UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-Q

(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended March 31, 2003

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from to .

Commission file number: 000-26247

VERITAS Software Corporation

(Exact Name of Registrant as Specified in Its Charter)

Delaware

*(State or Other Jurisdiction of
Incorporation or Organization)*

77-0507675

*(I.R.S. Employer
Identification No.)*

350 Ellis Street

Mountain View, California 94043

(650) 527-8000

*(Address, including Zip Code, of Registrant's Principal Executive Offices and
Registrant's Telephone Number, including Area Code)*

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is an accelerated filer (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of the registrant's common stock outstanding as of April 30, 2003 was 414,790,342 shares.

Table of Contents**VERITAS SOFTWARE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)****1. Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for annual financial statements. In the opinion of management, all adjustments, consisting only of normal recurring adjustments, considered necessary for a fair presentation have been included. The results for the interim periods presented are not necessarily indicative of the results that may be expected for any future period. The following information should be read in conjunction with the consolidated financial statements and accompanying notes included in VERITAS Software Corporation's Annual Report on Form 10-K for the year ended December 31, 2002.

2. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

3. Comparative Information

The Company has reclassified certain comparative information to conform with current period financial presentation.

4. Accounting for Stock-Based Compensation

The Company accounts for employee stock-based compensation in accordance with Accounting Principles Board (APB) Opinion 25, *Accounting for Stock Issued to Employees* and related interpretations. Since the exercise price of options granted under such plans is generally equal to the market value on the date of grant, no compensation cost has been recognized for grants under its stock option plans and stock purchase plans. In accordance with APB 25, the Company does not recognize compensation cost related to its employee stock purchase plan. If compensation cost for the Company's stock-based compensation plans had been determined consistent with Statement of Financial Accounting Standards (SFAS) No. 123, *Accounting for Stock Based Compensation*, the Company's net income and net income per share would have been reduced to the pro forma amounts indicated below (in thousands, except per share amounts):

	Three Months Ended March 31,	
	2003	2002
Net income (loss):		
As reported	\$ 42,526	\$ 44,466
Add:		
Stock-based employee compensation expense included in net income, net of tax	301	
Less:		
Total stock-based employee compensation expense determined under the fair value based method for all awards, net of tax	74,997	71,918
Pro forma	\$ (32,170)	\$ (27,452)

Table of Contents**VERITAS SOFTWARE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

	Three Months Ended March 31,	
	2003	2002
Basic income (loss) per share:		
As reported	\$ 0.10	\$ 0.11
Pro forma	\$(0.08)	\$(0.07)
Diluted income (loss) per share:		
As reported	\$ 0.10	\$ 0.11
Pro forma	\$(0.08)	\$(0.07)

For the pro forma amounts determined under SFAS No. 123, as set forth above, the fair value of each stock option grant under the stock option plans is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions used for grants during the three months ended March 31, 2003 and 2002: risk-free interest rates averaging 2.91% and 4.46% for the three months ended March 31, 2003 and 2002, respectively; a dividend yield of 0.0% for all periods; a weighted-average expected life of 5 years for all periods; and a volatility factor of the expected market price of the Company's common stock of 0.90 for the three months ended March 31, 2003 and 2002.

The fair value of the employees' purchase rights under the employee purchase plan is estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions for these rights granted during the three months ended March 31, 2003 and 2002: a dividend yield of 0.0% for all periods; an expected life ranging from 6 to 24 months; an expected volatility factor of 0.90 for the three months ended March 31, 2003 and 2002; and risk-free interest rates ranging from 1.20% to 1.66% for the three months ended March 31, 2003 and ranging from 1.87% to 2.98% for the three months ended March 31, 2002.

5. New Accounting Pronouncements

In June 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 143, *Accounting for Asset Retirement Obligations*. SFAS 143 addresses the financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. SFAS 143 applies to legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development or normal use of the assets. SFAS 143 requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The fair value of the liability is added to the carrying amount of the associated asset, and this additional carrying amount is expensed over the life of the asset. The Company adopted SFAS 143 effective January 1, 2003. The adoption of SFAS 143 did not have a material effect on the Company's financial position, results of operations or cash flows.

In June 2002, the FASB issued SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. SFAS 146 supersedes Emerging Issues Task Force Issue (EITF) No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and other Costs to Exit an Activity (Including Certain Costs Incurred in a Restructuring)*. SFAS 146 addresses the recognition, measurement, and reporting of costs that are associated with exit and disposal activities. These costs include those related to terminating a contract that is not a capital lease and termination benefits that employees who are involuntarily terminated receive under the terms of a one-time benefit arrangement that is not an ongoing benefit arrangement or an individual deferred-compensation contract. The provisions of SFAS 146 require that the liability for costs associated with an exit or disposal activity be recorded at fair value and that they be recognized when the liability is incurred rather than at the date of the commitment to an exit plan as prescribed under EITF 94-3. SFAS 146 is applied prospectively for exit or disposal activities that are initiated after December 31, 2002 and accordingly,

Table of Contents

VERITAS SOFTWARE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

liabilities recognized prior to the initial application of SFAS 146 will continue to be accounted for in accordance with EITF 94-3. The Company adopted SFAS 146 effective January 1, 2003. The adoption of SFAS 146 for exit and disposal activities did not have a material impact on the Company's financial position, results of operations or cash flows.

In November 2002, the FASB issued FASB Interpretation (FIN) No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. FIN 45 requires that the Company recognize the fair value for guarantee and indemnification arrangements issued or modified by the Company after December 31, 2002, if these arrangements are within the scope of the Interpretation. In addition, the Company must continue to monitor the conditions that are subject to the guarantees and indemnifications, as required under previously existing generally accepted accounting principles, in order to identify if a loss has occurred. If the Company determines it is probable that a loss has occurred then any such estimable loss would be recognized under those guarantees and indemnifications. Some of the software licenses granted by the Company contain provisions that indemnify licensees of the Company's software from damages and costs resulting from claims alleging that the Company's software infringes the intellectual property rights of a third party. The Company has historically received only a limited number of requests for indemnification under these provisions and has not been required to make material payments pursuant to these provisions. Accordingly, the Company has not recorded a liability related to these indemnification provisions. The Company does not have any guarantees or indemnification arrangements other than the indemnification clause in some of its software licenses, the guarantee on a credit facility discussed in Note 14 and the guarantee on its three build-to-suit lease agreements for buildings in Mountain View, Roseville and Milpitas discussed in Note 15. The Company adopted FIN 45 effective January 1, 2003. The adoption of FIN 45 did not have a material impact on the Company's financial position, results of operations or cash flows.

In January 2003, the FASB issued FIN 46, *Consolidation of Variable Interest Entities*, which addresses the consolidation of variable interest entities. FIN 46 provides guidance for determining when an entity that is the primary beneficiary of a variable interest entity or equivalent structure should consolidate the variable interest entity into the entity's financial statements. The provisions of FIN 46 are to be applied as of the beginning of the first interim or annual reporting period beginning after June 15, 2003 for variable interest entities created before February 1, 2003 and still existing on June 15, 2003. The Company currently has three build-to-suit operating leases, commonly referred to as synthetic leases, which were entered into prior to February 1, 2003. Each synthetic lease is owned by a trust that has no voting rights, no employees, no financing activity other than the lease with the Company, no ability to absorb losses and no right to participate in gains realized on the sale of the related property. If the trusts under the Company's leasing structures qualify as variable interest entities for purposes of FIN 46, the Company would be considered the primary beneficiary and would be required to consolidate these entities into the Company's financial statements beginning July 1, 2003. This would require the Company to recognize the assets and liabilities of the trusts on the Company's consolidated balance sheet and a cumulative adjustment for the accounting change in the Company's consolidated statement of operations. Alternatively, the Company may choose to purchase the properties by exercising the Company's purchase option or seek to restructure the synthetic leases with entities that would not qualify as variable interest entities under FIN 46. The purchase price of these properties would be equal to the termination value of the facilities under the respective operating leases and in the aggregate would be approximately \$380.8 million. The Company is currently evaluating the impact that would result from adopting FIN 46 on the Company's financial statements.

Table of Contents**VERITAS SOFTWARE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****6. Net Income Per Share**

The following table sets forth the computation of basic and diluted net income per share (in thousands, except per share amounts):

	Three Months Ended March 31,	
	2003	2002
Numerator:		
Net income	\$ 42,526	\$ 44,466
Denominator:		
Denominator for basic net income per share weighted-average shares outstanding	412,916	406,086
Potential common shares	6,464	15,623
Denominator for diluted net income per share	419,380	421,709
Basic net income per share	\$ 0.10	\$ 0.11
Diluted net income per share	\$ 0.10	\$ 0.11

For the three months ended March 31, 2003 and 2002, potential common shares consist of employee stock options using the treasury method. The following table sets forth the potential common shares that were excluded from the net income per share computations as their effect would be antidilutive (in thousands):

	Three Months Ended March 31,	
	2003	2002
Employee stock options outstanding(1)	40,953	20,727
5.25% convertible subordinated notes(2)	6,695	6,695
1.856% convertible subordinated notes(2)	12,981	12,981

- (1) For the three months ended March 31, 2003 and 2002, 40,953 and 20,727 employee stock options, respectively, were excluded from the computation of diluted net income per share because the exercise price of these options was greater than the average market price of the Company's common stock during the respective periods, and therefore the effect is antidilutive.
- (2) For each of the three months ended March 31, 2003 and 2002, 6,695 potential common shares related to the Company's 5.25% convertible subordinated notes and 12,981 potential common shares related to the Company's 1.856% convertible subordinated notes were excluded from the computation of diluted net income per share because the impact of adding back the after tax impact of the interest expense associated with the convertible subordinated notes, and including the potential common shares, would be antidilutive.

The weighted average exercise prices of the employee stock options with exercise prices exceeding the average fair value of the Company's common stock was \$56.04 per share for the three months ended March 31, 2003 and \$90.95 per share for the three months ended March 31, 2002.

7. Business Combinations

On January 27, 2003, the Company acquired all of the outstanding capital stock of Jareva Technologies, Inc. (Jareva), a privately held provider of automated server provisioning products that enable businesses to automatically deploy additional servers without manual intervention. The Company acquired Jareva to

Table of Contents**VERITAS SOFTWARE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

integrate Jareva's technology into the Company's software products to enable the Company's customers to optimize their investments in server hardware by deploying new server resources on demand. The Jareva acquisition was accounted for using the purchase accounting method for total purchase consideration of \$63.3 million, which included \$58.7 million of cash, \$1.4 million for the issuance of options to purchase 426,766 shares of the Company's common stock and \$3.2 million of acquisition-related costs. The purchase price was allocated, based on independent valuation, to goodwill of \$43.3 million, developed technology of \$9.1 million, other intangibles of \$1.9 million, in-process research and development of \$4.1 million, net deferred tax liabilities of \$4.3 million, deferred stock-based compensation of \$5.4 million and net tangible assets of \$3.8 million. For the three months ended March 31, 2003, the Company recorded amortization of developed technology of \$0.3 million, amortization of other intangibles of \$0.2 million and, included in research and development expense, stock-based compensation expense of \$0.4 million. The acquired in-process research and development of \$4.1 million was written off and the related charge is included in income from operations for the three months ended March 31, 2003. Acquisition-related costs consist of \$2.7 million associated with terminating and satisfying remaining lease commitments, partially offset by sublease income net of related sublease costs and direct transaction costs of \$0.5 million for legal and other professional fees. Total cash outlays for acquisition-related costs were not significant as of March 31, 2003. The results of operations of Jareva are included in the Company's consolidated financial statements from the date of acquisition. The pro forma impact on the Company's results of operations for the three months ended March 31, 2002 was not significant.

On December 19, 2002, the Company announced that it signed an agreement to acquire Precise Software Solutions Ltd. (Precise), a provider of application performance management products, for an aggregate preliminary purchase price of approximately \$590.0 million, including approximately \$497.0 million of cash and common stock to be issued, \$85.0 million in fair value of stock options to be assumed and \$8.0 million of acquisition-related costs. The Company expects to complete this acquisition during the second quarter of 2003.

8. Goodwill and Other Intangible Assets

On January 1, 2002, the Company adopted SFAS 142, *Goodwill and Other Intangible Assets*. As a result, the Company no longer amortizes goodwill, but will test it for impairment annually or whenever events or changes in circumstances suggest that the carrying amount may not be recoverable.

The following table sets forth the carrying amount of goodwill. Goodwill also includes amounts originally allocated to assembled workforce (in thousands):

	March 31, 2003	December 31, 2002
Goodwill:		
Gross carrying amount	\$3,328,774	\$3,285,455
Accumulated amortization	2,088,865	2,088,862
Net carrying amount of goodwill	<u>\$1,239,909</u>	<u>\$1,196,593</u>

As of March 31, 2003, goodwill includes \$43.3 million related to the acquisition of Jareva on January 27, 2003.

Table of Contents**VERITAS SOFTWARE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following tables set forth the carrying amount of other intangible assets that will continue to be amortized (in thousands):

	March 31, 2003		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Developed technology	\$244,608	\$215,238	\$29,370
Distribution channels	234,800	225,017	9,783
Trademarks	24,350	23,335	1,015
Other intangible assets	31,420	27,793	3,627
	<u>535,178</u>	<u>491,383</u>	<u>43,795</u>
Intangibles related to business acquisitions	535,178	491,383	43,795

The total expected future annual amortization of intangible assets related to business acquisitions is set forth in the table below (in thousands):

Year	Future Amortization
2003	\$27,906
2004	4,797
2005	4,751
2006	4,111
2007	2,060
2008	170
	<hr/>
Total	\$43,795

9. Strategic Investments

The Company holds investments in common and preferred stock of several privately-held and publicly traded companies. The total carrying amount of the Company's strategic investments was \$5.6 million at March 31, 2003 and \$10.3 million at December 31, 2002. These strategic investments are included in other non-current assets. During the three months ended March 31, 2003, the Company recorded impairment losses on strategic investments of \$3.5 million. The losses realized represent write-downs of the Company's carrying amount of the investments and were determined by using, among other factors, the market value of the investee's stock, its inability to obtain additional private financing, its cash position and current burn rate, the status and competitive position of the investee's products and the uncertainty of its financial condition.

10. Facility Restructure Reserve

In the fourth quarter of 2002, the Company's board of directors approved a facility restructuring plan to exit and consolidate certain of its facilities located in 17 metropolitan areas worldwide related to facilities that were or are expected to be vacated. In connection with this facilities restructuring plan, the Company recorded a restructuring charge to operating expenses of \$98.2 million. This restructuring charge is comprised of \$86.9 million associated with terminating and satisfying remaining lease commitments, partially offset by sublease income net of related sublease costs and \$11.3 for asset write-offs. Total cash outlays under this restructuring plan are expected to be approximately \$86.9 million.

Restructuring costs will generally be paid over the remaining lease terms, ending at various dates through 2021, or over a shorter period as the Company may negotiate with its lessors. The Company expects the majority of costs will be paid by the year ended December 31, 2008.

The Company began vacating facilities during the fourth quarter of 2002 and expects to vacate all excess facilities associated with this restructuring by October 31, 2003. The Company anticipates that it will realize cost savings beginning during the third quarter of 2003. The Company is in the process of seeking suitable subtenants for these facilities. The Company's estimates of the facility restructure charge may vary significantly, depending in part, on factors that are beyond the Company's control, including the commercial real estate market in the applicable metropolitan areas, the Company's ability to obtain subleases related to these facilities and the time period to do so, the sublease rental market rates and the outcome of negotiations with lessors regarding terminations of some of the leases. Adjustments to the facility restructure reserve will be made if actual lease exit costs or sublease income differ from amounts currently expected. As a portion of the facilities restructure reserve relates to international locations, the reserve will be affected by exchange rate fluctuations. The impact of exchange rate fluctuations is reflected in accumulated other comprehensive loss on the balance sheet.

Table of Contents**VERITAS SOFTWARE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The portion of the reserve expected to be utilized through March 31, 2004 of \$26.0 million has been classified in the current portion of accrued acquisition and restructuring charges. The portion of the reserve expected to be utilized in periods subsequent to March 31, 2004 of \$69.5 million has been classified in the non-current portion of accrued acquisition and restructuring charges. The components of the restructuring reserve and movements within these components through March 31, 2003 were as follows (in millions):

	Net Rent Commitments	Asset Write-Offs	Total
Provision accrued	\$86.9	\$11.3	\$98.2
Cash payments	(0.2)		(0.2)
Impact of exchange rates	0.6	0.1	0.7
	<hr/>	<hr/>	<hr/>
Balance at December 31, 2002	87.3	11.4	98.7
Cash payments	(2.7)		(2.7)
Adjustment	0.8	(0.8)	
Impact of exchange rates	(0.4)	(0.1)	(0.5)
	<hr/>	<hr/>	<hr/>
Balance at March 31, 2003	\$85.0	\$10.5	\$95.5
	<hr/>	<hr/>	<hr/>

11. Comprehensive Income

The following are the components of comprehensive income (in thousands):

	Three Months Ended March 31,	
	2003	2002
Net income	\$42,526	\$44,466
Other comprehensive income, net of tax:		
Foreign currency translation adjustments	4,043	733
Derivative financial instrument adjustments	(660)	1,491
Unrealized loss on marketable securities	(197)	(5,890)
	<hr/>	<hr/>
Comprehensive income	\$45,712	\$40,800
	<hr/>	<hr/>

The components of accumulated other comprehensive loss are (in thousands):

	March 31, 2003	December 31, 2002
Foreign currency translation adjustments	\$ 7,056	\$ 3,013
Derivative financial instrument adjustments	(10,466)	(9,806)
Unrealized gain on marketable securities	3,127	3,324
	<hr/>	<hr/>
Accumulated other comprehensive loss	\$ (283)	\$(3,469)

12. Derivative Financial Instruments

In September 2000, the Company entered into a three-year cross currency interest rate swap transaction, or swap, for the purpose of hedging fixed interest rate, foreign currency denominated cash flows under an inter-company loan receivable. Under the terms of this derivative financial instrument, Euro denominated fixed principal and interest payments to be received under the inter-company loan will be swapped for U.S. dollar-fixed principal and interest payments. As of March 31, 2003, six monthly payments of 4.3 million remained to be swapped at a forward exchange rate of 0.89070 U.S. dollar per Euro. The fair market value of the swap at

Table of Contents**VERITAS SOFTWARE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

March 31, 2003 was \$(8.8) million. As a result of entering into the swap, the Company has mitigated its exposure to foreign currency exchange rate fluctuations. The gains or losses on the foreign currency loan receivable will be offset by the gains or losses on the swap. Because the Company is receiving fixed interest payments under the swap, it is still subject to fluctuations in value due to changes in U.S. dollar interest rates. As of March 31, 2003, the impact of these fluctuations was not significant. This hedge was deemed to be highly effective as of March 31, 2003.

In January 2002, the Company entered into two three-year pay fixed, receive floating, interest rate swaps for the purpose of hedging cash flows on variable interest rate debt of its build-to-suit lease agreements. Under the terms of these interest rate swaps, the Company makes payments based on the fixed rate and will receive interest payments based on the 3-month London Inter Bank Offered Rate (LIBOR). The Company's payments on its build-to-suit lease agreements are based upon a 3-month LIBOR plus a credit spread. If the Company's credit spread remains consistent and other critical terms of the interest rate swap or the hedged item do not change, the interest rate swap will be considered to be highly effective with all changes in the fair value included in other comprehensive income. If the Company's credit spread changes or other critical terms of the interest rate swap or the hedged item change, the hedge may become partially or fully ineffective, which could result in all or a portion of the changes in fair value of the derivative recorded in the statement of operations. The interest rate swaps settle the first day of January, April, July and October until expiration. As of March 31, 2003, the fair value of the interest rate swaps were \$(11.1) million. As a result of entering into the interest rate swaps, the Company has mitigated its exposure to variable cash flows associated with interest rate fluctuations. Because the rental payments on the leases are based on the 3-month LIBOR and the Company receives 3-month LIBOR from the interest rate swap counter-party, the Company has eliminated any impact to raising interest rates related to its rent payments under the build-to-suit lease agreements.

As of March 31, 2003, the total gross notional amount of the Company's forward contracts was approximately \$141.0 million, all hedging intercompany accounts of certain of its international subsidiaries. The forward contracts had a term of thirty-one days or less and settled on April 30, 2003. All foreign currency transactions and all outstanding forward contracts are marked-to-market at the end of the period with unrealized gains and losses included in other income. The unrealized gain (loss) on the outstanding forward contracts at March 31, 2003 was immaterial to the Company's consolidated financial statements.

13. Segment Information

The Company operates in one segment, storage software solutions. The Company's products and services are sold throughout the world, through original equipment manufacturers, direct sales channels and indirect sales channels. The Company's chief operating decision maker, the chief executive officer, evaluates the performance of the Company based upon stand-alone revenue of product channels and the geographic regions of the segment and does not receive discrete financial information about asset allocation, expense allocation or profitability from the Company's storage software products or services.

Total consolidated assets	\$4,271,405	\$4,199,633

For the three months ended March 31, 2003, Ingram Micro, Inc. a distributor that sells the Company's products and services through resellers, accounted for 10% of the Company's net revenue. No customer represented 10% or more of the Company's net revenue for the three

months ended March 31, 2002.

User License Fees Information

The Company derives its user license fees from the sale of its core technology products, including data protection and file system and volume management products and from its emerging technology products, including cluster and replication and storage area networking products. User license fees from core technology products were \$208.9 million for the three months ended March 31, 2003 and \$225.8 million for the three months ended March 31, 2002. User license fees from emerging technology products were \$45.7 million for the three months ended March 31, 2003 and \$33.9 million for the three months ended March 31, 2002.

VERITAS SOFTWARE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

14. Credit Facility

During 2002, the Company's Japanese subsidiary entered into a short-term credit facility with a multinational Japanese bank in the amount of 1.0 billion Japanese yen (\$8.3 million USD). At March 31, 2003, no amount was outstanding. The short-term credit facility was renewed in March 2003 and is due to expire in March 2004. Borrowings under the short-term credit facility bear interest at Tokyo Inter Bank Offered Rate (TIBOR) plus 0.5%. There are no covenants on the short-term credit facility and the loan has been guaranteed by VERITAS Software Global Corporation, a wholly-owned subsidiary of the Company.

15. Commitments and Contingencies

Facilities Lease Commitments

In 1999 and 2000, the Company entered into three build-to-suit lease agreements for office buildings in Mountain View, California, Roseville, Minnesota and Milpitas, California. The Company began occupying the Roseville and Mountain View facilities in May and June 2001, respectively. The development and acquisition of the properties have been financed by a third party through a syndicate of financial institutions. The Company has accounted for these agreements as operating leases in accordance with SFAS 13, *Accounting for Leases*, as amended.

During 2001 and 2002, the Company amended its existing lease agreement, originally signed in 1999, for new corporate campus facilities in Mountain View, California. The facilities of 425,000 square feet provide space for sales, marketing, administration and research and development functions. The lease term for these facilities is five years beginning in March 2000, with an option to extend the lease term for two successive periods of one year each, if agreed to by the financial institutions. The Company has the option to purchase the property (land and facilities) for the termination value of \$145.2 million or, at the end of the lease, to arrange for the sale of the property to a third party while the Company retains an obligation to the owner for the difference between the sales price and the guaranteed residual value up to \$129.0 million if the sales price is less than this amount, subject to certain provisions of the lease. In addition, the Company is entitled to any proceeds from a sale of the property in excess of the termination value. The Company now occupies these facilities and began making lease payments in the second quarter of 2001.

During 2001 and 2002, the Company amended its existing lease agreement, originally signed in 2000, for its facilities in Roseville, Minnesota. The Company improved and expanded its existing facilities of 62,000 square feet and developed adjacent property adding 142,000 square feet completed in 2001. The facilities provide space for technical support and research and development functions. The lease term for these facilities is five years beginning in March 2000, with an option to extend the lease term for two successive periods of one year each, if agreed to by the financial institutions. The Company has the option to purchase the property (land and facilities) for the termination value of \$41.3 million or, at the end of the lease, to arrange for the sale of the property to a third party while the Company retains an obligation to the owner for the difference between the sales price and the guaranteed residual value up to \$35.1 million if the sales price is less than this amount, subject to certain provisions of the lease. In addition, the Company is entitled to any proceeds from a sale of the property in excess of the termination value. The Company now occupies these facilities and began making lease payments in 2001.

During 2001 and 2002, the Company amended its existing lease agreement, originally signed in 2000, for the lease of 65 acres of land and subsequent improvements for new research and development campus facilities in Milpitas, California. The Company plans to develop the site in two phases. The first phase of the project, comprising 466,000 square feet and consisting of one completed building and two additional structures, was completed in the third quarter of 2002. The facilities will provide space for research and development and general corporate functions. The lease term for the first phase is five years beginning in July 2000, with an option to extend the lease term for two successive periods of one year each, if agreed to by the financial institutions. The Company has the option to purchase the property (land and first phase facilities) for

Table of Contents**VERITAS SOFTWARE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

the termination value of \$194.3 million or, at the end of the lease, to arrange for the sale of the property to a third party while the Company retains an obligation to the owner for the difference between the sales price and the guaranteed residual value up to \$180.5 million if the sales price is less than this amount, subject to certain provisions of the lease. In addition, the Company is entitled to any proceeds from a sale of the property in excess of the termination value. The Company began paying the lease payments in the third quarter of 2002 and will commence occupying a portion of the new campus facilities in the second quarter of 2003. The Company is currently analyzing its development schedule for the second phase of the campus, and at this time no commitments have been made with respect to the start of construction.

Lease payments under the Company's three build-to-suit lease agreements are generally paid quarterly and are equal to the termination value of the outstanding lease obligations multiplied by the Company's cost of funds, which is based on LIBOR using 30-day to 180-day LIBOR contracts and adjusted for the Company's credit spread. In January 2002, the Company entered into two three-year pay fixed, receive floating, interest rate swaps for the purpose of hedging the cash payments related to the Roseville, Minnesota and Mountain View, California lease agreements. Under the terms of these interest rate swaps, the Company makes payments based on the fixed rate and will receive interest payments based on the 3-month LIBOR rate. For the three months ended March 31, 2003, the Company's aggregate lease payments, including the payments on the interest rate swaps, were \$4.1 million.

The Company has evaluated the expected fair value of the properties at the end of the lease terms by reviewing current real estate market conditions and indicators of expectations for the market in the future. In the event that the Company determines it is probable that the expected fair value of any of the properties at the end of the lease terms will be less than the respective termination values, the Company will accrue the expected loss on a straight-line basis over the remaining lease term. Currently, the Company does not believe it is probable that the fair market value of the properties at the end of the lease terms will be less than the termination values.

The agreements for the facilities described above require that the Company maintain specified financial covenants, all of which the Company was in compliance with as of March 31, 2003. The specified financial covenants require the Company to maintain a minimum rolling four quarter EBITDA of \$400 million, a minimum ratio of cash and cash equivalents to current liabilities of 1.2 to 1, and a leverage ratio of total funded indebtedness to rolling four quarter EBITDA of not more than 2.5 to 1. For purposes of these financial covenants, EBITDA represents the Company's net income for the applicable period, plus interest expense, taxes, depreciation and amortization and all non-cash restructuring charges for acquisitions occurring within a four year period, less software development expenses classified as capital expenditures. In order to secure the obligation under each agreement, each of the facilities is subject to a deed of trust in favor of the financial institutions that financed the development and acquisition of the respective facility. Bank of America, N.A. was the agent for the syndicate of banks that funded the development of the Mountain View, California and Roseville, Minnesota facilities, and ABN AMRO Bank, N.V. was the agent for the syndicate of banks that funded the development of the Milpitas, California facility.

Acquired Technology

On October 1, 2002, we acquired volume replicator software technology for \$6.0 million and contingent payments of up to another \$6.0 million based on future revenues generated by the acquired technology. The payments will be paid quarterly over 40 quarters, in amounts between \$150,000 and \$300,000. The Company issued a promissory note payable in the principal amount of \$5.0 million, representing the present value of the Company's minimum payment obligations under the purchase agreement for the acquired technology, which are payable quarterly commencing in the first quarter of 2003 and ending in the fourth quarter of 2012. The contingent payments in excess of the quarterly minimum obligations will be paid as they may become due. The balance outstanding of the note payable was \$4.9 million as of March 31, 2003 and \$5.0 million as of December 31, 2002 and is included in non-current accrued acquisition and restructuring costs.

VERITAS SOFTWARE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Legal Proceedings

After the Company announced in January 2003 that it would restate financial results as a result of transactions entered into with America Online, or AOL, in September 2000, numerous separate complaints purporting to be class actions were filed in the United States District Court for the Northern District of California alleging that the Company and some of its officers and directors violated provisions of the Securities Exchange Act of 1934. The complaints contain varying allegations, including that the Company made materially false and misleading statements with respect to the Company's 2000, 2001 and 2002 financial results included in the Company's filings with the SEC, press releases and other public disclosures. These complaints have been consolidated and, on May 2, 2003, a lead plaintiff and lead counsel were appointed. In addition, several complaints purporting to be derivative actions have been filed in California state court against some of the Company's directors and officers. These complaints are based on the same facts and circumstances as the class actions and generally allege that the named directors and officers breached their fiduciary duties by failing to oversee adequately the Company's financial reporting. All of the complaints generally seek an unspecified amount of damages. The cases are still in the preliminary stages, and it is not possible for the Company to quantify the extent of its potential liability, if any. An unfavorable outcome in any of these cases could have a material adverse effect on the Company's business, financial condition, results of operations and cash flow. In addition, the expense of defending any litigation may be costly and divert management's attention from the day-to-day operations of the Company's business.

On January 10, 2003, Raytheon Company sued the Company along with Brocade Communications Systems, Oracle Corporation, Overland Storage Inc., Qualstar Corp., QLogic Corporation, Ricoh Corporation and Spectra Logic Corporation in the United States District Court for the Eastern District of Texas. Raytheon is alleging infringement of US Patent No. 5,412,791 (the '791 Patent'), entitled Mass Data Storage Library, and is seeking damages and an injunction against all defendants. The Company believes that it has numerous defenses and counterclaims to the claims of infringement asserted against it and intends to defend itself vigorously. The Company filed an answer to Raytheon's complaint on March 7, 2003, denying all material allegations in the complaint and asserting counterclaims seeking to have the '791 patent declared invalid and not infringed by the Company.

On October 23, 2001, Storage Computer Corporation initiated litigation against the Company in the United States District Court for the Northern District of Texas alleging infringement of one of Storage Computer Corporation's patents. Currently, Storage Computer Corporation is alleging the Company infringes two of their US patents. The Company has denied all material allegations in the complaints and has filed counterclaims for declaratory judgment of invalidity and non-infringement of the patents-in-suit and has alleged Storage Computer's infringement of one of the Company's patents. Storage Computer Corporation is seeking unspecified damages, treble damages, costs of suit and attorneys' fees and a permanent injunction from further alleged infringement. The Company believes that it has numerous defenses and counterclaims relative to the claims of infringement asserted against it and intends to vigorously defend this action.

The Company is also party to various other legal proceedings that have arisen in the ordinary course of its business. While the Company currently believes that the ultimate outcome of these proceedings, individually and in the aggregate, will not have a material adverse effect on its financial position or overall trends in results of operations, litigation is subject to inherent uncertainties. Were an unfavorable ruling to occur, there exists the possibility of a material adverse impact on the results of operations of the period in which the ruling occurs. The estimate of the potential impact on the Company's financial position or overall results of operations for the above legal proceedings could change in the future.

For each of the matters noted, the Company does not believe that it is probable that a liability has been incurred nor does it believe that the amount of any loss can be reasonably estimated. Accordingly, no liability has been accrued for these matters.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This quarterly report on Form 10-Q contains forward-looking statements, within the meaning of the Securities Exchange Act of 1934 and the Securities Act of 1933, that involve risks and uncertainties. These forward-looking statements include statements about our revenue, revenue mix, gross margin, operating expense levels, financial outlook, commitments under existing leases, research and development initiatives, sales and marketing initiatives and competition. In some cases, forward-looking statements are identified by words such as believe, anticipate, expect, intend, plan, will, may and similar expressions. You should not place undue reliance on these forward-looking statements, which speak only as of the date of this quarterly report on Form 10-Q. These forward-looking statements are based on information available to us at this time, and we assume no obligation to update any of these statements. Actual results could differ from those projected in these forward-looking statements as a result of many factors, including those identified below in the section titled Factors That May Affect Future Results and elsewhere. We urge you to review and consider the various disclosures made by us in this report, and those detailed from time to time in our filings with the Securities and Exchange Commission, that attempt to advise you of the risks and factors that may affect our future results.

The following discussion should be read in conjunction with our financial statements and accompanying notes, which appear elsewhere in this quarterly report on Form 10-Q. Unless expressly stated or the context otherwise requires, the terms we, our, us and VERITAS refer to VERITAS Software Corporation and its subsidiaries.

Overview

VERITAS is a leading independent supplier of storage software products and services. Storage software includes storage management, data protection and high availability software. We develop and sell products for most popular operating systems, including various versions of Windows, UNIX and Linux. We also develop and sell products that support a wide variety of servers, storage devices, databases, applications and network solutions. Our customers include many leading global corporations and small and medium enterprises around the world operating in a wide variety of industries. We also provide a full range of services to assist our customers in assessing, architecting and implementing their storage software solutions.

We derive user license fee revenue from shipments of our software products to end-user customers through a combination of direct sales channels and indirect sales channels such as resellers, value-added resellers, distributors, original equipment manufacturers, application software vendors, strategic partner resellers and systems integrators. Some original equipment manufacturers incorporate our products into their products, some bundle our products with their products, some resell our products and some license our products to third parties as optional products. In general, we receive a user license fee for each sublicense of our products granted by an original equipment manufacturer.

Our services revenue consists of fees derived from maintenance and technical support, consulting and training services. Original equipment manufacturer maintenance agreements covering our products provide for technical and emergency support and minor unspecified product upgrades for a fixed annual fee. Maintenance agreements covering products that are licensed through sales channels other than original equipment manufacturers provide for technical support and unspecified product upgrades for an annual fee based on the number of user licenses purchased and the level of service subscribed.

International Sales and Operations

Our international sales are generated primarily through our international sales subsidiaries. International revenue, most of which is collectible in foreign currencies, accounted for approximately 33% of our total revenue for the three months ended March 31, 2003 and 31% of our total revenue for the three months ended March 31, 2002. Our international revenue increased 14% to \$131.4 million for the three months ended March 31, 2003 from \$115.3 million for the three months ended March 31, 2002. We expect that our international revenue will increase relative to total revenue as a result of the lower penetration of our products existing in these markets and our increasing focus on developing international revenue opportunities, although

Table of Contents

the potential future effect of the Severe Acute Respiratory Syndrome, or SARS, on our business is difficult to predict.

We believe that our success depends upon continued expansion of our international operations. We currently have sales and service offices and resellers located in North America, Europe, Asia-Pacific, South America, Africa and the Middle East, and a research and development center in India. International expansion will require us to establish additional foreign offices, hire additional personnel and recruit new international resellers, resulting in the diversion of significant management attention and the expenditure of financial resources. To the extent that we are unable to meet these additional requirements, growth in international sales will be limited, which would have an adverse effect on our business, operating results and financial condition.

Seagate Technology Transaction

On November 22, 2000, we completed a multi-party transaction with Seagate Technology, or Seagate, and Suez Acquisition Company (Cayman) Limited, or SAC, a company formed by a group of private equity firms led by Silver Lake Partners. The transaction was structured as a leveraged buyout of Seagate pursuant to which Seagate sold all of its operating assets to SAC, and SAC assumed and indemnified Seagate and us for substantially all liabilities arising in connection with those operating assets. We did not acquire Seagate's disc drive business or any other Seagate operating business. At the closing, and after the operating assets and liabilities of Seagate had been transferred to SAC, a wholly-owned subsidiary of ours merged with and into Seagate, following which Seagate became our wholly-owned subsidiary and was renamed VERITAS Software Technology Corporation.

We issued approximately 109.4 million shares of our common stock to the Seagate stockholders in exchange for approximately 128.1 million shares of our common stock and certain non-operating assets and liabilities held by Seagate. The transaction resulted in a decrease of approximately 18.7 million shares of our outstanding common stock. At the closing of the transaction we recorded the non-operating assets and liabilities assumed from Seagate at their fair values. In addition, we accrued \$40.0 million of direct transaction costs, of which \$0.3 million are remaining in accrued acquisition and restructuring costs as of March 31, 2003. We anticipate that the remaining \$0.3 million of acquisition-related costs will be utilized by the second quarter of 2003.

For the three months ended March 31, 2003 and 2002, the Seagate transaction had no significant impact on our net income.

As a result of the decrease of approximately 18.7 million shares of our common stock outstanding on the number of shares used in computing our net income per share, the transaction resulted in incremental net income per share of \$0.01 for the three months ended March 31, 2002. The transaction did not affect net income per share for the three months ended March 31, 2003.

As of March 31, 2003 and December 31, 2002, the transaction affected our consolidated balance sheet, as follows:

other current assets included \$21.3 million of indemnification receivable from SAC;

other non-current assets included \$18.0 million of indemnification receivable from SAC;

income taxes payable included an additional \$21.3 million; and

deferred and other income taxes included an additional \$113.1 million.

As of March 31, 2003 and December 31, 2002, deferred and other income taxes payable recorded in connection with the Seagate transaction totaled \$134.4 million, and related to certain tax liabilities that we expect to pay. Certain of Seagate's federal and state tax returns for various fiscal years are under examination by tax authorities. We believe that adequate amounts for tax liabilities have been provided for any final assessments that may result from these examinations. The timing of the settlement of these examinations is uncertain. To the extent the settlements of these audits and the amounts reimbursed by SAC are different

Table of Contents

from the amounts recorded, the difference will be recorded as a component of income tax expense or benefit and may significantly affect our effective tax rate for the period in which the settlements take place.

Business Combinations

On May 28, 1999, we acquired the Network Storage Management Group business of Seagate Software, Inc., or NSMG. We incurred acquisition-related costs of \$43.4 million. In addition, as a result of the NSMG acquisition, we recorded a restructure charge of \$11.0 million in 1999 related to exit costs associated with duplicative facilities that we planned to vacate. In the fourth quarter of 2002, we recorded an additional reserve of \$4.2 million due to a decline in real estate market conditions that resulted in higher actual exit costs than estimated associated with these duplicative facilities.

Acquisition and acquisition-related restructuring costs as of March 31, 2003 relating to the NSMG acquisition are summarized below (in millions):

	Direct Transaction Costs	Duplicative Facility Related Costs	Involuntary Termination Benefits	Total
Provision accrued	\$ 20.0	\$ 17.9	\$ 16.5	\$ 54.4
Cash payments	(17.4)	(0.3)	(2.7)	(20.4)
Non-cash charges		(0.9)	(11.7)	(12.6)
	—	—	—	—
Balance at December 31, 1999	2.6	16.7	2.1	21.4
Cash payments	(1.9)	(2.1)	(0.9)	(4.9)
Reversal		(3.9)	(0.4)	(4.3)
	—	—	—	—
Balance at December 31, 2000	0.7	10.7	0.8	12.2
Cash payments	(0.7)	(0.2)	(0.3)	(1.2)
	—	—	—	—
Balance at December 31, 2001		10.5	0.5	11.0
Additions		4.2		4.2
Cash payments		(2.5)		(2.5)
Non-cash charges		(1.7)		(1.7)
Reversal			(0.5)	(0.5)
	—	—	—	—
Balance at December 31, 2002		10.5		10.5
Cash payments		(1.0)		(1.0)
Impact of exchange rates		(0.2)		(0.2)
	—	—	—	—
Balance at March 31, 2003	\$	\$ 9.3	\$	\$ 9.3

The impact of exchange rates shown for the first quarter of 2003 is the result of transferring the acquisition and acquisition-related restructuring charge accrual to a foreign subsidiary. The remaining acquisition and acquisition-related restructuring charge accrual of \$9.3 million is anticipated to be utilized for servicing operating lease payments or negotiated buyouts of operating lease commitments, the lease terms of which will expire at various times through the year 2013.

On January 27, 2003, we acquired all of the outstanding capital stock of Jareva Technologies, Inc., or Jareva, a privately held provider of automated server provisioning products that enable businesses to automatically deploy additional servers without manual intervention. We acquired Jareva to integrate its technology into our products and to enable our customers to optimize their investments in server hardware by deploying new server resources on demand. The Jareva acquisition was accounted for using the purchase accounting method for total purchase consideration of \$63.3 million, which included \$58.7 million of cash, \$1.4 million for the issuance of options to purchase 426,766 shares of our common stock and \$3.2 million of acquisition-related costs. The purchase price was allocated, based on independent valuation, to goodwill of \$43.3 million, developed technology of \$9.1 million, other intangibles of \$1.9 million, in-process research and

Table of Contents

development of \$4.1 million, net deferred tax liabilities of \$4.3 million, deferred stock-based compensation of \$5.4 million and net tangible assets of \$3.8 million. For the three months ended March 31, 2003, we recorded amortization of developed technology of \$0.3 million, amortization of other intangibles of \$0.2 million and stock-based compensation expense of \$0.4 million. The acquired in-process research and development of \$4.1 million was written off and the related charge is included in operating income for the three months ended March 31, 2003. The results of operations of Jareva are included in our consolidated financial statements from the date of acquisition. Acquisition-related costs consist of \$2.7 million associated with terminating and satisfying remaining lease commitments, partially offset by sublease income net of related sublease costs and direct transaction costs of \$0.5 million for legal and other professional fees. Total cash outlays for acquisition-related costs were not significant as of March 31, 2003.

On December 19, 2002, we announced that we signed an agreement to acquire Precise Software Solutions Ltd., or Precise, for an aggregate preliminary purchase price of approximately \$590.0 million, including approximately \$497.0 million of cash and common stock to be issued, \$85.0 million of fair value of stock options to be assumed and \$8.0 million of acquisition-related costs. Precise, which is publicly traded on the Nasdaq National Market, is a provider of application performance management products. We expect to complete this acquisition during the second quarter of 2003.

Facility Restructure Reserve

In the fourth quarter of 2002, our board of directors approved a facility restructuring plan to exit and consolidate certain of our facilities located in 17 metropolitan areas worldwide. The facility restructuring plan was adopted to address overcapacity in our facilities as a result of lower than planned headcount growth in these metropolitan areas. In connection with this facility restructuring plan, we recorded a restructuring charge to operating expenses of \$98.2 million. This restructuring charge is comprised of \$86.9 million associated with terminating and satisfying remaining lease commitments, partially offset by sublease income net of related sublease costs and \$11.3 million for asset write-offs. Total cash outlays under this restructuring plan are expected to be approximately \$86.9 million.

Restructuring costs will generally be paid over the remaining lease terms, ending at various dates through 2021, or over a shorter period as we may negotiate with our lessors. We expect the majority of costs will be paid by the year ended December 31, 2008.

During the fourth quarter of 2002, we began vacating excess facilities and expect to vacate all excess facilities associated with this restructuring by October 31, 2003. We anticipate realizing savings beginning during the third quarter of 2003. We are in the process of seeking suitable subtenants for these facilities. Our estimates of the facility restructure charge may vary significantly, depending in part, on factors that are beyond our control, including the commercial real estate market in the applicable metropolitan areas, our ability to obtain subleases related to these facilities and the time period to do so, the sublease rental market rates and the outcome of negotiations with lessors regarding terminations of some of the leases. Adjustments to the facility restructure reserve will be made if actual lease exit costs or sublease income differ from amounts currently expected. Because a portion of the facilities restructure reserve relates to international locations, the reserve will be affected by exchange rate fluctuations.

Table of Contents

The components of the restructuring reserve and movements within these components through March 31, 2003 were as follows (in millions):

	<u>Net Rent Commitments</u>	<u>Asset Write-Offs</u>	<u>Total</u>
Provision accrued	\$86.9	\$11.3	\$98.2
Cash payments	(0.2)		(0.2)
Impact of exchange rates	0.6	0.1	0.7
	<u>87.3</u>	<u>11.4</u>	<u>98.7</u>
Balance at December 31, 2002			
Cash payments	(2.7)		(2.7)
Adjustment	0.8	(0.8)	
Impact of exchange rates	(0.4)	(0.1)	(0.5)
	<u>\$85.0</u>	<u>\$10.5</u>	<u>\$95.5</u>
Balance at March 31, 2003			

Critical Accounting Policies

We believe that there are several accounting policies that are critical to understanding our historical and future performance, as these policies affect the reported amounts of revenue and other significant areas that involve management's judgments and estimates. These significant accounting policies are:

Revenue recognition;

Impairment of long-lived assets;

Restructuring expenses and related accruals; and

Accounting for income taxes.

These policies and our procedures related to these policies are described in detail below and under specific areas within the discussion and analysis of our financial condition and result of operations. In addition, please refer to the notes to the consolidated financial statements in our Form 10-K for further discussion of our accounting policies.

Revenue Recognition

We derive revenue from primarily two sources: software licenses and services. Service revenue includes contracts for software maintenance and technical support, consulting and training services.

We apply the provisions of Statement of Position (SOP) 97-2, *Software Revenue Recognition* (as amended by SOP 98-4 and SOP 98-9) and related interpretations to all transactions to recognize revenue.

For software arrangements involving multiple elements, we allocate and defer revenue for the undelivered elements based on their relative fair value and recognize the difference between the total arrangement fee and the amount deferred for the undelivered elements as revenue. The determination of fair value of each element in multiple element arrangements is based on the price charged when the same element is sold separately. To determine the price when sold separately, for the maintenance and technical support elements, we use historical renewal rates for per-copy deals and stated renewal rates for site licenses.

A typical arrangement includes software licenses, software media and maintenance and technical support. Some arrangements include training and consulting services. Software licenses are sold as site licenses or on a per copy basis. Site licenses give the customer the right to copy the software on a limited or unlimited basis during a specified term.

Edgar Filing: VERITAS SOFTWARE CORP /DE/ - Form 10-Q

Maintenance and technical support includes updates (unspecified product upgrades and enhancements) on a when-and-if-available basis, telephone support, and bug fixes or patches. Maintenance and technical support revenue is recognized ratably over the maintenance term. Training consists of courses taught by our instructors at our facility or at the customer's site. Various courses are offered specific to the license products.

Table of Contents

Training fees are based on a per course basis or on an annual value-pass, which allows for unlimited courses to be taken by one individual over a one-year term. Revenue is recognized when the customer has completed the course. For value-passes, the revenue is recognized ratably over the one-year term. Consulting consists primarily of product installation services, which does not involve customization of the software. Installation services provided by us are not mandatory and can be performed by the customer, a third party, or us. Consulting fees are based on a computed daily rate.

We have analyzed all of the elements included in our multiple-element arrangements and determined that we have fair value to allocate revenue to the maintenance and technical support, training and consulting. Accordingly, assuming all other revenue recognition criteria are met, license revenue is recognized upon delivery of the software license and media using the residual method in accordance with SOP 98-9. Revenue from maintenance and technical support is recognized ratably over the maintenance term. Revenue from consulting is recognized as the services are performed. Revenue from training is recognized as the services are performed or ratably over the term for value-passes.

We define revenue recognition criteria as follows:

Persuasive Evidence of an Arrangement Exists. It is our customary practice to have a written contract, which is signed by both the customer and us, or a purchase order prior to recognizing revenue on an arrangement.

Delivery Has Occurred. Our software is usually physically delivered to our customers with standard transfer terms as FOB shipping point. It is occasionally delivered electronically, through an FTP download or a load and leave , where a VERITAS employee physically loads the software and does not leave any tangible property with the customer. If undelivered products or services exist that are essential to the functionality of the delivered product in an arrangement, delivery is not considered to have occurred.

*The Vendor's Fee is Fixed or Determinable*The fee our customers pay for the products is negotiated at the outset of an arrangement, and is generally based on the specific volume of product to be delivered. Therefore, except in cases where we grant extended payment terms to a specific customer, the fees are considered to be fixed or determinable at the inception of the arrangement. Arrangements with payment terms extending beyond 90 days from the invoice date are not considered to be fixed or determinable. Revenue from such arrangements is recognized as the fees become due and payable.

Collection is Probable. Probability of collection is assessed on a customer-by-customer basis. We typically sell to customers where we have a history of successful collection. New customers are subjected to a credit review process that evaluates the customers' financial position and ultimately their ability to pay. If it is determined from the outset of an arrangement that collection is not probable based upon our review process, revenue is recognized on a cash-collected basis.

Additionally, we generally recognize revenue from licensing of software products through our indirect sales channel when the reseller, value added reseller, hardware distributor, application software vendor or system integrator sells the software products to its customers. For licensing of our software to original equipment manufacturers, royalty revenue is recognized when the original equipment manufacturer reports to us the sale of software to an end user customer. In addition to license royalties, some original equipment manufacturers pay an annual flat fee and/or support royalties for the right to sell maintenance and technical support to the end user. We recognize revenue from original equipment manufacturer support royalties/fees ratably over the term of the support agreement.

Our arrangements do not generally include acceptance clauses. However, if an arrangement includes an acceptance provision, we defer the revenue and recognize it upon acceptance, except for government contracts, as acceptance terms are standard. Acceptance occurs upon the earlier of receipt of a written customer acceptance or expiration of the acceptance period.

Certain of our customers are also our suppliers. Occasionally, in the normal course of business, we purchase and use goods or services for our operations from these suppliers at or about the same time we license our software to them. We identify and review the significant transactions to confirm that they are

Table of Contents

separately negotiated at terms we considered to be arm's length. In cases where the transactions are not separately negotiated, we assess the fair value of either of the goods or services involved in the transaction to support the recognition of the transaction. If we cannot determine fair value of either of the goods or services involved within reasonable limits, we record the transaction on a net basis. Our non-monetary transactions have not been material to our financial statements.

Impairment of Long-Lived Assets

We review our goodwill for impairment when events indicate that its carrying amount may not be recoverable or at least once a year. We are required to test our goodwill for impairment at the reporting unit level. We have determined that we have only one reporting unit. The test for goodwill impairment is a two-step process:

Step 1 We compare the carrying amount of our reporting unit, which is the book value of our entire company, to the fair value of our reporting unit, which corresponds to our market capitalization. If the carrying amount of our reporting unit exceeds its fair value, we have to perform the second step of the process. If not, no further work is needed.

Step 2 We allocate the fair value of our reporting unit to all assets and liabilities of our reporting unit as if the reporting unit had been acquired in a business combination at the date of the impairment test. We then compare the implied fair value of our reporting unit goodwill to its carrying amount. If the carrying amount of our reporting unit's goodwill exceeds its fair value, an impairment loss will be recognized in an amount equal to that excess.

We completed this test during the fourth quarter of 2002 and were not required to record an impairment loss on goodwill.

We review our long-lived assets, including property and equipment and other intangibles, for impairment when events indicate that their carrying amount may not be recoverable. When we determine that one or more impairment indicators are present for an asset, we compare the carrying amount of the asset to net future undiscounted cash flows that the asset is expected to generate. If the carrying amount of the asset is greater than the net future undiscounted cash flows that the asset is expected to generate, we would compare the fair value to the book value of the asset. If the fair value is less than the book value, we would recognize an impairment loss. The impairment loss would be the excess of the carrying amount of the asset over its fair value.

Some of the events that we consider as impairment indicators for our long-lived assets, including goodwill, are:

significant underperformance of our company relative to expected operating results;

our net book value compared to our market capitalization;

significant adverse economic and industry trends;

significant decrease in the market value of the asset;

the extent that we use an asset or changes in the manner that we use it; and

significant changes to the asset since we acquired it.

We do not expect to record an impairment loss on our long-lived assets in the near future.

Restructuring Expenses and Related Accruals

We monitor and regularly evaluate our organizational structure and associated operating expenses. Depending on events and circumstances, we may decide to restructure our operations to reduce operating costs.

Table of Contents

We applied the provisions of Emerging Issues Task Force, or EITF, No. 94-3, *Liability Recognized for Certain Employee Termination Benefits and other Costs to Exit an Activity (Including Certain Costs Incurred in a Restructuring)* and EITF No. 88-10, *Costs Associated with Lease Modification or Termination* to all of our restructuring activities initiated before January 1, 2003. For exit restructuring activities initiated on January 1, 2003 or after, we will apply the provisions of Statement of Financial Accounting Standards, or SFAS, No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*, outlined in our *New Accounting Pronouncements* section in Note 5 of the notes to the condensed consolidated financial statements, which appears elsewhere in this quarterly report on Form 10-Q.

Our restructuring costs and any resulting accruals involve significant estimates made by management using the best information available at the time the estimates are made, some of which may be provided by third parties. These estimates include facility exit costs, such as lease terminations costs, and timing and market conditions of sublease income and related sublease expense costs, such as brokerage fees.

We regularly evaluate a number of factors to determine the appropriateness and reasonableness of our restructuring accruals. These factors include, but are not limited to, our ability to enter into sublease or lease termination agreements and market data about lease rates, timing and term of potential subleases and costs associated with terminating certain leases on vacated facilities.

Our estimates involve a number of risks and uncertainties, some of which are beyond our control, including future real estate market conditions and our ability to successfully enter into subleases or lease termination agreements upon terms as favorable as those assumed under our restructuring plan. Actual results may differ significantly from our estimates and may require adjustments to our restructuring accruals and operating results in future periods. For example, if actual proceeds from sublease agreements were to differ from our estimate of proceeds from sublease agreements included in our facility restructuring plan by 10%, the facility restructuring charge recorded in operating expenses during the fourth quarter of 2002 would have been different by approximately \$6 million.

Accounting for Income Taxes

We are required to estimate our income taxes in each federal, state and international jurisdiction in which we operate. This process requires that we estimate the current tax exposure as well as assess temporary differences between the accounting and tax treatment of assets and liabilities, including items such as accruals and allowances not currently deductible for tax purposes. The income tax effects of the differences we identify are classified as current or long-term deferred tax assets and liabilities in our consolidated balance sheets. We must also assess the likelihood that deferred tax assets will be realized from future taxable income and, based on this assessment, establish a valuation allowance if required. As of March 31, 2003, we determined the valuation allowance to be \$80.1 million based upon uncertainties related to our ability to recover certain deferred tax assets. These deferred tax assets are in specific geographical or jurisdictional locations or are related to losses on strategic investments that will only be realized with the generation of future capital gains within a limited time period.

Future results may vary from these estimates, and at this time it is not practicable to determine if we will need to establish an additional valuation allowance and if it will have a material impact on our financial statements.

Table of Contents**Results of Operations***Net Revenue*

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
User license fees	\$ 254.6	\$ 259.7	(2)%
Services	139.8	110.7	26%
Total net revenue	\$ 394.4	\$ 370.4	6%

In the first quarter of 2003 and 2002, our total net revenue was impacted by continued weak general economic and market conditions resulting in reduced capital spending by our customers. During the first quarter of 2003, the weaker economy negatively impacted growth in our license revenues, while service revenue grew 26%, resulting in a 6% increase in total net revenues in the first quarter of 2003 compared to the first quarter of 2002. Reductions in our customers' capital spending may decrease the demand for our user licenses and services until economic and market conditions improve significantly. While we believe that the percentage increase in total revenue achieved in the first quarter of 2003 compared to the first quarter of 2002 is not necessarily indicative of future results, we expect total net revenue to continue to increase slightly during 2003 reflecting the continued growth of our services revenue, increased penetration of international markets and the benefit of new product offerings, as well as our expectation that general economic conditions could begin to stabilize in the second half of 2003. However, the potential future effect of the Severe Acute Respiratory Syndrome, or SARS, on our net revenues is difficult to predict.

User License Fees

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
User license fees	\$ 254.6	\$ 259.7	(2)%
As a percentage of net revenue	65%	70%	

We derive user license fees from the sale of our core technology products, including data protection and file system and volume management products, and from our emerging technology products, including cluster and replication, storage area networking and network attached storage products. Revenue from core technology products comprises the majority of user license fees and was 82% of total user license fees for the first quarter of 2003 and 87% of user license fees for the first quarter of 2002.

The decline in user license fees in the first quarter of 2003 compared to the first quarter of 2002 reflects weaker general economic and market conditions resulting in deferred buying decisions and a reduction of capital spending by our customers, particularly in the U.S. The reduction in capital spending by our customers during the first quarter of 2003 resulted in a decline in user license fees from our core technology products, partially offset by an increase in demand during the first quarter of 2003 for our emerging technology products, which comprise a smaller percentage of total user license fees compared to user license fees from core technology products. We expect user license fees as a percentage of total net revenue to remain relatively constant or decline slightly in 2003, reflecting the continued growth of service revenue relative to total net revenue, increased penetration of international markets and the benefit of new product offerings, as well as our expectation that general economic conditions could begin to stabilize in the second half of 2003.

Table of Contents

	Three Months Ended March 31,		
	2003	2002	% Change
(In millions, except percentages)			
User license fees:			
Core technologies	\$ 208.9	\$ 225.8	(7)%
Emerging technologies	45.7	33.9	35%
	<u> </u>	<u> </u>	
Total user license fees	\$ 254.6	\$ 259.7	(2)%
	<u> </u>	<u> </u>	
As a percentage of user license fees:			
Core technologies	82%	87%	
Emerging technologies	18%	13%	
	<u> </u>	<u> </u>	
Total percentage of user license fees	100%	100%	
	<u> </u>	<u> </u>	

The decrease in user license fees from core technologies during the first quarter of 2003 compared to the first quarter of 2002 is commensurate with the overall decrease in user license fees from the first quarter of 2002 to the first quarter of 2003 reflecting weaker general economic and market conditions. The revenue growth in emerging technologies during the first quarter of 2003 compared to the first quarter of 2002 reflects increased penetration of our emerging technology products, particularly our clustering and replication products.

Our user license fees from original equipment manufacturers decreased 16% during the first quarter of 2003 to \$35.0 million from \$41.9 million during the first quarter of 2002. The user license fees from original equipment manufacturers accounted for 14% of user license fees in the first quarter of 2003 and 16% of user license fees in the first quarter of 2002. The decrease in the first quarter of 2003 compared to the first quarter of 2002 reflects reduced hardware sales by original equipment manufacturers as their customers reduced technology spending in the weaker economic environment.

Service Revenue

	Three Months Ended March 31,		
	2003	2002	% Change
(In millions, except percentages)			
Service revenue	\$ 139.8	\$ 110.7	26%
As a percentage of net revenue	35%	30%	

We derive our service revenue primarily from contracts for software maintenance and technical support and, to a lesser extent, consulting and training services. The increase in the first quarter of 2003 compared to the first quarter of 2002 was due primarily to renewal of service and support contracts on existing licenses, growth in international service revenue and, to a lesser extent, an increase in demand for consulting and training services. We expect our service revenue to increase in absolute dollars and as a percentage of net revenue primarily as a result of our continued focus on increasing renewals of maintenance and technical support contracts on existing licenses, an increasing demand for our consulting and training services and the impact of the weaker general economic and industry conditions on our user license fee revenue.

Cost of Revenue

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
Cost of revenue	\$ 74.0	\$ 67.3	10%
As a percentage of net revenue	19%	18%	

Table of Contents

Gross margin on user license fees, excluding amortization of developed technology, is substantially higher than gross margin on service revenue, reflecting the low materials, packaging and other costs of software products compared with the relatively high personnel costs associated with providing maintenance and technical support, consulting and training services. Cost of service revenue varies depending upon the mix of maintenance and technical support, consulting and training services. We expect gross margin to fluctuate in the future, reflecting changes in royalty rates on licensed technologies, the mix of license and service revenue and the timing differences between increasing our organizational investments and the recognition of revenue that we expect as a result of these investments. In the near term, we expect service revenue to grow faster than user license fee revenue, which could result in slight declines in gross margin percentages.

Cost of User License Fees (including amortization of developed technology)

	Three Months Ended March 31,		
	2003	2002	% Change
(In millions, except percentages)			
Cost of user license fees:			
User license fees	\$ 11.4	\$ 9.2	24%
Amortization of developed technology	14.8	16.9	(12)%
	<hr/>	<hr/>	
Total cost of user license fees	\$26.2	\$26.1	
	<hr/>	<hr/>	
Gross margin:			
User license fees including amortization of developed technology	90%	90%	

Cost of user license fees consists primarily of amortization of developed technology, royalties, media, manuals and distribution costs. The amortization of developed technology is related primarily to the acquisition of NSMG and the other acquisitions completed during 1999 and the first quarter of 2003. During the second and fourth quarters of 2002, we sold some of our technology and wrote-off the related net book value of developed technology, resulting in a decrease in the amortization of developed technology from the first quarter of 2002 to the first quarter of 2003. If we excluded the amortization of developed technology from the cost of user license fees, the gross margin on user license fees would have been 96% for each of the three-month periods ended March 31, 2003 and 2002. The gross margin on user license fees may vary from period to period based on the license revenue mix because some of our products carry higher royalty rates than others. Excluding the amortization of developed technology, we expect gross margins on user license fees to remain relatively constant or decrease slightly in 2003 as a result of increases in royalty rates we pay on our licensed technologies.

Cost of Service Revenue

	Three Months Ended March 31,		
	2003	2002	% Change
(In millions, except percentages)			
Cost of service revenue	\$47.8	\$41.2	16%
Gross margin	66%	63%	

Cost of service revenue consists primarily of personnel-related costs in providing maintenance and technical support, consulting and training to customers. The gross margin improvement during the first quarter of 2003 compared to the first quarter of 2002 was the result of our increased productivity and higher service revenue growth due to support fees from a larger installed customer base. We expect gross margin on service revenue to remain stable or increase slightly as a result of reductions in labor costs associated with technical support services by increasing our use of lower cost personnel located in our facilities in India.

Table of Contents*Amortization of Developed Technology*

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
Amortization of developed technology	\$ 14.8	\$ 16.9	(12)%
As a percentage of net revenue	4%	5%	

The amortization of the developed technology is related primarily to the acquisition of NSMG and the other acquisitions completed during 1999 and the first quarter of 2003. The decrease during the first quarter of 2003 compared to the first quarter of 2002 reflects the disposal of developed technology during 2002. The useful life of the developed technology acquired is two to five years. Developed technology resulting from our 1999 acquisitions will be fully amortized during the second quarter of 2003. We expect amortization of developed technology and other intangibles to decline in the third quarter of 2003 to approximately \$7.0 million to \$10.0 million per quarter, including the amortization related to the January 2003 acquisition of Jareva and the expected impact of our pending acquisition of Precise based on our preliminary purchase price allocation.

Operating Expenses

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
Operating expenses	\$ 253.9	\$ 243.3	4%
As a percentage of net revenue	64%	66%	

The increase in total operating expenses during the first quarter of 2003 compared to the first quarter of 2002 was primarily the result of increases in research and development and general and administrative expenses and the write-off of in-process research and development of \$4.1 million related to the acquisition of Jareva, partially offset by a decrease in selling and marketing expenses. During the second quarter of 2003, we expect operating margins to remain consistent or decrease slightly compared to the first quarter of 2003, reflecting our efforts to contain costs while investing for future growth. Our operating expenses include selling and marketing expenses, research and development expenses, general and administrative expenses, amortization of goodwill and other intangibles, and in-process research and development.

Selling and Marketing

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
Selling and marketing	\$ 122.0	\$ 127.0	(4)%
As a percentage of net revenue	31%	34%	

Selling and marketing expenses consist primarily of salaries, related benefits, commissions, consultant fees and other costs associated with our sales and marketing efforts. The decrease during the first quarter of 2003 compared to the first quarter of 2002 is primarily the result of a

decrease in staffing levels, leading to a reduction in other employee costs, primarily outside recruiting and employee events, and travel and entertainment expenses. The decrease in the first quarter of 2003 also reflects our efforts to contain costs and control discretionary spending. For the remainder of 2003, we expect selling and marketing expenses to remain stable in absolute dollars, as recent reductions in staffing levels in the United States will be offset by investments in international sales and marketing efforts.

Table of Contents*Research and Development*

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
Research and development	\$ 71.4	\$ 65.2	10%
As a percentage of net revenue	18%	18%	

Research and development expenses consist primarily of salaries, related benefits, third-party consultant fees and other engineering related costs. The increase during the first quarter of 2003 compared to the first quarter of 2002 is primarily the result of an increase in compensation and benefits and, to a lesser extent, costs associated with outside services, primarily for intellectual property protection. The increase in compensation and benefits during the first quarter of 2003 reflects the acquisition of Jareva on January 27, 2003 and a general increase in compensation levels for research and development personnel. We believe that a significant level of research and development investment is required to remain competitive, but expect research and development expenses to remain relatively stable for the remainder of 2003 as a result of increased use of research and development personnel in India, where labor costs are lower.

General and Administrative

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
General and administrative	\$ 38.2	\$ 33.1	15%
As a percentage of net revenue	10%	9%	

General and administrative expenses consist primarily of salaries, related benefits and fees for professional services, such as legal and accounting services. The increase during the first quarter of 2003 compared to the first quarter of 2002 is primarily the result of an increase in staffing levels, expenses associated with outside services, primarily legal and consulting, and increases in facility costs related to new facilities in Milpitas, California and Reading, UK. We expect general and administrative expenses as a percentage of total net revenue to remain relatively stable for the remainder of 2003.

Amortization of Other Intangibles

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
Amortization of other intangibles	\$ 18.2	\$ 18.0	1%
As a percentage of net revenue	5%	5%	

Amortization of other intangibles principally represents amortization of distribution channels, trademarks and other intangibles recorded upon the acquisitions completed during 1999 and the first quarter of 2003. The estimated useful life of our other intangibles is six months to five years, with the majority of intangibles being amortized over two to four years. Other intangibles related to the 1999 acquisitions will be fully

amortized during the second quarter of 2003. We expect amortization of developed technology and other intangibles to decline in the third quarter of 2003 to approximately \$7.0 million to \$10.0 million per quarter, including the impacts of the January 2003 acquisition of Jareva and the expected impact of our pending acquisition of Precise based on our preliminary purchase price allocation.

Table of Contents*In-Process Research and Development*

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
Write-off of in-process research and development	\$4.1	\$	100%
As a percentage of net revenue	1%		

Upon the acquisition of Jareva in January 2003, we recorded a charge to in-process research and development of \$4.1 million. We obtained an outside valuation for this acquisition, and values were assigned to developed technology, in-process research and development and other intangibles. As the basis for identifying the in-process research and development, the development projects were evaluated in the context of Interpretation 4 of SFAS No. 2, *Accounting for Research and Development Costs*. The fair value of the in-process research and development for the acquisition of Jareva was determined using the income approach, which discounts expected future cash flows from projects under development to their net present value. Each project was analyzed to determine the characteristics and applications of the technology; the complexity, cost and time to complete the remaining development efforts; any alternative future use or current technological feasibility; and the stage of completion. Two in-process research and development projects were identified and valued at the time of our acquisition of Jareva. The projected future cash flows from the projects under development were based on management's estimates of revenues and operating profits related to the projects. Revenues on the projects related to in-process research and development were estimated to begin in 2003 through 2007, with the majority of the revenues occurring in 2006 and 2007. Costs to complete these two research and development projects were estimated at \$1.3 million. At the date of acquisition, the development of the related products was estimated at 52% complete, with an expected completion date of June 2003 for both projects. The risk-adjusted discount rate applied to after-tax cash flows was 38%, compared to an estimated weighted average cost of capital of 18%. We believe the amounts determined for in-process research and development are representative of the fair value and do not exceed the amounts an independent third party would pay for the projects assumed.

Interest and Other Income, Net

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
Interest and other income, net	\$8.4	\$13.2	(36)%
As a percentage of net revenue	2%	4%	

The decrease from the first quarter of 2002 to the first quarter of 2003 is primarily due to a decrease in interest income. The decrease in interest income in the first quarter of 2003 is due principally to the fall in interest rates and the appreciation of the Euro against the U.S. Dollar from the first quarter of 2002, partially offset by the higher level of funds available for investment in the first quarter of 2003, which were generated primarily from the net cash provided by operating activities.

Interest Expense

	Three Months Ended March 31,		
	2003	2002	% Change

Edgar Filing: VERITAS SOFTWARE CORP /DE/ - Form 10-Q

	(In millions, except percentages)		
Interest expense	\$7.7	\$7.9	(3)%
As a percentage of net revenue	2%	2%	

Interest expense consisted primarily of interest recorded under the 1.856% convertible subordinated notes due 2006 issued in August 1999 and the 5.25% convertible subordinated notes due 2004 issued in October 1997.

Table of Contents*Loss on Strategic Investments*

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
Loss on strategic investment	\$ 3.5	\$	100%
As a percentage of net revenue	1%		

With the decline in general economic conditions beginning in 2001, some of the companies in which we have invested have experienced extreme volatility and instability in their business and operating results. During the first quarter of 2003, we recognized impairment losses on our strategic investments when we determined that there had been a decline in the fair value of these investments that was other than temporary. These losses represented write-downs of the carrying amount of our investments. As of March 31, 2003, we determined that there was no further impairment, other than temporary, on our strategic investments.

Income Taxes

	Three Months Ended March 31,		
	2003	2002	% Change
	(In millions, except percentages)		
Income taxes	\$ 21.1	\$ 20.7	2%
As a percentage of net revenue	5%	6%	

Our effective tax rate for the first quarter of 2003 was 33% compared to 32% for the first quarter of 2002. Our first quarter effective tax rates for 2003 and 2002 differed from the federal statutory rate due primarily to differences attributable to acquisition-related charges that were non-deductible for tax purposes and to foreign earnings which are taxed at rates different from the federal statutory rate.

New Accounting Pronouncements

In June 2001, the Financial Accounting Standards Board, or FASB, issued SFAS No. 143, *Accounting for Asset Retirement Obligations*. SFAS 143 addresses the financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. SFAS 143 applies to legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development or normal use of the assets. SFAS 143 requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The fair value of the liability is added to the carrying amount of the associated asset, and this additional carrying amount is expensed over the life of the asset. We have adopted the provisions of SFAS 143 as of January 1, 2003. The adoption of SFAS 143 did not have a material effect on our financial position, results of operations or cash flows.

In June 2002, the FASB issued SFAS 146, *Accounting for Costs Associated with Exit or Disposal Activities*. SFAS 146 supersedes Emerging Issues Task Force Issue, or EITF No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and other Costs to Exit an Activity (Including Certain Costs Incurred in a Restructuring)*. SFAS 146 addresses the recognition, measurement, and reporting of costs that are associated with exit and disposal activities. These costs include those related to terminating a contract that is not a capital lease and termination benefits that employees who are involuntarily terminated receive under the terms of a one-time benefit arrangement that is not an ongoing benefit arrangement or an individual deferred-compensation contract. SFAS 146 requires that the liability for costs associated with an exit or disposal activity be recorded at fair value and that they be recognized when the liability is incurred rather than at the date of the commitment to an exit plan as prescribed under EITF 94-3. SFAS 146 will be applied prospectively for exit or disposal activities that are initiated after December 31, 2002 and accordingly, liabilities recognized prior to the initial application of SFAS 146 should continue to be

accounted for in accordance with EITF 94-3. We have implemented the provisions of SFAS 146 as of January 1, 2003, and the

Table of Contents

implementation of SFAS 146 did not have a material impact on our financial position, results of operations or cash flows.

In November 2002, the FASB issued FASB Interpretation, or FIN, No. 45, *Guarantors Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. FIN 45 requires that we recognize the fair value for guarantee and indemnification arrangements issued or modified by us after December 31, 2002, if these arrangements are within the scope of the Interpretation. In addition, we must continue to monitor the conditions that are subject to the guarantees and indemnifications, as required under previously existing generally accepted accounting principles, in order to identify if a loss has occurred. If we determine it is probable that a loss has occurred then any such estimable loss would be recognized under those guarantees and indemnifications. Some of our software licenses contain provisions that indemnify licensees of our software from damages and costs resulting from claims alleging that our software infringes the intellectual property rights of a third party. We have historically received only a limited number of requests for indemnification under these provisions and have not been required to make material payments pursuant to these provisions. Accordingly, we have not recorded a liability related to these indemnification provisions. We do not have any guarantees or indemnification arrangements other than the indemnification clause in some of our software licenses, the guarantee on a credit facility discussed in Note 14 to our condensed consolidated financial statements and the guarantee on our three build-to-suit lease agreements for buildings in Mountain View, Roseville and Milpitas discussed in Note 15 to our condensed consolidated financial statements. We have implemented the provisions of FIN 45 as of January 1, 2003, and the implementation of FIN 45 did not have a material impact on our financial position, results of operations or cash flows.

In January 2003, the FASB issued FIN No. 46, *Consolidation of Variable Interest Entities*, which addresses the consolidation of variable interest entities. FIN 46 provides guidance for determining when an entity that is the primary beneficiary of a variable interest entity or equivalent structure should consolidate the variable interest entity into the entity's financial statements. The provisions of FIN 46 are to be applied as of the beginning of the first interim or annual reporting period beginning after June 15, 2003 for variable interest entities created before February 1, 2003 and still existing on June 15, 2003. We currently have three build-to-suit operating leases, commonly referred to as synthetic leases, which were entered into prior to February 1, 2003. Each synthetic lease is owned by a trust, that has no voting rights, no employees, no financing activity other than the lease with us, no ability to absorb losses and no right to participate in gains realized on the sale of the related property. If the trusts under our leasing structures qualify as variable interest entities for purposes of FIN 46, we would be considered the primary beneficiary and would be required to consolidate these entities into our financial statements beginning July 1, 2003. This would require us to recognize the assets and liabilities of the trusts on our consolidated balance sheet and a cumulative adjustment for the accounting change in our consolidated statement of operations. Alternatively, we may choose to purchase the properties by exercising our purchase option or seek to restructure the synthetic leases with entities that would not qualify as variable interest entities under FIN 46. The purchase price for these properties would be equal to the termination value of the facilities under the respective operating leases and, in the aggregate, would be approximately \$380.8 million. Payment of the purchase price for these properties would significantly reduce the amount of cash, cash equivalents and short-term investments available for funding our research and development efforts, geographic expansion and strategic acquisitions in the future. We can give no assurance that we will be able to restructure the synthetic leases with entities that would not qualify as variable interest entities under FIN 46. We are currently evaluating the impact that would result from adopting FIN 46 on our financial statements.

Liquidity and Capital Resources

Cash Flows

Our cash, cash equivalents and short-term investments totaled \$2,394.1 million at March 31, 2003 and represented 80% of our net tangible assets. Our cash, cash equivalents and short-term investments totaled \$2,241.3 million at December 31, 2002 and represented 77% of our net tangible assets. Cash and cash equivalents are highly liquid with original maturities of 90 days or less. Short-term investments consist mainly

Table of Contents

of commercial paper, medium-term notes, corporate notes, government agency securities (taxable and non-taxable), asset-backed securities and market auction preferreds.

Operating activities provided cash of \$203.3 million for the three months ended March 31, 2003, primarily due to net income of \$42.5 million, adjusted for depreciation and amortization of \$24.6 million, amortization of developed technology and other intangibles of \$33.0 million, deferred income taxes of \$(13.4) million and other non-cash charges, increases in deferred revenue, income taxes payable and a decrease in accounts receivable of \$91.2 million, which were partially offset by decreases in accrued compensation and benefits and other accrued liabilities. We believe that the decrease in accounts receivable was primarily due to the fact that a greater portion of our sales, including some large transactions, occurred in the first two months of the first quarter of 2003. Consequently, a higher than expected amount of our transactions during the first quarter of 2003 was invoiced and paid prior to the end of the quarter. We do not anticipate that the change in our accounts receivable balance or related cash flows from December 31, 2002 to March 31, 2003 is indicative of future periods. Operating activities provided cash of \$193.7 million for the three months ended March 31, 2002, primarily due to net income of \$44.5 million, adjusted for depreciation and amortization of \$24.8 million, amortization of developed technology and other intangibles of \$34.9 million, tax benefits from stock plans of \$15.9 million, deferred income taxes of \$(13.1) million and other non-cash charges, increases in deferred revenue and income taxes payable and a decrease in accounts receivable. These elements were partially offset by a decrease in accrued compensation and benefits.

Investing activities provided cash of \$40.8 million for the three months ended March 31, 2003, primarily due to the net decrease in short-term investments of \$113.8 million, partially offset by purchases of businesses and technologies, net of cash acquired of \$54.6 million and purchases of property and equipment of \$16.3 million. Investing activities provided cash of \$113.7 million for the three months ended March 31, 2002, primarily due to the net decrease in short-term investments of \$136.3 million, partially offset by purchases of property and equipment of \$15.3 million and purchases of businesses and technologies of \$7.3 million.

Financing activities provided cash of \$20.0 million for the three months ended March 31, 2003, arising from the issuance of common stock under our employee stock plans. Financing activities provided cash of \$51.3 million for the three months ended March 31, 2002, arising from the issuance of common stock under our employee stock plans.

If our pending acquisition of Precise Software is completed in the second quarter of 2003 as we anticipate, we expect to have a net use of cash from investing activities reflecting our cash payment to the shareholders of Precise Software, which we currently estimate to be in the range of \$408.9 million to \$545.2 million, depending on the mix of cash and stock consideration paid at the closing of the transaction.

We continue to evaluate alternative uses of our cash including, but not limited to, exercising our purchase option for the properties subject to the build-to-suit lease arrangements, restructuring our 5.25% and 1.856% convertible subordinated notes, implementing a stock re-purchase plan and exploring potential strategic acquisitions, any one of which could reduce the amount of available cash and cash equivalents.

Convertible Subordinated Notes

In October 1997, we issued \$100.0 million of 5.25% convertible subordinated notes due in 2004, or the 5.25% notes, for which we received net proceeds of \$97.5 million. We, and our wholly-owned subsidiary, VERITAS Operating Corporation, are co-obligors on the 5.25% notes and are unconditionally, jointly and severally liable for all payments under the 5.25% notes. As of March 31, 2003, a total principal amount of \$36.0 million had been converted into approximately 3.8 million shares of our common stock. Based on the aggregate principal amount at maturity of \$64.0 million outstanding as of March 31, 2003, the 5.25% notes provide for semi-annual interest payments of \$1.7 million each May 1 and November 1. The 5.25% notes are convertible into shares of our common stock at any time prior to the close of business on the maturity date, unless previously redeemed or repurchased, at a conversion price of \$9.56 per share, subject to adjustment in certain events, equivalent to a conversion rate of 104.65 shares of common stock per \$1,000 principal amount at maturity. The 5.25% notes are redeemable over a period of time until maturity at our option at declining

Table of Contents

premiums to par. The debt issuance costs are being amortized over the term of the 5.25% notes using the interest method.

In August 1999, we and our wholly-owned subsidiary, VERITAS Operating Corporation, issued \$465.8 million, aggregate principal amount at maturity, of 1.856% convertible subordinated notes due in 2006, or the 1.856% notes, for which we received net proceeds of approximately \$334.1 million. The interest rate of 1.856%, together with the accrual of original issue discount, represent a yield to maturity of 6.5%. We, and VERITAS Operating Corporation are co-obligors on the 1.856% notes and are unconditionally, jointly and severally liable for all payments under the notes. As of March 31, 2002, a total principal amount of \$1.1 million had been converted into approximately 29,400 shares of our common stock. Based on the aggregate principal amount at maturity of \$464.7 million outstanding as of March 31, 2003, the 1.856% notes provide for semi-annual interest payments of \$4.3 million each February 13 and August 13. The 1.856% notes are convertible into shares of our common stock at any time prior to the close of business on the maturity date, unless previously redeemed or repurchased, at a conversion price of \$35.80 per share, subject to adjustment in certain events, equivalent to a conversion rate of 27.934 shares of common stock per \$1,000 principal amount at maturity. The 1.856% notes are redeemable over a period of time until maturity at our option at the issuance price plus accrued original issue discount and any accrued interest. The debt issuance costs are being amortized over the term of the 1.856% notes using the interest method.

At March 31, 2003, we had a ratio of long-term debt to total capitalization of approximately 14%. The degree to which we will be leveraged could materially and adversely affect our ability to obtain financing for working capital, acquisitions or other purposes and could make us more vulnerable to industry downturns and competitive pressures. We will require substantial amounts of cash to fund scheduled payments of principal and interest on our indebtedness, including the 5.25% notes and the 1.856% notes, future capital expenditures and any increased working capital requirements. If we are unable to meet our cash requirements out of cash flow from operations, we cannot assure you that we will be able to obtain alternative financing.

Commitments

Credit Facility

During 2002, our Japanese subsidiary entered into a short-term credit facility with a multinational Japanese bank in the amount of 1.0 billion Japanese yen (\$8.3 million USD). At March 31, 2003, no amount was outstanding. The short-term credit facility was renewed in March 2003 and is due to expire in March 2004. Borrowings under the short-term credit facility bear interest at Tokyo Inter Bank Offered Rate, or TIBOR, plus 0.5%. There are no covenants on the short-term credit facility and the loan has been guaranteed by VERITAS Software Global Corporation, one of our wholly-owned subsidiaries of the Company.

Facilities Lease Commitments

In 1999 and 2000, we entered into three build-to-suit lease agreements for office buildings in Mountain View, California, Roseville, Minnesota and Milpitas, California. We began occupying the Roseville and Mountain View facilities in May and June 2001 respectively. The development and acquisition of the properties have been financed by a third party through a syndicate of financial institutions. We have accounted for these agreements as operating leases in accordance with SFAS 13, *Accounting for Leases*, as amended.

During 2001 and 2002, we amended our existing lease agreement, originally signed in 1999, for our corporate headquarters in Mountain View, California. The facilities of 425,000 square feet provide space for sales, marketing, administration and research and development functions. The lease term for these facilities is five years beginning in March 2000, with an option to extend the lease term for two successive periods of one year each, if agreed to by the financial institutions. We have the option to purchase the property (land and facilities) for the termination value of \$145.2 million or, at the end of the lease, to arrange for the sale of the property to a third party while we retain an obligation to the owner for the difference between the sales price and the guaranteed residual value up to \$129.0 million if the sales price is less than this amount, subject to the terms of the lease. In addition, we are entitled to any proceeds from a sale of the property in excess of the termination value. We occupy these facilities and began making lease payments in the second quarter of 2001.

Table of Contents

During 2001 and 2002, we amended our existing lease agreement, originally signed in 2000, for our facilities in Roseville, Minnesota. We improved and expanded our existing facilities of 62,000 square feet and developed adjacent property adding 142,000 square feet completed in 2001. The facilities provide space for technical support and research and development functions. The lease term for these facilities is five years beginning in March 2000, with an option to extend the lease term for two successive periods of one year each, if agreed to by the financial institutions. We have the option to purchase the property (land and facilities) for the termination value of \$41.3 million or, at the end of the lease, to arrange for the sale of the property to a third party while we retain an obligation to the owner for the difference between the sales price and the guaranteed residual value up to \$35.1 million if the sales price is less than this amount, subject to the terms of the lease. In addition, we are entitled to any proceeds from a sale of the property in excess of the termination value. We occupy these facilities and began making lease payments in 2001.

During 2001 and 2002, we amended our existing lease agreement, originally signed in 2000, for the lease of 65 acres of land and subsequent improvements for new research and development campus facilities in Milpitas, California. We plan to develop the site in two phases. The first phase of the project, comprising 466,000 square feet and consisting of one completed building and two additional structures, was completed in the third quarter of 2002. The facilities will provide space for research and development and general corporate functions. The lease term for the first phase is five years beginning in July 2000, with an option to extend the lease term for two successive periods of one year each, if agreed to by the financial institutions. We have the option to purchase the property (land and first phase facilities) for the termination value of \$194.3 million or, at the end of the lease, to arrange for the sale of the property to a third party while we retain an obligation to the owner for the difference between the sales price and the guaranteed residual value up to \$180.5 million if the sales price is less than this amount, subject to the terms of the lease. In addition, we are entitled to any proceeds from a sale of the property in excess of the termination value. We began paying the lease payments in the third quarter of 2002 and will commence occupying a portion of the new campus facilities in the second quarter of 2003. We are currently analyzing our development schedule for the second phase of the campus, and at this time no commitments have been made with respect to the start of construction.

Lease payments under our three build-to-suit lease agreements are generally paid quarterly and are equal to the termination value of the outstanding lease obligations multiplied by our cost of funds, which is based on LIBOR using 30-day to 180-day LIBOR contracts and adjusted for our credit spread. In January 2002, we entered into two three-year pay fixed, receive floating, interest rate swaps for the purpose of hedging the cash payments related to the Roseville, Minnesota and Mountain View, California lease agreements. Under the terms of these interest rate swaps, we make payments based on the fixed rate and will receive interest payments based on the 3-month LIBOR rate. For the three months ended March 31, 2003, our aggregate lease payments, including the payments on the interest rate swaps, were \$4.1 million. Our aggregate payment obligations under the three build-to-suit lease agreements for the second quarter of 2003 are \$4.1 million.

We evaluated the expected fair value of the properties at the end of the lease terms by reviewing current real estate market conditions and indicators of expectations for the market in the future. In the event that we determine it is probable that the expected fair value of any of the properties at the end of the lease terms will be less than the respective termination values, we will accrue the expected loss on a straight-line basis over the remaining lease term. Currently, we do not believe it is probable that the fair market value of the properties at the end of the lease terms will be less than the termination values.

If we choose to exercise the purchase option for the properties subject to the three build-to-suit lease agreements, the aggregate purchase price would be approximately \$380.8 million. Payment of the purchase price for these properties would significantly reduce the amount of cash, cash equivalents and short-term investments available for funding our research and development efforts, geographic expansion and strategic acquisitions in the future.

The agreements for the facilities described above require that we maintain specified financial covenants, all of which we were in compliance with as of March 31, 2003. The specified financial covenants require us to maintain a minimum rolling four quarter EBITDA of \$400 million, a minimum ratio of cash and cash equivalents to current liabilities of 1.2 to 1, and a leverage ratio of total funded indebtedness to rolling four

Table of Contents

quarter EBITDA of not more than 2.5 to 1. For purposes of these financial covenants, EBITDA represents our net income for the applicable period, plus interest expense, taxes, depreciation and amortization and all non-cash restructuring charges for acquisitions occurring within a four year period, less software development expenses classified as capital expenditures. In order to secure the obligations under each agreement, each of the facilities is subject to a deed of trust in favor of the financial institutions which financed the development and acquisition of the respective facility. Bank of America, N.A. was the agent for the syndicate of banks that funded the development of the Mountain View, California and Roseville, Minnesota facilities, and ABN AMRO Bank, N.V. was the agent for the syndicate of banks that funded the development of the Milpitas, California facility.

We currently have operating leases for our facilities and rental equipment through 2023. In addition to our basic rent, we are responsible for all taxes, insurance and utilities related to the facilities. The table below shows our commitments related to our approximate minimum lease payments for our facilities and rental equipment as of March 31, 2003 (in millions):

	Operating Lease Commitments
Nine months ended December 31, 2003	\$ 59,466
2004	67,923
2005	44,973
2006	32,183
2007	31,008
2008 and thereafter	163,513
	<hr/>
Total commitments	\$399,065

Acquired Technology Commitments

On October 1, 2002, we acquired volume replicator software technology for \$6.0 million and contingent payments of up to another \$6.0 million based on future revenues generated by the acquired technology. The payments will be paid quarterly over 40 quarters, in amounts between \$150,000 and \$300,000. We issued a promissory note payable in the principal amount of \$5.0 million, representing the present value of our minimum payment obligations under the purchase agreement for the acquired technology, which are payable quarterly commencing in the first quarter of 2003 and ending in the fourth quarter of 2012. The contingent payments in excess of the quarterly minimum obligations will be paid as they may become due. The balance outstanding of the note payable was \$4.9 million as of March 31, 2003 and \$5.0 million as of December 31, 2002 and is included in non-current accrued acquisition and restructuring costs.

We believe that our current cash, cash equivalents and short-term investment balances and cash flow from operations will be sufficient to meet our working capital and capital expenditure requirements for at least the next 12 months. After that time, we may require additional funds to support our working capital requirements or for other purposes and may seek to raise such additional funds through public or private equity financing or from other sources. We cannot assure you that additional financing will be available at all or that if available, we will be able to obtain it on terms favorable to us.

Factors That May Affect Future Results

In addition to other information in this quarterly report on Form 10-Q, you should consider carefully the following factors in evaluating VERITAS and our business.

Table of Contents

If we experience lower-than-anticipated revenue in any particular quarter, or if we announce that we expect lower revenue or earnings than previously forecasted, the market price of our securities could decline.

Our revenue is difficult to forecast and is likely to fluctuate from quarter to quarter due to many factors outside of our control. Any significant revenue shortfall or lowered forecasts could cause the market price of our securities to decline substantially. Factors that could affect our revenue include, but are not limited to:

the possibility that our customers may cancel, defer or limit purchases as a result of reduced information technology budgets or the current weak and uncertain economic and industry conditions;

the possibility that our customers may defer purchases of our products in anticipation of new products or product updates from us or our competitors;

the possibility that original equipment manufacturers will introduce, market and sell products that compete with our products;

the unpredictability of the timing and magnitude of our sales through direct sales channels, value-added resellers and distributors, which tend to occur later in a quarter than sales through original equipment manufacturers;

the timing of new product introductions by us and the market acceptance of new products, which may be delayed as a result of weak and uncertain economic and industry conditions;

the seasonal nature of our sales;

the rate of adoption and long sales cycles of storage area networks and storage resource management technology;

changes in our pricing and distribution terms or those of our competitors;

the potential impact of the Severe Acute Respiratory Syndrome, or SARS, illness upon our ability to generate revenues, particularly in the Asia-Pacific region; and

the possibility that our business will be adversely affected as a result of the threat of terrorism or military actions taken by the United States or its allies.

You should not rely on the results of prior periods as an indication of our future performance. Our operating expense levels are based, in significant part, on our expectations of future revenue. If we have a shortfall in revenue in any given quarter, we may not be able to reduce our operating expenses quickly in response. Therefore, any significant shortfall in revenue could have an immediate adverse effect on our operating results for that quarter. In addition, if we fail to manage our business effectively over the long term, we may experience high operating expenses, and our operating results may be below the expectations of securities analysts or investors, which could cause the price of our common stock to decline.

Because we derived over 80% of our license and service revenue from sales of our data protection, file system and volume management products, any decline in demand for these products could severely harm our ability to generate revenue.

We derive a substantial majority of our revenue from a small number of software products, including data protection, file system and volume management products. For the three months ended March 31, 2003, we derived approximately 82% of our user license fees from these core products, and a similar percentage of our service revenue from associated maintenance and technical support. As a result, we are particularly vulnerable to fluctuations in demand for these products, whether as a result of competition, product obsolescence, technological change, budget constraints or other factors. If our revenue derived from these software products were to decline significantly, our business and operating results would be adversely affected. In addition, because our software products are concentrated within the market for data storage, a decline in the demand for storage devices, storage software applications or storage capacity could result in a significant reduction in our revenue and adversely affect our business and operating results.

Table of Contents

If we fail to manage our multiple distribution channels effectively, or if our distributors and original equipment manufacturer customers choose not to market and sell our products to their customers, our sales could decline.

We sell our products primarily through indirect sales channels, original equipment manufacturers and direct sales channels. If we fail to manage our distribution channels successfully, our distribution channels may conflict with one another or otherwise fail to perform as we anticipate, which could reduce our sales and increase our expenses, as well as weaken our competitive position.

Indirect Sales Channels. A significant portion of our revenue is derived from sales through value-added resellers and distributors that sell our products to end-users and other resellers. This channel involves a number of special risks, including:

our lack of control over the delivery of our products to end-users;

our resellers and distributors are not subject to minimum sales requirements or any obligation to market our products to their customers;

our resellers and distributors may terminate their relationships with us at any time; and

our resellers and distributors may market and distribute competing products.

Original Equipment Manufacturers. A portion of our revenue is derived from sales through original equipment manufacturers that incorporate our products into their products. Our reliance on this channel involves many risks, including:

our lack of control over the shipping dates or volume of systems shipped;

the original equipment manufacturers are not subject to minimum sales requirements or any obligation to offer our products to their customers;

the original equipment manufacturers may terminate their arrangements with us at any time;

the development work that we must generally undertake under our agreements with original equipment manufacturers may require us to invest significant resources and incur significant costs with little or no associated revenue;

the time and expense required for the sales and marketing organizations of our original equipment manufacturer customers to become familiar with our products make it more difficult to introduce those products to the market; and

our original equipment manufacturer customers are able to develop, market and distribute their own storage products and market and distribute storage products of our competitors, which could reduce our sales.

Direct Sales. A portion of our revenue is derived from sales by our direct sales force to end-users. This sales channel involves special risks, including:

longer sales cycles are associated with direct sales efforts;

we may have difficulty hiring, training, retaining and motivating our direct sales force; and

sales representatives require a substantial amount of training to become productive, and training must be updated to cover new and revised products.

We face intense competition, and our competitors may gain market share in markets for our products, which could adversely affect the growth of our business and cause our revenues to decline.

We have many competitors in the markets for our products. If existing or new competitors gain market share in any of these markets, we may experience a decline in revenues, which could adversely affect our business and operating results. Our principal competitors are the internal development groups of original equipment manufacturers. These groups develop storage management software for the original equipment

Table of Contents

manufacturer's storage hardware. Our principal competitors also include hardware and software vendors that offer products that compete with our products.

Many of our original equipment manufacturer customers have products that compete with our products or have announced their intention to focus on developing and marketing their own storage software products. These original equipment manufacturers may choose to license their own products rather than offer our products to their customers or limit our access to their hardware platforms. End-user customers may prefer to purchase software and hardware that is manufactured by the same company because of perceived advantages in price, technical support, compatibility or other issues. In addition, software vendors may choose to bundle their operating systems with their own or other vendors storage or clustering software. They may also limit our access to standard product interfaces for their operating systems and inhibit our ability to develop products for their platform. If our original equipment manufacturer customers or software vendors were to take any of these actions, we could lose market share and our operating results could be adversely affected.

Many of our competitors have greater financial, technical, sales, marketing and other resources than we do. Our future and existing competitors could introduce products with superior features, scalability and functionality at lower prices than our products, and could also bundle existing or new products with other more established products in order to compete with us. Our competitors could also gain market share by acquiring or forming strategic alliances with our other competitors. Finally, because new distribution methods offered by the Internet and electronic commerce have removed many of the barriers to entry historically faced by start-up companies in the software industry, we may face additional competition from these companies in the future.

If we are unable to develop new and enhanced products that achieve widespread market acceptance, we may be unable to recoup product development costs, and our earnings and revenue may decline.

Our future success depends on our ability to address the rapidly changing needs of our customers by developing and introducing new products, product updates and services on a timely basis. We must also extend the operation of our products to new platforms and keep pace with technological developments and emerging industry standards. We intend to commit substantial resources to developing new software products and services, including software products and services for the storage area networking market and the storage resource management market. Each of these markets is new and unproven, and industry standards for these markets are evolving and changing. They also may require development of new channels. If these markets do not develop as anticipated, or demand for our products and services in these markets does not materialize or occurs more slowly than we expect, we will have expended substantial resources and capital without realizing sufficient revenue, and our business and operating results could be adversely affected.

We have provided standards-setting organizations and various partners with access to our standard product interfaces through our VERITAS Enabled Program. If these standards-setting organizations or our partners do not accept our standard product interfaces for use with other products, or if our partners are better able to capitalize on the use of our standard product interfaces, then our business and operating results could be adversely affected.

Our international sales and operations involve special risks that could increase our expenses, adversely affect our operating results and require increased time and attention of management.

We derive a substantial portion of our revenue from customers located outside of the U.S. We have significant operations outside of the U.S., including engineering, sales, customer support and production operations, and we plan to expand our international operations. Our international operations are subject to risks, including:

potential loss of proprietary information due to piracy, misappropriation or weaker laws regarding intellectual property protection;

imposition of foreign laws and other governmental controls, including trade and employment restrictions;

Table of Contents

fluctuations in currency exchange rates and economic instability such as higher interest rates and inflation, which could reduce our customers' ability to obtain financing for software products or which could make our products more expensive in those countries;

restrictions on growth or maintenance of our revenue from international sales if we do not invest sufficiently in our international operations;

difficulties in hedging foreign currency transaction exposures;

longer payment cycles for sales in foreign countries and difficulties in collecting accounts receivable;

difficulties in staffing and managing our international operations, including difficulties related to administering our stock option plan in some foreign countries;

difficulties in coordinating the activities of our geographically dispersed and culturally diverse operations;

seasonal reductions in business activity in the summer months in Europe and in other periods in other countries;

competition from local suppliers;

costs and delays associated with developing software in multiple languages;

the possible reduced level of general business activity, particularly in the Asia-Pacific region, as a result of the SARS illness; and

political unrest, war or terrorism, particularly in areas in which we have facilities.

In addition, we receive significant tax benefits from sales to our non-U.S. customers. These benefits are contingent upon existing tax regulations in both the U.S. and in the countries in which our international customers are located. Future changes in domestic or international tax regulations could adversely affect our ability to continue to realize these tax benefits.

Our products may contain significant defects, which may subject us to liability for damages suffered by end users.

Software products frequently contain errors or failures, especially when first introduced or when new versions are released. Our end-user customers use our products in applications that are critical to their businesses, including for data backup and recovery, and may have a greater sensitivity to product defects than the market for software products generally. If a customer loses critical data as a result of an error in or failure of our software products or as a result of the customer's misuse of our software products, the customer could suffer significant damages and seek to recover those damages from us. Although our software licenses generally contain protective provisions limiting our liability, a court could rule that these provisions are unenforceable. If a customer is successful in proving its damages and a court does not enforce our protective provisions, we could be liable for the damages suffered by our customers, which could adversely affect our operating results.

In addition, product defects could cause delays in new product releases or product upgrades, or our products might not work in combination with other hardware or software, which could adversely affect market acceptance of our products. If our customers were dissatisfied with product functionality or performance, or if we were to experience significant delays in the release of new products or new versions of products, we could lose competitive position and revenue and our business and operating results could be adversely affected.

If we lose key personnel or fail to integrate replacement personnel successfully, our ability to manage the business effectively would be impaired.

Our future success depends upon the continued service of our key management, technical and sales personnel. Our officers and other key personnel are employees-at-will, and we cannot assure you that we will be able to retain them. Key personnel have left our company over the years, and we cannot assure you that

Table of Contents

there will not be additional departures. The loss of any key employee could result in significant disruptions to our operations, and the integration of replacement personnel could be time consuming, may cause additional disruptions to our operations and may be unsuccessful. We do not carry key person life insurance covering any of our personnel.

In 2002, we hired a new chief financial officer and three other senior management personnel in marketing, product operations and corporate development. In 2003, we expect to hire a new senior sales executive. Any resulting restructuring of those organizations could adversely affect the timeliness of product releases, the successful implementation and completion of company initiatives and the results of our operations. Whether we are able to execute effectively on our business strategy will depend in large part on how well key management and other personnel perform in their positions and are integrated within our company.

If we are unable to attract and retain qualified employees and manage our employee base effectively, we may be unable to develop new and enhanced products, expand our business or increase our revenue.

Our success depends on our ability to hire and retain qualified employees and to manage our employee base effectively. If we are unable to hire and retain qualified employees, our business and operating results could be adversely affected. Conversely, if we fail to manage employee performance or reduce staffing levels when required by market conditions, our costs would be excessive and our business and operating results could be adversely affected. We may need to hire additional sales, technical and senior management personnel to support our business and to meet customer demand for our products and services. Competition for people with the skills that we require is intense, particularly in the San Francisco Bay area where our headquarters are located, and the high cost of living in this area makes our recruiting and compensation costs higher. We cannot assure you that we will be successful in hiring or retaining qualified personnel, and if we are unable to do so, our ability to manage and operate our business could be adversely affected.

We incur considerable expenses to develop products for operating systems that are owned by others and who generally are not required to cooperate with us in our development efforts. This may cause us to incur higher expenses or fail to expand our product lines and revenues.

Many of our products operate primarily on the UNIX and Windows computer operating systems. We have also redesigned, or ported, these products to operate on the Linux operating systems for both server-based and embedded solutions. We continue to develop new products for UNIX, Windows Server and Linux. We may not accomplish our development efforts quickly or cost-effectively, and it is not clear what the relative growth rates of these operating systems will be. These development efforts require substantial capital investment, the devotion of substantial employee resources and the cooperation of the owners of the operating systems to or for which the products are being ported or developed. For some operating systems, we must obtain from the owner of the operating system a source code license to portions of the operating system software to port some of our products to or develop products for the operating system. Operating system owners have no obligation to assist in these porting or development efforts. If they do not grant us a license or if they do not renew our license, we may not be able to expand our product line into other areas. We also cannot predict how quickly, or to what extent, the market for Linux will evolve. If the market for Linux does not develop as anticipated, or demand for our products and services in this market does not materialize or occurs more slowly than we expect, we will have expended substantial resources and capital without realizing sufficient revenue, and our business and operating results could be adversely affected.

We derive a large amount of revenue from one of our distributors, the loss of which could cause our revenues to decline.

We derive significant revenue from Ingram Micro, Inc., a distributor that sells our products and services through resellers. For the three months ended March 31, 2003, Ingram Micro accounted for 10% of our net revenue. If this distributor were to reduce purchases of our products or services, our revenues would decline unless we were able to substantially increase sales through other distributors or direct sales to customers. Our contract with Ingram Micro does not require them to purchase any specified number of software licenses from

Table of Contents

us. Accordingly, we cannot be sure that Ingram Micro will continue to market and sell our products at current levels.

Cooperating with the SEC in its investigation of our transactions with AOL Time Warner has required, and will continue to require, a large amount of management time and attention, as well as accounting and legal expense, which may reduce net income or interfere with our ability to manage our business.

In response to subpoenas issued by the Securities and Exchange Commission in the investigation entitled *In the Matter of AOL/ Time Warner*, we have been cooperating with the SEC's requests for information, including information relating to transactions we entered into with AOL in September 2000 and other transactions. The investigation may continue to require significant management attention and accounting and legal resources, which could adversely affect our ability to manage our business and result in significant accounting and legal expenses. If the SEC or other governmental agency were to pursue an action against us in connection with this matter, we would be required to devote additional management attention and incur additional accounting and legal expenses, which could further adversely affect our business, results of operations and cash flows.

Following the announcement of our financial restatement, we were named as a party to several class action and derivative action lawsuits, and we may be named in additional litigation, all of which could require significant management attention and result in significant legal expenses. An unfavorable outcome in one or more of these lawsuits could have a material adverse effect on our business, financial condition, results of operations and cash flows.

After we announced in January 2003 that we would restate financial results as a result of transactions entered into with AOL Time Warner in September 2000, numerous separate complaints purporting to be class actions were filed in federal court alleging that we and some of our officers and directors violated provisions of the Securities Exchange Act of 1934. The complaints contain varying allegations, including that we made materially false and misleading statements with respect to our 2000, 2001 and 2002 financial results included in our filings with the SEC, press releases and other public disclosures. In addition, several complaints purporting to be derivative actions have been filed in state court against some of our directors and officers. These complaints are based on the same facts and circumstances as the class actions and generally allege that the named directors and officers breached their fiduciary duties by failing to oversee adequately our financial reporting. All of the complaints generally seek an unspecified amount of damages. The cases are still in the preliminary stages, and it is not possible for us to quantify the extent of our potential liability, if any. An unfavorable outcome in any of these cases could have a material adverse effect on our business, results of operations and cash flows. In addition, the expense of defending any litigation may be costly and divert management's attention from the day-to-day operations of our business, which would adversely affect our business, results of operations and cash flows.

Our business strategy includes possible growth through business acquisitions, which involve special risks that could increase our expenses, cause our stock price to decline and divert the time and attention of management.

As part of our business strategy, we have in the past acquired and expect in the future to acquire other businesses, business units and technologies. We recently acquired Jareva Technologies, Inc. and entered into a definitive agreement to acquire Precise Software Solutions Ltd. Our acquisitions involve a number of special risks and challenges, including:

diversion of management's attention from our core business;

integration of acquired business operations and employees into our existing business, including coordination of geographically dispersed operations, which in the past has taken longer and was more complex than initially expected for some acquired companies;

incorporation of acquired business technology into our existing product lines, including consolidating technology with duplicative functionality or designed on different technological architecture;

Table of Contents

loss or termination of employees, including costly litigation resulting from the termination of those employees;

dilution of our then-current stockholders' percentage ownership;

assumption of liabilities of the acquired business, including costly litigation related to alleged liabilities of the acquired business;

presentation of a unified corporate image to our customers and our employees; and

risk of impairment charges related to potential write-down of acquired assets in future acquisitions.

Acquisitions of businesses, business units and technologies are inherently risky and create many challenges. We may be unable to close announced acquisitions, and we cannot provide any assurance that our previous or any future acquisitions will achieve the desired objectives.

As a result of the Seagate Technology leveraged buyout and merger transaction, our subsidiary may be liable to third parties for liabilities resulting from Seagate's operations before the transaction.

In November 2000, Seagate Technology became our subsidiary. As part of that transaction, Suez Acquisition (Cayman) Company, or SAC, acquired the operating assets of Seagate Technology. SAC assumed and agreed to indemnify us for substantially all liabilities arising in connection with Seagate Technology's operations prior to the transaction. However, governmental organizations or other third parties may seek recourse against our subsidiary or us for these liabilities. As a result, our subsidiary could receive claims related to a wide range of possible liabilities. The main area of potential liability for our Seagate Technology subsidiary relates to tax liabilities. Any such claim, with or without merit, could be time consuming to defend, result in costly litigation and divert management attention. Moreover, if SAC is unable or unwilling to indemnify us as agreed, we could incur unexpected costs. For example, the Internal Revenue Service is currently auditing past tax returns of Seagate Technology. We can predict neither the outcome of these audits, nor the amount of any liability we might incur arising from these audits.

Our effective tax rate may increase or fluctuate, which could increase our income tax expense and reduce net income.

Our effective tax rate could be adversely affected by several factors, many of which are outside of our control. Our effective tax rate is directly affected by the relative proportions of revenue and income before taxes in the various domestic and international jurisdictions in which we operate. We are also subject to changing tax laws, regulations and interpretations in multiple jurisdictions in which we operate. We do not have a history of audit activity from various taxing authorities and while we believe we are in compliance with all federal, state and international tax laws, there are various interpretations of their application that could result in additional tax assessments. Our effective tax rate is also influenced by the tax effects of purchase accounting for acquisitions and non-recurring charges, which may cause fluctuations between reporting periods. In addition, in November 2000, we acquired Seagate Technology, which has certain federal and state tax returns for various fiscal years under examination by tax authorities. We believe that adequate amounts for tax liabilities have been provided for any final assessments that may result from these examinations. The timing of the settlement of these examinations is uncertain. To the extent the settlements of these audits and the amounts reimbursed by SAC, as required by the Seagate acquisition agreement, are different from the amounts recorded, the difference will be recorded as a component of income tax expense or benefit and may significantly affect our effective tax rate for the period in which the settlements take place.

Table of Contents

We incur or may incur significant accounting charges that, individually or in the aggregate, could reduce earnings and create net losses under generally accepted accounting principles.

We incur or may incur significant accounting charges that, individually or in aggregate, could create losses under generally accepted accounting principles in future periods. Examples of these charges are:

Amortization of Developed Technology and Other Intangibles. We incur significant charges related to the amortization of developed technology and other intangibles. We expect this charge to be approximately \$23.2 million for the second quarter of 2003 and approximately \$7.0 million to \$10.0 million for the third quarter of 2003, including the impact of the pending transaction with Precise that is expected to close during the second quarter of 2003. The quarterly amortization charge could increase as a result of future business combinations or impairment of our other intangibles. While we do not expect to record other intangibles impairment charges, we cannot be sure that we will not have to record impairment in the future. As of March 31, 2003, the total net carrying amount of our other intangibles was \$49.8 million;

Impairment of Goodwill. We do not amortize goodwill related to business combinations, but instead we test it for impairment at least annually. While we do not expect to record goodwill impairment charges, we cannot be sure that we will not have to record impairment in the future. As of March 31, 2003, the total net carrying amount of our goodwill was \$1,239.9 million;

Loss on Strategic Investments. In the third quarter of 2001, the second quarter of 2002 and the first quarter of 2003, we recorded losses on strategic investments. Future losses will depend on the results of our quarterly reviews to determine if there has been a decline in the fair value of our strategic investments that is other than temporary. As of March 31, 2003, the total carrying amount of our strategic investments was \$5.6 million;

Stock-based Compensation. In accounting for our stock option and stock purchase plans, because the exercise price of options granted under our stock plans are generally equal to the market value of our common stock on the date of grant, we recognize no compensation cost for grants under these plans. The FASB has voted to require companies to record a charge to earnings for employee stock option grants, but the methodology for valuing stock options and the timing for issuance of final rules have not been finalized. Changes in practices regarding accounting for stock options could result in significant accounting charges; and

Restructuring Charges. We regularly perform evaluations of our operations and activities. Any decision to restructure our operations, to exit any activity or to eliminate any excess capacity could result in significant accounting charges. Restructuring charges could also result from future business combinations. As a result of an evaluation of our facilities requirements, we believe that we have excess capacity in our domestic and foreign facilities. In the fourth quarter of 2002, our board of directors approved a restructuring plan to exit and consolidate certain of our facilities located in 17 metropolitan areas worldwide. In connection with this restructuring plan, we recorded a restructuring charge of approximately \$98.2 million during the fourth quarter of 2002. As of March 31, 2003, the total carrying amount of our facility restructure reserve was \$95.5 million.

If our assumptions about our ability to terminate or sublet our facilities prove to be unrealistic, the total costs of our facilities restructuring may be larger than we anticipated.

In the fourth quarter of 2002, our board of directors approved a restructuring plan to exit and consolidate some of our facilities based on our evaluation that our existing and planned facilities would exceed our near-term facilities needs due to slower than anticipated growth in the number of our employees as a result of weak and uncertain economic and industry conditions. In connection with this restructuring plan, we recorded a restructuring charge of approximately \$98.2 million during the fourth quarter of 2002. Our restructuring plan includes assumptions related to our ability to enter sublease and/or lease termination arrangements regarding some of our facilities. We cannot predict if, or when, we will be able to successfully enter sublease and/or lease termination arrangements for these facilities or if the actual terms of these arrangements will be as

Table of Contents

favorable as those assumed under our restructuring plan. Should we be unable to execute our restructuring plan under terms as favorable as those assumed under the restructuring plan, we may be required to materially increase our restructuring charge in future periods. We also cannot predict if our evaluation of our needs is accurate or if weak and uncertain economic and industry conditions will continue once we begin to implement our restructuring plan. We may find that our facility requirements are greater than estimated under our plan, which could necessitate procuring facilities at rates higher and at costs in addition to facilities that have been vacated by us. In addition, we cannot assure you that our restructuring program will achieve the anticipated benefits or will be completed in accordance with the contemplated timetable.

Our debt would be expensive to repay, and any default may impair our ability to borrow or raise capital.

In October 1997, we issued \$100.0 million in aggregate principal amount at maturity of 5.25% convertible subordinated notes due 2004, of which \$64.0 million was outstanding as of March 31, 2003. In August 1999, we issued \$465.8 million in aggregate principal amount at maturity of 1.856% convertible subordinated notes due 2006, of which \$464.7 million was outstanding as of March 31, 2003. As of March 31, 2003, the annual interest payments on our outstanding 5.25% notes were \$3.4 million and the annual interest payments on our outstanding 1.856% notes were \$8.6 million, all of which we plan to fund from cash flows from operations. We will need to generate substantial amounts of cash from our operations to fund interest payments and to repay the principal amount of debt when it matures, while at the same time funding capital expenditures and our other working capital needs. If we do not have sufficient cash to pay interest or principal on our debts as they come due, we could be in default of those debts. For example, if we do not make timely payments, the notes could be declared immediately due and payable, in which event we would be required to immediately repay the notes in their entirety. A default under the notes could result in a reduction of our credit rating and make it more difficult for us to raise capital and adversely affect the trading price in our common stock. In addition, repayment of the notes upon a default would significantly reduce the amount of cash, cash equivalents and short term investments available for funding our research and development efforts, geographic expansion and strategic acquisitions in the future. Our outstanding debt could also increase our vulnerability to adverse economic and industry conditions by making it more difficult for us to raise capital if needed. In addition, any changes in accounting rules regarding our operating leases and built-to-suit facilities may affect our debt levels and operating expenses in the future.

If we do not protect our proprietary information and prevent third parties from making unauthorized use of our products and technology, our revenues could be harmed.

We rely on a combination of copyright, patent, trademark and trade secret laws, confidentiality procedures, contractual provisions and other measures to protect our proprietary information. All of these measures afford only limited protection. These measures may be invalidated, circumvented or challenged, and others may develop technologies or processes that are similar or superior to our technology. We may not have the proprietary information controls and procedures in place that we need to protect our proprietary information adequately. In addition, because we license the source code for some of our products to third parties, there is a higher likelihood of misappropriation or other misuse of our intellectual property. We also license some of our products under shrink wrap license agreements that are not signed by licensees and therefore may be unenforceable under the laws of some jurisdictions. Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy our products or to obtain or use information that we regard as proprietary.

Third parties claiming that we infringe their proprietary rights could cause us to incur significant legal expenses and prevent us from selling products.

From time to time, we receive claims that we have infringed the intellectual property rights of others. As the number of products in the software industry increases and the functionality of these products further overlap, we believe that we may become increasingly subject to infringement claims, including patent and copyright infringement claims. We have received several trademark claims in the past and may receive more claims in the future based on the name VERITAS, which is a word commonly used in trade names

Table of Contents

throughout Europe and the western hemisphere. We have also received patent infringement claims in the past and may receive more claims in the future based on allegations that our products infringe upon patents held by third parties. In addition, former employers of our former, current or future employees may assert claims that such employees have improperly disclosed to us the confidential or proprietary information of these former employers. Any such claim, with or without merit, could:

be time consuming to defend;

result in costly litigation;

divert management's attention from our core business;

require us to stop selling, to delay shipping or to redesign our product; and

require us to pay monetary amounts as damages, for royalty or licensing arrangements, or to satisfy indemnification obligations that we have with some of our customers.

In addition, we license and use software from third parties in our business. These third party software licenses may not continue to be available to us on acceptable terms. Also, these third parties may from time to time receive claims that they have infringed the intellectual property rights of others, including patent and copyright infringement claims, which may affect our ability to continue licensing this software. Our inability to use any of this third party software could result in shipment delays or other disruptions in our business, which could materially and adversely affect our operating results.

If we discontinue reporting financial results using non-GAAP financial measures, investors may be confused about our operating results and our stock price could decline.

As a result, we announced our intention to discontinue reporting non-GAAP financial measures (sometimes called "pro forma" reporting) beginning with our earnings announcement for the quarter ending September 30, 2003. Historically, we reported our financial results using both GAAP financial measures and non-GAAP financial measures, which typically excluded the impact of purchase accounting adjustments and the impact of other special items on our operating results. It is possible that, as we transition away from pro forma reporting, investors may be confused about our operating results, particularly with regard to comparisons to our operating results for prior periods. If this occurs, the market price of our common stock could decline.

Natural disasters could disrupt our business and result in loss of revenue or in higher expenses.

We must protect our business and our network infrastructure against damage from earthquake, flood, hurricane and similar events. Many of our operations are subject to these risks, particularly our operations located in California. A natural disaster or other unanticipated problem could adversely affect our business, including both our primary data center and other internal operations and our ability to communicate with our customers or sell our products over the Internet.

Some provisions in our charter documents and our stockholder rights plan may prevent or deter an acquisition of VERITAS.

Some of the provisions in our charter documents may deter or prevent certain corporate actions, such as a merger, tender offer or proxy contest, which could affect the market value of our securities. These provisions include:

our board of directors is authorized to issue preferred stock with any rights it may determine;

our board of directors is classified into three groups, with each group of directors to hold office for three years;

our stockholders are not entitled to cumulate votes for directors and may not take any action by written consent without a meeting; and

Table of Contents

special meetings of our stockholders may be called only by our board of directors, by the chairman of the board or by our chief executive officer, and may not be called by our stockholders.

We also have in place a stockholder rights plan that is designed to discourage coercive takeover offers. In general, our stockholder rights plan provides our existing stockholders (other than an existing stockholder that becomes an acquiring person) with rights to acquire shares of our common stock at 50% of its trading price if a person or entity acquires, or announces its intention to acquire, 15% or more of the outstanding shares of our common stock, unless our board of directors elects to redeem these rights.

Our board of directors could utilize the provisions of our charter documents and stockholder rights plan to resist an offer from a third party to acquire VERITAS, including an offer to acquire our common stock at a premium to its trading price or an offer that is otherwise considered favorable by our stockholders.

Our stock price may be volatile in the future, and you could lose the value of your investment.

The market price of our common stock has experienced significant fluctuations and may continue to fluctuate significantly, and you could lose the value of your investment. The market price of our common stock may be adversely affected by a number of factors, including:

announcements of our quarterly operating results or those of our competitors or our original equipment manufacturer customers;

rumors, announcements or press articles regarding changes in our management, organization, operations or prior financial statements;

inquiries by the SEC, NASDAQ or regulatory bodies;

changes in earnings estimates by securities analysts;

announcements of planned acquisitions by us or by our competitors;

gain or loss of a significant customer;

announcements of new products by us, our competitors or our original equipment manufacturer customers;

the potential impact of the SARS illness upon our ability to generate revenues, particularly in the Asia-Pacific region; and

acts of terrorism, the threat of war and economic slowdowns in general.

The stock market in general, and the market prices of stocks of other technology companies in particular, have experienced extreme price volatility, which has adversely affected and may continue to adversely affect the market price of our common stock for reasons unrelated to our business or operating results.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk****Foreign Currency Risk**

We transact business in various foreign currencies and have established a foreign currency hedging program, utilizing foreign currency forward exchange contracts, or forward contracts, to hedge certain foreign currency transaction exposures. Under this program, increases or decreases in our foreign currency transactions are offset by gains and losses on the forward contracts, so as to mitigate the possibility of foreign currency transaction gains and losses. We do not use forward contracts for speculative or trading purposes. All foreign currency transactions and all outstanding forward contracts are marked-to-market at the end of the period with unrealized gains and losses included in other income (expense). The unrealized gain (loss) on the outstanding forward contracts at March 31, 2003 was immaterial to our consolidated financial statements.

Our outstanding forward contracts as of March 31, 2003 are presented in the table below. All forward contract amounts are representative of the expected payments to be made under these instruments. As of March 31, 2003, all forward contracts mature in 31 days or less (amounts in thousands):

	Local Currency Contract Amount	Contract Amount	Fair Market Value at March 31, 2003 (US \$)
Contracts to Buy US \$			
Australian dollar	733.0 AUD	438.7 USD	4.6

South African rand	1,985.0 ZAR	157.3 GBP	3.0

In September 2000, we entered into a three-year cross currency interest rate swap transaction, or swap, for the purpose of hedging fixed interest rate, foreign currency denominated cash flows under an inter-company loan receivable. Under the terms of this derivative financial instrument, Euro denominated fixed principal and interest payments to be received under the inter-company loan will be swapped for U.S. dollar-fixed principal and interest payments. As of March 31, 2003, six monthly payments of 4.3 million remained to be swapped at a forward exchange rate of 0.89070 U.S. dollar per Euro. The fair market value of the swap at March 31, 2003 was \$(8.8) million. As a result of entering into the swap, we have mitigated our exposure to foreign currency exchange rate fluctuations. The gains or losses on the foreign currency loan receivable will be

Table of Contents

offset by the gains or losses on the swap. Because we are receiving fixed interest payments under the swap, we are still subject to fluctuations in value due to changes in U.S. dollar interest rates. As of March 31, 2003, the impact of these fluctuations was not significant. This hedge was deemed to be highly effective as of March 31, 2003.

In January 2002, we entered into two three-year pay fixed, receive floating, interest rate swaps for the purpose of hedging cash flows on variable interest rate debt of our build-to-suit lease agreements. Under the terms of these interest rate swaps, we make payments based on the fixed rate and will receive interest payments based on the 3-month London Inter Bank Offered Rate, or LIBOR. The payments on our build-to-suit lease agreements are based upon a 3-month LIBOR plus a credit spread. If our credit spread remains consistent and other critical terms of the interest rate swap or the hedged item do not change, the interest rate swap will be considered to be highly effective with all changes in the fair value included in other comprehensive income. If our credit spread changes or other critical terms of the interest rate swap or the hedged item change, the hedge may become partially or fully ineffective, which could result in all or a portion of the changes in fair value of the derivative recorded in the statement of operations. The interest rate swaps settle the first day of January, April, July and October until expiration. As of March 31, 2003, the fair value of the interest rate swaps was \$(11.1) million. As a result of entering into the interest rate swaps, we have mitigated our exposure to variable cash flows associated with interest rate fluctuations. Because the rental payments on the leases are based on the 3-month LIBOR and we receive 3-month LIBOR from the interest rate swap counter-party, we have eliminated any impact to raising interest rates related to our rent payments under the build-to-suit lease agreements. This hedge was deemed to be highly effective as of March 31, 2003.

Interest Rate Risk

We are exposed to interest rate risk primarily on our investment portfolio and long-term debt obligations. Our primary investment objective is to preserve principal while at the same time maximizing yields without significantly increasing risk. Our portfolio primarily includes money markets funds, commercial paper, corporate notes, government securities (taxable and non-taxable), asset-backed securities and market auction preferred. The diversity of our portfolio helps us to achieve our investment objective.

Long-term debt of \$464.5 million consists of \$64.0 million from our 5.25% convertible subordinated notes due in 2004 and \$400.5 million from our 1.856% convertible subordinated notes due in 2006. The interest rate of 1.856% on the 1.856% notes together with the accrual of original issue discount represent a yield to maturity of 6.5%. The nominal interest rate on these notes is fixed and the notes provide for semi-annual interest payments of approximately \$1.7 million each May 1 and November 1 for the 5.25% notes and approximately \$4.3 million each February 13 and August 13 for the 1.856% notes. The notes are convertible into our common stock at any time prior to the close of business on the maturity date, unless previously redeemed or repurchased, and subject to adjustment under the terms of the notes.

Table of Contents

The following table presents the amounts of our cash equivalents, investments and long-term debt, according to maturity date, that may be subject to interest rate risk and the average interest rates as of March 31, 2003 by year of maturity (dollars in thousands):

	Amortized Cost				2002 Amortized Cost
	Due in 2003	Due in 2004 and Thereafter	Total	2003 Fair Value	
Cash equivalents and short-term investments:					
Fixed rate	\$ 1,057,120	\$ 558,606	\$ 1,615,726	\$ 1,622,640	\$ 1,778,702
Average fixed rate	1.48%	2.80%	1.94%	1.94%	2.26%
Variable rate	\$ 429,415	\$ 105,020	\$ 534,435	\$ 533,112	\$ 288,575
Average variable rate	1.46%	3.06%	1.77%	1.78%	1.73%
Total cash equivalents and short-term investments	\$ 1,486,535	\$ 663,626	\$ 2,150,161	\$ 2,155,752	\$ 2,067,277
Average rate	1.48%	2.84%	1.90%	1.90%	2.18%
Long-term debt:					
Fixed rate	\$	\$ 464,497	\$ 464,497	\$ 520,823	\$ 460,252
Average fixed rate		6.33%	6.33%	6.21%	6.33%

Equity Price Risk

We are exposed to equity price risk on the marketable portion of our portfolio of equity securities investments. We typically do not attempt to reduce or eliminate our market exposure on these equity securities. These investments are in companies in the high-technology industry. As of March 31, 2003, we held two marketable equity securities, representing a total market value of \$7.6 million. Assuming a 10% adverse change, our marketable equity securities investments would decrease in value by approximately \$0.8 million. If our marketable equity security investments as of March 31, 2003 had been valued using prices as of April 30, 2003, the value of these securities would have increased by approximately \$2.4 million, or 31%. This estimate is not necessarily indicative of future performance and actual results may differ materially.

We also made investments in development-stage companies that we believe provide strategic opportunities for us. We intend that these investments will provide access to new technologies and emerging markets, and create opportunities for additional sales of our products and services. We recognize impairment losses on our strategic investments when we determine that there has been a decline in the fair value of the investment that was other than temporary. During the first quarter of 2003, we recognized impairment losses of \$3.5 million on our strategic investments when we determined that there had been a decline in the fair value of the investments that were other than temporary. The losses represented write-downs of the carrying amount of our investments and were determined by using, among other factors, an investee's significant decline in stock value, its inability to obtain additional private financing and the uncertainty of its financial conditions. As of March 31, 2003, we determined that there was no further impairment in these investments. We cannot assure you that our investments will have the above mentioned results, or even that we will not lose all or any part of these investments.

Item 4. Controls and Procedures**Evaluation of Disclosure Controls and Procedures**

Regulations under the Securities Exchange Act of 1934 require public companies, including our company, to maintain disclosure controls and procedures, which are defined to mean a company's controls and other procedures that are designed to ensure that information required to be disclosed in the reports that it files or submits under the Securities Exchange Act of 1934 are recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Our chief executive officer and our chief financial officer have evaluated our disclosure controls and procedures within

Table of Contents

90 days before the filing date of this report. This included evaluation of improvements we made to our disclosure controls and procedures in the fourth quarter of 2002 to strengthen our review process for transactions in which our customers are also our suppliers. Our chief executive officer and chief financial officer concluded that as of their evaluation date, our disclosure controls and procedures were effective for the purposes for which they were designed.

Changes in Internal Controls

There were no significant changes in our internal controls or to our knowledge, in other factors that could significantly affect these controls subsequent to the date of their evaluation, which occurred as of the evaluation date referenced in the above paragraph.

Table of Contents

PART II: OTHER INFORMATION

Item 1. Legal Proceedings

In response to subpoenas issued by the Securities and Exchange Commission in the investigation entitled *In the Matter of AOL/Time Warner*, we continue to furnish information requested by the SEC, including information relating to the transactions we entered into with AOL in September 2000. We cannot predict the outcome of this investigation at this time. We will continue our efforts to cooperate with the SEC's investigation.

After we announced in January 2003 that we would restate financial results as a result of transactions entered into with AOL in September 2000, numerous separate complaints purporting to be class actions were filed in the United States District Court for the Northern District of California alleging that we and some of our officers and directors violated provisions of the Securities Exchange Act of 1934. The complaints contain varying allegations, including that we made materially false and misleading statements with respect to our 2000, 2001 and 2002 financial results included in our filings with the SEC, press releases and other public disclosures. These complaints have been consolidated and, on May 2, 2003, a lead plaintiff and lead counsel were appointed. In addition, several complaints purporting to be derivative actions have been filed in California state court against some of our directors and officers. These complaints are based on the same facts and circumstances as the class actions and generally allege that the named directors and officers breached their fiduciary duties by failing to oversee adequately our financial reporting. All of the complaints generally seek an unspecified amount of damages. The cases are still in the preliminary stages, and it is not possible for us to quantify the extent of our potential liability, if any. An unfavorable outcome in any of these cases could have a material adverse effect on our business, financial condition, results of operations and cash flow. In addition, defending any litigation may be costly and divert management's attention from the day-to-day operations of our business.

On January 10, 2003, Raytheon Company sued VERITAS Software Corporation along with Brocade Communications Systems, Oracle Corporation, Overland Storage Inc., Qualstar Corp., QLogic Corporation, Ricoh Corporation and Spectra Logic Corporation in the United States District Court for the Eastern District of Texas. Raytheon is alleging infringement of US Patent No. 5,412,791, entitled Mass Data Storage Library, and is seeking damages and an injunction against all defendants. We believe that we have numerous defenses and counterclaims to the claims of infringement asserted against us and we intend to vigorously defend ourselves. We filed an answer to Raytheon's complaint on March 7, 2003, denying all material allegations in the complaint and asserting counterclaims seeking to have Raytheon's 791 patent declared invalid and not infringed by us.

On October 23, 2001, Storage Computer Corporation initiated litigation against VERITAS Software Corporation in the United States District Court for the Northern District of Texas alleging infringement of one of Storage Computer Corporation's patents. Currently, Storage Computer Corporation is alleging we infringe two of their US patents. We have denied all material allegations in the complaints, have filed counterclaims for declaratory judgment of invalidity and non-infringement of the patents-in-suit and have alleged their infringement of one of our patents. Storage Computer Corporation is seeking unspecified damages, treble damages, costs of suit and attorneys' fees and a permanent injunction from further alleged infringement. We believe that we have numerous defenses and counterclaims relative to the claims of infringement asserted against us and intend to vigorously defend this action.

We are also party to various other legal proceedings that have arisen in the ordinary course of our business. While we currently believe that the ultimate outcome of these proceedings, individually and in the aggregate, will not have a material adverse effect on our financial position or overall trends in results of operations, litigation is subject to inherent uncertainties. Were an unfavorable ruling to occur, there exists the possibility of a material adverse impact on the results of operations of the period in which the ruling occurs. The estimate of the potential impact on our financial position or overall results of operations for the above legal proceedings could change in the future.

Table of Contents**Item 4. Submission of Matters to a Vote of Security Holders**

At our annual meeting of stockholders held on May 13, 2003, each of the following individuals was elected to our board of directors as Class B directors to hold office for a term of three years or until his successor is duly elected or qualified or until his resignation or removal:

	<u>Votes For</u>	<u>Votes Withheld</u>
Gary L. Bloom	350,108,962	12,113,770
Joseph D. Rizzi	337,991,045	24,231,687

In addition, the following individuals terms of office as directors continued after the annual meeting:

Steven D. Brooks	Geoffrey W. Squire
Michael Brown	Paul Unruh
Mark Leslie	Fred van den Bosch
David J. Roux	

The following proposals were also approved at our annual meeting:

	<u>Votes For</u>	<u>Votes Against</u>	<u>Abstentions</u>	<u>Broker Non-Votes</u>
Approve the VERITAS Software Corporation 2003 Stock Incentive Plan	239,796,633	119,893,623	2,532,475	60,458,156
Approve a stockholder proposal requesting that the Board of Directors establish a policy of expensing future stock option grants to senior company executives	189,475,573	105,210,997	7,078,006	60,458,156
Ratify the appointment of KPMG LLP as independent accountants for the fiscal year ending December 31, 2003	353,100,188	6,881,107	2,241,435	60,458,156

Item 6. Exhibits and Reports on Form 8-K

CHIEF EXECUTIVE OFFICER CERTIFICATION

I, Gary L. Bloom, certify that:

1. I have reviewed this quarterly report on Form 10-Q of VERITAS Software Corporation;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the Evaluation Date); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors:
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officer and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
