PART I
FINANCIAL INFORMATION

Forward-Looking Information

Certain statements in this Form 10-QSB and elsewhere (such as in other
filings by WARP Technology Holdings, Inc. (the "Company") with the Securities
and Exchange Commission (the "Commission"), press releases, presentations by the
Company or its management and oral statements) may constitute "forward-looking
statements" within the meaning of the Private Securities Litigation Reform Act

Edgar Filing: WARP TECHNOLOGY HOLDINGS INC - Form 10QSB

of 1995. Such forward-looking statements include those relating to future opportunities, the outlook of customers, the reception of new products and technologies, and the success of new initiatives. In addition, such forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results expressed or implied by such forward-looking statements. Such factors include: (i) demand for the Company's products; (ii) the actions of current and potential new competitors; (iii) changes in technology; (iv) the nature and amount of the Company's revenues and expenses; and (v) overall economic conditions and other risks detailed from time to time in the Company's periodic earnings releases and reports filed with the Commission, as well as the risks and uncertainties discussed in the Company's Annual Report on Form 10-KSB filed with the Commission on October 7, 2002 (the "Form 10-KSB").

Notes To Consolidated Financial Statements

Note 1. Organization Merger and Description of Business

On May 24, 2002 ("the Closing Date") Abbott Mines, Ltd. ("AMI"), a Nevada corporation, acquired the outstanding common stock of WARP Solutions, Inc. ("WARP") in a Share Exchange transaction (the "Share Exchange"). The transaction was effected by the issuance of 1.3813632 shares of AMI's common stock, or 5.5254528 shares of AMI's common stock after giving effect to the September Stock Dividend described below. In connection with the Share Exchange, the officers and directors of WARP became the officers of AMI and joined the board of directors of AMI, replacing AMI's officers and one of the AMI directors who resigned their positions at the Closing Date. This resulted in the former WARP stockholders owning the majority of the outstanding shares of AMI. For financial reporting purposes, the transaction is accounted for as a reverse acquisition, and WARP has been treated as the acquiring entity for accounting purposes.

Although AMI is the surviving legal entity in the Share Exchange, the transaction was accounted for as an issuance of equity by WARP, and a recapitalization of WARP under the capital structure of AMI in exchange for \$690 in net assets. Under the purchase method of accounting, the historical results of WARP have been carried forward and AMI's operations have been included in the financial statements commencing on the Closing Date. Accordingly, all the historical results included are those of WARP only.

On September 20, 2002, the Company's Board of Directors declared a stock split in the form of a dividend (the "September Stock Dividend") payable to the common stockholders of record on September 24, 2002 (the "record date") of three shares of common stock for each one share issued and outstanding on the record date. The September Stock Dividend was effective and payable on October 2, 2002. All common share amounts have been reflected in the accompanying financial statements and related footnotes as if the Share Exchange and the September Stock Dividend had occurred as of July 1, 2001.

On August 12, 2002, the Company's Board of Directors authorized and approved the establishment of a subsidiary in the state of Nevada with the name WARP Technology Holdings, Inc. In addition, the Company's Board of Directors authorized and approved the issuance of 100,000 shares of the Company's common stock, to its attorneys for legal services.

On August 15, 2002, the Company's Board of Directors authorized and approved the upstream merger of WARP Technology Holdings, Inc., the Company's wholly-owned subsidiary, with and into the Company pursuant to Chapter 92A of the Nevada Revised Statutes of the State of Nevada ("the Upstream Merger"). The Upstream Merger became effective on August 21, 2002, when the Company filed Articles of Merger, and as authorized by Section 92A.180 of the Nevada Revised Statutes of the State of Nevada, the Company changed its name from Abbott Mines, Ltd. to WARP Technology Holdings, Inc.

Note 1. Organization Merger and Description of Business (continued)

AMI was incorporated on June 26, 2000, for the purpose of acquiring, exploring and developing mining properties. Subsequent to the Closing Date, AMI ceased all exploration activities.

WARP was organized as a Delaware Limited Liability Company ("LLC") on July 16,

Edgar Filing: WARP TECHNOLOGY HOLDINGS INC - Form 10QSB

1999, for the purpose of developing Internet performance and security software. On December 14, 1999, the LLC was reorganized as a Delaware corporation and changed its name to WARP Solutions, Inc. WARP is creating software solutions, which allow web-sites to handle more traffic and provide a reliable web experience. The WARP 2063, which was completed and available for general release in 2002, is WARP's sole product. WARP is actively selling the WARP 2063 worldwide, focusing on the United States, the United Kingdom, and the Far East. Additionally, WARP Solutions is developing products that permit secure and private transactions over the Internet.

Blue Suit Consulting ("Blue Suit"), a wholly-owned subsidiary of WARP, was established in July 2000, for the purpose of performing temporary and permanent recruitment services. Effective April 2001, management ceased the operations of Blue Suit.

Note 2. Summary of Significant Accounting Policies

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of WARP and its wholly-owned subsidiary, (collectively the "Company"). All material intercompany transactions and balances have been eliminated in consolidation.

Basis of Presentation

The Company was a development stage enterprise through December 31, 2001. In 2002, the Company began to generate revenues and ceased to be a development stage enterprise.

Change of Year End

During 2002, the Company announced a fiscal year end change from December 31 to June 30.

7

Note 2. Summary of Significant Accounting Policies (continued)

Revenue Recognition

Pursuant to AICPA Statement of Position ("SOP") 97-2, Software Revenue Recognition, the Company recognizes revenues from software licenses when persuasive evidence of a contractual arrangement exists, delivery has occurred, the fee is fixed or determinable and collection is probable. The Company's software licenses generally are marketed with certain postcontract customer support ("PCS") and other obligations, which may include maintenance, delivery of unspecified upgrades, and warranties regarding service response times. Revenue under PCS agreements are recognized ratably over the term of the agreement. Under SOP 97-2, the Company must allocate revenue to each element based on vendor specific objective evidence ("VSOE") of each element's fair value. Since the Company has just begun to market its products, VSOE of the fair value of each element has not been clearly established. Accordingly, revenue from license agreements are being recognized ratably over the term of the PCS agreement.

Loss Per Share

Basic and diluted net loss per share information for all periods is presented under the requirements of SFAS No. 128, Earnings Per Share. Basic loss per share is calculated by dividing the net loss by the weighted-average common shares

Edgar Filing: WARP TECHNOLOGY HOLDINGS INC - Form 10QSB

outstanding during the period. Diluted loss per share is calculated by dividing net loss by the weighted-average common shares outstanding plus the dilutive effect of convertible preferred stock, warrants and stock options. The dilutive effect of preferred stock, warrants and options is not included as the inclusion of such is anti-dilutive for all periods presented.

Segment Information

The Company operates in one segment.

Impact of Recent Accounting Pronouncements

In August 2001, the Financial Accounting Standards Board ("FASB") issued SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets ("SFAS 144"), which addresses financial accounting and reporting for the impairment or disposal of long-lived assets and supercedes SFAS No. 121, Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of, and the accounting and reporting provisions of APB Opinion No. 30, Reporting the Results of Operations, for a disposal of a segment of a business. SFAS 144 is effective for fiscal years beginning after December 15, 2001, with earlier application encouraged. The Company adopted SFAS 144 on January 1, 2002. The statement did not have a significant impact on the Company's financial position or results of operations.

8

Note 2. Summary of Significant Accounting Policies (continued)

Impact of Recent Accounting Pronouncements (continued)

In April 2002, the FASB issued SFAS No. 145, Rescission of SFAS Nos. 4, 44 and 64, Amendment of SFAS No. 13 and Technical Corrections as of April 2000. SFAS No. 145 revises the criteria for classifying the extinguishment of debt as extraordinary and the accounting treatment of certain lease modifications. SFAS No. 145, which became effective on July 1, 2002, did not have any impact on the Company's consolidated financial statements.

In July 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. SFAS No. 146 provides guidance on the timing of the recognition of costs associated with exit or disposal activities. The new guidance requires costs associated with exit or disposal activities to be recognized when incurred. Previous guidance required recognition of costs at the date of commitment to an exit or disposal plan. The provisions of the statement are to be adopted prospectively after December 31, 2002. Although SFAS No. 146 may impact the accounting for costs related to exit or disposal activities the Company may enter into in the future, particularly the timing of recognition of these costs, the adoption of the statement will not have an impact on the Company's present financial condition or results of operations.

Note 3. Stockholders Equity

In June 2002, the Company issued 10,364,408 shares of common stock for gross proceeds of approximately \$2,300,000 in cash and the conversion of approximately \$237,000 of bridge notes obtained in 2002.

In September 2002, the Company closed an offering of 3,600,000 restricted shares of its common stock in a private transaction for gross proceeds of \$900,000 in cash. The Company paid finders and placement fees in the amount of \$136,000 in connection with this transaction.

Note 4. Other

Edgar Filing: WARP TECHNOLOGY HOLDINGS INC - Form 10QSB

On August 13, 2002 the Company entered into a memorandum of understanding (the "MOU") to enter into a business combination transaction with Spider Software, Inc. ("Spider Software"), a Canadian corporation. The completion of the transaction contemplated by this MOU will be subject to, among other things, satisfactory completion of financial and legal due diligence by the Company and Spider Software as well as the completion of final transaction documentation in a form acceptable by the parties. In connection with the MOU, and in anticipation of the completion of the transaction contemplated by this MOU, the Company has advanced to Spider Software \$44,000 in order to finance the ongoing operations of Spider Software.

9

ITEM 2. Management's Discussion And Analysis Or Plan Of Operation.

The following discussion and analysis provides information which the Company's management believes is relevant to an assessment and understanding of the Company's results of operations and financial condition. This discussion should be read together with the Company's financial statements and the notes to financial statements which are included in this report, and with the Company's Form 10-KSB.

On May 24, 2002 (the "Closing Date") the Company acquired WARP Solutions, Inc. ("WARP") in a share exchange transaction. This resulted in the former WARP stockholders owning the majority of the outstanding shares of the common stock of the Company. For financial reporting purposes, the transaction was accounted for as a reverse acquisition, and WARP was treated as the acquiring entity for accounting purposes.

Although the Company is the surviving legal entity in the share exchange, the transaction was accounted for as an issuance of equity by WARP, and a recapitalization of WARP under the capital structure of the Company in exchange for \$690 in net assets. Under the purchase method of accounting, the historical results of WARP have been carried forward and the Company's operations have been included in the financial statements commencing on the Closing Date. Accordingly, all the historical results included are those of WARP only. Results of operations after the Closing Date include the results of both companies on a consolidated basis.

Plan of Operations

The Company's plan of operation is to develop, manage and market the products of WARP, its direct subsidiary. WARP has developed a unique and proprietary technology which accelerates the processing speed of dynamic content requests, and improves the efficiency of an internet or intranet network's infrastructure that handles such requests. WARP's technology is incorporated into a network appliance that moves the processing of dynamic content requests away from the core of an enterprises' network infrastructure to the edge of that infrastructure. By doing so, WARP's technology and product should enable an enterprise to improve the efficiency of its network infrastructure resulting in:

- i) The elimination of complex transaction-processing bottlenecks,
- ii) Increased response times,
- iii) Lower hardware costs, and
- iv) Lower wide area network costs.

WARP believes that it can extend the core technology of the WARP 2063, our current product offering, to deliver similar functionality and efficiency to

Edgar Filing: WARP TECHNOLOGY HOLDINGS INC - Form 10QSB

wireless transaction processing over the next twenty-four months as part of its Global Transaction Enabled Network ("GTEN") strategy. There can be no assurances however that WARP will have the financial or manpower resources necessary to develop and or market the WARP 2063, GTEN or any future products for wireless solutions.

10

WARP believes that there is a growing market for its technology and product. With broadband connectivity being more common, the volume of transactions being processed over networks is increasing. WARP believes that the increase in the number of broadband connections and the related increase in transaction processing have contributed to application congestion in the applications layers and database layers of network enabled applications. WARP believes that the WARP 2063 can help relieve such application congestion by increasing a network's efficiency through better management of the flow and processing of dynamic transaction requests.

The market for the WARP 2063 and other application acceleration technology is new and undeveloped. As a result, WARP believes that there is the potential for reasonable growth in this market for the next five years. At present, the WARP 2063 is still considered to be an early stage product. WARP believes that the product will require at least an additional twelve months of customer requested feature enhancements to reach maturity. We believe, despite the relative immaturity of our product, that we have and will continue to be able to attract customers to the WARP 2063 because of its potential performance and cost saving benefits.

The WARP 2063 is one component in the technology portfolio that WARP plans to develop. WARP's planned technology portfolio will consist of five components, all of which are at the alpha stage or higher in terms of development. The WARP 2063 Application Pre-Processor is one of the five components. WARP chose to lead with the WARP 2063 because of its marketability and the readiness of its technology. WARP has branded its technology portfolio GTEN. The GTEN network offering will be comprised of:

- o WARP 2063 Application Pre-Processor - currently available for sale.
- o WARP 2063 Edge Transaction Accelerator - currently going into beta cycle.
- o WARP 2063 Edge Transaction Router - slated to go into beta cycle in mid 2003
- o WARP 2063 Transaction Session Manager - in beta cycle, planned productization in 2003
- o WARP Performance Cluster - alpha stage.

The central philosophy behind WARP's technology strategy is to optimize the server stack, and then to distribute the stack in order to optimize the network. To that extent, all of the GTEN components are designed to address prevalent unaddressed bottlenecks in networks.

WARP has decided to use wholesale resellers ("channel sales") as the main distribution method for the WARP 2063. Such wholesale channels as Systems Integrators, Managed Service Providers and Value Added Resellers will be the main distribution vehicles for the WARP 2063. The Company has established reseller relationships in Europe and Asia for distribution of the WARP 2063. WARP recently entered into reseller agreements with Macnica Networks and CDI Technologies. Macnica Networks is a leading technology distributor for the Japanese market and CDI Technologies is a leading distributor for South Korea. Additionally, WARP has reseller agreements with Cable & Wireless Europe and NTT Verio Europe. WARP is currently focused on continuing the expansion of its

Edgar Filing: WARP TECHNOLOGY HOLDINGS INC - Form 10QSB

channel reseller network in North America, Asia and Europe.

11

Between July 2000 and April 2001, WARP operated, through a subsidiary called Blue Suit Consulting, a personnel consulting business specializing in outsourcing its customer's computer technology personnel. In April 2001, WARP ceased all operations at Blue Suit Consulting and since that date it has been an inactive subsidiary of WARP with no employees, revenue or operations.

Results of Operations

Three months ended September 30, 2002 vs. 2001:

During the three months ended September 30, 2002, the Company sold six WARP 2063 units to a channel reseller pursuant to a distribution agreement, for \$256,000, which is being recognized over a twelve-month period in the consolidated statements of operations pursuant to AICPA Statement of Position 97-2, Software Revenue Recognition. As a result, \$43,000 was recognized in the consolidated statements of operations for the three months ended September 30, 2002 and the balance of \$213,000, recorded as deferred revenue. The additional \$17,000 of revenue recognized during the three months ended September 30, 2002 represents deferred revenue for an agreement in effect at June 30, 2002, of which \$40,000 is still deferred at September 30, 2002.

There were no revenues during the three months ended September 30, 2001.

Product development costs were approximately \$170,000 for the three months ended September 30, 2002 compared to approximately \$841,000 for the three months ended September 30, 2001. The decrease was due primarily to the the substantial completion of the development of the WARP 2063 and the Company's change in focus from developing the WARP 2063 to marketing that product.

Sales, marketing and business development expenses were approximately \$207,000 for the three months ended September 30, 2002 compared to approximately \$5,000 for the three months ended September 30, 2001. The increase was due primarily to an increased marketing effort by the Company.

General and administrative expenses were approximately \$567,000 for the three months ended September 30, 2002 compared to approximately \$567,000 for the three months ended September 30, 2001. Although aggregate general and administrative expenses did not change, the component parts thereof consisted of an increase in consulting expenses of approximately \$72,000 and an increase in travel and entertainment of approximately \$70,000, offset by decreases in professional fees, insurance, and various other expenses of \$28,000, \$24,000 and \$70,000, respectively.

During the three months ended September 30, 2002 the Company had net interest income of approximately \$5,000 compared to net interest income of approximately \$13,000 for the three months ended September 30, 2001. The decrease is the result of a decrease in cash balances available for investment.

12

Net Operating Loss Carryforwards

At June 30, 2002, WARP had net operating loss carryforwards of approximately \$14,000,000, which may be used to reduce taxable income in future years through

Edgar Filing: WARP TECHNOLOGY HOLDINGS INC - Form 10QSB

the year 2022. Due to uncertainty surrounding the realization of the favorable tax attributes in future returns, WARP has placed a full valuation allowance against its net deferred tax asset. At such time as it is determined that it is more likely than not that the deferred tax asset is realizable, the valuation allowance will be reduced. Furthermore, the net operating loss carryforward may be subject to further limitation pursuant to Section 382 of the Internal Revenue Code.

Liquidity and Capital Resources

Since inception, the Company has financed its operations primarily through the sale of its capital stock and short-term borrowings.

Net cash used in operating activities for the three months ended September 30, 2002 was approximately \$618,000 consisting primarily of the net loss of \$878,000, offset by an increase in deferred revenue of \$196,000 and a decrease in accounts receivable of \$68,000.

Net cash used in investing activities during the three months ended September 30, 2002 of \$41,000 consisted of the payment of a \$44,000 advance in connection with the proposed acquisition of Spider Software, Inc. by the Company and the purchase of property and equipment of \$13,000, offset by the repayment of a stockholder loan.

Net cash provided by financing activities during the three months ended September 30, 2002 of \$764,000 representing the net proceeds from the issuance of common stock.

As of September 30, 2002, the Company had working capital of \$662,000, as compared to \$818,000 at June 30, 2002. The Company's cash and cash equivalents were \$1,299,000 at September 30, 2002, compared to \$1,185,000 at June 30, 2002.

In September 2002, the Company closed the offering of 3,600,000 restricted shares of its common stock in a private transaction for gross proceeds of \$900,000.

The Company has incurred losses and negative cash flows from operations since inception, and as such has been dependent upon raising money for short and long-term cash needs through the sale of its capital stock in private placements and through debt.

During 2002 and 2001, management took steps to reduce costs, including staff reductions, salary reductions, and elimination of other employee's fringe benefits. Even with the reduction in expenses and an expected increase in sales, the Company anticipates that during its 2003 fiscal year it will need to raise over \$2,000,000 million to support its working capital needs and to continue to execute the requirements of the business plan, of which the Company has raised \$1,200,000 as of November 5, 2002.

Ultimate future capital requirements will depend on many factors, including cash flow from operations, continued progress in research and development programs, competing technological and market developments, and the Company's ability to successfully market its products. The Company has no firm commitments from any other sources to provide additional equity or debt financing. As such, there can be no assurance that sufficient funds will be raised. Moreover, any equity financing would result in dilution to then existing shareholders and any additional debt financing may result in higher interest expense.

Although there can be no assurances, the Company believes that its current cash

Edgar Filing: WARP TECHNOLOGY HOLDINGS INC - Form 10QSB

and anticipated proceeds from equity transactions and operating cash flows, will be sufficient to meet the Company's requirements for working capital and capital expenditures through the end of fiscal 2003.

Critical Accounting Policies

Revenue Recognition

Pursuant to AICPA Statement of Position ("SOP") 97-2, Software Revenue Recognition, the Company recognizes revenues from software licenses when persuasive evidence of a contractual arrangement exists, delivery has occurred, the fee is fixed or determinable and collection is probable. The Company's software licenses generally are marketed with certain postcontract customer support ("PCS") and other obligations, which may include maintenance, delivery of unspecified upgrades, and warranties regarding service response times. Revenue under PCS agreements are recognized ratably over the term of the agreement. Under SOP 97-2, the Company must allocate revenue to each element based on vendor specific objective evidence ("VSOE") of each element's fair value. Since the Company has just begun to market its products, VSOE of the fair value of each element has not been clearly established. Accordingly, revenue from license agreements are being recognized ratably over the term of the PCS agreement.

Product Development Costs

Product development costs incurred in the process of developing product improvements and enhancements or new products are charged to expense as incurred. Statement of Financial Accounting Standards ("SFAS") No. 86, Accounting for the Costs of Computer Software to be Sold, Leased or Otherwise Marketed, requires capitalization of certain software development costs subsequent to the establishment of technological feasibility. Based on the Company's product development process, technological feasibility is established upon the completion of a working model.

ITEM 4. Controls and Procedures

Within 90 days prior to the date of this quarterly report on Form 10-QSB for the first quarter ended September 30, 2002, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and President, its principal executive officer, and the Company's Chief Operating Officer, its principal operating officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-14 of the Securities Exchange Act of 1934. Based upon that evaluation, the principal executive officer and principal operating officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company, including its consolidated subsidiaries, that is required to be included in the Company's periodic SEC filings. There were no significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

Edgar Filing: WARP TECHNOLOGY HOLDINGS INC - Form 10QSB

ITEM 1. Legal Proceedings.

The Company is not a party to any material legal proceedings.

ITEM 2. Changes In Securities And Use Of Proceeds.

On or about September 13, 2002, the Company closed an offering of 3,600,000 shares of its common stock in a private transaction with gross proceeds to the Company from the sale equaling \$900,000 (the "September Private Placement"). All of the shares sold in the September Private Placement were offered and sold to accredited investors (as defined in Rule 501 of Regulation D). The purchase price of the September Private Placement shares was paid in cash. Pursuant to the terms of a Financial Consulting Agreement between the Company and Lighthouse Capital, the Company paid fees in the amount of \$136,000 in connection with the September Private Placement. The shares of common stock issued in the September Private Placement are restricted shares and were issued in a transaction exempt from the registration requirements of the Securities Act of 1933, as amended (the "Securities Act"), pursuant to Section 4(2) of the Securities Act. The shares issued in the September Private Placement are subject to Rule 144 under the Securities Act and therefore generally cannot be resold for a period of twelve months from the date of purchase. No general solicitations were made in connection with the September Private Placement.

ITEM 3. Defaults Upon Senior Securities.

None

ITEM 4. Submission Of Matters To A Vote Of Security Holders.

No matters were submitted to a vote of the Company's shareholders during the first quarter of the fiscal year ending June 30, 2003.

ITEM 5. Other Information.

On September 20, 2002, the Company's Board of Directors declared a stock split in the form of a dividend (the "September Stock Dividend") payable to the common stockholders of record on September 24, 2002 (the "record date") of three shares of common stock for each one share issued and outstanding on the record date. The September Stock Dividend was effective and payable on October 2, 2002.

- 99.1# Certification of Karl Douglas pursuant to 18 U.S.C. Section 1350.
- 99.2# Certification of John Gnip pursuant to 18 U.S.C. Section 1350.

* Incorporated herein by reference.
Filed herewith.

(b) Reports on Form 8-K:

The following reports on Form 8-K have been filed during the time period covered by this report:

On August 7, 2002, the Company filed an Amendment to Current Report on Form 8-K/A to amend the Current Report on Form 8-K which was filed on June 10, 2002. The August 7, 2002 Form 8-K/A contained financial statements of the business acquired and pro forma financial information.

On September 3, 2002, the Company filed a Current Report on Form 8-K which disclosed that on August 21, 2002 it had closed the upstream merger of its subsidiary WARP Technology Holdings, Inc. with and into the Company and thereby changed the Company's name to WARP Technology Holdings, Inc. In this September 3, 2002 Form 8-K, the Company also reported that on August 29, 2002 it changed its independent accountant from Williams & Webster P.S. to Ernst & Young LLP.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Certification of Chief Executive Officer
(Pursuant to 18 U.S.C. Section 1350)

As Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002)

In connection with the Quarterly Report on Form 10-QSB of WARP Technology Holdings, Inc. (the "Company") for the period ended September 30, 2002, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Karl Douglas, Chief Executive Officer of the Company, certify that:

1. I have reviewed this quarterly report on Form 10-QSB;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the Company as of, and for, the periods presented in this quarterly report;
4. The Company's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the Company and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the Company's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The Company's other certifying officer and I have disclosed, based on our most recent evaluation, to the Company's auditors and the Company's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the Company's ability to record, process, summarize and report financial data and have identified for the Company's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the Company's internal controls; and
6. The Company's other certifying officer and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with
