table provides a summary of our restructuring and restructuring-related charges:

	Three Months Ended June 30, 2018		Six Months Ended June 30, 2017	
(in millions)				
Total restructuring charges (credits)	\$5	\$ 1	\$18	\$ 5
Total restructuring-related charges (credits)	\$11	\$ 15	\$26	\$ 30

Restructuring and restructuring-related charges and credits are excluded by management for purposes of evaluating operating performance.

The 2016 Restructuring Plan is expected to result in total pre-tax charges of approximately \$275 million to \$325 million and reduce gross annual expenses by approximately \$165 million to \$175 million by the end of 2020 as plan benefits are realized. A substantial portion of these savings will be reinvested in strategic growth initiatives.

In association with our 2016 Restructuring Plan, we made cash payments of \$51 million during the first six months of 2018 and cumulative cash payments of \$148 million as of June 30, 2018.

Refer to Note F – Restructuring-related Activities to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report on Form 10-Q for additional details related to our restructuring plans.

Litigation-related net charges (credits)

Litigation-related net charges (credits) were immaterial in the second quarter of and first six months of 2018. We recorded litigation-related net charges of \$205 million in the second quarter of 2017 and \$208 million in the first six months of 2017 primarily related to transvaginal surgical mesh product liability cases and claims. Litigation-related net charges (credits) are excluded by management for purposes of evaluating operating performance. Refer to Note I – Commitments and Contingencies to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report on Form 10-Q for discussion of our material legal proceedings.

Table of Contents

Interest Expense

The following table provides a summary of our Interest expense and average borrowing rate:

(in millions)	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2018	2017	2018	2017
Interest expense	\$(57)	\$(58)	\$(119)	\$(115)

Average borrowing rate 3.6 % 3.9 % 3.8 % 3.9 %

Refer to Liquidity and Capital Resources and Note D – Hedging Activities and Fair Value Measurements and Note E – Borrowings and Credit Arrangements to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report on Form 10-Q for information regarding our debt obligations and related derivative instruments and hedging activities.

Other, net

The following are the components of Other, net:

(in millions)	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2018	2017	2018	2017
Interest income	\$1	\$—	\$2	\$1
Net foreign currency gain (loss)	(1)	(8)	(9)	(8)
Net gains (losses) on investments	11	(58)	(2)	(58)
Other income (expense), net	1	(10)	(1)	(13)
	\$12	\$(76)	\$(11)	\$(78)

Our net gains and losses on investments for second quarter and first six months of 2018 were immaterial. We recorded other-than-temporary impairment losses of \$53 million during the second quarter and first six months of 2017 equal to the difference between the carrying value of our investments and their fair value. The charges were recorded within the Other, net caption of our unaudited condensed consolidated statements of operations.

Tax Rates

Our effective tax rate from continuing operations is presented below:

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2018	2017	2018	2017
Effective tax rate from continuing operations	(60.3)%	(60.3)%	(27.3)%	(10.1)%

The change in our reported tax rates for the first six months of 2018, as compared to the same period in 2017, relates primarily to the impact of certain receipts and charges that are taxed at different rates than our effective tax rate, including intangible asset impairment charges, acquisition-related items, restructuring items, litigation-related items, as well as certain discrete tax items including the effective settlement of our transfer pricing dispute with the Internal Revenue Service (IRS) for the 2001 through 2010 tax years and the impacts of the Tax Cuts and Jobs Act (TCJA), enacted on December 22, 2017.

On June 6, 2018, a decision was entered by the United States Tax Court resolving all disputes related to the transfer pricing issues for Guidant Corporation's 2001 through 2006 tax years and our 2006 and 2007 tax years as well as the tax issues related to our 2006 transaction with Abbott Laboratories. Additionally, on May 24, 2018, we resolved all issues with the IRS Office of Appeals for our 2008 through 2010 tax years, including the transfer pricing issue and other unrelated issues. The final settlement calculation included certain elections made in these relevant years and resulted in a final net tax payment of \$303 million plus \$307 million of estimated interest, which was remitted to the IRS on June 15, 2018. Due to the final settlement of these disputes, we recorded a net tax benefit of \$250 million as of June 30, 2018.

Table of Contents

We currently expect to resolve the IRS examination of our 2011 through 2013 tax years before the end of 2018. We expect that the exam will be concluded utilizing the same transfer pricing methodologies employed in the 2001 through 2010 tax years. We believe we have recorded sufficient reserves with respect to these periods and therefore do not expect to recognize any additional charges related to the resolution of the 2011 through 2013 tax years.

Refer to Note H – Income Taxes to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report on Form 10-Q for information regarding our tax litigation.

Critical Accounting Policies and Estimates

Our financial results are affected by the selection and application of accounting policies and methods. In the six months ended June 30, 2018, there were no changes to the application of critical accounting policies previously disclosed in our most recent Annual Report on Form 10-K with the exception of our critical accounting policies related to the adoption of FASB ASC Topic 606, Revenue from Contracts with Customers effective January 1, 2018, as described below.

Revenue Recognition

Post Implant Services

We provide non-contractual services to customers to ensure the safe and effective use of certain implanted devices. These promises are immaterial in the context of the contract. In accordance with FASB ASC Topic 606, because the revenue related to the immaterial services is recognized before they are delivered, we forward accrue the costs to provide these services at the time the devices are sold. We record these costs to SG&A expenses. We estimate the amount of time spent by our representatives performing these services and their compensation throughout the device life to determine the service cost. Changes to our business practice or the use of alternative estimates could result in a different amount of accrued cost. Refer to Note L – Revenue to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report on Form 10-Q for further information on our adoption of FASB ASC Topic 606.

Liquidity and Capital Resources

Based on our current business plan, we believe our existing balance of Cash and cash equivalents, future cash generated from operations, access to capital markets and existing credit facilities will be sufficient to fund our operations, invest in our infrastructure, pay our legal-related liabilities, pay taxes due, fund possible mergers and/or acquisitions and service and repay our existing debt for the next twelve months.

As of June 30, 2018, we had \$208 million of Cash and cash equivalents on hand, comprised of \$49 million invested in money market and government funds and \$159 million in interest bearing and non-interest bearing bank accounts. We invest excess cash on hand in short-term financial instruments that earn market interest rates while mitigating principal risk through instrument and counterparty diversification, as well as what we believe to be prudent instrument selection. We limit our direct exposure to securities in any one industry or issuer. We also have full access to our \$2.250 billion commercial paper program, which is backed by our 2017 revolving credit facility described below. As of June 30, 2018, we had \$1.685 billion in commercial paper debt outstanding resulting in an additional \$565 million of available liquidity and no amounts outstanding resulting in an additional \$400 million of available liquidity under our credit facility secured by our U.S. trade receivables both described below.

The following provides a summary and description of our net cash inflows (outflows):

(in millions)	Six Months	
	Ended June 30,	
	2018	2017
		(restated) [†]
Cash provided by (used for) operating activities	\$(210)	\$ 290

Cash provided by (used for) investing activities (664) (619)

Cash provided by (used for) financing activities 856 317

Certain prior year balances related to restricted cash have been reclassified to reflect our adoption of FASB ASC
† Update No. 2016-18, Statement of Cash Flows (Topic 230) - Restricted Cash in the fourth quarter of 2017. Please
refer to our most recent annual report on Form 10-K for additional details.

Table of Contents

Operating Activities

During the first six months of 2018, cash used for operating activities was \$210 million, as compared to cash provided by operating activities of \$290 million during the first six months of 2017, a decrease of \$500 million. The decrease was primarily due to payment of the IRS tax settlement.

Investing Activities

During the first six months of 2018, cash used for investing activities primarily included payments for acquisitions of businesses, net of cash acquired of \$418 million, purchases of property, plant and equipment of \$134 million and payments related to strategic investments and acquisitions of certain technologies of \$112 million, primarily related to our \$90 million investment in Millipede, Inc. During the first six months of 2017, cash used for investing activities primarily included payments for acquisitions of businesses, net of cash acquired of \$392 million, purchases of property, plant and equipment of \$180 million and payments related to strategic investments and acquisitions of certain technologies of \$47 million.

Financing Activities

Our cash flows for financing activities reflect issuances and repayments of debt, along with cash used to net share settle employee equity awards and stock issuances related to our equity incentive programs.

Debt

We had total debt of \$6.493 billion as of June 30, 2018 and \$5.616 billion as of December 31, 2017. The debt maturity schedule for the significant components of our long-term debt obligations is presented below:

(in millions, except interest rates)	Issuance Date	Maturity Date	As of		Semi-annual Coupon Rate
			June 30, 2018	December 31, 2017	
October 2018 Notes	August 2013	October 2018	—	††	2.650%
January 2020 Notes	December 2009	January 2020	850	850	6.000%
May 2020 Notes	May 2015	May 2020	600	600	2.850%
May 2022 Notes	May 2015	May 2022	500	500	3.375%
October 2023 Notes	August 2013	October 2023	450	450	4.125%
May 2025 Notes	May 2015	May 2025	750	750	3.850%
March 2028 Notes	February 2018	March 2028	1,000	—	4.000%
November 2035 Notes	November 2005	November 2035	350	350	7.000%
January 2040 Notes	December 2009	January 2040	300	300	7.375%
Unamortized Debt Issuance Discount and Deferred Financing Costs		2020 - 2040	(32) (24)
Unamortized Gain on Fair Value Hedges		2020 - 2023	32	38	
Capital Lease Obligation		Various	8	1	
Long-term debt			\$4,808	\$ 3,815	

As of December 31, 2017, \$600 million under the October 2018 Notes was outstanding and classified as short-term debt.

Note: The table above does not include unamortized amounts related to interest rate contracts designated as cash flow hedges.

Revolving Credit Facility

As of June 30, 2018 and December 31, 2017, we maintained a \$2.250 billion revolving credit facility (the 2017 Facility) with a global syndicate of commercial banks that matures on August 4, 2022. This facility provides backing for the commercial paper program described below. There were no amounts borrowed under our revolving credit facility as of June 30, 2018 and December 31, 2017.

Table of Contents

The 2017 Facility requires that we maintain certain financial covenants, as follows:

	Covenant Requirement as of June 30, 2018	Actual as of June 30, 2018
Maximum leverage ratio (1)	3.5 times	2.4 times
(1) Ratio of total debt to consolidated EBITDA, as defined by the credit agreement, for the preceding four consecutive fiscal quarters.		

The 2017 Facility provides for an exclusion from the calculation of consolidated EBITDA, as defined by the agreement, through maturity, of any non-cash charges and up to \$500 million in restructuring charges and restructuring-related expenses related to our current or future restructuring plans. As of June 30, 2018, we had \$400 million of the restructuring charge exclusion remaining. In addition, any cash litigation payments (net of any cash litigation receipts), as defined by the 2017 Facility, are excluded from the calculation of consolidated EBITDA, as defined in the 2017 Facility, provided that the sum of any excluded net cash litigation payments does not exceed \$2.624 billion in the aggregate. As of June 30, 2018, we had \$1.526 billion of the legal exclusion remaining.

Any inability to maintain compliance with these covenants could require us to seek to renegotiate the terms of our credit facility or seek waivers from compliance with these covenants, both of which could result in additional borrowing costs. Further, there can be no assurance that our lenders would agree to such new terms or grant such waivers on terms acceptable to us. In this case, all credit facility commitments would terminate and any amounts borrowed under the facility would become immediately due and payable. Furthermore, any termination of our credit facility may negatively impact the credit ratings assigned to our commercial paper program which may impact our ability to refinance any then outstanding commercial paper as it becomes due and payable.

Commercial Paper

As of June 30, 2018, we had \$1.685 billion of commercial paper outstanding and \$1.197 billion outstanding as of December 31, 2017. Our commercial paper program is backed by the 2017 Facility, which allows us to have a maximum of \$2.250 billion in commercial paper outstanding. Outstanding commercial paper directly reduces borrowing capacity available under the 2017 Facility. As of June 30, 2018, the commercial paper issued and outstanding had a weighted average maturity of 46 days and a weighted average yield of 2.58 percent. As of December 31, 2017, the commercial paper issued and outstanding had a weighted average maturity of 38 days and a weighted average yield of 1.85 percent.

Senior Notes

We had senior notes outstanding of \$4.800 billion as of June 30, 2018 and \$4.400 billion as of December 31, 2017.

In February 2018, we completed an offering of \$1.000 billion in aggregate principal amount of 4.000% senior notes, due March 2028. We used a portion of the net proceeds from the offering to repay the \$600 million plus accrued interest of our 2.650% senior notes due in October 2018. The remaining proceeds were used to repay a portion of our outstanding commercial paper.

Our senior notes were issued in public offerings, are redeemable prior to maturity and are not subject to sinking fund requirements. Our senior notes are unsecured, unsubordinated obligations and rank on parity with each other. These notes are effectively junior to borrowings under our credit and security facility, and to the extent borrowed by our subsidiaries, to liabilities of our subsidiaries (see Other Arrangements below).

Other Arrangements

As of June 30, 2018 and December 31, 2017, we maintained a \$400 million credit and security facility secured by our U.S. trade receivables maturing in February 2019. We had no outstanding borrowings as of June 30, 2018 and

December 31, 2017 under our credit and security facility.

Table of Contents

We have accounts receivable factoring programs in certain European countries and with commercial banks in Japan which include promissory notes discounting programs. We account for our factoring programs as sales under FASB ASC Topic 860, Transfers and Servicing. We have no retained interest in the transferred receivables, other than collection and administration, and once sold, the accounts receivable are no longer available to satisfy creditors in the event of bankruptcy. Amounts de-recognized for accounts and notes receivable, which are excluded from Trade accounts receivable, net in the accompanying unaudited condensed consolidated balance sheets, are aggregated by contract denominated currency below (in millions):

Factoring Arrangements	As of June 30, 2018			As of December 31, 2017		
	Capacity (1)	Amount De-recognized	Average Interest Rate	Capacity (1)	Amount De-recognized	Average Interest Rate
Euro denominated	\$442	\$ 161	1.5 %	\$456	\$ 171	1.8 %
Yen denominated (2)	\$470	\$ 216	0.5 %	\$195	\$ 157	1.3 %

(1) The capacities are translated from local currency to U.S. dollar using the spot rates on the last business day of each period.

The factoring arrangements denominated in Japanese yen consist of two arrangements, one with a maximum (2) capacity of 22.000 billion yen, which has been discontinued as of June 30, 2018, and a new arrangement with a maximum capacity of 30.000 billion yen entered into during March 2018.

As of and through June 30, 2018, we were in compliance with all the required covenants related to our debt obligations.

Equity

We received \$53 million during the first six months of 2018 and \$44 million during the first six months of 2017 in proceeds from stock issuances related to our stock option and employee stock purchase plans. Proceeds from the exercise of employee stock options and employee stock purchases vary from period to period based upon, among other factors, fluctuations in the trading price of our common stock and in the exercise and stock purchase patterns of our employees.

We did not repurchase any shares of our common stock during the first six months of 2018 and 2017. As of June 30, 2018, the remaining authorization to repurchase shares under our 2013 share repurchase program was \$535 million. Stock-based compensation expense related to our stock ownership plans was approximately \$68 million for the first six months of 2018 and \$62 million for the first six months of 2017.

Contractual Obligations and Commitments

Certain of our acquisitions involve the payment of contingent consideration. See Note B – Acquisitions and Strategic Investments to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report on Form 10-Q for further details regarding the estimated potential amount of future contingent consideration we could be required to pay associated with our acquisitions. There have been no other material changes to our contractual obligations and commitments as reported in our most recent Annual Report filed on Form 10-K.

Legal Matters

For a discussion of our material legal proceedings see Note I – Commitments and Contingencies to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report on Form 10-Q and Note J – Commitments and Contingencies to our audited financial statements contained in Item 8 of our most recent Annual Report on Form 10-K.

Recent Accounting Pronouncements

Information regarding new accounting pronouncements implemented since December 31, 2017 is included in Note A – Basis of Presentation and information regarding new accounting pronouncements to be implemented is included in Note N – New Accounting Pronouncements to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report on Form 10-Q.

Additional Information

Cybersecurity

We have established controls and procedures to escalate enterprise level issues, including cybersecurity matters, to the appropriate management levels within our organization and to members of our Board of Directors as appropriate. Under our framework, cybersecurity issues are analyzed by subject matter experts and a crisis committee for potential financial, operational, and

Table of Contents

reputational risks, based on, among other factors, the nature of the matter and breadth of impact. Matters determined to present potential material impacts to the Company's financial results, operations, and/or reputation are immediately reported by management to one or more members of the Board of Directors in accordance with our escalation framework. In addition, we have established procedures to ensure that management responsible for overseeing the effectiveness of disclosure controls is informed in a timely manner of known cybersecurity risks and incidents that may materially impact our operations and that timely public disclosure is made as appropriate.

Our directors and executive officers are subject to our Stock Trading Policy, which is designed to facilitate compliance with insider trading laws and governs transactions in our common stock and related derivative securities. Our policy designates certain regular periods, dictated by release of financial results, in which trading is restricted for individuals in information-sensitive positions, including directors and executive officers. In addition, additional periods of trading restriction may be imposed as determined by the President, General Counsel, or Chief Financial Officer in light of material pending developments. Further, during permitted windows, individuals in information-sensitive positions are required to seek pre-clearance for trades from the General Counsel, who assesses whether there are any important pending developments, including cybersecurity matters, which need to be made public before the individual may participate in the market.

Use of Non-GAAP Financial Measures

To supplement our unaudited condensed consolidated financial statements presented on a GAAP basis, we disclose certain non-GAAP financial measures, including adjusted net income (earnings) and adjusted net income (earnings) per share that exclude certain amounts and operational net sales growth that exclude the impact of foreign currency fluctuations. These non-GAAP financial measures are not in accordance with generally accepted accounting principles in the United States and should not be considered in isolation from or as a replacement for the most directly comparable GAAP financial measures. Further, other companies may calculate these non-GAAP financial measures differently than we do, which may limit the usefulness of those measures for comparative purposes.

To calculate adjusted net income (earnings) and adjusted net income (earnings) per share we exclude certain charges (credits) from GAAP net income, including amortization expense, intangible asset impairment charges, acquisition-related net charges (credits), restructuring and restructuring-related net charges (credits), litigation-related net charges (credits), certain investment impairment charges and certain discrete tax items. Amounts are tax effected at the company's effective tax rate, unless the amount is a significant unusual or infrequently occurring item in accordance with FASB ASC Topic 740-270-30, "General Methodology and Use of Estimated Annual Effective Tax Rate." Please refer to Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our most recent Annual Report filed on Form 10-K filed with the Securities and Exchange Commission (SEC) for an explanation of each of these adjustments and the reasons for excluding each item. The following is an explanation of each incremental or revised adjustment type that management excluded as part of these non-GAAP financial measures, since our most recent Annual Report on Form 10-K, as well as the reason for excluding each individual item:

Discrete tax items - These items represent adjustments of certain tax positions including those which a) are estimates as a result of the TCJA, enacted in December 2017, and, or b) were a benefit resulting from the finalization of the IRS Stipulation of Settled Issues consistent with the manner in which the tax reserves were originally booked. These adjustments are not indicative of expected on-going operating results. We exclude the impact of this charge from management's assessment of operating performance and from our operating segments' measures of profit and loss used for making operating decisions and assessing performance. Accordingly, management excluded these amounts for the purposes of calculating these non-GAAP financial measures to facilitate an evaluation of our current operating performance and a comparison to our past operating performance.

The GAAP financial measures most directly comparable to adjusted net income and adjusted net income per share are GAAP net income and GAAP net income per share.

To calculate operational net sales, which exclude the impact of foreign currency fluctuations, we convert actual net sales from local currency to U.S. dollars using constant foreign currency exchange rates in the current and prior period. The GAAP financial measure most directly comparable to operational net sales is net sales on a GAAP basis.

Reconciliations of each of these non-GAAP financial measures to the corresponding GAAP financial measure are included in Item 2 of this Quarterly Report on Form 10-Q beginning with our Financial Summary.

Table of Contents

Management uses these supplemental non-GAAP financial measures to evaluate performance period over period, to analyze the underlying trends in our business, to assess our performance relative to our competitors and to establish operational goals and forecasts that are used in allocating resources. In addition, management uses these non-GAAP financial measures to further its understanding of the performance of our operating segments. The adjustments excluded from our non-GAAP financial measures are consistent with those excluded from our operating segments' measures of net sales and profit or loss. These adjustments are excluded from the segment measures reported to our chief operating decision maker that are used to make operating decisions and assess performance.

We believe that presenting adjusted net income, adjusted net income per share that exclude certain amounts and operational net sales growth that exclude the impact of changes in foreign currency exchange rates, in addition to the corresponding GAAP financial measures, provides investors greater transparency to the information used by management for its operational decision-making and allows investors to see our results "through the eyes" of management. We further believe that providing this information assists our investors in understanding our operating performance and the methodology used by management to evaluate and measure such performance.

Safe Harbor for Forward-Looking Statements

Certain statements that we may make from time to time, including statements contained in this Quarterly Report on Form 10-Q and information incorporated by reference herein, constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements may be identified by words like "anticipate," "expect," "project," "believe," "plan," "may," "estimate," "intend" and similar words. These forward-looking statements are based on our beliefs, assumptions and estimates using information available to us at the time and are not intended to be guarantees of future events or performance. If our underlying assumptions turn out to be incorrect, or if certain risks or uncertainties materialize, actual results could vary materially from the expectations and projections expressed or implied by our forward-looking statements. As a result, readers are cautioned not to place undue reliance on any of our forward-looking statements. Except as required by law, we do not intend to update any forward-looking statements even if new information becomes available or other events occur in the future.

The forward-looking statements in this Quarterly Report on Form 10-Q are based on certain risks and uncertainties, including the risk factors described in Part I, Item 1A. Risk Factors in our most recent Annual Report on Form 10-K and the specific risk factors discussed below and in connection with forward-looking statements throughout this Quarterly Report on Form 10-Q, which could cause actual results to vary materially from the expectations and projections expressed or implied by our forward-looking statements. These factors, in some cases, have affected and in the future could affect our ability to implement our business strategy and may cause actual results to differ materially from those contemplated by the forward-looking statements. These additional factors include, among other things, future political, economic, competitive, reimbursement and regulatory conditions, new product introductions, demographic trends, intellectual property, litigation and governmental investigations, financial market conditions and future business decisions made by us and our competitors, all of which are difficult or impossible to predict accurately and many of which are beyond our control. We caution each reader of this Quarterly Report on Form 10-Q to consider carefully these factors.

The following are some of the important risk factors that could cause our actual results to differ materially from our expectations in any forward-looking statements. For further discussion of these and other risk factors, see Part I, Item 1A. Risk Factors in our most recent Annual Report on Form 10-K.

Our Businesses

Our ability to increase net sales, expand the market, capture market share and adapt to market volatility,

• The ongoing impact on our business of physician alignment to hospitals, governmental investigations and audits of hospitals and other market and economic conditions on the overall number of procedures performed,

• Competitive offerings and related declines in average selling prices for our products,

• The performance of and physician and patient confidence in, our products and technologies or those of our competitors,

• The impact and outcome of ongoing and future clinical trials and market studies undertaken by us, our competitors or other third parties or perceived product performance of our or our competitors' products,

• Variations in clinical results, reliability or product performance of our and our competitor's products,

50

Table of Contents

Our ability to acquire or develop, launch and supply new or next-generation products and technologies worldwide and in line with our commercialization strategies in a timely and successful manner and with respect to our recent acquisitions,

• The effect of consolidation and competition in the markets in which we do business or plan to do business,

• Disruption in the manufacture or supply of certain components, materials or products or the failure to secure in a timely manner alternative manufacturing or additional or replacement components, materials or products,

• Our ability to retain and attract key personnel,

- The impact of enhanced requirements to obtain regulatory approval in the U.S. and around the world, including the associated timing and cost of product approval, and

The impact of increased pressure on the availability and rate of third-party reimbursement for our products and procedures in the U.S. and around the world, including with respect to the timing and costs of creating and expanding markets for new products and technologies.

Regulatory Compliance, Litigation and Data Protection

The impact of healthcare policy changes and legislative or regulatory efforts in the U.S. and around the world to modify product approval or reimbursement processes, including a trend toward demonstrating clinical outcomes, comparative effectiveness and cost efficiency, as well as the impact of other healthcare reform legislation,

• Risks associated with our regulatory compliance and quality systems and activities in the U.S. and around the world, including meeting regulatory standards applicable to manufacturing and quality processes,

• Our ability to minimize or avoid future field actions or FDA warning letters relating to our products and processes and the ongoing inherent risk of potential physician advisories related to medical devices,

• The impact of increased scrutiny of and heightened global regulatory enforcement facing the medical device industry arising from political and regulatory changes, economic pressures or otherwise, including under U.S. Anti-Kickback Statute, U.S. False Claims Act and similar laws in other jurisdictions, U.S. Foreign Corrupt Practices Act (FCPA) and similar laws in other jurisdictions, and U.S. and foreign export control, trade embargo and customs laws,

• Costs and risks associated with litigation,

• The effect of our litigation and risk management practices, including self-insurance and compliance activities on our loss contingencies, legal provision and cash flows,

• The impact of, diversion of management attention as a result of and costs to cooperate with, litigate and/or resolve governmental investigations and our class action, product liability, contract and other legal proceedings,

• The possibility of failure to protect our intellectual property rights and the outcome of patent litigation, and

• Our ability to properly operate our information systems that support our business operations and protect our data integrity and products from a cyber-attack or other breach that has a material adverse effect on our business, reputation or results of operations.

Innovation and Certain Growth Initiatives

The timing, size and nature of our strategic growth initiatives and market opportunities, including with respect to our internal research and development platforms and externally available research and development platforms and technologies and the ultimate cost and success of those initiatives and opportunities,

Our ability to complete planned clinical trials successfully, obtain regulatory approvals and launch new and next generation products in a timely manner consistent with cost estimates, including the successful completion of projects from in-process research and development,

Table of Contents

Our ability to identify and prioritize our internal research and development project portfolio and our external investment portfolio on profitable revenue growth opportunities as well as to keep them in line with the estimated timing and costs of such projects and expected revenue levels for the resulting products and technologies,

Our ability to successfully develop, manufacture and market new products and technologies in a timely manner and the ability of our competitors and other third parties to develop products or technologies that render our products or technologies noncompetitive or obsolete,

The impact of our failure to succeed at our decision to discontinue, write-down or reduce the funding of any of our research and development projects, including in-process projects from in-process research and development, in our growth adjacencies or otherwise,

Dependence on acquisitions, alliances or investments to introduce new products or technologies and to enter new or adjacent growth markets and our ability to fund them or to fund contingent payments with respect to those acquisitions, alliances and investments, and

The failure to successfully integrate and realize the expected benefits from the strategic acquisitions, alliances and investments we have consummated or may consummate in the future.

International Markets

Our dependency on international net sales to achieve growth, including in emerging markets,

The impact of changes in our international structure and leadership,

The timing and collectability of customer payments, political and economic conditions (including the impact of the United Kingdom's exit from the EU, often referred to as "Brexit"), protection of our intellectual property, compliance with established and developing U.S. and foreign legal and regulatory requirements, including FCPA and similar laws in other jurisdictions and U.S. and foreign export control, trade embargo and customs laws, as well as changes in reimbursement practices and policies,

Our ability to maintain or expand our worldwide market positions in the various markets in which we compete or seek to compete, including through investments in product diversification and emerging markets such as Brazil, Russia, India and China,

Our ability to execute and realize anticipated benefits from our investments in emerging markets, and

The potential effect of foreign currency fluctuations and interest rate fluctuations on our net sales, expenses and resulting margins.

Liquidity

Our ability to generate sufficient cash flow to fund operations, capital expenditures, global expansion initiatives, any litigation settlements and judgments, share repurchases and strategic investments and acquisitions as well as maintaining our investment grade ratings and managing our debt levels and covenant compliance,

Our ability to access the public and private capital markets when desired and to issue debt or equity securities on terms reasonably acceptable to us,

• The unfavorable resolution of open tax matters, exposure to additional tax liabilities and the impact of changes in U.S. and international tax laws,

• The impact of examinations and assessments by domestic and international taxing authorities on our tax provision, financial condition or results of operations,

• The possibility of counterparty default on our derivative financial instruments,

• The impact of goodwill and other intangible asset impairment charges, including on our results of operations, and

Table of Contents

Our ability to collect outstanding and future receivables and/or sell receivables under our factoring programs.

Cost Reduction and Optimization Initiatives

Risks associated with significant changes made or expected to be made to our organizational and operational structure, pursuant to our 2016 Restructuring Plan as well as any further restructuring or optimization plans we may undertake in the future and our ability to recognize benefits and cost reductions from such programs and

Business disruption and employee distraction as we execute our global compliance program, restructuring and optimization plans and divestitures of assets or businesses and implement our other strategic and cost reduction initiatives.

Rule 10b5-1 Trading Plans by Executive Officers

Periodically, certain of our executive officers adopt written stock trading plans in accordance with Rule 10b5-1 under the Exchange Act and our own Stock Trading Policy. A Rule 10b5-1 Trading Plan is a written document that pre-establishes the amount, prices and dates (or formulas for determining the amounts, prices and dates) of future purchases or sales of our stock, including shares issued upon exercise of stock options or vesting of deferred stock units. These plans are entered into at a time when the person is not in possession of material non-public information about our company. We disclose details regarding individual Rule 10b5-1 Trading Plans on the Investor Relations section of our website.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We develop, manufacture and sell medical devices globally and our earnings and cash flows are exposed to market risk from changes in currency exchange rates and interest rates. We address these risks through a risk management program that includes the use of derivative financial instruments. We operate the program pursuant to documented corporate risk management policies. We do not enter derivative transactions for speculative purposes. Gains and losses on derivative financial instruments substantially offset losses and gains on underlying hedged exposures.

Furthermore, we manage our exposure to counterparty risk on derivative instruments by entering into contracts with a diversified group of major financial institutions and by actively monitoring outstanding positions.

Our currency risk consists primarily of foreign currency denominated firm commitments, forecasted foreign currency denominated intercompany and third-party transactions and net investments in certain subsidiaries. We use both nonderivative (primarily European manufacturing operations) and derivative instruments to manage our earnings and cash flow exposure to changes in currency exchange rates. We had currency derivative instruments outstanding in the contract amount of \$8.295 billion as of June 30, 2018 and \$5.923 billion as of December 31, 2017. A ten percent appreciation in the U.S. dollar's value relative to the hedged currencies would increase the derivative instruments' fair value by \$477 million as of June 30, 2018 as compared to \$321 million as of December 31, 2017. A ten percent depreciation in the U.S. dollar's value relative to the hedged currencies would decrease the derivative instruments' fair value by \$583 million as of June 30, 2018 as compared to \$421 million as of December 31, 2017. Any increase or decrease in the fair value of our currency exchange rate sensitive derivative instruments would be substantially offset by a corresponding decrease or increase in the fair value of the hedged underlying asset, liability or forecasted transaction, resulting in minimal impact on our unaudited condensed consolidated statements of operations.

Our interest rate risk relates primarily to U.S. dollar borrowings partially offset by U.S. dollar cash investments. We have historically used interest rate derivative instruments to manage our earnings and cash flow exposure to changes in interest rates. We had no interest rate derivative instruments outstanding as of June 30, 2018 and December 31, 2017. As of June 30, 2018, \$4.800 billion of our outstanding debt obligations were at fixed interest rates, representing approximately 74 percent of our total debt.

Refer to Note D – Hedging Activities and Fair Value Measurements to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report on Form 10-Q for further information regarding our derivative financial instruments.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer (CEO) and our Chief Financial Officer (CFO), evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2018 pursuant to Rule 13a-15(b) of the Securities Exchange Act of 1934, as amended (the Exchange Act). Disclosure controls and procedures are designed to ensure that material information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such material information is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure. Based on their evaluation, our CEO and CFO concluded that, as of June 30, 2018, our disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

We implemented certain controls related to the adoption of FASB ASC Topic 606, effective January 1, 2018. These controls were designed and implemented to ensure the completeness and accuracy over financial reporting. With the exception of the controls implemented for FASB ASC Topic 606, there were no changes in our internal control over financial reporting during the three and six month period ended June 30, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
