Sidebar text: WE THINK YOUR NUVEEN FUND CAN BE AN IMPORTANT BUILDING BLOCK IN A PORTFOLIO DESIGNED TO PERFORM WELL THROUGH A VARIETY OF MARKET CONDITIONS.

Dear Shareholder

I am very pleased to report that for the year ended October 31, 2003, your Nuveen Fund continued to provide you with attractive monthly tax-free income.

Your Nuveen Fund is managed with a value investing strategy that puts an emphasis on finding securities that we think are undervalued or underrated. We believe that there are always some municipal bonds that the market is not

properly valuing, and that by using a consistent, research-oriented management approach we have the opportunity to find them for your Fund.

In this low-rate environment, many have begun to wonder whether interest rates will soon start to rise, and whether that possibility should cause them to adjust their holdings of fixed-income investments. We believe that by constructing a carefully balanced portfolio with the help of a trusted investment professional you may be able to reduce your overall investment risk and give yourself a better chance to meet your financial goals. We think that municipal bond investments like your Nuveen Fund can be important building blocks in a portfolio designed to perform well through a variety of market conditions.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification, and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

(NPI, NPM, NPT)

Portfolio Managers'  
COMMENTS

Portfolio managers Tom Spalding and Dan Solender discuss U.S. economic and market conditions, key investment strategies, and the annual performance of these national Funds. A 27-year veteran of Nuveen, Tom has managed NPT since January 2003. Tom recently turned over portfolio management responsibility for NPI (in August 2003) and NPM (in October 2003) to Dan, who has 16 years of investment experience.

WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE 12-MONTH PERIOD ENDED OCTOBER 31, 2003?

Over the 12-month reporting period, the two greatest influences on the general economy continued to be historically low interest rates and the overall pace of economic improvement. In June 2003, the Federal Reserve reduced the fed funds rate to 1.0%, the lowest level since 1958. The Fed's accommodative monetary policy, coupled with Washington's tax relief measures and increased spending for defense helped to fuel an 8.2% year-over-year jump in the third-quarter Gross Domestic Product (GDP), up from 3.3% in the second quarter. At the same time, inflation remained under control throughout the period.

In the municipal market, the slower rate of economic recovery over the majority of this reporting period, low interest rates, and lack of inflationary pressures helped many municipal bonds perform well. During the summer of 2003, however,

## Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND 4 INC - Form N-CSR

stronger-than-expected economic data precipitated a spike in bond yields and a corresponding drop in bond prices that impacted results across all fixed-income markets, including the municipal market, for the 12-month period ended October 31, 2003.

During the first 10 months of 2003, municipal supply nationally remained robust, with \$319.9 billion in new bonds, up 8% over the same period in 2002.

### HOW DID THESE NUVEEN FUNDS PERFORM OVER THIS REPORTING PERIOD?

Individual results for these Funds, as well as for relevant benchmarks, are presented in the accompanying table.

	MARKET YIELD		TOTAL RETURN ON NAV	LEHMAN TOTAL RETURN <sup>1</sup>	LIPPER AVERAGE <sup>2</sup>
	10/31/03	TAXABLE- EQUIVALENT <sup>3</sup>	1 YEAR ENDED 10/31/03	1 YEAR ENDED 10/31/03	1 YEAR ENDED 10/31/03
NPI	6.83%	9.49%	6.58%	5.11%	8.08%
NPM	6.86%	9.53%	6.07%	5.11%	8.08%
NPT	6.81%	9.46%	4.12%	5.11%	8.08%

Past performance is not predictive of future results.

For additional information, see the individual Performance Overview for your Fund in this report.

For the 12 months ended October 31, 2003, both NPI and NPM outperformed the unleveraged Lehman Brothers Municipal Bond Index, while NPT trailed this measure, and all three Funds lagged their Lipper peer group average. The use of leverage was one of the factors that influenced the performances of these Funds relative to the Lehman index over the past 12 months. While this is a strategy that carries some price risk and increased volatility, leveraging can provide opportunities for additional income for common shareholders, especially during periods of low short-term interest rates, and income is an important component of total return for any bond investment. However, in NPT, the benefits of leverage were offset to a large degree by the negative impact of price declines in specific holdings within the Fund.

- 1 The total annual returns on common share net asset value (NAV) for these Nuveen Funds are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged, unmanaged index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.
- 2 The total returns of these Funds are compared with the average annualized return of the 62 funds in the Lipper General Leveraged Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment, other than an investment that generates qualified dividend income that is taxable at a maximum rate of 15%, in order to equal the yield of the Nuveen Fund on an after-tax basis. It is calculated using the current market yield and a federal income tax rate of 28%.

Factors such as call exposure and portfolio trading activity, also affected the performances of the three Funds compared with their Lipper peer group. For example, at the beginning of this reporting period, these Funds held several multifamily housing issues. For the 12 months ended October 2003, the multifamily housing sector, as measured by the Lehman index, was among the poorer performers, lagging the general municipal market by more than 35 basis points. We have subsequently reduced NPT's position in these holdings.

Each of these Funds also held tobacco settlement bonds in their portfolios. In July 2003, the credit ratings on most tobacco bonds in their portfolios were downgraded to BBB from A, and the sector as a whole produced negative returns for the 12 months ended October 31, 2003. Recently, however, in the wake of legal developments more favorable to the tobacco companies, these bonds have shown some signs of recovery. Following an in-depth analysis of the tobacco sector, we believe that ongoing litigation will not affect the long-term quality and value provided by the tobacco settlement bonds. As a result, we have continued to hold and add to our tobacco investments as appropriate, while regularly evaluating the situation.

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

With short-term interest rates remaining at historically low levels, the dividend-paying capabilities of these Funds benefited from their use of leverage. During the 12 months ended October 31, 2003, continued low short-term rates enabled us to increase NPI's dividend in March 2003. Leverage also helped to support the dividends of NPM and NPT. As of October 31, 2003, these two Funds had paid shareholders steady or increasing dividends for 35 and 41 consecutive months, respectively.

Even at these dividend levels, each Fund's common share net investment income during the period exceeded the amount of dividends paid to common shareholders. This excess net investment income, along with any excess net investment income from prior fiscal periods, was held in reserve by the Funds as undistributed net investment income (UNII) and is part of the Funds' net asset value. The Funds, over time, will pay all their net investment income out to common shareholders. However, UNII reserves may help the Funds maintain more stable common share dividend levels over time should the short-term rates the Funds pay on their MuniPreferred shares rise or net common share earnings otherwise decline.

Increased volatility in the fixed-income markets during the summer of 2003 led to an overall weakening of bond prices. The Funds' share prices and NAVs finished the period modestly lower than they had been at the beginning, with the exception of NPI, where the NAV was unchanged. As of October 31, 2003, all three Funds continued to trade at discounts to their common share NAVs.

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE FISCAL YEAR ENDED OCTOBER 31, 2003?

Over this 12-month reporting period, we continued to place strong emphasis on keeping the Funds fully invested and well diversified, improving call protection, and enhancing dividend-paying capabilities. We also continued to

## Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND 4 INC - Form N-CSR

focus on managing the Funds' durations<sup>4</sup> with the goal of enhancing our ability to mitigate interest rate risk and produce potentially more consistent returns over time. Interest rate risk is the risk that the value of a Fund's portfolio will decline when market interest rates rise. The longer the duration of a Fund's portfolio, the greater its interest rate risk. Over the past 12 months, we worked to bring the Funds' durations more closely in line with one another. As of October 31, 2003, the leverage-adjusted durations for these three Funds ranged from 9.57 to 10.35.

In line with the steepness of the municipal yield curve, the majority of our purchase activity over the past year focused on value opportunities in the intermediate part of the yield curve (i.e., bonds that mature in 15 to 20 years). In many cases, bonds in this part of the curve offered yields similar to those of longer-term bonds but, had less inherent interest rate risk.

Although the overall increase in municipal issuance during 2003 has provided continued opportunities to make trades that would benefit the Funds, in recent months we have not seen as much volume as the market originally anticipated. In this environment, we have focused on bonds offering above-market coupons that can help support the Funds' dividends by generating cash flow. In addition, they can provide more protection from falling bond prices of similar maturities if rates should rise than lower coupons bond of similar maturities. We also focused on issues in the low AA/high A credit quality sectors that can add diversification. Both general obligation bonds and the health care sector have also provided opportunities to pick up incremental yield.

HOW WERE THE FUNDS POSITIONED IN TERMS OF CREDIT QUALITY AND BOND CALLS AS OF OCTOBER 31, 2003?

We believe that, given the current geopolitical and economic climate, maintaining strong credit quality remains a vital requirement. As of October 31, 2003, these Nuveen Funds offered excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 79% to 82%.

Looking at bond calls, these Funds offer good levels of call protection over the next two years, with potential call exposure ranging from 14% in NPT to 17% in NPM during 2004 and 2005. The number of bond calls will depend largely on market interest rates in coming months.

In general, we believe that these Nuveen Funds can continue to serve as attractive sources of tax-free income, while simultaneously offering the potential for portfolio diversification. In our opinion, the Funds represent a quality component of a well-balanced core investment portfolio that can continue to benefit shareholders over time.

<sup>4</sup> Duration is a measure of a fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the fund. References to duration in this commentary are intended to indicate fund duration unless otherwise noted.

## Notes to FINANCIAL STATEMENTS

### 1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The National Funds (the "Funds") covered in this report and their corresponding Common share New York Stock Exchange symbols are Nuveen Premium Income Municipal Fund, Inc. (NPI), Nuveen Premium Income Municipal Fund 2, Inc. (NPM) and Nuveen Premium Income Municipal Fund 4, Inc. (NPT). The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end, diversified management investment companies.

Each Fund seeks to provide current income exempt from regular federal income tax by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

#### Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

#### Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At October 31, 2003, Premium Income 2 (NPM) had outstanding when-issued purchase commitments of \$22,631,568. There were no such outstanding purchase commitments in Premium

Income (NPI) and Premium Income 4 (NPT).

### Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

### Professional Fees

Professional fees presented in the Statement of Operations consist of legal fees incurred in the normal course of operations, audit fees, tax consulting fees and, in some cases, workout expenditures. Workout expenditures are incurred in an attempt to protect or enhance an investment, or to pursue other claims or legal actions on behalf of the Fund's shareholders.

### Federal Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal income tax, to retain such tax-exempt status when distributed to shareholders of the Funds. All monthly tax-exempt income dividends paid during the fiscal year ended October 31, 2003, have been designated Exempt Interest Dividends.

### Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

48

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States.

### Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in more than one Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each Fund is as follows:

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the fiscal year ended October 31, 2003.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

Under the Funds' investment management agreements with Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc. (formerly, The John Nuveen Company), each Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

AVERAGE DAILY NET ASSETS (INCLUDING NET ASSETS ATTRIBUTABLE TO PREFERRED SHARES)	MANAGEMENT FEE
For the first \$125 million	.6500%
For the next \$125 million	.6375

The Funds pay no compensation directly to those of its Directors who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their

### Notes to FINANCIAL STATEMENTS (continued)

Certain investments owned by the Funds are either covered by insurance issued by several private insurers or are backed by an escrow or trust containing U.S. Government or U.S. Government agency securities, both of which ensure the timely payment of principal and interest in the event of default (60% for Premium Income (NPI), 58% for Premium Income 2 (NPM) and 58% for Premium Income 4 (NPT)). Such insurance or escrow, however, does not guarantee the market value of the municipal securities or the value of any of the Funds' shares.

For additional information regarding each investment security, refer to the Portfolio of Investments of each Fund.

### 7. SUBSEQUENT EVENT - DISTRIBUTIONS TO COMMON SHAREHOLDERS

### Build Your Wealth AUTOMATICALLY

Sidebar text: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

#### NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

#### EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement

## Edgar Filing: NUVEEN PREMIUM INCOME MUNICIPAL FUND 4 INC - Form N-CSR

showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

### HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

### FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

### PROXY VOTING POLICIES AND PROCEDURES

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling Nuveen Investments at (800) 257-8787; and (ii) on the Commission's website at <http://www.sec.gov>.

### POLICY CHANGE

On November 14, 2002, the Board adopted a policy that allows each Fund, in addition to investments in municipal bonds, to invest up to 5% of its net assets (including assets attributable to preferred shares, if any) in tax-exempt or taxable fixed-income securities or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its existing investment in such issuer. This policy is a non-fundamental policy of each Fund which means that it can be changed at any time by the Board of Trustees without vote of the shareholders.

### GLOSSARY OF TERMS USED IN THIS REPORT

**Average Annual Total Return:** This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

**Average Duration:** Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change.

**Average Effective Maturity:** The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the

security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

**Leverage-Adjusted Duration:** Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund.

**Market Yield (also known as Dividend Yield or Current Yield):** An investment's current annualized dividend divided by its current market price.

**Net Asset Value (NAV):** A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

**Taxable-Equivalent Yield:** The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

-----  
Each Fund intends to repurchase shares of its own common or preferred stock, where applicable, in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the fiscal year ended October 31, 2003. Any future repurchases will be reported to shareholders in the next annual or semiannual report.

In the case of a conflict of interest, the proxy would be submitted to the applicable Fund's Board to determine how the proxy should be voted.
