FOR ANNUAL AND TRANSITION REPORTS
PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

[X] ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE FISCAL YEAR ENDED DECEMBER 31, 2001

[_] TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE TRANSITION PERIOD FROM _______TO_________

Commission file number 001-11981

MUNICIPAL MORTGAGE & EQUITY, LLC
(Exact name of Registrant as Specified in Its Charter)

Delaware (State or Other Jurisdiction of Incorporation or Organization)	52-1449733 (I.R.S. Employer Identification No.)
218 North Charles Street, Suite 500 Baltimore, Maryland (Address of Principal Executive Offices)	21201 (Zip Code)

Registrant's telephone number, including area code: (443) 263-2900

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered
Common Shares	New York Stock Exchange, Inc.

Securities registered pursuant to Section 12(g) of the Act: Preferred Shares
Preferred Capital Distribution Shares

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES [x] NO [ ].

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [ ]

The aggregate market value of the Company's Common Shares held by non-affiliates of the registrant as of March 22, 2002 (computed by reference to the closing price of such shares on the New York Stock Exchange) was $605,000,208. The Company had 25,208,342 Common Shares outstanding as of March

22, 2002.

Portions of the Company's Proxy Statement with respect to the 2002 Annual Meeting of Shareholders to be filed subsequent to the date hereof are incorporated by reference Items 10, 11, 12 and 13 of Part III.

Forward Looking Information

Assumptions relating to various portions of the Company's Annual Report on Form 10_K involve judgments with respect to, among other things, future economic market conditions and future business decisions, all of which are difficult or impossible to predict accurately and many of which are beyond the control of the Company. Although the Company believes that the assumptions underlying the forward-looking information included herein are reasonable, any of the assumptions could be inaccurate and, therefore there can be no assurance that such forward-looking information will prove to be accurate. In light of the significant uncertainties inherent in forward-looking information, the inclusion of such information should not be regarded as a representation by the Company or any other person that the objectives and plans of the Company will be achieved.

Part I

Item 1. Description of Business.

General Development of Business.

Municipal Mortgage & Equity, LLC ("MuniMae") and its subsidiaries (together with MuniMae, the "Company") are principally engaged in originating, investing in and servicing investments related to multifamily housing and other real estate financings. A significant portion of the Company's investments are tax-exempt bonds, or interests in bonds, issued by state and local governments or their agencies or authorities to finance multifamily housing developments. Interest income from the majority of these investments is exempt for federal income tax purposes. Multifamily housing developments, as well as the rents paid by the tenants, secure these investments. Midland Financial Holdings, Inc. ("Midland"), a corporate subsidiary, is a fully integrated real estate investment firm that specializes in originating, investing in and servicing investments in the affordable multifamily housing industry. These investments generate taxable, not tax-exempt, income.

MuniMae is a Delaware limited liability company and is the successor to the business of SCA Tax Exempt Fund Limited Partnership (the "Partnership"), a closed-end limited partnership that was merged into MuniMae on August 1, 1996. As a limited liability company, the Company combines the limited liability, governance and management characteristics of a corporation with the pass-through income features of a partnership. Since MuniMae is classified as a partnership for federal income tax purposes, no recognition of income taxes is made at the corporate level (except for income earned through subsidiaries of the Company organized as corporations). Instead, the distributive share of MuniMae's income, deductions and credits is included in each shareholder's income tax return.

The Predecessor

The Partnership commenced operations in 1986 when it sold two series of Beneficial Assignee Certificates ("BACs"), representing the assignment of its limited partnership interests. The Partnership invested the $296 million of proceeds from the sale in 22 tax-exempt bonds (the "original bonds") and related working capital loans held in two separate pools, "Series I" and "Series II," corresponding with the related series of BACs. In a February 1995 financing (the "1995 Financing"), the Partnership raised $67.7 million through the sale of multifamily revenue bond receipts (the "Receipts") secured by newly refunded bonds (the "Refunding") issued in exchange for 11 of the original bonds and the cash stream from one additional bond. Effective December 31, 1997, the additional bond was released as additional collateral. Of the $67.7 million of proceeds, $5.0 million was invested in demand notes and the remainder, after expenses and working capital reserves, of $56.8 million has been principally

invested in additional tax-exempt bonds and other bond related investments.

The Merger

In connection with the August 1, 1996 merger of the Partnership into MuniMae (the "Merger"), the Partnership's BAC holders were given the opportunity to elect among three different securities of the Company for which to exchange their BACs: Preferred Shares, Preferred Capital Distribution Shares (collectively the "Preferred Shares") or Common Shares. The Preferred Shares were structured to give BAC holders a security substantially the same as their BACs as if the 1995 Financing had not occurred. Thus, the Preferred Shares

participate in their pro rata share of income from the 22 original bonds as they existed immediately after the Refunding and before the 1995 Financing. The Preferred Capital Distribution Shares (the "Preferred CD Shares") were structured to give their holders the income they would have received from their original BACs, but provided for a distribution of their pro rata share of the proceeds of the 1995 Financing. Thus, the Preferred CD Shares participate in their pro rata share of income from the 22 original bonds as they existed immediately after the Refunding and the 1995 Financing. The Common Shares, unlike either the Preferred Shares or Preferred CD Shares, were structured to enable their holders to participate in all of the income from investment of the proceeds of the 1995 Financing, as well as future financings, in addition to their pro rata share of the income from the original bonds as they existed immediately after the 1995 Financing. As a result of the election process, the holders of 8.09% of the outstanding BACs received Preferred Shares, the holders of 4.29% of the outstanding BACs received Preferred CD Shares and the holders of 86.62% of the outstanding BACs received Common Shares of the Company.

The Company is required to distribute to the holders of Preferred Shares and Preferred CD Shares cash flow attributable to such shares (as defined in the Company's Amended and Restated Certificate of Formation and Operating Agreement, the "Operating Agreement"). The Company is required to distribute 2.0% of the net cash flow to the holders of Term Growth Shares. Term Growth Shares were issued to the former general partners of the Partnership in exchange for their general partnership interests and to a Merrill Lynch Pierce Fenner & Smith Incorporated ("Merrill Lynch") affiliate in exchange for their subordinated BACs. The balance of the Company's cash flow is available for distribution to Common Shares and the Company's current policy is to distribute to Common Shareholders at least 80% of the cash flow associated with this income.

Preferred Share Redemptions

In accordance with the Company's Operating Agreement, the Preferred Shares and the Preferred CD Shares must be partially redeemed when any bond attributable to the shares is sold or, beginning in the year 2000, when any bond attributable to the shares reaches par value (which includes accrued but unpaid base interest under the original bond terms and accrued but unpaid interest under the then current bond terms) based on receipt of an appraisal securing the bond. The Company must redeem the Preferred Shares and Preferred CD Shares within six months of the occurrence of a redemption event. Four bonds attributable to Series I Preferred Shares and Preferred CD Shares and four bonds attributable to Series II Preferred Shares and Preferred CD Shares reached par value in December 2000. As a result, in June of 2001, the Company redeemed approximately 26% and 56% of the Series I and Series II Preferred Shares and Preferred CD Shares, respectively.

In addition to the bonds that reached par value in December 2000, the

remaining bonds attributable to the shares were either paid off, sold and/or reached par value during the last four months of 2001 and in January 2002. As a result, in March 2002, the Company redeemed the remaining Series I and Series II Preferred Shares and Preferred CD Shares at an aggregate cost of approximately $19.3 million. The Operating Agreement also requires that the Term Growth shares be redeemed after the last Preferred Share is redeemed. As a result, the Term Growth shares which had no residual value, were also redeemed in 2002.

Subsidiaries

MuniMae TE Bond Subsidiary, LLC

In 1999, the Company placed a substantial portion of its tax-exempt bonds and bond related investments in MuniMae TE Bond Subsidiary, LLC ("TE Bond Sub"), an indirect subsidiary of the Company. In May1999, TE Bond Sub sold to institutional investors $84 million of Series A Cumulative Preferred Shares ("Series A Preferred Shares"). In June 2000, TE Bond Sub sold to institutional investors $60 million of Series B Cumulative Preferred Shares ("Series B Preferred Shares"). In October 2001, TE Bond Sub sold to institutional investors $16 million of Series A-1 Cumulative Preferred Shares ("Series A-1 Preferred Shares") and $8 million of Series B-1 Subordinate Cumulative Preferred Shares ("Series B-1 Preferred Shares"; all four Series, collectively, the "TE Bond Preferred Shares").

The Series A and A-1 Preferred Shares bear interest at 6.875% and 6.30% per annum, respectively, or, if lower, the aggregate net income of the issuing company, TE Bond Sub. The Series A and A-1 Preferred Shares have a senior claim to the income derived from the investments owned by TE Bond Sub. The Series A-1 Preferred Shares are equal in priority of payment to the Series A Preferred Shares. The Series B and B-1 Preferred Shares bear interest at 7.75% and 6.80% per annum, respectively, or, if lower, the aggregate net income of the issuing company, TE Bond Sub, after payment of distributions to the Series A and Series A-1 Preferred Shares. The TE Bond Preferred Shares have a senior claim to the income derived from the investments owned by TE Bond Sub. Any income from TE Bond Sub available after payment of the cumulative distributions of the TE Bond Preferred Shares is allocated to the Company. The assets of TE Bond Sub and its subsidiaries, while indirectly controlled by MuniMae and thus included in the consolidated financial statements of MuniMae, are legally owned by TE Bond Sub and are not available to the creditors of MuniMae.

Midland

In October 1999 the Company acquired Midland for approximately $45 million. Of this amount, the Company paid approximately $23 million in cash and approximately $12 million in Common Shares at the closing of the transaction. In addition, $3.3 million in MuniMae Common Shares was payable annually over a three year period if Midland met certain performance targets, including an annual contribution to cash available for distribution ("CAD"). In December 2000, MuniMae paid approximately $3.3 million in Common Shares in consideration for Midland meeting its first year performance targets. In 2001, in order to increase MuniMae's flexibility in operating Midland, MuniMae agreed with the former owners of Midland that the payment of the 2001 and 2002 installments would no longer be conditioned on Midland meeting certain performance targets. In December 2001, MuniMae paid approximately $3.3 million in Common Shares and, subject to certain conditions, MuniMae expects to make the final payment of Common Shares having a value of approximately $3.3 million in December 2002.

Midland is a fully integrated real estate investment firm specializing in

providing financing to the affordable multifamily housing industry. Midland provides construction and permanent debt financing, mortgage servicing and asset management services to the multifamily housing industry. Midland is a Federal National Mortgage Association ("Fannie Mae") Delegated Underwriter and Servicer ("DUS") and a Federal Housing Administration approved mortgagee. Midland syndicates equity for investment in low income housing tax credits. Midland also syndicates equity and originates debt for investment in student/conventional housing, a unique and growing segment of the multifamily housing industry. A

subsidiary of Midland is a registered investment advisor with the Securities and Exchange Commission and a wholly owned special purpose subsidiary of Midland provides advisory services to pension funds. Midland currently manages approximately $350 million of pension fund money.

Business Segments

In October 1999, as a result of the Midland acquisition, the Company restructured its operations into two business segments: (1) an investing segment consisting of subsidiaries holding investments producing primarily tax-exempt interest income; and (2) an operating segment that primarily generates taxable interest income and, through corporate subsidiaries, fee income by providing servicing, loan origination and tax credit equity syndication services. The revenues associated with the investing segment consist of interest earned on tax-exempt bonds, other bond related investments and certain short-term taxable loans and investments. The revenues associated with the operating segment consist of loan servicing and loan origination fees for the Company's own portfolio and for portfolios of third parties, syndication and brokerage fees associated with the origination of tax credit syndications, taxable interest and fees earned on construction lending activities and other fee income. Segment results include all direct revenues and expenses of each segment and allocations of indirect expenses based on specific methodologies. The Company's reportable segments are strategic business units that primarily generate different income streams and are managed separately. The majority of the income generated by the operating segment was acquired as a unit and the management of such unit was retained.

For the years ended December 31, 2001 and 2000, the Company's revenues, net income and identifiable assets have been distributed among the following segments (in thousands):

	2001					
	Investing	Operating	Adjustments(1)	Total	Investing	Op
Revenues	$ 57,914	$ 68,669	($820)	$ 125,763	$ 46,064	$
Net Income						
Identifiable	19,312	7,390	($820)	25,882	29,136	
Assets	791,199	498,077	--	1,289,276	616,376	3

(1) Represents origination fees on purchased investments that are deferred and amortized into income over the life of the investment.

Prior to October 1999, all of the Company's operations were attributable to the investing segment.

Raising Capital

Capital is the raw material that enables the Company to fund its investments. In order to facilitate growth, the Company will require additional capital to pursue acquisition opportunities. The Company has primarily used two sources of capital: securitizations and equity offerings from MuniMae and certain subsidiaries. The most economically efficient way to fund future acquisitions is through securitizations, which the Company uses to leverage its investments; however, our securitizations can limit our flexibility in managing our assets and additional leverage increases the risk in our investment portfolio. As a result, the Company has decided that a conservative capital structure that avoids over-leveraging is the most prudent course to take. Therefore, the Company, through equity offerings, periodically decreases its outstanding off-balance-sheet debt to reduce leverage. Also, as a result of the Midland acquisition, the

Company has expanded its access to capital. Midland's syndication and pension fund investors are essentially alternative financing sources to securitizations, as are Fannie Mae and the Federal Home Mortgage Corporation ("Freddie Mac") through their multifamily securitization programs.

Securitizations

Through securitizations, the Company seeks to enhance its overall return on its investments and to generate proceeds that, along with equity offering proceeds, facilitate the acquisition of additional investments. The Company uses various programs to facilitate the securitization and credit enhancement of its bond investments. At December 31, 2001, the Company had on-balance sheet obligations of $213.4 million and off-balance sheet obligations of $334.2 million related to securitization transactions.

In order to facilitate the securitization of certain assets at higher leverage ratios than otherwise would be available to the Company without the posting of additional collateral, the Company has pledged additional bonds and taxable loans to a pool that acts as collateral for senior interests in certain securitization trusts and credit enhancement facilities. At December 31, 2001, the total carrying amount of the bonds and taxable loans pledged as collateral was $361.8 million.

The following is a description of the Company's various credit enhancement and securitization investment vehicles and a discussion of the activity in these programs during 2001.

The Company securitizes mortgage bonds in its portfolio through the Residual Interest Tax-Exempt Securities Receipts ("RITESSM")/Puttable Floating Option Tax-Exempt Receipts ("P-FLOATsSM") program offered by Merrill Lynch Pierce Fenner & Smith Incorporated ("Merrill Lynch"). Through this program, the Company sells bonds to Merrill Lynch or structures a transaction whereby Merrill Lynch buys bonds from third parties. Merrill Lynch deposits the bonds into trusts, which are created to hold these assets. Subsequently, these bonds are credit enhanced by Merrill Lynch. Two types of securities, P-FLOATsSM and RITESSM, are created for each asset deposited into the trusts. The P-FLOATsSM are short-term floating rate interests in the trusts that have priority on the cash flows of the deposited bonds and bear interest at rates that are reset weekly by the remarketing agent, Merrill Lynch. The P-FLOATsSM are sold to qualified third party investors. When Merrill Lynch buys the bond directly, the Company purchases the RITESSM. The RITESSM are the subordinate security and

receive the residual interest on the bond after the payment of all fees and the P-FLOATsSM interest. To the extent these transactions create interest rate risks, the Company enters into interest rate swap contracts designed to reduce, but not eliminate such risks.

During 2001 and 2000, the Company raised $180 million and $155 million, respectively, through securitizations of 12 and 11 tax-exempt bonds, respectively. The Company's effective annual costs of its P-FLOATsSM securitization was approximately 4.4% and 5.6%, at December 31, 2001 and 2000, respectively.

In March 1999, the Company consummated a transaction with an affiliate of Merrill Lynch that converted a $67.8 million portion of the Company's investment in the securitization trusts discussed above into a longer-term securitization facility. This transaction enabled the Company to (a) reduce its exposure to credit and annual renewal risks associated with the liquidity and credit enhancement features of the securitization ?trusts and the swap agreements, (b) reduce the annual financing costs and (c) eliminate the risk of receiving taxable net swap payments which serve to hedge tax-exempt investments (see discussion in Note 5 to the consolidated financial statements included herein). In July 2001, TE Bond Sub refinanced this longer-term securitization facility.

8

The result of the refinancing was a reduction of the outstanding debt by $22.0 million while all other terms of the debt remained the same (see further discussion in Note 5 to the consolidated financial statements). As a result of certain call provisions available to the subordinate certificate holders, the Company has accounted for this transaction as a borrowing. Accordingly, the senior certificates were recorded as long-term debt and the bonds associated with this transaction are included in investments in tax-exempt bonds. Prior to this transaction, these assets and liabilities had received sale treatment and therefore were off-balance sheet financing.

In December 2000 the Company closed a $100 million credit enhancement facility through Fannie Mae. The facility refinanced the short-term credit enhancement on approximately $70 million of the Company's existing securitization portfolio with long-term credit enhancement through Fannie Mae. The facility also provided credit enhancement to two of our previously unenhanced tax-exempt bonds having an aggregate fair market value of approximately $10 million at December 31, 2000. The new facility also replaced the credit enhancement on approximately $20 million of tax-exempt bonds that were previously credit enhanced by a credit facility provided through MMA Cap, LLC prior to December 2000.

The $100 million credit enhancement facility, which was completed through MMA Cap, LLC, a wholly owned subsidiary of the Company, is an open ended facility and will facilitate the placement of long term securitization capital, thereby enabling the Company to securitize its mortgage bonds at a fixed rate and for a term that more closely matches the term of the underlying bond. The MMA Cap credit enhancement facility was arranged through Midland and enables the Company to diversify its securitization capabilities. In order to provide credit enhancement to the bonds secured by this facility, the Company pledged additional investments to this facility.

In December 2001, the Company developed a tender option bond program with Freddie Mac. Through this program, the Company securitized 12 bonds with an aggregate unpaid principal balance of approximately $91.0 million and deposited the bonds into 12 trusts. Prior to this transaction, approximately $34.3 million of these bonds had been securitized through the P-FLOATsSM program. The trusts

issued approximately $69.0 million of fixed-rate senior certificates and approximately $22.0 million of fixed-rate subordinate certificates. The Company purchased the subordinate certificates and the senior certificates were sold to third party investors. The net proceeds to the Company upon completion of this transaction were approximately $34.7 million. Which represents $69.0 million in proceeds from the sale of the fixed-rate senior certificates less $34.3 million for the purchase of the bonds in the P-FLOATsSM program. To increase the attractiveness of the senior certificates to outside investors, Freddie Mac provided credit enhancement through a standby guaranty of payment and agreed to provide liquidity by lending the Company the money to repurchase the senior certificates at the remarketing date (if they are not successfully remarketed), which is five years from issuance. The Company agreed to pay Freddie Mac for the first $22.0 million of losses if any of the bonds fail to generate sufficient income to pay the senior certificate holders, and the Company pledged our subordinate certificates to Freddie Mac to secure this obligation. Freddie Mac's recourse to the Company for losses on the credit enhancement is limited to its right to liquidate the subordinate certificates.

Recent Public Offerings

On February 8, 2002, the Company sold to the public 3.0 million Common Shares at a price of $24.70 per share and granted the underwriters an option to purchase up to an aggregate of 450,000 Common Shares to cover over-allotments at the same price. Net proceeds on the 3.0 million shares approximated $70.5

million. On February 15, 2002, the underwriters exercised their option to purchase 300,000 Common Shares generating net proceeds of approximately $7.1 million. The net proceeds from this offering will be used for general corporate purposes, including new investments and working capital.

On February 6, 2001, the Company sold to the public 3.8 million Common Shares at a price of $23.07 per share. The net proceeds from this offering have been used for general corporate purposes, including new investments and working capital.

The Tax-Exempt Bonds

The proceeds of the tax-exempt bonds held by the Company are used to make mortgage loans for the construction, acquisition or refinancing of multifamily housing developments and other real estate financings through out the United States. The underlying developments are "qualified residential rental properties" under section 142(d) of the Internal Revenue Code of 1986, as amended (the "Code"), which requires that a specified percentage of their rental units be rented to persons whose incomes do not exceed specified percentages of local median income levels. Certain of the mortgage bonds qualify as 501(c)(3) bonds under Section 145 of the Code, which requires that the owner of the underlying property be a 501(c)(3) organization or a governmental unit that meets certain additional requirements. Accordingly, the bonds are "qualified bonds" within the meaning of section 141(e) of the Code, and the interest paid on the bonds is exempt from federal income taxes.

Each tax-exempt bond is secured by an assignment to the Company of the related mortgage loan, which in turn is secured by a mortgage on the underlying property and assignment of rents. Although the bonds are issued by state or local governments or their agencies or authorities, the bonds are not general obligations of any state or local government, no government is liable under the bonds, nor is the taxing power of any government pledged to the payment of principal or interest under the bonds. In addition, the underlying mortgage

loans are nonrecourse, which means that the owners of the underlying properties, who are also the borrowers under the mortgage loans, are not liable for the payment of principal and interest under the loans. Accordingly, the sole source of funds for payment of principal and interest under the bonds is the revenue derived from operation of the mortgaged properties and amounts derived from the sale, typically refinancing or other disposition of such properties.

As of December 31, 2001, the Company held $616.5 million of bonds or certificates of participation ("COPs") of which $83.6 million were participating, $460.0 million were non-participating, $55.7 million were participating subordinate and $17.2 million were non-participating subordinate. (See Note 4 to the Company's consolidated financial statements included herein for a complete discussion.)

Other Bond Related Investments

The Company holds investments in RITESSM (as discussed above under the caption "Securitizations"), a security offered by Merrill Lynch through its P-FLOATsSM Program. In conjunction with the purchase of the RITESSM with respect to fixed rate bonds, the Company enters into interest rate swap contracts to hedge against interest rate exposure on the Company's investment in the RITESSM.

Loans Receivable

The Company's investment in construction loans primarily consists of short-term taxable loans originated by Midland. The proceeds of these loans are used to build low-to-moderate income apartment communities. These construction loans are typically underwritten so as to facilitate a permanent takeout through Fannie Mae's DUS program. The Company, through Midland, is able to provide funding for the construction of these properties by utilizing capital it manages for various pension funds. The Company also provides taxable second loans and parity working capital loans to certain properties in conjunction with the purchase of tax-exempt bonds.

Acquisitions

Investment Acquisition Program

Through the investing segment, the Company seeks to acquire investments that primarily generate tax-exempt interest income and that are available on attractive terms. The Company believes that currently there are a substantial number of tax-exempt bonds and similar investments available at attractive prices including:

- Tax-exempt bonds that are used to finance development or rehabilitation of multifamily properties, in conjunction with the affordable housing tax credit.

- Existing bonds as the underlying mortgages are refinanced. There are a significant number of mortgage bonds backed by multifamily properties that were originated in the late 1980s. The Company believes, in light of the current interest rate environment, that many of the obligors on these mortgage bonds may consider refinancing them.

- Bonds issued for the benefit of charitable organization obligors (otherwise referred to as 501(c)(3) developers) that own and manage multifamily housing. These properties generally serve moderate-income families with incomes between 50% and 80% of a region's median income.

- Revenue bonds issued to finance development of large scale real estate developments, including single-family housing developments. These bonds are generally not secured by a mortgage on real property, but by assessment payments imposed by residents of the development or other specific payments pledged by the local government or special assessment district issuing the bonds.

- Other portfolios of bonds and related investments backed by multifamily housing properties that meet the Company's underwriting criteria and target risk-adjusted returns.

The Company will focus its efforts on supplying tax-exempt financing to quality, multifamily housing owned or developed by tax credit and 501(c)(3) developers as well as refinancings of existing mortgage bonds.

Competition

The need for capital for multifamily housing developments continues to grow, especially in the affordable housing sector. Mature properties need to be recapitalized and new properties are being built to meet increasing demands in various markets. State and federal government programs, which provide

incentives and/or subsidies to build and reinvest in multifamily housing, motivate continuous activity in multifamily development. Increasingly, these needs are being financed with tax-exempt bonds and affordable housing tax credits.

The Company actively seeks investment opportunities throughout the United States and is encouraged by the business opportunities that exist. Although the Company operates in a competitive environment, there are only a handful of competitors that are primarily focused on providing tax-exempt financing for multifamily housing consistent with the Company's acquisition programs. As a result, the Company is able to offer financing programs that are custom-tailored to meet the customer's needs. The 1999 acquisition of Midland extended the Company's lending reach and product offerings by providing access to new forms of debt and equity capital. When MuniMae's tax-exempt lending is coupled with Midland's debt and equity capital, the Company has the ability to provide one stop shopping to borrowers seeking debt and equity financing for affordable multifamily housing communities.

The primarily competitive factors in originating new investments are pricing, service, ease of execution and certainty of execution. The Company's ability to follow through on these factors is the key to continued growth.

Property Performance

The Company structured $468.4 million in tax-exempt investment transactions during 2001, of which $99.6 million were retained by the Company as bonds or other bond related investments. The properties collateralizing the mortgage loans underlying the investments are geographically dispersed and include new construction projects and acquisition or refinancing of existing properties. Aggregate occupancy for all of the properties collateralizing the Company's bonds and other bond related investments was 92.2% at December 31, 2001, as compared with 93.1% at December 31, 2000.

The 22 original bonds held by the Partnership at the time of the 1995 Financing had been acquired by the Partnership in 1986 and 1987. Due to an

imbalance in the real estate markets in the late 1980's and early 1990's, many of the mortgage properties collateralized by the original bonds were unable to achieve the rent increases originally anticipated and, consequently, the net cash flow from most of the properties was insufficient to pay the base interest due. Consequently, the former managing general partners were forced to draw funds from project level sources such as reserves and guarantees or declare monetary defaults and initiate loan workout discussions in instances where no project level sources existed.

Construction starts for new apartment units declined significantly throughout the United States during the mid-1980s and fell to a record low in 1993. This decline in construction starts coupled with a general economic recovery brought about tightening markets, stabilized and higher occupancies, and an ability to realize greater rent increases. Apartment starts bottomed in 1993 and grew dramatically before leveling off in the late 1990's, with relative balance between new supply and marginal demand for existing housing in most markets.

As of December 31, 2001, the Company held $616.5 million of bonds or COPs, of which $83.6 million were participating, $460.0 million were non-participating, $55.7 million were participating subordinate and $17.2 million were non-participating subordinate. Participating bonds have additional interest features that allow the Company to participate in the growth of the underlying property. These participating bonds provide for payment of additional interest from available cash flow of the property in addition to the base

12

interest. The terms of the additional interest to be received on a bond are specific to that bond and are set forth in the bond documents. Other bonds provide for payment of a fixed rate of interest but are not non-participating and do not contain additional interest features. Certain participating and non-participating bonds are considered "subordinate" bonds as the payment of interest and principal on the bonds occurs only after payment of principal and interest on a bond that has priority to the cash flow of the underlying collateral.

The following table provides certain information for the months ended December 31, 2001, September 30, 2001 and December 31, 2000 with respect to the properties collateralizing the mortgage loans underlying the bond and other bond related investments held by the Company at December 31, 2001.

Total Units	

(1) The Company owns a participating bond, a participating subordinate bond and a RITES interest collateralized by the Riverset property.

(2) The Company owns a non-participating bond and a RITES interest collateralized by the Charter House property.

(3) The Dade Gannon Portfolio represents eight properties.

(4) The Oklahoma City Portfolio represents three properties.

(5) The CAPREIT Portfolio represents eleven properties.

(6) Same Stores includes properties reporting for each of the past three quarters.

Portfolio Management

The Company is responsible for a full range of loan servicing and asset management functions for its own investments and for others. Through Midland, the Company is a Fannie Mae approved DUS lender authorized to process loans and collect origination and servicing fees. The Company, through Midland, also manages equity syndication financings.

The Company monitors the timely receipt of all debt service payments and promptly notifies a borrower of any delinquency, deficiency or default. Reporting systems are in place that allow the Company to review and analyze the revenue, expenses and leasing activity of each property on a periodic basis. In addition, the Company inspects each property and market area on a regular basis.

The loan servicing and asset management oversight is designed to enable the Company to track the performance of each property and to alert management to potential problems. While actions will vary depending upon the nature of an individual problem, the Company generally notifies borrowers of any problems or concerns and recommends corrective action.

The Company responds to defaults on tax-exempt bonds and construction loans on a case-by-case basis. After sending requisite default notices, the Company typically holds discussions with the property owner/developer. In the event the Company determines that the owner/developer remains committed to the project and capable of successful operations, a workout or other forbearance arrangement may be negotiated. Whenever the Company determines that successful operation by the current owner/developer is not feasible, negotiations for the transfer of a deed, in lieu of foreclosure, to an affiliated entity may be undertaken. In the absence of reserves or operating deficit guarantees, the Company may face additional risk from operations with respect to properties so transferred, which may require subsidies from Company reserves to cover potential operating deficits before debt service. The Company does not currently anticipate that any

such operating deficits before debt service will occur in 2002.

Employees

As of December 31, 2001, the Company had 218 employees. The Company is not a party to any collective bargaining agreement.

Item 2. Properties.

The Company leases office space as follows:

Baltimore, Maryland. In November 1998, the Company assumed the office lease agreement from an affiliate for office space. The office space contains 11,124 square feet and the lease expires in March 2003. In June 2001, the Company entered into a lease agreement for additional space in the same office building. The new office space contains 2,939 square feet and the lease expires in March 2003.

Clearwater, Florida. In June 1996, Midland entered into a seven-year lease for a 14,876 square feet office facility. In September 1998, Midland negotiated a new lease for an additional 6,180 square feet of space in the same location with an expiration coinciding with the original lease. In December 2000, Midland negotiated a new lease that brings the space rented to a total of 36,004 square feet. The lease expires in December 2005.

16

The Company, through Midland, also leases office space for its regional offices in Dallas, Texas, San Francisco, California, Los Angeles, California, Chicago, Illinois, and Detroit, Michigan. The Company believes its facilities are suitable for its requirements and are adequate for its current and contemplated future operations.

Item 3. Legal Proceedings.

None.

Item 4. Submission of Matters to a Vote of Security Holders.

No matter was submitted to a vote of the Company's? shareholders during the three months ended December 31, 2001.

17

Part II

Item 5. Market for Registrant's Equity Securities and Related Stockholder Matters

The following table sets forth the high and low sale prices per share of the Common Shares as reported by the NYSE for each calendar quarter in 2001 and 2000 and the distributions declared with respect to such shares allocable to such period.

	High	Low	Distributions Declared

2001:			
First Quarter	$ 24.33	$ 21.75	$0.4250
Second Quarter	23.50	22.00	0.4275
Third Quarter	25.25	25.80	0.4300
Fourth Quarter	25.80	23.11	0.4325
2000:			
First Quarter	20.00	18.19	$0.4125
Second Quarter	20.63	18.88	0.4175
Third Quarter	21.88	20.13	0.4200
Fourth Quarter	23.50	20.25	0.4225

As of March 18, 2002, there were approximately 17,511 holders of record of Common Shares.

The Company's current policy is to distribute to holders of Common Shares at least 80% of cash available for distribution to Common Shares. The Company pays distributions to its holders of Common Shares quarterly in February, May, August and November.

The Preferred Shares and the Preferred CD Shares which were redeemed in March 2002 are not listed for trading on any national securities exchange and there is no established public trading market for those shares.

Description of Shares

As of December 31, 2001 there were 16,737 Preferred Shares (10,995 Series I and 5,742 Series II), 4,567 Preferred CD Shares (3,176 Series I and 1,391 Series II), 2,000 Term Growth Shares and 21,857,312 Common Shares outstanding. Shareholder approval may not be required for the Company to issue additional shares in the future. Although the Company will not issue additional Preferred Shares or Preferred CD Shares, it may from time to time issue additional Common Shares depending upon market conditions. In addition, the Company is authorized to issue new classes of shares, which may be senior to the Common Shares but cannot be senior to the Preferred Shares or Preferred CD Shares. No shareholders have pre-emptive rights.

The rights of the holders of each class of shares of the Company, including the distributions to which each class is entitled, are set forth in full in the Company's Operating Agreement, a copy of which is filed as an exhibit to this report. The following is a summary of the rights, privileges and preferences of the holders of each class of shares outstanding at December 31, 2001.

Preferred Shares. The performance of, and distributions with respect to, each series of Preferred Shares (which were redeemed in March 2002) is based solely upon the performance of that portion of the original bonds attributable to such series as they existed immediately following the Refunding and prior to the 1995 Financing. Accordingly, the holders of the Preferred Shares are entitled to their proportionate share of distributions with respect to the 11 original bonds and 11 refunded Series B Bonds held by the Company, as well as the distributions they would have received with respect to the 11 refunded Series A Bonds had the 1995 Financing not occurred. Distributions to the holders of the Preferred Shares are satisfied, however, on a basis having priority over all payments with respect to the Common Shares, Term Growth Shares and any other equity class (other than Preferred CD Shares), out of all of the resources of the Company, including revenue from investment of the proceeds from the 1995 Financing. None of the expenses incurred in connection with the 1995 Financing or any future financings are borne by the holders of the Preferred Shares.

The Preferred Shares must be partially redeemed upon (i) the sale or repayment of a bond attributable to such shares, (ii) the sale of a related mortgaged property, or (iii) beginning in the year 2000, an appraisal of a related mortgaged property indicating that its fair market value exceeds the sum of (a) the face value of the bond secured by the property and (b) unpaid accrued interest on such bond. Upon liquidation, the holders of the Preferred Shares are entitled to receive, after payment of creditors, the appraised value of the Company's assets attributable to such shares, together with all unpaid accrued distributions, before any distribution is made to the holders of Common Shares or other shares ranking junior to the Preferred Shares. The Preferred Shareholders shall be permitted to convert such shares to either Common Shares or cash (at the discretion of the Board of Directors) once every two years beginning in June 2004. Third party independent appraisals will be obtained to determine the conversion value for each share.

The holders of the Preferred Shares do not have voting rights with respect to the election of the Company's directors, but do have voting rights with respect to any merger or consolidation of the Company in which it is not the surviving entity or the sale of substantially all of its assets, the removal of a director, and any alteration of the rights, privileges or preferences of the Preferred Shares under the Operating Agreement. The voting power of the Preferred Shares, relative to all of the Company's outstanding shares, is equivalent to the relative voting power, immediately prior to the Merger, of the BACs exchanged therefor. Such protection from loss of relative voting power, however, does not extend to issuances of additional shares of the Company subsequent to the Merger.

Preferred CD Shares. The performance of, and distributions with respect to, each series of Preferred CD Shares is based solely upon the performance of that portion of the original bonds attributable to such series as they existed immediately following the 1995 Financing. Accordingly, the holders of the Preferred CD Shares are entitled to their proportionate share of distributions with respect to the 11 original bonds and 11 refunded Series B Bonds held by the Company. Because the holders of the Preferred CD Shares received a distribution of their pro rata share of the proceeds of the 1995 Financing, however, they, unlike the holders of the Preferred Shares, (i) receive no distribution relating to the performance of the 11 refunded Series A Bonds the receipts for which were sold in the 1995 Financing and (ii) bear their pro rata share of the expenses of the 1995 Financing and any future financings utilizing any of the original bonds.

The rights, privileges and preferences of the Preferred CD Shares are otherwise substantially the same as those of the Preferred Shares.

19

Term Growth Shares. The holders of the Term Growth Shares are entitled to distribution of 2% of the Company's cash flow. Except with respect to distributions and various redemption features as defined in the Operating Agreement, the rights and privileges of the Term Growth Shares are substantially the same as those of the Common Shares. Term Growth Shares will be redeemed when Preferred and Preferred CD Shares are fully redeemed or converted (subject to certain conditions defined in the Company's Operating Agreement).

Common Shares. The holders of the Common Shares are entitled to distributions as and when declared by the Board of Directors out of funds legally available therefor. As of December 31, 2001, the Company's policy was to distribute to the holders of the Common Shares at least 80% of its cash flow from operations (exclusive of capital-related items and reserves) after payment

of distributions to the holders of the Preferred Shares, Preferred CD Shares and Term Growth Shares. No distributions may be declared or paid with respect to the Common Shares, however, so long as there remains unpaid any required distribution or redemption payment with respect to the Preferred Shares and Preferred CD Shares.

The Common Shares are not redeemable (except pursuant to certain anti-takeover provisions) and upon liquidation share ratably in any assets remaining after payment of creditors and the liquidation preferences of the Preferred Shares and Preferred CD Shares. The holders of the Common Shares voting as a single class have the right to elect the directors of the Company and, voting together with the holders of the Preferred Shares and Preferred CD Shares, have voting rights with respect to a merger or consolidation of the Company in which it is not the surviving entity or the sale of substantially all of its assets, the removal of a director, the dissolution of the Company, and certain anti-takeover provisions. Each Common Share entitles its holder to cast one vote on each matter presented for shareholder vote. Because of provisions providing limited protection against dilution of the voting rights of the holders of the Preferred Shares and Preferred CD Shares, each Series I Preferred Share and Series I Preferred CD Share and each Series II Preferred and Series II Preferred CD Share currently entitles its holders to cast 38.10 and 43.95 votes, respectively, on each matter on which the Preferred and Preferred CD Shares vote along with the Common Shares presented for a vote of the holders of those shares.

For the year ended December 31, paid quarterly (1)	$ 10.15 (6)	$ 155.91 (4)	$ 21.83
Common shares:			
For the year ended December 31, paid quarterly (1)	$ 1.7150	$ 1.6725	$ 1.6075

(1) This amount represents total dividends declared for the year. Quarterly distributions were paid to all preferred shareholders beginning with the third quarter of 1997; the first semiannual distribution for 1997 was paid in August 1997.

(2) The 1998 distributions for the Series I Preferred Shares and the Series I Preferred Capital Distribution Shares include a special distribution of $24.93 and $33.88, respectively, for their proportionate share of the Company's net proceeds from the sale of three consolidated demand notes in December 1998.

(3) The distributions for the Series I and Series II Preferred and Preferred Capital Distribution Shares include two special distributions. The first distribution relates to their proportionate share of the Company's net proceeds from the sale of eight consolidated demand notes in March 1999 as follows: Preferred Series I, $16.24; Preferred Series II, $25.59; Preferred Capital Distribution Series I, $19.96 and Preferred Capital Distribution Series II, $41.89. The second distribution relates to their pro- rata portion of the return of capital from the refunding of the bond secured by the Riverset property as follows: Preferred Series I, $38.51; Preferred Series II; $133.24; Preferred Capital Distribution Series I, $37.60 and Preferred Capital Distribution Series II, $131.84.

(4) The distributions for the Series II Preferred and the Series II Preferred Capital Distributions Shares includes a special distribution of $127.13 and $127.16, respectively. The special distribution represents their pro rata portion of the return of capital resulting from the pay-off of a bond secured by a property known as Southfork Village.

(5) The distributions for the Series I Preferred Shares and Preferred Capital Distribution Shares include a special distribution of $1.48 which represents their pro rata portion of the proceeds from the sale of a taxable loan secured by the property known as Mountain View.

(6) In June 2001, approximately 26% of Series I Preferred Shares and Preferred Capital Distribution Shares and approximately 56% of Series II Preferred Shares and Preferred Capital Distribution Shares were redeemed. The effect of this redemption was a decrease in the number of shares outstanding, which, in turn caused the per share distribution to increase.

SHARES OUTSTANDING AND NUMBER OF HOLDERS
AS FOLLOWS:

As of December 31, Preferred shares:			
Series I			
Shares outstanding	10,995	14,933	14,933
Number of shareholders	783	779	780
Series II			
Shares outstanding	3,176	7,226	7,226

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

General Business

Municipal Mortgage & Equity, LLC ("MuniMae") and its subsidiaries (together with MuniMae, the "Company") are principally engaged in originating, investing in and servicing investments related to multifamily housing and other real estate financings. A significant portion of the Company's investments consists of tax-exempt bonds and interests in bonds issued by state and local governments or their agencies or authorities to finance multifamily housing developments. Interest income from the majority of these investments is exempt for federal income tax purposes. Multifamily housing developments, as well as the rents paid by the tenants, secure these investments. Midland Financial Holdings, Inc. ("Midland"), a wholly owned corporate subsidiary, is a fully integrated real estate investment firm that specializes in originating, investing in and servicing investments in the affordable multifamily housing industry. These investments generate taxable, not tax-exempt, income.

In October 1999 the Company acquired Midland for approximately $45 million. Of this amount, the Company paid approximately $23 million in cash and approximately $12 million in Common Shares at the closing of the transaction. In addition, $3.3 million in MuniMae Common Shares was payable annually over a three year period if Midland met certain performance targets, including an annual contribution to cash available for distribution ("CAD"). In December 2000, MuniMae paid approximately $3.3 million in Common Shares in consideration for Midland meeting its first year performance targets. In 2001, in order to increase MuniMae's flexibility in operating Midland, MuniMae agreed with the former owners of Midland that the payment of the 2001 and 2002 installments would no longer be conditioned on Midland meeting certain performance targets. In December 2001, MuniMae paid approximately $3.3 million in Common Shares and, subject to certain conditions, MuniMae expects to make the final payment of Common Shares having a value of approximately $3.3 million in December 2002.

In October 1999, as a result of the Midland acquisition, the Company restructured its operations into two business segments: (1) an investing segment that primarily holds investments producing tax-exempt interest income; and (2) an operating segment that primarily generates taxable interest income and,

through corporate subsidiaries, fee income by providing servicing, loan origination and tax credit equity syndication services. The revenues associated with the investing segment consist primarily of interest earned on tax-exempt bonds, other bond related investments and certain short-term taxable loans and investments. The revenues associated with the operating segment consist primarily of loan servicing and loan origination fees for the Company's own portfolio and for portfolios of third parties, syndication and brokerage fees associated with the origination of tax credit syndications, taxable interest and fees earned on construction lending activities and other fee income.

In 1999, the Company placed a substantial portion of its tax-exempt bonds and bond related investments in TE Bond Sub, an indirect subsidiary of the Company. TE Bond Sub then sold Series A, Series B and Series A-1 and B-1 Cumulative Preferred Shares (collectively, the "TE Bond Preferred Shares") to institutional investors in May 1999, June 2000 and October 2001, respectively (see further discussion under Liquidity and Capital Resources). The TE Bond Preferred Shares have a senior claim to the income derived from the investments owned by TE Bond Sub and thus the assets of TE Bond Sub are not available to MuniMae's creditors. Any income from TE Bond Sub available after payment of the cumulative distributions of the TE Bond Preferred Shares is allocated to the Company.

23

Results of Operations

Year Ended December 31, 2001 Compared with Year Ended December 31, 2000

Total income for the year ended 2001 increased $24.9 million over the same period last year due primarily to: (1) an increase in collections of interest totaling $11.9 million on bonds, other bond related investments and loans; (2) a $6.1 million increase in gain on sale which includes an increase of $1.6 million on the sale of taxable loans, a $2.3 million gain on tax credit equity re-syndication, and a $2.2 million gain on the payoff of Newport-On-Seven; (3) an increase in loan servicing fees, loan origination and brokerage fees, and syndication fees of $5.3 million due primarily to an increase in syndication fees and an increase in loan production; (4) an increase in other income of $2.9 million of which $3.3 million was associated with income earned on the assumption of a purchase obligation with respect to the Hunter's Glen and Buchanan Bay bonds; (5) offset in part by $1.3 million decrease in interest on short-term investments.

Total expenses for the year ended 2001 increased $11.1 million over the same period last year due primarily to: (1) an increase in salary and related benefits expense of $6.1 million, including additional bonuses associated with increased syndication production; (2) an increase in operating expenses of $1.9 million primarily associated with commissions paid on equity syndication funds; (3) an increase in professional fees of $0.7 million associated with various information system initiatives; (4) an increase in goodwill and other intangibles amortization of $0.6 million; (5) a decrease in interest expense of $0.5 million primarily associated with the $22 million reduction in our long term debt facility; and (6) an other-than-temporary impairment of $3.3 million on two investments (Hunter's Glenn and Buchanan Bay).

As a result of the adoption of FAS 133, the Company recorded a negative cumulative effect adjustment of $12.3 million on January 1, 2001 and net holding losses for mark to market adjustments on derivative financial instruments of $5.6 million for the year ended December 31, 2001.

Income allocable to preferred shareholders of TE Bond Sub increased to

$10.8 million from $8.5 million in 2000 as a result of the sale in October 2001 of Series A-1 and B-1 Preferred Shares and recording of a full year of income allocable to the Series B Preferred Shares sold in June 2000 (see further discussion under Liquidity and Capital Resources).

As discussed above, the operating segment consists primarily of subsidiaries of the Company that are subject to income taxes. The effective tax rate for 2001 was 41.6% versus 49.4% for 2000. The 2001 rate reflects a provision for deferred taxes, and the effects of a charitable contribution and low-income housing tax credits.

For the year ended December 31, 2001, the net adjustment to other comprehensive income for unrealized holding gains on tax-exempt bonds and other bond related investments available for sale was $7.0 million. After a reclassification adjustment for losses of $8.1 million included in net income, other comprehensive income for the year ended December 31, 2001 was $1.1 million and total comprehensive income was $27.0 million.

Net income for the year ended December 31, 2001 decreased by $5.7 million as compared with 2000, due primarily to (1) a cumulative effect adjustment of $12.3 million upon adoption of FAS 133 and net holding losses for mark-to-market adjustments on derivative financial instruments of $5.6 million recorded in

earnings, which were recorded through other comprehensive income in 2000, partially offset by (2) an increase in the Company's operating income (total income excluding net gain on sale less total expenses excluding other-than-temporary impairments) of $10.0 million due to growth in the Company's loan production volume and investments, and (3) an increase of $6.1 million in gain on sales which includes an increase of $1.6 million on the sale of taxable loans, a $2.3 million gain on tax credit equity re-syndication, and a $2.2 million gain on the payoff of Newport-On-Seven.

Year Ended December 31, 2000 Compared with Year Ended December 31, 1999

Total income for the year ended December 31, 2000 increased by approximately $47.3 million from the same period last year due primarily to an increase in collections of interest totaling $7.2 million on bonds, other bond related investments and loans and an increase of $40.0 million due to the inclusion of a full year of Midland income in 2000 versus a partial year of Midland income in 1999.

The Company recognized net gain on sales of $2.1 million for the year ended December 31, 2000. Of this amount, $1.9 million related to Midland's sale of loans to Fannie Mae and other third parties in which Midland retained the mortgage servicing rights on the loans. In conjunction with the recognition of the net gain on sales, the Company recorded an investment in mortgage servicing rights. The Company recognized net gain on sales of $2.7 million in 1999 related to the sale of bonds and loans.

Salaries and benefits, professional fees and operating expenses for the year ended December 31, 2000 increased by approximately $14.9 million over the prior year due primarily to (1) an increase of $11.9 million due to the inclusion of a full year of Midland expenses in 2000 versus a partial year of Midland expenses in 1999, (2) an increase of $0.6 million in salary and benefits expense as a result of an increase in the number of employees and an increase in the incentive compensation earned, (3) an increase of $1.0 million in professional fees related to consulting expenses as a result of growing the Company's information infrastructure and legal expenses related to various

transactions and (4) an increase of $0.9 million in operating expenses related to an increase in allowance for loan losses.

For the year ended December 31, 2000, the Company recorded a full year of amortization of goodwill and other intangibles associated with the Midland acquisition and the capitalization of mortgage servicing rights. This accounted for a $1.6 million increase in amortization expense over the prior year.

Interest expense for the year ended December 31, 2000 increased by approximately $24.5 million over the same period last year due primarily to an increase of $22.8 million due to the inclusion of a full year of interest expense from short-term borrowings associated with construction lending activity at Midland and an increase of $1.7 million in interest expense related to securitization transactions accounted for as borrowings.

Income allocable to preferred shareholders of TE Bond Sub increased to $8.5 million from $3.4 million in 1999 as a result of the June 2000 Series B Preferred Equity Offering and recording of a full year of income allocable to the sale in May 1999 of the Series A Preferred Shares (see further discussion under Liquidity and Capital Resources).

The Company recorded other-than-temporary impairments aggregating $1.0 million on one investment in 2000. This type of non-cash charge does not affect the cash flow generated from the operation of the underlying properties, distributions to shareholders, the tax-exempt status of the income,

or the financial obligations under the bonds.

As discussed above, the operating segment consists primarily of subsidiaries of the Company that are subject to income taxes. The effective tax rate for 2000 was 49.4% versus 52.2% for 1999. The 2000 rate reflects a provision for deferred taxes associated with the capitalization of mortgage servicing rights.

For the year ended December 31, 2000, the net adjustment to other comprehensive income for unrealized holding losses on tax-exempt bonds and other bond related investments available for sale was $2.1 million. After a reclassification adjustment for gains of $0.2 million included in net income, other comprehensive loss for the year ended December 31, 2000 was $2.3 million and total comprehensive income was $29.3 million.

Net income for the year ended December 31, 2000 was $31.6 million compared to $31.5 million in 1999. Net income for 2000 includes a full year of Midland income of $40.0 million, offset by a full year of Midland operating and interest expense of $34.7 million. The increase in net income from the inclusion of Midland was offset by an increase of $5.1 million in income allocable to preferred shareholders in TE Bond Sub.

Critical Accounting Policies

The Company's discussion of its financial condition and results of operations is based upon the Company's consolidated financial statements, which are prepared on the accrual basis of accounting in accordance with generally accepted accounting principles. The Company believes the following critical accounting policies contain significant estimates used in the preparation of its consolidated financial statements.

Investment in tax-exempt bonds and other bond related investments

Investment in tax-exempt bonds and other bond related investments is accounted for under the provisions of Statement of Financial Accounting Standards No. 115, "Accounting for Certain Investments in Debt and Equity Securities"("FAS 115"). All investments in tax-exempt bonds and other bond related investments are classified and accounted for as available-for-sale debt securities and carried at fair value; unrealized holding gains or losses arising during the period are recorded through other comprehensive income in shareholders' equity, while realized gains and losses and other-than-temporary impairments are recorded through operations. The Company evaluates on an on-going basis the credit risk exposure associated with these assets to determine whether any other-than-temporary impairments exist in accordance with the Company's policy discussed under the Other-than-Temporary Impairment section of this discussion. Future adverse changes in market conditions or poor operating results from the underlying real estate could result in losses or an inability to recover the carrying value of the investments.

The Company determines the fair value of participating bonds (i.e., bonds that participate in the net cash flow and net capital appreciation of the underlying properties) that are wholly collateral dependent and for which only a limited market exists by discounting the underlying collateral's expected future cash flows using current estimates of discount rates and capitalization rates. The Company engages an independent real estate valuation firm to assist the Company in reviewing the reasonableness of the estimates of discount rates, capitalization rates and other variables used to estimate the fair value of these bonds on an annual basis.

26

The Company bases the fair value of non-participating bonds and other bond related investments, which also have a limited market, on quotes from external sources, such as brokers, for these or similar bonds or investments.

Because the Company's investment in tax-exempt bonds and other bond related investments are secured by non-recourse mortgage loans on real estate properties, the value of the Company's assets is subject to all of the factors affecting bond and real estate values, including macro-economic conditions, interest rate changes, demographics, local real estate markets and individual property performance. Further, many of the Company's investments are subordinated to the claims of other senior interests and uncertainties may exist as to a borrower's ability to meet principal and interest payments.

Securitization Transactions

For financial reporting purposes, transactions where the Company securitizes a bond and subsequently purchases a residual interest are accounted for in accordance with Statement of Financial Accounting Standards No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities" ("FAS 140"). Under FAS 140, the accounting for these transactions is partially dependent on certain call provisions. If the residual interest holder is granted a call provision under the terms of the transaction, then effective control over the transferred assets has not been relinquished and the transaction is accounted for as a borrowing. When the residual interest holder is not granted a call provision and effective control has been relinquished, the transaction is accounted for as a sale and the Company recognizes gains and losses on the sale of its bonds. The portion of the unrealized gain or loss on a bond that is recognized as a result of the sale is determined by allocating the net amortized cost at the time of sale between the corresponding senior interest and residual interest based upon their relative fair values, in accordance with FAS 140. The Company may also structure

transactions whereby a third party buys bonds directly from a seller and the Company subsequently purchases residual investments related to the bonds. In this case, the Company may retain the call provision associated with its investment in the residual interest position without requiring borrowing treatment because the Company does not own the bond.

Investment in Derivative Financial Instruments

Investment in derivative financial instruments is accounted for under the provisions of Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities" and Financial Accounting Standards Board Statement No. 138, "Accounting for Certain Derivative Instruments and Certain Hedging Activities." These statements (collectively, "FAS 133") establish accounting and reporting standards for derivative financial instruments, including certain derivative financial instruments embedded in other contracts, and for hedging activity. FAS 133 requires the Company to recognize all derivatives as either assets or liabilities in its financial statements and record these instruments at their fair values. In order to achieve hedge accounting treatment, hedging activities must be appropriately designated, documented and proven to be effective as a hedge pursuant to the provisions of FAS 133. The Company has elected, as permitted by FAS 133, not to prove the hedging effectiveness of its derivative investments due to the cost and administrative burden of complying with FAS 133. As a result, changes in fair value of derivatives are recorded through current earnings.

The Company has several types of financial instruments that meet the definition of a derivative

financial instrument under FAS 133, including interest rate swaps, put option contracts and total return swaps. Under FAS 133, the Company's investment in these derivative financial instruments is recorded on the balance sheet with changes in fair value of these instruments, as well as changes in fair value of other instruments which are deemed to be derivative financial instruments, recorded in current earnings. The Company bases the fair value of its derivative financial instruments, which also have a limited market, on quotes from external sources, such as brokers, for these or similar investments. These estimates involve uncertainties and matters of judgment and therefore cannot be determined with precision. The assumptions and methodologies selected by the Company were intended to estimate the amounts at which the investments could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Changes in assumptions and market conditions could significantly affect estimates. These estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and the differences could be material.

Loans Receivable

The Company carries loans receivable at net realizable value. The Company evaluates on an on-going basis the credit risk exposure associated with these assets to determine whether any impairment exists in accordance with the Company's policy discussed below. When the Company believes that it is probable that it will not collect all amounts due, including principal and interest, under the terms of a loan, it records a valuation allowance.

Mortgage Servicing Rights

The Company accounts for its mortgage servicing rights under FAS 140. FAS 140 requires servicing rights retained by the Company after the origination and sale of the related loan to be capitalized by allocating the carrying amount

between the loan and the servicing rights based on their relative fair values. The fair value of the mortgage servicing rights is based on the expected future net cash flow to be received over the estimated life of the loan discounted at market discount rates. The capitalization of the mortgage servicing rights is reported in the income statement as a gain or loss on sale and results in an offsetting asset or liability. Mortgage servicing rights are amortized over the estimated life of the serviced loans. The amortization expense is included in goodwill and other intangibles amortization in the consolidated statements of income.

The Company evaluates all capitalized mortgage servicing rights for impairment when changes indicate that impairment is probable, but no less than at each reporting date. The mortgage servicing rights are considered to be impaired when the carrying amount exceeds the fair value of the expected future net cash flows to be received under the servicing contract. Impairment, if any, is recognized through a valuation allowance.

Other-than-Temporary Impairments

The Company evaluates on an on-going basis the credit risk exposure associated with its assets to determine whether other-than-temporary impairments exist or a valuation allowance is needed. When the Company believes that it is probable that it will not collect all amounts due, including principal and interest, under the terms of an investment, it records an other-than-temporary impairment or valuation allowance. The Company bases its measure of impairment of an investment on the present value of expected future cash flows discounted at the investment's effective interest rate, or the fair value of the

collateral if the investment is collateral dependent.

Use of Estimates

The use of estimates is inherent in the preparation of all financial statements, but is especially important in the case of the Company, which is required under FAS 115 to carry a substantial portion of its assets at fair value, even though only a limited market exists for them. Because only a limited market exists for most of the Company's investments, fair value is estimated by the Company in accordance with the Company's valuation procedures discussed above. These estimates involve uncertainties and matters of judgment and therefore cannot be determined with precision. The assumptions and methodologies selected by the Company were intended to estimate the amounts at which the investments could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Changes in assumptions and market conditions could significantly affect estimates. These estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and the differences could be material.

New Accounting Pronouncements

In June 2001, the Financial Accounting Standards Board approved Statements of Financial Accounting Standards No. 141 "Business Combinations" ("FAS 141") and No. 142 "Goodwill and Other Intangible Assets" ("FAS 142"), which are effective July 1, 2001 and January 1, 2002, respectively, for the Company. FAS 141 requires that the purchase method of accounting be used for all business combinations consummated after June 30, 2001. Under FAS 142, amortization of goodwill, including goodwill recorded in past business combinations, will be discontinued upon adoption of this standard. In addition, goodwill recorded as a result of business combinations completed during the six-month period ending

December 31, 2001 will not be amortized. All goodwill and intangible assets will be tested for impairment in accordance with the provisions of the Statement. The Company is currently reviewing the provisions of FAS 141 and FAS 142 and assessing the impact of adoption.

Liquidity and Capital Resources

The Company's primary objective is to maximize shareholder value through increases in CAD to common shares and appreciation in the value of its common shares. The Company seeks to achieve its growth objectives by growing its investing and operating business segments. The Company grows its investment segment by acquiring diversified portfolios of tax-exempt bonds and other bond related investments. Growth in the operating segment is derived from increasing levels of fees generated by affordable housing equity syndications, loan servicing and origination and brokerage services. The Company's business plan includes structuring $1.4 billion to $1.6 billion in investment transactions in 2002. The Company expects to finance its acquisitions through a financing strategy that (1) takes advantage of attractive financing available in the tax-exempt securities markets, (2) minimizes exposure to fluctuations of interest rates, and (3) maintains maximum flexibility to manage the Company's short-term cash needs. To date, the Company has primarily used two sources, securitizations and equity offerings, to finance its acquisitions. Through Midland's management of capital for others, including Fannie Mae, the Company has expanded its access to capital.

For the year ended December 31, 2001, the Company structured $468.4 million in tax-exempt bond transactions. Of this amount, $99.6 million represented investments retained by the Company. In addition,

MuniMae originated $175.8 million of construction loans, $294.9 million of taxable permanent loans and equity investments totaling $146.6 million.

The Company's investing segment relies primarily on securitization transactions and equity offerings to finance the growth in this business segment. The operating segment relies on a variety of financing sources, including pension funds, short-term bank warehousing and other credit lines, and the Company's working capital.

The Company pension fund relationships have historically been a significant source of capital for its construction and construction/permanent lending activities. A number of pension funds, through the Midland Affordable Housing Group Trust (the "Group Trust"), have provided short-term credit to finance a variety of the Company's loan products. In 2000, these same pension funds established the Midland Multifamily Equity REIT ("MMER"), a $70 million Maryland real estate investment trust, in order to participate as equity investors in a portfolio of income-producing multifamily real estate properties. MMER has also extended working capital lines of credit to the Company in order to increase MMER's return on its capital base pending the investment of those funds in equity real estate. As of December 31, 2001, the various facilities extended by the Group Trust and MMER are as follows:

	Group Trust		MME	
Purpose	Borrowing Facility	Balance Due at December 31, 2001	Borrowing Facility	D

Finance interim construction and permanent lending activities	$50.0 million warehouse facility	$5.0 million	$20.0 million line of credit
Finance working capital and carry over loans	$30.0 million warehouse facility	$27.5 million	$20.0 million line of credit
Fund syndication advances to limited partnerships	$10.0 million line of credit	$2.8 million	--
Finance interim construction lending	--	--	$20.0 million line of credit
Fund syndication advances to limited partnerships	$30.0 million line of credit	$30.0 million	$20.0 million line of credit

The following discussion outlines the Company's liquidity and capital resources with respect to these segments followed by a discussion of the economic factors that influence these items and the Company. This discussion is followed by a summary of the Company's off-balance sheet financings and commitments and contingencies and cash flow.

Investing Segment

As noted above, the Company's investing segment relies primarily on securitization transactions and equity offerings to finance its growth. The Company grows its investment segment by acquiring

30

diversified portfolios of tax-exempt bonds and other bond related investments. In 2001, the Company completed a Common Share equity offering and a TE Bond Preferred Share offering. In addition, the Company completed securitization transactions with Merrill Lynch and Freddie Mac.

Common Share Offerings

On February 8, 2002, the Company sold to the public 3.0 million Common Shares at a price of $24.70 per share and granted the underwriters an option to purchase up to an aggregate of 450,000 Common Shares to cover over-allotments at the same price. Net proceeds on the 3.0 million shares approximated $70.5 million. On February 15, 2002, the underwriters exercised their option to purchase 300,000 Common Shares generating net proceeds of approximately $7.1 million. The net proceeds from this offering will be used for general corporate purposes, including new investments and working capital.

On February 6, 2001, the Company sold to the public 3.8 million common shares at a price of $23.07 per share and granted the underwriters an option to purchase up to an aggregate of 570,000 common shares to cover over-allotments at the same price. The net proceeds from this offering were used for general corporate purposes, including new investments and working capital.

Preferred Share Equity Offerings

In May 1999, TE Bond Sub sold to institutional investors $84 million of Series A Cumulative Preferred Shares ("Series A Preferred Shares"). In June 2000, TE Bond Sub sold to institutional investors $60 million of Series B Cumulative Preferred Shares ("Series B Preferred Shares"). In October 2001, TE Bond Sub sold to institutional investors $16 million of Series A-1 Cumulative Preferred Shares ("Series A-1 Preferred Shares") and $8 million of Series B-1 Subordinate Cumulative Preferred Shares ("Series B-1 Preferred Shares"; all four Series, collectively, the "TE Bond Preferred Shares"). The net proceeds generated from the October 2001 offering were approximately $22.8 million.

The Series A and A-1 Preferred Shares bear interest at 6.875% and 6.30% per annum, respectively, or, if lower, the aggregate net income of the issuing company, TE Bond Sub. The Series A and A-1 Preferred Shares have a senior claim to the income derived from the investments owned by TE Bond Sub. The Series A-1 Shares are equal in priority of payment to the Series A Preferred Shares. The Series B and B-1 Preferred Shares bear interest at 7.75% and 6.80% per annum, respectively, or, if lower, the aggregate net income of the issuing company, TE Bond Sub, after payment of distributions to the Series A and Series A-1 Preferred Shares. The Series B-1 Shares are equal in priority of payment to the Series B Preferred Shares. Any income from TE Bond Sub available after payment of the cumulative distributions of the TE Bond Sub Preferred Shares is allocated to the Company, which holds all of the common equity interests. Cash distributions on the TE Bond Sub Preferred Shares will be paid quarterly on each January 31, April 30, July 31 and October 31. The TE Bond Sub Preferred Shares are subject to remarketing on specified dates. On the remarketing date, the remarketing agent will seek to remarket the shares at the lowest distribution rate that would result in a resale of the TE Bond Sub Preferred Shares at a price equal to par plus all accrued but unpaid distributions. The TE Bond Sub Preferred Shares will be subject to mandatory tender on specified dates, and on all subsequent remarketing dates at a price equal to par plus all accrued but unpaid distributions.

31

Securitizations

Through securitizations, the Company seeks to enhance its overall return on its investments and to generate proceeds that, along with equity offering proceeds, facilitate the acquisition of additional investments. The Company uses various programs to facilitate the securitization and credit enhancement of its bond investments.

Through the use of securitizations, the Company expects to employ leverage and maintain overall leverage ratios in the 50% to 65% range, with certain assets at significantly higher ratios, up to approximately 99%, while not leveraging other assets at all. The Company calculates leverage by dividing on-balance sheet debt plus the total amount of third party owned senior interests in its investments, which it considers the equivalent of off-balance sheet financing, by the sum of total assets owned by the Company plus senior interests owned by others adjusted for reserves equal to the net assets of the operating segment. Under this method, the Company's leverage ratio was approximately 53% both at December 31, 2001 and at December 31, 2000.

In order to facilitate the securitization of certain assets at higher leverage ratios than otherwise available to the Company without the posting of additional collateral, the Company has pledged additional bonds to a pool that acts as collateral for senior interests in certain securitization trusts and credit enhancement facilities. At December 31, 2001 and 2000, the total carrying

amount of the tax-exempt bonds and taxable loans pledged as collateral was $361.8 million and $311.8 million, respectively.

Following is a description of the Company's various credit enhancement and securitization investment vehicles.

Merrill Lynch P-FLOATs(SM) program

The Company securitizes tax-exempt bonds in its portfolio through the Residual Interest Tax-Exempt Securities Receipts ("RITESSM")/Puttable Floating Option Tax-Exempt Receipts ("P-FLOATsSM") program offered by Merrill Lynch Pierce Fenner & Smith Incorporated ("Merrill Lynch"). Through this program, the Company sells bonds to Merrill Lynch or structures a transaction whereby Merrill Lynch buys bonds from third parties. Merrill Lynch in turn, deposits the bonds into trusts, which are created to hold these assets. Subsequently, these bonds are credit enhanced by Merrill Lynch. Two types of securities, P-FLOATsSM and RITESSM, are created for each asset deposited into the trusts. The P-FLOATsSM are short-term floating rate interests in the trusts that have priority on the cash flows of the tax-exempt bonds and bear interest at rates that are reset weekly by the remarketing agent, Merrill Lynch. The P-FLOATsSM are sold to qualified third party investors. When the Company sells a bond to Merrill Lynch, the Company receives the proceeds from the sale of the P-FLOATsSM, less certain transaction costs, and retains the residual interests in the trusts, the RITESSM. When Merrill Lynch buys the bond directly, the Company purchases the RITESSM from a Merrill Lynch sponsored trust. The RITESSM are the subordinate security and receive the residual interest on the bond after the payment of all fees and the P-FLOATsSM interest.

Since the bonds securitized generally bear fixed rates of interest, the floating rate residual interests in the trust created by the securitization may subject the Company to interest rate risks. To reduce the Company's exposure to interest rate risks on residual interests retained, the Company may enter into interest rate swaps. Net swap payments received, if any, will be taxable income, even though the

32

investment being hedged pays tax-exempt interest. Although these swaps act as hedges, the Company does not designate them as hedges for accounting purposes under FAS 133; therefore, changes in fair value are reflected in earnings.

The terms of the securitization trusts are generally based on the anticipated prepayment of the underlying bond in the trust. If a bond prepayment occurs as anticipated, the Company will receive its pro rata share of proceeds from the prepayment. However, there is no certainty that bond prepayment will occur at the end of the term of the securitization trust. If the bond does not prepay before the securitization trust terminates, the Company would be forced to liquidate its residual investment or, if the Company wished to retain this investment, it would be forced to purchase the remaining interests in the bond.

Term Securitization Facility

In March 1999, the Company consummated a transaction with Merrill Lynch that converted a portion of its investment in the P-FLOATsSM trusts discussed above into a longer-term securitization facility. As a result, this transaction enabled the Company to (a) reduce its exposure to credit and annual renewal risks associated with the liquidity and credit enhancement features of the securitization? trusts and the swap agreements, (b) reduce the annual financing costs, (c) eliminate the risk of receiving taxable net swap payments which serve to hedge tax-exempt investments, and (d) reduce the Company's exposure to

changes in swap values that may result in margin calls. In July 2001, TE Bond Sub refinanced this facility. The result of the refinancing was a reduction of the outstanding debt from $67 million to $45 million. Substantially all other terms of the debt remained the same.

Fannie Mae Credit Enhancement

During December 2000, the Company closed a $100 million credit enhancement facility through Fannie Mae. The facility refinanced the short-term credit enhancement on approximately $70 million of the Company's existing P-FLOATsSM with long-term credit enhancement through Fannie Mae. The facility also provided credit enhancement to two of the Company's previously unenhanced tax-exempt bonds having an aggregate face value of approximately $10 million at December 31, 2000. The new facility also included the credit enhancement on approximately $20 million of tax-exempt bonds that were previously credit enhanced through MMA Cap, LLC ("MMA Cap") prior to December 2000.

The $100 million credit enhancement facility, which was completed through MMA Cap, is an open ended facility and will facilitate the placement of long term securitization capital, thereby enabling the Company to securitize its tax-exempt bonds at a fixed rate and for a term that more clearly matches the term of the underlying bond. The MMA Cap credit enhancement facility was arranged through Midland and enables the Company to diversify its securitization capabilities. In order to provide credit enhancement to the bonds secured by this facility, the Company pledged additional investments of $29.7 million (face amount) to this facility as collateral.

Freddie Mac Tender Option Bond Program

In December 2001, the Company developed a tender option bond program with the Federal Home Loan Mortgage Corporation ("Freddie Mac"). Through this program, the Company securitized 12 bonds with an aggregate unpaid principal balance of approximately $91.0 million and deposited the bonds in 12 trusts. Prior to this transaction, approximately $34.3 million of these bonds had been securitized through

the P-FLOATs(SM) program. The trusts issued approximately $69.0 million of fixed-rate senior certificates and approximately $22.0 million of fixed-rate subordinate certificates. The Company purchased the subordinate certificates and the senior certificates were sold to third party investors. The net proceeds to the Company upon completion of this transaction approximated $34.7 million, which represents $69.0 million in proceeds from the sale of the fixed-rate senior certificates less $34.3 million for the purchase of the bonds in the P-FLOATsSM program. To increase the attractiveness of the senior certificates to outside investors, Freddie Mac provided credit enhancement through a standby guaranty of payment and agreed to provide liquidity by lending the Company the money to repurchase the senior certificates at the remarketing date (if they are not successfully remarketed), which is five years from issuance. The Company agreed to pay Freddie Mac for the first $22.0 million of losses if any of the bonds fail to generate sufficient income to pay the senior certificate holders, and the Company pledged the subordinate certificates to Freddie Mac to secure this obligation. Freddie Mac's recourse to the Company for losses on the credit enhancement is limited to its right to liquidate the subordinate certificates.

Operating Segment

As noted above, the Company's operating segment relies on the availability of capital from pension funds, both directly and indirectly through the Group

Trust and MMER, in addition to the capital provided by government sponsored entities, such as Fannie Mae and Freddie Mac, to maintain and grow its operations. Through the operating segment, the Company originates construction loans to the affordable multifamily housing industry. The Company's sources of capital to fund these lending activities include notes payable to the Group Trust, warehousing facilities with the Group Trust, MMER and a commercial bank, various short-term bank lines of credit, and working capital. The Company earns income from the difference between the interest charged on its construction loans and the interest due under its notes payable and other funding sources. The Company also earns origination and construction administration fees from originating the loans and servicing the loans during the construction period.

Midland is a Fannie Mae Delegated Underwriter and Servicer ("DUS") and a Freddie Mac approved mortgagee. As a result, for its construction/permanent loans, the Company sells the loans to Fannie Mae, Freddie Mac or the Group Trust as or shortly after the loans are converted to permanent loans. The Company earns a brokerage fee for selling the loans and generally retains the mortgage servicing rights on these loans. The proceeds of the sale of permanent loans are reinvested in new loans.

As a Fannie Mae DUS lender, Midland may share in losses relating to underperforming real estate mortgage loans delivered to Fannie Mae. More specifically, Midland may be required to make servicing advances to pay taxes or insurance premiums or delinquency advances to pay principal or interest (if the borrower fails to make payment). Also, Midland may participate in a deficiency after foreclosure. In connection with this obligation, Midland must maintain a minimum net worth and collateral with a custodian. Its financial exposure, however, is subject to certain deductibles and loss limits. The servicing portfolio balance originated through the DUS program was $584.6 million and $403.9 million at December 31, 2001 and 2000, respectively. Midland is indemnified by the Group Trust against losses it may incur in connection with its servicing of $271.0 million of these loans. As of December 31, 2001, the Company had not incurred any losses on this portfolio.

The Company sells interests in partnerships that provide low-income housing tax credits for investors. The Company earns syndication fees on the placement of these interests with investors. In conjunction with the selling of these partnership interests, the Company may provide certain performance guarantees on

the underlying properties owned by the partnerships. The maximum exposure under these guarantees at December 31, 2001 was $23.8 million, and as of December 31, 2001, the Company does not expect to have to perform under these guarantees and does not believe that any loss is likely.

Factors that Could Affect Future Results

In seeking out attractive multifamily and other housing-related investment opportunities, the Company competes directly against a large number of lenders -- including banks, finance companies and other financial intermediaries - and providers of related services such as portfolio loan servicing. Certain of the Company's competitors, including GMAC, Prudential Mortgage Finance and Lend Lease Mortgage Capital Co., have substantially greater financial and operational resources than the Company. While the Company has historically been able to compete effectively against such competitors on the basis of its service, longstanding relationships with developers and a broad array of product offerings, many of our competitors benefit from substantial economies of scale in their business and have other competitive advantages.

In addition, in seeking permanent financing for their developments, the Company's customers generally evaluate a wide array of taxable and tax-exempt financing options. While tax-exempt financings offer specific attractions for developers, they can be more complicated than taxable financings and can involve ongoing restrictions on the owner's use of the property. Consequently, the relative attractiveness of tax-exempt permanent financing may increase or decrease over time based on the availability and cost of taxable financing. While our strategic emphasis on tax-exempt financing will continue, the Company does offer taxable permanent debt financing options and, with financing from pension funds through MMER, offers taxable equity financing as well.

The Company's results of operations could also be materially affected by changes in the performance of the properties underlying its investments. We might receive less income from our investments than we expect due to any number of factors, including:

- Adverse economic conditions, either local, regional or national, limiting the amount of rent that can be charged for units at the properties. Adverse economic conditions may also result in a reduction in timely rent payments or a reduction in occupancy levels.

- Occupancy and rent levels may decrease due to the construction of additional housing units or the establishment of rent stabilization or rent control laws or similar agreements.

- A decline in the level of mortgage interest rates may encourage tenants in multifamily rental properties to purchase housing, reducing the demand for rental housing.

- Expenses at the property level, including but not limited to capital needs, real estate taxes and insurance, may increase.

Periods of economic slowdown or recession that result in declining properties or property performance, particularly declines in the value or performance of multifamily properties, may adversely affect our business. Any material decline in property values weakens the collateral value of the properties we invest in, and prolonged poor performance in the affordable housing market segment could result in a decline in demand for financing. Additionally, some of our income comes from contingent interest on participating tax-exempt bonds. A decline in the performance of the related multifamily property would likely have a negative effect on our cash available for distribution.

35

The Company's business prospects are directly impacted by governmental policy decisions relating to investments in affordable housing which affect the supply of tax-exempt bonds and low-income housing tax credits ("LIHTC"). For example, in late 2000 Congress passed legislation increasing the LIHTC, which is determined on a state-by-state basis according to each state's population, from $1.25 in 2000 to $1.50 in 2001 and $1.75 in 2002. This increase contributed to the Company's $114.7 million of tax credit equity originations in 2001 (an increase of $17.1 million, or 18%, over 2000) and is expected to facilitate higher production volume in 2002. Also in 2000, Congress approved a 50% increase in allocations for tax-exempt and other "private activity" bonds, from $50.00 per state resident for 2000 to $75.00 for 2002. Current legislation provides for inflation-based adjustments to the LIHTC and tax-exempt bond allocations starting in 2003.

Our future results are also dependent on the Company's maintenance of its

relationships with the government sponsored entities ("GSEs") participating in the affordable housing market, particularly Fannie Mae and Freddie Mac. The maintenance of the Company's DUS license with Fannie Mae is critical to the continued productivity and growth of the Company's operating segment. As a DUS Lender, the Company is subject to periodic reviews by Fannie Mae and must comply with a variety of underwriting and servicing guidelines imposed by Fannie Mae contractually. Noncompliance or failure to adhere to these guidelines could result in loss of delegated authority and most severely a revocation of the Company's DUS license. Alternatively, Fannie Mae could impact the value of the DUS license to the Company by either (i) issuing new DUS licenses to the Company's competitors or (ii) changing the delegated authority of its DUS lenders or making it more costly or otherwise more difficult for DUS lenders to underwrite and service loans on Fannie Mae's behalf. Of the $175.8 million of construction loans originated in the operating segment in 2001, 93% of the total were for projects underwritten and structured so as to be eligible for permanent financing through one of the GSEs.

The Company also relies on the GSEs as a source of liquidity and credit enhancement. (See "Liquidity and Capital Resources -- Fannie Mae Credit Enhancement and "--Freddie Mac Tender Option Bond Program" above.) Consequently, our results may be impacted by changes in the strategic direction of the GSEs, particularly those which diminish their appetite for investment in affordable housing.

The pension fund participants in the Group Trust and MMER provide significant financial support to the Company's operating segment. While the Company believes its relations with these pension funds are good, it is possible that these funds will reduce or withdraw their financing commitments in the future. At December 31, 2001, the Group Trust and MMER together accounted for $200 million, or 64% of the operating segment's borrowing capacity.

As described in "Investing Segment--Merrill Lynch P-FLOATs(SM) Program" above, the Company regularly purchases RITESSM, which are floating rate residual interests in securitization trusts established through Merrill Lynch. The Company attempts to mitigate its floating rate risks by investing in interest rate swaps. At December 31, 2001, the Company was party to interest rate swaps in the aggregate notional amount of $422.2 million. The Company's floating rate exposure at any point in time may not have been fully mitigated by hedging instruments and, as a result, changes in interest rates could result in either an increase or decrease in the Company's interest income and cash flows associated with these investments. See Note 7 to the Company's consolidated financial statements for a more detailed discussion of this issue.

In addition, the effectiveness of the Company's strategy to mitigate interest rate risk could be

impacted by factors affecting the creditworthiness of the Company's swap counterparties. Credit downgrades of the Company's swap counterparties or other factors may limit their participation in interest rate swaps, which could make it more costly for the Company to continue its interest rate risk management strategy. The Company has recently begun to distribute its interest rate swap portfolio among several counterparties in order to limit counterparty credit risk. At December 31, 2001, Merrill Lynch was the swap counterparty on $171.7 million, or 41%, of the Company's interest rate swaps.

The Company also relies on the GSEs as a source of liquidity and credit enhancement. (See "Liquidity and Capital Resources -- Fannie Mae Credit Enhancement and "--Freddie Mac Tender Option Bond Program" above.) Consequently,

our results may be impacted by changes in the strategic direction of the GSEs, particularly those which diminish their appetite for investment in affordable housing. The Company's future results could also be impacted by deterioration in the credit quality of Fannie Mae and Freddie Mac, which provide credit enhancement and liquidity support which facilitates the securitization of the Company's assets. See "Quantitative and Qualitative Disclosures about Market Risk--Risks Associated with Securitizations" below. If Fannie Mae and Freddie Mac ceased to provide such support, the Company would have to seek alternative forms of credit and liquidity support in order to continue to leverage its assets. The Company does not have any reason to believe that either entity will cease to provide such support; nevertheless, the Company is negotiating with other prospective providers of credit enhancement in order to limit this risk.

Fannie Mae and Freddie Mac also benefit from a number of government-confirmed benefits; including, for example, the following: (1) their earnings are exempt from state and local corporate income taxes; (2) their securities are exempt from SEC registration requirements; and (3) their securities are eligible for unlimited investment by federally insured thrifts, national banks and state bank members of the Federal Reserve system. These advantages, coupled with the size and prominence of Fannie Mae and Freddie Mac in the mortgage-backed security market, have led to recent scrutiny of their role in the mortgage market. A number of sizeable financial services companies and trade associations have launched a concerted effort to limit the growth of the GSEs and spur close examination of how the benefits of their GSE status are being employed. While it is impossible to predict the ultimate impact of this lobbying effort, it could conceivably result in a contraction of the GSEs' support of the affordable housing market.

In 2001 the Company embarked on a comprehensive overhaul of its information systems infrastructure in an effort to: (i) standardize the Company's hardware and internal communications platforms; (ii) upgrade the Company's accounting and financial systems to an enterprise resource planning (ERP) system; and (iii) develop scalable, integrated loan underwriting, deal management and loan servicing systems tailored to the Company's needs and expected growth profile. As of December 31, 2001, the Company had: implemented the accounting modules; replaced our local-area networks and implemented a five-year outsourcing arrangement with an application services provider for wide-area network connectivity, secure internet access and application hosting; and upgraded and unified the Company's basic office productivity software on a Microsoft Office 2000 platform. Management expects these information systems upgrades to continue through 2003. The Company believes that successful implementation of the upgrades will increase the Company's efficiency in future years; however, delays or complications in implementation may have an adverse impact on the Company's operations.

Cash Flow

At December 31, 2001 and 2000, the Company had cash and cash equivalents of approximately $97.4 million and $27.5 million, respectively.

Cash flow from operating activities was $31.5 million, $29.0 million and $30.7 million for the years ended December 31, 2001, 2000 and 1999, respectively. The increase in cash flow for 2001 versus 2000 is due primarily to an increase in income from new investments and an increase in other income attributable to Midland. The decrease in cash flow for 2000 versus 1999 is due primarily to an increase in other receivables at Midland.

The Company uses CAD as the primary measure of its ability to pay

distributions. CAD differs from net income because of slight variations between generally accepted accounting principles ("GAAP") income and actual cash received. There are three primary differences between CAD and GAAP income. The first is the treatment of loan origination fees, which for CAD purposes are recognized as income when received but for GAAP purposes are amortized into income over the life of the associated investment. The second difference is the non-cash gain and loss recognized for GAAP associated with valuations, sales of investments and capitalization of mortgage servicing rights net of deferred taxes, which are not included in the calculation of CAD. The third difference is the treatment of goodwill and other intangibles, which are amortized into expense for GAAP, but not included in the calculation of CAD.

Until the redemption of the Company's preferred shares in 2002, the Company was required to distribute to the holders of its preferred shares the cash flow attributable to such shares (as defined in the Company's Amended and Restated Certificate of Formation and Operating Agreement). The Company was also required to distribute 2.0% of the Company's net cash flow to the holders of term growth shares. The balance of the Company's net cash flow is available for distribution to the common shares and the Company's current policy is to distribute to common shareholders at least 80% of the annual CAD to common shares. For the years ended December 31, 2001 and 2000, cash available for distribution to common shares was $41.6 million and $32.6 million, respectively. The Company's distribution per common share for 2001 of $1.7150 represents a payout ratio of 89.2% of CAD. The Company's common share distribution for 2000 of $1.6725 represents a payout ratio of 90.0% of CAD.

Regular cash distributions to shareholders attributable to the years ended December 31, 2001, 2000 and 1999 were $38.8 million, $31.5 million and $29.7 million, respectively.

The Company expects to meet its cash needs in the short-term, which consist primarily of funding new investments, operating expenses and distributions on the common shares and other equity, from cash on hand, operating cash flow, equity offering proceeds and securitization proceeds.

Related Party Transactions

Pension Fund Advisory Business

A subsidiary of the Company functions as an investment advisor for several pension funds and profit-sharing trusts. Since 1991, these funds and trusts have provided short-term debt financing to the Company through the Group Trust. The Group Trust was formed by these pension funds in order to facilitate their lending to the Company in accordance with their internal policy requirements. In 2000,

these same pension funds established the MMER in order to participate as equity investors in a portfolio of income-producing multifamily real estate properties. MMER has also extended working capital lines of credit to the Company in order to increase MMER's return on its capital base pending the investment of those funds in equity real estate.

The various credit lines established by the Group Trust and MMER are described in detail in "Liquidity and Capital Resources" section above. As of December 31, 2001, these credit lines totaled $200.0 million, and loans outstanding to various subsidiaries of the Company totaled $72.8 million.

The Group Trust and MMER engage in business transactions exclusively with the Company. Four of the five trustees of the Group Trust (Mr. Falcone, Mr. Mentesana, Mr. Robert J. Banks, and Mr. Keith J. Gloeckl) are officers of the Company. In addition, three of the five trustees of MMER (Mr. Falcone, Mr. Banks and Mr. Gloeckl) are Company officers. Consequently, the Group Trust and MMER are deemed to be affiliates of the Company.

Management believes that the Group Trust and MMER were established on arm's length terms with the pension funds and that all transactions between the Company and the Group Trust and the Company and MMER are arm's length transactions. Management further believes that the facilities bear market rates of interest and that the collateral requirements are substantially equivalent to the requirements of the Company's lenders which have no other affiliation with the Company. None of the Company's officers who serve as trustees of the Group Trust or MMER receives compensation from the Group Trust or MMER for serving in that capacity.

In addition to the liquidity provided by the Group Trust and MMER working capital lines of credit, the Company earns placement and management fees from them. For the years ended December 31, 2001, 2000, and 1999, respectively, the Company's fees from the Group Trust totaled $2.0 million, $1.0 million and $1.6 million. For the year ended December 31, 2001 the Company's fees from MMER totaled $30,000.

The Company believes that special purpose entities such as the Group Trust and MMER are attractive investment vehicles for pension funds and other sophisticated institutional investors because they enable those investors to benefit from the Company's specialized real estate experience while permitting them to tailor collateral, reporting and other features of the investment vehicle to their specific interests. Accordingly, the Company intends to continue to market its services to such investors. In addition, the Company and the investors in the Group Trust and MMER may agree to increase or decrease the size, or change the investment purposes, of those investment vehicles from time to time.

The Shelter Group

Mr. Joseph controls and is an officer of Shelter Development Holdings, Inc. ("Shelter Holdings") which, together with its affiliates (collectively, the "Shelter Group"), engages in real estate development and provides property management services to a wide variety of commercial and residential properties. One of the Shelter Group companies provides property management functions for a number of properties that serve as collateral for the Company's bond investments. Mr. Falcone had an ownership interest in and was a board member of this entity until he relinquished these positions in 2000.

The Shelter Group receives fees pursuant to management contracts for properties which it manages. During 2001, Shelter had 12 property management contracts for properties that collateralize the Company's investments with fees at or below market value. During 2000, there were 12 affiliated

property management contracts for properties that collateralize the Company's investments with fees at or below market value. During the years ended December 31, 2001, 2000 and 1999, these fees approximated $1.1 million, $1.3 million, and $1.1 million, respectively. Of the 12 property management contracts with the Shelter Group in effect as of December 31, 2001, seven were for properties which had been under the management of the Shelter Group since prior to the formation of the Company, and three were for properties whose prior managers were replaced

due to poor performance.

Consistent with the Company's Amended and Restated Certificate of Formation and Operating Agreement (the "Operating Agreement"), each affiliate property management contract is presented to the independent members of the Board of Directors for approval with information documenting the comparability of the proposed fees to those in the market area of the property.

Mr. Joseph has agreed to abstain from any involvement, as a partner in the Shelter Group, in the structuring or review of any contracts or transactions between the Shelter Group and the Company. He has likewise agreed to recuse himself from review or involvement, as an officer or director of the Company, in contracts and transactions involving the Shelter Group. The Company's Board of Directors has approved all contracts and transactions involving the Shelter Group and conducts an annual review of all property management contracts between the Shelter Group and any properties that collateralize the Company's investments.

Management of Defaulted Assets

In certain circumstances involving the Company's tax-exempt bonds, borrowers have defaulted on their debt obligations to the Company. In such circumstances the Company has, after evaluating its options, chosen not to foreclose on the property. Instead, the Company has negotiated the transfer of a property's deed in lieu of foreclosure to, or replaced the general partner of a property with, an entity affiliated with the Company. The Company has done so in order to preserve the original tax-exempt bond obligations and its participation in cash flow from the property, consistent with its overall goal of providing tax-exempt income to its shareholders.

Following the transfer of the property's deed to an affiliated entity, that entity controls the collateral for certain investments held by the Company. These affiliated entities are controlled by or managed by certain officers of the Company. The following table outlines these affiliate relationships at December 31, 2001:

Affiliate Entity	Number of Properties Owned (directly or indirectly)	Carrying Va Investment at
SCA Successor, Inc. (1)	4	$ 43
SCA Successor II, Inc. (1)	11	54
MMA Affordable Housing Corporation (2)	2	45
MuniMae Foundation, Inc (3) / MMA Successor I., Inc. (1)	3	23
Total	20	$168

(1) These corporations are general partners of the operating partnerships whose property collateralizes the Company's investments. Mr. Joseph controls the general partners of these operating partnerships and Mr. Falcone serves as director in three such general partners. Ms. Angela A. Barone, the Company's Vice President of Finance and Budgeting, serves as an officer in one such general partner.

(2) MMA Affordable Housing Corporation ("MMAHC") is a 501(c)(3) non-profit entity organized to provide charitable donations on behalf of the Company. Mr.

Joseph is the Chairman and one of five directors of the MMAHC. Mr. Falcone, Mr. Gary A. Mentesana and Mr. Earl W. Cole, III, Senior Vice President of the Company, are also officers and directors of the MMAHC.

(3) MuniMae Foundation, Inc.is a private non-profit entity organized to provide charitable donations on behalf of the Company. Mr. Joseph is the President and one of four directors of the MuniMae Foundation. Mr. Falcone and Mr. Mentesana, the Company's Chief Capital Officer, are also directors of the MuniMae Foundation.

None of the officers of the Company who serve as directors or officers of the affiliated entities listed above is compensated for his services as officer or director thereof or derives any other economic benefit from those entities except for Mr. Joseph, who controls the general partner of SCA Successor I, Inc., SCA Successor II, Inc. and MMA Successor I, Inc.

Such entities could have interests that do not fully coincide with, or even are adverse to, the interests of the Company. Such entities could choose to act in accordance with their own interests, which could adversely affect the Company. Among the actions such entities could desire to take might be selling a property, thereby causing a redemption event, at a time and under circumstances that would not be advantageous to the Company.

Certain other related party relationships are discussed in Note 16 to the Company's Consolidated Financial Statements.

Income Tax Considerations

MuniMae is organized as a limited liability company. This structure allows MuniMae to combine the limited liability, governance and management characteristics of a corporation with the pass-through income features of a partnership. MuniMae does not pay tax at the corporate level. Instead, the distributive share of MuniMae's income, deductions and credits is included in each shareholder's income tax return. In addition, the tax-exempt income derived from certain investments remains tax-exempt when it is passed through to the shareholders. The Company records cash dividends received from subsidiaries organized as corporations as dividend income for tax purposes. Approximately 100%, 93% and 83% of MuniMae's tax basis net income for the years ended December 31, 2001, 2000 and 1999, respectively, was tax-exempt for federal income tax purposes.

As a result of the Midland acquisition, in October 1999, the Company restructured its operations into two segments, an operating segment and an investing segment as discussed above. The operating segment, which is directly or indirectly wholly owned by MuniMae, consists primarily of entities subject to income taxes. The Company provides for income taxes in accordance with Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes" ("FAS 109"). FAS 109 requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial statement carrying amounts and the tax basis of assets and liabilities.

The Company has elected under Section 754 of the Internal Revenue Code to adjust the basis of the Company's property on the transfer of shares to reflect the price each shareholder paid for their shares. While the bulk of the Company's recurring income is tax-exempt, from time to time, the Company may sell or securitize various assets, which may result in capital gains and losses for tax purposes. Since the Company is taxed as a partnership, these capital

gains and losses are passed through to shareholders and are reported on each shareholder's Schedule K-1. The capital gain and loss allocated from the Company may be different for each shareholder due to the Company's 754 election and is a function of, among other

41

things, the timing of the shareholder's purchase of shares and the timing of transactions, which generate gains or losses for the Company. This means that for assets purchased by the Company prior to a shareholder's purchase of shares, the shareholder's basis in the assets may be significantly different than the Company's basis in those same assets. Although the procedure for allocating the basis adjustment is complex, the result of the election is that each share is homogeneous, while each shareholder's basis in the assets of the Company may be different. Consequently, the capital gains and losses allocated to shareholders may be significantly different than the capital gains and losses recorded by the Company.

A portion of the Company's interest income is derived from private activity bonds that for income tax purposes are considered tax preference items for purposes of alternative minimum tax ("AMT"). AMT is a mechanism within the Internal Revenue Code to ensure that all taxpayers pay at least a minimum amount of taxes. All taxpayers are subject to the AMT calculation requirements although the vast majority of taxpayers will not actually pay AMT. As a result of AMT, the percentage of the Company's income that is exempt from federal income tax may be different for each shareholder depending on that shareholder's individual tax situation.

42

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

The Company invests in certain financial instruments, primarily available-for-sale investments in tax-exempt bonds and other bond related investments that are subject to various forms of market risk including real estate risk, interest rate risk, credit and liquidity risk and prepayment risk. The Company seeks to prudently and actively manage such risks, to earn sufficient compensation to justify the undertaking of such risks and to maintain capital levels consistent with the risks the Company undertakes.

The following is a discussion of various categories of risk that the Company may be subject to in the foreseeable future.

Real Estate Risk

The Company's investments in bonds and other bond related investments are primarily collateralized by non-recourse mortgage loans on real estate properties. One of the major risks of owning investments collateralized by multifamily residential properties is the possibility that the owner of a property collateralizing the investment will not make the payments due to the Company and therefore defaults on the debt obligation. Defaults are subject to a wide variety of factors, including, but not limited to, property performance, property management, supply and demand forces, economic trends, interest rates and other factors beyond the control of the Company. Adverse economic conditions may limit the amounts of rent that can be charged for rental units at the properties or may reduce a property's occupancy level. Occupancy and rent levels may decrease due to the construction of additional housing units. City, state or federal housing programs that subsidize many of the properties may impose rent

limitations and may limit the ability of a property to increase rents. The property may experience an increase in expenses, including but not limited to capital needs, real estate taxes and insurance. All of these conditions and events may increase the possibility that a property owner may be unable to meet its obligations to the Company under its tax-exempt bond. This could affect the Company's cash available for distribution to shareholders. The Company manages this risk through a diligent underwriting process and by carefully monitoring loan performance.

The Company may be adversely affected by periods of economic slowdown or recession that result in declining property values or property performance, particularly declines in the value or performance of multifamily properties. Any material decline in property values weakens the value of the properties as collateral for the Company's investments and increases the possibility of a loss in the event of a default. Additionally, some of our income comes from additional interest on participating tax-exempt bonds. The collection of additional interest may decrease in times of economic slowdown due to lower cash available from the properties. Further, many of the Company's investments are subordinated to the claims of other senior interests and uncertainties may exist as to a borrower's ability to meet principal and interest payments. As a result of these factors, debt service on the investments, and therefore cash flow available for distribution to shareholders, is dependent upon the performance of the underlying properties. Accordingly, a decline in the performance of the related multifamily property could have a negative effect on our cash available for distribution to shareholders.

Interest Rate Risk

Interest rate risk is highly sensitive to many factors, including governmental, monetary and tax policies, domestic and international economic and political considerations and other factors beyond the

Company's control. The interest income collected on investments that bear interest at fixed rates or pay interest based on the cash flow available from the underlying property are not directly impacted by fluctuations in interest rates, unless the investment is prepaid as discussed below. In contrast, the Company's investments in other bond related investments, which bear interest at floating rates, are directly impacted by fluctuations in market interest rates. If interest rates had changed by 100 basis points and 200 basis points at December 31, 2001, the Company's annual interest income on these investments would have changed by $95,000 and $200,000, respectively.

The majority of Company's loans receivable and notes payable related to Midland's operations are generally not expected to be directly subject to interest rate risk. The Company typically provides loans to borrowers (loans receivable) by borrowing from third parties (notes payable). The Company earns net interest income that represents the difference between the interest charged to borrowers and the interest paid to the Company's lenders. The Company typically attempts to match the terms and rates of its loans receivable and notes payable to fix the interest income the Company will receive.

It is important to note that changing interest rate environments could reduce the demand for multifamily tax-exempt and taxable financing, which could limit the Company's ability to structure transactions. Conversely, falling interest rates may prompt historical renters to become first time homebuyers, in turn potentially reducing the demand for multifamily housing. In addition, in a falling interest rate environment, demand for taxable financing could increase relative to tax-exempt financing.

Developing an effective interest rate management strategy can be complex, and no strategy can insulate the Company from all potential risks associated with interest rate changes. The Company manages its interest rate exposure on its investments in RITESSM, which are inverse floaters, through the use of interest rate swaps in the notional amount of the outstanding senior interests in the securitization trusts. Historically, the Company has attempted to hedge substantially all of its floating interest rate exposure; however, from time to time, a portion of the Company's floating rate exposure may not be fully mitigated by hedging instruments. As a result, changes in interest rates could result in either an increase or decrease in the Company's interest income and cash flows associated with these investments. Also, the interest rate swap agreements are subject to risk of early termination on the annual optional termination date by the counterparty, possibly at times unfavorable to the Company. There can be no assurance that the Company will be able to acquire hedging instruments at favorable prices, or at all, when the existing arrangements expire or are terminated. In this case, the Company would be fully exposed to interest rate risk to the extent the hedging instruments are terminated by the counterparty while the securitization trust remains in existence.

In addition, there is no guarantee that the securitization trust will be in existence for the duration of the hedge, as these securitization trusts would be collapsed if the related credit enhancement or liquidity facilities are not renewed.

To generate short-term financing proceeds, the Company occasionally enters into total return swaps with Merrill Lynch. Similar to the RITESSM, these investments are subject to interest rate risk. To date the Company has not always entered into hedging instruments to mitigate this exposure. As a result, changes in interest rates could result in either an increase or decrease in the Company's interest income and cash flows associated with these investments.

The Company's investments in tax-exempt bonds and other bond related investments and

investments in derivative financial instruments are carried at fair value. Significant changes in market interest rates could affect the amount and timing of unrealized and realized gains or losses on these investments. If interest rates had changed by 100 basis points and 200 basis points at December 31, 2001, the market value of these investments would have changed by 5% and 9%, respectively. However, for the participating tax-exempt bonds for which the fair value is determined by discounting the underlying collateral's expected future cash flows using current estimates of discount rates and capitalization rates, changes in market interest rates do not have a strong enough correlation to discount and capitalization rates from which to draw a conclusion. There are many mitigating factors to consider in determining what causes discount and capitalization rates to change, such as macroeconomic issues, real estate capital markets, economic events and conditions, and investor risk perceptions.

Credit and Liquidity Risks

Substantially all of the Company's bonds and other bond related investments lack a regular trading market and are illiquid. This lack of liquidity could be exacerbated during turbulent market conditions or if any of the tax-exempt bonds become taxable or go into default. In the event that the Company may require additional cash during a turbulent market, the Company may have to liquidate its investments on unfavorable terms. In addition, the illiquidity associated with

the Company's bond and other bond related investments can result in increased volatility in the fair value of the Company's investments, which could impact the Company's balance sheet and other comprehensive income.

There can also be significant credit risk assigned by investors in the securitization trusts to the types of investments held by the Company. The illiquid assets held by the Company trade at yields that can be traced to spreads over "investment grade" instruments. On occasion there may be periods of market volatility during which the market investors demand an increased credit spread to "investment grade" investments for the investments owned by the Company. During these times, the market value of the Company's investments may decline significantly. If the investors' required rate of return on the Company's investments had changed 100 basis points and 200 basis points at December 31, 2001, the market value of these investments would have changed by 6% and 12%, respectively.

Under the terms of the Company's interest rate swap agreements and total return swaps with Merrill Lynch, the Company is required to maintain cash deposits with Merrill Lynch (margin call deposits). There is a risk that the Company could be required to liquidate investments to satisfy margin calls on its interest rate swap contracts and total return swap contracts if interest rates rise or fall dramatically. Additionally, the Company is exposed to the credit risks of the Company's counterparties in the interest rate swap contracts and total return swap contracts. The Company's counterparties, under certain circumstances, may not pay or perform under the contracts or they may terminate the contract at times unfavorable to the Company.

In order to facilitate the securitization of certain assets at higher than normal leverage ratios, the Company has pledged additional bonds that act as collateral for the senior interests in the securitization trusts. In the event that a securitization trust cannot meet its obligations, all or a portion of the bonds pledged as collateral may be sold to satisfy the obligations of the senior interest in the securitization trust. In addition, if short-term tax-exempt interest rates rise dramatically and exceed the coupon rate of the underlying fixed rate bond in a securitization trust, the securitization trust would be collapsed as a result of insufficient interest from the underlying fixed rate bond available to service the floating senior interest obligation.

Prepayment Risk

A decrease in market interest rates may result in the redemption of an investment or a borrower prepaying or refinancing the investment prior to its stated maturity. The Company may not be able to reinvest the proceeds of the redeemed investment at an attractive rate of return. This may affect the Company's ability to generate sufficient income to pay distributions.

Risk Associated with Securitizations

Through securitizations, the Company seeks to enhance its overall return on its investments and to generate proceeds that, along with equity offering proceeds, facilitate the acquisition of additional investments. In the securitization trusts, the investment bank (the "credit enhancer") provides liquidity to the trust and credit enhancement to the bonds, which enables the senior interests to be sold to certain accredited third party investors seeking investments rated "AA" or better. The liquidity and credit enhancement facilities are generally for one-year terms and are renewable annually by the credit enhancer. To the extent that the credit enhancer is downgraded below "AA", either an alternative credit enhancement provider would be substituted to

reinstate the desired investment rating or the senior interests would be marketed to other accredited investors. In either case, it is anticipated that the return on the residual interests would decrease, which would negatively impact the Company's income. If the credit enhancer does not renew the liquidity or credit enhancement facilities, the Company would be forced to find alternative liquidity or credit enhancement facilities, repurchase the underlying bonds or liquidate the underlying bond and its investment in the residual interests. If the Company is forced to liquidate its investment in the residual interests and potentially the related interest rate swaps (discussed above), the Company would recognize gains or losses on the liquidation, which may be significant depending on market conditions. As of December 31, 2001, $412.7 million and $346.7 million of the senior interests were subject to annual "rollover" renewal for liquidity and credit enhancement, respectively. Of the $346.7 million, $66.0 million is credit enhanced by Fannie Mae and therefore not subject to annual "rollover" renewal for credit enhancement (see further discussion under Fannie Mae Credit Enhancement). The Company has already extended, in advance, the liquidity and credit enhancement of the senior interests for a period of one year on each trust. The expiration of each facility is staggered for the trusts so that the annual renewals are not concentrated in any one month. In addition, the Company entered an agreement whereby the liquidity and credit enhancement facilities will be automatically extended for six month increments on each six month anniversary thereafter unless notified by the credit enhancer six months in advance of their termination of the facilities. The extension and renewal of the liquidity and credit enhancement facilities have the same terms as the original facilities. The Company continues to review alternatives that would reduce and diversify credit risks.

Item 8. Financial Statements and Supplementary Data.

The consolidated financial statements of the Company, together with the report thereon of PricewaterhouseCoopers LLP dated March 22, 2002, are listed in Item 14(a)(1) and included at the end of this report.

Item 9. Changes in and Disagreements on Accounting and Financial Disclosure.

None.

Part III

Item 10. Directors and Executive Officers of the Registrant.

The information required by Item 10 is contained in the Company's proxy statement for its 2002 annual shareholders meeting under the captions "Election of Directors," "Identification of Executive Officers," and "Compliance with Section 16(a) of the Securities Exchange Act of 1934" and is incorporated herein by reference.

Item 11. Executive Compensation.

The information required by Item 11 is contained in the Company's proxy statement for its 2002 annual shareholders meeting under the heading "Report of the Compensation Committee of the Board of Directors" and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management.

The information required by Item 12 is contained in the Company's proxy statement for its 2002 annual shareholders meeting under the same caption and is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions.

The information required by Item 13 is contained in the Company's proxy statement for its 2002 annual shareholders meeting under the same caption and is incorporated herein by reference.

Part IV

Item 14. Exhibits, Financial Statement Schedules, and Reports on Form 8-K.

(a) (1) List of Financial Statements. The following is a list of the consolidated financial statements included at the end of this report:

Report of Independent Accountants

Consolidated Balance Sheets as of December 31, 2001 and 2000

Consolidated Statements of Income for the Years Ended December 31, 2001, 2000 and 1999

Consolidated Statements of Comprehensive Income for the Years Ended December 31, 2001, 2000 and 1999

Consolidated Statements of Cash Flows for the Years Ended December 31, 2001, 2000 and 1999

Consolidated Statement of Shareholders' Equity for the Years Ended December 31, 2001, 2000 and 1999 Notes to

Consolidated Financial Statements

(2) List of Financial Statement Schedules.

All schedules prescribed by Regulation S-X have been omitted as the required information is inapplicable or the information is presented elsewhere in the consolidated financial statements or related notes.

(3) List of Exhibits. The following is a list of exhibits furnished.

3.1 Amended and Restated Certificate of Formation and Operating Agreement of the Company (filed as Exhibit 4.1 to the Company's Registration Statement on Form S-3/A, File No. 333-56049, and incorporated by reference herein).

3.2 By-laws of the Company (filed as Exhibit 4.2 to the Company's Registration Statement on Form S-3/A, File No. 333-56049, and incorporated by reference herein).

10.4 Master Repurchase Agreement among the Registrant, Trio Portfolio Investors, L.L.C., Rio Portfolio Partners, L.P., Blackrock Capital Finance, L.P., Brazos Fund, L.P. and M.F. Swapco, Inc. dated June 30, 1997 (filed as Item 7 (c) Exhibit 10.4 to the Company's report on Form 8-K, filed with the Commission on January 28, 1998 and incorporated by reference herein).

10.5 Stock Purchase and Contribution Agreement among the Registrant and Messrs. Robert J. Banks, Keith J. Gloeckl and Ray F. Mathis dated September 30, 1999 (filed as Item 7 (c) Exhibit 2.1 to the Company's report on Form 8-K, filed with the Commission on November 8, 1999 and incorporated by reference herein).

10.6 Registration Rights Agreement among the Registrant and Messrs. Robert J. Banks, Keith J. Gloeckl and Ray F. Mathis dated October 20, 1999 (filed as Item 16 Exhibit 2.2 to the Company's report on Form S-3, File No. 333-56049, filed with the Commission on January 24, 2000 and incorporated by reference herein).

10.7 Employment Agreement between the Registrant and Robert J. Banks, dated October 20, 1999 (filed as part of the Company's Form 10-K for the fiscal year ended December 31, 1999 and incorporated by reference herein).

10.8 Employment Agreement between the Registrant and Keith J. Gloeckl, dated October 20, 1999 (filed as part of the Company's Form 10-K for the fiscal year ended December 31, 1999 and incorporated by reference herein).

10.10 Employment Agreement between the Registrant and Mark K. Joseph, dated December 31, 1999 (filed as part of the Company's Form 10-K, as amended, for the fiscal year ended December 31, 1999 and incorporated by reference herein).

10.11 Employment Agreement between the Registrant and Michael L. Falcone, dated December 31, 1999 (filed as part of the Company's Form 10-K, as amended, for the fiscal year ended December 31, 1999 and incorporated by reference herein).

10.12 Employment Agreement between the Registrant and Gary A. Mentesana, dated December 31, 1999 (filed as part of the Company's Form 10-K, as amended, for the fiscal year ended December 31, 1999 and incorporated by reference herein).

10.13 Employment Agreement between the Registrant and William S. Harrison, dated April 9, 2001 (filed as Item 6 (a) Exhibit 10.13 to the Company's report on Form 8-K, filed with the Commission on May 15, 2001.

10.14 Employment Agreement between the Registrant and Keith J. Gloeckl, dated August 30, 2001 (filed as Item 6 (a) Exhibit 10.1 to the Company's report on Form 8-K, filed with the Commission on August 14, 2001.

10.15 Employment Agreement between the Registrant and Robert J.

Banks, dated August 30, 2001 (filed as Item 6 (a) Exhibit 10.1 to the Company's report on Form 8-K, filed with the Commission on November 13, 2001.

Report of Independent Accountants

To the Shareholders and Board of Directors
of Municipal Mortgage & Equity, LLC:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of income, comprehensive income, cash flows and shareholders' equity present fairly, in all material respects, the financial position of Municipal Mortgage & Equity, LLC and its subsidiaries at December 31, 2001 and 2000, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2001 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Notes 1 and 7 to the financial statements, the Company adopted Statement of Financial Accounting Standards No. 133 in 2001.

MUNICIPAL MORTGAGE & EQUITY, LLC
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

Municipal Mortgage & Equity, LLC ("MuniMae") and its subsidiaries (together with MuniMae, the "Company") are principally engaged in originating, investing in and servicing investments related to multifamily housing and other real estate financings. A significant portion of the Company's investments are tax-exempt bonds and interests in bonds issued by state and local governments or their agencies or authorities to finance multifamily housing developments. Interest income from the majority of these investments is exempt for federal income tax purposes. Multifamily housing developments, as well as the rents paid by the tenants, secure these investments. Midland Financial Holdings, Inc. ("Midland"), a wholly owned corporate subsidiary, is a fully integrated real estate investment firm that specializes in originating, investing in and servicing investments in the affordable multifamily housing industry. These investments generate taxable , not tax-exempt, income.

The assets of MuniMae TE Bond Subsidiary, LLC and its subsidiaries (collectively, "TE Bond Sub"), are solely those of TE Bond Sub and are not available to creditors of MuniMae. Because MuniMae indirectly owns all of the common equity interests of TE Bond Sub, TE Bond Sub's assets are consolidated on MuniMae's financial statements. The equity interest in TE Bond Sub held by MuniMae is subject to the claims of creditors of the Company and in certain circumstances could be foreclosed upon.

The consolidated financial statements of the Company are prepared on the accrual basis of accounting in accordance with generally accepted accounting principles ("GAAP"). Certain 2000 and 1999 amounts have been reclassified to conform to the 2001 presentation.

The following is a summary of the Company's significant accounting policies:

Principles of Consolidation

The consolidated financial statements include the accounts of MuniMae, its wholly owned subsidiaries and its majority owned subsidiaries. All significant intercompany balances and transactions have been eliminated. Preferred shareholders' equity in TE Bond Sub, a majority owned subsidiary, represents a minority interest in the Company (see further discussion in Note 3). The consolidated earnings of Midland are included in the Company's results of operations from the date of the Company's acquisition of Midland in October 1999.

Cash and Cash Equivalents

Cash and cash equivalents consist principally of investments in money market mutual funds, short-term marketable securities and reverse repurchase agreements with original maturities of 90

60

days or less, all of which are readily convertible to known amounts of cash in seven days or less. Cash equivalents are carried at cost, which approximates

fair value.

Investment in Tax-Exempt Bonds

Investment in tax-exempt bonds is accounted for under the provisions of Statement of Financial Accounting Standards No. 115, "Accounting for Certain Investments in Debt and Equity Securities" ("FAS 115"). All investments in tax-exempt bonds are classified and accounted for as available-for-sale debt securities and carried at fair value; unrealized gains or losses arising during the period are recorded through other comprehensive income in shareholders' equity, while realized gains and losses and other-than-temporary impairments are recorded through operations. The Company evaluates on an on-going basis the credit risk exposure associated with these assets to determine whether any impairment exists in accordance with the Company's policy discussed in the Other-than-Temporary Impairments section of this Note.

The Company determines the fair value of participating bonds (i.e., bonds that participate in the net cash flow and net capital appreciation of the underlying properties) that are wholly collateral dependent and for which only a limited market exists by discounting the underlying collateral's expected future cash flows using current estimates of discount rates and capitalization rates. The Company engages an independent real estate valuation firm to assist the Company in reviewing the reasonableness of the estimates of discount rates, capitalization rates and other variables used to estimate the fair value of these bonds on an annual basis.

The Company bases the fair value of non-participating bonds, which also have a limited market, on quotes from external sources, such as brokers, for these or similar bonds.

The Company recognizes base interest on the bonds as revenue as it accrues. Interest income in excess of the base interest may be available to the Company through participation features of a bond. Participation interest is recognized as income when received. Delinquent bonds are placed on non-accrual status for financial reporting purposes when collection of interest is in doubt which is generally considered to be after 90 days of non-payment. The Company applies interest payments on non-accrual bonds first to previously recorded accrued interest and, once previously accrued interest is satisfied, as interest income when received. The accrual of interest income would be reinstated once a bond's ability to perform is adequately demonstrated and all interest has been paid.

For tax purposes, the Company recognizes base interest as income as it accrues. For certain investments, in accordance with the terms of the bond document, the Company may also recognize participation interest as income as it accrues for tax reporting. Base interest and participation interest in certain bonds is accrued for tax purposes even when the interest income is not collected. Base interest recognized on the bonds is exempt from federal income tax purposes for the shareholders. In accordance with the terms and conditions of the underlying bond documents and tax regulations, participation interest in certain bonds may be taxable to the shareholders for federal income tax purposes.

61

Investment in RITES(SM)

The Company owns Residual Interest Tax-Exempt Securities Receipts ("RITES(SM)"), a security offered by Merrill Lynch Pierce Fenner & Smith Incorporated ("Merrill Lynch") through its RITES(SM)/Puttable Floating Option Tax-Exempt Receipts ("P-FLOATs(SM)") program discussed more fully in Notes 5 and

6. The Company classifies the RITES(SM) as available-for-sale debt securities under FAS 115 and carries the RITES(SM) at fair value with unrealized gains or losses included in accumulated other comprehensive income. The Company records unrealized holding gains or losses arising during the period through other comprehensive income while other-than-temporary impairments are recorded through operations. The Company evaluates the credit risk exposure associated with these assets to determine whether any impairment exists in accordance with the Company's policy discussed in the Other-than-Temporary Impairments section of this Note. The Company determines the fair value of the RITES(SM), which also have a limited market, based on quotes from external sources, such as brokers, for these or similar investments. The fair value of a RITESSM investment is derived from the quote on the underlying bond reduced by the outstanding face amount of the corresponding P-FLOATs(SM). Accordingly, the value of the RITES(SM) may represent a liability to the Company in the event that the fair value of the underlying bond is exceeded by the face amount of the corresponding P-FLOATs(SM). Any such liabilities are reflected as a liability in the accompanying consolidated balance sheets (see the Other Bond Related Investments table in Note 6). The Company recognizes interest income on the RITES(SM) as revenue as it accrues. Interest recognized on the RITES(SM) is exempt from federal income tax purposes for the shareholders.

Securitization Transactions

For financial reporting purposes, transactions where the Company securitizes a bond and subsequently purchases a residual interest are accounted for in accordance with Statement of Financial Accounting Standards No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities" ("FAS 140"). Under FAS 140, the accounting for these transactions is partially dependent on certain call provisions. If the residual interest holder is granted a call provision under the terms of the transaction, then effective control over the transferred assets has not been relinquished and the transaction is accounted for as a borrowing. When the residual interest holder is not granted a call provision and effective control has been relinquished, the transaction is accounted for as a sale and the Company recognizes gains and losses on the sale of its bonds. The portion of the unrealized gain or loss on a bond that is recognized as a result of the sale is determined by allocating the net amortized cost at the time of sale between the corresponding senior interest and residual interest based upon their relative fair values, in accordance with FAS 140. The Company may also structure transactions whereby a third party buys bonds directly from a seller and the Company subsequently purchases residual investments related to the bonds. In this case, the Company may retain the call provision associated with its investment in the residual interest position without requiring borrowing treatment because the Company does not own the bond.

Investment in Derivative Financial Instruments

Investment in derivative financial instruments is accounted for under the provisions of Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities" and Financial Accounting Standards Board Statement No. 138, "Accounting for

Certain Derivative Instruments and Certain Hedging Activities." These statements (collectively, "FAS 133") establish accounting and reporting standards for derivative financial instruments, including certain derivative financial instruments embedded in other contracts, and for hedging activity. FAS 133 requires the Company to recognize all derivatives as either assets or liabilities in its financial statements and record these instruments at their

fair values. In order to achieve hedge accounting treatment, hedging activities must be appropriately designated, documented and proven to be effective as a hedge pursuant to the provisions of FAS 133. The Company has elected, as permitted by FAS 133, not to prove the hedging effectiveness of its derivative investments due to the cost and administrative burden of complying with FAS 133. As a result, changes in fair value of derivatives are recorded through current earnings.

The Company has several types of financial instruments that meet the definition of a derivative financial instrument under FAS 133, including interest rate swaps, put option contracts and total return swaps (discussed more fully in Notes 5, 6 and 7). Under FAS 133, the Company's investment in these derivative financial instruments is recorded on the balance sheet with changes in the fair value of these instruments recorded in current earnings.

The adoption of FAS 133 does not affect cash available for distribution, the Company's ability to pay distributions, the characterization of the tax-exempt income or the financial obligations under the bonds. Upon adoption, the Company's interest rate swaps and total return swaps were reclassified to trading securities and those with a negative balance were reflected as liabilities on the balance sheet. As of January 1, 2001, the Company's put option contracts were recorded on the balance sheet with a fair value of zero. The cumulative effect of adopting FAS 133 was a decrease to net income of approximately $12.3 million as of January 1, 2001, and is reflected in the income statement as a cumulative effect of accounting change . The Company recognized a decrease in net income of $5.6 million for the year ended December 31, 2001, due to the change in fair value of its derivative instruments. This change is reflected in net holding losses on trading securities in the consolidated statement of income.

Prior to the adoption of FAS 133, the interest rate swap contracts were accounted for as hedges and were carried at fair value and included in other bond related investments, with unrealized gains or losses included in accumulated other comprehensive income. Total return swaps were marked to market and included in other bond related investments on the balance sheet with unrealized gains or losses included in accumulated other comprehensive income.

The Company determines the fair value of its investment in derivatives based on quotes from external sources, such as brokers, for these or similar investments. Investments in derivatives with market values below $0 are reflected as liabilities in the accompanying consolidated balance sheets. The Company recognizes the differential paid or received under these agreements as an adjustment to interest income. Net swap payments received by the Company, if any, will be taxable income, even though the investment being hedged pays tax-exempt interest.

Loans Receivable

The Company carries loans receivable at net realizable value. The Company evaluates on an on-going basis the credit risk exposure associated with these assets to determine whether any

63

impairment exists in accordance with the Company's policy discussed in this Note. When the Company believes that it is probable that it will not collect all amounts due, including principal and interest, under the terms of a loan, it records a valuation allowance.

The Company recognizes base interest on loans as revenue as it accrues;

participation interest is recognized when received. The Company places delinquent loans on non-accrual status for financial reporting purposes when collection of interest is in doubt, which is generally considered to be after 90 days of non-payment. The Company applies interest payments on non-accrual loans first to previously recorded accrued interest and then, once previously accrued interest has been satisfied, as interest income when received. The accrual of interest income would be reinstated once a loan's ability to perform is adequately demonstrated. Interest income is also recognized for the portion of any principal payments received in excess of GAAP basis, including payments for previously unaccrued interest. For tax purposes, the Company recognizes interest income on the loans at rates negotiated at the time such investments were made and, with respect to participation interest, when received. Interest recognized on the loans is taxable to the shareholders when earned by MuniMae or subsidiaries organized as partnerships. Interest recognized on the loans is taxable to the Company and to the shareholders when earned by subsidiaries organized as corporations.

Mortgage Servicing Rights

The Company accounts for its mortgage servicing rights under FAS 140. FAS 140 requires servicing rights retained by the Company after the origination and sale of the related loan to be capitalized by allocating the carrying amount between the loan and the servicing rights based on their relative fair values. The fair value of the mortgage servicing rights is based on the expected future net cash flow to be received over the estimated life of the loan discounted at market discount rates. The capitalization of the mortgage servicing rights is reported in the income statement as a gain or loss on sale and results in an offsetting asset or liability. Mortgage servicing rights are amortized over the estimated life of the serviced loans. The amortization expense is included in goodwill and other intangibles amortization in the consolidated statements of income.

The Company evaluates all capitalized mortgage servicing rights for impairment when changes indicate that impairment is probable, but no less than at each reporting date. The mortgage servicing rights are considered to be impaired when the carrying amount exceeds the fair value of the expected future net cash flows to be received under the servicing contract. Impairment, if any, is recognized through a valuation allowance.

Other Assets

The Company's investment in other assets includes prepaid expenses, other receivables, debt issue costs, investment in partnerships and certain investments in interest-only securities. Prepaid expenses and debt issue costs are amortized over the contract period or the estimated life of the related debt. The Company's investments in partnerships are accounted for using the equity method.

The Company holds interest-only securities (see further discussion in Note 12), which represent the right to receive the excess interest on certain mortgage loans sold to Fannie Mae (defined in Note 2). These rights result from the contractual right to receive the difference between

the interest paid at the borrower's loan rate and interest paid to Fannie Mae at the rate at which the loan was sold to Fannie Mae. The Company classifies these investments as available-for-sale securities under FAS 115 and carries them at fair value with unrealized gains and losses included in accumulated other comprehensive income. The fair value of the interest-only securities is

estimated by discounting the expected future cash flows. Due to the existence of a related obligation to pay all or a portion of these cash flows to the Group Trust (defined in Note 11), a corresponding liability is reflected on the balance sheet in other liabilities.

Property and Equipment

Property and equipment consisting primarily of furniture, fixtures, and computer hardware and software is stated at cost. The Company computes depreciation over the estimated useful lives, ranging from five to ten years, on the 150% declining balance method. Accumulated depreciation was $1.4 million and $1.0 million at December 31, 2001 and 2000, respectively.

Goodwill and Other Intangible Assets

Goodwill and other intangible assets represent the excess of cost over the fair value of the net assets acquired from the acquisition of Midland (see Note 2) and are being amortized over 20 years using the straight-line method. Accumulated amortization was $3.0 million and $1.4 million at December 31, 2001 and 2000, respectively. As discussed under New Accounting Pronouncements, amortization of goodwill, including goodwill recorded in past business combinations, will discontinue upon adoption of Statements of Financial Accounting Standards No. 142 "Goodwill and Other Intangible Assets" ("FAS 142") beginning in 2002. The Company assesses goodwill for impairment when events arise that may indicate impairment has occurred.

Other-than-Temporary Impairments of Investments

The Company evaluates on an on-going basis the credit risk exposure associated with its assets to determine whether other-than-temporary impairments exist or a valuation allowance is needed. When the Company believes that it is probable that it will not collect all amounts due, including principal and interest, under the terms of an investment, it records an other-than-temporary impairment or valuation allowance. The Company bases its measure of impairment of an investment on the present value of expected future cash flows discounted at the investment's effective interest rate, or the fair value of the collateral if the investment is collateral dependent.

Loan Servicing Fees

Loan servicing fees are recognized into income over the period in which the Company performs the associated services.

Brokerage and Syndication Fees

Brokerage fees and syndication fees are recognized into income at the time the earnings process associated with the related transactions is complete and collectibility is reasonably assured.

Other Income

The Company's other income includes asset management fees, income from put options, guarantee fees and other miscellaneous income. Asset management fees are recognized into income over the period in which the Company performs the associated services. Put option and guarantee income is recognized ratably over the term of the associated put option and guarantee agreements.

Origination Fees and Premiums and Discounts on Purchased Investments

Origination fees and premiums and discounts on purchased investments are deferred and amortized into income to approximate a level yield over the estimated lives of the related investments. The unamortized balance of origination fees and premiums and discounts was $3.0 million and $4.4 million at December 31, 2001 and 2000, respectively, and is reported as part of the amortized cost of the related investments. Upon the sale of an investment, the unamortized balance of origination fees and premiums and discounts are recorded as income through the calculation of gains and losses on the sale of investments.

Earnings per Share

The Company calculates earnings per share in accordance with the provisions of Statement of Financial Accounting Standards No. 128, "Earnings per Share" ("FAS 128"). FAS 128 requires the dual presentation of basic and diluted earnings per share on the face of the income statement for all entities with complex capital structures.

Income Taxes

MuniMae is organized as a limited liability company. This structure allows MuniMae to combine the limited liability, governance and management characteristics of a corporation with the pass-through income features of a partnership. MuniMae does not pay tax at the corporate level (although income earned by corporate subsidiaries is taxed at the entity levels). Instead, the distributive share of MuniMae's income, deductions and credits is included in each shareholder's income tax return. In addition, the tax-exempt income derived from certain investments remains tax-exempt when it is passed through to the shareholders. The Company records cash dividends received from subsidiaries organized as corporations as dividend income for tax purposes.

In October 1999, as a result of the Midland acquisition, the Company restructured its operations into two business segments: (1) an investing segment consisting of subsidiaries holding investments producing primarily tax-exempt interest income; and (2) an operating segment that primarily generates taxable interest income and, through corporate subsidiaries, fee income by providing servicing, loan origination and tax credit equity syndication services. The operating segment, which is directly or indirectly owned by MuniMae, consists primarily of entities subject to income taxes. The Company provides for income taxes in accordance with Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes" ("FAS 109"). FAS 109 requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial statement carrying amounts and the tax basis of assets and liabilities.

66

The Company has elected under Section 754 of the Internal Revenue Code to adjust the basis of the Company's property on the transfer of shares to reflect the price each shareholder paid for their shares. While the bulk of the Company's recurring interest income is tax-exempt, from time to time the Company may sell or securitize various assets, which may result in capital gains and losses for tax purposes. Since the Company is taxed as a partnership, these capital gains and losses are passed through to shareholders and are reported on each shareholder's Schedule K-1. The capital gain and loss allocated from the Company may be different for each shareholder due to the Company's 754 election and is a function of, among other things, the timing of the shareholder's purchase of shares and the timing of transactions that generate gains or losses for the Company. This means that for assets purchased by the Company prior to a

shareholder's purchase of shares, the shareholder's basis in the assets may be significantly different than the Company's basis in those same assets. Although the procedure for allocating the basis adjustment is complex, the result of the election is that each share is homogeneous, while each shareholder's basis in the assets of the Company may be different. Consequently, the capital gains and losses allocated to individual shareholders may be significantly different than the capital gains and losses recorded by the Company.

New Accounting Pronouncements

In June 2001, the Financial Accounting Standards Board approved Statements of Financial Accounting Standards No. 141 "Business Combinations" ("FAS 141") and No. 142 "Goodwill and Other Intangible Assets," which are effective July 1, 2001 and January 1, 2002, respectively, for the Company. FAS 141 requires that the purchase method of accounting be used for all business combinations consummated after June 30, 2001. FAS 141 did not have an impact on the Company for the year ended December 31, 2001. Under FAS 142, amortization of goodwill, including goodwill recorded in past business combinations, will be discontinued upon adoption of this standard. For the year ended December 31, 2001, the Company recorded amortization expense of $1.6 million. In addition, goodwill recorded as a result of business combinations completed during the six-month period ending December 31, 2001 will not be amortized. All goodwill and intangible assets will be tested for impairment in accordance with the provisions of the Statement. The Company is currently reviewing the provisions of FAS 141 and FAS 142 and assessing the impact of adoption.

Significant Risks and Uncertainties

Because the Company's assets consist primarily of bonds and other bond related investments secured by non-recourse mortgage loans on real estate properties, the value of the Company's assets is subject to all of the factors affecting bond and real estate values, including macro-economic conditions, interest rate changes, demographics, local real estate markets and individual property performance. Further, many of the Company's investments are subordinated to the claims of other senior interests and uncertainties may exist as to a borrower's ability to meet principal and interest payments.

Use of Estimates

The use of estimates is inherent in the preparation of all financial statements, but is especially important in the case of the Company, which is required under FAS 115 to carry a substantial portion of its assets at fair value even though only a limited market exists for them. Because only a limited market exists for most of the Company's investments, fair value is estimated by the Company in accordance with the Company's valuation procedures discussed above. These estimates involve uncertainties and matters of judgment and therefore cannot be determined with precision. The assumptions and methodologies selected by the Company were intended to estimate the amounts at which the investments could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Changes in assumptions and market conditions could significantly affect estimates. These estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and the differences could be material.

NOTE 2 - MIDLAND ACQUISITION

In October 1999 the Company acquired Midland for approximately $45 million. Of this amount, the Company paid approximately $23 million in cash and

approximately $12 million in Common Shares at the closing of the transaction. In addition, $3.3 million in MuniMae Common Shares was payable annually over a three year period if Midland met certain performance targets, including an annual contribution to cash available for distribution ("CAD"). In December 2000, MuniMae paid approximately $3.3 million in Common Shares in consideration for Midland meeting its first year performance targets. In 2001, in order to increase MuniMae's flexibility in operating Midland, MuniMae agreed with the former owners of Midland that the payment of the 2001 and 2002 installments would no longer be conditioned on Midland meeting certain performance targets. In December 2001, MuniMae paid approximately $3.3 million in Common Shares and, subject to certain conditions, MuniMae expects to make the final payment of Common Shares having a value of approximately $3.3 million in December 2002.

Through Midland, the Company is a fully integrated real estate investment firm specializing in providing financing to the affordable multifamily housing industry. Midland provides construction and permanent debt financing, mortgage servicing and asset management services to the multifamily housing industry. Midland is a Federal National Mortgage Association ("Fannie Mae") Delegated Underwriter and Servicer ("DUS") and a Federal Housing Administration approved mortgagee. Midland syndicates equity for investment in low income housing tax credits. Midland also syndicates equity and originates debt for investment in student/conventional housing, a unique and growing segment of the multifamily housing industry. A subsidiary of Midland is a registered investment advisor with the Securities and Exchange Commission and a wholly owned special purpose subsidiary of Midland provides advisory services to pension funds. Midland currently manages approximately $350 million of pension fund money.

The acquisition is being accounted for as a purchase. The total purchase price incurred during 1999, 2000 and 2001 was $42.6 million, which includes acquisition costs but excludes MuniMae Common Shares issuable in December 2002. The cost of the acquisition was allocated on the basis of the estimated fair value of the net assets acquired, which totaled $7.7 million. The results of operations of Midland are included in the consolidated financial statements of the Company subsequent to October 19, 1999.

68

NOTE 3 - PREFERRED SHAREHOLDERS' EQUITY IN A SUBSIDIARY COMPANY

In May 1999, TE Bond Sub sold to institutional investors $84 million of Series A Cumulative Preferred Shares ("Series A Preferred Shares"). In June 2000, TE Bond Sub sold to institutional investors $60 million of Series B Cumulative Preferred Shares ("Series B Preferred Shares"). In October 2001, TE Bond Sub sold to institutional investors $16 million of Series A-1 Cumulative Preferred Shares ("Series A-1 Preferred Shares") and $8 million of Series B-1 Subordinate Cumulative Preferred Shares ("Series B-1 Preferred Shares"; all four Series, collectively, the "TE Bond Preferred Shares"). The net proceeds generated from the October 2001 offering were approximately $22.8 million.

The Series A and A-1 Preferred Shares bear interest at 6.875% and 6.30% per annum, respectively, or, if lower, the aggregate net income of the issuing company, TE Bond Sub. The Series A and A-1 Preferred Shares have a senior claim to the income derived from the investments owned by TE Bond Sub. The Series A-1 Shares are equal in priority of payment to the Series A Preferred Shares. The Series B and B-1 Preferred Shares bear interest at 7.75% and 6.80% per annum, respectively, or, if lower, the aggregate net income of the issuing company, TE Bond Sub, after payment of distributions to the Series A and Series A-1 Preferred Shares. The Series B-1 Shares are equal in priority of payment to the Series B Preferred Shares. Any income from TE Bond Sub available after payment of the cumulative distributions of the TE Bond Sub Preferred Shares is allocated

to the Company, which holds all of the common equity interests. Cash distributions on the TE Bond Sub Preferred Shares will be paid quarterly on each January 31, April 30, July 31 and October 31. The TE Bond Sub Preferred Shares are subject to remarketing on specified dates as indicated in the table below. On the remarketing date, the remarketing agent will seek to remarket the shares at the lowest distribution rate that would result in a resale of the TE Bond Sub Preferred Shares at a price equal to par plus all accrued but unpaid distributions. The TE Bond Sub Preferred Shares will be subject to mandatory tender on specified dates, as indicated below, and on all subsequent remarketing dates at a price equal to par plus all accrued but unpaid distributions. The following table provides a summary of certain terms of the TE Bond Sub Preferred Shares.

	Series A Preferred Shares	Series A-1 Preferred Shares	Series B Preferred Shares
Issue date	May 27, 1999	October 9, 2001	June 2, 2000
Number of shares	42	8	30
Par amount per share	$2,000,000	$2,000,000	$2,000,000
Dividend rate	6.875%	6.30%	7.75%
First remarketing date	June 30, 2009	June 30, 2009	November 1, 2010
Mandatory tender date	June 30, 2009	June 30, 2009	November 1, 2010
Redemption date	June 30, 2049	June 30, 2049	June 30, 2050

The following table reflects the composition of the TE Bond Sub Preferred Shareholders' equity in TE Bond Sub.

	Series A	Series A-1	Series B	Series B-1

The assets of TE Bond Sub and its subsidiaries, while indirectly controlled

by MuniMae and thus included in the consolidated financial statements of the Company, are legally owned by TE Bond Sub and are not available to the creditors of the Company. The assets owned by TE Bond Sub and its subsidiaries are identified in footnotes to the Investment in Tax-exempt Bonds table in Note 4 and in footnotes to the Other Bond Related Investments table in Note 6. The fair value of such assets aggregated $501.4 million and $447.8 million at December 31, 2001 and 2000, respectively. The equity interest in TE Bond Sub held by MuniMae is subject to the claims of creditors of MuniMae and in certain circumstances could be foreclosed.

70

NOTE 4 - INVESTMENT IN TAX-EXEMPT BONDS

The Company holds a portfolio of tax-exempt bonds and certificates of participation in grantor trusts holding tax-exempt bonds ("COPs"). The tax-exempt bonds are issued by state and local government authorities to finance multifamily housing developments or other real estate financings. The bonds are typically secured by nonrecourse mortgage loans on the underlying properties. The COPs represent a pro rata interest in a trust that holds a tax-exempt bond.

As of December 31, 2001, the Company held $616.5 million of bonds or COPs, of which $83.6 million were participating, $460.0 million were non-participating, $55.7 million were participating subordinate and $17.2 million were non-participating subordinate. The following discussion outlines the general terms of the tax-exempt bonds owned by the Company. The actual terms of each tax-exempt bond vary and are specifically outlined directly and indirectly in the loan documents relating to that bond. A detailed listing of the tax-exempt bonds at December 31, 2001 and 2000 is presented in a table at the end of this note.

General Mortgage Loan Terms

The Company's rights under the bonds it holds are defined by the terms of the related mortgage loans, which are pledged to the Company to secure the payment of principal and interest under the bonds. The Company's rights under the COPs are defined by the terms of the trust agreements. The Company's COPs are secured through its interest in the trust that holds the underlying bonds and the associated pledge of the mortgage loan. These pledges include assignments of mortgages on the underlying properties and of rents. The mortgage loans are generally first or second lien position loans on multifamily housing developments and are generally nonrecourse, except upon the occurrence of certain events. The mortgage loans bear interest at rates determined by arm's-length negotiations that reflect market conditions existing at the time the bonds were acquired or originated by the Company. Participating bonds have additional interest features that allow the Company to participate in the growth of the underlying property. These participating bonds provide for payment of additional interest from available cash flow of the property in addition to the base interest. The terms of the additional interest to be received on a bond are specific to that bond and are set forth in the bond documents. Other bonds provide for payment of a fixed rate of interest but are not non-participating and do not contain additional interest features. Certain participating and non-participating bonds are considered "subordinate" bonds as the payment of interest and principal on the bonds occurs only after payment of principal and interest on a bond that has priority to the cash flow of the underlying collateral.

Principal amortization on the bonds, if any, is received in accordance with amortization tables set forth in the bond documents. If no principal amortization is required during the bond term, the outstanding principal balance

will be required to be repaid or refinanced in a lump sum payment at the end of the holding period or at such earlier time as the Company may require. The mortgage loans are non-assumable except with the consent of the Company. The bonds contain provisions that prohibit prepayment of the bond for a specified period of time.

At December 31, 2001, there were no participating bonds, four non-participating bonds, twelve participating subordinate mortgage bonds, and four subordinate non-participating bonds on

71

non-accrual status. The specific bonds on non-accrual status are noted in the footnotes on the investment in tax-exempt bond table at the end of this note. Interest income recognized on these bonds was $10.2 million, $11.0 million and $10.1 million for the years ended December 31, 2001, 2000, and 1999, respectively. Additional interest income that would have been recognized by the Company had these bonds not been placed on non-accrual status was approximately $1.2 million, $0.5 million and $0.6 million for the years ended December 31, 2001, 2000 and 1999, respectively.

Tax-Exempt Bonds Pledged

In order to facilitate the securitization (see Note 5) of certain assets at higher leverage ratios than otherwise available to the Company without the posting of additional collateral, the Company has pledged additional bonds to a pool that acts as collateral for senior interests in certain securitization trusts. At December 31, 2001 and 2000, the total carrying amount of the tax-exempt bonds pledged as collateral was $358.4 million and $311.8 million, respectively.

2001 Transactions

In 2001, the Company acquired $94.3 million in tax-exempt bonds collateralized by multifamily apartment communities and other real estate. The breakdown of these investments is summarized below:

(In thousands)	Face Amount	Cost	Weighted Average Permanent InterestRate
Non-participating bonds	$98,285	$94,282	6.88%

Of these investments, six are to-be-built communities, five are existing communities and one is an existing communities that is undergoing rehabilitation. The Company received $0.6 million in construction administration and origination fees related to these transactions. These fees are recognized into income over the life of the investment or the services provided.

During the third quarter, the Company repurchased all the P-FLOATs(SM) outstanding in the Village Green securitization trust. The Company then collapsed the securitization trust and deposited the Village Green bond into the restructured Term Securitization Facility discussed in Note 5.

During the fourth quarter, the Company purchased $34.3 million of P-FLOATs(SM) outstanding in five trusts in conjunction with the collapsing of these trusts to place the bonds into the Freddie Mac Tender Offer Bond program discussed in Note 5. The Company also repurchased all the P-FLOATs(SM) outstanding in the Oklahoma securitization trust and retained the whole bond during the fourth quarter.

2000 Transactions

In 2000, the Company acquired $124.8 million in tax-exempt tax-exempt bonds collateralized by multifamily apartment communities. The breakdown of these investments is summarized below:

(In thousands)	Face Amount	Cost	Weighted Average Permanent InterestRate
Participating bonds	$52,212	$51,595	8.03%
Non-participating bonds	77,580	73,208	7.14%

Of these investments, four are to-be-built communities, four are existing communities and four are existing communities that are undergoing rehabilitation. The Company received $2.0 million in construction administration and origination fees related to these transactions. These fees are recognized into income over the life of the investment or the services provided.

Valuation Adjustments

For the years ended December 31, 2001, 2000 and 1999, the net increase (decrease) to other comprehensive income from unrealized holding gains and losses on tax-exempt bonds available for sale was $(8.3) million, $2.7 million and $(0.7) million, respectively.

In the first quarter the Company assumed the obligation to purchase two bonds for their face amount ($21.5 million). In consideration for assuming this obligation, the Company received $1.9 million in cash and a $2.0 million (face amount) taxable note with a fair value of $1.4 million. The Company recognized a $3.3 million other-than-temporary impairment upon the assumption of this obligation. This amount represented the difference between the fair value of the bonds and the face amount of the bonds at the time the Company assumed the purchase obligation. Upon the purchase of the bonds, the Company recognized $3.3 million in income that represented the value of the cash and taxable loan consideration received.

The Company recorded an other-than-temporary impairment totaling $1.0 million on the Lake Piedmont COP in 2000. The Company recorded an other-than-temporary impairment totaling $1.1 million on the interest-only certificate representing the participation interest on the Stone Mountain bond in 1999.

The other-than-temporary impairments (and the unrealized gains and losses) discussed above do not affect the cash flow generated from property operations, distributions to shareholders, the characterization of the tax-exempt income or the financial obligations under the bonds. The Company will continue to evaluate the need for other-than-temporary impairments in the future as circumstances dictate.

Notes:

(1) These bonds also contain additional interest features contingent on available cash flow.

(2) One of the original 22 bonds.

(3) Series B Bonds derived from original 22 bonds.

(4) These assets were pledged as collateral as of December 31, 2001.

(5) TE Bond Sub or its subsidiaries own an 87% interest in these investments.

(6) At December 31, 2001 these bonds were on non-accrual status.

(7) The underlying bonds are held in a trust; TE Bond Sub owns an 18% subordinate interest in the trust.

(8) These bonds were reissued or refunded during 2001. Prior to the reissuance or refunding the bonds were participating. Following the transaction, the new bonds are non-participating.

(9) The underlying bonds are held in a trust; TE Bond Sub owns a certificate in the trust which represents the residual cash flows generated on the underlying bonds.

(10) Investments held by TE Bond Sub or its subsidiaries.

(11) The underlying bonds are held in a trust; TE Bond Sub owns an 81% senior interest in the trust.

(12) The base interest rate represents the permanent base interest rate on the investment as of December 31, 2001.

(13) The permanent interest rate resets monthly based on 90% of the 30 day treasury bill.

(14) The interest rate on the Santa Fe bond will reset in May 2002. At that time the bond will be remarketed at par or a rate not exceeding a rate that will allow the property to perform at a 1.05 debt service coverage on the bond.

(15) The underlying bonds are held in a trust; TE Bond Sub owns a certificate in the trust which represents the residual cash flows generated on 81% of underlying bond. TE Bond Sub also owns the 19% certificate which is pledged as collateral at December 31, 2001.

(16) This bond was paid off during 2001.

(17) The underlying bonds are held in a trust; TE Bond Sub owns a certificate in the trust which represents the residual cash flows generated on 53% of underlying bond. TE Bond Sub also owns the 47% certificate which is pledged as collateral at December 31, 2001.

(18) This investment is comprised of two bonds. The 1998 Series I-1 bond has a face amount of $1,565 and a maturity date of June 11, 2009. The 1998 Series I-2 bond has a face amount of $15,875 and a maturity date of June 11, 2033.

(19) The underlying bond is held in a trust; TE Bond Sub owns the principal and base interest trust certificate.

(20) This investment is comprised of two bonds. The Series A-1 bond has a face of $725,000 and a maturity date of July 2009. The Series A-2 bond has a face of $7,235,000 and a maturity date of July 2033.

NOTE 5 - SECURITIZATION TRANSACTIONS

Through securitizations, the Company seeks to enhance its overall return on its investments and to generate proceeds that, along with equity offering proceeds, facilitate the acquisition of additional investments. The Company uses various programs to facilitate the securitization and credit enhancement of its

bond investments.

In order to facilitate the securitization of certain assets at higher leverage ratios than otherwise available to the Company without the posting of additional collateral, the Company has pledged additional bonds and taxable loans to a pool that acts as collateral for senior interests in certain securitization trusts and credit enhancement facilities. At December 31, 2001 and 2000, the total carrying amount of the bonds and taxable loans pledged as collateral was $361.8 million and $311.8 million, respectively.

The following is a description of the Company's various credit enhancement and securitization investment vehicles and a discussion of the activity in these programs during 2001.

Merrill Lynch P-FLOATs(SM) program

The Company securitizes mortgage bonds in its portfolio through the Merrill Lynch P-FLOATs(SM) program. Through this program, the Company sells bonds to Merrill Lynch or structures a transaction whereby Merrill Lynch buys bonds from third parties. Merrill Lynch, deposits the bonds into trusts, which are created to hold these assets. Subsequently, these bonds are credit enhanced by Merrill Lynch. Two types of securities, P-FLOATs(SM) and RITES(SM), are created for each asset deposited into the trusts. The P-FLOATs(SM) are short-term floating rate interests in the trusts that have priority on the cash flows of the deposited mortgage bonds and bear interest at rates that are reset weekly by the remarketing agent, Merrill Lynch. The P-FLOATs(SM) are sold to qualified third party investors. The RITES(SM) are the subordinate security and receive the residual interest on the bond after the payment of all fees and the P-FLOATs(SM) interest. When the Company sells a bond to Merrill Lynch, the Company receives the proceeds from the sale of the P-FLOATs(SM), less certain transaction costs, and retains the residual interests in the trusts, the RITES(SM). When Merrill Lynch buys the bond directly, the Company purchases the RITES(SM).

In 2001 the Company securitized seven bonds with a face amount of $100.7 million with Merrill Lynch through the P-FLOATs(SM) program. Two of these transactions representing bonds with a face amount of $21.5 million were accounted for as borrowings in 2001. Accordingly, the Company recorded $20.0 million as short-term debt and the related bonds remained in investments in tax-exempt bonds.

In addition, the Company structured five transactions whereby Merrill Lynch bought bonds from third parties with a face amount of $79.2 million. The Company purchased RITES(SM) interests with a par value of $1.3 million for $0.2 million in 2001 related to these transactions. The Company recognized $0.7 million in origination fees on these structured transactions.

In 2000 the Company securitized four bonds with a face amount of $55.6 million with Merrill Lynch through the P-FLOATs(SM) program. Three of these transactions were accounted for as borrowings in 2000. Accordingly, the Company

recorded $41.3 million as short-term debt and the related bonds remained in investments in tax-exempt bonds. The remaining transaction representing bonds with a face amount of $10.7 million was accounted for as a sale as a result of no call provision being granted to the RITES(SM) holder. Accordingly, the Company derecognized its $10.7 million (face amount) investment in this bond and recorded a $5,000 (par value) RITES(SM) investment. The Company recognized a net gain of $0.1 million on this sale transaction.

In addition, the Company structured seven transactions whereby Merrill Lynch bought bonds from third parties with a face amount of $99.7 million. The Company purchased seven RITES(SM) interests with a par value of $38,000 for $0.6 million in 2000 related to these transactions. The Company also purchased two RITES(SM) interests with a par value of $10,000 for $1.2 million related to two bonds sold to Merrill Lynch in December 1999. The Company recognized $1.7 million in origination fees on these structured transactions.

Term Securitization Facility

In March 1999, the Company consummated a refinancing transaction with an affiliate of Merrill Lynch that converted a portion of its investment in the P-FLOATs(SM) program into a longer-term securitization facility. As a result, this facility enabled the Company to reduce its exposure to credit and annual renewal risks associated with the liquidity and credit enhancement features of the P-FLOATs(SM) trusts and the swap agreements. In order to facilitate this transaction, the Company sold to Merrill Lynch its $0.7 million par-value RITES(SM) investments in two P-FLOATs(SM) trusts containing the Gannon-Dade bond (face amount of $55.1 million) and the Whispering Palms bond (face amount of $12.7 million) for $1.0 million. Merrill Lynch then terminated the Gannon-Dade and Whispering Palms P-FLOATs(SM) trusts and deposited the bonds (face amount of $67.8 million) into a new securitization trust (the "Term Securitization Facility").

Two classes of certificates, Class A and Class B, were sold out of the Term Securitization Facility. The $67.0 million par-value Class A certificates, which are senior to the Class B certificates, were sold to qualified third party investors and bear interest at a fixed tax-exempt rate of 4.95% per annum through the remarketing date, August 15, 2005. The interest rate will be reset on the remarketing date to the lowest rate that would result in the sale of the Class A certificates at par plus any appreciation in the value of the underlying bonds attributable to the Class A certificates. TE Bond Sub purchased the $0.8 million par value Class B certificates. The Class B certificates receive the residual interest from the Term Securitization Facility after payment of (1) trustee fees and expenses, (2) all interest and any principal due on the Class A certificates in accordance with the terms of the documents and (3) servicing fees. The Term Securitization Facility is subject to optional liquidation in whole, but not in part, on each February 15, May 15, August 15 or November 15, at the direction of a majority of the Class B certificate holders. The Class A certificates are subject to mandatory tender on the remarketing date. The Term Securitization Facility terminates on August 1, 2008. The Company receives a fee of 0.15% of the weighted average balance of the trust certificates outstanding per annum for acting as the servicer of the Term Securitization Facility.

In July 2001, TE Bond Sub refinanced its Term Securitization Facility. The result of the refinancing was a reduction of the outstanding debt from $67 million to $45 million. Substantially all other terms of the debt remained the same. TE Bond Sub now holds a $5,000 Class B certificate in the facility and the

$45.0 million Class A certificates are held by a third party investor. In order to accomplish the refinancing, the Company removed the Gannon-Dade bond (face amount of $55.1 million) and the Whispering Palms bond (face amount of $12.7 million) from the Term Securitization Facility. These assets were replaced with four new assets with a total face amount of $45.0 million. The new assets in the trust are: Jefferson Commons (face amount of $16.1 million), Florida A&M (face amount of $9.9 million), Village Green (face amount of $6.4 million) and Arlington (face amount of $12.6 million).

In conjunction with this transaction, after the Gannon-Dade bond was removed from the Term Securitization Facility, the Company securitized a $29.0 million (face amount) interest in the bond through the Merrill Lynch P-FLOATs(SM) program. The Company purchased a $5,000 par value RITES(SM) interest in the Gannon-Dade securitization trust for $331,000.

In conjunction with this transaction, a subsidiary of TE Bond Sub provides credit enhancement for the bonds and liquidity support for the Class A certificates in the Term Securitization Facility. In fulfillment of this obligation, the Company pledged assets as collateral to the Term Securitization Facility.

This transaction was accounted for in accordance with FAS 140. As a result of certain call provisions available to the Class B certificate holders, the Company has accounted for this transaction as a borrowing. Accordingly, the Company recorded the Class A certificates as long-term debt and the trust assets are included in investment in tax-exempt bonds. In conjunction with the recording of the long-term debt, the Company capitalized $500,000 in debt issue costs. The Company is amortizing these debt issue costs over the life of the Term Securitization Facility, based on the amount of outstanding debt, using the effective interest method.

Fannie Mae Credit Enhancement

In 1997, the Company purchased $1.3 million in cash and securities held in a Fannie Mae risk-sharing collateral account. The collateral account was part of a structured finance program developed by Fannie Mae to facilitate the credit enhancement of bonds for which there is shared risk. The risk-sharing collateral account provided additional security for three enhanced bonds within a cross-collateralized pool. In the event any of the bonds in the pool cannot fund their debt service payments, the money in the collateral account can be used to fund debt service shortfalls. The collateral account will not be released to the Company until the interest and principal obligations on all the bonds are fulfilled. The release of the collateral account is anticipated to be in 2006 when the bonds are expected to be refunded. The Company had the option to replace the collateral with a letter of credit in which event the cash and securities in the account would be released to the Company concurrently. In the interim, the Company received the interest earned on the balance of the collateral reserve account. The $0.3 million discount on the purchase has been recorded as unearned revenue and was being amortized into income over the expected period in which cash and securities will remain in the collateral account.

In March 2000, the Company replaced the collateral with a letter of credit, causing $1.3 million of cash and securities in the account to be released to the Company concurrently. Upon release of the cash collateral, the Company recognized the $230,000 unamortized balance of the discount on the purchase into

other income.

As part of the purchase of this collateral account, the Company assumed a Master Recourse Agreement with Fannie Mae. Under this agreement, the Company can add additional assets to the existing pool discussed above. This will enable the Company to securitize bonds with Fannie Mae credit enhancement.

During December 2000, the Company worked with Fannie Mae to amend the existing Master Recourse Agreement and then deposited an additional $80 million in bonds to this credit enhancement facility. This transaction immediately

refinanced the short-term credit enhancement on approximately $70 million of our existing P-FLOATs(SM) with long-term credit enhancement through Fannie Mae. The facility also provided credit enhancement to two of our previously unenhanced tax-exempt bonds having an aggregate fair market value of approximately $10 million at December 31, 2000. The facility also includes the credit enhancement on approximately $20 million of tax-exempt bonds that were previously credit enhanced through the facility prior to December 2000. The $100 million credit enhancement facility is an open ended facility and will facilitate the placement of long term securitization capital, thereby enabling the Company to securitize its mortgage bonds at a fixed rate and for a term that more closely matches the term of the underlying bond. In order to provide credit enhancement to the bonds secured by this facility, the Company pledged additional investments to this facility.

Freddie Mac Tender Option Bond Program

In December 2001, the Company developed a tender option bond program with the Federal Home Loan Mortgage Corporation ("Freddie Mac"). Through this program, the Company securitized 12 bonds with an aggregate unpaid principal balance of approximately $91.0 million and deposited the bonds in 12 trusts. Prior to this transaction, approximately $34.3 million of these bonds had been securitized through the P-FLOATs(SM) program. The trusts issued approximately $69.0 million of fixed-rate senior certificates and approximately $22.0 million of fixed-rate subordinate certificates. The Company purchased the subordinate certificates and the senior certificates were sold to third party investors. The net proceeds to the Company upon completion of this transaction approximated $34.7 million, which represents $69.0 million in proceeds from the sale of the fixed-rate senior certificates less $34.3 million for the purchase of the bonds in the P-FLOATs(SM) program. To increase the attractiveness of the senior certificates to third party investors, Freddie Mac provided credit enhancement through a standby guaranty of payment and agreed to provide liquidity by lending the Company the money to repurchase the senior certificates at the remarketing date (if they are not successfully remarketed), which is five years from issuance. The Company agreed to pay Freddie Mac for the first $22.0 million of losses if any of the bonds fail to generate sufficient income to pay the senior certificate holders, and the Company pledged the subordinate certificates to Freddie Mac to secure this obligation. Freddie Mac's recourse to the Company for losses on the credit enhancement is limited to its right to liquidate the subordinate certificates.

This transaction was accounted for in accordance with FAS 140. As a result of certain call provisions available to the subordinate certificate holders, the Company has accounted for this transaction as a borrowing. Accordingly, the Company recorded the senior certificates as long-term debt and the trust assets are included in investment in tax-exempt bonds. In conjunction with the

recording of the long-term debt, the Company capitalized $1.8 million in debt issue costs. The Company is amortizing these debt issue costs over the life of the facility, based on the amount of outstanding debt, using the effective interest method.

NOTE 6 - OTHER BOND RELATED INVESTMENTS

At December 31, 2001, the Company's other bond related investments are primarily investments in RITES(SM). At December 31, 2000, the Company's other bond related investments also included investments in interest rate swaps and total return swaps. In conjunction with the adoption of FAS 133 on January 1, 2001, the Company's investments in interest rate swaps and total return swaps

were reclassified to investments in derivative financial instruments (see further discussion in Note 7). The table at the end of this note provides certain information with respect to the other bond related investments held by the Company at December 31, 2001 and 2000.

The Company holds investments in RITES(SM), a security offered by Merrill Lynch through its P-FLOATs(SM) Program. At December 31, 2001 and 2000, the Company held $5.7 million and $5.0 million (face value) in RITES(SM), respectively. The P-FLOATs(SM) outstanding, which are not reflected in the Company's consolidated balance sheet were $334.2 million at December 31, 2001. In conjunction with the purchase of the RITES(SM) with respect to fixed rate bonds, the Company enters into interest rate swap contracts to hedge against interest rate exposure on the Company's investment in the RITES(SM) (see Note 7). In order to facilitate the securitization of certain assets at higher leverage ratios than otherwise available, the Company has pledged additional bonds to a pool that collateralizes the senior interests in the P-FLOATs(SM) trusts.

From time to time the Company may purchase or sell in the open market interests in bonds that it has securitized depending on the Company's capital position and needs. During the year ended December 31, 2001, the Company purchased and/or sold interests in seven bonds ($60.1 million face amount) that it had previously securitized.

Valuation Adjustments

For the years ended December 31, 2001, 2000 and 1999, the net decrease to other comprehensive income from unrealized holding gains and losses on other bond related investments available-for-sale was approximately $1.9 million, $5.8 million and $3.9 million, respectively.

RITES(SM) Valuation Analysis

The fair value of a RITES(SM) investment is derived from the quote on the underlying bond reduced by the outstanding corresponding P-FLOATs(SM) face amount. The Company bases the fair value of the underlying bond, which has a limited market, on quotes from external sources, such as brokers, for these or similar bonds. The fair value of the underlying bond includes a prepayment risk factor. The prepayment risk factor is reflected in the fair value of the bond by assuming the bond will prepay at the most adverse time to the Company given current market rates and estimates of future market rates. Based on this, an adverse change in prepayment risk would not have an effect on the fair value of the Company's RITES(SM) investments. In addition, the RITES(SM) investments are not subject to prepayment risk as the term of the securitization trusts is only for a period during which the underlying bond cannot be prepaid. Based on

historical information, credit losses were estimated to be zero.

At December 31, 2001 and 2000, a 10% and 20% adverse change in key assumptions used to estimate the fair value of the Company's RITES(SM) would have the following impact:

(In thousands)	2001	2000
Fair value of retained interests	$5,316	$7,750
Residual cash flows discount rate (annual rate)	4.5% - 12.9%	4.9% - 8.5%
Impact on fair value of 10% adverse change	$22,821	$17,996
Impact on fair value of 20% adverse change	$43,783	$34,263

The sensitivity analysis presented above is hypothetical in nature and presented for information purposes only. The analysis shows the effect on fair value of a variation in one assumption and is calculated without considering the effect of changes in any other assumption. In reality, changes in one assumption may affect the others, which may magnify or offset the sensitivities.

(1) Investment held by TE Bond Sub or its subsidiaries at December 31, 2001.

(2) The Company enters into interest rate swap contracts to hedge against interest rate exposure on the Company's investment in RITES. The amounts disclosed represent the net fair values of all the Company's swaps at the reporting date.

(3) Face amount represents notional amount of swap agreements and the dates represent the effective date and the termination date of the swap.

(4) The aggregate negative fair value of the investments is included in liabilities for financial reporting purposes. The negative fair value of these investments is considered temporary and is not indicative of the future earnings on these investments.

(5) Upon the adoption of FAS 133 on January 1, 2001, the Company's investment in interest rate swaps and total return swaps was reclassified to investment in derivative financial instruments (see Note 7).

82

NOTE 7 - INVESTMENT IN DERIVATIVE FINANCIAL INSTRUMENTS
AND FINANCIAL RISK MANAGEMENT

Upon adoption of FAS 133 on January 1, 2001, the Company's investment in interest rate swaps, total return swaps and put option contracts was reclassified from investment in other bond related investments to investment in derivative financial instruments (see further discussion in Note 1). The following table provides certain information with respect to the derivative financial instruments held by the Company at December 31, 2001.

		December 31, 20	
	Notional	Fair Value	
	Amount (4)	Assets	Liabil
Investment in derivative financial instruments (3):	(000s)	(000s)	(0
Interest rate agreements (1)	$ 422,230	$2,912	$(1
Total investment in derivative financial instruments		$2,912	$(1

(1) The Company enters into interest rate swap contracts to offset against interest rate exposure on the Company's investment in RITES(SM). The amounts disclosed represent the net fair values of all the Company's swaps at the reporting date.

(2) The aggregate negative fair value of the investments is included in liabilities for financial reporting purposes. The negative fair value of these investments is considered temporary and is not indicative of the future earnings on these investments.

(3) Upon the adoption of FAS 133 on January 1, 2001, Company's investment in interest rate swaps and total return swaps was reclassified to investment in derivative financial instruments.

(4) Notional amount represents total amount of the Company's interest rate swaps contracts less the total amount of the Company's reverse interest rate swap contracts.

Interest rate swaps

Since the bonds securitized generally bear fixed rates of interest, the floating rate residual interests in the trusts created by the securitization may subject the Company to interest rate risks. To reduce the Company's exposure to interest rate risks on residual interests retained, the Company may enter into interest rate swaps. Historically, the Company has attempted to offset substantially all of its floating interest rate exposure; however, from time to time, a portion of the Company's floating rate exposure may not have been fully mitigated by hedging instruments. As a result, changes in interest rates could result in either an increase or decrease in the Company's interest income and cash flows associated with these investments.

From time to time, the Company may enter into interest rate swap contracts which offset certain of the Company's existing swaps ("reverse interest rate swaps") or the Company may terminate interest rate swaps. The Company may do this in anticipation of or conjunction with converting portions of the Company's short-term floating rate debt to into longer term, fixed rate facilities or to take advantage of lower interest rate environments to lower the annual cost of the

Company's interest rate management strategy.

Under the interest rate swap agreements, the Company is obligated to pay the counterparty a fixed rate. In return, the counterparty will pay the Company a floating rate equivalent to the BMA Municipal Swap Index, an index of weekly tax-exempt variable rate issues. Under the reverse interest rate swap agreements, the counterparty is obligated to pay the Company a fixed rate. In return, the Company will pay the counterparty a floating rate equivalent to the BMA Municipal Swap Index. Net swap payments received, if any, will be taxable income, even though the investment being hedged pays tax-exempt interest. The Company recognizes taxable capital gains or losses upon the termination of an interest rate swap contract. The average BMA rate for 2001, 2000 and 1999 was approximately 2.63%, 4.14% and 3.29%, respectively. The swap contracts, in conjunction with the RITES(SM), are intended to produce a relatively constant yield over the effective duration of the RITES(SM). Risks arise from the possible inability of the counterparty to meet the terms of the contracts with the Company. However, there is no current indication of any such inability. The fair value of the interest rate swap agreements is determined based on quotes from external sources, such as brokers, for these or similar investments.

The interest rate swap agreements are also subject to risk of early termination on the annual optional termination date by the counterparty, possibly at times unfavorable to the Company. There can be no assurance that the

Company will be able to acquire hedging instruments at favorable prices, or at all, when the existing arrangements expire or are terminated. In this case, the Company would be fully exposed to interest rate risk to the extent the hedging instruments are terminated by the counterparty while the securitization trust remains in existence.

Total Return Swaps

To generate short-term financing proceeds, the Company occasionally enters into total return swaps with Merrill Lynch that replicate the total return on a bond or loan financed at a then current market interest rate ("financing rate"). During the term of the swaps, the Company receives net taxable income equal to the excess of the interest rate on the underlying investment over the financing rate. To the extent that the financing rate exceeds the interest rate on the underlying investment, the Company is obligated to pay Merrill Lynch the excess of the financing rate over the interest rate on the underlying investment. In addition to the net taxable income received, total return swaps include a cash settlement at termination, whereby the Company will pay to (receive from) Merrill Lynch an amount equal to the decline (increase) in the market value of the underlying bond or loan. The Company had investments in total return swaps valued at $0 and ($1.8) million with notional amounts of $0 and $25.4 million at December 31, 2001 and 2000, respectively.

Put Options

The Company has occasionally entered into put option agreements with counterparties whereby the counterparty has the right to sell to the Company, and the Company has the obligation to buy, an underlying investment at a specified price. Under the put options, the Company may receive an annual payment for assuming the purchase obligation and providing asset management services on the underlying investments. The purchase price can be reduced in the event of a material adverse change (as defined in the put agreements). At December 31, 2001, the Company had four put options with a fair value of zero. The Company's aggregate obligation under these put options is

$107.3 million at December 31, 2001. The Company received $1.0 million, $1.2 million, and $0.6 million in income from the put options in 2001, 2000 and 1999, respectively.

NOTE 8 - LOANS RECEIVABLE

The Company's loans receivable primarily consist of construction loans, permanent loans, taxable loans and other loans. The general terms of the loans owned by the Company are discussed below. The following table summarizes loans receivable by loan type at December 31, 2001 and 2000.

(In thousands)

Loan Type	2001	2000
Taxable construction loans	$ 271,383	$ 270,481
Taxable permanent loans	86,182	39,821
Taxable loans	30,959	18,416
Other loans	52,405	21,424
	440,929	350,142
Allowance for loan losses	(898)	(851)
Total	$ 440,031	$ 349,291

========= =========

Taxable Construction Loans

The Company's construction loans are short-term taxable loans, the proceeds of which are used to build low-to-moderate income apartment communities. Interest rates on the fixed rate loans range from 6.00% to10.00% and interest rates on the adjustable interest rate loans range from money center bank prime to 2.00% over money center bank prime (4.75% at December 31, 2001). Due to floors, actual rates on variable rate loans range from 6.00% to 11.00% at December 31, 2001. The loans have various maturities through 2004. The loans are collateralized by the properties under construction and guaranteed by the borrowers. Repayment of the loans is expected at the loan's maturity by the proceeds from the permanent lenders upon successful completion of the community.

Taxable Permanent Loans

The Company's taxable permanent loans consist of construction loans that were recently converted to permanent status. The Company anticipates these loans will be delivered to Fannie Mae or other third party permanent lenders in the near future. Interest rates on the fixed rate loans range from 6.50% to 7.25% and interest rates on the adjustable interest rate loans range from 2.25% over the London Interbank Offered Rate ("LIBOR"), to 0.50% over money center bank prime. Due to floors on the LIBOR rate, the actual rate on certain loans is 5.25% at December 31, 2001. The loans are collateralized by the underlying properties.

Taxable Loans

In conjunction with the purchase of certain tax-exempt bonds or structuring of certain investments, the Company has made taxable loans and taxable bonds to

certain of the borrowers. As of December 31, 2001, the Company held 40 taxable loans and bonds. The carrying value of these loans was $28.5 million ($29.1 million par value) at December 31, 2001. The base interest rates on these loans range from 7.15% to 14.00% and the maturity dates range from 2003 to 2039. Of the 40 taxable loans, 14 are equal in priority of payment with the tax-exempt bonds to which they relate, while the remaining loans are subordinate to the related tax-exempt bonds. Certain loans also contain additional interest features that allow the Company to participate in the growth of the underlying property collateral. At December 31, 2001, six taxable loans were on non-accrual status. Interest income recognized was approximately $232,000, $137,000 and $164,000 for the years ended December 31, 2001, 2000 and 1999, respectively. Additional interest income that would have been recognized had these loans not been placed on non-accrual status was approximately $56,000, $37,000 and $16,000 for the years ended December 31, 2001, 2000 and 1999, respectively.

The Company sold six taxable loans with a par value of $9.2 million for $9.4 million in 2001. Under the terms of the sale agreement, the Company has the right to repurchase the loans if the Company pays a yield maintenance penalty to the seller. As a result of the repurchase feature available to the Company, the Company has accounted for these transactions as a borrowing. Accordingly, the Company recorded $9.4 million in long-term debt equal to the face amount of the outstanding loans plus the premium paid to the Company for the loans. The taxable loans are included in loans receivable. The Company is amortizing the premium on the loans over the period that the loans could not be repurchased without paying the yield maintenance penalty.

Other Loans

The Company's other loans consist primarily of working capital loans and short-term taxable loans. In conjunction with the origination of construction loans and syndication of tax credits, the Company has made working capital loans to borrowers. Interest rates on the fixed rate loans range from 9.00% to 10.00% and interest rates on the adjustable interest rate loans range from 1.00% to 5.50% over money center bank prime or LIBOR. The loans have various maturities through 2006. Due to floors, actual rates on variable rate loans range from 6.00% to 11.00% at December 31, 2001. The loans are guaranteed by the borrowers and repayment is expected from construction profits and syndication proceeds. The short-term loans are made as interim financing pending the issuance of tax-exempt mortgage bonds and other loans and advances collateralized by limited partnership's notes receivable and other loans to properties.

Allowance for Loan Losses

The Company's allowance for loan losses is based on the Company's continuing evaluation of the loans receivable and is intended to maintain an allowance adequate to absorb probable losses on these loans. The Company assesses individual loans for impairment based on the Company's policy on other-than-temporary impairments (see Note 1). Adjustments to the allowance due to changes in measurement of impaired loans are recorded in the provision for loan loss. The allowance for loan losses was $898,000 and $851,000 at December 31, 2001 and 2000, respectively.

Taxable Loans Pledged

In order to facilitate the securitization of certain assets at higher leverage ratios than

otherwise available to the Company without the posting of additional collateral, the Company has pledged additional taxable loans to a pool that acts as collateral for senior interests in certain securitization trusts and credit enhancement facilities. At December 31, 2001, the total carrying amount of the taxable loans pledged as collateral was $3.4 million. There were no taxable loans pledged as collateral at December 31, 2000.

NOTE 9 - RESTRICTED ASSETS

Restricted Cash Deposits

Under the terms of the Company's interest rate swap agreements and total return swaps with counterparties, the Company is required to maintain cash deposits ("margin call deposits"). The margin call deposit requirements are specific to each counterparty. The Company must make margin call deposits when the total fair value of the Company's outstanding swap obligations to any one counterparty is greater than $1.0 million. In certain cases, the Company is also required to post up-front collateral on the swap contracts. At December 31, 2001 and 2000, the balances in the Company's margin call deposit accounts were $15.1 million and $20.9 million, respectively.

In conjunction with a guaranty provided by the Company related to the sale of certain taxable notes to Merrill Lynch in December 1998 and March 1999, the Company deposited $1.3 million in cash in an account with Merrill Lynch. This money serves as collateral for the Company's obligation under the guaranty; however, the Company's obligation under the guaranty is not limited to this deposit. In the event that any of the properties cannot fund their payments on

the loan, the money in this account can be used to fund any shortfalls. The Company does not believe that any loss is likely. These funds will not be released to the Company until the interest and principal obligations on all the loans are fulfilled. The Company does not believe it will have to perform under the guaranty.

P-FLOATs(SM) Pledged as Collateral

From time to time, the Company may purchase in the open market P-FLOATs(SM) interests in bonds in order to pledge these interests to a pool that collateralizes the senior interests in the P-FLOATs(SM) trusts (see Note 5). These P-FLOATs(SM) interests in bonds may or may not be related to bonds that the Company has previously securitized. These investments are reflected on the balance sheet as restricted assets and had a carrying amount of $3.0 million at December 31, 2000. The Company had no investments in these P-FLOATs(SM) at December 31, 2001.

NOTE 10 - MORTGAGE SERVICING RIGHTS

Mortgage Servicing Rights

At December 31, 2001 and 2000, the Company had capitalized mortgage servicing rights with a carrying value of $9.0 million and $6.8 million, respectively, net of accumulated amortization of $1.7 million and $0.8 million, respectively. The December 31, 2001 balance of $9.0 million represents $9.2 million in mortgage servicing right assets offset by $0.2 million in mortgage servicing rights liabilities (included in other liabilities). The December 31, 2000 balance of $6.8 million represents $6.9 million in mortgage servicing right assets offset by $0.1 million in mortgage servicing rights liabilities. The

following table shows the activity for the years ended December 31, 2001 and 2000.

(In thousands)	
Balance, December 31, 1999	$ --
Capitalized fees reclassified from goodwill and other intangible assets	5,624
Capitalized mortgage servicing rights	1,931
Amortization	(779)
Valuation allowance	--
Balance, December 31, 2000	$6,776
Capitalized mortgage servicing rights	3,168
Amortization	(936)
Valuation allowance	--
Balance, December 31, 2001	$9,008

At December 31, 2001 and 2000, the fair value of the mortgage servicing rights approximated the carrying amount. The fair value of the mortgage servicing rights was estimated by discounting estimated net servicing income over the future life of the related loan using a market discount rate. The market discount rate was estimated to be 12% and 15% at December 31, 2001 and 2000, respectively. The estimated lives of the loans were determined by considering yield maintenance periods and contractual prepayment penalties, if any. Credit losses were estimated to be zero based on historical performance of

the underlying loans.

NOTE 11 - NOTES PAYABLE AND DEBT

The Company's notes payable primarily consist of notes payable and advances under line of credit arrangements. The notes payable are borrowings by Midland used to finance construction lending and working capital needs. The general terms of the Company's notes payable are discussed below. The following table summarizes notes payable at December 31, 2001 and 2000.

(000s)	2001	2000
Notes payable	$235,420	$234,830
Group Trust Warehouse Facilities and Lines of Credit	65,318	26,225
Midland Multifamily Equity REIT Credit Line	7,459	--
Residential Funding Warehouse Facility	98,033	54,481
Bank Lines of Credit	13,521	8,539
Other	312	5,084
	$420,063	$329,159

The Company's short and long-term debt of $213.4 million and $112.2 million at December 31, 2001 and 2000, respectively, relates to securitization transactions that the Company has recorded as borrowings (see Notes 1 and 5).

Annual maturities of notes payable and debt are as follows:

(000s)	
2002	$423,180
2003	64,508
2004	7,620
2005	6,602
2006	1,102
Thereafter	130,492
	$633,504

The weighted average interest rate on notes payable due in one year was 6.26% and 8.96% at December 31, 2001 and 2000, respectively.

Notes payable

Notes payable of $235.4 million at December 31, 2001, represent borrowings used to finance construction lending activities. Of this amount $105.3 million is payable to the Midland Affordable Housing Group Trust ("Group Trust"), an affiliated entity (see Note 16). At December 31, 2001, interest rates on the notes payable range from 4.5% to 10.0% for fixed rate loans and from 0.75% under to 1.75% over money center bank prime (4.75% at December 31, 2001). Due to floors, actual rates on variable rate loans range from 4.75% to 10.25% at December 31, 2001. The notes payable mature at various dates through 2004 and are collateralized by the related construction loans receivable. For the year ended December 31, 2001, maximum borrowings under the notes were $235.4 million and average borrowings were $207.7 million at a weighted average interest rate of 7.75%.

Notes payable of $234.8 million at December 31, 2000, represent borrowings

used to finance construction lending activities. Of this amount $104.1 million is payable to the Group Trust. Interest rates on the notes payable range from 6.69% to 10.50% for fixed rate loans and from 0.95% under to 1.75% over money center bank prime (9.5% at December 31, 2000). The notes payable mature at various dates through 2003 and are collateralized by the related construction loans receivable. For the year ended December 31, 2000, maximum borrowings under the notes were $261.7 million and average borrowings were $243.5 million at a weighted average interest rate of 9.08%.

Group Trust Warehouse Facilities and Lines of Credit

$50.0 million Warehouse Facility

The Company has a $50.0 million warehouse facility with the Group Trust to finance interim construction and permanent lending activities. At December 31, 2001 the balance due on the facility was $5.0 million. Fixed interest rates on the line of credit range from 6.10% to 6.75% and variable interest is at 1.00% under money center bank prime. Individual borrowings under the facility mature separately and are collateralized by the related loan receivable. For the year ended December 31, 2001, maximum borrowings under the warehouse facility were $40.6 million and average borrowings were $16.5 million. At December 31, 2001 the weighted average interest rate on the line was 5.08%. For the year ended December 31, 2000, maximum borrowings under the warehouse facility were $33.6 million and average borrowings were $12.1 million. At December 31, 2000 the weighted average interest rate on the line was 8.24%.

$30.0 million Warehouse Facility

The Company has a $30.0 million line of credit with the Group Trust to finance working capital and carryover loans. At December 31, 2001 the balance due on the line was $27.5 million. Interest on the line of credit is 0.25% under money center bank prime. The line is collateralized by a security interest in the related loan receivable. Principal on the line is due in 2002. For the year ended December 31, 2001, maximum borrowings under the line were $27.5 million and average borrowings were $17.6 million. At December 31, 2001 the weighted average interest rate was 4.50%. For the two months ended December 31, 2000, maximum borrowings under the line were $11.6 million and average borrowings were $8.8 million. At December 31, 2000 the weighted average interest rate was 9.25%.

$10.0 million Line of Credit

The Company has a $10.0 million line of credit with the Group Trust to fund syndication advances to limited partnerships. At December 31, 2001 the balance due on the line was $2.8 million. Interest on the line of credit is equal to money center bank prime. The line is collateralized by a security interest in a promissory note given by a limited partnership. Principal on the line is due in 2002. For the year ended December 31, 2001 maximum borrowings under the line were $4.6 million and average borrowings were $1.3 million. At December 31, 2001 the weighted average interest rate was 4.75%. For the month ended December 31, 2000 maximum borrowings under the line were $6.5 million and average borrowings were $6.5 million. At December 31, 2000 the weighted average interest rate was 9.50%.

$30.0 million Line of Credit

The Company has a $30.0 million line of credit with the Group Trust to fund syndication advances to limited partnerships. At December 31, 2001 the balance due on the line was $30.0 million. Interest on the line of credit is equal to

money center bank prime. The line is collateralized by a guarantee from the Company. Principal on the line is due in 2002. For the year ended December 31, 2001 maximum borrowings under the line were $30 million and average borrowings

were $21.5 million. At December 31, 2001 the weighted average interest rate was 4.75%. For the three months ended December 31, 2000 maximum borrowings under the line were $6.9 million and average borrowings were $3.6 million. At December 31, 2000 the weighted average interest rate was 9.50%.

Midland Multifamily Equity REIT Lines of Credit

$20.0 million Line of Credit

The Company has a $20.0 million line of credit with the Midland Multifamily Equity Real Estate Investment Trust ("MMER"), an affiliated entity (see Note 16), to finance interim construction and permanent lending activities. At December 31, 2001 the balance due on the line was approximately $44,000. Interest on the line of credit is equal to money center bank prime. The line is collateralized by a security interest in the related loan receivable. Principal on the line is due in 2002. For the three months ended December 31, 2001 maximum borrowings under the line were $6.8 million and average borrowings were $3.4 million. At December 31, 2001 the weighted average interest rate was 4.75%.

$20.0 million Line of Credit

The Company has a $20.0 million line of credit with MMER to finance working capital and carryover loans. At December 31, 2001 the balance due on the line was $7.4 million. Interest on the line of credit is equal to money center bank prime. The line is collateralized by a security interest in the related loan receivable. Principal on the line is due in 2002. For the three months ended December 31, 2001 maximum borrowings under the line were $7.4 million and average borrowings were $5.9 million. At December 31, 2001 the weighted average interest rate was 4.75%.

$20.0 million Line of Credit

The Company has a $20.0 million line of credit with MMER to fund syndication advances to limited partnerships. Interest on the line of credit is equal to money center bank prime. The line is collateralized by a guarantee from the Company. There were no borrowings under this line in 2001.

$20.0 million Line of Credit

The Company has a $20.0 million line of credit with MMER to finance interim construction lending. At December 31, 2001 there was no balance due on the line. Interest on the line is equal to money center bank prime. The line is collateralized by a security interest in the related loan receivable. Principal on the line is due in 2002. For the three months ended December 31, 2001 maximum borrowings under the line were $0.3 million and average borrowings were $0.2 million. At December 31, 2001 the weighted average interest rate was 4.75%.

Residential Funding Warehouse Facility

The Company has a $100.0 million warehouse facility with Residential Funding Corporation to finance interim construction and permanent lending activities until funded by a permanent lender or security holder. Interest on the line of credit is (a) LIBOR + 1.75% with a floor of 4.75% or (b) LIBOR +

1.25% with a floor of 4.25%. The interest rate is determined by the type of loan project warehoused. Borrowings under the line are collateralized by the related loan receivable. The facility agreement expires on August 31, 2002. For the year ended December 31, 2001, maximum borrowings under the facility were $98.0 million and average borrowings were $55.2 million. At December 31, 2001 the weighted average interest rate on the line was 4.52%. For the year ended December 31, 2000, maximum borrowings under the facility were $54.5 million and average borrowings were $40.2 million. At December 31, 2000 the weighted average interest rate on the line was 8.39%.

Bank Lines of Credit

The Company has a $4.0 million line of credit to finance working capital and lending activities. At December 31, 2001 the balance due on the line was $3.7 million. Interest on the line of credit is the higher of (a) bank prime rate (5.73% at December 31, 2001) less 2.25% or (b) 1.25% above the weekly average one-year Treasury Index. The line is collateralized by the related working capital loan or note receivable. The line expires upon 180 days written notice by the bank. For the year ended December 31, 2001, maximum borrowings under the line were $4.0 million and average borrowings were $3.6 million. At December 31, 2001, the weighted average interest rate on the line was 3.53%. For the year ended December 31, 2000 average borrowings were $1.5 million. At December 31, 2000, the weighted average interest rate was 8.13%.

The Company has a $10.0 million line of credit to finance working capital and lending activities. At December 31, 2001 the balance due on the line was $9.9 million. Interest on the line of credit is equal to money center bank prime. The line is collateralized by the related working capital loan or note receivable. The line expires upon 180 days written notice by the bank. For the year ended December 31, 2001, maximum borrowings under the line were $10.0 million and average borrowings were $4.0 million. At December 31, 2001 the weighted average interest rate on the line was 4.75%. For the two months ended December 31, 2000, average borrowings were $2.9 million. At December 31, 2000 the weighted average interest rate on the line was 9.50%.

Other

At December 31, 2001 other notes payable primarily of amounts due for the partnerships interests in a subsidiary.

Covenants and Guarantees

Under the terms of the various credit facilities, the Company is required to comply with various covenants including net worth, interest coverage, collateral and other terms and conditions. The Company is in compliance with its debt covenants at December 31, 2001. In addition, the Company, or its subsidiaries, provide payment or performance guarantees for certain borrowings included in this note.

Certain of the Company's lines of credit contain cross-default provisions. The $100.0 million line between Residential Finding Corporation and Midland Mortgage Investment Corporation ("MMI") includes an event of default upon any breach by MMI or any subsidiary of any material term of any indebtedness if the effect of the breach is to cause, or to permit the holder thereof to cause, the

acceleration of indebtedness of $250,000 or more.

The $4.0 million bank line of credit between United Bank of Pinellas and Midland Capital Corporation ("MCC") is subject to acceleration in the event MCC fails to pay any indebtedness to any third party or permits a default or event of default to exist under any agreement to which MCC is a party.

In addition, two bank lines of credit, totaling $10 million, between Midland Financial Holdings, Inc. ("MFH") and First National Bank of Florida ("FNB") contain cross-defaults triggered by any contractual default between MFH, MCC, MMI or Midland Equity Corporation and any third party if the effect of the default is to materially affect the ability of any of those Midland entities to repay loans due to FNB or to perform their other obligations under the loan agreements and related documentation.

Finally, MMI has granted Bank of America a first priority security interest in certain construction loans and related assets in connection with a $70.0 million loan agreement between Bank of America, other lenders and the Group Trust. If an event of default were to occur under the Bank of America facility, the lenders would be entitled to foreclose upon the collateral pledged by MMI. Events of default under this facility include, among others, any payment default of the Group Trust or MMI under any third party indebtedness and the occurrence of any event that would permit the holder of debt of the Group Trust or MMI to accelerate the maturity of any such indebtedness.

NOTE 12 - COMMITMENTS AND CONTINGENCIES

Lease Commitments

The Company has entered into non-cancelable operating leases for office space and equipment. These leases expire on various dates through 2005. Rental expense was approximately $1.4 million and $1.0 million for the years ended December 31, 2001 and 2000, respectively. At December 31, 2001, the minimum aggregate rental commitments are as follows:

	Operating Leases (In thousands)
2002	$1,466
2003	1,179
2004	186
2005	10
2006	--
Total	$2,841

Unfunded Loan Commitments

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. At December 31, 2001 and 2000, the aggregate total of unfunded construction loan commitments were approximately $137.6 million and $176.8 million, respectively.

The Company has unfunded commitments from investors in a like amount. The commitments are not reflected in the financial statements. The Company uses the same credit policies in making commitments and conditional obligations as it

does for on-balance sheet instruments. There are no significant concentrations of credit risk with any individual counterparty to originate loans.

Fannie Mae Participation Strips

As of December 31, 2001 and 2000, the Company owned interest only securities resulting from participations in a percentage of interest received on mortgage loans sold to Fannie Mae with a fair value of $5.5 million and $5.5 million, respectively. The Company is obligated to pay the income received from these assets to the Group Trust; therefore, a corresponding liability is reflected on the balance sheet in other liabilities.

Risk-Sharing Agreements with Fannie Mae

As a Fannie Mae DUS lender, Midland may share in losses relating to under-performing real estate mortgage loans delivered to Fannie Mae. More specifically, Midland may be required to make servicing advances to pay taxes or insurance premiums or delinquency advances to pay principal or interest (if the borrower fails to make payment). Also, Midland may participate in a deficiency after foreclosure. In connection with this obligation, Midland must maintain a minimum net worth and collateral with a custodian. Its financial exposure, however, is subject to certain deductibles and loss limits. The total loans originated through the DUS program during 2001 were $192.0 million. The servicing portfolio balance originated through the DUS program was $584.6 million and $403.9 million at December 31, 2001 and 2000, respectively. Midland is indemnified by the Group Trust against losses it may incur in connection with its servicing of $271.0 million of these loans. As of December 31, 2001, the Company had not incurred any losses on this portfolio.

Tax Credit Guarantees

In conjunction with the selling of interest in partnerships that provide low-income tax credits for investors, the Company may provide certain performance guarantees on the underlying properties owned by the partnership. The maximum exposure under these guarantees at December 31, 2001 was $23.8 million. As of December 31, 2001, the Company does not expect to have to perform under these guarantees and does not believe that any loss is likely.

NOTE 13 - INCOME TAXES

Certain subsidiaries of MuniMae are corporations and are therefore subject to federal and state income taxes. The following table summarizes the provision for income taxes at December 31, 2001, 2000 and 1999:

(In thousands)	2001	2000	1999
Federal income tax expense (benefit)			
Current	$ 862	$1,177	$ 815
Deferred	175	536	(216)
State income tax expense (benefit):			
Current	250	201	140
Deferred	96	92	(36)
Total	$1,383	$2,006	$ 703

In 2001, the Company recognized approximately $368,000 of benefits for deductions associated with the exercise of employee stock options and vesting of

deferred shares. These benefits were added directly to capital surplus, and are not reflected in the provision for income taxes.

The reconciliation of the difference between the effective income tax rate and the statutory federal income tax rate is as follows for the years ended December 31, 2001, 2000 and 1999:

(In thousands)	2001	2000	1999
Provision for income taxes computed using the statutory federal income tax rate	$ 1,131	$ 1,381	$458
State income taxes, net of federal tax effect	263	262	68
Goodwill amortization	546	377	101
Difference in deferred share expense	--	(44)	61
Minority interest	97	--	--
Tax credits	(729)	--	--
Other	75	30	15
Provision for income taxes	$ 1,383	$ 2,006	$703

Components of the Company's deferred tax assets and liabilities, included in other assets and liabilities, are as follows at December 31, 2001 and 2000:

(In thousands)	2001	2000
Deferred tax assets:		
Deferred loan fees	$ --	$ 12
Tax credit carryover	383	--
Rental expenses	68	--
Mortgage servicing rights	58	38
Other	140	21
Total deferred tax assets	$ 649	$ 71
Deferred tax liabilities:		
Depreciable assets	$ 35	$ 53
Mortgage servicing rights	3,448	2,588
Deferred loan fees	85	127
Other	90	40
Total deferred tax liabilities	$3,658	$2,808

At December 31, 2001, the Company had an unused low-income housing tax credit carryforward for federal income tax purposes of approximately $383,000, which expires in 2016. This credit is subject to recapture based upon a qualifying disposition. The Company is in the process of posting a qualified disposition bond to avoid the recapture provisions. Additionally, a component of other deferred tax assets is a charitable contribution carryforward of approximately

95

$328,000, which expires in 2006.

NOTE 14 - SHAREHOLDERS' EQUITY

As a result of the merger of the SCA Tax-Exempt Fund, LP (the "Partnership") into the Company in August 1996, shareholders were able to elect

among three types of equity in the Company. The shareholders had the choice of electing to exchange their Partnership interests for Preferred Shares, Preferred Capital Distribution Shares ("Preferred CD Shares") or Common Shares in the Company. The Company's Preferred Shares, Preferred CD Shares, Term Growth Shares and Common Shares differ principally with respect to allocation of income and cash distributions, as provided by the terms of the Operating Agreement (defined in Note 16) as summarized below. Prior to their redemption in March 2002, the Preferred Shares and Preferred CD Shares, which are divided in two series, had priority over the Common Shares and Term Growth Shares with respect to distributions and redemptions.

Preferred Shares

Taking into account their respective series distinctions, the Preferred Shares are allocated their proportionate share of the income generated by the 22 original bonds and related parity working capital loans held by the Partnership (collectively, the "Original Bonds") including income attributable to the portion of certain bonds no longer held by the Company. While the Preferred Shares bore their proportionate share of expenses related to a February 1995 refunding of 11 of the Original Bonds and will bear their share of the expenses of any future refunding of the Original Bonds, the Preferred Shares are not allocated any income or expense related to the securitization of those bonds or the investment of the proceeds therefrom or from any future financings. The Company is required to distribute to the holders of the Preferred Shares cash flow attributable to such shares, as defined by the Operating Agreement. The Preferred Shares must be partially redeemed when any bond attributable to the shares is sold or, beginning in the year 2000, when any bond attributable to the shares reaches par value (which includes accrued but unpaid base interest under the original bond terms and accrued but unpaid interest under the then-current bond terms) based on receipt of an appraisal of the property securing the bond.

Preferred CD Shares

The Preferred CD Shares are allocated their proportionate share of income on the same basis as the Preferred Shares, except that in addition the Preferred CD Shares received a one-time special distribution of their proportionate share of the net proceeds from the securitization of 11 of the Original Bonds in February 1995, will receive a similar distribution with respect to any future financings or securitization of the Original Bonds, are not allocated any income attributable to the refunded Series A Bonds and are allocated their proportionate share of the annual costs of the securitization (and any such future securitizations utilizing any of the Original Bonds). The Company is required to distribute to the holders of the Preferred CD Shares cash flow attributable to such shares, as defined by the Operating Agreement. The Preferred CD Shares must be partially redeemed and the Preferred CD Shareholders may exchange their shares on the same basis as the Preferred Shares discussed above.

Term Growth Shares

The Term Growth Shares are allocated an aggregate of 2% of the Company's net cash flow after allocation to the Preferred Shares and Preferred CD Shares, and the holders of the Term Growth Shares are entitled to distribution of the cash flow attributable to such allocable income before any distributions to the holders of the Common Shares. Term Growth Shares will be redeemed when Preferred and Preferred CD Shares are fully redeemed or converted (subject to certain conditions defined in the Operating Agreement).

Common Shares

The Common Shares (formerly known as Growth Shares) are allocated the balance of the Company's income after allocation to the Preferred Shares, Preferred CD Shares and Term Growth Shares. As of December 31, 2001, it is the Company's policy to distribute to the holders of the Common Shares at least 80% of cash available for distribution to Common Shares. The Common Shares have no par value. At December 31, 2001, 24,594,597 Common Shares were authorized.

The following table reflects distributions for the year ended December 31, 2001 and includes distributions declared and paid in 2002 for the quarter ended December 31, 2001.

	Common Shares	Preferred Shares Series I	Preferred Shares Series II
Distributions paid on May 11, 2001 to holders of record on April 30, 2001: For the three months ended March 31, 2001 (1)	$ 0.4250	$ 10.08	$ 5.00
Distributions paid on August 10, 2001 to holders of record on July 30, 2001: For the three months ended June 30, 2001 (2)	0.4275	11.70	11.40
Distributions paid on November 9, 2001 to holders of record on October 29, 2001: For the three months ended September 30, 2001	0.4300	11.70	11.40
Distributions paid on February 8, 2002 to holders of record on January 28, 2002: For the three months ended December 31, 2001	0.4325	10.50	4.75
Total Distributions	$ 1.7150	$ 43.98	$ 32.55

(1) The distributions for the Series I Preferred Shares and Preferred Capital Distribution Shares include a special distribution of $1.48 which represents their pro rata portion of the proceeds from the sale of a taxable loan secured by the property known as Mountain View.

(2) In June 2001, approximately 26% of Series I Preferred Shares and Preferred Capital Distribution Shares and approximately 56% of Series II Preferred Shares and Preferred Capital Distribution Shares were redeemed. The effect of this redemption was a decrease in the number of shares outstanding, which, in turn caused the per share distribution to increase.

February 2001 Common Share Offering

On February 6, 2001, the Company sold to the public 3.8 million Common Shares at a price of $23.07 per share. Net proceeds on the 3.8 million shares approximated $82.6 million. The net proceeds from this offering will be used for general corporate purposes, including new investments and working capital.

Preferred Share Redemption

In accordance with the Company's operating agreement, the Preferred Shares and the Preferred CD Shares must be partially redeemed when any bond attributable to the shares is sold, or beginning in the year 2000, when any bond attributable to the shares reaches par value (which includes accrued but unpaid base interest under the original bond terms and accrued but unpaid interest under the then current bond terms) based on receipt of an appraisal securing the bond. The Company must redeem the Preferred Shares and Preferred CD Shares within six months of the occurrence of a redemption event. Four bonds attributable to Series I Preferred Shares and Preferred CD Shares and four bonds attributable to Series II Preferred Shares and Preferred CD Shares reached par value in December 2000. As a result, in June 2001, the Company redeemed approximately 26% and 56% of the Series I and Series II Preferred Shares and Preferred CD Shares, respectively.

NOTE 15 - EARNINGS PER SHARE

A single presentation of basic earnings per share ("EPS") is presented for Preferred Shares and Preferred CD Shares because there were no potentially dilutive shares outstanding during the periods presented. EPS for Preferred Shares and Preferred CD Shares is calculated by dividing net income allocable to the shares by the weighted-average number of shares outstanding.

A dual presentation of basic and diluted EPS is presented for Common Shares. Basic EPS is calculated by dividing net income allocable to Common Shares by the weighted-average number of common shares outstanding. The calculation of diluted EPS is similar to that of basic EPS except that the denominator is increased to include the number of additional shares that would have been outstanding if the deferred shares had vested, options granted had been exercised and the Preferred Shares and Preferred CD Shares had been converted to Common Shares. Accordingly, the numerator is adjusted to add back the income allocable to the Preferred Shares and Preferred CD Shares, as well as the Term Growth Shares, which would have been allocated to Common Shares as a result of the conversion of these shares. The diluted EPS calculation does not assume conversion if the conversion would have an anti-dilutive effect on EPS. The tables at the end of this note reconcile the numerators and denominators in the basic and diluted EPS calculations for 2001, 2000 and 1999.

At December 31, 2000 and 1999, options to purchase 12,500 and 25,000 Common Shares, respectively, were not included in the computation of diluted EPS because the options' exercise prices were greater than the average price of the Common Shares for the period.

NOTE 16 - RELATED PARTY TRANSACTIONS

Pension Fund Advisory Business

A subsidiary of the Company functions as an investment advisor for several pension funds and profit-sharing trusts. Since 1991, these funds and trusts have provided short-term debt financing to Midland through the Group Trust. The Group Trust was formed by these pension funds in order to facilitate their lending to Midland in accordance with their internal policy requirements. In 2000, these same pension funds established MMER in order to participate as equity investors in a portfolio of income-producing multifamily real estate properties. MMER has also extended working capital lines of credit to Midland in order to increase MMER's return on its capital base pending the investment of those funds in equity real estate.

The various credit lines established by the Group Trust and MMER are described in detail in Note 11. As of December 31, 2001, these credit lines totaled $200.0 million, and loans outstanding to various subsidiaries of the Company totaled $105.3 million. For the years ended December 31, 2001, 2000 and 1999, the Company recorded interest expense on these borrowing arrangements of $11.3 million, $ 13.0 million, and $11.7 million, respectively.

The Group Trust and MMER engage in business transactions exclusively with the Company. Three of the five trustees of the Group Trust (Mr. Michael L. Falcone, the Company's President and Chief Operating Officer, Mr. Robert J. Banks, the Company's Vice Chairman, and Mr. Keith J. Gloeckl, the Company's Chief Investment Officer) are officers of the Company. In addition, three of the five trustees of MMER (Messrs. Falcone, Banks and Gloeckl) are Company officers. Consequently, the Group Trust and MMER are deemed to be affiliates of the Company.

In addition to the liquidity provided by the Group Trust and MMER working capital lines of credit, the Company earns advisory and management fees from them. For the years ended December 31, 2001, 2000, and 1999, respectively, the Company's fees from the Group Trust totaled $2.0 million, $1.0 million and $1.6 million. For the years ended December 31, 2001, the Company's fees from MMER totaled $30,000.

The Company believes that special purpose entities such as the Group Trust and MMER are attractive investment vehicles for pension funds and other sophisticated institutional investors because they enable those investors to benefit from the Company's specialized real estate experience while permitting them to tailor collateral, reporting and other features of the investment vehicle to their specific interests. Accordingly, the Company intends to continue to market its services to such investors. In addition, the Company and the investors in the Group Trust and MMER may agree to increase or decrease the size, or change the investment purposes, of those investment vehicles from time to time.

The Shelter Group

Mr. Mark K. Joseph, the Company's Chief Executive Officer and Chairman of its Board of Directors, controls and is an officer of Shelter Development Holdings, Inc. ("Shelter Holdings") which, together with its affiliates (collectively, the "Shelter Group"), engages in real estate development and provides property management services to a wide variety of commercial and

residential properties. One of the Shelter Group companies provides property management functions for a number of properties that serve as collateral for the Company's bond investments. Mr. Falcone

had an ownership interest in and was board member of this entity until he relinquished these positions in 2000.

The Shelter Group receives fees pursuant to management contracts for properties which it manages. During 2001, Shelter had 12 property management contracts for properties that collateralize the Company's investments with fees at or below market rates. During 2000, there were 12 affiliated property management contracts for properties that collateralize the Company's investments with fees at or below market rates. During the years ended December 31, 2001, 2000 and 1999, these fees approximated $1.1 million, $1.3 million, and $1.1 million, respectively. Of the 12 property management contracts with the Shelter Group in effect as of December 31, 2001, seven were for properties which had been under the management of the Shelter Group since prior to the formation of the Company, and three were for properties whose prior managers were replaced due to poor performance.

Consistent with the Company's Amended and Restated Certificate of Formation and Operating Agreement (the "Operating Agreement"), each affiliate property management contract is presented to the independent members of the Board of Directors for approval with information documenting the comparability of the proposed fees to those in the market area of the property.

Mr. Joseph has agreed to abstain from any involvement, as a partner in the Shelter Group, in the structuring or review of any contracts or transactions between the Shelter Group and the Company. He has likewise agreed to recuse himself from review or involvement, as an officer or director of the Company, in contracts and transactions involving the Shelter Group. The Company's Board of Directors has approved all contracts and transactions involving the Shelter Group and conducts an annual review of all property management contracts between the Shelter Group and any properties that collateralize the Company's investments.

Management of Defaulted Assets

In certain circumstances involving the Company's tax-exempt bonds, borrowers have defaulted on their debt obligations to the Company. In such circumstances the Company has, after evaluating its options, chosen not to foreclose on the property. Instead, the Company has negotiated the transfer of a property's deed in lieu of foreclosure to, or replaced the general partner of a property with, an entity affiliated with the Company. The Company has done so in order to preserve the original tax-exempt bond obligations and its participation in cash flow from the property, consistent with its overall goal of providing tax-exempt income to its shareholders.

Following the transfer of the property's deed to an affiliated entity, that entity controls the collateral for certain investments held by the Company. These affiliated entities are controlled by or managed by certain officers of the Company. The following table outlines these affiliate relationships at December 31, 2001:

Affiliate Entity	Number of Properties Owned (directly or indirectly)	Carrying Value of Company' Investment at December 31, 2
SCA Successor, Inc. (1)	4	$ 43,540,000
SCA Successor II, Inc. (1)	11	54,958,000
MMA Affordable Housing Corporation (2)	2	45,649,000
MuniMae Foundation, Inc (3) / MMA Successor I, Inc. (1)	3	23,872,000
Total	20	$168,019,000

(1) These corporations are general partners of the operating partnerships whose property collateralizes the Company's investments. Mr. Joseph controls the general partners of these operating partnerships and Mr. Falcone serves as director in three such general partners. Ms. Angela A. Barone, the Company's Vice President of Finance and Budgeting, serves as an officer in one such general partner.
(2) MMA Affordable Housing Corporation ("MMAHC") is a 501(c)(3) non-profit entity organized to provide charitable donations on behalf of the Company. Mr. Joseph is the Chairman and one of five directors of the MMAHC. Mr. Falcone, Mr. Gary A. Mentesana, the Company's Chief Capital Officer, and Mr. Earl W. Cole, III, Senior Vice President of the Company, are also officers and directors of MMAHC.
(3) MuniMae Foundation Inc., is a private non-profit entity organized to provide charitable donations on behalf of the Company. Mr. Joseph is the President and one of four directors of the MuniMae Foundation. Mr. Falcone and Mr. Mentesana are the other directors of the MuniMae Foundation.

None of the officers of the Company who serve as directors or officers of the affiliated entities listed above is compensated for his services as officer or director thereof or derives any other economic benefit from those entities except for Mr. Joseph, who controls the general partner of SCA Successor I, Inc., SCA Successor II, Inc. and MMA Successor I, Inc.

Such entities could have interests that do not fully coincide with, or even are adverse to, the interests of the Company. Such entities could choose to act in accordance with their own interests, which could adversely affect the Company. Among the actions such entities could desire to take might be selling a property, thereby causing a redemption event, at a time and under circumstances that would not be advantageous to the Company.

Other Relationships

The Company leases office space from an affiliate. Mr. Joseph and a member of the Company's Board of Directors have ownership interests in the partnership that leases the office space to the Company. For the years ended December 31, 2001, 2000 and 1999, the Company paid $208,000, $178,000 and $178,000, respectively, in rental lease payments under the lease agreement.

In 1998 and 1999, the Company sold certain taxable demand notes related to 11 operating partnerships whose general partners are controlled by Mr. Joseph (discussed above). In order to facilitate the sale of the demand notes, the Company provided a guaranty on behalf of the operating partnerships for the full and punctual payment of interest and principal due under the demand notes.

Shelter Development Holdings, Inc. (the "Special Shareholder") is personally liable for the obligations and liabilities of the Company. Mr. Joseph owns 100% of the Special Shareholder. In the event that a business combination

or change in control occurs, and the Special Shareholder does not approve of such transaction, the Special Shareholder has the right to terminate its status as the

Special Shareholder. In the event of such termination, the Company would be obligated to pay the Special Shareholder $1.0 million.

In 2000 and 2001, prior to his employment with the Company, Mr. William S. Harrison, Senior Vice President and Chief Financial Officer of the Company, provided consulting services to the Company through a corporation wholly owned by Mr. Harrison. The Company paid approximately $31,000 and $79,000 in 2001 and 2000, respectively, for these services.

A member of the Company's Board of Directors is the managing general partner of the law firm of Gallagher, Evelius and Jones LLP ("GEJ"), which provides corporate and real estate legal services to the Company. For the year ended December 31, 2001, $1.6 million in legal fees to GEJ was generated by transactions structured by the Company of which $1.0 million was directly incurred by the Company. The total amount of $1.6 million represented 12.6% of GEJ's total revenues for 2001.

An affiliate of Merrill Lynch owns 1,250 Term Growth Shares of the Company. The Company may from time to time enter into various investment banking, financial advisory and other commercial services with Merrill Lynch for which Merrill Lynch receives and will receive customary compensation. The Company also enters into various RITES(SM) and interest rate swap transactions with Merrill Lynch on terms generally available in the marketplace.

The Company is the general partner in various partnerships that provide low-income tax credits for investors. The Company sells the limited partner interests in these partnerships to third party investors. In addition, the Company may provide certain performance guarantees on the underlying properties owned by the partnerships. The Company receives management fees from these partnerships. For the year ended December 31, 2001, 2000, and 1999, the Company earned $2.4 million, $1.9 million and $1.4 million in management fees, respectively.

For the year ended December 31, 2001, the Company made a $600,000 charitable contribution to the MMA Affordable Housing Corporation discussed above.

NOTE 17 - NON-EMPLOYEE DIRECTORS' SHARE PLAN AND EMPLOYEE INCENTIVE PLANS

Non-Employee Directors' Share Plans

At December 31, 2001, the total number of shares authorized to be granted under the non-employee directors' share plans was 250,000 shares. The non-employee directors' plans provide a means to attract and retain highly qualified persons to serve as non-employee directors of the Company. Under the directors' plans, an option to purchase 7,000 Common Shares is granted to each director when first elected or appointed to the Board of Directors and an option to purchase 5,000 common shares on the date of each annual meeting of shareholders. The exercise price of such options will be equal to 100% of the fair market value of the Common Shares on the date of grant. Options expire at the earlier of ten years after the date of grant or one year after the date a director ceases to serve as such. The options become exercisable in full on the first anniversary of the date of grant. At December 31, 2001, 107,500 options were outstanding under the directors' plans with exercise prices of $14.875 to

$23.51. The weighted average remaining contractual life for these outstanding

options was 7.7 years at December 31, 2001. The following table summarizes the activity relating to options issued under the directors' plans for the years ended December 31, 2001, 2000 and 1999:

Non-Employee Directors' Share Plans

	Number of Shares	Weighted Average Exercise Price
Options outstanding at December 31, 1998	37,000	$ 17.81
Granted	15,000	19.58
Exercised	(4,500)	15.95
Expired	--	--
Options outstanding at December 31, 1999	47,500	18.47
Granted	30,000	19.75
Exercised	--	--
Expired	--	--
Options outstanding at December 31, 2000	77,500	$ 19.03
Granted	30,000	23.51
Exercised	--	--
Expired	--	--
Options outstanding at December 31, 2001	107,500	$ 20.28
Options exercisable at:		
December 31, 1999	32,500	$16.07
December 31, 2000	47,500	18.58
December 31, 2001	77,500	19.03

The directors' plans also entitle each director to elect to receive payment of director's fees in the form of Common Shares, based on their fair market value on the date of payment, in lieu of cash payment of such fees. Such shares may also be paid on a deferred basis, whereby the shares payable are credited to the account of the director, and future distributions payable with respect thereto are paid in the form of additional share credits based upon the fair market value of the Common Shares on the record date of the distribution payment. As of December 31, 2001, 5,061 Common Shares and 22,254 deferred shares had been issued to directors in lieu of cash payments for director fees. As of December 31, 2001, there were 110,185 shares available under the directors' plans.

Share Incentive Plans

At December 31, 2001, 2,622,033 shares were authorized to be issued under the share incentive plans. The Company's share incentive plans provide a means to attract, retain and reward executive officers and other key employees of the Company, to link employee compensation to measures of the Company's performance and to promote ownership of a greater proprietary interest in the Company. The plans authorize grants of a broad variety of awards, including non-qualified stock options, share appreciation rights, restricted shares, deferred shares and shares granted as a bonus or in lieu of other awards. Shares issued as restricted shares and as awards, other than options (including restricted shares), may not exceed 20% and 40% of the total reserved under the plans. As of December 31, 2001, there were 991,655 shares available under the plans.

Common Share Options

The exercise price of Common Share options granted under the plans is equal to 100% of the fair market value of the Common Shares on the date of grant. The options vest over three years. In the event of a change in control of the Company (as defined in the plans), the options shall become immediately and fully exercisable. In addition, the Company may, at any time, accelerate the exercisability of all or a specified portion of the options. Generally, the options expire ten years from the date of grant. However, options will expire immediately upon the termination of employment for cause and three months after termination of employment for reasons other than death, disability or normal or early retirement. In the event of death, disability or retirement, the options will expire one year after the date of such event. At December 31, 2001, 996,970 options were outstanding under the plans with exercise prices of $16.875 to $22.55. The weighted average remaining contractual life for these outstanding options was 6.9 years at December 31, 2001. The following table summarizes the activity relating to options issued under the plans for the years ended December 31, 2001, 2000 and 1999:

Employee Share Incentive Plans

	Number of Shares	Weighted Average Exercise Price
Options outstanding at December 31, 1997	677,470	$ 16.99
Granted	122,500	18.43
Exercised	(16,666)	16.88
Expired/Forfeited	(74,000)	16.99
Options outstanding at December 31, 1998	709,304	17.24
Granted	--	--
Exercised	--	--
Expired/Forfeited	--	--
Options outstanding at December 31, 1999	709,304	17.24
Granted	420,000	18.75
Exercised	(52,034)	17.20
Expired/Forfeited	(5,000)	19.00
Options outstanding at December 31, 2000	1,072,270	$ 17.82

Granted	75,000	22.35
Exercised	(147,800)	17.28
Expired/Forfeited	(2,500)	17.38
Options outstanding at December 31, 2001	996,970	$ 18.25
Options exercisable at:		
December 31, 1999	401,814	$ 17.14
December 31, 2000	615,103	17.16
December 31, 2001	637,970	17.68

Common Share Appreciation Rights

On November 11, 1997, 3,000 Common Share appreciation rights ("SARs") were awarded to certain employees under the plans. The exercise price of the SARs was equal to 100% of the fair market value of the Common Shares ($19 per share) on the date of grant and are exercisable for cash only. The SARs vest over three years and generally expire ten years from the date of grant. In the event of a change in control of the Company (as defined in the plans), the SARs shall become immediately and fully exercisable. In addition, the Company may, at any time, accelerate the exercisability of all or a specified portion of the SARs. However, the SARs will expire immediately upon the termination of employment for cause and three months after termination of employment for reasons other than death, disability or normal or early retirement. In the event of death, disability or retirement, the SARs will expire one year after such event. As of December 31, 2001, 3,000 SARs had vested.

107

Deferred Shares

The Company granted 63,050, 93,500, and 78,000 deferred share awards with a total fair value of $1.4 million, $1.8 million, and $1.4 million for the years ended December 31, 2001, 2000 and 1999, respectively. The deferred shares vest over three to ten years, as outlined in the individual award agreements. The deferred share awards also provide for accelerations of vesting on a discretionary basis, upon a change in control and death or disability. As of December 31, 2001, 191,148 deferred shares had vested. The Company recorded unearned compensation equal to the fair market value of the awards, which is shown as a separate component of shareholders' equity. Unearned compensation is being amortized into expense over the vesting period. For the years ended December 31, 2001, 2000 and 1999, the Company recognized compensation expense of $1.4 million, $1.1 million and $0.9 million, respectively, relating to the deferred shares.

Compensation Expense

The Company applies Accounting Principles Board Opinion No. 25, "Accounting for Stock issued to Employees," in accounting for both the non-employee director plan and the employee share incentive plan. Accordingly, no compensation expense has been recognized for the options issued under either plan during 2001, 2000 or 1999. Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" ("FAS 123"), requires the Company to make certain disclosures as if the compensation expense for the Company's plans had been determined based on the fair market value on the date of grant for awards under those plans. Accordingly, the Company estimated the grant-date fair value of each option

awarded in 2001, 2000 and 1999 using the Black-Scholes option-pricing model with the following weighted-average assumptions: dividend yield of 6.8%, 7.5% and 8.7% for 2001, 2000 and 1999, respectively, expected volatility of 19%, 19% and 16% for 2001, 2000 and 1999, respectively, risk-free interest rate of 5%, 5% and 6% for 2001, 2000 and 1999, respectively, and expected lives of 7.5 years. Had 2001, 2000 and 1999 compensation expense been determined including the weighted-average estimate of the fair value of each option granted of $2.67, $2.72 and $0.77, respectively, the Company's net income allocable to Common Shares would be reduced to a pro forma amount of $23.6 million, $27.9 million and $28.8 million, respectively. Pro forma basic and diluted earnings per Common Share would be $1.11 and $1.08, respectively for 2001, $1.60 and $1.56, respectively for 2000 and $1.70 and $1.67, respectively, for 1999.

NOTE 18 - MUNIMAE COMPENSATION TRUST

In December 1998, the Company established a $2.25 million newly formed grantor trust, Municipal Mortgage & Equity, LLC Employee Compensation Trust ("MuniMae Compensation Trust"). The MuniMae Compensation Trust was established to pre-fund future share related obligations of the Company's employee and director share plans. The MuniMae Compensation Trust supports existing, previously approved share plans and does not change those plans or the amount of shares expected to be issued under those plans.

For financial reporting purposes, MuniMae Compensation Trust is consolidated with the Company. The Common Shares held by the MuniMae Compensation Trust are included in the Treasury Shares. All distributions between the Company and the MuniMae Compensation Trust are eliminated. The MuniMae Compensation Trust did not purchase any Common Shares during 2001.

108

In 2001, 1,509 Common Shares were issued to employees and directors in accordance with award agreements granted under the Company's share plans (see Note 17). During 2000, the MuniMae Compensation Trust purchased 9,042 Common Shares at an average price of $21.09. In 2000, 94,279 Common Shares were issued to employees and directors in accordance with award agreements granted under the Company's share plans. During 1999, the MuniMae Compensation Trust purchased 30,000 Common Shares at an average price of $19.37. In 1999, 37,756 Common Shares were issued to employees and directors in accordance with award agreements granted under the Company's share plans.

NOTE 19 - SERVICING PORTFOLIO

Trust and Escrow Funds

The Company maintains certain escrow accounts and trust accounts related to principal and interest payments and to escrow funds received but not yet remitted to investors or others on loans serviced by the Company. These accounts are segregated into special accounts and are excluded from the Company's assets and liabilities.

Loans and Bonds Serviced

The Company serviced loans and bonds totaling $2.2 billion, $1.9 billion and $1.6 billion in outstanding principal at December 31, 2001, 2000 and 1999, respectively. The fees earned by the Company for servicing these loans are based on a percentage of the unpaid principal balance of the loans. These loans include approximately $584.6 million and $403.9 million in loans where the Company has a risk-sharing agreement with certain lenders at December 31, 2001 and 2000, respectively. Under the risk-sharing agreement, the Company is

responsible for up to 20% of the loan loss on all the loans covered by the agreement. The Company monitors the loans in the servicing portfolio for potential losses. If the Company determines a loss is probable and can be reasonably estimated, a loss reserve is recorded through a charge to the income statement. At December 31, 2001 and 2000, management determined that no allowance for possible loan losses on the servicing portfolio was necessary. The Company will continue to evaluate the need for allowance for loan losses in the future as circumstances dictate.

NOTE 20 - FAIR VALUE OF FINANCIAL INSTRUMENTS

The estimated fair values of the Company's financial instruments are included in the table at the end of this note.

The carrying amounts in the table correspond to amounts included in the accompanying balance sheets. The following methods or assumptions were used by the Company in estimating the fair values of financial statement instruments:

Cash and cash equivalents, investment in mortgage bonds and investment in other bond related investments - The carrying amounts reported in the balance sheet approximate the assets' fair value.

Loans receivable - The fair value of the Company's fixed rate loans was calculated by discounting the expected cash flows. The discount rates are based on the interest rate charged to current customers for comparable loans. The Company's adjustable rate loans reprice frequently at current

market rates. Therefore, the fair value of these loans has been estimated to approximate their carrying value.

Other investments - The estimated fair value of other investments was calculated by discounting contractual cash flows for current prepayment estimates using a market discount rate.

Notes payable - The estimated fair value of the Company's fixed rate notes payable was calculated by discounting contractual cash flows. The discount rates were based on the interest rates paid to current lenders for comparable notes payable. The Company's adjustable rate notes payable reprice frequently at current market rates. Therefore, the fair value of these notes payable has been estimated to approximate their carrying value.

Commitments to extend credit - Fair value of commitments to extend credit are based on interest rates currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

Put options written - Fair value is based on quoted market price of financial instruments with similar terms adjusted for differences in risk characteristics.

Interest rate swap agreements - Fair value is based on the estimated amount that the Company would pay or receive to terminate the swap agreement at the balance sheet date.

Total return swaps - Fair value is based on the estimated amount that the Company would pay or receive to terminate the swap agreement at the balance sheet date.

Limitations

The fair value estimates are made at a discrete point in time based on relevant market information and information about the financial instrument. Because no market or limited markets exist for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates. In addition, the fair value estimates are based on existing on- and off-balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments.

NOTE 21 - BUSINESS SEGMENT REPORTING

In the fourth quarter of 1999, the Company adopted Financial Accounting

Standards Board Statement No. 131, "Disclosures About Segments of an Enterprise and Related Information," which establishes standards for reporting information about a company's operating segments. In October 1999, as a result of the Midland acquisition, the Company restructured its operations into two business segments: (1) an operating segment consisting of Midland and other subsidiaries that primarily generate taxable fee income by providing loan servicing, loan origination and other related services and (2) an investing segment consisting primarily of subsidiaries holding investments producing tax-exempt interest income. The accounting policies of the segments are the same as those described in the summary of significant accounting policies.

The revenues associated with the investing segment consist primarily of interest earned on tax-exempt bonds, other bond related investments and certain short-term taxable loans and investments. The revenues associated with the operating segment consist primarily of loan servicing and loan origination fees for the Company's own portfolio and for portfolios of third parties, syndication and brokerage fees associated with tax credit syndications, taxable interest and fees earned on construction lending activities and other fee income associated with highly leveraged transactions such as put options. Segment results include all direct revenues and expenses of each segment and allocations of indirect expenses based on specific methodologies. The Company's reportable segments are strategic business units that primarily generate different income streams and are managed separately. The majority of the income generated by the operating segment was acquired as a unit and the management of such unit was retained.

NOTE 22 - SUBSEQUENT EVENTS

February 2002 Common Share Offering

On February 8, 2002, the Company sold to the public 3.0 million Common Shares at a price of $24.70 per share and granted the underwriters an option to purchase up to an aggregate of 450,000 Common Shares to cover over-allotments at the same price. Net proceeds on the 3.0 million shares approximated $70.5 million. On February 15, 2002, the underwriters exercised their option to purchase 300,000 Common Shares generating net proceeds of approximately $7.1 million. The net proceeds from this offering will be used for general corporate purposes, including new investments and working capital.

Preferred Share Redemption

In accordance with the Company's Operating Agreement, the Preferred Shares and the Preferred CD Shares must be partially redeemed when any bond attributable to the shares is sold or repaid or, beginning in the year 2000, when any bond attributable to the shares reaches par value based on receipt of an appraisal securing the bond. The Company must redeem the Preferred Shares and Preferred CD Shares within six months of the occurrence of a redemption event.

In addition to the bonds that reached par value in December 2000 (discussed in Note 14), the remaining bonds attributable to the shares were either paid off, sold and/or reached par value during the last four months of 2001 and in January 2002. As a result, in March 2002, the Company redeemed the remaining Series I and Series II Preferred Shares and Preferred CD Shares at an aggregate cost of approximately $19.3 million. The Operating Agreement also requires that the Term Growth shares be redeemed after the last Preferred Share is redeemed. As a result, the Term Growth shares, which had no residual value were redeemed in 2002.
