**Item 2.01 Completion of Acquisition or Disposition of Assets**

On August 6, 2007, Newfield Exploration Company issued a press release announcing the closing on its previously announced sale of its Gulf of Mexico shelf assets to McMoRan Exploration Co. (NYSE: MMR) for total cash consideration of \$1.1 billion and the assumption by the buyer of liabilities associated with future abandonment of wells and platforms. A copy of the press release is furnished herewith as Exhibit 99.1.

**Item 9.01 Financial Statements and Exhibits**

(b) Pro forma financial information

The unaudited pro forma condensed consolidated balance sheet as of June 30, 2007 and the unaudited pro forma condensed consolidated income statements for the six months ended June 30, 2007 and the year ended December 31, 2006 that give effect to the disposition described therein begin on page F-1 of this report.

(d) Exhibits

99.1	Press release issued by Newfield Exploration Company on August 6, 2007.

**NEWFIELD EXPLORATION COMPANY**

**UNAUDITED PRO FORMA CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

The following unaudited pro forma condensed consolidated financial statements are presented to give effect to the disposition on August 6, 2007 of substantially all of our properties in the Gulf of Mexico for \$1.1 billion in cash and the assumption by the buyer of liabilities associated with future abandonment of wells and platforms (the "Disposition"). We retained most of our deepwater properties and partial interests in some primary term acreage on the shelf.

The unaudited pro forma condensed consolidated income statement for the year ended December 31, 2006 has been derived from our consolidated income statement for the year ended December 31, 2006. The unaudited pro forma condensed consolidated income statement should be read together with our consolidated income statement and the notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2006.

The unaudited pro forma condensed consolidated balance sheet as of June 30, 2007 and the unaudited pro forma condensed consolidated income statement for the six months ended June 30, 2007 have been derived from our interim consolidated financial statements included in our Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2007 and should be read in conjunction with those financial statements, including the notes thereto.

The unaudited pro forma condensed consolidated financial statements are based on the following assumptions and adjustments:

- the unaudited pro forma balance sheet is presented as if the Disposition occurred on June 30, 2007;

the unaudited pro forma income statements present our operations as if the Disposition had occurred on January 1, 2006; and

the unaudited pro forma estimates of proved reserves and unaudited pro forma standardized measure of discounted future net cash flows related to proved oil and gas reserves give effect to the Disposition as if it had occurred at December 31, 2006.

Pursuant to Securities and Exchange Commission rules for pro forma financial statements, no pro forma adjustments were made with respect to the following:

reductions in general and administrative expense to reflect cost savings associated with the reduction in our technical and administrative staff resulting from the Disposition;

increases in assumed interest income associated with the investment of the proceeds received from the Disposition; and

adjustments to historical business interruption insurance premium expense or benefits associated with our risk management policies related to our operations in the Gulf of Mexico.

The unaudited pro forma condensed consolidated financial statements are presented for illustrative purposes only. The financial results may have been different if the Disposition had occurred as of the dates indicated above. This financial information does not purport to indicate the future results that we will experience.

**NEWFIELD EXPLORATION COMPANY**

**NOTES TO UNAUDITED PRO FORMA CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**Pro Forma Assumptions:**

- (a) Represents cash proceeds of \$1.1 billion less transaction costs of \$8 million related to the Disposition.
- (b) Represents adjustments resulting from the reduction in our debt outstanding under our credit arrangements using the proceeds from the Disposition. Adjustments to interest expense are associated with historical borrowings outstanding under our credit arrangements. Adjustments to capitalized interest are associated with historical amounts capitalized to the properties included in the Disposition.
- (c) We structured the Disposition and our recent Rocky Mountain asset acquisition as a like-kind exchange under Section 1031 of the Internal Revenue Code. We elected to retain \$100 million of the proceeds from the Disposition in the like-kind exchange structure for application to the purchase price of future acquisitions. Additional future acquisitions may be included in the like-kind exchange structure if they are consummated within the time period required under Section 1031. While the proceeds are retained in this structure, they are not available for other uses, including to repay outstanding borrowings under our credit arrangements. As a result, they are shown as restricted cash on our unaudited pro forma condensed consolidated balance sheet included herein.
- (d) Represents adjustments to remove the asset retirement obligation associated with the properties included in the Disposition.
- (e) Represents the estimated current income taxes payable associated with the sale and the reversal of historical deferred taxes on the properties included in the Disposition which were calculated utilizing available net operating loss carryforwards, the benefit of the like-kind exchange under Section 1031 and the 35% statutory U.S. federal income tax rate.
- (f) Represents \$1.3 million of deferred losses (net of tax of \$0.6 million) in accumulated other comprehensive income that will be reclassified to earnings due to the loss of hedge accounting on certain commodity derivative contracts designated as hedges against a portion of our Gulf of Mexico production. This one time charge is based on the fair value of our derivative contracts as of June 30, 2007. The actual charge will be based on the fair value of these derivative contracts on August 6, 2007, when the transaction was completed. The derivative contracts previously associated with properties included in the Disposition will continue to be carried on our balance sheet at fair value with the changes in fair value reflected on a mark-to-market basis in our income statement. For purposes of the pro forma income statement presentation, we have not reflected any mark-to-market adjustments associated with the changes in fair value of the derivative contracts that will lose hedge accounting in conjunction with the Disposition.
- (g) Represents adjustments to remove historical revenues and operating expenses associated with the properties included in the Disposition.
- (h) Represents adjustment to reclassify historical cash flow hedge settlement amounts associated with certain derivative contracts historically designated as hedges against a portion of our Gulf of Mexico production from “Oil and gas revenues” to “Commodity derivative income (expense).”
- (i) Represents adjustment to reflect the pro forma impact of the Disposition on depreciation, depletion and amortization expense. This adjustment includes: (1) the reduction in DD&A reflecting the production volumes attributable to the properties included in the Disposition; (2) the revision to our DD&A rate resulting from the

application of the proceeds from the Disposition to our full cost pool in accordance with the full cost method of accounting for oil and gas activities; and (3) the reduction in accretion expense related to the asset retirement obligation attributable to the properties included in the Disposition.

(j) Represents adjustment to income tax expense on the historical revenues and operating expenses associated with the properties included in the Disposition and pro forma adjustments calculated using the 35% statutory U.S. federal income tax rate.
