### SALES AND EARNINGS

SALES: Compared with the same period in 2000, reported sales in the third quarter fell by 21.7% to E7,199 million; cumulative sales in the first nine months were down 6.8%.

On the basis of ongoing business, i. e. excluding pharmaceuticals, polyolefins, industrial fibers and textile dyes, sales declined 4.2% in the third quarter. In the first three quarters, sales from ongoing business were 8.2% higher than in the same period of the previous year. In particular, the segments Oil & Gas and Agricultural Products & Nutrition contributed to this sales growth.

### FACTORS INFLUENCING SALES IN COMPARISON WITH PREVIOUS YEAR

in %	3rd Quarter	Jan.-Sept.
Volumes	+1.5	-0.4

Acquisitions/divestitures*	-16.9	-7.7
Total	-21.7	-6.8

## Edgar Filing: BASF AKTIENGESELLSCHAFT - Form 6-K

\* Including discontinued operations

EARNINGS: Reported income from operations before special items in the third quarter was E328 million, a decrease of 57.1% compared with the same period in 2000; in ongoing business, the decline was 47.5%. Sales prices fell significantly in the third quarter in the majority of our business areas. Excluding Oil & Gas, prices declined 5.8% in the third quarter and 1.3% in the first three quarters. This put increased pressure on margins because lower costs as a result of cheaper raw materials did not compensate for lower sales prices. The reduced capacity utilization of our production plants also had a negative impact on earnings.

Compared with the same period in 2000, income from operations before special items in the first three quarters fell by 20.6% or by 15.1% on the basis of ongoing business. When taking account of the financial result, third-quarter income before taxes and special items decreased by 63% to E223 million compared with 2000; in the first nine months, it declined by 28.3% to E1,675 million.

Earnings per share before special items and excluding the extraordinary income were E0.05 in the third quarter and E1.25 in the first three quarters.

The extraordinary income from the sale of our pharmaceuticals business increased by E111 million to E6,121 million as a result of adjustments to the final purchase price. The extraordinary earnings per share therefore amount to E9.83.

OUTLOOK

## Edgar Filing: BASF AKTIENGESELLSCHAFT - Form 6-K

We do not anticipate an improvement in the economic situation or an upturn in the global economy in the fourth quarter or at the turn of the year. In the fourth quarter, we expect weaker sales and earnings than in the third quarter. Sales and income from operations before special items for 2001 as a whole will be significantly lower than in 2000.

We will continue our restructuring programs to ensure our long-term competitiveness. In view of the currently weak economic climate, we will also adapt our production capacities to demand in the short-term. Overall, this will result in additional special items of approximately E200 million in the fourth quarter according to current estimates. This figure also contains the cost of adjusting marketing structures associated with our new organization.

Thanks to the restructuring measures taken in 2001 and our new organization, which became effective in July, we consider ourselves to be well positioned to once again continue our long-term upward trend in earnings seen in recent years when the economic situation improves.

\* The previous year's figures were adjusted to take account of organizational changes. In particular, these involve the combination of the Colorants and Specialty Chemicals divisions to form the Performance Chemicals division as well as the combination of the Engineering Plastics and Fiber Products divisions to form the Performance Polymers division. In the course of the reorganization, certain plants and product groups were assigned to other divisions in order to further optimize value- adding chains.

\*\* Previously Colorants & Finishing Products

\*\*\* Including Pharmaceuticals until the end of February 2001

\*\*\*\* Income from operations for 2001 contains provisions for structural measures not yet allocated.

CHEMICALS

Compared with the previous year, sales in the Chemicals segment declined 3.4% in the third quarter to E1,114 million.

The Inorganics division was able to continue the positive trend seen in previous quarters as a result of growth in the areas of inorganic specialties and electronic grade chemicals. In the Petrochemicals division, business was negatively impacted by continuing pressure on margins in all product areas and declining volume demand at the end of the quarter, which led to a decrease in sales. Due to weak business in the NAFTA region, the Intermediates division also sold less than in the same quarter of 2000. Cumulative sales for the segment in the first three quarters were 3.6% higher than in the previous year, primarily as a result of growth in the Inorganics division.

Income from operations before special items fell by 18.5% to E119 million in the third quarter and by 29.6% to E349 million in the first nine months. The Petrochemicals division was particularly negatively affected as a result of pressure on prices for cracker products. Earnings were also reduced as a result of startup costs related to the steam cracker in Port Arthur, Texas, and the oxo alcohol and plasticizer plant in Kuantan, Malaysia. We do not expect any substantial improvement in the current business situation in the fourth quarter. Prices for cracker products remain under pressure.

SALES BY DIVISION

-----

\* Previous year's figures adjusted to take account of organizational changes.

Page 4

PLASTICS & FIBERS

Reported sales in this segment were down 34.7% in the third quarter compared with the same period in 2000. Excluding polyolefins and industrial fibers, sales in the Plastics & Fibers segment decreased 14.3% in the third quarter and 5.5% in the first nine months compared with the same periods in 2000. Within the segment, the Polyurethanes division performed well overall, but was unable to achieve the same level of third-quarter sales as in 2000. The business situation remained difficult in the Styrenics division because of low margins. In the Performance Polymers division, and for fibers and fiber intermediates in particular, business was hampered by lower demand due to the weak economy and continuing pressure on prices.

At E15 million, third-quarter income from operations before special items in the segment was 91.2% lower than in 2000. Compared with the same period in the previous year, earnings in the first nine months of 2001 decreased 71.4% to E178 million.

In the fourth quarter, we do not expect a substantial improvement in the currently difficult business situation.

SALES BY DIVISION

Million E	3rd Quarter		Change in %	Jan.-Sept.		Change in %
	2001	2000*		2001	2000*	
Styrenics	784	893	-12.2	2,487	2,595	-4.2
Performance Polymers**	521	660	-21.1	1,744	2,001	-12.8
Polyurethanes	639	717	-10.9	2,026	2,030	-0.2
Polyolefins	-	707	-	-	2,067	-

\* Previous year's figures adjusted to take account of organizational changes.

\*\* Consists primarily of the former Engineering Plastics and Fiber Products divisions

PERFORMANCE PRODUCTS

Compared with the same periods in 2000, reported sales in this segment were down 8.6% in the third quarter and 1.9% in the first nine months. On the basis of

## Edgar Filing: BASF AKTIENGESELLSCHAFT - Form 6-K

ongoing business, sales declined by 4.1% in the third quarter and increased by 2.8% in the first nine months compared with the previous year.

At E96 million, third-quarter income from operations before special items was 29.4% lower than in 2000. Persistently weak economic conditions negatively impacted business in all of the segment's divisions. The structural measures undertaken in the Functional Polymers division are beginning to show effect. Earnings in the first nine months in the Performance Products segment amounted to E349 million, a decline of 27.4% compared with 2000.

There are still no signs of stronger demand in the fourth quarter. Despite a decrease in raw material costs in some product areas and the cost reduction measures that we have introduced, income from operations will not improve significantly.

### SALES BY DIVISION

-----									

\* The pharmaceuticals business was sold to Abbott Laboratories on March 2, 2001. The earnings from the sale are shown under extraordinary income.

Page 5

AGRICULTURAL PRODUCTS:

In an environment that was difficult for the entire industry, sales in the third quarter were 2.6% lower than in the same period of 2000. A major factor has been the uncertain financial situation in South America, which requires extreme caution when arranging terms of payment. In the first three quarters, sales climbed 53.8% to E2,800 million due to acquisitions. Income from operations before special items in the seasonally weak third quarter was negative, but nevertheless exceeded the previous year's level of earnings, partially as a result of exploiting synergy potentials. In the first nine months, earnings increased by E242 million to E274 million.

Economic conditions will remain difficult in the fourth quarter. Unless the economic situation in South America deteriorates, we expect to achieve our full-year sales goal of E3,600 million.

FINE CHEMICALS:

Sales increased 21.6% to E534 million in the third quarter and 18.4% to E1,506 million in the first nine months. Growth was seen in the areas of animal feed additives, cosmetics raw materials and pharmaceutical ingredients. The acquisition of Takeda's vitamins business accounted for approximately 10 percentage points of the increase in sales in the first nine months.

Compared with 2000, income from operations before special items increased in the third quarter and also on a cumulative basis in the first nine months. Overall, we expect a positive development of our business excluding special items in the fourth quarter.

OIL AND GAS

Third-quarter sales in the Oil & Gas segment declined 2.6% to E921 million. This was primarily due to the fact that the average price of crude oil was 17% lower than in the previous year. Compared with the same period in 2000, sales increased by 30.7% to E3,345 million in the first nine months as a result of a considerable increase in sales in the first half of the year. We achieved higher sales in the areas of oil and gas production as well as in natural gas trading.

Income from operations was lower than in the last two quarters and declined by 12.4% to E331 million compared with 2000. In the first nine months, income from operations was up 25.4% at E1,085 million. Income taxes on oil production, which

## Edgar Filing: BASF AKTIENGESELLSCHAFT - Form 6-K

are non-deductible under the German tax system and which are recorded as tax expenses, amounted to E131 million in the third quarter and E409 million in the first nine months. Income from operations in the fourth quarter is likely to be lower than in the previous quarters as a result of a further decline in crude oil prices.

### REGIONS

Location of company	Sales			Income from operations before special items			Income from operations

	24,817	26,635	-6.8	2,041	2,570	-20.6	1,407*	2,324

\* Including provisions for structural measures not yet allocated

The sales and earnings figures in all regions reflect the weakness in the economy. Compared with 2000, reported sales in Europe decreased 25.9% in the third quarter and 10.6% in the first nine months. Sales from ongoing business declined 6.3% in the third quarter and increased 6.2% in the first nine months compared with the same periods in the previous year.

In North America (NAFTA), reported sales fell by 24.5% in the third quarter compared with 2000; sales from ongoing business declined by 10.6%. In the first nine months, reported sales were down 5.0%, but sales from ongoing business were up 5.5%. Higher sales in Asia are due to the inclusion of additional companies

## Edgar Filing: BASF AKTIENGESELLSCHAFT - Form 6-K

in the scope of consolidation.

With the exception of South America, income from operations before special items declined significantly in all regions in the third quarter. In the first nine months, earnings in Europe increased by 12.3% compared with 2000 as a result of the higher contribution from Oil & Gas. In the remaining regions, earnings fell considerably due to the weak economic situation. The increasingly difficult economic conditions resulted in a loss in North America.

Page 6

### EMPLOYEES

Since the end of the first half year, the number of employees has increased by 1,027 from 92,249 to 93,276. This increase is due to extension of the scope of consolidation and to acquisitions. The decline of 9,997 since the end of 2000 is largely due to the sale of our pharmaceuticals business.

### NUMBER OF EMPLOYEES

	3rd Quarter		Jan.-Sept.		Year
	2001	2000	2001	2000	2000
End of period	93,276	108,834	93,276	108,834	103,273
Average	93,323	109,089	95,411	107,946	105,784

### FINANCE

In the first nine months of 2001, cash provided by operating activities was E1,739 million, 8.7% less than in the same period in 2000. In the third quarter, funds were released from current assets. Additional funds committed for the first nine months were therefore reduced to E530 million and were considerably lower than in 2000.

After deducting ongoing capital expenditures, cash provided by investing activities amounted to E5,290 million, in particular as a result of the sale of our pharmaceuticals business.

We used this cash inflow to reduce our financial indebtedness, which amounted to E2,883 million as of September 30, 2001.

Up to the end of the third quarter, we bought back 21.7 million shares for E934 million. This corresponds to an average price of E43.05 per share. As of September 30, 2001, the number of shares outstanding was 592.5 million.

Cash and cash equivalents increased by E228 million. Together with securities, liquid funds amounted to E1,217 million as of September 30. This is E347 million more than at the end of 2000.
