three world-class investment management groups-- Franklin, Templeton and Mutual Series.

SPECIALIZED EXPERTISE

Each of our portfolio management groups operates autonomously, relying on its own research and staying true to the unique investment disciplines that underlie its success.

FRANKLIN. Founded in 1947, Franklin is a recognized leader in fixed income investing and also brings expertise in growth- and value-style U.S. equity investing.

TEMPLETON. Founded in 1940, Templeton pioneered international investing and, in 1954, launched what has become the industry's oldest global fund. Today, with offices in over 25 countries, Templeton offers investors a truly global perspective.

MUTUAL SERIES. Founded in 1949, Mutual Series is dedicated to a unique style of value investing, searching aggressively for opportunity among what it believes are undervalued stocks, as well as arbitrage situations and distressed securities.

TRUE DIVERSIFICATION

Because our management groups work independently and adhere to different investment approaches, Franklin, Templeton and Mutual Series funds typically have distinct portfolios. That's why our funds can be used to build truly diversified allocation plans covering every major asset class.

RELIABILITY YOU CAN TRUST

At Franklin Templeton Investments, we seek to consistently provide investors with exceptional risk-adjusted returns over the long term, as well as the reliable, accurate and personal service that has helped us become one of the most trusted names in financial services.

Dear Shareholder:

We are pleased to bring you Templeton Emerging Markets Income Fund's semiannual report for the period ended February 28, 2010.

PERFORMANCE OVERVIEW

For the six months under review, Templeton Emerging Markets Income Fund delivered cumulative total returns of +12.02% based on market price and +13.61% based on net asset value. The Fund outperformed the J.P. Morgan (JPM) Emerging Markets Bond Index Global (EMBIG), which posted a cumulative total return of +8.42% in U.S. dollar terms for the same period. ECONOMIC AND MARKET OVERVIEW

During the six months under review, the global economic recovery took hold and strengthened. For most countries, economic growth reached its low point in 2009's second quarter, and the subsequent rebound in activity benefited many bond and currency markets. Improved economic growth in the U.S., eurozone and Japan was accompanied by contained inflationary pressures, which allowed major central banks to leave interest rates at very low levels and maintain ample liquidity. Meanwhile, China and India were among the first countries to begin tightening liquidity conditions through raising reserve requirements.

During the period, differentiation in recovery strength increased across regions and countries. For example, U.S. gross domestic product (GDP) rose 0.1% year-over-year in 2009's fourth quarter, while Japan's contracted 0.4% and the eurozone's shrank 2.1%.⁽²⁾ However, the positive figure recorded in the U.S. was meager compared with growth rates outside developed economies. Real GDP for the same period rose 10.7% in China year-over-year, in India and South Korea, 6.0%, in Brazil, 4.3%, and in Poland, 3.1%.⁽³⁾

Although increased government spending and financial sector bailouts helped mitigate the recession's severity in developed economies like those of the U.S. and Europe, the fiscal deterioration led to upward pressure on public debt ratios. The International Monetary Fund estimated in its October 2009 World

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

Economic Outlook that the debt-to-GDP ratio of developed G-20 countries would rise from 78% in 2007 to nearly 107% by 2010 while the corresponding debt ratio of emerging G-20 countries would rise from 37% to nearly 40% over the same time.(4) Increased investor and institutional scrutiny of sovereign debt sustainability in several eurozone economies led to euro weakness and rising interest rate spreads for those governments.

Concerns about developed economies' sovereign credit fundamentals had limited spillover into emerging markets. Additionally, ample liquidity supported by low interest rates maintained by many major central banks underpinned capital flows to emerging markets given comparatively better economic growth dynamics, interest rate prospects and credit fundamentals.

INVESTMENT STRATEGY

We invest selectively in bonds around the world to generate income for the Fund, seeking opportunities while monitoring changes in interest rates, currency exchange rates and credit risk.

MANAGER'S DISCUSSION

Against a backdrop of an ongoing global economic recovery, emerging debt markets performed well during the six months under review. Growth in emerging market economies was supported by a recovery in external demand as trading partners exited recession and commodity prices rebounded. In addition to an improved economic outlook from stabilization to growth, risk premiums declined. Largely as a result, most of the Fund's positions generated positive performance during the reporting period. U.S. dollar-denominated emerging market debt posted a six-month total return of +8.42% as measured by the JPM EMBIG.(5) Sovereign interest rate spreads over U.S. Treasuries fell from 389 basis points (bps; 100 basis points equal one percentage point) at the beginning of the period to 311 bps at period-end as emerging market credit yields declined and the U.S. Treasury yield steepened.(6)

Local emerging bond markets also performed well as yields declined and most Latin American and Asian currencies appreciated against the U.S. dollar. The JPM Global Bond Index-Emerging Markets (GBI-EM) rose 6.43% during the period.(6) Fund positioning in local emerging bond markets, however, contributed to performance relative to the JPM EMBIG given strong performance from holdings in Indonesia, Mexico and Brazil. The Fund was underweighted in hard currency-denominated emerging market sovereign debt; however, the Fund's sovereign bond positioning generated overall neutral results relative to the JPM EMBIG. Although emerging market sovereign bond spreads narrowed from crisis-driven levels, we continued to find value in the sector as the slower

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

growth environment created financing needs in some countries with solid credit fundamentals that have not issued bonds in several years.

LATIN AMERICA

Among the Fund's Latin American hard currency positions, Argentina returned +19.51% and Peru had a return of +8.23%. (1) The Fund had no hard currency exposure to Brazil, which underperformed the JPM EMBIG during the period; however, we had exposure to the country's local currency

market. Brazil experienced a relatively shallow recession compared with other economies, and growth expectations for the remainder of 2010 rose. The primary fiscal balance (without interest costs) remained in surplus, which provided the country a fiscal cushion heading into an election year. Although the central bank left interest rates unchanged, long-term government bond yields fell slightly. Brazil's bond market returned +13.47% in unhedged U.S. dollar terms during the six months under review. (6) The Fund benefited from duration exposure in Mexico where long-term bond yields fell 56 bps from 8.16% to 7.60%. Mexico's economic recovery was relatively weak, with fourth quarter 2009 GDP contracting an annualized 2.3%, supporting disinflation, or a slowdown in the rate of price increases. (7) Additionally, Mexico passed fiscal reform legislation to increase budget revenues and help secure fiscal stability. The Fund's Mexico exposure was largely hedged, and Mexico returned +6.56% in local currency terms during the period. (6)

WHAT IS DURATION?

Duration is a measure of a bond's price sensitivity to interest rate changes. In general, a portfolio of securities with a lower duration can be expected to be

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

less sensitive to interest rate changes than a portfolio with a higher duration.

EUROPE, MIDDLE EAST, AFRICA (EMEA)

The Fund's exposure to the EMEA region was largely in hard currency-denominated sovereign and corporate credit securities. The Fund's performance was aided by overweighted exposure to Iraq and Kazakhstan. As oil producers, the countries benefited from rising oil prices during the period. Iraq returned +17.20%, while Kazakhstan returned +20.60%. (1) Ukrainian sovereign bonds returned +8.33%, slightly less than the overall JPM EMBIG; therefore, the Fund's overweighted position detracted from results. (1) The Ukrainian bond market's positive performance during the period was notable given a deep economic contraction as the country's IMF-led lending program stalled in the run-up to presidential elections in early 2010. However, Ukraine had a relatively low public sector debt burden, and confidence returned to the country's bond market as political uncertainty eased following the election due in part to improved prospects for better government policy coordination. The Fund had exposure to Russia, which returned +13.60% during the period; however, the Fund's underweighted position detracted from performance relative to the JPM EMBIG. (1) Russia also benefited from higher oil prices as they remained significantly above levels assumed in the country's 2010 budget preparations, which indicated that the government would not need to borrow as heavily in international markets as originally proposed. The Fund also had exposure to South Africa, which returned +5.43%, underperforming the JPM EMBIG. (1) The Fund's slightly overweighted position in the country detracted from relative results.

4 | Semiannual Report

ASIA

Asia's positive growth differential over other advanced economies and its prospects for an earlier increase in interest rates attracted capital inflows during the period. In addition, the region's balance of payment positions remained supportive as evidenced by its reserve accumulation. We held exposure to the Indonesian rupiah, South Korean won and Malaysian ringgit, which rose 7.98%, 7.67% and 3.41%, respectively, versus the U.S. dollar during the reporting period. (8) Additionally, the Fund had exposure to the Indonesian local bond market because we believed there were prospects for a drop in the risk premium embedded in government bonds over the medium term. During the six months under review, the country's long-term bond yields fell 66 bps from 10.51% to 9.85%, and Indonesia's bond market returned +7.21% in unhedged U.S. dollar terms. (6) The central bank left interest rates unchanged despite inflation's falling to its lowest level in a decade by year-end 2009, highlighting the country's commitment to lower inflation over the medium term. Real GDP rose an annualized 5.4% in 2009's fourth quarter, supported by recovering exports, increasing investment and stable private consumption trends. (9) Standard & Poor's (S&P) raised its outlook from stable to positive for Indonesia's BB+ sovereign credit rating. The improved outlook was due in part to the country's continued prudent approach to fiscal and debt management and its steady reserve accumulation. Elsewhere in the region, the Fund held sovereign credit exposure to the Philippines and Pakistan, which returned +6.43% and +5.81%. (1) Because the countries' market returns lagged the JPM EMBIG during the period, the Fund's underweighted Philippines exposure helped relative results, while its overweighted Pakistan exposure detracted slightly.

WHAT IS BALANCE OF PAYMENTS?

Balance of payments is a record of all of a country's exports and imports of

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

goods and services, borrowing and lending with the rest of the world during a particular time period. It helps a country evaluate its competitive strengths and weaknesses and forecast the strength of its currency.

Performance Summary as of 2/28/10

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities. Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not reflect any sales charges paid at inception or brokerage commissions paid on secondary market purchases. The performance table does not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale of Fund shares.

ENDNOTES

CHANGES IN INTEREST RATES WILL AFFECT THE VALUE OF THE FUND'S PORTFOLIO AND ITS SHARE PRICE AND YIELD. BOND PRICES GENERALLY MOVE IN THE OPPOSITE DIRECTION OF INTEREST RATES. THUS, AS PRICES OF BONDS IN THE FUND ADJUST TO A RISE IN INTEREST RATES, THE FUND'S SHARE PRICE MAY DECLINE. SPECIAL RISKS ARE ASSOCIATED WITH FOREIGN INVESTING, INCLUDING CURRENCY FLUCTUATIONS, ECONOMIC INSTABILITY AND POLITICAL DEVELOPMENTS. INVESTMENTS IN DEVELOPING MARKETS INVOLVE HEIGHTENED RISKS RELATED TO THE SAME FACTORS, IN ADDITION TO THOSE ASSOCIATED WITH THEIR RELATIVELY SMALL SIZE AND LESSER LIQUIDITY. THE FUND'S USE OF FOREIGN CURRENCY TECHNIQUES INVOLVES SPECIAL RISKS AS SUCH TECHNIQUES MAY NOT ACHIEVE THE ANTICIPATED BENEFITS AND/OR MAY RESULT IN LOSSES TO THE FUND. ALSO, AS A NONDIVERSIFIED INVESTMENT COMPANY, THE FUND MAY INVEST IN A RELATIVELY SMALL NUMBER OF ISSUERS AND, AS A RESULT, BE SUBJECT TO A GREATER RISK OF LOSS WITH RESPECT TO ITS PORTFOLIO SECURITIES.

Important Notice to Shareholders

The portfolio manager is assisted by a team of research analysts who provide

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

recommendations regarding investment opportunities for the Fund. Investment decisions regarding the Fund's investments are made by the portfolio manager in consultation with the analysts. The analysts assisting the Fund's portfolio manager are as follows: Laura Burakreis and Marco Freire.

SHARE REPURCHASE PROGRAM

The Fund's Board previously authorized management to implement an open-market share repurchase program pursuant to which the Fund may purchase Fund shares, from time to time, in open-market transactions, at the discretion of management. This authorization remains in effect.

EXCHANGE-TRADED PUT AND CALL OPTIONS ON INTEREST RATE/BOND FUTURES

The Fund may purchase options on interest rate/bond futures to help hedge the Fund's risk of potentially rising interest rates. An option on an interest rate or bond futures contract is an exchange-traded contract in which a seller grants to a buyer the right (but not the obligation) to buy or sell a futures contract. The buyer pays the seller a premium for the option. Contract standardization, together with the clearing corporation guarantee, facilitates options trading. A buyer or seller of an exchange-traded option can liquidate an open position in an option before expiration by making an offsetting transaction. For example, the holder of a put option can liquidate his position by selling a put with the same strike price and expiration date. As with futures contracts, most positions in standardized options are liquidated with an offsetting transaction before the expiration date rather than being held for the purpose of selling or buying the underlying instrument. The net profit or loss in an option transaction is determined by the difference between the premium originally paid and the price received when it is sold.

Similar to futures, options on futures trade on exchanges designated as contract markets. They provide transparent pricing/valuation and the elimination of counterparty risk. Unlike futures contracts, buyers of options are not required to deposit funds in a margin account because their risk of loss is limited to the premium paid for the option.

8 | Semiannual Report

Important Notice to Shareholders (CONTINUED)

If the investment manager's judgment regarding the general direction of market prices or interest rates is incorrect, the Fund's overall performance would be negatively impacted. When options on futures contracts are used for hedging, there may be an imperfect correlation between movements in the prices of the underlying asset(s) on which the options on futures contracts are based and movements in the prices of the assets sought to be hedged. Adverse market movements could cause the Fund to experience substantial losses. Futures contracts that are traded on foreign exchanges, as well as options on such contracts, may not be as liquid as those purchased on Commodity Futures Trading Commission-designated contract markets.

Templeton Emerging Markets Income Fund

NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Templeton Emerging Markets Income Fund (Fund) is registered under the Investment Company Act of 1940, as amended, (1940 Act) as a closed-end investment company.

The following summarizes the Fund's significant accounting policies.

A. SECURITY VALUATION

Corporate debt securities and government securities generally trade in the over-the-counter market rather than on a securities exchange. The Fund may utilize independent pricing services, quotations from bond dealers, and information with respect to bond and note transactions, to assist in determining a current market value for each security. The Fund's pricing services may use valuation models or matrix pricing which considers information with respect to comparable bond and note transactions, quotations from bond dealers, or by reference to other securities that are considered comparable in such characteristics as rating, interest rate and maturity date, option adjusted spread models, prepayment projections, interest rate spreads and yield curves, to determine current value. Debt securities denominated in a foreign currency are converted into their U.S. dollar equivalent at the foreign exchange rate in effect at the close of the NYSE on the date that the values of the foreign debt securities are determined. Investments in open-end mutual funds are valued at the closing net asset value.

The Fund has procedures to determine the fair value of individual securities and other assets for which market prices are not readily available or which may not

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

be reliably priced. Methods for valuing these securities may include: fundamental analysis based upon the underlying investment book value, anticipated future cash flows, market changes in comparable or similar securities, matrix pricing, discounts from market prices of similar securities, or discounts applied due to the nature and duration of restrictions on the disposition of the securities. Due to the inherent uncertainty of valuations of such securities, the fair values may differ significantly from the values that would have been used had a ready market for such investments existed. Occasionally, events occur between the time at which trading in a security is completed and the close of the NYSE that might call into question the availability (including the reliability) of the value of a portfolio security held by the Fund. If such an event occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services. All security valuation procedures are approved by the Fund's Board of Trustees.

B. FOREIGN CURRENCY TRANSLATION

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. The Fund may enter into foreign currency exchange contracts to facilitate transactions denominated in a foreign currency. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange

20 | Semiannual Report

Templeton Emerging Markets Income Fund

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

B. FOREIGN CURRENCY TRANSLATION (CONTINUED)

rate in effect on the transaction date. Occasionally, events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Fund's Board of Trustees.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments on the Statement of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

C. DERIVATIVE FINANCIAL INSTRUMENTS

The Fund may invest in derivative financial instruments (derivatives) in order

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

to manage risk or gain exposure to various other investments or markets. Derivatives are financial contracts based on an underlying or notional amount, require no initial investment or an initial net investment that is smaller than would normally be required to have a similar response to changes in market factors, and require or permit net settlement. Derivatives may contain various risks including the potential inability of the counterparty to fulfill their obligations under the terms of the contract, the potential for an illiquid secondary market, and the potential for market movements which may expose the Fund to gains or losses in excess of the amounts shown on the Statement of Assets and Liabilities.

Derivatives are marked to market daily based upon quotations from market makers or the Fund's independent pricing services and the Fund's net benefit or obligation under the contract, as measured by the fair market value of the contract, is included in net assets. Realized gain and loss and unrealized appreciation and depreciation on these contracts for the period are included in the Statement of Operations.

The Fund generally enters into forward exchange contracts in order to hedge against fluctuations in foreign exchange rates or to gain exposure to certain foreign currencies. A forward exchange contract is an agreement between the Fund and a counterparty to buy or sell a foreign currency for a specific exchange rate on a future date. Pursuant to the terms of the forward exchange contracts, cash or securities may be required to be deposited as collateral.

Templeton Emerging Markets Income Fund

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

C. DERIVATIVE FINANCIAL INSTRUMENTS (CONTINUED)

The Fund generally enters into interest rate swap contracts in order to manage interest rate risk. An interest rate swap is an agreement between the Fund and a counterparty to exchange cash flows based on the difference between two interest rates, applied to a notional principal amount. Over the term of the contract, contractually required payments to be paid and to be received are accrued daily and recorded as unrealized depreciation and appreciation until the payments are made, at which time they are realized. Pursuant to the terms of the interest rate swap contract, cash or securities may be required to be deposited as collateral.

At February 28, 2010, the Fund holds \$2,060,000 in cash as collateral for derivatives. Unrestricted cash received may be invested according to the Fund's investment objectives.

See Note 10 regarding other derivative information.

D. INCOME TAXES

No provision has been made for U.S. income taxes because it is the Fund's policy to qualify as a regulated investment company under the Internal Revenue Code and to distribute to shareholders substantially all of its taxable income and net realized gains.

The Fund has reviewed the tax positions, taken on federal income tax returns,

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

for each of the three open tax years and as of February 28, 2010, and has determined that no provision for income tax is required in the Fund's financial statements.

Foreign securities held by the Fund may be subject to foreign taxation on interest income received. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Fund invests.

E. SECURITY TRANSACTIONS, INVESTMENT INCOME, EXPENSES AND DISTRIBUTIONS

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income and estimated expenses are accrued daily. Amortization of premium and accretion of discount on debt securities are included in interest income. Distributions to shareholders are recorded on the ex-dividend date and are determined according to income tax regulations (tax basis). Distributable earnings determined on a tax basis may differ from earnings recorded in accordance with accounting principles generally accepted in the United States of America. These differences may be permanent or temporary. Permanent differences are reclassified among capital accounts to reflect their tax character. These reclassifications have no impact on net assets or the results of operations. Temporary differences are not reclassified, as they may reverse in subsequent periods.

Templeton Emerging Markets Income Fund

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

E. SECURITY TRANSACTIONS, INVESTMENT INCOME, EXPENSES AND DISTRIBUTIONS (CONTINUED)

Inflation-indexed bonds provide an inflation hedge through periodic increases or decreases in the security's interest accruals and principal redemption value, by amounts corresponding to the current rate of inflation. Any such adjustments, including adjustments to principal redemption value, are recorded as interest income.

F. ACCOUNTING ESTIMATES

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

G. GUARANTEES AND INDEMNIFICATIONS

Under the Fund's organizational documents, its officers and trustees are indemnified by the Fund against certain liabilities arising out of the performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

against the Fund that have not yet occurred. Currently, the Fund expects the risk of loss to be remote.

2. SHARES OF BENEFICIAL INTEREST

At February 28, 2010, there were an unlimited number of shares authorized (without par value). During the periods ended February 28, 2010 and August 31, 2009 there were no shares issued; all reinvested distributions were satisfied with previously issued shares purchased in the open market.

The Fund's Board of Trustees previously authorized an open-market share repurchase program pursuant to which the Fund may purchase, from time to time, Fund shares in open-market transactions, at the discretion of management. This authorization remains in effect. Through February 28, 2010, the Fund had repurchased a total of 610,500 shares. During the periods ended February 28, 2010 and August 31, 2009, there were no shares repurchased.

Franklin Resources, Inc. is the holding company for various subsidiaries that together are referred to as Franklin Templeton Investments. Certain officers and trustees of the Fund are also officers and/or directors of the following subsidiaries:

SUBSIDIARY	AFFILIATION
Franklin Advisers, Inc. (Advisers)	Investment manager
Franklin Templeton Services, LLC (FT Services)	Administrative manager

A. MANAGEMENT FEES

The Fund pays an investment management fee to Advisers based on the average daily net assets of the Fund as follows:

ANNUALIZED FEE RATE	NET ASSETS
0.850%	Up to and including \$1 billion
0.830%	Over \$1 billion, up to and including \$5 billion
0.810%	Over \$5 billion, up to and including \$10 billion

B. ADMINISTRATIVE FEES

The Fund pays an administrative fee to FT Services of 0.15% per year of the

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

average daily net assets of the Fund.

4. EXPENSE OFFSET ARRANGEMENT

The Fund has entered into an arrangement with its custodian whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the Fund's custodian expenses. During the period ended February 28, 2010, the custodian fees were reduced as noted in the Statement of Operations.

5. INCOME TAXES

For tax purposes, capital losses may be carried over to offset future capital gains, if any. At August 31, 2009, the Fund had tax basis capital losses of \$1,231,202 expiring in 2017.

For tax purposes, realized currency losses occurring subsequent to October 31, may be deferred and treated as occurring on the first day of the following fiscal year. At August 31, 2009, the Fund deferred realized currency losses of \$7,025,551.

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

5. INCOME TAXES (CONTINUED)

At February 28, 2010, the cost of investments and net unrealized appreciation (depreciation) for income tax purposes were as follows:

Cost of investments	\$666,087,566
	=====
Unrealized appreciation	\$ 63,535,582
Unrealized depreciation	(30,712,848)

Net unrealized appreciation (depreciation)	\$ 32,822,734
	=====

Net investment income differs for financial statement and tax purposes primarily due to differing treatments of foreign currency transactions, bond discounts and premiums, swaps, and tax straddles.

Net realized gains (losses) differ for financial statement and tax purposes primarily due to differing treatments of wash sales, foreign currency transactions, bond discounts and premiums, swaps, and tax straddles.

6. INVESTMENT TRANSACTIONS

Purchases and sales of investments (excluding short term securities) for the period ended February 28, 2010, aggregated \$70,997,724 and \$71,309,885, respectively.

7. INVESTMENTS IN INSTITUTIONAL FIDUCIARY TRUST MONEY MARKET PORTFOLIO

The Fund may invest in the Institutional Fiduciary Trust Money Market Portfolio

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

(Sweep Money Fund), an open-end investment company managed by Advisers. Pursuant to a SEC exemptive order specific to the Fund's investment in the Sweep Money Fund, management fees paid by the fund are reduced on assets invested in the Sweep Money Fund, in an amount not to exceed the management and administrative fees paid by the Sweep Money Fund.

8. CREDIT RISK

At February 28, 2010, the Fund had 54.89% of its portfolio invested in high yield, senior secured floating rate notes, or other securities rated below investment grade. These securities may be more sensitive to economic conditions causing greater price volatility and are potentially subject to a greater risk of loss due to default than higher rated securities.

9. CONCENTRATION OF RISK

Investing in foreign securities may include certain risks and considerations not typically associated with investing in U.S. securities, such as fluctuating currency values and changing local and regional economic, political and social conditions, which may result in greater market volatility. In addition, certain foreign securities may not be as liquid as U.S. securities.

11. FAIR VALUE MEASUREMENTS

The Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's investments and are summarized in the following fair value hierarchy:

- Level 1 - quoted prices in active markets for identical securities
- Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speed, credit risk, etc.)
- Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of February 28, 2010, in valuing the Fund's assets and liabilities carried at fair value:

	LEVEL 1 -----	LEVEL 2 -----	LEVEL 3 -----	TOTAL -----

12. NEW ACCOUNTING PRONOUNCEMENTS

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2010-6, FAIR VALUE MEASUREMENTS AND DISCLOSURES (TOPIC 820): IMPROVING DISCLOSURES ABOUT FAIR VALUE MEASUREMENTS, which enhances and clarifies existing fair value measurement disclosure requirements and is effective for interim and annual periods beginning after December 15, 2009. The Fund is currently evaluating the impact, if any, of applying this provision.

In March 2010, the FASB issued ASU No. 2010-11, DERIVATIVES AND HEDGING (TOPIC 815): SCOPE EXCEPTION RELATED TO EMBEDDED CREDIT DERIVATIVES, which clarifies existing derivatives and hedging disclosure requirements and is effective for fiscal quarters beginning after June 15, 2010. The Fund is currently evaluating the impact, if any, of applying this provision.

Templeton Emerging Markets Income Fund

DIVIDEND REINVESTMENT AND CASH PURCHASE PLAN

The Fund offers a Dividend Reinvestment and Cash Purchase Plan (the "Plan") with the following features:

If shares of the Fund are held in the shareholder's name, the shareholder will automatically be a participant in the Plan unless he elects to withdraw. If the shares are registered in the name of a broker-dealer or other nominee (i.e., in "street name"), the broker-dealer or nominee will elect to participate in the Plan on the shareholder's behalf unless the shareholder instructs them otherwise, or unless the reinvestment service is not provided by the broker-dealer or nominee.

Participants should contact BNY Mellon Shareowner Services, P.O. Box 358015, Pittsburgh, PA, 15252-8015, to receive the Plan brochure.

To receive dividends or distributions in cash, the shareholder must notify The Bank of New York Mellon (the "Plan Administrator") at the address above or the institution in whose name the shares are held. The Plan Administrator must receive written notice ten business days before the record date for the distribution.

Whenever the Fund declares dividends in either cash or shares of the Fund, if the market price is equal to or exceeds net asset value at the valuation date, the participant will receive the dividends entirely in new shares at a price equal to the net asset value, but not less than 95% of the then current market price of the Fund's shares. If the market price is lower than net asset value or if dividends and/or capital gains distributions are payable only in cash, the participant will receive shares purchased on the New York Stock Exchange or otherwise on the open market.

A participant has the option of submitting additional cash payments to the Plan Administrator, in any amounts of at least \$100, up to a maximum of \$5,000 per month, for the purchase of Fund shares for his or her account. These payments can be made by check or money order payable to The Bank of New York Mellon and sent to BNY Mellon Shareowner Services, P.O. Box 382009, Pittsburgh, PA 15250-8009, Attention: Templeton Emerging Markets Income Fund. The Plan Administrator will apply such payments (less a \$5.00 service charge and less a pro rata share of trading fees) to purchases of the Fund's shares on the open market.

The automatic reinvestment of dividends and/or capital gains does not relieve the participant of any income tax that may be payable on dividends or distributions.

Whenever shares are purchased on the New York Stock Exchange or otherwise on the open market, each participant will pay a pro rata portion of trading fees. Trading fees will be deducted from amounts to be invested. The Plan

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

Administrator's fee for a sale of shares through the Plan is \$15.00 per transaction plus a \$0.12 per share trading fee.

DIVIDEND REINVESTMENT AND CASH PURCHASE PLAN (CONTINUED)

A participant may withdraw from the Plan without penalty at any time by written notice to the Plan Administrator sent to BNY Mellon Shareowner Services, P. O. Box 358015, Pittsburgh, PA, 15252-8015. Upon withdrawal, the participant will receive, without charge, share certificates issued in the participant's name for all full shares held by the Plan Administrator; or, if the participant wishes, the Plan Administrator will sell the shares and send the proceeds to the participant, less a service charge of \$15.00 and less trading fees of \$0.12 per share. The Plan Administrator will convert any fractional shares held at the time of withdrawal to cash at current market price and send a check to the participant for the net proceeds.

DIRECT DEPOSIT SERVICE FOR REGISTERED SHAREHOLDERS

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

The board of trustees of the Fund has delegated the authority to vote proxies related to the portfolio securities held by the Fund to the Fund's manager Franklin Advisers, Inc. in accordance with the Proxy Voting Policies and Procedures (Policies) adopted by the manager.

The manager has delegated its administrative duties with respect to the voting of proxies to the Proxy Group within Franklin Templeton Companies, LLC (Proxy Group), an affiliate and wholly owned subsidiary of Franklin Resources, Inc. All proxies received by the Proxy Group will be voted based upon the manager's

Edgar Filing: TEMPLETON EMERGING MARKETS INCOME FUND - Form N-CSRS

instructions and/or policies.

To assist it in analyzing proxies, the manager subscribes to RiskMetrics Group (RiskMetrics), an unaffiliated third-party corporate governance research service that provides in-depth analyses of shareholder meeting agendas, vote recommendations, recordkeeping and vote disclosure services. In addition, the manager subscribes to Glass, Lewis & Co., LLC (Glass Lewis), an unaffiliated third-party analytical research firm, to receive analyses and vote recommendations on the shareholder meetings of publicly held U.S. companies. Although RiskMetrics' and/or Glass Lewis' analyses are thoroughly reviewed and considered in making a final voting decision, the manager does not consider recommendations from RiskMetrics, Glass Lewis or any other third party to be determinative of the manager's ultimate decision. As a matter of policy, the officers, directors/trustees and employees of the manager and the Proxy Group will not be influenced by outside sources whose interests conflict with the interests of the Fund and its shareholders. Efforts are made to resolve all conflicts in the interests of the manager's clients. Material conflicts of interest are identified by the Proxy Group based upon analyses of client, distributor, broker dealer and vendor lists, information periodically gathered from directors and officers, and information derived from other sources, including public filings. In situations where a material conflict of interest is identified, the Proxy Group may defer to the voting recommendation of RiskMetrics, Glass Lewis or those of another independent third-party provider of proxy services; or send the proxy directly to the Fund with the manager's recommendation regarding the vote for approval. If the conflict is not resolved by the Fund, the Proxy Group may refer the matter, along with the recommended course of action by the manager, if any, to an interdepartmental Proxy Review Committee (which may include portfolio managers and/or research analysts employed by the manager), for evaluation and voting instructions. The Proxy Review Committee may defer to the voting recommendation of RiskMetrics, Glass Lewis or those of another independent third-party provider of proxy services; or send the proxy directly to the Fund. Where the Proxy Group or the Proxy Review Committee refers a matter to the Fund, it may rely upon the instructions of a representative of the Fund, such as the board or a committee of the board.

Where a material conflict of interest has been identified, but the items on which the manager's vote recommendations differ from Glass Lewis, RiskMetrics, or another independent third-party provider of proxy services relate specifically to (1) shareholder proposals regarding social or environmental issues or political contributions, (2) "Other Business" without describing the matters that might be considered, or (3) items the manager wishes to vote in opposition to the recommendations of an issuer's management, the Proxy Group may defer to the vote recommendations of the manager rather than sending the proxy directly to the Fund for approval.

To avoid certain potential conflicts of interest, the manager will employ echo voting, if possible, in the following instances: (1) when the Fund invests in an underlying fund in reliance on any one of Sections 12(d)(1)(E), (F), or (G) of the 1940 Act, or pursuant to an SEC exemptive order; (2) when the Fund invests uninvested cash in affiliated money market funds pursuant to an SEC exemptive order ("cash sweep arrangement"); or (3) when required pursuant to the Fund's governing documents or applicable law. Echo voting means that the investment manager will vote the shares in the same proportion as the vote of all of the other holders of the Fund's shares.

The recommendation of management on any issue is a factor that the manager considers in determining how proxies should be voted. However, the manager does not consider recommendations from management to be determinative of the manager's ultimate decision. As a matter of practice, the votes with respect to most issues are cast in accordance with the position of the company's management. Each issue, however, is considered on its own merits, and the manager will not support the position of the company's management in any

situation where it deems that the ratification of management's position would adversely affect the investment merits of owning that company's shares.

MANAGER'S PROXY VOTING POLICIES AND PRINCIPLES The manager has adopted general proxy voting guidelines, which are summarized below. These guidelines are not an exhaustive list of all the issues that may arise and the manager cannot anticipate all future situations. In all cases, each proxy will be considered based on the relevant facts and circumstances.

BOARD OF DIRECTORS. The manager supports an independent board of directors, and prefers that key committees such as audit, nominating, and compensation committees be comprised of independent directors. The manager will generally vote against management efforts to classify a board and will generally support proposals to declassify the board of directors. The manager may withhold votes from directors who have attended less than 75% of meetings without a valid reason. While generally in favor of separating Chairman and CEO positions, the manager will review this issue as well as proposals to restore or provide for cumulative voting on a case-by-case basis, taking into consideration factors such as the company's corporate governance guidelines or provisions and performance.

RATIFICATION OF AUDITORS OF PORTFOLIO COMPANIES. The manager will closely scrutinize the role and performance of auditors. On a case-by-case basis, the manager will examine proposals relating to non-audit relationships and non-audit fees. The manager will also consider, on a case-by-case basis, proposals to rotate auditors, and will vote against the ratification of auditors when there is clear and compelling evidence of accounting irregularities or negligence.

MANAGEMENT AND DIRECTOR COMPENSATION. A company's equity-based compensation plan should be in alignment with the shareholders' long-term interests. The manager believes that executive compensation should be directly linked to the performance of the company. The manager evaluates plans on a case-by-case basis by considering several factors to determine whether the plan is fair and reasonable, including the RiskMetrics quantitative model utilized to assess such plans and/or the Glass Lewis evaluation of the plans. The manager will generally oppose plans that have the potential to be excessively dilutive, and will almost always oppose plans that are structured to allow the repricing of underwater options, or plans that have an automatic share replenishment "evergreen" feature. The manager will generally support employee stock option plans in which the purchase price is at least 85% of fair market value, and when potential dilution is 10% or less.

Severance compensation arrangements will be reviewed on a case-by-case basis, although the manager will generally oppose "golden parachutes" that are considered to be excessive. The manager will normally support proposals that require a percentage of directors' compensation to be in the form of common stock, as it aligns their interests with those of shareholders.

ANTI-TAKEOVER MECHANISMS AND RELATED ISSUES. The manager generally opposes anti-takeover measures since they tend to reduce shareholder rights. However, as with all proxy issues, the manager conducts an independent review of each anti-takeover proposal. On occasion, the manager may vote with management when the research analyst has concluded that the proposal is not onerous and would not harm the Fund or its shareholders' interests. The manager generally supports proposals that require shareholder rights' plans ("poison pills") to be subject to a shareholder vote and will closely evaluate such plans on a case-by-case basis to determine whether or not they warrant support. In addition, the manager will generally vote against any proposal to issue stock that has unequal or subordinate voting rights. The manager generally opposes any supermajority voting requirements as well as the payment of "greenmail." The manager generally supports "fair price" provisions and confidential voting.

CHANGES TO CAPITAL STRUCTURE. The manager realizes that a company's financing decisions have a significant impact on its shareholders, particularly when they involve the issuance of additional shares of common or preferred stock or the assumption of additional debt. The manager will review, on a case-by-case basis, proposals by companies to increase authorized shares and the purpose for the increase. The manager will generally not vote in favor of dual-class capital structures to increase the number of authorized shares where that class of stock would have superior voting rights. The manager will generally vote in favor of the issuance of preferred stock in cases where the company specifies the voting, dividend, conversion and other rights of such stock and the terms of the preferred stock issuance are deemed reasonable.

MERGERS AND CORPORATE RESTRUCTURING. Mergers and acquisitions will be subject to careful review by the research analyst to determine whether they would be beneficial to shareholders. The manager will analyze various economic and strategic factors in making the final decision on a merger or acquisition. Corporate restructuring proposals are also subject to a thorough examination on a case-by-case basis.

SOCIAL AND CORPORATE POLICY ISSUES. The manager will generally give management discretion with regard to social, environmental and ethical issues, although the manager may vote in favor of those that are believed to have significant economic benefits or implications for the Fund and its shareholders.

GLOBAL CORPORATE GOVERNANCE. Many of the tenets discussed above are applied to the manager's proxy voting decisions for international investments. However, the manager must be flexible in these instances and must be mindful of the varied market practices of each region.

The manager will attempt to process every proxy it receives for all domestic and foreign issuers. However, there may be situations in which the manager cannot process proxies, for example, where a meeting notice was received too late, or sell orders preclude the ability to vote. If a security is on loan, the manager may determine that it is not in the best interests of the Fund to recall the security for voting purposes. Also, the manager may abstain from voting under certain circumstances or vote against items such as "Other Business" when the manager is not given adequate information from the company.
