APPROXIMATE DATE OF COMMENCEMENT OF PROPOSED SALE TO PUBLIC: As soon as practicable after the effective date of this Registration Statement.

If the only securities on this Form are being offered pursuant to dividend or interest reinvestment plans, please check the following box. / /

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, other than securities offered only in connection with dividend or interest reinvestment plans, check the following box. / /

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. / / _____

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. / / _____

If delivery of the prospectus is expected to be made pursuant to Rule 434, please check the following box. / /

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(A) OF THE SECURITIES ACT OF 1933 OR UNTIL THIS REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATE AS THE COMMISSION, ACTING PURSUANT TO SECTION 8(A), MAY DETERMINE.

PRELIMINARY PROSPECTUS--SUBJECT TO COMPLETION, DATED MARCH 27, 2002

THE INFORMATION IN THIS PROSPECTUS IS NOT COMPLETE AND MAY BE CHANGED. THESE SECURITIES MAY NOT BE SOLD UNTIL THE REGISTRATION STATEMENT FILED WITH THE SECURITIES AND EXCHANGE COMMISSION IS EFFECTIVE. THIS PROSPECTUS IS NOT AN OFFER TO SELL, NOR IS IT SEEKING AN OFFER TO BUY, THESE SECURITIES IN ANY STATE WHERE THE OFFER OR SALE IS NOT PERMITTED.

PROSPECTUS
2,500,000 SHARES

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

[LOGO]

COMMON STOCK

We are offering 2,500,000 shares of common stock. Our common stock is quoted on the American Stock Exchange and the Pacific Exchange under the symbol "BNT". On March 26, 2002, the last reported sale price of our common stock was \$10.15 per share.

YOU SHOULD CONSIDER CAREFULLY THE RISKS THAT WE HAVE DESCRIBED IN RISK FACTORS BEGINNING ON PAGE 5 BEFORE DECIDING WHETHER TO INVEST IN OUR COMMON STOCK.

	PER SHARE	TOTAL
Public price.....		
Placement agency fee.....		
Proceeds to us.....		

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THESE SECURITIES, OR DETERMINED IF THIS PROSPECTUS IS ACCURATE OR COMPLETE. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

Raymond James & Associates, Inc. will act as the placement agent in connection with the offering and will use its best efforts to introduce us to investors. Raymond James has no commitment to buy any of the shares. The shares are being offered on an all-or-none basis only to institutional and selected retail investors. All investor funds received prior to the closing of the offering will be deposited into escrow with Citibank, N.A. until the closing. If the escrow agent does not receive investor funds for the full amount of the offering, the offering will terminate and any funds received will be returned promptly.

RAYMOND JAMES

THE DATE OF THIS PROSPECTUS IS MARCH , 2002

SUMMARY

ABOUT US

We are a specialty pharmaceutical company focused on advanced drug delivery technologies and pharmaceutical products. Our proprietary drug delivery technologies enhance or facilitate the absorption of pharmaceutical compounds across membranes of the skin, mouth, nose, vagina and eye. We seek to license our technologies to major pharmaceutical and biotechnology companies for incorporation into their existing and new pharmaceutical products. We also develop products that incorporate our technologies and seek to form strategic alliances with major pharmaceutical and biotechnology companies for the development and commercialization of these products. We currently have strategic alliances regarding our drug delivery technologies with Pfizer and Auxilium and are in preliminary discussions with a number of other pharmaceutical companies to form additional alliances.

In Spain we manufacture and market a growing portfolio of generic and branded pharmaceuticals within four primary therapeutic areas: cardiovascular, gastrointestinal, infectious and neurological diseases. We seek to grow our pharmaceutical operations through the acquisition of currently approved and late stage products and through strategic alliances with pharmaceutical companies. We currently have a strategic alliance with Teva Pharmaceutical Industries granting us the right to register and market in Spain more than 75 of Teva's pharmaceutical products through our sales force of approximately 150 full-time personnel located in major cities throughout Spain. For the year ended December 31, 2001, we generated net sales of \$26.4 million and net income of \$1.4 million.

INDUSTRY OVERVIEW

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Drug delivery companies develop technologies to improve the administration of therapeutic compounds. These technologies are designed to enhance safety, efficacy, ease-of-use and patient compliance with prescribed therapy. The worldwide market for drug delivery systems was estimated to be \$35 billion in 2000 and is projected to increase to \$75 billion by 2005. Drug delivery technologies provide pharmaceutical and biotechnology companies with opportunities to:

- extend the commercial life of branded drugs that are about to lose patent protection in their current formulation;
- provide product differentiation to compounds that no longer have patent protection; and
- commercialize compounds that previously had limited or no commercialization potential because they could not be delivered safely and efficaciously.

The European Union, with an increasingly affluent population of approximately 375 million, represents the second largest pharmaceutical market in the world with approximately \$75 billion in pharmaceutical sales in 2000, according to IMS Health. With Spain's entry into the European Union in 1986, the Spanish pharmaceutical market has been evolving steadily into a market that is increasingly similar to those of other countries in Western Europe and the United States. With approximately \$6.6 billion in sales in 1999, Spain's pharmaceutical market ranked as the seventh largest in the world and is expected to grow to more than \$10 billion by 2005, according to IMS Health. Although comprising less than three percent of the Spanish pharmaceutical market, generic pharmaceuticals are expected to significantly increase their market penetration due to increases in drug utilization by an aging population, opportunities to launch new generic products as patents expire for numerous blockbuster drugs and initiatives by the Spanish government to stimulate the use of generic pharmaceuticals in response to rising healthcare costs. As sales of generic pharmaceuticals increase, competition may increase as well.

1

OUR STRATEGY

Our primary objective is to be a leading specialty pharmaceutical company focused on advanced drug delivery and formulation technologies to improve the effectiveness of existing and new pharmaceuticals, while expanding our generic and branded operations in Spain and Europe. Our strategy to accomplish this objective includes the following:

FOCUS ON MARKETING AND COMMERCIALIZING OUR CPE-215 PERMEATION ENHANCEMENT PLATFORM TECHNOLOGY

Our CPE-215 platform technology enhances the absorption of a broad range of pharmaceutical compounds across membranes of the skin, mouth, nose, vagina and eye. We market our CPE-215 technology to major pharmaceutical and biotechnology companies whose products we believe would benefit from its permeation enhancement. One of our strategic partners has filed a New Drug Application for a product using this technology. We are in various stages of developing, but have not yet commercialized, products that incorporate our permeation enhancement technology.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

DEVELOP PROPRIETARY PRODUCTS BASED ON OUR DRUG TECHNOLOGIES

We apply our drug delivery and oral drug formulation technologies to attempt to improve the performance of existing pharmaceutical products with respect to their method of delivery and effectiveness. Our proprietary manufacturing process improves the purity, stability and production yields of certain products and has the potential to significantly reduce manufacturing time and costs. Product development is underway for various applications of these technologies in order to obtain regulatory approval for commercialization.

INCREASE OUR PRODUCT SALES THROUGH TARGETED PROMOTION AND EXPANSION OF OUR PRODUCT PORTFOLIO

We plan to expand our portfolio of generic and branded products in Spain through the acquisition of currently marketed and late stage products, as well as through strategic alliances with other pharmaceutical and biotechnology companies. We face competition in obtaining new products as well as in partnering with other companies. In addition to our currently marketed products, we intend to directly promote and sell in Spain newly acquired products through our own sales force of approximately 150 full-time personnel located in major cities throughout Spain.

RISKS

Since our inception through December 31, 2001, we have incurred an accumulated deficit of \$74,332,000. In 2001, our net income increased to \$1,361,000 in 2001 (\$.10 per basic common share, \$.08 per diluted common share) from a net loss of \$745,000 in 2000 (\$.06 per basic and diluted share) partially as a result of a \$5,050,000 pre-tax gain in 2001 on the sale of drug licenses. We have invested our operating income and financing proceeds in our operations, funding working capital needs by a combination of internally generated funds from our Spanish operations and financing activities, including direct sales of stock as well as proceeds from the exercise of warrants. The proceeds of this offering will add to our working capital for general corporate purposes.

Our success will depend upon our competitive strengths and strategies, however, an investment in our common shares involves risks, including risks related to the identification of drugs suitable for our drug delivery technologies, expansion of our generic and branded drug operations, development and commercialization of new products, relationships with our strategic partners, the conduct of clinical trials, the regulatory approval process, product sales concentration, price competition, product reimbursement rates, reliance upon intellectual property protection, the effect of economic conditions and other uncertainties. These risks are described in more detail in the section of this prospectus titled "Risk Factors" which begins on page 5.

WHERE TO CONTACT US

Our headquarters are located at 65 Lafayette Road, Third Floor, North Hampton, New Hampshire 03862 and our telephone number is (603) 964-8006. Our website is located at www.bentleypharm.com. Information contained on our website is not part of this prospectus.

THE OFFERING

Common stock offered.....	2,500,000 shares
Common stock outstanding prior to this offering.....	14,708,228 shares (1)
Common stock outstanding immediately following this offering.....	17,208,228 shares (1)
Use of proceeds.....	We intend to use the net proceeds of this offering for general corporate purposes, including research and development, product development and capital expenditures, and for possible acquisitions.
American Stock Exchange symbol.....	BNT

(1) Unless we state otherwise, the information in this prospectus concerning the number of shares of our common stock, stock options and warrants outstanding, currently and after this offering, is based on the number of shares of common stock, stock options and warrants outstanding as of March 25, 2002. The shares set forth above do not include:

- 3,297,928 shares of common stock issuable upon the exercise of Class B Warrants (some of which we issued as underwriter's compensation as a result of our 1996 public offering), exercisable at \$5.70 per share and expiring on December 31, 2002;
- 3,391,256 shares of common stock issuable upon the exercise of outstanding stock options, exercisable at a weighted average of \$5.65 per share;
- 420,000 shares of common stock issuable upon the exercise of other outstanding common stock purchase warrants, exercisable at a weighted average of \$2.38 per share; and
- 528,500 additional shares of common stock reserved for issuance under our stock option plans.

SUMMARY CONSOLIDATED FINANCIAL INFORMATION

The following sets forth a summary of consolidated statement of operations data for each of the five years in the period ended December 31, 2001 and consolidated balance sheet data as of December 31, 2000 and 2001, all of which

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

are derived from our audited consolidated financial statements and related notes. The following summary financial data for each of the three years in the period ended December 31, 2001 and as of December 31, 2000 and 2001 should be read together with our consolidated financial statements and related notes appearing elsewhere in this prospectus and "Management's Discussion and Analysis of Financial Condition and Results of Operations." The consolidated statement of operations data for each of the two years in the period ended December 31, 1998 are derived from our audited consolidated financial statements and related notes not included in this prospectus.

- (1) Reflects the sale of 2,500,000 shares of common stock offered by us hereby on a best efforts basis, at an assumed offering price of \$10.00 per share, after deducting placement agent fees and estimated offering expenses.

4

RISK FACTORS

YOU SHOULD CAREFULLY CONSIDER THE FOLLOWING RISK FACTORS AND WARNINGS BEFORE MAKING AN INVESTMENT DECISION. THE RISKS DESCRIBED BELOW ARE NOT THE ONLY RISKS WE FACE. ADDITIONAL RISKS THAT WE DO NOT YET KNOW OF OR THAT WE CURRENTLY THINK ARE IMMATERIAL MAY ALSO IMPAIR OUR BUSINESS OPERATIONS. IF ANY OF THE EVENTS OR CIRCUMSTANCES DESCRIBED IN THE FOLLOWING RISKS ACTUALLY OCCURS, OUR BUSINESS, FINANCIAL CONDITION, OR RESULTS OF OPERATIONS COULD BE MATERIALLY ADVERSELY AFFECTED. IN SUCH CASE, THE TRADING PRICE OF OUR COMMON STOCK COULD DECLINE, AND YOU MAY LOSE ALL OR PART OF YOUR INVESTMENT.

OUR GROWTH DEPENDS ON IDENTIFYING DRUGS SUITABLE FOR OUR DRUG DELIVERY TECHNOLOGIES AND EXPANDING OUR GENERIC AND BRANDED DRUG OPERATIONS.

Bentley's growth depends on the identification of pharmaceutical products that are suitable for delivery using our technologies. Our principal drug delivery technology is our CPE-215 permeation enhancement platform technology. This technology, like other drug delivery enhancement technologies, operates to enhance the amount and rate of absorption of certain drugs across biological membranes. This technology does not operate independently and must be coupled with suitable pharmaceutical products in order to provide value. Consequently, our growth will depend to a great extent on identifying and commercializing these suitable drugs, with respect to which we intend to expend significant resources and efforts. Identifying suitable products is a lengthy and complex process that may not succeed. Even if identified, products may not be available to us or we may otherwise be unable to enter into licenses or other agreements for their use. In our efforts to identify suitable products, we compete with other pharmaceutical delivery companies with greater research and development, financial, marketing and sales resources. If we do not effectively identify drugs to be used with our technologies, improve the delivery of drugs with our technologies and bring the improved drugs to commercial success, then we will not be able to continue our growth and we will be adversely affected.

We intend to expend significant resources and efforts toward identifying and commercializing products and technologies to expand our generic and branded drug operations in Spain. Although we already manufacture and market generic and branded drugs in Spain, the growth of these operations in particular and Bentley in general will depend to a great extent on identifying and commercializing additional such drugs for which we have existing capacity and infrastructure and, to a lesser extent, on increasing sales of existing products. Identifying and pursuing these new opportunities involves significant time and expense and we may not succeed. Even if identified, these products and technologies may not be commercially successful. Once identified, products to be manufactured and/or marketed by us under generic or branded names are subject to successful negotiation of acceptable economic and legal terms, and successful progress of the product through commercialization, as to which we cannot assure you. In these efforts, we compete with other pharmaceutical companies having generic and branded drug operations with greater financial, marketing and sales resources. If we do not effectively identify generic and branded drug products and technologies and bring them to commercial success, then we will not be able to

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

continue our growth and we will be adversely affected.

The growth of our generic and branded operations may be adversely impacted by claims by others that our products infringe on the proprietary rights of their existing "brand-name" products. For example, in February 2002 we were notified that a legal proceeding seeking an injunction had been commenced in Madrid against us by Merck & Co. Inc. and its Spanish subsidiary alleging that we violated their patents in our production of the product simvastatin. Although the court in the same month dismissed the action, which could be brought in another proceeding, we cannot assure you that similar actions will not be brought nor that they will not have an adverse effect on us.

5

PRODUCTS USING OUR TECHNOLOGIES ARE IN VARIOUS STAGES OF DEVELOPMENT AND MAY NOT ACHIEVE COMMERCIAL SUCCESS.

Independently as well as in conjunction with strategic partners, we are investigating the use of our technologies with respect to a variety of pharmaceutical compounds and products that are in various stages of development. We are unable to predict whether any of these products will receive regulatory clearances or be successfully developed, manufactured or commercialized. Further, due to the extended testing and regulatory review process required before marketing clearance can be obtained, the time periods before commercialization of any of these products are long and uncertain. Risks during development include the possibility that:

- any or all of the proposed products will be found to be ineffective;
- the proposed products will have adverse side effects or will otherwise fail to receive necessary regulatory clearances;
- the proposed products may be effective but uneconomical to market; or
- other pharmaceutical companies may market equivalent or superior products.

WE WILL RELY ON STRATEGIC PARTNERS TO COMMERCIALIZE PRODUCTS THAT USE OUR DRUG DELIVERY TECHNOLOGIES.

In light of our resources and the significant time, expense, expertise and infrastructure necessary to bring new drugs and formulations from inception to market, we are particularly dependent on resources from third parties to commercialize products incorporating our technologies. Our strategy involves forming alliances with others to develop, manufacture, market and sell our products in the United States and other countries. We continue to pursue strategic partners for these purposes. We may not be successful in finding strategic partners or in otherwise obtaining financing, in which case the development of our products would be delayed or curtailed.

We must enter into agreements with strategic partners to conduct clinical trials, manufacturing, marketing and sales necessary to commercialize product candidates. In addition, our ability to apply our drug delivery technologies to any proprietary drugs will depend on our ability to establish and maintain strategic partnerships or other collaborative arrangements with the holders of proprietary rights to such drugs. Arrangements with strategic partners may be established through a single comprehensive agreement or may evolve over time through a series of discrete agreements, such as letters of intent, research

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

agreements and license agreements. We cannot assure you that we will be able to establish such strategic partnerships or collaborative arrangements on favorable terms or at all or that any agreement entered into with a strategic partner will lead to further agreements or ultimately result in commercialization of a product.

In collaborative arrangements, we will depend on the efforts of our strategic partners and will have limited participation in the development, manufacture, marketing and commercialization of the products subject to the collaboration. We cannot assure you that these strategic partnerships or collaborative arrangements will be successful, nor can we assure you that strategic partners or collaborators will not pursue alternative technologies or develop alternative products on their own or with others, including our competitors. We could have disputes with our existing or future strategic partners or collaborators. Any such disagreements could lead to delays in the research, development or commercialization of potential products or could result in time-consuming and expensive litigation or arbitration.

A SIGNIFICANT PORTION OF OUR REVENUES ARE GENERATED BY THE SALE OF PRODUCTS THAT ARE FORMULATED FROM ONE ACTIVE INGREDIENT.

Revenues from products whose active ingredient is omeprazole accounted for approximately 56% of our net sales in 2001. We currently purchase omeprazole from a single supplier. If we lose and

6

cannot effectively replace this supplier, or are otherwise unable to continue the sales of products that contain this active ingredient, our revenues would decline significantly.

IF OUR CLINICAL TRIALS FAIL, WE WILL BE UNABLE TO MARKET PRODUCTS.

Any human pharmaceutical product developed by us would require clearance by the U.S. Food and Drug Administration for sales in the United States, by Spain's Ministry of Health for sales in Spain and by comparable regulatory agencies for sales in other countries. The process of conducting clinical trials and obtaining FDA and other regulatory approvals is lengthy and expensive and we cannot assure you of success. In order to obtain FDA approval of any product candidates using our technologies, a New Drug Application must be submitted to the FDA demonstrating that the product candidate, based on preclinical research and animal studies as well as human clinical trials, is safe for humans and effective for its intended use. Positive results from preclinical studies and early clinical trials do not ensure positive results in more advanced clinical trials designed to permit application for regulatory approval. We may suffer significant setbacks in clinical trials, even in cases where earlier clinical trials show promising results. Any of our product candidates may produce undesirable side effects in humans that could cause us or regulatory authorities to interrupt, delay or halt clinical trials of a product candidate. We, the FDA or other regulatory authorities may suspend our clinical trials at any time if we or they believe the trial participants face unacceptable health risks or if they find deficiencies in any of our regulatory submissions. Other factors that can cause delay or terminate our clinical trials include:

- slow or insufficient patient enrollment;
- slow recruitment and completion of necessary institutional approvals at clinical sites;
- longer treatment time required to demonstrate efficacy;
- lack of sufficient supplies of the product candidate;

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

- adverse medical reactions or side effects in treated patients;
- lack of effectiveness of the product candidate being tested;
- regulatory requests for additional clinical trials; and
- instability of the pharmaceutical formulations.

OUR PATENT POSITIONS AND INTENDED PROPRIETARY OR SIMILAR PROTECTIONS ARE UNCERTAIN.

We have filed numerous patent applications and have been granted licenses to, or have acquired, a number of patents. We cannot assure you, however, that our pending applications will be issued as patents or that any of our issued or licensed patents will afford adequate protection to us or our licensees. We cannot determine the ultimate scope and validity of patents that are now owned by or may be granted to third parties, the extent to which we may wish or be required to acquire rights under such patents or the cost or availability of such rights.

Competitors may interfere with our patent process in a variety of ways. Competitors may claim that they invented the claimed invention prior to us. Competitors also may claim that we are infringing their patents, interfering with or preventing the use of our technologies. Competitors also may contest our patents by showing the patent examiner that the invention was not original, was not novel or was obvious. In litigation, a competitor could claim that our issued patents are not valid for a variety of other reasons as well. If a person claims we infringe their technology, we could face a number of consequences, including lawsuits, which take significant time and can be very expensive, payment of substantial damages for infringement, prohibition from selling or licensing the product unless the patent holder licenses the patent to us, or reformulation, if possible, of the product so it does not infringe, which could require substantial time and expense.

7

As an example of the risk of infringement claims, in February 2002 we were notified that a legal proceeding seeking an injunction had been commenced in Madrid against us by Merck & Co. Inc. and its Spanish subsidiary alleging that we violated their patents in our production of the product simvastatin. Although the court in the same month dismissed the action, which could be brought in another proceeding, we cannot assure you that similar such actions will not be brought nor that they will not have an adverse effect on us.

We also rely on trade secrets, unpatented proprietary technologies and continuing technological innovations in the development and commercialization of our products. We cannot assure you that others will not independently develop the same or similar technologies or obtain access to our proprietary technologies. It is unclear whether our trade secrets will be protected under law. While we use reasonable efforts to protect our trade secrets, our employees or consultants may unintentionally or willfully disclose our information to competitors. Our employees and consultants with access to our proprietary information have entered into or are subject to confidentiality arrangements with us and have agreed to disclose and assign to us any ideas, developments, discoveries and inventions that arise from their activities for us. We cannot assure you, however, that others may not acquire or independently develop similar technologies or, if effective patents in applicable countries are not issued with respect to our products or technologies, that we will be able to maintain information pertinent to such research as proprietary technologies or

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

trade secrets. Enforcing a claim that another person has illegally obtained and is using our trade secrets, like patent litigation, is expensive and time consuming, and the outcome is unpredictable. In addition, courts outside the United States are sometimes less willing to protect trade secrets.

REGULATORY APPROVALS MUST BE OBTAINED AND MAINTAINED FOR PRODUCTS INCORPORATING OUR TECHNOLOGIES AND, IF APPROVALS ARE DELAYED OR WITHDRAWN, WE WILL BE UNABLE TO COMMERCIALIZE THESE PRODUCTS.

Government regulations in the United States, Spain and other countries have a significant impact on our business and affect the research and development, manufacture and marketing of products incorporating our technologies. In the United States, Spain and other countries, governmental agencies have the authority to regulate the distribution, manufacture and sale of drugs. Failure to comply with applicable regulatory approvals can, among other things, result in fines, suspension or withdrawal of regulatory approvals, product recalls, operating restrictions and criminal prosecution. In addition, governmental regulations may be established that could prevent, delay, modify or rescind regulatory approval of our products.

IF WE ARE UNABLE TO OBTAIN MARKETING APPROVALS TO SELL OUR PRODUCTS IN COUNTRIES OTHER THAN SPAIN, WE MAY NOT BE ABLE TO OBTAIN ADDITIONAL REVENUES FROM SALES IN THOSE COUNTRIES.

We cannot assure you that products that have obtained marketing approval in Spain will be approved for marketing elsewhere. If we are unable to obtain marketing approval for our products in countries other than Spain, we may not be able to obtain additional revenues from sales in those countries. If we are unable to obtain these marketing approvals, we would have to seek to enter into collaborative arrangements to sell or license our products to strategic partners that have marketing approval in those countries. We can not assure you that we would find or enter into acceptable arrangements with such strategic partners to market our products, nor can we assure you that any such arrangements would be successful.

WE MUST COMPLY WITH GOOD MANUFACTURING PRACTICES IN THE PRODUCTION OF PHARMACEUTICAL PRODUCTS.

Any manufacturing facility for pharmaceutical products to be marketed in the United States is subject to FDA inspection both before and after approval of a New Drug Application to determine compliance with the FDA's Good Manufacturing Practices requirements, as well as local, state and other federal regulations. Manufacturing facilities for our compounds to be marketed in European

8

countries and elsewhere are also subject to European Union and/or other applicable GMP regulations. Facilities used to produce our compounds may not achieve or maintain compliance with GMP or other requirements. The GMP regulations are complex and, if we fail to comply with them, it could lead to rejection or delay of an NDA or comparable application. Any delay in approval of an NDA or comparable application would delay product launch. Violation of GMP requirements after approval of an NDA or comparable application, could result in remedial action, penalties and delays in production.

WE OPERATE A SIGNIFICANT PORTION OF OUR BUSINESS IN, AND PLAN TO EXPAND FURTHER INTO, MARKETS OUTSIDE THE UNITED STATES, WHICH SUBJECTS US TO ADDITIONAL BUSINESS RISKS.

In the year ended December 31, 2001, substantially all of our revenues were derived from sales made by our Spanish subsidiaries in Spain and a small portion of those revenues (one to two percent) were derived from sales made by the

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

subsidiaries to customers in other foreign countries. We believe that a significant portion of our revenues will continue to be derived from sales in foreign countries. Conducting business internationally subjects us to a number of risks and uncertainties, including:

- unexpected delays or changes in regulatory requirements;
- difficulties and costs related to complying with a wide variety of complex foreign laws and treaties;
- delays and expenses associated with tariffs and other trade barriers;
- restrictions on and impediments to repatriation of our funds and our customers' ability to make payments to us;
- political and economic instability;
- difficulties and costs associated with staffing and managing international operations and implementing, maintaining and improving financial controls;
- dependence upon independent sales representatives and other indirect resellers who may not be as effective and reliable as our employees;
- inadequate or uncertain protection of intellectual property in foreign countries;
- increased difficulty in collecting accounts receivable and longer accounts receivable cycles in certain foreign countries; and
- adverse tax consequences or overlapping tax structures.

CURRENCY FLUCTUATIONS AND THE TRANSITION TO THE EURO COULD HAVE A MATERIAL ADVERSE IMPACT ON OUR BUSINESS.

Our revenues may be impacted by fluctuations in local currencies due to the fact that substantially all of our revenues currently are generated by sales in Spain by our Spanish subsidiaries, Laboratorios Belmac S.A. and Laboratorios Davur S.L. Our Spanish subsidiaries reported an increase in net sales of 50% in local currency for the year ended December 31, 2001 compared to the prior year; this increase, however, was partially offset by a decline in the value of the Spanish Peseta, when expressed in U.S. Dollars. We do not currently engage in foreign exchange hedging transactions to manage our foreign currency exposure. Our foreign operations expose us to a number of currency related risks, including the following:

- fluctuations in currency exchange rates;
- limitations on the conversion of foreign currency;
- fluctuations of the carrying value of long lived assets; and

9

- limitations on the remittance of dividends by foreign subsidiaries.

On January 1, 2002, European Union countries, which includes Spain, began operating with the Euro as their single currency. Uncertainty exists as to the effect the Euro will have on the marketplace. The currency conversion to the Euro exposes us to certain risks, including the following:

- the creation of suitable clearing and settlement payment schemes for the Euro;

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

- the legal treatment of outstanding financial contracts after the conversion date that refer to currencies other than the Euro; and
- whether the interest rate, tax and labor regimes of the European countries participating in the Euro will successfully converge over time, if at all.

IF WE CANNOT KEEP PACE WITH RAPID TECHNOLOGICAL CHANGE AND MEET THE INTENSE COMPETITION IN OUR INDUSTRY, WE MAY NOT SUCCEED.

Our success depends, in part, on achieving and maintaining a competitive position in the development of products and technologies in a rapidly evolving industry. If we cannot maintain competitive products and technologies, our current and potential strategic partners may choose to adopt the drug delivery technologies of our competitors. We also compete generally with other drug delivery, biotechnology and pharmaceutical companies engaged in the development of alternative drug delivery technologies or new drug research and testing. Many of these competitors have substantially greater financial, technological, manufacturing, marketing, managerial and research and development resources and experience than we do and represent significant competition for us. Our competitors may succeed in developing competing technologies or obtaining governmental approval for products before we achieve success, if at all. The products of our competitors may gain market acceptance more rapidly than our products. Developments by competitors may render our existing or proposed products noncompetitive or obsolete.

Our competitive positions in our generic and branded drug operations as well as with our drug delivery enhancement technologies are uncertain and subject to risks. In Spain, and in other countries, we must demonstrate bioequivalence of our generic products, which may be challenged by branded and other generic competitors as well as regulatory authorities.

The competitive position of our drug delivery enhancement technologies is subject to the possible development by others of superior technologies. Other drug delivery technologies, including oral and injection methods, have wide acceptance, notwithstanding certain drawbacks, and are the subject of improvement efforts by other entities having greater resources. In addition, our drug delivery technologies are limited by the number and commercial magnitude of drugs with which they can successfully be combined.

WE MAY BE UNABLE TO MEET INCREASING EXPENSES AND DEMANDS ON OUR RESOURCES FROM FUTURE GROWTH, IF ANY, OR TO EFFECTIVELY PURSUE ADDITIONAL BUSINESS OPPORTUNITIES.

Our revenues increased 42% and our research and development expenditures increased 89% from the year ended December 31, 2000 to the year ended December 31, 2001, challenging our management, administrative, financial, marketing, operational and research and development resources. In addition, we routinely consider acquisition and investment opportunities, although we have no current agreements or commitments with respect to any acquisitions or investments. Any future acquisitions or investments would further challenge our resources. If we do not properly meet the increasing expenses and demands on our resources from future growth, we will be adversely affected. To properly manage our growth, we must, among other things, implement additional and improve existing administrative, financial, marketing, operational and research and development systems, procedures and controls on a timely basis. We may also need to expand our staff in these and other areas. We may not be able to

complete the improvements to our systems, procedures and controls necessary to support our future operations in a timely manner. We may not be able to hire, train, integrate, retain, motivate and manage required personnel, successfully integrate acquisitions or investments, nor successfully identify, manage and pursue existing and potential market opportunities. If we fail to generate additional revenue in excess of increased operating expenses in any fiscal period, we may incur losses, or our losses may increase in that period.

PHARMACEUTICAL PRICING, CHANGES IN THIRD-PARTY REIMBURSEMENT AND GOVERNMENTAL MANDATES ARE UNCERTAIN AND MAY ADVERSELY AFFECT US.

Our revenues and profitability may be adversely affected by the continuing efforts of governmental and third party payors to contain or reduce the costs of healthcare. A substantial portion of our operations consists of marketing and manufacturing, primarily in Spain, generic and branded pharmaceutical products. The use of generic drugs is regulated in Spain, the U.S. and many other countries, subject to many changing and competing public policy considerations. In addition, in certain markets, such as Spain, pricing or profitability of prescription pharmaceuticals is subject to government control. Some governmental agencies, including those in Spain, can, due to insufficient supply, compel companies to continue to produce products that are not profitable for the company. In the U.S., there have been, and we expect that there will continue to be, a number of federal and state proposals to implement similar government controls.

Successful commercialization of many of our products, including those using our permeation enhancement technologies as well as our generic and branded products, may depend on the availability of reimbursement for the cost of such products and related treatment from third-party healthcare payors, such as the government, private insurance plans and managed care organizations. Third-party payors are increasingly challenging the price of medical products and services. Such reimbursement may not be available for any of our products at all or for the duration of the recommended treatment with a drug, which could materially adversely affect our ability to commercialize that drug. The increasing emphasis on managed care in the U.S. continues to increase the pressure on pharmaceutical pricing.

We anticipate that there will continue to be a number of proposals in the U.S. to implement government control over the pricing or profitability of prescription pharmaceuticals, as is currently the case in many foreign markets. The announcement or adoption of such proposals could adversely affect us. Further, our ability to commercialize our products may be adversely affected to the extent that such proposals materially adversely affect the business, financial condition and profitability of companies that are prospective strategic partners.

The cost of healthcare in Spain, the U.S. and elsewhere continues to be a subject of investigation and action by various governmental agencies. Certain resulting legislative proposals may adversely affect us. For example, governmental actions to reduce or eliminate reimbursement for drugs may directly diminish our markets. In addition, legislative safety and efficacy measures may be invoked that lengthen and increase the costs of drug approval processes. Further, social, economic and other broad policy legislation may induce unpredictable changes in the healthcare environment. As examples of pending legislative proposals that may adversely affect us, groups in Spain have urged

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

the Spanish Parliament to consider proposals that would revise the pharmaceutical laws in response to social policy. One would change the pricing and availability of drugs in Spain and the other would conform Spanish drug exportation to international standards for certain purposes. We cannot assure you whether these proposals or others may be enacted in some form, if at all, or the impact they may have if enacted.

OUR OPERATIONS COULD BE ADVERSELY AFFECTED IF WE ARE UNABLE TO RAISE OR OBTAIN NEEDED FUNDING.

We have used cash from outside financing to fund our operations. Substantial time and financial and other resources will be required to complete ongoing development and clinical testing of our

11

products. Regulatory efforts and collaborative arrangements also will be necessary for our products that are currently under development and testing in order for them to be marketed. Assuming we continue our operations as presently conducted, we believe that with the net proceeds of this offering we have sufficient working capital to meet our needs for the foreseeable future. The net proceeds of this offering, however, together with revenues from operations and our cash may not be sufficient over the next several years for commercializing all of the products we are currently developing. Consequently, we seek strategic partners for all phases of development, marketing and commercialization of product candidates employing our technologies. Further, we cannot assure you as to the sufficiency of our resources or the time required to complete any ongoing development and clinical testing, since the extent to which we conduct such testing is dependent on resource allocation decisions that we make from time to time based on numerous financial as well as operational considerations.

In addition to development and other costs, we expect to incur capital expenditures from time to time. These capital expenditures will be influenced by our regulatory compliance efforts, our success, if any, at developing collaborative arrangements with strategic partners, our needs for additional facilities and capital equipment and the growth, if any, of our business in general. We cannot assure you that we will receive additional funding on favorable terms if at all, or that we will be successful in attracting strategic partners. If we cannot raise funds or engage strategic partners on acceptable terms when needed, we may not be able to continue our research and development activities, develop or enhance our products and services, take advantage of future opportunities, grow our business or respond to competitive pressures or unanticipated requirements.

IF WE CANNOT ATTRACT AND RETAIN KEY PERSONNEL, WE MAY NOT BE ABLE TO EXECUTE OUR BUSINESS PLAN AS ANTICIPATED.

We have assigned many key responsibilities within our company to, and are dependent on, a relatively small number of individuals. If we lose the services of our Chief Executive Officer, Chief Science Officer or Vice President of Pharmaceutical Development, our ability to execute our business plan in the manner we currently anticipate would be adversely affected. The competition for qualified personnel is intense and the loss of key personnel could adversely affect our business. We maintain key person life insurance only for our Chief

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Executive Officer. We have an employment agreement with each of our executive officers.

WE MAY INCUR SUBSTANTIAL LIABILITIES AND MAY BE REQUIRED TO LIMIT COMMERCIALIZATION OF OUR PRODUCTS IN RESPONSE TO PRODUCT LIABILITY CLAIMS.

The testing and marketing of medical products entails an inherent risk of product liability. We may be held liable to the extent that there are any adverse reactions from the use of our products. Our products involve new methods of delivery for drugs, some of which may require precautions to prevent unintended use, especially since they are designed for patients' self-use rather than being administered by medical professionals. The FDA may require us to develop a comprehensive risk management program for our products. The failure of these measures could result in harmful side effects or death. As a result, consumers, regulatory agencies, pharmaceutical companies or others might make claims against us. If we cannot successfully defend ourselves against product liability claims, we may incur substantial liabilities, lose market share or be required to limit commercialization of our products.

Our inability to obtain sufficient product liability insurance at an acceptable cost to protect against potential product liability claims could inhibit or prevent the commercialization of pharmaceutical products we develop alone or with corporate collaborators. We maintain product liability insurance in the amount of \$3 million Euros (approximately \$2.6 million U.S. Dollars) and clinical trial insurance in connection with our clinical testing activities in various amounts on a study-by-study basis. While management believes that this insurance is reasonable, we cannot assure you that any of this coverage will be adequate to protect us in the event of a claim. We, or any corporate collaborators, may not be

12

able to obtain or maintain insurance at a reasonable cost, if at all. Even if our agreements with any future corporate collaborators entitle us to indemnification against losses, such indemnification may not be available or adequate if any claim arises.

WE WILL HAVE BROAD DISCRETION AS TO THE USE OF PROCEEDS OF THIS OFFERING AND MAY FAIL TO USE THE PROCEEDS EFFECTIVELY.

We expect to use the net proceeds of this offering for general corporate purposes. We have no current agreements or commitments for any business combinations or significant capital expenditures. Our management will have broad discretion in utilizing the proceeds and may use the proceeds in ways with which you and our other stockholders may disagree. We may not be able to use or invest these funds effectively.

YOUR PERCENTAGE OF OWNERSHIP AND VOTING POWER AND THE PRICE OF OUR COMMON STOCK MAY DECREASE AS A RESULT OF EVENTS THAT INCREASE THE NUMBER OF OUR OUTSTANDING SHARES.

As of December 31, 2001, we had the following capital structure:

Common stock outstanding..... 14,585,200

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Common stock issuable upon:

Exercise of Class B Warrants.....	3,003,560
Exercise of other warrants.....	420,000
Exercise of options which are outstanding.....	2,937,256
Exercise of options which have not been granted.....	1,006,000

Total common stock outstanding assuming exercise of all of the above.....	21,952,016
	=====

As of December 31, 2001, we had outstanding options and warrants to purchase approximately 6,360,816 shares of common stock at exercise prices ranging from \$1.50 to \$45.00 (exercisable at a weighted average of \$4.83 per share), of which approximately 5,740,716 options and warrants were then exercisable. Since December 31, 2001 we have granted options to purchase 477,500 shares of common stock, exercisable at a weighted average of \$9.76 per share. In addition, we may conduct future offerings of our common stock or other securities with rights to convert the securities into shares of our common stock. Exercise of our outstanding options and warrants into our common stock may significantly and negatively affect the market price for our common stock as well as decrease your percentage ownership and voting power.

OUR STOCK IS VOLATILE.

The market prices for our securities and for securities of emerging growth companies have historically been highly volatile. During the last two years, the price of our common stock has ranged from a high of \$11.57 to a low of \$3.56. Future announcements concerning us or our competitors may have a significant impact on the market price of our common stock. Factors which may affect our market price include:

- progress of our relationships with strategic partners;
- results of clinical studies and regulatory reviews;
- technological innovations by us or our competitors;
- market conditions in the pharmaceutical, drug delivery and biotechnology industries;
- competitive products;
- financings;

13

- sales or the possibility of sales of our common stock;
- our results of operations and financial condition;
- proprietary rights;
- public concern as to the safety or commercial value of our products; and
- general economic conditions.

These uncertainties have adversely affected and may continue to adversely

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

affect the market price of our common stock. Furthermore, the stock market has experienced significant price and volume fluctuation unrelated to the operating performance of particular companies. These market fluctuations may also adversely affect the market price of our common stock.

DELAWARE LAW AND PROVISIONS IN OUR CERTIFICATE OF INCORPORATION, BYLAWS AND STOCKHOLDER RIGHTS PLAN MAY PREVENT OR DISCOURAGE THIRD PARTIES OR STOCKHOLDERS FROM ATTEMPTING TO REPLACE THE MANAGEMENT OF BENTLEY.

As a Delaware company, we are subject to Section 203 of the Delaware General Corporation Law, as amended, which is a statutory provision intended to discourage certain takeover attempts that are not approved by the board of directors. Section 203 prohibits a Delaware corporation from engaging in any business combination with any interested stockholder for a period of three years following the date that such stockholder became an interested stockholder subject to certain exceptions.

Our certificate of incorporation and bylaws include provisions that also may have the effect of discouraging, delaying or preventing a change in control or an unsolicited acquisition proposal that a stockholder might consider favorable. Our board of directors is divided into three classes with staggered three-year terms, which makes it more difficult for an acquiror to change the overall composition of the board in a short period of time. The positive vote of at least two-thirds is required to approve a merger, a sale or lease of all or most of our assets, certain other business combinations or dissolution or liquidation, and an affirmative vote of two-thirds is required to amend any provision in our certificate of incorporation relating to our directors and officers or to amend any provision in our certificate of incorporation. Additionally, our certificate of incorporation authorizes our board of directors to issue preferred stock in one or more series with the rights, obligations and preferences of each series to be determined by our board without stockholder approval. Our staggered board, the super-majority voting provisions and the potential issuance of preferred stock may have the effect of preventing or discouraging third parties or stockholders from attempting to replace our management.

To the same potential effect, we have a stockholder rights plan designed to prevent a potential acquirer from gaining control of us and to protect us from coercive takeover attempts. The rights will become exercisable only if any person or group of affiliated persons beneficially acquires 15% or more of our common stock. Under certain circumstances, each holder of a right (other than the person or group who acquired 15% or more of our common stock) is entitled to purchase a defined number of shares of our common stock at 50% of its market price at the time that the right becomes exercisable.

14

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995.

Words such as expects, anticipates, intends, believes, will and similar words are used to identify forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements, including, but not limited to, the statements in the Risk Factors

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

and Business sections and elsewhere in this prospectus, are not based on historical facts, but rather reflect our current expectations concerning future results and events. Although we believe that the expectations reflected in the forward-looking statements are reasonable, such statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be different from any future results, performance and achievements expressed or implied by these statements, including the risks outlined in the Risk Factors section and elsewhere in this prospectus. You are cautioned not to place undue reliance on these forward-looking statements, which reflect our views only as of the date of this prospectus. We undertake no obligation to publicly update or revise any forward-looking statements, whether as the result of new information, future events or otherwise. You should not assume that the information contained in this prospectus is accurate as of any date other than the date on the front cover of this prospectus.

15

USE OF PROCEEDS

The net proceeds to us from the sale of the 2,500,000 shares of common stock offered by us on a best efforts basis are estimated to be approximately \$22,800,000 (at an assumed sale price of \$10.00 per share), after deduction of estimated expenses payable by us in connection with this offering.

We expect to use the net proceeds of this offering for general corporate purposes, including working capital, research and development, product development and capital expenditures. A portion of the proceeds may also be used to acquire or invest in complementary businesses, technologies or products. The amount that we use for each of these purposes will depend on a number of factors, including the need to further develop our products to attract strategic partners and the amount of cash we generate from operations. As a result, we will retain broad discretion in the allocation of the net proceeds of this offering. We have no current agreements or commitments with respect to any acquisition or investment. Assuming we continue our operations as presently conducted, we believe that with the net proceeds of this offering, we will have sufficient working capital to meet our needs for the foreseeable future. Pending these uses, we intend to invest the net proceeds of this offering in cash equivalents and/or short-term securities.

PRICE RANGE OF COMMON STOCK

The following table sets forth, for the periods indicated, the range of quarterly high and low sales prices for our common stock as reported on the American Stock Exchange under the symbol "BNT." Our common stock began trading on the American Stock Exchange on July 31, 1990 and on the Pacific Exchange on March 27, 1996.

	HIGH -----	LOW -----
Fiscal 2000		
First Quarter.....	\$12.50	\$5.88
Second Quarter.....	9.50	5.88

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Third Quarter.....	11.00	6.88
Fourth Quarter.....	11.00	3.56

Fiscal 2001

First Quarter.....	7.50	4.40
Second Quarter.....	6.35	4.40
Third Quarter.....	7.25	5.50
Fourth Quarter.....	10.50	6.25

Fiscal 2002

First Quarter (through March 25, 2002).....	11.57	7.60
---	-------	------

As of March 25, 2002 there were 1,611 holders of record of our common stock, which does not reflect stockholders whose shares are held in street name.

DIVIDENDS

We have never paid cash dividends on our common stock. We intend to retain future earnings in order to finance the growth and development of our business.

16

CAPITALIZATION

The following table sets forth our capitalization as of December 31, 2001:

- on an actual basis; and

- on an as adjusted basis to reflect the sale of 2,500,000 shares of common stock at an assumed offering price of \$10.00 per share, after deducting placement agent fees and estimated offering expenses. This offering is on a best efforts basis.

You should read the information below with "Use of Proceeds" and the financial information contained elsewhere in this prospectus. For a description of our capital stock, you should read the information under the caption "Description of Securities."

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GENERAL

We are a specialty pharmaceutical company focused on advanced drug delivery technologies and pharmaceutical products. A substantial part of our operations is in Spain, where we manufacture and market generic and branded pharmaceutical products and from which market we derive the majority of our sales.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Our primary objective is to be a leading specialty pharmaceutical company focused on advanced drug delivery and formulation technologies that improve the effectiveness of existing and new pharmaceuticals. We have patents and proprietary technologies that enhance or facilitate the absorption of drugs across membranes of the skin, mouth, nose, vagina and eye. We are developing products incorporating these technologies and seek to form strategic alliances with major pharmaceutical and biotechnology companies to facilitate the development and commercialization of our products. We currently have strategic alliances with Pfizer and Auxilium and are in preliminary discussions with a number of other pharmaceutical companies to form additional alliances.

We have entered into a research services agreement with Auxilium, an emerging therapeutic pharmaceutical company focused on diseases related to aging, to develop and test various pharmaceutical compositions of a topical testosterone product using our CPE-215 permeation enhancement technology. We have licensed our drug delivery technology to Auxilium for use in the development and commercialization of a topical testosterone product. Phase III clinical trials performed by Auxilium for the approval of this product in the U.S. have been completed and a New Drug Application has been submitted to the FDA.

We have entered into a research collaboration with Pfizer in which we were granted a non-exclusive worldwide royalty-free license to use Pfizer's compounds and technology to assess the performance of our CPE-215 technology with Pfizer's compounds. As part of the agreement, we granted to Pfizer the non-exclusive right to test the ability of our CPE-215 technology to enhance delivery of certain compounds proprietary to Pfizer.

We entered into a strategic alliance with Teva in July 2000 whereby we, through our Spanish subsidiaries, received the right to register and market in Spain more than 75 of Teva's products. The products are comprised of both branded and generic forms. Sales from the products are expected to begin gradually, but will progress over the next two to three years. An investment in additional sales representatives has been and will continue to be required, along with an increase in regulatory activities, both of which may create a short-term decrease in our earnings. Through our subsidiary, Laboratorios Davur S.L., we also submitted registrations to the Spanish Ministry of Health for generic versions of various products in response to growing interest in generic drug products in Spain. We believe that gross margins may be lower on sales of these products.

We manufacture generic and branded pharmaceutical products in our Zaragoza, Spain facility and sell and market these products to physicians and pharmacists throughout Spain. In addition to manufacturing our own products, we utilize our excess capacity by acting as a contract manufacturer for other pharmaceutical companies.

We have not realized domestic taxable income to date. At December 31, 2001, net operating losses available to offset future domestic taxable income for federal income tax purposes were approximately \$36,047,000 million. Our U.S. federal net operating loss carryforwards, if not utilized, expire at various dates from 2007 to 2022. We have recorded a valuation allowance against our entire future tax benefit arising from our domestic net operating losses. The future utilization of our net operating loss carryforwards may be limited pursuant to U.S. tax regulations.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

FISCAL YEAR ENDED DECEMBER 31, 2001 COMPARED TO FISCAL YEAR ENDED DECEMBER 31, 2000

NET SALES. Net sales increased by 41.9% from \$18,617,000 in 2000 to \$26,411,000 in 2001. The \$7,794,000 increase was primarily the result of our continuing efforts in the generic drug market in Spain. We anticipated the opportunities in the emerging generic drug market in Spain and began taking measures over three years ago to enter the Spanish generic drug market. We began to register, market and distribute generic pharmaceutical products in Spain and began aligning our business model to be competitive in this arena, including hiring and training a new generic products sales force, submission of generic products to the Spanish Ministry of Health for approval and a marketing campaign designed to position ourselves as a leader in the Spanish generic drug market. Although in Spain we reported an increase in net sales of 50% in local currency in 2001 compared to the prior year, a three percent decline in the value of the Spanish Peseta and related Euro negatively impacted revenues by approximately \$579,000. Sales of the product Controlvas(R), which accounted for approximately \$2,208,000 of net sales in 2000, declined to approximately \$60,000 in 2001 as a result of our divestiture of the related drug license during the first quarter of 2001, which resulted in a pre-tax gain of approximately \$4,977,000. Net sales in 2001 included sales of the product Arzimol-TM- totaling approximately \$600,000, which will not continue in 2002 due to termination of our joint marketing agreement with Bristol-Myers Squibb for this product.

GROSS PROFIT. Gross profit increased by 30.8% from \$11,428,000 in 2000 to \$14,949,000 in 2001. The \$3,521,000 increase was the direct result of the growth in our net sales from 2000 to 2001. However, our gross margins for 2001 decreased to 57% compared to gross margins of 61% in the prior year, primarily as a result of the mix of products sold, including the effects of the addition of our new generic product line and disposition of the Controlvas(R) drug license, as well as higher depreciation charges resulting from the recent renovations and improvements at our manufacturing facility. Net sales of Controlvas(R) products contributed approximately \$1,493,000 to gross profit during 2000; however, the divestiture of the Controlvas(R) drug license during the first quarter of 2001 reduced the gross profit contribution from sales of these products to approximately \$41,000, in 2001. Approximately 30% of our net sales during the year ended December 31, 2001 were generic product sales, which typically have lower sales prices and gross margins than branded products. In comparison, we sold no generic drug products during the first three quarters of the prior year. As generic product sales become more significant in the future, gross margins may continue to decrease. Additionally, the Ministry of Health in Spain levies on pharmaceutical companies a tax for the purposes of funding rising healthcare costs in Spain. In 2001, this tax had the effect of reducing gross profit by \$228,000, or one percentage point.

SELLING AND MARKETING EXPENSES. Selling and marketing expenses increased by 39.5% from \$6,494,000 in 2000 to \$9,057,000 in 2001. The \$2,563,000 increase in 2001 was the result of our introduction and support of the launches of new generic drug products. Selling and marketing expenses as a percent of sales, however, declined slightly to 34.3% in 2001 compared to 34.9% in 2000. The three percent decline in the value of the Spanish Peseta and related Euro, in relation to the U.S. Dollar, during the year, had the effect of reducing selling and marketing expenses by \$221,000 in 2001.

GENERAL AND ADMINISTRATIVE EXPENSES. General and administrative expenses increased by 8.5% from \$3,766,000 in 2000 to \$4,085,000 in 2001. The \$319,000 increase in 2001 was the result of increased general and administrative activities required to support our revenue growth in 2001. General and administrative expenses as a percent of sales declined to 15.5% of net sales in 2001 compared to 20.2% of net sales in 2000. The three percent decline in the

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

value of the Spanish Peseta and related Euro, in relation to the U.S. Dollar, during the period, had the effect of reducing general and administrative expenses by \$58,000 in 2001.

20

RESEARCH AND DEVELOPMENT EXPENSES. Research and development expenses increased by 89.1% from \$1,102,000 in 2000 to \$2,084,000 in 2001. The \$982,000 increase in 2001 was the result of an increase in our costs associated with Phase I Clinical Studies (treatment of nail fungal infections), preclinical programs underway in collaboration with universities and with product formulation and testing efforts being performed in the laboratory in our U.S. headquarters and at our facility in Zaragoza, Spain. We are using our U.S. laboratory to develop potential product applications using our drug delivery technologies. The expenditures in research and development, which totaled \$732,000 in the fourth quarter, reflect our focus on projects that are necessary for expansion of our portfolio of marketed products and clinical trials involving our technologies. We expect that our future expenditures for research and development activities will continue to increase as a result of programs that are necessary to advance new applications of our technologies.

DEPRECIATION AND AMORTIZATION EXPENSES. Depreciation and amortization expenses increased by 57.1% from \$580,000 in 2000 to \$911,000 in 2001. The \$331,000 increase in 2001 was the result of increased amortization charges related to our recent acquisition of drug licenses and technologies, including Codeisan(R), (approximately \$289,000) and to a lesser extent, higher depreciation charges with respect to recent asset additions (approximately \$107,000), partially offset by the effect of fluctuations in foreign currency exchange rates (approximately \$13,000). Depreciation and amortization charges are expected to be higher than in 2001 as a result of these acquisitions.

INTEREST INCOME. Interest income decreased by 51.6% from \$347,000 in 2000 to \$168,000 in 2001. The \$179,000 decrease was the result of lower short-term interest bearing investment balances and lower interest rates on the existing investment balances during 2001 compared to 2000.

INTEREST EXPENSE. Interest expense decreased by 44.4% from \$439,000 in 2000 to \$244,000 in 2001. The \$195,000 decrease was the result of the conversion of all outstanding debentures into shares of our common stock in the second quarter of 2000. Interest expense incurred during 2001 resulted primarily from the outstanding balances on lines of credit used for operating purposes and lines of credit and borrowings used to finance the purchase of the product Codeisan(R) and capital equipment and improvements in Spain.

PROVISION FOR INCOME TAXES. We generated additional U.S. federal net operating loss carryforwards in 2001. However, since we are not assured of future profitable domestic operations, we have recorded a valuation allowance for any future benefit of such losses. We recorded a provision for foreign income taxes totaling \$2,452,000 for 2001 as a result of reporting taxable income in Spain (approximately \$607,000) and capital gains tax (approximately \$1,845,000) primarily arising from the sale of Controlvas(R) and Amantadine(R), compared to the provision for foreign income taxes of \$222,000 in the prior year as a result of taxable income earned in Spain. The provision for foreign income taxes would have been \$159,000 higher than reported, absent the three percent decline in the value of the Spanish Peseta and related Euro in relation to the U.S. Dollar during the year.

NET INCOME. We sold the trademarks, registration rights and dossiers for our branded pharmaceutical products, Controlvas(R) and Amantadine(R), for approximately \$5,148,000 and \$114,000, respectively, during 2001, generating pre-tax gains of approximately \$4,977,000 and \$73,000, respectively. Including the \$5,050,000 pre-tax gains on sale of these drug licenses, we reported income

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

from operations of \$3,862,000 for 2001 compared to a loss from operations of \$514,000 in the prior year. Excluding the \$5,050,000 pre-tax gain from the sale of the Controlvas(R) and Amantadine(R) drug licenses, the loss from operations for the year ended December 31, 2001 totaled \$1,188,000. The combination of income from operations of \$3,862,000 and the non-operating items, primarily the provision for income taxes of \$2,452,000, resulted in net income of \$1,361,000, or \$.10 per basic common share (\$.08 per diluted common share) on 14,196,000 weighted average basic common shares outstanding (16,147,000 weighted average diluted common shares outstanding) for 2001, compared to a

21

net loss in the prior year of \$745,000, or \$.06 per basic and diluted common share on 12,981,000 weighted average common shares outstanding.

FISCAL YEAR ENDED DECEMBER 31, 2000 COMPARED TO FISCAL YEAR ENDED DECEMBER 31, 1999

NET SALES. Net sales decreased by 8.1% from \$20,249,000 in 1999 to \$18,617,000 in 2000. The \$1,632,000 decrease was the result of increased generic drug competition that reduced sales of certain of our branded pharmaceutical products and a 16% decline in the value of the Spanish Peseta and related Euro in relation to the U.S. Dollar. The decline in the value of the local currency negatively impacted net sales by \$2,736,000 in 2000, resulting in net sales generated in Spain of \$18,487,000 when expressed in U.S. Dollars. Our Spanish subsidiaries reported an increase in net sales of 5% in local currency for 2000 compared to the prior year. Also impacting net sales was a decision by the Spanish Ministry of Health to suspend from commercialization a class of drugs that included Finedal, a product we previously marketed. Our net sales in 2000 included sales of Finedal totaling approximately \$230,000, while net sales in 1999 included Finedal sales of approximately \$880,000. We do not anticipate any future sales of this product nor do we anticipate incurring any future costs with respect to this product. Net sales in 2000 included \$130,000 related to research and licensing agreements and fees from research and product formulation activities in the U.S.

GROSS PROFIT. Gross margins for 2000 increased to 61.4% compared to 58.3% in the prior year, primarily as a result of the mix of products sold and manufacturing efficiencies realized at our manufacturing facility during 2000 compared to the prior year. However, foreign currency fluctuations during 2000 had the effect of decreasing net sales and the related gross profit by \$376,000, or 3.2%, from \$11,804,000 in 1999 to \$11,428,000 in 2000.

SELLING AND MARKETING EXPENSES. Selling and marketing expenses increased by 5.3% from \$6,166,000 in 1999 to \$6,494,000 in 2000. The \$328,000 increase in 2000 was the result of selling and marketing efforts to maintain and grow market share. Selling and marketing expenses, as a percent of net sales, increased to 34.9% in 2000 from 30.5% in 1999. Selling and marketing expenses, as reported in U.S. Dollars, were approximately \$1,012,000 lower than would have been reported as a result of the 16% decline in the value of the Spanish Peseta and related Euro in relation to the U.S. Dollar during the period.

GENERAL AND ADMINISTRATIVE EXPENSES. General and administrative expenses decreased by 1.3% from \$3,816,000 in 1999 to \$3,766,000 in 2000. The \$50,000 decrease was the result of a decline in the value of the Spanish Peseta and related Euro. General and administrative expenses, as reported in U.S. Dollars, were approximately \$274,000 lower than would have been reported as a result of the 16% decline in the value of the Spanish Peseta and related Euro in relation to the U.S. Dollar during the period. General and administrative expenses as a percent of net sales, increased from 18.8% in 1999 to 20.2% in 2000.

RESEARCH AND DEVELOPMENT EXPENSES. Research and development expenses

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

increased by 60.9% from \$685,000 in 1999 to \$1,102,000 in 2000. The \$417,000 increase was the result of costs associated with conducting clinical trials, preclinical programs and product formulation and testing efforts.

DEPRECIATION AND AMORTIZATION EXPENSES. Depreciation and amortization expenses increased by 3.8% from \$559,000 in 1999 to \$580,000 in 2000. The \$21,000 increase was the result of higher depreciation charges related to renovations and improvements in our manufacturing facility and our U.S. laboratory and higher amortization charges for recently acquired drug licenses and technologies, partially offset by the effect of fluctuations in foreign currency exchange rates.

22

INTEREST INCOME. Interest income increased by 42.2% from \$244,000 in 1999 to \$347,000 in 2000. The \$103,000 increase was the result of higher short-term interest bearing investment balances and higher interest rates earned on the investment balances during 2000 as compared to 1999.

INTEREST EXPENSE. Interest expense decreased by 62.4% from \$1,168,000 in 1999 to \$439,000 in 2000. The \$729,000 decrease was the result of the conversion into common stock of our 12% Senior Subordinated Debentures in the second quarter of 2000. Interest expense incurred during the nine months ended December 31, 2000 resulted primarily from the outstanding balances on lines of credit used for operating purposes and lines of credit and borrowings used to fund the purchase of the product Codeisan(R), in Spain, during the third and fourth quarters of 2000. We financed approximately \$4,900,000 of the purchase, using short-term lines of credit and long-term borrowings. We used a portion of the deposit that we received from the sale of the trademark, registration rights and dossier for our branded pharmaceutical product, Controlvas(R), to reduce short-term borrowings during the fourth quarter of 2000.

PROVISION FOR INCOME TAXES. We generated additional U.S. federal net operating loss carryforwards in 2000. However, since we are not assured of future profitable domestic operations, we have recorded a valuation allowance for any future benefit of such losses. We recorded a current provision for foreign income taxes totaling \$222,000 for 2000 as a result of taxable income earned in Spain, compared to \$781,000 in the same period of the prior year. The provision for foreign income taxes would have been \$31,000 higher than reported, absent the 16% decline in the value of the Spanish Peseta and related Euro in relation to the U.S. Dollar during the period.

NET INCOME. We reported a loss from operations of \$514,000 for 2000 compared to income from operations of \$578,000 in the prior year. The impact of non-operating items, primarily interest income of \$347,000, interest expense of \$439,000 and the resulting provision for income taxes of \$222,000 resulted in a net loss of \$745,000, or \$.06 per basic and diluted common share (12,981,000 weighted average common shares outstanding) for 2000, compared to the net loss in the prior year, of \$1,090,000, or \$.12 per basic and diluted common share (9,147,000 weighted average common shares outstanding).

SELECTED QUARTERLY FINANCIAL DATA

The following table sets forth certain operating data for our last eight quarters. We have derived this data from our unaudited quarterly financial statements.

THREE MONTHS ENDED (UNAUDITED)

FISCAL 2000

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

	3/31/00	6/30/00	9/30/00	12/31/00	3/31/01

(1) Includes pre-tax gain of approximately \$4,977,000 related to the sale of the Controlvas(R) drug license.

23

LIQUIDITY AND CAPITAL RESOURCES

Our total assets increased from \$28,877,000 at December 31, 2000 to \$32,119,000 at December 31, 2001, while stockholders' equity increased from \$17,816,000 at December 31, 2000 to \$20,424,000 at December 31, 2001. The increase in stockholders' equity reflects primarily the net income of \$1,361,000 in 2001, and net proceeds from the exercise of stock options and warrants totaling \$1,827,000, partially offset by the negative impact of the fluctuation of the Spanish Peseta and related Euro exchange rate of \$842,000 in 2001.

Our working capital increased from \$3,742,000 at December 31, 2000 to \$6,276,000 at December 31, 2001, primarily as a result of collection of the remainder of the cash due upon the sale of the product Controlvas(R) (approximately \$2,582,000), most of which was used to reduce short-term and long-term borrowings, the recognition of deferred income of approximately \$2,564,000 related to the sale of Controlvas(R), and net proceeds received from the exercise of stock options and warrants totaling \$1,827,000 during 2001.

Cash and cash equivalents increased from \$4,816,000 at December 31, 2000 to \$5,736,000 at December 31, 2001, as a result of net cash generated by investing activities of \$744,000, which included proceeds received from the sale of the Controlvas(R) drug license (approximately \$2,582,000) partially offset by additions to fixed assets of approximately \$1,595,000 and additions to drug licenses of approximately \$437,000. Cash and cash equivalents also increased as a result of proceeds from the exercise of stock options and warrants (approximately \$1,827,000), which was partially offset by net repayments of borrowings (approximately \$1,704,000).

Receivables increased from \$5,135,000 at December 31, 2000 to \$6,937,000 at December 31, 2001 as a direct result of sales growth. Receivables increased by approximately \$2,222,000 in local currency, but fluctuations in foreign currency exchange rates offset the increase by approximately \$344,000. We have not experienced any material delinquencies on our receivables. Inventories increased from \$1,827,000 at December 31, 2000 to \$2,563,000 at December 31, 2001 primarily as a result of raw materials purchases in anticipation of demand for our generic products.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

The combined total of accounts payable and accrued expenses increased from \$3,613,000 at December 31, 2000 to \$7,310,000 at December 31, 2001, primarily due to accruals for social security taxes payable, salaries payable and taxes payable (approximately \$866,000), as well as for inventory purchases (approximately \$1,445,000), additions to fixed assets (approximately \$322,000) and reserves for potential sales returns (approximately \$402,000), partially offset by the effect of fluctuations in foreign currency exchange rates (approximately \$472,000).

Short-term borrowings and current portion of long-term debt decreased from \$3,185,000 at December 31, 2000 to \$1,757,000 at December 31, 2001, as a result of utilizing proceeds from the sale of the product Controlvas(R) to reduce balances outstanding, combined with the effect of fluctuations in foreign currency exchange rates, partially offset by additional borrowings during the year ended December 31, 2001 to finance capital expenditures at our manufacturing plant in Spain and working capital needs. The weighted average interest rate on our short-term borrowings is 5.9%.

Long-term debt, which totaled \$623,000 at December 31, 2000, was reduced to zero during the year ended December 31, 2001 as a result of using proceeds from the sale of Controlvas(R) to reduce the outstanding balance and was subsequently increased to \$214,000 as of December 31, 2001 as a result of a Government-sponsored loan program in Spain, whereby a non-interest bearing loan has been provided for product development. We have recorded a discount on the obligation of \$72,000 using an imputed interest rate of 6%. The discount will be amortized to interest expense over the ten-year term of the loan.

24

In addition to our short-term borrowings and long-term debt, we have fixed contractual obligations under various lease agreements. Our contractual obligations were comprised of the following as of December 31, 2001:

		PAYMENTS DUE BY PER		
		LESS		
CONTRACTUAL OBLIGATIONS	TOTAL	THAN 1	1-3	4-6
-----	-----	YEAR	YEARS	YEARS
		-----	-----	-----
(IN THOUSANDS)				
Short-term borrowings.....	\$1,757	\$1,757	\$ --	\$ --
Long-term debt, including imputed interest of				
\$72,000.....	214	--	30	92
Operating leases.....	2,945	736	2,117	92
	-----	-----	-----	-----
Total contractual cash obligations.....	\$4,916	\$2,493	\$2,147	\$184
	-----	-----	-----	-----

Operating activities for the year ended December 31, 2001 provided net cash of \$139,000. Investing activities, primarily the proceeds from the sale of drug licenses (\$2,698,000), partially offset by additions to machinery and equipment and capital improvements to our facilities in Spain and the U.S. (\$1,595,000) and the purchase of drug licenses (\$437,000) provided net cash of \$744,000 during the year ended December 31, 2001. Financing activities, primarily proceeds from the exercise of stock options and warrants (\$1,827,000), partially offset by net repayments of borrowings (\$1,704,000) provided net cash of \$122,000 during the year ended December 31, 2001.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

SEASONALITY, EFFECT OF INFLATION AND LIQUIDITY. In the past, we have experienced lower sales in the third calendar quarter and higher sales in the fourth calendar quarter due to seasonality. As we market more pharmaceutical products whose sales are seasonal, seasonality of sales may become more significant. Neither inflation nor changing prices has materially impacted our net sales or income from operations for the periods presented. We expect to have sufficient liquidity to fund operations for at least the next twelve months. We continue to explore alternative sources for financing our business activities, including the possibility of public and/or private offerings of our securities. In appropriate situations, that will be strategically determined, we may seek financial assistance from other sources, including contribution by others to joint ventures and other collaborative or licensing arrangements for the development, testing, manufacturing and marketing of products under development.

MARKET RISK

FOREIGN CURRENCY. A substantial amount of our business is conducted in Europe and is therefore influenced to the extent to which there are fluctuations in the U.S. Dollar's value against other currencies, specifically the Euro and the Spanish Peseta. On January 1, 1999, the Euro became the official currency of European Union (EU) member states with a fixed conversion rate against their national currencies. The value of the Euro against the U.S. Dollar and all other currencies, including the EU member states that are not participating in the Euro zone, will fluctuate according to market conditions. The permanent value of one Euro in Spain was fixed at 166.386 Spanish Pesetas. The exchange rate at December 31, 2001 and 2000 was 186.93 Spanish Pesetas (1.12 Euros) and 178.02 Spanish Pesetas (1.07 Euros) per U.S. Dollar, respectively. The weighted average exchange rate for the years ended December 31, 2001 and 2000 was 185.93 Spanish Pesetas (1.12 Euros) and 180.66 Spanish Pesetas (1.09 Euros) per U.S. Dollar, respectively. The effect of foreign currency fluctuations on long lived assets for the year ended December 31, 2001 was a decrease of \$842,000 and the cumulative historical effect was a decrease of \$3,470,000, as reflected in our Consolidated Balance Sheets as accumulated other comprehensive loss. Although exchange rates fluctuated significantly in recent years, including, the weakening of the Euro in relation to the U.S. Dollar in 1999, 2000 and the first six months of 2001, we do not believe that the effect of foreign currency fluctuation is material to our results of operations as the expenses related to much of our foreign currency revenues are in the same

25

currency as such revenues. However, the carrying value of assets and reported values can be materially impacted by foreign currency translation, as can the translated amounts of net sales and expenses.

We have relied primarily upon financing activities to fund our operations in the U.S. In the event that we are required to fund U.S. operations or cash needs with funds generated in Spain, currency rate fluctuations in the future could have a significant impact on us. However, at the present time, we do not anticipate altering our business plans and practices to compensate for future currency fluctuations.

INTEREST RATES. The weighted average interest rate on our short-term borrowings is 5.9% and the balance outstanding is \$1,757,000 as of December 31, 2001. Our long-term borrowings are non-interest bearing and the balance outstanding at December 31, 2001 is \$214,000 including imputed interest (at 6.0%) of \$72,000. The effect of an increase in the interest rate of one hundred basis points (to 6.9% on short-term borrowings and to 7.0% on long-term

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

borrowings) would have the effect of increasing interest expense by approximately \$20,000 annually.

CRITICAL ACCOUNTING POLICIES

Our significant accounting policies are more fully described in Note 2 to our consolidated financial statements. However, certain of our accounting policies are particularly important to the portrayal of our financial position and results of operations and require the application of significant judgment by our management; as a result they are subject to an inherent degree of uncertainty. In applying those policies, our management uses its judgment to determine the appropriate assumptions to be used in the determination of certain estimates. Those estimates are based on our historical experience, terms of existing contracts, our observance of trends in the industry, information provided by our customers and information available from other outside sources, as appropriate. Our significant accounting policies include:

- INVENTORIES. Inventories are stated at the lower of cost or market, cost being determined on the first-in, first-out method. Reserves for slow moving and obsolete inventories are provided based on historical experience and current product demand. We evaluate the adequacy of these reserves quarterly.
 - REVENUE RECOGNITION AND ACCOUNTS RECEIVABLE. Revenue on product sales is recognized when persuasive evidence of an arrangement exists, the price is fixed and final, delivery has occurred and there is a reasonable assurance of collection of the sales proceeds. We generally obtain oral or written purchase authorizations from our customers for a specified amount of product at a specified price and consider delivery to have occurred at the time of shipment. We provide our customers with a limited right of return. Revenue is recognized at shipment and a reserve for sales returns is recorded. We have demonstrated the ability to make reasonable and reliable estimates of product returns in accordance with SFAS No. 48 and of allowances for doubtful accounts based on significant historical experience. Revenue from service sales is recognized when the service procedures have been completed or applicable milestones have been achieved. Revenue from research and development contracts is recognized over applicable contractual periods or as defined milestones are attained, as specified by each contract and as costs related to the contracts are incurred.
 - FOREIGN CURRENCY TRANSLATION. The financial position and results of operations of our foreign subsidiaries are measured using local currency as the functional currency. Assets and liabilities of each foreign subsidiary are translated at the rate of exchange in effect at the end of the period. Revenues and expenses are translated at the average exchange rate for the period. Foreign currency translation gains and losses not impacting cash flows are credited to or charged against other comprehensive income (loss). Foreign currency translation gains and losses arising from cash transactions are credited to or charged against current earnings.
- 26
- DRUG LICENSES AND RELATED COSTS. Drug licenses and related costs incurred in connection with acquiring licenses, patents and other proprietary rights related to our commercially developed products are capitalized. Capitalized drug licenses and related costs are being amortized on a straight-line basis over fifteen years from the dates of acquisition. Carrying values of such assets are reviewed quarterly and are adjusted for any diminution in value.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

NEW ACCOUNTING STANDARDS

In June 1998, the Financial Accounting Standards Board issued SFAS No. 133, ACCOUNTING FOR DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES. The new standard, which was adopted on January 1, 2001, requires that all companies record derivatives on the balance sheet as assets or liabilities, measured at fair value. Gains or losses resulting from changes in the values of those derivatives are accounted for depending on the use of the derivative and whether it qualifies for hedge accounting. The adoption of this standard on January 1, 2001 had no impact on our financial position or results of operations.

In June 2001, the Financial Accounting Standards Board issued SFAS No. 141, BUSINESS COMBINATIONS, and SFAS No. 142, GOODWILL AND OTHER INTANGIBLE ASSETS. SFAS No. 141 supersedes APB No. 16, BUSINESS COMBINATIONS, and SFAS No. 38, ACCOUNTING FOR PREACQUISITION CONTINGENCIES OF PURCHASED ENTERPRISES and requires that all business combinations be accounted for by a single method--the purchase method. SFAS No. 141 also provides guidance on the recognition of intangible assets identified in a business combination and requires enhanced financial statement disclosures. SFAS No. 142 adopts a more aggregate view of goodwill and bases the accounting for goodwill on the units of the combined entity into which an acquired entity is integrated. In addition, SFAS No. 142 concludes that goodwill and intangible assets that have indefinite useful lives will not be amortized but rather will be tested at least annually for impairment. Intangible assets that have finite lives will continue to be amortized over their useful lives. SFAS No. 141 is effective for all business combinations initiated after June 30, 2001. The adoption of SFAS No. 142 is required for fiscal years beginning after December 15, 2001 (the year 2002 for us), except for the nonamortization and amortization provisions which are required for goodwill and intangible assets acquired after June 30, 2001. We believe that the adoption of SFAS No. 141 and SFAS No. 142 will not have a material impact on our financial position or results of operations.

In October 2001, the Financial Accounting Standards Board issued SFAS No. 144 ACCOUNTING FOR THE IMPAIRMENT OR DISPOSAL OF LONG-LIVED ASSETS. SFAS No. 144 supersedes previous guidelines for financial accounting and reporting for the impairment or disposal of long-lived assets and for segments of a business to be disposed of. We believe that the adoption of SFAS No. 144 will not have a material impact on our financial position or results of operations.

27

BUSINESS

OVERVIEW

We are a specialty pharmaceutical company focused on advanced drug delivery technologies and pharmaceutical products. We have U.S. and international patent and other proprietary rights to technologies that enhance or facilitate the absorption of drugs across membranes of the skin, mouth, nose, vagina and eye. We are developing products incorporating these technologies and seek to form strategic alliances with major pharmaceutical and biotechnology companies to facilitate the development and commercialization of our products. We currently have strategic alliances regarding our drug delivery technologies with Pfizer Inc and Auxilium Pharmaceuticals, Inc. and are in preliminary discussions with a number of other pharmaceutical companies to form additional alliances.

We have a significant commercial presence in Spain, where we manufacture and market more than 100 pharmaceutical products, representing various dosage strengths and product formulations of more than 30 chemical entities. Our product line consists of generic and branded products within four primary

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

therapeutic areas: cardiovascular, gastrointestinal, infectious and neurological diseases. Additionally, we have a strategic alliance with Teva Pharmaceutical Industries Ltd. granting us the right to register and market in Spain more than 75 of Teva's pharmaceutical products through our sales force of approximately 150 full-time personnel located in major cities throughout Spain.

INDUSTRY OVERVIEW

DRUG DELIVERY INDUSTRY

Drug delivery companies develop technologies to improve the administration of therapeutic compounds. These technologies are designed to enhance safety, efficacy, ease-of-use and patient compliance with prescribed therapy. Drug delivery technologies provide opportunities for pharmaceutical and biotechnology companies to extend their drug franchises as well as develop new and innovative products. The worldwide market for drug delivery systems was estimated to be \$35 billion in 2000 and is projected to increase to \$75 billion by 2005.

The vast majority of the drugs currently on the market are taken orally or are administered by injection. Oral drug delivery methods, while simple to use, typically subject drugs to first-pass metabolism in the body, which results in drug degradation in the stomach and further neutralization in the liver before reaching the bloodstream. In order to achieve efficacy, higher drug dosages are often used, with increased risks of side effects. The injection of pharmaceuticals, while avoiding first-pass metabolism in the body, also has major limitations, including pain, which can lead to decreased patient acceptance and compliance with prescribed therapy. A decline in patient compliance can increase the risk of medical complications and lead to higher healthcare costs. Also, the costs of injectable drugs typically are higher as a result of the additional costs associated with medical personnel to administer the injections and the costs associated with the purchase and disposal of syringes.

Pharmaceutical and biotechnology companies look to drug delivery enhancements as a way of gaining a competitive advantage. Alternative drug delivery technologies, which avoid first-pass metabolism and are less invasive, are often sought by pharmaceutical and biotechnology companies to extend the period of market exclusivity for a branded drug and thus postpone competition from generic drugs. In order to maintain the competitiveness of their proprietary drug candidates, large pharmaceutical companies seek delivery enhancements that will increase safety and efficacy, reduce side effects and make administration more convenient. Further, drug delivery companies can apply their technologies to off-patent products to formulate their own proprietary products, which they often commercialize by seeking marketing collaborations with larger pharmaceutical companies that have greater capabilities and resources.

Developing safer and more efficacious ways of delivering existing drugs generally is less risky than attempting to discover new drugs, because of the lower product development cost. On average, it takes 15 years for an experimental new drug to progress from the laboratory to commercialization in the U.S., with an average cost of approximately \$500 million. Typically, only one in 5,000 compounds entering preclinical testing advances into human testing and only one in five tested in humans is approved. By contrast, drug delivery companies typically target drugs that already have been approved, have a track record of safety and efficacy and have established markets for which there is a proven medical need. Consequently, clinical trials related to drug delivery technologies applied to previously-approved pharmaceuticals need only show that carrier technologies deliver the drug without harming the patient or changing the clinical attributes of the drug.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

MARKET OVERVIEW OF EUROPE AND SPAIN

The European Union, with an increasingly affluent population of approximately 375 million people, represents the second largest pharmaceutical market in the world with approximately \$75 billion in pharmaceutical sales in 2000, according to IMS Health. Healthcare expenditures in Western Europe, as in the U.S., are growing at a rate faster than the overall economy and drug expenditures as a percentage of total gross domestic product are lower than the 2.3% in the U.S., according to IMS Health.

With Spain's entry into the European Union in 1986, the Spanish pharmaceutical market has been evolving steadily into a market that is increasingly similar to those of other countries in Western Europe and the U.S. With a population of approximately 40 million, Spain was ranked in 1999 as the seventh largest pharmaceutical market in the world. Pharmaceutical sales in Spain reached approximately \$6.6 billion in 1999 and are expected to grow to more than \$10 billion by 2005, according to IMS Health.

Over the last decade, there has been significant evolution of patent and similar protections of pharmaceutical products in Spain. Prior to 1992, manufacturing processes for active pharmaceutical ingredients could be patented, but active pharmaceutical ingredients could not be patented as products. Commencing in late 1992, active ingredients may be patented with protection running for 20 years from the date of application. This was followed by legislation in December 1996 that created a legal class of generic pharmaceuticals. Generic products are required to be therapeutically equivalent, have a similar composition to that of the original branded product and demonstrate their safety and efficacy. Safety and efficacy is presumed if the original reference product has been commercialized in Spain for 10 years. Generic products also must comply with product labeling requirements and be priced at a discount, typically 20-30%, to the price of the original branded product.

Although comprising less than three percent of the Spanish pharmaceutical market, generic pharmaceuticals are expected to significantly increase their market penetration due to increases in drug usage driven by an aging population and opportunities to launch new generic products as patents expire for blockbuster drugs. Several initiatives are underway by the Spanish government, including education, financial incentives to prescribing physicians and public campaigns to stimulate the use of generic pharmaceuticals in response to the rise in healthcare costs.

29

OUR STRATEGY

Our primary objective is to be a leading specialty pharmaceutical company focused on advanced drug delivery and formulation technologies to improve the effectiveness of new and existing pharmaceuticals, while expanding our generic and branded operations in Spain and Europe. Our strategy to accomplish this objective includes the following:

FOCUS ON MARKETING AND COMMERCIALIZING OUR CPE-215 PERMEATION ENHANCEMENT PLATFORM TECHNOLOGY

Our CPE-215 technology enhances the absorption of drugs across membranes of the skin, mouth, nose, vagina and eye. Our CPE-215 technology can be incorporated into a wide variety of pharmaceutical formats and products, including those formulated as creams, ointments, gels, solutions, lotions, sprays or patches. CPE-215 has a record of safety in humans as a food additive and fragrance. In addition, preclinical testing to date on CPE-215 as a drug

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

delivery enhancement has further indicated its safety. We believe that this past experience with CPE-215 may result in reduced preclinical development time relating to its use in new formulations of previously approved compounds. We market our CPE-215 technology to major pharmaceutical and biotechnology companies whose products we believe would benefit from its permeation enhancement properties.

These benefits include:

- improving efficacy relative to oral administration, which subjects the drug to first-pass metabolism;
- extending the period of market exclusivity for a branded compound based on the grant of a patent that incorporates new drug delivery methods;
- allowing branded and generic drug companies to differentiate their products from those of competitors;
- improving utilization of costly and/or scarce drugs and active ingredients;
- expanding the market to patients less suitable for injection, especially children and the elderly; and
- improving patient convenience and compliance, and lowering costs relative to a doctor's office visit for an injection.

We currently have a research licensing agreement with Pfizer and a royalty-based license agreement with Auxilium and are in preliminary discussions with other pharmaceutical companies to commercialize our technologies across a wide range of pharmaceutical applications.

DEVELOP PROPRIETARY PRODUCTS BASED ON OUR TECHNOLOGIES

We apply our drug delivery and oral drug formulation technologies to improve the performance of existing pharmaceutical products with respect to their method of delivery and effectiveness. We also may be able to reduce manufacturing costs for certain products as a result of our proprietary manufacturing process, which permits improved purity, stability and production yields.

In addition to marketing our CPE-215 technology to pharmaceutical companies for application with their branded or generic products, we selectively apply this technology to our own development of certain products. We target compounds with established market demand or that face limited market acceptance as a result of inferior drug delivery methods. As an illustration of this strategy, we currently are completing Phase I/II clinical trials for the treatment of nail fungus infections and currently are engaged in preliminary negotiations with several pharmaceutical companies to continue the development of and to commercialize the product.

30

Also, as part of this strategy, we have developed and filed a patent for improved oral dosage forms of acetaminophen, and improved manufacturing of omeprazole and lansoprazole. In the case of acetaminophen, we believe that we have developed dosages that result in increased solubility in water for administration to patients who have difficulty swallowing pills, faster relief of pain and inflammation and better taste. With respect to omeprazole and lansoprazole, we believe that we have created an improved method of manufacture, requiring less time and producing higher purity amid better stability.

Once we have brought our internally developed products to an advanced stage

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

of development, we intend to develop collaborative relationships that leverage the clinical development and marketing and sales capabilities of our strategic partners. We believe that this will allow us to license our products on terms that are more favorable than those that would be possible earlier in the development cycle. In Spain we may directly market these new products through our existing sales force. We also seek to manufacture and supply our pharmaceutical partners with the products they have licensed from us.

INCREASE OUR PRODUCT SALES THROUGH TARGETED PROMOTION AND EXPANSION OF OUR PRODUCT PORTFOLIO

We plan to expand our portfolio of products in Spain through the acquisition of currently marketed and late stage pharmaceutical products, as well as through strategic alliances with other pharmaceutical and biotechnology companies. We intend to directly promote and sell these products in Spain through our own sales force of approximately 150 full-time personnel located in major cities throughout Spain.

We focus on obtaining the rights to pharmaceutical products that are less actively promoted by larger pharmaceutical companies or are in a late stage of development and have good potential for acceptance in our markets. We believe that we have expertise in assessing potential market opportunities related to particular pharmaceuticals and in negotiating and acquiring from pharmaceutical companies the rights to market pharmaceuticals in Spain and other countries. Products that already are selling in the U.S. or other major markets demonstrate commercial viability and typically encounter fewer barriers to regulatory approval for introduction into other countries. The acquisition and subsequent manufacture of these products will permit our Spanish operations to more fully utilize our existing manufacturing capacity and allow us to further leverage our sales force by giving them more products to sell. We believe that we have developed particular expertise in marketing pharmaceutical products to physicians and pharmacies in Spain.

In July 2000, we entered into a strategic alliance with Teva, a world leader in generic pharmaceutical products, pursuant to which we were granted a royalty-free non-exclusive license to register and sell more than 75 finished pharmaceutical products representing more than 25 different chemical entities. Under this license agreement, we will register each product with Spain's Ministry of Health.

31

PRODUCTS IN DEVELOPMENT

The following are products that we are currently developing. Before they are commercialized, they must be approved by regulatory authorities, such as the FDA or Spanish Ministry of Health, in each jurisdiction where they will be marketed or sold.

PRODUCT CANDIDATE -----	TECHNOLOGY -----	USED TO TREAT -----	STATUS -----
Topical testosterone gel	CPE-215	Hypogonadism	New Drug Application
Improved acetaminophen	Solubility Enhancement	Pain relief	Bioequival

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Antifungal nail lacquer	CPE-215	Onychomycosis	Phase I/II
Androgenic steroid therapy	CPE-215	Chronic Fatigue Syndrome; Fibromyalgia	Pilot stud
Intranasal insulin	CPE-215	Diabetes	Preclinica
Intranasal pain management	CPE-215	Pain relief	Preclinica
Topical hormonal therapy	CPE-215	Osteoporosis; Erectile Dysfunction	Preclinica

TOPICAL TESTOSTERONE GEL

Testosterone replacement therapy is used to treat men whose bodies produce insufficient amounts of testosterone (Hypogonadism), which can be a natural result of aging. Symptoms associated with low testosterone levels in men include depression, decreased libido, erectile dysfunction, muscular atrophy, loss of energy, mood alterations, increased body fat and reduced bone density. Currently marketed hormone replacement therapies involve delivery of hormones by injections, through transdermal patches and by gels. Injection therapy has major limitations, including pain, which can lead to decreased patient acceptance and compliance with prescribed therapy. Although patches have been able to alleviate many of the gastrointestinal side effects associated with oral delivery of hormones, patches, even in their smallest form, are often conspicuous and typically result in skin irritation or inaccurate dosing should the patch fall off. The transdermal delivery of hormones through gels, creams and lotions provides commercially attractive and efficacious alternatives to current methods of delivery. As more baby-boomers enter middle age and more attention is focused on male hormonal deficiencies, the worldwide testosterone replacement market is expected to reach \$1 billion by 2005.

In May 2000, we entered into a research services agreement with Auxilium to develop and test various pharmaceutical compositions of topical testosterone using our CPE-215 technology. A license of our technology to Auxilium became effective in September 2000. Phase III clinical trials performed by Auxilium for approval in the U.S. have been completed and a New Drug Application has been submitted to the FDA. Under the license, we granted to Auxilium a sole and exclusive, royalty-based license worldwide to develop, market and sell a topical testosterone product using our CPE-215 technology.

IMPROVED ACETAMINOPHEN

We have developed and patented improved oral formulations of acetaminophen, the active ingredient in such products as McNeil Consumer Healthcare's Tylenol(R) line of products commonly used for controlling pain, fever and inflammation. Our improved oral formulations of acetaminophen make it highly dispersible, rapidly soluble in water, better tasting and faster in reaching peak blood levels. These characteristics give our oral formulations superior properties over other currently marketed products, which do not dissolve easily in water and may cause bitter taste and flatulence.

These improvements are particularly useful for treating children, the elderly, and those who have difficulty swallowing pills. Clinical studies in Europe

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

documenting the product's improved dissolution and absorption were completed in 2001. We currently are conducting bioequivalency studies, which compare the rate and extent of absorption and levels of concentration in the blood stream of our improved oral formulations needed to produce a therapeutic effect, with other formulations of acetaminophen that previously have been approved by the FDA. We also are in preliminary discussions with potential collaborators in Europe, Asia and the United States to license and market this product.

ANTIFUNGAL NAIL LACQUER

We have developed a new topical nail lacquer for treating fingernail and toenail fungal infections (Onychomycosis). We believe that our product is an improvement over oral therapies, which can cause liver damage, and other topical treatments that typically have low levels of efficacy. We currently are conducting Phase I/II clinical trials for the treatment of nail fungal infections in the hands and feet at the University of Alabama at Birmingham. According to the National Onychomycosis Society, nail fungus affects almost 30 million people, primarily between the ages of 40 and 65. Patients electing to take oral therapy must undergo blood monitoring during the course of treatment to monitor for liver damage. The cost of oral therapy is in excess of \$500 for a twelve-week treatment regimen, not including physician costs or other periodic monitoring costs.

ANDROGENIC STEROID THERAPY

We are developing a topical therapy utilizing androgenic steroids, which may incorporate our CPE-215 technology, for the treatment of Chronic Fatigue Syndrome and Fibromyalgia. The manifestations of Chronic Fatigue Syndrome are continuous exhaustion, muscle pain, cognitive disorientation and various other physical or psychological symptoms. Chronic Fatigue Syndrome has not received a high degree of publicity since it is often improperly diagnosed and lacks proven therapies. Chronic Fatigue Syndrome is recognized by the National Institutes of Health, the FDA and the Social Security Administration as a serious, disabling affliction. A study by DePaul University estimates that as many as 800,000 people in the U.S. suffer from this condition and that it is approximately three times more common in women than in men.

According to the National Census Bureau and Dartmouth Medical School, Fibromyalgia afflicts six to eight million people. Fibromyalgia primarily affects women between the ages of 40 and 60 with symptoms of muscle pain, fatigue, chronic headache and sleeplessness and has been estimated to strike as many as five percent of peri/postmenopausal women. A preliminary study conducted by Dartmouth scientists indicates that Fibromyalgia patients demonstrated improved muscle function, higher energy levels and restorative sleep in response to androgenic steroid therapy. We have licensed from Dartmouth College their exclusive U.S. patent rights covering the novel use of androgenic steroid therapy for treating Chronic Fatigue Syndrome and Fibromyalgia. In 2001, a pilot study of this therapy was initiated in female volunteers at the Dartmouth Medical Center.

INTRANASAL INSULIN

We are developing intranasal formulations of insulin to treat patients suffering from Type I and Type II diabetes. Based on preclinical studies at various universities, we believe our intranasal insulin formulation can achieve higher levels of bioavailability compared to other drug delivery systems currently being developed and of which we are aware. Our product is designed to deliver insulin through a small, discreet metered nasal spray that can be carried in a patient's pocket. We currently are in preclinical development in collaboration with an independent clinical research organization and the University of New Hampshire in preparation for a pilot study.

Diabetes is a metabolic disorder affecting approximately 100 million people worldwide that is projected to affect more than 300 million people worldwide in the next 25 years. The market for insulin treatment of diabetes in the United States is estimated at \$1.25 billion annually and Frost & Sullivan estimates that the worldwide market is estimated at \$3 billion. Diabetic patients who must endure frequent injections prefer less invasive methods of administering their medications. Alternative and more desirable methods of delivery would not only improve their quality of life but also would contribute to patient compliance with prescribed therapy.

INTRANASAL PAIN MANAGEMENT

Many people suffer from chronic moderate to severe pain that is related to cancer, back problems and orthopedic injury. These people also may experience intermittent flares of pain that can occur even though a person is taking analgesic medications on a fixed schedule for pain control. A severe flare of pain is called breakthrough pain because the pain breaks through the regular pain medication. About one-half to two-thirds of patients with chronic cancer-related pain also experience episodes of breakthrough cancer pain. Generally, breakthrough pain occurs without prior onset symptoms and may last anywhere from seconds to minutes or hours. The U.S. prescription market for the treatment of moderate to severe pain, including breakthrough pain, is approximately \$2 billion annually.

We are developing an intranasal pain product using our CPE-215 technology with a chemical agent that is widely used for the relief of acute and chronic moderate to severe pain and that commonly is prescribed for pain associated with cancer. Orally delivered pain products may not provide rapid relief and typically demonstrate considerable patient-to-patient variability in absorption. Injectable formulations of pain products provide rapid and effective pain relief, but administration often requires professional assistance or hospitalization. Our intranasal pain product is in preclinical development for the treatment of chronic pain and acute episodes of chronic pain. We believe our intranasal pain product would provide significant medical benefits over oral and injectable formulations as it combines patient convenience and ease of use with the rapid onset of pain relief and the same potency as injectable delivery routes.

We have signed a research agreement with Auxilium pursuant to which we will develop and test the intranasal delivery of a pain management chemical agent using our CPE-215 technology. As part of our strategic alliance with Auxilium, upon Auxilium's acceptance of our preclinical studies, we will grant to them a worldwide license to develop, market and sell the products using our CPE-215 technology.

TOPICAL HORMONAL THERAPY

Osteoporosis is a disease characterized by low bone mass and structural deterioration of bone tissue, leading to bone fragility and increased susceptibility to fractures of the hip, spine and wrist. According to the National Osteoporosis Foundation, two million American men have Osteoporosis, and another three million are at risk for this disease. We believe that our topical hormonal therapies, incorporating our CPE-215 technology, have the potential to effectively treat Osteoporosis in men, without the gastrointestinal side effects of the leading oral treatments.

Erectile Dysfunction is defined as the inability to achieve and/or maintain an erection adequate for satisfactory sexual function. Approximately 30 million

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

men in the U.S. and 150 million men worldwide suffer from Erectile Dysfunction. The condition is correlated with increasing age, cardiovascular disease, hypertension, diabetes, hyperlipidemia and smoking. The leading treatments include oral preparations, which have been associated with a slow onset of action and drug interactions, as well as injections, which can cause pain when administered. We believe that our topical hormonal therapies, incorporating our CPE-215 technology, have the potential to effectively treat Erectile Dysfunction, without the side effects of the leading treatments.

34

Our topical hormonal therapy incorporates the use of metabolic steroids that regulate most of the hormonal action in adult males. Hormone replacement therapies using these metabolic steroids, including testosterone and dihydrotestosterone, may have significant benefits in treating a number of medical afflictions in men, including Osteoporosis and sexual dysfunction. We have signed a research agreement with Auxilium pursuant to which we will provide various topical formulations of the hormones incorporating our CPE-215 technology. Auxilium is evaluating our formulations and plans to perform appropriate preclinical studies. As part of our strategic alliance with Auxilium, upon Auxilium's acceptance of preclinical studies, we will grant to them a worldwide license to develop, market and sell topical hormonal therapies containing our CPE-215 technology to treat Osteoporosis in men and Erectile Dysfunction.

STRATEGIC PARTNERS

PFIZER

In October 2001, we entered into a research collaboration with Pfizer in which we were granted a non-exclusive worldwide royalty-free license to use Pfizer's compounds and technology to assess the performance of our CPE-215 technology with Pfizer's compounds. As part of the agreement, we granted to Pfizer the non-exclusive right to test the ability of our CPE-215 technology to enhance delivery of certain compounds proprietary to Pfizer. Pfizer is providing the funding necessary to conduct these studies using our CPE-215 technology and has agreed to provide additional funding for costs of further studies that are approved by a joint working committee consisting of designees of Pfizer and us. Pfizer has agreed to inform us if, following completion of the research, it is interested in further development of the formulations. The term of the agreement is the greater of one year or until work under the agreement has been completed. Pfizer would have to enter into a separate license agreement with us with respect to the manufacture, use, sale, offer for sale and import of the products using our CPE-215 technology before it could begin to distribute, market and sell these products.

AUXILIUM

In May 2000, we entered into a research agreement with Auxilium to develop and test the application of our CPE-215 technology with respect to the transdermal delivery of testosterone. Auxilium is an emerging therapeutic pharmaceutical company focused on diseases related to aging. In September 2000, a license to Auxilium of our CPE-215 technology became effective for a topical testosterone product. Phase III clinical trials performed by Auxilium for approval in the U.S. have been completed and a New Drug Application has been submitted to the FDA. In May 2001 we entered into research agreements with Auxilium to develop and test our CPE-215 technology with respect to delivery of a pain management compound and a topical hormonal therapy. Preclinical studies currently are underway regarding the application of our CPE-215 technology to a

topical hormone therapy.

As part of our collaboration with Auxilium, we also entered into a perpetual license agreement whereby we granted to Auxilium an exclusive royalty-based worldwide license, to develop, market and sell topical testosterone gel containing our CPE-215 technology. This license also provides us with an opportunity to fulfill Auxilium's manufacturing requirements for the sale of the products in the European market. Under the license agreement we would receive payments based upon Auxilium's completion of certain milestones in an aggregate of \$550,000 plus royalties based on net sales. Upon successful completion of preclinical studies for the intranasal pain management and topical hormone products, similar licenses would become effective.

TEVA

In July 2000, we entered into a strategic alliance with Teva, a world leader in generic pharmaceutical products, in which we were granted a royalty-free non-exclusive license to register and

35

market more than 75 finished pharmaceutical products representing more than 25 different chemical entities. We are obligated under this license agreement to submit a registration file for each product to the relevant regulatory authorities in Spain in order to receive marketing authorizations in our name for that product. The marketing authorizations provide us with the requisite approvals, licenses and permits from the regulatory authorities to import, distribute, market and sell the products in Spain. In connection with this strategic alliance, Teva also entered into a supply agreement with us pursuant to which it would manufacture the products and supply them to us for marketing and sale in Spain. Our obligation to purchase the products from Teva is non-exclusive, allowing us to purchase any of the products from sources other than Teva if we can show that Teva's prices for the products exceed the current price from other qualified sources and if Teva has not exercised its right to match the lower price. The license agreement and the supply agreement have five year terms and both are renewed automatically for one-year terms for each product.

We have submitted registration applications for 8 Teva products, none of which applications have been approved as of this date. Under a rights agreement entered into with Teva in July 2000, we granted Teva a right of first refusal to purchase Laboratorios Davur in the event that we decide to sell Laboratorios Davur or Laboratorios Belmac. We also granted Teva the right to bid for Laboratorios Belmac in the event we intend to sell Laboratorios Belmac.

OUR PROPRIETARY DRUG TECHNOLOGIES

We believe that there are numerous opportunities to enter into additional collaborations with pharmaceutical and biotechnology companies and expand our product lines using our proprietary drug technologies.

CPE-215 PERMEATION ENHANCEMENT PLATFORM TECHNOLOGY

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Our permeation enhancement technology consists of a series of related chemical compounds that enhance the absorption of a wide variety of products across various biological membranes. Our primary compound and the foundation for our drug delivery platform technology is CPE-215 (cyclopentadecanolide). CPE-215, when combined with certain drugs, has been shown to significantly enhance the amount and rate of absorption of those drugs through various biological membranes. By controlling the amount of CPE-215 that is combined with certain drugs, we have the ability to affect the quantity and rate at which the drug is absorbed through biological membranes. We believe that our CPE-215 technology is superior to certain other non-injection and non-oral drug delivery systems based on the following characteristics:

- broad applicability--works with a wide range of pharmaceutical compounds, including water and oil soluble and insoluble compounds as well as high and low molecular weight compounds, including peptides and proteins;
- format independence--can be formulated into creams, ointments, gels, solutions, lotions and patches;
- biological membrane independence--works across the biological membranes of the skin, mouth, nose and eye; and
- well tolerated--no reported cases of irritation or toxicity.

CPE-215 has a long history of safe use in humans as a food additive and fragrance. In addition, our preclinical testing to date on CPE-215 as a drug delivery enhancement has further indicated its safety. We believe that this past experience with CPE-215 may result in reduced preclinical development activities required for new product formulations of previously approved pharmaceutical compounds.

36

SOLUBILITY ENHANCEMENT TECHNOLOGY

Our solubility enhancement technology involves patent pending chemical and manufacturing procedures that enhance solubility without changing the compound's therapeutic properties. Although this technology can be applied to other chemical entities, to date we have incorporated this technology only in acetaminophen compounds, which are known to have problems of insolubility and undesirable taste. Based upon clinical studies completed in the year 2001, we believe that our technology enables us to develop and deliver dosages of acetaminophen that make it highly dispersible, rapidly soluble in water, better tasting and faster in reaching peak blood levels to deliver pain relief. The use of our technology to increase solubility lessens undesirable side effects, such as flatulence and the bitter taste of pills, which commonly are associated with acetaminophen and many other oral medications.

IMPROVED ORAL FORMULATION TECHNOLOGIES

Our oral formulation technologies involve the application of a new vacuum dry and desiccation manufacturing process as well as specialized equipment, each of which plays a role in producing pharmaceutical products that are more stable and pure, while reducing manufacturing time and costs. We have developed this technology to create new methods for manufacturing products such as omeprazole, lansoprazole and other similar products that are stability sensitive to humidity and temperature. We filed four new patents in 2000 and 2001 relating to these processes and equipment. The patents claim as innovative the manufacturing process that renders these products more stable, while protecting active substances from gastric degradation utilizing microgranulation and microencapsulation techniques. These patent pending technologies can contribute to our ability to compete against other companies whose manufacturing processes

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

are more costly and time consuming.

HYDROGEL TECHNOLOGY

Our hydrogel technology involves a patented synthetic material, which produces a water soluble drug release system capable of being formulated for immediate onset or sustained release over a 24 hour period. The hydrogel technology is capable of adhering to the mucous membranes of the vagina for extended periods of time without typical discharge, improving the treatment of conditions such as yeast and fungal infections or conditions requiring moisturizers or antibiotics. We seek to license this technology to other pharmaceutical companies for co-development and marketing of potential applications of this technology.

PRODUCT SALES AND MARKETING IN SPAIN

In Europe, primarily Spain, we manufacture and market more than 100 pharmaceutical products, representing various dosage strengths and product formulations of more than 30 chemical entities. Our product lines consist of generic and branded products within four primary therapeutic categories: cardiovascular, gastrointestinal, infectious and neurological diseases. Our generic and branded products are marketed to physicians and pharmacists by our two separate sales and marketing organizations, Laboratorios Davur and Laboratorios Belmac. To a lesser extent, we also market over-the-counter products through Laboratorios Belmac. There are approximately 90,000 physicians and 20,000 pharmacies in Spain. Revenues from products whose active ingredient is omeprazole accounted for approximately 56% of our net sales in 2001.

We continuously review and modify our product portfolio. We add to our portfolio to respond to increasing market demand for generic and branded products in Spain and we divest from our portfolio products that we consider to be redundant or that have become non-strategic. We export a small portion of the pharmaceuticals manufactured by Laboratorios Belmac outside Spain through local distributors and brokers, particularly in Eastern Europe, Northern Africa, Central and South America.

37

GENERIC PHARMACEUTICALS

Our generic product line consists of 39 pharmaceutical products representing various dosage strengths and product formulations of ten chemical entities. We entered the generic pharmaceutical market in Spain in September 2000. Laboratorios Davur, our generic sales and marketing organization, markets generic pharmaceutical products to physicians and pharmacists through a sales force of approximately 60 full-time sales personnel located in major cities throughout Spain. In 2001, generic pharmaceuticals accounted for approximately 30% of our total product sales. We also supplement our sales and marketing efforts for generic products through advertising in trade publications.

We believe we can grow by providing to our generic products sales force a more extensive line of products to market to physician and pharmacy clients. To strengthen our entry into the generic market, in July 2000, we entered into a strategic alliance with Teva, one of the world's leaders in generic pharmaceuticals. Under this alliance, we have licensed from Teva the right to register and market in Spain more than 75 of Teva's pharmaceutical products, representing more than 25 different chemical entities. Pursuant to the arrangement, Teva will supply the pharmaceutical products to us and we will register and, upon regulatory approval, market the products in Spain.

The following are descriptions of our generic products that contribute significantly to our sales and gross profits:

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

OUR GENERIC PRODUCT NAME	ACTIVE INGREDIENT	SOLD BY OTHERS AS	USED TO TREAT
Amoxicilina Davur	amoxicillin trihydrate	Amoxil (R) (GlaxoSmithKline)	infections
Ciprofloxacin Davur	ciprofloxacin hydrochloride	Cipro (R) (Bayer)	microbial infections, including anthrax
Enalapril Davur	enalapril maleate	Vasotec (R) (Merck)	cardiovascular disease and hypertension
Fluoxetina Davur	fluoxetine hydrochloride	Prozac (R) (Eli Lilly)	depression
Omeprazol Davur	omeprazole	Prilosec (R) (AstraZeneca)	gastroesophageal reflux disease
Simvastatina Davur	simvastatin	Zocor (R) (Merck)	high cholesterol

BRANDED PHARMACEUTICALS

Our branded product line consists of 62 pharmaceutical products representing various dosage strengths and product formulations of 22 chemical entities. Sales of branded pharmaceuticals accounted for 77% of our product sales in 2000 and 47% in 2001. We market our branded and, to a lesser extent, certain of our generic and over-the-counter products through our Laboratorios Belmac subsidiary, which has approximately 90 full-time sales personnel located in major cities throughout Spain. We supplement our sales and marketing efforts for branded products through advertising in trade publications.

38

The following are descriptions of the branded products that contribute significantly to our sales and gross profits:

OUR BRANDED PRODUCT NAME	ACTIVE INGREDIENT	SOLD BY OTHERS AS	USED TO TREAT
Amoxicilina Belmac (R)	amoxicillin trihydrate	Amoxil (R) (GlaxoSmithKline)	infections
Belmazol (R)	omeprazole	Prilosec (R) (AstraZeneca)	gastroesophageal reflux disease
Cimasal D Forte (R)	calcium carbonate and vitamin D3	Calcite-D (R) (Riva)	osteoporosis
Codeisan (R)	codeine	Tricodein (R) (Solco)	cough and bronchitis

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Simvacol (R)	simvastatin	Zocor (R) (Merck)	high cholesterol
Enalapril Belmac (R)	enalapril maleate	Vasotec (R) (Merck)	cardiovascular disease and hypertension
Mio Relax (R)	carisoprodol	Soma (R) (MedPointe)	muscle spasms
Pentoxifilina (R)	pentoxifylline	Trental (R) (Aventis)	peripheral vascular ischemia
Senioral-TM-	oxymetazoline and chlorpheniramine	Denoral (R) (Aventis)	cold and sinus congestion

INTELLECTUAL PROPERTY

We actively seek to protect our products and proprietary information by means of U.S. and foreign patents, trademarks and contractual arrangements. Our success will depend in part on our ability to obtain and enforce patents on our products, processes and technologies to preserve our trade secrets and other proprietary information and to avoid infringing on the patents or proprietary rights of others. Our CPE-215 technology is covered by our U.S. patent and 11 foreign patents, including those in Japan, Korea and most major European countries. We also have three U.S. and four foreign patents pending regarding our CPE-215 technology. The patents for our CPE-215 technology expire in the U.S. in 2008 and in foreign countries between 2006 and 2014. We have one international patent application and one foreign patent application pending regarding our antifungal nail lacquer product. We also have two issued U.S. patents regarding our hydrogel technology that expire in 2008. In addition, we have one U.S. patent pending for an insulin composition. We licensed from Dartmouth College the exclusive rights to a patent covering the novel use of androgen therapy for treating Fibromyalgia and Chronic Fatigue Syndrome. In 2000 and 2001, we filed four new patents in Europe for improved oral formulations of pharmaceutical products, including omeprazole and lansoprazole.

39

We own approximately 50 trademarks for pharmaceutical products in Spain. In addition, we also rely on unpatented proprietary technologies in the development and commercialization of our products. We also depend upon the unpatentable skills, knowledge and experience of our scientific and technical personnel, as well as those of our advisors, consultants and other contractors. To help protect our proprietary know-how that is not patentable, and for inventions for which patents may be difficult to enforce, we rely on trade secret protection and confidentiality agreements to protect our interests. To this end, we require employees, consultants and advisors to enter into agreements that prohibit the disclosure of confidential information and, where applicable, require disclosure and assignment to us of the ideas, developments, discoveries and inventions that arise from their activities for us. Additionally, these confidentiality agreements require that our employees, consultants and advisors do not bring to us, or use without proper authorization, any third party's proprietary technology.

RESEARCH AND DEVELOPMENT

Our research and product development efforts are focused on developing new product applications of our drug delivery and drug formulation technologies. We currently have ten scientists and technicians working on research and product

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

development. For the years ended December 31, 1999, 2000 and 2001, our research and product development expenditures were \$685,000, \$1,102,000 and \$2,084,000, respectively.

MANUFACTURING

Our 64,000 square-foot manufacturing facility is located in Zaragoza, Spain. Our manufacturing facility complies with European Good Manufacturing Practices and is capable of producing tablets, capsules, suppositories, creams, ointments, lotions, liquids and sachets, as well as microgranulated and microencapsulated products. The facility also includes analytical chemistry, quality control, quality assurance and formulation research laboratories.

Since we currently utilize less than 100% of our existing capacity to manufacture our own products, we have engaged in contract manufacturing of pharmaceuticals owned by other companies such as Antibioticos S.A., Laboratorios Cantabria S.A., and Shire Iberica S.A. We believe contract manufacturing provides a stable, recurring source of cash flow, a means of absorbing overhead costs, and experience in manufacturing a broad line of formulations that is advantageous to us in pursuing and integrating acquired products. Although the volume of our contract manufacturing continues to increase, contract manufacturing as a percentage of consolidated net sales declined from approximately 50% in 1994 to approximately 18% in 2001. We attribute this decline to the growth in sales of our own branded and generic pharmaceutical products over the period. We expect that contract manufacturing activities as a percentage of our overall sales will continue to decrease in the future.

We have fully integrated manufacturing support systems including quality assurance, quality control, regulatory compliance and inventory control. These support systems enable us to maintain high standards of quality for our products and deliver reliable products and services to our customers on a timely basis. We require a supply of quality raw materials and packaging materials to manufacture and package drug products. Historically we have not had difficulty obtaining raw materials and packaging materials from suppliers. Currently, we rely on approximately 70 suppliers to deliver our required raw materials and packaging materials. We have no reason to believe that we will be unable to procure adequate supplies of raw materials and packaging materials on a timely basis. Union Quimico Farmaceutica, S.A. is our sole supplier of omeprazole. Revenues from products whose active ingredient is omeprazole accounted for approximately 56% of our net sales in 2001. We believe that alternative sources of omeprazole are available and we will obtain required governmental approval to source from them, if necessary.

40

COMPETITION

All of our current and future products face strong competition both from new and existing drugs and drug delivery technologies. This competition potentially includes national and multi-national pharmaceutical and healthcare companies of all sizes. Many of these other pharmaceutical and healthcare companies have far greater financial resources, technical staffs, research and development, and manufacturing and marketing capabilities. We believe that owning our own development, manufacturing and marketing facilities in Spain allows us to effectively compete with other pharmaceutical companies in this market. Our access to these resources enables us to reduce costs otherwise associated with contracting for the development, manufacture or marketing of our products by other companies. These reduced costs allow us to sell our products at competitive prices while maintaining attractive margins.

We compete with both large multinational companies and national Spanish companies, which produce most of the same products that we manufacture. In

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Spain, our principal competitors include companies such as Ratiopharm International GmbH, Merck Sharp & Dohme de Espana, S.A. and Almirall Prodes Farma.

CUSTOMERS

In Spain, our sales representatives from Laboratorios Belmac and Laboratorios Davur actively promote our products to physicians and retail pharmacists. We sell our products directly to pharmaceutical distributors and indirectly to customers who purchase our products from distributors. The wholesale distributor network for pharmaceutical products in Europe and more specifically in Spain, in recent years has been subject to increasing consolidation, which has increased and we expect will continue to increase our, and other industry participants', customer concentration.

In 2001 and 2000, Cofares was our only customer accounting for more than ten percent of our consolidated net sales of approximately 15% and 14%, respectively. In 1999, Cofares and Antibioticos Farma, each of whose purchases accounted for approximately 13% of consolidated net sales, were the only customers which accounted for more than ten percent of consolidated net sales.

REGULATION

Numerous governmental authorities in the U.S. and other countries extensively regulate the activities of pharmaceutical manufacturers. If we fail to comply with the applicable requirements of governmental authorities, we may be subject to administrative or judicial sanctions such as warning letters, fines, injunctions, product seizures or recalls, total or partial suspension of production, or refusal by governmental authorities to approve pending marketing approval applications or supplements to approved applications, as well as criminal prosecution.

UNITED STATES

Prior to marketing a pharmaceutical product in the U.S., the product must be approved by the FDA. For new compounds, the regulatory approval process begins with preclinical laboratory and animal testing. Upon completion, an Investigational New Drug Application is submitted to the FDA, which must become effective before human clinical trials may be commenced. Sometimes, to minimize costs, we have chosen to conduct pilot studies. The data they produce can permit us to move directly into Phase II or III studies with the FDA.

Following completion of laboratory animal testing, human clinical trials typically are conducted in three sequential phases that may overlap.

- Phase I--involves the initial introduction of the pharmaceutical into healthy human volunteers, the emphasis is on testing for safety (adverse effects), dosage tolerance, metabolism, excretion and clinical pharmacology.

41

- Phase II--involves studies in a limited patient population to determine the efficacy of the pharmaceutical for specific targeted indications, to determine dosage tolerance and optimal dosage and to identify possible adverse side effects and safety risks.
- Phase III--involves trials undertaken to evaluate clinical efficacy once a compound is found to be effective and to have an acceptable safety profile in Phase II evaluations, and to further test for safety within an expanded patient population at multiple clinical study sites.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

The FDA reviews both the clinical plans and the trial results and may discontinue the trials at any time if there are significant safety issues. The results of preclinical and clinical trials are submitted to the FDA in the form of a New Drug Application for marketing approval. The approval process is affected by a number of factors, including the severity of the disease, the availability of alternative treatments and the risks and benefits demonstrated in clinical trials. Additional animal studies or clinical trials may be requested during the FDA review process and may delay marketing approval. After FDA approval for the initial indications, further clinical trials would be necessary to gain approval for the use of the product for any additional indications. The FDA may also require post-marketing testing to monitor for adverse effects, which can involve significant expense. Our products under development and future products to be developed must go through the approval process delineated above prior to gaining approval by the FDA for commercialization.

FDA approval is required for the marketing of generic equivalents or new dosage forms of an existing drug. An Abbreviated New Drug Application is required to be submitted to the FDA for approval. When processing an ANDA, the FDA waives the requirement of conducting complete clinical studies, although it normally requires bioavailability and/or bioequivalence studies. Bioavailability indicates the rate and extent of absorption and levels of concentration of a drug product in the blood stream. Bioequivalence compares the bioavailability of one drug product with another, and when established, indicates that the rate of absorption and levels of concentration of a generic drug in the body closely approximate those of the previously approved drug. An ANDA may be submitted for a drug on the basis that it is the equivalent to a previously approved drug.

In addition to obtaining FDA approval for each product, each manufacturer of drugs must be registered with the FDA. Domestic manufacturing establishments are subject to biennial inspections by the FDA and must comply with current Good Manufacturing Practices for drugs. To supply products for use in the U.S., foreign manufacturing establishments must comply with GMPs and are subject to periodic inspection by the FDA or by regulatory authorities in such countries under reciprocal agreements with the FDA.

SPAIN AND EUROPE

As a pharmaceutical manufacturer in Spain, which is a member of the European Union, we are subject to the regulations enacted by the European Union. Prior to Spain's entry into the European Union in 1986, the pharmaceutical regulations in Spain were less stringent. Since that time, we, along with all Spanish pharmaceutical companies, must obtain manufacturing, marketing and pricing authorizations to commercialize pharmaceutical products in Spain. Pharmaceutical manufacturers in Spain must obtain from the Spanish Ministry of Health a general permit to operate a pharmaceutical business certifying that its facilities comply with European Good Manufacturing Practices. For marketing authorization of new products, the development process in Spain is comprised of three clinical phases for branded drugs and bioequivalent studies for generic drugs as in the U.S. to assure their safety and efficacy. A dossier must be prepared on each pharmaceutical product and, upon approval of the product by the Spanish Ministry of Health, it may be marketed in Spain. Finally, the Spanish Ministry of Health sets maximum prices and reimbursement rates for our products.

TRENDS IN HEALTHCARE REGULATION

The cost of healthcare continues to be a subject of investigation and action by governmental agencies, legislative bodies and private organizations. In the United States, most states have enacted

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

generic substitution legislation requiring or permitting a dispensing pharmacist to substitute a different manufacturer's version of a drug for the one prescribed. Federal and state governments continue their efforts to reduce costs of subsidized healthcare programs, including restrictions on amounts agencies will reimburse for the use of products. Efforts to reduce healthcare costs are also being made in the private sector. Healthcare providers have responded by instituting various cost reduction and containment measures of their own. It is not possible to predict the extent to which we or the healthcare industry in general might be affected by these changes.

Continuing reviews of the utilization, safety and efficacy of healthcare products and their components are being conducted by industry, government agencies and others. These studies, which employ increasingly sophisticated methods and techniques, can call into question the utilization, safety and efficacy of previously marketed products and in some cases have resulted, and may in the future result, in the discontinuance of such products and give rise to claims for damages from persons who believe they have been injured as a result of their use. We maintain product liability insurance for such potential claims; however, no such claims have ever been asserted against us.

Many countries, directly or indirectly through reimbursement limitations, control the selling price of certain healthcare products. In addition, the prices for all prescription products in Spain are determined by the Spanish Ministry of Health. In Western Europe, efforts are under way by the European Union to harmonize technical standards for many products, including drugs, to make more uniform the requirements for marketing approval from the various regulatory agencies.

OTHER REGULATIONS

We believe that we comply with environmental laws that apply to us and we do not anticipate that compliance will have a material effect on our financial condition.

EMPLOYEES

We employ approximately 271 people, nine of whom are employed in the U.S. and 262 in Spain, as of February 28, 2002. Approximately 75 of these employees principally are engaged in manufacturing activities, 153 in sales and marketing, ten in product development and 33 in management and administration. In general, we consider our relations with our employees to be good.

FACILITIES

We lease a 3,200 square foot facility in North Hampton, New Hampshire, which houses our corporate headquarters and research and development laboratory. We are located approximately 45 minutes north of Boston, Massachusetts. The lease for this facility expires in March 2004.

We own a 64,000 square foot facility in Zaragoza, Spain, which accommodates our manufacturing plant, warehouse, research and development laboratory and office space. The facility is located in an industrial park and is situated on sufficient acreage to accommodate future expansion.

We lease a 10,700 square foot facility in San Sebastian de los Reyes, Spain, an area northwest of Madrid, which houses the administrative offices for our Spanish and European operations. The lease for this facility expires in 2006.

LEGAL PROCEEDINGS

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

On February 4, 2002, we were notified that a legal proceeding had been commenced against us by Merck & Co. Inc. and its Spanish subsidiary, Merck Sharp & Dohme de Espana, S.A., alleging that we violate their patents in our production of the product simvastatin and requesting an injunction ordering us not to manufacture or market the product. The case was brought against our Spanish subsidiaries in the 39th First Instance Court of the City of Madrid. After a hearing on February 18, 2002, the court refused to grant the requested injunction and dismissed the case on February 25, 2002, awarding us court and legal fees. Merck has appealed the award of fees. Under Spanish law, Merck can reinstitute its claim against us in another proceeding. There were no sales of simvastatin in 2001, as the product was launched in late January 2002.

43

MANAGEMENT

DIRECTORS AND EXECUTIVE OFFICERS

NAME ----	AGE -----	POSITION -----
James R. Murphy.....	52	Chairman, President, Chief Executive Officer and Director
Michael McGovern.....	58	Vice Chairman and Director
Robert M. Stote, M.D.....	62	Senior Vice President, Chief Science Officer and Director
Michael D. Price.....	44	Vice President, Chief Financial Officer, Treasurer, Secretary and Director
Robert J. Gyurik.....	55	Vice President of Pharmaceutical Development and Director
Jordan A. Horvath.....	40	Vice President and General Counsel
Charles L. Bolling.....	78	Director
Miguel Fernandez.....	71	Director
William A. Packer.....	67	Director

JAMES R. MURPHY has served as one of our directors since 1993. Mr. Murphy became President of Bentley in September 1994, was named Chief Executive Officer effective January 1995 and became Chairman of the Board in June 1995. Prior to rejoining Bentley, Mr. Murphy served as Vice President of Business Development at MacroChem Corporation, a publicly owned pharmaceutical and drug delivery company, from March 1993 through September 1994. From September 1992 until March 1993, Mr. Murphy served as a consultant in the pharmaceutical industry with his primary efforts directed toward product licensing. Prior thereto, Mr. Murphy served as Director--Worldwide Business Development and Strategic Planning of Bentley from December 1991 to September 1992. Mr. Murphy previously spent 14 years in pharmaceutical research and product development with SmithKline Corporation and in international business development with contract

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

research and consulting laboratories. Mr. Murphy received a B.A. in Biology from Millersville University.

MICHAEL MCGOVERN has served as one of our directors since 1997 and was named Vice Chairman of Bentley in October 1999. Mr. McGovern serves as President of McGovern Enterprises, a provider of corporate and financial consulting services, which he founded in 1975. Mr. McGovern is Chairman of the Board of Specialty Surgicenters, Inc. and, Training Solutions Interactive, Inc.; is Vice Chairman of the Board of Employment Technologies, Inc. and is a Director on the corporate board of the Reynolds Development Company. Mr. McGovern received a B.S. and M.S. in accounting and his Juris Doctor from the University of Illinois.

ROBERT M. STOTE, M.D. became Senior Vice President and Chief Science Officer of Bentley in March 1992 and has served as one of our directors since 1993. Prior to joining Bentley, Dr. Stote was employed for 20 years by SmithKline Beecham Corporation serving in a variety of executive clinical research positions. Dr. Stote was Chief of Nephrology at Presbyterian Medical Center of Philadelphia from 1972 to 1989 and was Clinical Professor of Medicine at the University of Pennsylvania. Dr. Stote also serves as a Director of Datatrak International, Inc. and of Auxilium. Dr. Stote received a B.S. in Pharmacy from the Albany College of Pharmacy, an M.D. from Albany Medical College and is Board

44

Certified in Internal Medicine and Nephrology. He was a Fellow in Nephrology and Internal Medicine at the Mayo Clinic and is currently a Fellow of the American College of Physicians.

MICHAEL D. PRICE became Chief Financial Officer, Vice President/Treasurer and Secretary of Bentley in October 1993, April 1993 and November 1992, respectively, and has served as one of our directors since 1995. He has served Bentley in other capacities since March 1992. Prior to joining Bentley, he was employed as a financial and management consultant with Carr Financial Group from March 1990 to March 1992. Prior thereto, he was employed as Vice President of Finance with Premiere Group, Inc. from June 1988 to February 1990. Prior thereto, Mr. Price was employed by Price Waterhouse from January 1982 to June 1988 where his last position with that firm was as an Audit Manager. Mr. Price received a B.S. in Business Administration with a concentration in Accounting from Auburn University and an M.B.A. from Florida State University. Mr. Price is a Certified Public Accountant licensed by the State of Florida.

ROBERT J. GYURIK has served as one of our directors since 1998 and became Vice President of Pharmaceutical Development of Bentley in March 1999. Mr. Gyurik was Manager of Development and Quality Control at MacroChem Corporation, a position he held from May 1993 to February 1999. From 1971 to 1993 Mr. Gyurik worked in various research and development positions at SmithKline Beecham. Prior thereto, Mr. Gyurik worked at Schering as a Medicinal Chemist. Mr. Gyurik received a B.A. in Biology and Chemistry from Immaculata College. Mr. Gyurik is a member of the American Chemical Society, International Society for Chronobiology and the New York Academy of Sciences.

JORDAN A. HORVATH became Vice President and General Counsel of Bentley in August 2000. Prior to joining Bentley, he was a partner at Parker Chapin LLP, the Company's legal counsel in New York City (which has since merged to become Jenkins & Gilchrist Parker Chapin LLP), since 1996. He was an associate of that firm from 1991 to 1995. Mr. Horvath received an A.B. from Princeton University and a J.D. from the University of California, Berkeley.

CHARLES L. BOLLING has served as one of our directors since 1991. Mr. Bolling served from 1968 to 1973 as Vice President of Product Management and

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Promotion (U.S.), from 1973 to 1977 as Vice President of Commercial Development and from 1977 to 1986 as Director of Business Development (International) at SmithKline & French Laboratories. Mr. Bolling has been retired since 1986.

MIGUEL FERNANDEZ has served as one of our directors since 1999. Mr. Fernandez served from 1980 to 1996 as President of the International Division and corporate Vice President at Carter-Wallace, Inc., where he was responsible for all product lines outside of the United States. Prior thereto, Mr. Fernandez was employed for approximately eight years by SmithKline Beecham, where his last position was Vice President for Latin America. Before SmithKline Beecham, Mr. Fernandez served as Managing Director of Warner Lambert in Argentina for two years. From 1962 to 1970, Mr. Fernandez was employed by Merck/Frost in Canada. Mr. Fernandez attended the University of British Columbia in Canada and received an M.B.A. from the Ivey School of Business at the University of Western Ontario in London, Ontario, Canada. Mr. Fernandez has been retired since 1996.

WILLIAM A. PACKER has served as one of our directors since 1999. Mr. Packer has been a business and industry consultant to a number of biopharmaceutical companies since 1998. From 1992 until 1998, Mr. Packer was President and Chief Financial Officer of Virus Research Institute, Inc., a publicly owned biotechnology company. Prior to this, Mr. Packer was employed by SmithKline Beecham Plc, where he held various senior management positions, the most recent as Senior Vice President, Biologicals, in which position he was responsible for the direction of SmithKline's global vaccine business. Mr. Packer is a Chartered Accountant.

45

COMPENSATION COMMITTEE INTERLOCKS AND INSIDER PARTICIPATION

The members of the compensation committee during 2001 were Messrs. Charles L. Bolling, Russell Cleveland (until his resignation as a director), Miguel Fernandez, Michael McGovern and William Packer, none of whom is now or was at the time of service our employee. No member of the compensation committee has a relationship that would constitute an interlocking relationship with executive officers or directors of Bentley or another entity.

MANAGEMENT COMPENSATION

Set forth below is information for 1999, 2000 and 2001 with respect to compensation we paid to our chief executive officer and our executive officers whose compensation exceeded \$100,000 during 2001. Except as provided in the table below or otherwise discussed below, we paid no other compensation to them.

SUMMARY COMPENSATION TABLE

NAME AND PRINCIPAL POSITION	YEAR	ANNUAL COMPENSATION			LONG-TERM COMPENSATION	
		SALARY (\$)	BONUS (\$)	OTHER ANNUAL COMP. (\$)(1)	AWARDS	
					RESTRICTED STOCK AWARDS (\$)	SECURITIES UNDERLYING OPTIONS SARS (#)

Vice President and General Counsel	2000	\$123,734	--	--	--

(1) The value of perquisites provided to the named executive officers did not exceed \$50,000 or 10% of total compensation in any case.

(2) "All Other Compensation" for Mr. Murphy includes:

- in 2001, principal and interest of \$55,537 forgiven on a loan made by us to Mr. Murphy in 2000 to assist Mr. Murphy's payment of taxes on shares of common stock awarded by us to him in 1999;
- matching contributions in cash to Mr. Murphy's 401(k) plan in the amount of \$970 in 2000 and \$5,000 in 1999;
- matching contributions in shares of our common stock to Mr. Murphy's 401(k) plan valued at \$10,500 in 2001 and \$9,530 in 2000; and
- life insurance premiums of \$4,098 in 2001, \$1,484 in 2000 and \$1,389 in 1999.

46

(3) "All Other Compensation" for Dr. Stote includes:

- matching contributions in cash to Dr. Stote's 401(k) plan in the amount of \$283 in 2000 and \$5,000 in 1999;
- matching contributions in shares of our common stock to Dr. Stote's 401(k) plan valued at \$10,500 in 2001 and \$10,217 in 2000; and
- life insurance premiums of \$1,836 in 2001, 2000 and 1999.

(4) "All Other Compensation" for Mr. Price includes:

- in 2001, principal and interest of \$11,107 forgiven on a loan made by us to Mr. Price in 2000 to assist Mr. Price's payment of taxes on shares of common stock awarded by us to him in 1999;

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

- matching contributions in cash to Mr. Price's 401(k) plan in the amount of \$551 in 2000 and \$5,000 in 1999;
 - matching contributions in shares of our common stock to Mr. Price's 401(k) plan valued at \$10,500 in 2001 and \$9,949 in 2000; and
 - life insurance premiums of \$507 in 2001, 2000 and 1999.
- (5) Mr. Gyurik joined us in March 1999. "All Other Compensation" for Mr. Gyurik includes:
- in 2001, principal and interest of \$31,030 forgiven on a loan made by us to Mr. Gyurik in 2000 to assist Mr. Gyurik's payment of taxes on shares of common stock awarded by us to him in 1999;
 - matching contributions in cash to Mr. Gyurik's 401(k) plan in the amount of \$263 in 2000;
 - matching contributions in shares of our common stock to Mr. Gyurik's 401(k) plan valued at \$10,500 in 2001 and \$10,237 in 2000; and
 - life insurance premiums of \$551 in 2001 and \$473 in 2000.
- (6) Mr. Horvath joined us in August 2000. "All Other Compensation" for Mr. Horvath includes:
- matching contributions in shares of our common stock to Mr. Horvath's 401(k) plan valued at \$10,500 in 2001; and
 - life insurance premiums of \$257 in 2001 and \$16 in 2000.

We have entered into employment agreements with each of Messrs. Murphy, Stote, Price, Gyurik and Horvath which set forth their relationship with us. The agreements expire on December 31, 2003 and renew annually for one year terms. Under the agreements, each individual is paid a base salary and provided with life insurance, with salary increases, bonuses and stock option grants at the discretion of the board's compensation committee (except for Mr. Murphy's agreement, which provides for a minimum stock option grant of 50,000 options per annum and Mr. Horvath's initial agreement, which provides for minimum salary increases of 5% per year). All employees are full time, with the exception of Dr. Stote who is a part-time employee.

The agreements may be terminated on one year's notice and, if terminated earlier without cause, upon payment of severance equal to one year's salary, a bonus equal to the greater of the employee's bonus target for the current year or actual bonus for the prior year and vesting of options based on the number of months employment during the vesting period. If the employee is terminated within 12 months of a change of control of Bentley, or if the employee terminates his employment within 12 months after a change of control because his job changes, we breach his employment agreement or he is required to move his residence, then the severance is increased to twice his annual salary, twice the average of bonuses in the prior two years, immediate vesting of all stock options and continuation of health benefits for two years (or until receiving comparable benefits from another employer), and the option to keep in place life insurance at the employee's expense. No severance is paid on a termination for cause. In Mr. Murphy's agreement, severance following a change in control is 2.99 times annual salary. Mr. Horvath's initial agreement provides that, on termination without cause, severance will be two years' annual salary and acceleration of all options and, following a termination after a change of control, severance will be 2.99 times annual salary and bonus.

STOCK OPTION PLANS

1991 STOCK OPTION PLAN. Our 1991 Stock Option Plan was adopted in 1991 and was amended several times to increase the number of shares issuable under it to a total of 1,000,000. While no options could be granted under the 1991 plan after September 30, 2001, all options granted prior to that date will continue to vest and remain outstanding in accordance with the terms of the 1991 Plan.

2001 EMPLOYEE'S STOCK OPTION PLAN. Our 2001 Employee Stock Option Plan was adopted and approved in 2001. We may issue incentive stock options, as defined in the Internal Revenue Code of 1986, or non-qualified stock options to purchase up to 1,000,000 shares of common stock to our employees under this plan. During 2001, options to purchase 123,500 shares of common stock were granted to employees who are not executive officers. Such options were granted at prices ranging from \$5.25 to \$7.90 per share, representing the fair market value of our common stock on the dates of grant. These options expire on various dates ranging from May 9, 2011 to November 8, 2011.

2001 DIRECTORS' STOCK OPTION PLAN. Our 2001 Directors' Stock Option Plan was adopted and approved in 2001. We may issue non-qualified stock options to purchase up to 500,000 shares of common stock to our directors under this plan.

The following table sets forth the details of options granted to the individuals listed in the Summary Compensation table during 2001. No stock appreciation rights have been granted to date.

OPTION/SAR GRANTS IN LAST FISCAL YEAR

NAME	INDIVIDUAL GRANTS				EXPIRATION DATE
	NUMBER OF SECURITIES UNDERLYING OPTIONS GRANTED (#)	% OF TOTAL GRANTED TO EMPLOYEES IN FISCAL YEAR	EXERCISE OR BASE PRICE (\$/SHARE)		
James R. Murphy.....	75,000	13.7%	\$ 5.88-\$6.00		1/1-5/
Robert M. Stote, M.D.....	10,000	1.8%	\$ 6.00		5/
Michael D. Price.....	50,000	9.1%	\$ 6.00		5/
Robert J. Gyurik.....	50,000	9.1%	\$ 6.00		5/
Jordan A. Horvath.....	--	--	--		

The following table sets forth certain information concerning the number and value at December 31, 2001 of shares of our common stock subject to unexercised options held by the individuals listed in the Summary Compensation Table. No shares of our common stock were acquired by these individuals on exercise of stock options in 2001.

AGGREGATED OPTION EXERCISES IN LAST FISCAL YEAR AND FISCAL YEAR-END OPTION VALUES

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

NAME	NUMBER OF SECURITIES UNDERLYING UNEXERCISED OPTIONS/SARS AT FY-END (# SHARES)		VALUE OF UNEXERCISED IN-THE-MONEY OPTIONS SARS AT FY-END (\$)	
	EXERCISABLE	UNEXERCISABLE	EXERCISABLE	UNEXERCISABLE
James R. Murphy.....	745,400	57,600	\$4,574,706	\$24,000
Robert M. Stote, M.D.....	567,500	10,000	\$3,496,316	\$4,000
Michael D. Price.....	446,500	50,000	\$2,778,957	\$20,000
Robert J. Gyurik.....	40,000	50,000	\$122,850	\$20,000
Jordan A. Horvath.....	50,000	100,000	\$122,000	\$24,000

(1) Based on the difference between the closing price per share of common stock on December 31, 2001 and the option exercise prices.

No long-term incentive plan awards were granted to the individuals listed in the Summary Compensation table during 2001.

401(K) RETIREMENT PLAN

We sponsor a 401(k) retirement plan under which eligible employees may contribute, on a pre-tax basis, between 1% and 15% of the annual income we pay to them, subject to certain maximums set by U.S. tax law. All full-time employees who work for us in the U.S. are eligible to participate in the 401(k) plan. All employee contributions are allocated to the employee's individual account and are invested in various investment instruments as directed by the employee. Employees' cash contributions are fully vested and nonforfeitable. We made matching contributions to the 401(k) plan in 2001 by granting 13,658 shares of our common stock valued at \$82,959. We currently match 100% of each employee's contribution with shares of our common stock. All of our matching contributions vest 25% each year for the first four years of each employee's employment.

REMUNERATION OF NON-EMPLOYEE DIRECTORS

We pay our directors who are not employees fees of \$3,000 for each in-person meeting of the board of directors, \$500 for each telephone meeting and \$500 for each committee meeting attended, which do not take place on the same day as board meetings, in addition to reimbursing expenses incurred in attending meetings. Each director who is not an employee is automatically granted options to purchase a number of shares of common stock equal to 2/10 of 1% of the number of outstanding shares of common stock upon his or her election to the board. Thereafter, each continuing non-employee director is entitled to receive annually, options to purchase the number of shares of common stock equal to 2/10 of 1% of the number of outstanding shares of common stock outstanding on the date of our annual stockholder's meeting. For his additional time and effort, Mr. McGovern, our Vice Chairman, was awarded additional options to purchase 100,000 shares of common stock for each of 2000 and 2001 and 50,000 for 2002. During 2001, options to purchase 239,500 shares of common stock were granted to directors who are not employees at exercise prices ranging from \$5.70 to \$7.10 per share, representing not less than the fair market value of the common stock on the dates of the grants. These options expire on dates ranging from January 1, 2011 to August 30, 2011.

RELATED PARTY TRANSACTIONS

In March 2000 we made loans to three executive officers to assist each of them in making their income tax payments for shares of our common stock which we granted to them in 1999. We loaned \$250,000 to Mr. Murphy, \$50,000 to Mr. Price and \$140,000 to Mr. Gyurik. The loans bear interest at the rate of 2.37% annually, are due in March 2003 and are secured by shares of our common stock owned by the three individuals (Mr. Murphy, 18,700 shares; Mr. Price, 4,000 shares; Mr. Gyurik, 10,700 shares). Interest on the loans accrues quarterly. In December 2001 and January 2002, we agreed to forgive part of the principal and interest on the loans as detailed in the following chart. The amounts forgiven are considered income to the individuals.

	JAMES R. MURPHY	MICHAEL D. PRICE	ROBERT J.
	-----	-----	-----
Initial amount of loan.....	\$250,000	\$50,000	\$140,000
Principal forgiven in December 2001.....	27,850	5,570	15,800
Interest forgiven in December 2001.....	27,687	5,537	15,100
Principal forgiven in January 2002.....	55,209	11,042	30,800
Interest forgiven in January 2002.....	439	88	200
Principal balance at February 28, 2002.....	\$166,941	\$33,388	\$ 93,200

PRINCIPAL STOCKHOLDERS

The following table sets forth the number of shares of our common stock beneficially owned as of March 25, 2002 by each person known by us to be the beneficial owner of at least 5% of our common stock, each of our named executive officers, each of our directors, and all executive officers and directors as a group.

Unless otherwise indicated, we believe that all persons named in the table have sole voting and investment power with respect to all securities beneficially owned by them. Beneficial ownership exists when a person either has the power to vote or sell common stock. A person is deemed to be the beneficial owner of securities that can be acquired by such person within 60 days from the applicable date, whether upon the exercise of options or otherwise. Except as otherwise indicated, the address for those beneficial holders who own more than 5% of our common stock is the address for our headquarters.

Excludes 507,500 shares of common stock issuable upon exercise of stock options which are not vested.

52

DESCRIPTION OF SECURITIES

Our authorized capital stock consists of 35,000,000 shares of a single class of common stock, par value \$.02 per share, and 2,000,000 shares of preferred stock, par value \$1.00 per share. Immediately following this offering, there will be 17,208,228 shares of our common stock and no shares of preferred stock outstanding.

COMMON STOCK

Holders of our common stock are entitled to one vote for each share held on all matters submitted to a vote of the stockholders and do not have cumulative voting rights. Accordingly, holders of a majority of the shares of our common stock may elect all of the directors standing for election. Holders of our common stock are entitled to receive ratably any dividends declared by our board of directors, subject to the preferential dividend rights of any outstanding preferred stock. Holders of our common stock have no preemptive, subscription, redemption or conversion rights. The outstanding shares of our common stock are fully paid and nonassessable. The rights, preferences, and privileges of holders of our common stock are subject to, and may be adversely affected by, the rights of holders of shares of any series of preferred stock that our board of directors may designate and issue in the future. Our common stock is listed on the American Stock Exchange and Pacific Exchange under the symbol "BNT".

CLASS B WARRANTS

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Our Class B Warrants were issued as part of a public offering that we completed in February 1996. They were issued under a warrant agreement between us and American Stock Transfer and Trust Company of New York, our warrant agent. Two Class B Warrants entitle the holder to purchase one share of our common stock at an exercise price of \$5.00 per share. The warrants have been extended so that they expire on December 31, 2002. Holders are only permitted to exercise or trade warrants in multiples of two.

If the closing price of our common stock on the American Stock Exchange for 20 consecutive trading days equals or exceeds 130% of the exercise price for the warrants in effect at the time (currently \$6.50), then within 10 days we may notify the warrant holders that the warrants will be redeemed by us, upon at least 30 days written notice, by the payment to each holder of \$.05 (five cents) per warrant. Warrant holders will have the right to exercise their warrants until redemption occurs. All of the warrants must be redeemed at once.

The warrants contain provisions that protect the holders against dilution by adjustment of the exercise price and the number of shares issuable upon exercise in certain events, including stock dividends, stock splits, reclassifications, mergers or a sale of substantially all our assets. No changes to the warrants that adversely affect the rights of the holders of the warrants may be made without the approval of the holders of a majority of the outstanding warrants.

Approximately 3,003,360 shares of our common stock may be issued upon exercise of all of the warrants, which includes those issued in 1996 to the public as well as those issued as underwriter's compensation as a result of the 1996 offering.

PREFERRED STOCK

Our board of directors is authorized, subject to any limitations prescribed by law, without further stockholder approval, to issue from time to time up to an aggregate of 2,000,000 shares of preferred stock, in one or more series. Each such series of preferred stock shall have such number of shares, designations, preferences, voting powers, qualifications, restrictions and special or relative rights or privileges as shall be determined by our board of directors. Such rights and privileges may include, among others, dividend rights, voting rights, redemptive and sinking fund provisions, liquidation preferences, conversion rights and preemptive rights. The issuance of preferred stock, while providing

53

desirable flexibility in connection with possible acquisitions and other corporate purposes, could have the effect of making it more difficult for a third party to acquire, or of discouraging a third party from attempting to acquire, a majority of our outstanding voting stock. No shares of preferred stock are currently issued or outstanding.

DELAWARE LAW AND CERTAIN CHARTER AND BYLAW PROVISIONS

We are subject to the provisions of Section 203 of the Delaware General Corporation Law. Section 203 prohibits a publicly-held Delaware corporation from engaging in a "business combination" with an "interested stockholder" for a period of three years after the date of the transaction in which the person became an interested stockholder, unless the business combination is approved in a prescribed manner or certain other specified conditions are met. A "business combination" includes mergers, asset sales and other transactions resulting in a financial benefit to the interested stockholder. Subject to certain exceptions, an "interested stockholder" is a person who, together with affiliates and

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

associates, owns, or within three years did own, 15% or more of the corporation's voting stock.

Our Restated Certificate of Incorporation and our Amended and Restated Bylaws contain various provisions which could have the effect of making it more difficult for a third party to acquire, or discouraging a third party from acquiring, control of us.

For example, our Restated Certificate of Incorporation contains provisions that state the following:

- our board of directors may amend in any manner our bylaws and, subject to certain exceptions, our shareholders may only amend our bylaws by an affirmative vote of the holders of at least two-thirds of the outstanding shares of our common stock;
- newly created directorships and any vacancy on our board of directors will be filled solely by the affirmative vote of a majority of the remaining directors then in office;
- subject to certain exceptions, directors may be removed only for cause by the affirmative vote of the holders of at least two-thirds of the outstanding shares of our common stock;
- our board of directors is divided into three classes as nearly equal in size as possible with staggered three-year terms;
- subject to certain exceptions, the affirmative vote of the holders of at least two-thirds of our common stock is required to approve certain major transactions, including any merger or combination, any sale, lease or exchange of all or substantially all of our assets, and any dissolution or liquidation, and the aggregate amount of proceeds received in any such transaction must satisfy certain fair price provisions; and
- subject to certain exceptions, the affirmative vote of the holders of at least two-thirds of the outstanding shares of our common stock is required to amend certain provisions including any of the foregoing provisions of our Restated Certificate of Incorporation.

In addition, our Amended and Restated Bylaws contain provisions that state the following:

- special meetings of stockholders may be called at any time by our president, a majority of our board of directors or by holders of not less than one-third of the outstanding shares of our common stock; and
- all duly submitted stockholder proposals, including nominations for the election of a director, must be delivered to us no less than seventy-five (75) days in advance of the first anniversary of our annual meeting held in the prior year.

Our Restated Certificate of Incorporation and our Amended and Restated Bylaws also contain certain provisions permitted under the Delaware General Corporation Law relating to the liability of directors. The provisions eliminate a director's liability to us or our stockholders for monetary damages for a breach of fiduciary duty, except in circumstances involving certain wrongful acts, such as the breach of a director's duty of loyalty or acts or omissions which involve intentional misconduct or a

knowing violation of law. Our Restated Certificate of Incorporation and our

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Amended and Restated Bylaws also contain provisions obligating us to indemnify our officers and directors to the fullest extent permitted by the Delaware General Corporation Law. We believe that these provisions will assist us in attracting and retaining qualified individuals to serve as directors.

STOCKHOLDER RIGHTS PLAN

We have a stockholder rights plan. Under the plan, each of our stockholders has one preferred share purchase right for each share of common stock held. The rights become exercisable ten days (or a later date determined by our Board of Directors) after a public announcement that a person or group has acquired beneficial ownership of 15% or more of our outstanding common stock, or ten business days after the announcement of a tender offer or exchange offer, or an intention to commence a tender or exchange offer, that would result in beneficial ownership of 15% or more of our outstanding common stock.

If the rights become exercisable, each right entitles the registered holder to purchase from us one one-thousandth of a share of Series A Junior Participating Preferred Stock at a price of \$16.50 per one one-thousandth of a share, subject to adjustment. In addition, upon the occurrence of certain events, and upon payment of the then-current purchase price, the rights may "flip in" and entitle holders to buy our common stock in such amount that the market value is equal to twice the then-current purchase price.

The rights are non-voting and may be redeemed by us at any time before they become exercisable at a price of \$0.001 per right. Until a right is exercised, the holder of the right has no rights as a stockholder of Bentley, including the right to vote or to receive dividends. The rights expire on December 21, 2004.

The rights have certain anti-takeover effects. Exercise of the rights will cause substantial dilution to a person or group that attempts to acquire Bentley on terms not approved by our board of directors.

TRANSFER AGENT AND REGISTRAR

The transfer agent and registrar for the common stock is American Stock Transfer & Trust Company, 40 Wall Street, New York, New York 10005.

PLAN OF DISTRIBUTION

Raymond James & Associates, Inc. will enter into a placement agency agreement with us, pursuant to which Raymond James will use its best efforts to introduce us to institutional and selected retail investors who may purchase the shares. Raymond James has no obligation to buy any shares from us.

Raymond James will solicit indications of interest from investors for the full amount of the offering. We will not request effectiveness of the registration statement of which this prospectus forms a part until Raymond James has informed us that it has received indications of interest for the full amount of the offering.

All investor funds will be deposited into an escrow account opened at Citibank, N.A. for the benefit of the investors. Citibank, N.A., acting as escrow agent, will hold all funds it receives in accordance with Rule 15c2-4 under the Securities Exchange Act of 1934. Investors will be instructed to make checks payable to Citibank, N.A. The escrow agent will not accept any investor funds until the registration statement has been declared effective. Any interest collected on the funds will be paid to us if this offering closes and returned to the investors if this offering is terminated. Before the closing date, Citibank, N.A. will notify Raymond James that all of the funds to pay for the shares have been received. We will deposit the shares with the Depository Trust Company upon receiving notice from Raymond James. At the closing, Depository

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Trust will credit the shares to the respective accounts of the investors.

55

If investor funds are not received for all of the shares being offered, then all investor funds that were deposited into escrow will be returned to investors and the offering will terminate.

We have agreed to indemnify Raymond James and certain other persons against certain liabilities under the Securities Act of 1933. Raymond James has informed us that it will not engage in overallotment, stabilizing transactions or syndicate covering transactions in connection with the offering.

We have agreed to pay Raymond James a fee equal to 6% of the proceeds of this offering and to reimburse Raymond James for accountable expenses estimated at \$175,000 that it incurs in connection with the offering. We have also agreed that if this offering is not completed and, within 12 months after its termination, we sell shares of common stock to investors with whom we did not have a pre-existing relationship, and who had been contacted by Raymond James in connection with this offering, we will pay Raymond James a fee equal to 6% of the proceeds of such sales. Additionally, following this offering, we have granted the placement agent a right of first refusal to act as our investment banker with respect to future financings or any merger, acquisition, or disposition of our assets for a period of 12 months from the closing date.

We and our executive officers and directors have agreed that, for a period of 90 days after the date of this prospectus, we and they will not, without the prior written consent of Raymond James, directly or indirectly:

- sell, offer, pledge, contract to sell, grant any option for the sale of, or otherwise dispose of any shares of our common stock or securities convertible into or exchangeable or exercisable for shares of our common stock, except for any grant of options by us for our common stock under our stock option plans, the exercise of stock options currently outstanding or granted under our stock option plan, or shares of common stock transferred to a trust established by such persons for the sole benefit of such person or such persons' spouse or descendants, or transferred as a gift or gifts, provided that any donee thereof agrees in writing to be bound by the terms hereof, whether now owned or acquired after the date of this prospectus by any such person or with respect to which any person acquires after the date of this prospectus the power of disposition; or
- exercise or seek to exercise in any manner any rights that such person has or may hereafter have to require us to register under the Securities Act of 1933 any shares of our common stock or our other securities in any matter in any registration effected by us under the Securities Act of 1933.

A copy of the form of placement agency agreement is on file with the SEC as an exhibit to the registration statement of which this prospectus forms a part.

The Company expects to deliver the shares of common stock to purchasers on , 2002.

Raymond James has advised us that they intend to deliver this prospectus only by hand or through the mails and do not plan to use electronic delivery

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

methods. They have also informed us that only printed prospectuses, as opposed to CD-Roms or videos, will be used.

LEGAL MATTERS

The validity of the common stock offered hereby will be passed upon for us by Jenkins & Gilchrist Parker Chapin LLP. Greenberg Traurig P.A. will pass upon certain matters for the placement agent.

EXPERTS

The consolidated financial statements of Bentley Pharmaceuticals, Inc. and subsidiaries included in this prospectus for the years ended December 31, 2001, 2000 and 1999 have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report appearing herein, and are included in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

56

ADDITIONAL INFORMATION

A registration statement on Form S-3 (of which this Prospectus is a part), including any amendments thereto, relating to the common stock being offered has been filed with the SEC in Washington, D.C. This prospectus does not contain all of the information in the registration statement and the exhibits and schedules filed with the registration statement, certain portions of which have been omitted as permitted by the rules and regulations of the SEC. Statements contained in this prospectus as to the contents of any agreement or other document are not necessarily complete and in each instance that we make reference to the copy of an agreement or other document filed as an exhibit to the registration statement, each such statement is qualified in all respects by making reference to the exhibits and schedules filed with the registration statement. For further information with respect to us and the common stock offered in this prospectus, we refer you to the registration statement, exhibits and schedules.

We are subject to the informational requirements of the Securities Exchange Act of 1934 and in accordance with the Securities Exchange Act of 1934 file reports and other information with the SEC. A copy of the registration statement and the exhibits and schedules filed with the registration statement, reports, proxy and information statements and other information filed by us with the SEC may be inspected and copied at the offices of the SEC at Room 1024, 450 Fifth Street, N.W., Washington, D.C. 20549, and the SEC's Regional Offices at 233 Broadway, New York, New York 10279 and 500 West Madison St., Suite 1400, Chicago, Illinois 60661. Copies of these materials may also be obtained from the Public Reference Section of the SEC at 450 Fifth Street, N.W., Washington, D.C. 20549, at prescribed rates. The public may obtain information on the Public Reference Room by calling the SEC at 1-800-SEC-0030. In addition, reports, proxy and information statements and other information concerning our company may be inspected at the offices of The American Stock Exchange, 86 Trinity Place, New York, New York 10006. We are required to file electronic versions of certain documents through the SEC's Electronic Data Gathering, Analysis and Retrieval (EDGAR) system. The SEC maintains a World Wide Web site at www.sec.gov that contains reports, proxy and information statements and other information regarding registrants that file electronically with the SEC.

We furnish our stockholders with annual reports containing financial statements audited by an independent public accounting firm.

INFORMATION INCORPORATED BY REFERENCE

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

The SEC allows us to "incorporate by reference" the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus, and later information filed with the SEC will update and supersede this information. We incorporate by reference the documents listed below and any future filings we make with the SEC under Section 13(a), 13(c), 14, or 15(d) of the Securities Exchange Act of 1934 until this offering is completed.

1. Our Annual Report on Form 10-K, as amended, for the fiscal year ended December 31, 2001 (File No. 1-10581), and
2. Our Registration Statements on Form 8-A/A (Amendment No. 1) dated October 29, 1999 and Form 8-A dated December 27, 1999 relating to a description of our securities (File No. 1-10581).

The reports and other documents that we file after the date of this prospectus will update and supersede the information in this prospectus.

You may request a copy of these filings by writing or telephoning us at: Bentley Pharmaceuticals, Inc., 65 Lafayette Road, Third Floor, North Hampton, New Hampshire 03862, Attention: Secretary; Telephone: (603) 964-8006 or obtain them on our website at www.bentleypharm.com. These filings will be provided to you at no cost.

INDEPENDENT AUDITORS' REPORT

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

To the Board of Directors and Stockholders of
Bentley Pharmaceuticals, Inc.
North Hampton, New Hampshire

We have audited the accompanying consolidated balance sheets of Bentley Pharmaceuticals, Inc. and subsidiaries (the "Company") as of December 31, 2001 and 2000, and the related consolidated statements of operations and of comprehensive income (loss), changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2001. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2001 and 2000, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2001 in conformity with accounting principles generally accepted in the United States of America.

During the year ended December 31, 2000, 7,254 of the Company's 12% Convertible Debentures with principal amount of \$7,254,000, net of discount of \$1,585,000 (and applicable unamortized debt issuance costs totaling \$929,000) were converted into approximately 2,901,000 shares of Common Stock.

During the year ended December 31, 1999, the Company issued Warrants to purchase 450,000 shares of Common Stock as partial consideration for the purchase of drug delivery technology, of which 50,000 were exercised during the year ended December 31, 1999. During the year ended December 31, 1999, 193 of the Company's 12% Convertible Debentures were converted into 77,200 shares of Common Stock. The Company recorded the assignment of patents and technology with an estimated value of \$553,000 during the year ended December 31, 1999.

The accompanying Notes to Consolidated Financial Statements are an integral part of these financial statements.

F-7

BENTLEY PHARMACEUTICALS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1--HISTORY AND OPERATIONS

Bentley Pharmaceuticals, Inc. and its Subsidiaries (the "Company") is a specialty pharmaceutical company focused on advanced drug delivery technologies and pharmaceutical products. The Company owns U.S. and international patent and other proprietary rights to technologies that enhance or facilitate the absorption of drugs across biological membranes. The Company is developing products incorporating these technologies and seeks to form strategic alliances with major pharmaceutical and biotechnology companies to facilitate the

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

development and commercialization of its products. The Company currently has strategic alliances regarding its drug delivery technologies with Pfizer Inc and Auxilium Pharmaceuticals, Inc. and is in preliminary discussions with a number of large pharmaceutical companies to form additional alliances. The Company is incorporated in the State of Delaware.

The Company also has a commercial presence in Spain, where it manufactures and markets branded and generic pharmaceutical products within four therapeutic areas: cardiovascular, gastrointestinal, infectious and neurological diseases.

The Company anticipated the opportunities that the emerging generic drug market in Spain present and began taking measures over three years ago to enter the Spanish generic drug market. The Company created a wholly-owned subsidiary to register, market and distribute generic pharmaceutical products in Spain and began aligning its business model to be competitive in this arena, including hiring and training a new generic sales force, submission of generic-equivalent products to the Spanish Ministry of Health for approval and a marketing campaign designed to position the Company as a leader in the Spanish generic drug market. In July 2000, the Company entered into a strategic alliance with Teva Pharmaceutical Industries, Ltd. ("Teva"), whereby the Company has received the right to register and market in Spain more than 75 of Teva's products. Teva also entered into a supply agreement with the Company pursuant to which Teva will manufacture the products and supply them to us for marketing and sale in Spain. Teva was also granted a right of first refusal to acquire Laboratorios Davur in the event that the Company decides to sell that subsidiary or its direct parent, Laboratorios Belmac. The Company also granted Teva the right to bid for Laboratorios Belmac in the event the Company intends to sell that subsidiary.

Given the Company's current liquidity and cash balances and expectations with respect to the execution of its business model, management believes that it has sufficient resources to fund operations for the year 2002 and into the year 2003. However, there can be no assurance that changes in the Company's research and development plans or other events affecting the Company's revenues or operating expenses will not result in the earlier depletion of the Company's funds.

NOTE 2--SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

PRINCIPLES OF CONSOLIDATION AND FOREIGN CURRENCY TRANSLATION

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries: Pharma de Espana, Inc. and its wholly-owned subsidiary, Laboratorios Belmac S.A. and its wholly-owned subsidiaries, Laboratorios Davur S.L. and Laboratorios Rimafar S.L.; Bentley Healthcare Corporation and its wholly-owned subsidiary, Belmac Hygiene, Inc.; Belmac Health Corporation; Belmac Holdings, Inc. and its wholly-owned subsidiary, Belmac A.I., Inc.; B.O.G. International Finance, Inc.; and Belmac Jamaica, Ltd. All significant inter-company balances have been eliminated in consolidation. The financial position and results of operations of the Company's foreign subsidiaries are measured using local currency as the functional currency. Assets and liabilities of each foreign subsidiary are translated at the rate of exchange in effect at the end of the period. Revenues and

F-8

BENTLEY PHARMACEUTICALS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 2--SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

expenses are translated at the average exchange rate for the period. Foreign

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

currency translation gains and losses not impacting cash flows are credited to or charged against other comprehensive income (loss). Foreign currency translation gains and losses arising from cash transactions are credited to or charged against current earnings.

CASH AND CASH EQUIVALENTS

The Company considers all highly liquid investments with original maturities of three months or less when purchased to be cash equivalents for purposes of the Consolidated Balance Sheets and the Consolidated Statements of Cash Flows. Investments in securities which do not meet the definition of cash equivalents are classified as marketable securities available-for-sale in the Consolidated Balance Sheets.

MARKETABLE SECURITIES

The Company had no marketable securities at December 31, 2001 or 2000.

INVENTORIES

Inventories are stated at the lower of cost or market, cost being determined on the first-in, first-out ("FIFO") method. Reserves for slow moving and obsolete inventories are provided based on historical experience and current product demand.

FIXED ASSETS

Fixed assets are stated at cost. Depreciation is computed using the straight-line method over the following estimated economic lives of the assets:

	YEARS

Buildings and improvements.....	30
Equipment.....	3-7
Furniture and fixtures.....	5-7
Other.....	5

Leasehold improvements are amortized over the life of the respective lease. Expenditures for replacements and improvements that significantly add to productive capacity or extend the useful life of an asset are capitalized, while expenditures for maintenance and repairs are charged against operations as incurred. When assets are sold or retired, the cost of the asset and the related accumulated depreciation are removed from the accounts and any gain or loss is recognized currently.

DRUG LICENSES AND RELATED COSTS

Drug licenses and related costs incurred in connection with acquiring licenses, patents, and other proprietary rights related to the Company's commercially developed products are capitalized. Capitalized drug licenses and related costs are being amortized on a straight-line basis over fifteen years from the dates of acquisition. Carrying values of such assets are reviewed quarterly by the Company and are adjusted for any diminution in value.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 2--SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED) RESEARCH AND DEVELOPMENT

Research and development costs are expensed when incurred.

USE OF ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

ORIGINAL ISSUE DISCOUNT/DEBT ISSUANCE COSTS

Original issue discount related to the issuance of debt was amortized to interest expense using the effective interest method over the lives of the related debt. The costs related to the issuance of debt were capitalized and amortized to interest expense using the effective interest method over the lives of the related debt.

FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amounts of cash, cash equivalents, accounts payable, accrued expenses and short-term borrowings approximate fair value because of their short-term nature. The carrying amount of the Company's long-term obligations approximate fair value given the amounts outstanding at December 31, 2001 and 2000.

The fair value information presented herein is based on information available to management as of December 31, 2001. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date and, therefore the current estimates of fair value may differ significantly from the amounts presented herein.

STOCK-BASED COMPENSATION PLANS

SFAS No. 123, ACCOUNTING FOR STOCK-BASED COMPENSATION, addresses the financial accounting and reporting standards for stock or other equity-based compensation arrangements. The Company has elected to continue to use the intrinsic value-based method to account for employee stock option awards under the provisions of Accounting Principles Board Opinion No. 25 and provides disclosures based on the fair value method in the notes to the financial statements as permitted by SFAS No. 123. Stock or other equity-based compensation for non-employees must be accounted for under the fair value-based method as required by SFAS No. 123 and Emerging Issues Task Force ("EITF") No. 96-18, ACCOUNTING FOR EQUITY INSTRUMENTS THAT ARE ISSUED TO OTHER THAN EMPLOYEES FOR ACQUIRING, OR IN CONJUNCTION WITH SELLING, GOODS OR SERVICES and other related interpretations. Under this method, the equity-based instrument is valued at either the fair value of the consideration received or the equity instrument issued on the date of grant. The resulting compensation cost is recognized and charged to operations over the service period, which is usually the vesting period.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 2--SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

REVENUE RECOGNITION

Revenue on product sales is recognized when persuasive evidence of an arrangement exists, the price is fixed and final, delivery has occurred and there is a reasonable assurance of collection of the sales proceeds. The Company generally obtains oral or written purchase authorizations from its customers for a specified amount of product at a specified price and considers delivery to have occurred at the time of shipment. The Company provides its customers with a limited right of return. Revenue is recognized at shipment and a reserve for sales returns is recorded. The Company has demonstrated the ability to make reasonable and reliable estimates of product returns in accordance with SFAS No. 48 based on significant historical experience.

Revenue from service sales is recognized when the service procedures have been completed or applicable milestones have been achieved. Revenue from research and development contracts is recognized over applicable contractual periods or as defined milestones are attained, as specified by each contract and as costs related to the contracts are incurred. Payments received under such arrangements prior to the completion of the related procedures or attainment of milestones are recorded as deferred income.

INCOME TAXES

The Company accounts for income taxes under SFAS No. 109, ACCOUNTING FOR INCOME TAXES, which requires the recognition of deferred tax assets and liabilities relating to the expected future tax consequences of events that have been recognized in the Company's consolidated financial statements and tax returns. Unrecognized provisions for income taxes on undistributed earnings of foreign subsidiaries which are considered permanently invested are not material to the Company's consolidated financial statements.

BASIC AND DILUTED NET INCOME (LOSS) PER COMMON SHARE

Basic and diluted net income (loss) per common share is based on the weighted average number of shares of Common Stock outstanding during each period. The effect of the Company's outstanding stock options and stock purchase warrants were considered in the diluted net income per share calculation for the year ended December 31, 2001. The effect of outstanding stock options and stock purchase warrants were not considered for the years ended December 31, 2000 and 1999, because the results would have been anti-dilutive.

The following is a reconciliation between basic and diluted net income per common share for the year ended December 31, 2001. Dilutive securities issuable for the year ended December 31, 2001 include approximately 663,000 shares issuable as a result of Class B Warrants and approximately 1,288,000 shares issuable as a result of various stock options and warrants outstanding.

NOTE 2--SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Common Stock Equivalents totaling 3,013,000 and 3,025,000, representing the effect of potential exercises of options and warrants and the effect of potential conversion of Debentures into shares of Common Stock for each of the years ended December 31, 2000 and 1999, respectively, were not included in the computation of diluted net loss per common share because the effect would have been anti-dilutive.

SEGMENTS OF AN ENTERPRISE AND RELATED INFORMATION

SFAS No. 131 DISCLOSURES ABOUT SEGMENTS OF AN ENTERPRISE AND RELATED INFORMATION redefines how operating segments are determined and requires disclosure of certain financial and descriptive information about a company's operating segments. The Company operates in one business segment, which is described in Note 2; however, see Note 13 for geographical data.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In June 1998, the Financial Accounting Standards Board issued SFAS No. 133, ACCOUNTING FOR DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES. The new standard requires that all companies record derivatives on the balance sheet as assets or liabilities, measured at fair value. Gains or losses resulting from changes in the values of those derivatives are accounted for depending on the use of the derivative and whether it qualifies for hedge accounting. The adoption of this standard on January 1, 2001 had no impact on the Company's financial position or results of operations.

In June 2001, the Financial Accounting Standards Board issued SFAS No. 141, BUSINESS COMBINATIONS, and SFAS No. 142, GOODWILL AND OTHER INTANGIBLE ASSETS. SFAS No. 141 supersedes APB No. 16, BUSINESS COMBINATIONS, and SFAS No. 38, ACCOUNTING FOR PREACQUISITION CONTINGENCIES OF PURCHASED ENTERPRISES and requires that all business combinations be accounted for by a single method--the purchase method. SFAS No. 141 also provides guidance on the recognition of intangible assets identified in a business combination and requires enhanced financial statement disclosures. SFAS No. 142 adopts a more aggregate view of goodwill and bases the accounting for goodwill on the units of the combined entity into which an acquired entity is integrated. In addition, SFAS No. 142 concludes that goodwill and intangible assets that have indefinite useful lives will not be amortized but rather will be tested at least annually for impairment. Intangible assets that have finite lives will continue to be amortized over their useful lives. SFAS No. 141 is effective for all business combinations initiated after June 30, 2001. The adoption of SFAS No. 142 is required for fiscal years beginning after December 15, 2001 (the year 2002 for the Company), except for the nonamortization and amortization provisions which are required for goodwill and intangible assets acquired after June 30, 2001. The Company believes that the adoption of SFAS No. 141 and SFAS No. 142 will not have a material impact on the Company's financial position or results of operation.

In October 2001, the Financial Accounting Standards Board issued SFAS No. 144, ACCOUNTING FOR THE IMPAIRMENT OR DISPOSAL OF LONG-LIVED ASSETS. SFAS No. 144 supersedes previous guidelines for financial accounting and reporting for the impairment or disposal of long-lived assets and for segments of a business to be disposed of. The adoption of SFAS No. 144 on January 1, 2002 did

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

not have a material impact on the Company's financial position or results of operations.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

In November 2000, Laboratorios Belmac entered into an agreement to sell the trademark, registration rights and dossier for its branded pharmaceutical product, Controlvas(R), for 950 million Spanish Pesetas (approximately \$5,148,000). Laboratorios Belmac received a 50% deposit from the purchaser in November 2000, which was reflected as deferred income in the Consolidated Balance Sheet as of December 31, 2000. The sale closed in February, 2001, resulting in a gain of approximately \$4,977,000 being recognized in the year ended December 31, 2001.

In June 2001, Laboratorios Belmac agreed to sell the trademark, registration rights and dossier for its pharmaceutical product, Amantadine(R), to a third party for 30 million Spanish Pesetas (approximately \$153,000). A deposit of 11 million Spanish Pesetas (approximately \$56,000) was received

F-14

BENTLEY PHARMACEUTICALS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 6--DRUG LICENSES AND RELATED COSTS (CONTINUED)

from the purchaser in June 2001 and a second payment of 11 million Spanish Pesetas was received upon approval of the transfer of the rights to the purchaser by the Spanish Ministry of Health, which occurred during the quarter ended September 30, 2001, resulting in a recognized pre-tax gain of approximately \$73,000. The remaining 8 million Spanish Pesetas (approximately \$41,000) is payable over the next five years, in the form of a royalty arrangement.

The Company acquired the rights to market and manufacture in Spain, the product and trademark Codeisan(R) from Abello, a subsidiary of Merck & Co., Inc. during the year ended December 31, 2000 for 986 million Spanish Pesetas (approximately \$5,200,000). The brand line consists of tablet and liquid presentations, which is marketed and promoted by the Laboratorios Belmac sales force. Also acquired in the transaction was the associated manufacturing equipment.

On February 11, 1999, the Company acquired rights to certain U.S. and international patents and related technology (the "Assets") covering methods to enhance the absorption of drugs delivered to biological tissues. Consideration for the Assets was paid to Yungtai Hsu, an individual, in the form of a cash payment of approximately \$1.1 million, approximately 226,000 shares of Common Stock and ten-year warrants to purchase 450,000 shares of common stock. In addition, approximately 359,000 shares of Common Stock were conveyed to Conrex Pharmaceutical Corporation. The total of all consideration paid for the Assets was approximately \$2,600,000. Furthermore, terms of this transaction provide for certain royalty payments upon commercialization of products using the technologies.

Belmac Hygiene, Inc., a wholly owned subsidiary of the Company, entered into a 50/50 partnership in March 1994 with Maximed Corporation ("Maximed") to develop and market feminine healthcare products. Maximed contributed the hydrogel-based technology and the Company, through its subsidiary, was responsible for providing financing and funding of the partnership's activities. In December 1994, the Company commenced litigation against Maximed and was awarded a judgment in the amount of \$7.68 million in 1998, which was affirmed by the U.S. Court of Appeals. The Company attempted to collect the judgment, but was unable to obtain cash from Maximed to satisfy the judgment. Consequently, the Company decided to seek assignment of the technology and related patents in an effort to satisfy the judgment. As a result, the technology and patents were assigned to the Company in October 1999 and the Company treated such assignment as a distribution from the partnership. The Company estimated the value of the

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

patents and technology to be approximately \$550,000 and recorded these assets as Drug licenses and related costs, net during the year ended December 31, 1999. The Company recorded no gain or loss as a result of this assignment. Management has determined that no reserve for impairment in value on these assets is necessary at December 31, 2001. The partnership is not currently engaged in business activities, nor does the Company anticipate that it will engage in any business activities in the future.

Amortization expense for drug licenses and related costs was approximately \$772,000, \$508,000 and \$516,000 for the years ended December 31, 2001, 2000 and 1999, respectively.

NOTE 7--RELATED PARTY NOTES

The Company provided loans to each of Messrs. Murphy, Price and Gyurik, who are executive officers of the Company, in the amounts of \$250,000, \$50,000 and \$140,000, respectively, in March 2000, which Messrs. Murphy, Price and Gyurik used to pay income taxes on equity-based compensation received in the prior year. In December 2001, the Compensation Committee of the Company's Board of Directors agreed to amend the loan agreements resulting in the forgiveness of

F-15

BENTLEY PHARMACEUTICALS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 7--RELATED PARTY NOTES (CONTINUED)

principal and accrued interest totaling approximately \$56,000, \$11,000 and \$31,000, due from Messrs. Murphy, Price and Gyurik, respectively. The amounts forgiven were applied first to unpaid accrued interest and then to principal. These amounts were recorded as compensation expense during the year ended December 31, 2001 and treated as taxable income to the respective executives. The remaining loan balances, which bear interest at 2.37% annually, mature in March 2003 and are secured by 24,900, 5,400 and 14,200 shares of the Company's Common Stock owned by Messrs. Murphy, Price and Gyurik, respectively, as of December 31, 2001. Accrued interest on such loans totals approximately \$1,000 and \$23,000 at December 31, 2001 and 2000, respectively.

In January 2002, the Compensation Committee of the Company's Board of Directors agreed to amend the loan agreements, resulting in the forgiveness of principal and accrued interest totaling approximately the same amounts as in December 2001 and the reduction in the number of shares collateralizing the remaining loan amounts to 18,700, 4,000 and 10,700 shares of the Company's Common Stock owned by Messrs. Murphy, Price and Gyurik, respectively. These amounts were recorded as compensation expense during the year ended December 31, 2002 and treated as taxable income to the respective executives.

The Company has included the current portion of approximately \$98,000 in prepaid expenses and other current assets and the non-current portion of approximately \$294,000 in other non-current assets in the Consolidated Balance Sheet as of December 31, 2001. The balance outstanding at December 31, 2000 of approximately \$463,000 has been included in other non-current assets.

NOTE 8--ACCRUED EXPENSES

NOTE 9--DEBT

Short-term borrowings consist of the following:

	DECEMBER 31,	
	2001	2000
	-----	-----
(IN THOUSANDS)		
Trade receivables discounted with a Spanish financial institution, with recourse, effective interest rate is 5.9% and 6.0%, respectively.....	\$1,747	\$ 967
Revolving lines of credit payable to Spanish financial institutions, average interest rate is 5.3% and 6.0%, respectively.....	10	1,480
	-----	-----
	\$1,757	\$2,447
	=====	=====

The weighted average stated interest rate on short-term borrowings outstanding at December 31, 2001 and 2000 was 5.9% and 6.0%, respectively.

The Company has revolving lines of credit with Spanish financial institutions, which lines total \$4,627,000 at December 31, 2001. The lines are scheduled to mature on various dates through November 30, 2002 and are renewable. At December 31, 2001, advances outstanding under the lines of credit were approximately \$10,000. The weighted average interest rate at December 31, 2001 and 2000 was 5.3% and 6.0%, respectively, and interest is payable quarterly.

Long-term debt consists of the following:

	DECEMBER 31,	
	2001	2000
	-----	-----
(IN THOUSANDS)		

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

	----	----
Total long-term debt.....	\$142	\$ 623
	====	=====

In December 2001, the Company entered into a loan agreement with the Spanish government as part of a research funding program. The loan is non-interest bearing and is payable in equal annual installments of approximately \$30,600 beginning in 2005. Accordingly, the Company has imputed interest at the market rate in Spain (6%) and recorded a discount on the obligation of \$72,000 and has classified the obligation at December 31, 2001 as non-current. The discount will be amortized over the ten-year term of the loan.

Loans payable to Spanish financial institutions were entered into in March 2000 to finance the acquisition of the Codeisan(R) drug license. The terms of the loans called for repayment over three years at an average interest rate of 6%. In September 2001 the loans were repaid using the proceeds from the sale of the Controlvas(R) drug license (see Note 6).

F-17

BENTLEY PHARMACEUTICALS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 9--DEBT (CONTINUED)

In February 1996, the Company publicly sold 6,900 Units at \$1,000 per Unit. Each Unit consisted of One Thousand Dollars (\$1,000) Principal Amount 12% Convertible Senior Subordinated Debenture due February 13, 2006 and 1,000 Class A Redeemable Warrants, each to purchase one share of Common Stock and one Class B Redeemable Warrant. Two Class B Redeemable Warrants entitle a holder to purchase one share of Common Stock at \$5.00 per share. During the year ended December 31, 2000, holders of the Company's 12% Debentures, converted all 7,254 of such Debentures, with a net carrying value of approximately \$5,669,000, into approximately 2,901,000 shares of Common Stock. Interest on the Debentures was payable quarterly.

For financial reporting purposes, the \$1,000 purchase price of each Unit was allocated as follows: \$722 to the Debenture, \$224 to the conversion discount feature of the Debenture and \$54 to the 1,000 Class A Warrants. None of the Unit purchase price was allocated to the Class B Warrants. Such allocation was based upon the relative fair value of each security on the date of issuance. Such allocation resulted in recording a discount on the Debentures of approximately \$1,900,000. The original issue discount and the costs related to the issuance of the Debentures was being amortized to interest expense using the effective interest method over the lives of the related Debentures until the date that such Debentures were converted into shares of Common Stock. The remaining unamortized original issue discount and related issuance costs were recorded an offset to Additional Paid-in Capital at the time of conversion. The effective interest rate on the Debentures was 18.1%.

On May 29, 1996, the Debentures and Class A Redeemable Warrants began trading separately. The expiration date of the Class A Warrants was extended to August 16, 1999. The expiration date of the underlying Class B Warrants was

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

subsequently extended to December 31, 2002.

NOTE 10--PREFERRED STOCK

The Company has 2,000,000 shares of \$1.00 Preferred Stock authorized for issuance. As of December 31, 2001 and 2000, no shares of Preferred Stock were outstanding.

NOTE 11--STOCKHOLDERS' EQUITY

At December 31, 2001 the Company had the following Common Stock reserved for issuance under various plans and agreements (in thousands):

	COMMON SHARES -----
For exercise of stock purchase warrants.....	3,424
For exercise of outstanding stock options.....	2,937
For future stock option grants.....	1,006

	7,367
	=====

The Company has never paid any dividends on its Common Stock. The current policy of the Board of Directors is to retain earnings to finance the operation of the Company's business. Accordingly, it is anticipated that no cash dividends will be paid to the holders of the Common Stock in the foreseeable future.

F-18

BENTLEY PHARMACEUTICALS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 11--STOCKHOLDERS' EQUITY (CONTINUED) STOCK PURCHASE WARRANTS

At December 31, 2001, warrants to purchase an aggregate of approximately 3,424,000 shares of Common Stock were outstanding, which were exercisable at prices ranging from \$1.50 to \$20.00 per share, of which 400,000 warrants have an exercise price of \$1.50 per share, approximately 3,004,000 warrants have an exercise price of \$5.00 per share and 20,000 warrants have an exercise price of \$20.00 per share. The warrants expire on various dates from December 2002 through December 2009.

During the year ended December 31, 2001, underwriter's Class A Warrants were exercised to acquire 460,000 shares of Common Stock and 460,000 underwriter's Class B Warrants. Approximately 8,400 Class B Warrants and 150,000 other stock purchase warrants were exercised during 2001 to acquire an aggregate of 154,200 shares of Common Stock. The Company received net cash proceeds of approximately \$1,776,000 from all such exercises during the year ended December 31, 2001.

During the year ended December 31, 2000, approximately 197,000 Class B Warrants were exercised to acquire approximately 98,500 shares of Common Stock. Approximately 670,000 of other stock purchase warrants were also exercised to acquire approximately 670,000 shares of Common Stock, and Underwriter's Warrants were exercised to acquire 460 Debentures and 460,000 underwriter's Class A Warrants. The Company received net cash proceeds of approximately \$2,843,000 from all such exercises during the year ended December 31, 2000.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

During the year ended December 31, 1999, the Company issued warrants to purchase an aggregate of 450,000 shares of Common Stock at \$1.50 per share as partial consideration for the purchase of permeation enhancement technology (see Note 6), of which 50,000 were exercised during 1999. During the year ended December 31, 1999, the Company also issued Class B Warrants to purchase 659,000 shares of Common Stock for \$5.00 per share. In addition, Class A Warrants were exercised during the year ended December 31, 1999 to acquire approximately 859,000 shares of Common Stock and approximately 859,000 Class B Warrants, resulting in net cash proceeds to the Company of approximately \$2,600,000. Warrants to purchase approximately 1,322,000 shares of Common Stock (including approximately 1,252,000 Class A Warrants) expired unexercised during the year ended December 31, 1999.

In addition, the Company has granted warrants in connection with various services. These warrants have been granted for terms not exceeding ten years from the date of grant.

COMMON STOCK TRANSACTIONS

During the year ended December 31, 2001, the Company issued approximately 460,000 shares of Common Stock as a result of the exercise of underwriter's Class A Warrants, approximately 4,200 shares of Common Stock upon exercise of Class B Warrants, approximately 150,000 shares of Common Stock upon exercise of 150,000 other stock purchase warrants, approximately 16,900 shares of Common Stock upon exercise of stock purchase options, and approximately 40,000 shares of Common Stock as compensation in lieu of cash. General and administrative expenses for the years ended December 31, 2001, 2000 and 1999 include \$160,000, \$39,000 and \$82,000, respectively, of non-cash equity-based compensation.

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Research and development expenses for the years ended December 31, 2001, 2000 and 1999 include \$102,000, \$30,000 and \$143,000, respectively, of non-cash equity-based compensation.

During the year ended December 31, 2000, the Company issued approximately 98,500 shares of Common Stock as a result of the exercise of approximately 197,000 Class B Warrants, approximately 670,000 shares of Common Stock upon exercise of other stock purchase warrants, approximately 14,000 shares of Common Stock upon exercise of stock purchase options and approximately 2,901,000 shares of Common Stock upon conversion of 7,254 of the Company's 12% Convertible Debentures.

During the year ended December 31, 1999, the Company issued approximately 585,000 shares of Common Stock as partial consideration for the acquisition of permeation enhancement technology, approximately 859,000 shares of Common Stock as a result of the exercise of approximately 859,000 Class A Warrants, approximately 77,000 shares of Common Stock upon conversion of 193 of the Company's 12% Convertible Debentures, 150,000 shares of Common Stock as compensation in lieu of cash, 66,000 shares of Common Stock for consulting fees earned in 1996, 1997 and 1998 and 50,000 shares of Common Stock upon exercise of other stock purchase warrants.

F-20

BENTLEY PHARMACEUTICALS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 11--STOCKHOLDERS' EQUITY (CONTINUED) STOCK OPTION PLANS

The Company has in effect Stock Option Plans (the "Plans"), pursuant to which directors, officers, and employees of the Company are eligible to receive grants of options for the Company's Common Stock. Approximately 3,943,000 shares of Common Stock have been reserved for issuance under the Plans, of which approximately 943,000 are outstanding under the 1991 Plan, approximately 494,000 are outstanding under the 2001 Employee and Director Plans and 1,500,000 are outstanding under the Executive Plan as of December 31, 2001. Options may be granted for terms not exceeding ten years from the date of grant except for stock options which are granted to persons owning more than 10% of the total combined voting power of all classes of stock of the Company. For these individuals, options may be granted for terms not exceeding five years from the date of grant. Options may not be granted at a price which is less than 100% of the fair market value on the date the options are granted (110% in the case of persons owning more than 10% of the total combined voting power of the Company). Options granted under the Plans generally vest over one, two or three years. Options to purchase 16,900 and 14,000 shares of Common Stock were exercised during the years ended December 31, 2001 and 2000, respectively, resulting in net cash proceeds of approximately \$51,000 and \$35,000, respectively. No such options were exercised during the year ended December 31, 1999.

Had the compensation cost for the Plans been determined based on the fair value at the grant dates for awards under the Plans, consistent with the method described in SFAS 123, the Company's net income (loss) and basic and diluted net income (loss) per common share on a pro forma basis would have been:

YEAR ENDED DECEMBER 31,		
2001	2000	1999

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

(IN THOUSANDS, EXCEPT PER SHARE DATA)

Net loss.....	\$ (679)	\$ (3,299)	\$ (1,365)
Basic and diluted net loss per common share.....	\$ (.05)	\$ (.25)	\$ (.15)

The preceding pro forma results were calculated using the Black-Scholes option-pricing model. The following assumptions were used for the years ended December 31, 2001, 2000 and 1999, respectively: (1) risk-free interest rates of 5.2%, 6.6% and 5.8%, respectively; (2) dividend yields of 0.0%; (3) expected lives of 10 years; and (4) volatility of 140.8%, 126.9% and 90.0%, respectively. The weighted average fair value of options granted during the years ended December 31, 2001, 2000 and 1999 was \$3.72, \$4.48 and \$2.62, respectively. Results may vary depending on the assumptions applied within the model.

=====	=====	=====	===	=====	=====

Options and warrants outstanding include approximately 3,424,000 warrants, all of which are exercisable, and approximately 2,937,000 options, of which approximately 2,317,000 are vested and exercisable at December 31, 2001.

401(K) RETIREMENT PLAN

The Company sponsors a 401(k) retirement plan (the "401(k) Plan") under which eligible employees may contribute, on a pre-tax basis, between 1% and 15% of their respective total annual

F-22

BENTLEY PHARMACEUTICALS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 11--STOCKHOLDERS' EQUITY (CONTINUED)

income from the Company, subject to maximum aggregate annual contribution imposed by the Internal Revenue Code of 1986, as amended. All full-time employees who work for the Company in the U.S. are eligible to participate in the 401(k) Plan. All employee contributions are allocated to the employee's individual account and are invested in various investment options as directed by the employee. Employees' cash contributions are fully vested and nonforfeitable. The Company made matching contributions to the 401(k) Plan during the year ended December 31, 2001 in the form of approximately 13,658 shares of the Company's Common Stock valued at approximately \$83,000. The Company made matching cash contributions to the 401(k) Plan for the year ended December 31, 2000 of approximately \$2,500 and in the form of approximately 7,000 shares of the Company's Common Stock valued at approximately \$57,000. The Company made matching cash contributions to the 401(k) Plan for the year ended December 31, 1999 of approximately \$27,000. All Company matching contributions vest 25% each year for the first four years of each employee's employment.

STOCKHOLDER RIGHTS PLAN

On December 22, 1999, the Board of Directors adopted a stockholder rights plan pursuant to which a dividend of one right for each outstanding share of the Company's Common Stock on the record date of December 27, 1999 was declared. The plan is designed to prevent a potential acquirer from gaining control of the Company without fairly compensating all of the Company's stockholders and to protect the Company from coercive takeover attempts. Each of the rights, which are not currently exercisable, entitles the holder to purchase one one-thousandth of a share of Series A Junior Participating Preferred Stock at an exercise price of \$16.50. The rights will become exercisable only if a person or group of affiliated persons beneficially acquire(s) 15% or more of the Company's Common Stock. Under certain circumstances, each holder of a right (other than

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

the person or group who acquired 15% or more of the Company's Common Stock) is entitled to purchase a defined number of shares of the Company's Common Stock at 50% of the market price of the Common Stock at the time that the right becomes exercisable.

NOTE 12--PROVISION FOR INCOME TAXES

For all periods presented the income (loss) before income taxes as shown in the consolidated statements of operations consists of losses generated in the United States and income derived from foreign operations.

The provision (benefit) for income taxes consists of the following:

	FOR THE YEAR ENDED DECEMBER 31,		
	2001	2000	1999
	(IN THOUSANDS)		
Foreign taxes.....	\$2,452	\$ 222	\$ 781
Tax benefit from US operating losses.....	(954)	(657)	(678)
Federal and state deferred taxes.....	(898)	1,162	(1,042)
Change in valuation allowance.....	1,852	(505)	1,720
	-----	-----	-----
Total provision for income taxes.....	\$2,452	\$ 222	\$ 781
	=====	=====	=====

F-23

BENTLEY PHARMACEUTICALS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 12--PROVISION FOR INCOME TAXES (CONTINUED)

A reconciliation between the federal statutory rate and the Company's effective income tax rate is as follows:

	FOR THE YEAR ENDED DECEMBER 31		
	2001	2000	1999
Statutory federal income tax (benefit).....	\$1,296	\$ (178)	\$ (105)
Permanent differences from foreign subsidiary.....	202	(257)	208
Valuation allowance.....	954	657	678
	-----	-----	-----
	\$2,452	\$ 222	\$ 781
	=====	=====	=====

The components of the Company's deferred taxes are as follows:

DECEMBER 31,	
2001	2000

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

(IN THOUSANDS)

Deferred tax assets:		
NOL carryforwards.....	\$14,075	\$12,651
Capital loss carryforwards.....	10,799	10,641
Disposition of subsidiary.....	6,850	6,750
Foreign tax on deferred income.....	141	851
Tax credit carryforwards.....	415	415
Other, net.....	603	428
	-----	-----
Total deferred tax assets.....	32,883	31,736
Deferred tax liabilities.....	(275)	(270)
Valuation allowance.....	(32,467)	(30,615)
	=====	=====
Deferred tax asset, net.....	\$ 141	\$ 851
	=====	=====

The Company has established a valuation allowance equal to the full amount of the domestic deferred tax asset, as future domestic operating profits cannot be assured. The Company has a current deferred tax asset of \$141,000 and a non-current tax liability of \$1,827,000 due to temporary differences arising as a result of the Company's Spanish subsidiary recording the gain on the sale of Controlvas(R) and the corresponding taxes for Spanish statutory purposes during the year ended December 31, 2000. The deferred tax asset is a result of taxes that related to deferred income and the tax liability results from taxes that will be payable in Spain beginning in 2004.

Under the provisions of the Internal Revenue Code, certain substantial changes in the Company's ownership may have limited, or may limit in the future, the amount of net operating loss (the "NOL") carryforwards which could be utilized annually to offset future taxable income and income tax liabilities. The amount of any annual limitation is determined based upon the Company's value prior to an ownership change.

At December 31, 2001, the Company has NOL carryforwards of approximately \$36,047,000 available to offset U.S. taxable income. The Company calculates that its use of the NOL generated through December 31, 1997 may be limited to approximately \$1,000,000 each year as a result of stock option and warrant issuances resulting in an ownership change of more than 50% of the Company's

F-24

BENTLEY PHARMACEUTICALS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 12--PROVISION FOR INCOME TAXES (CONTINUED)

outstanding equity. The NOL of approximately \$3,200,000 generated during the tax year ended December 31, 1998 is available to offset future taxable income along with the 1999, 2000 and 2001 losses without limitation. Additionally, approximately \$1,800,000 of the NOL generated in 1995 available to offset future U.S. taxable income will be limited to approximately \$300,000 per year over the subsequent six years due to the change in tax year end during 1995. If not offset against future taxable income, the NOL carryforwards will expire in tax years 2007 through 2022.

NOTE 13--BUSINESS SEGMENT INFORMATION

The Company is a U.S.-based specialty pharmaceutical company focused on

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

advanced drug delivery technologies and pharmaceutical products. The Company also has a commercial presence in Europe. The Company's Spanish subsidiaries, Laboratorios Belmac S.A. and Laboratorios Davur S.L., manufacture and market branded and generic pharmaceutical products in Spain. In the U.S., the Company's activities consist primarily of limited product research and development, business development activities, corporate management, and administration.

Laboratorios Belmac and its subsidiaries derive its revenues from the sales of its own products as well as from product manufacturing for others, within four primary therapeutic categories of cardiovascular, gastrointestinal, infectious and neurological diseases.

Set forth in the tables below is certain financial information with respect to the Company's geographical segments for the years ended December 31, 2001, 2000 and 1999. The geographical segments use the same accounting policies as those described in the summary of significant accounting policies in Note 2.

Interest income and interest expense are based upon the actual results of each operating segment's assets and borrowings. The consolidation/elimination column includes the elimination of all inter-segment amounts as well as corporate segment amounts. The principal component of the inter-segment amounts related to inter-segment advances.

Revenues from one customer exceeded 10% of consolidated net sales during the year ended December 31, 2001, accounting for 15% of 2001 consolidated net sales and 7.5% of the consolidated receivables balance at December 31, 2001. Revenues from one customer exceeded 10% of consolidated net sales during the year ended December 31, 2000, accounting for 14% of 2000 consolidated net sales. Revenues from two customers exceeded 10% of consolidated net sales during the year ended December 31, 1999, each accounting for 13% of 1999 consolidated net sales.

F-26

BENTLEY PHARMACEUTICALS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 14--COMMITMENTS AND CONTINGENCIES

The Company is obligated to pay certain royalty payments upon commercialization of products using technologies acquired in a transaction,

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

which it consummated during the year ended December 31, 1999 (see Note 6).

The Company has entered into various employment agreements with its executive officers, which agreements provide for salaries, potential bonuses and other benefits in exchange for services provided by the executive officers. The employment agreements also provide for certain compensation in the event of termination or change in control of the Company. Such agreements, which are renewable, are scheduled to expire on various dates through December 31, 2003.

The Company was awarded a judgment of approximately \$2,130,000 in the Circuit Court of the Thirteenth Judicial Circuit, State of Florida, Hillsborough County Civil Division during the year ended December 31, 1998, relating to its claims of civil theft and breach of employment agreement filed against its former President and Chief Executive Officer, Michael M. Harshbarger. The judgment included treble damages totaling \$418,000 related to the civil theft claim and \$1,712,000 related to the breach of employment agreement claim. Harshbarger originally filed suit against the Company in November 1993, alleging wrongful termination, seeking monetary damages in excess of \$1,400,000. In addition to establishing a receivable on the Company's books, it has established a reserve equal to the receivable, as it is of the opinion that Harshbarger does not have the financial resources to satisfy the judgment. Harshbarger filed a Motion for Relief From Judgment in September 1999, alleging among other things that he was not provided notice of the August 24, 1998 jury trial. A hearing was held on November 27, 2001 to determine the merits of Harshbarger's claims. The judge determined that the facts of the case did not warrant setting aside the default and judgment against Harshbarger and denied all of Harshbarger's motions. Harshbarger did not file a notice of appeal within the requisite time period, therefore, the Company considers that this matter has been concluded and expects no further action other than any action it may take to enforce the judgment.

On January 22, 2001, the Company settled a legal dispute, by paying \$140,000 to Creative Technologies, Inc. and Creative Technologies, Inc. agreed to the dismissal of the related suit with prejudice. Creative Technologies had asserted that it was due a brokerage or finder's fee with respect to the Company's 1999 acquisition of permeation enhancement technology. The Company included the accrual for the \$140,000 charge in its Consolidated Balance Sheet as of December 31, 2000 and included the \$140,000 charge and related legal costs of approximately \$55,000 in operating expenses in the Consolidated Statement of Operations for the year ended December 31, 2000.

On February 4, 2002, the Company was notified that a legal proceeding had been commenced against it by Merck & Co. Inc. and its Spanish subsidiary, Merck Sharp & Dohme de Espana, S.A., (together "Merck") alleging that the Company violated Merck's patents in the production of the product simvastatin. The case was brought against the Company's Spanish subsidiaries in the 39th First Instance Court of the City of Madrid. Merck requested after a hearing that the court grant an injunction ordering the Company not to manufacture or market simvastatin. On February 18, 2002, the court refused to grant the requested injunction and dismissed the case on February 25, 2002, awarding the Company court and legal fees. There were no sales of simvastatin included in consolidated net sales for the year ended December 31, 2001, as the product was launched in late January.

The Company leases certain equipment and facilities under non-cancelable operating leases, which expire through the year 2006. Total charges to operations under operating leases were approximately

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

ITEM 15. INDEMNIFICATION OF OFFICERS AND DIRECTORS.

The Registrant's Amended and Restated Certificate of Incorporation (the "Certificate") provides that the liability of a director of the Registrant shall be eliminated or limited to the fullest extent permitted by the Delaware General Corporation Law. Under the Delaware General Corporation Law, the directors have a fiduciary duty to the Registrant which is not eliminated by this provision of the Certificate and, in appropriate circumstances, equitable remedies such as injunctive or other forms of non-monetary relief will remain available. In addition, each director will continue to be subject to liability under the Delaware General Corporation Law for breach of the director's duty of loyalty to the Registrant, for acts or omissions which are found by a court of competent jurisdiction to be not in good faith or involving intentional misconduct, for knowing violations of law, for actions leading to improper personal benefit to the director, and for payment of dividends or approval of stock repurchases or redemptions that are prohibited by the Delaware General Corporation Law. This provision also does not affect the directors' responsibilities under any other laws, such as the Federal securities laws or state or Federal environmental laws. The Registrant has obtained liability insurance for its officers and directors.

Section 145 of the Delaware General Corporation Law empowers a corporation to indemnify its directors and officers and to purchase insurance with respect to liability arising out of their capacity or status as directors and officers, provided that this provision shall not eliminate or limit the liability of a director: (i) for any breach of the director's duty of loyalty to the corporation or its stockholders, (ii) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, (iii) arising under Section 174 of the Delaware General Corporation Law, or (iv) for any transaction from which the director derived an improper personal benefit. The Delaware General Corporation Law provides further that the indemnification permitted thereunder shall not be deemed exclusive of any other rights to which the directors and officers may be entitled under the corporation's bylaws, any agreement, a vote of stockholders or otherwise. The Certificate eliminates the personal liability of directors to the fullest extent permitted by Section 102(b)(7) of the Delaware General Corporation Law and provides that the Registrant shall fully indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding (whether civil, criminal, administrative or investigative) by reason of the fact that such person is or was a director or officer of the Registrant, or is or was serving at the request of the

II-1

Registrant as a director or officer of another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise, against expenses (including attorney's fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding. At present, there is no pending litigation or proceeding involving any director, officer, employee or agent as to which indemnification will be required or permitted under the Certificate. The Registrant is not aware of any threatened litigation or proceeding that may result in a claim for such indemnification.

In connection with this offering, the Registrant agreed to indemnify the placement agent against liabilities, including legal fees, that the placement agent may incur under the Securities Act, the Exchange Act, or any other federal or state statutory law or regulation, or at common law or otherwise in connection with this registration statement, including the prospectus, financial statements and schedules, and amendments and supplements to those documents, except liabilities related to misstatements or omissions made in the

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

registration statement in conformity with written information furnished to us by or on behalf of the placement agent expressly for use in the registration statement or prospectus or any breach or violation of the representations and warranties of the placement agent under the placement agent agreement between the Registrant and the placement agent dated as of March , 2002.

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to our directors, officers and controlling persons pursuant to the provisions described above, or otherwise, we have been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than our payment of expenses incurred or paid by our director, officer or controlling person in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered for resale, we will, unless in the opinion of our counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

The undersigned Registrant hereby undertakes:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement to include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement.

(2) That, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

(4) That for purposes of determining any liability under the Securities Act of 1933, each filing of the Registrant's annual report pursuant to Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934 (and, where applicable, each filing of an employee benefit plan's annual report pursuant to Section 15(d) of the Securities Exchange Act of 1934) that is incorporated by reference in the Registration Statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(5) Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the Registrant pursuant to the foregoing provisions,

Edgar Filing: BENTLEY PHARMACEUTICALS INC - Form S-3/A

Delaware General Corporation Law, or otherwise, the Registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer, or controlling person of the Registrant in the successful defense of any action, suit, or proceeding) is asserted by such director, officer, or controlling person in connection with the securities being registered hereunder, the Registrant will, unless in the opinion of its counsel the question has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question of whether such indemnification by it is against public policy as expressed in the Securities Act of 1933 and will be governed by the final adjudication of such issue.
