SUMMARY DESCRIPTION OF THE BUSINESS

Ivanhoe is an international mineral exploration and development company. Ivanhoe's principal mineral resource properties are the Oyu Tolgoi gold and copper project and the Nariin Sukhait coal project, both located in Mongolia. Ivanhoe also holds interests in several other mineral resource projects, mostly in Asia, and holds significant equity interests in several junior, publicly-listed mineral exploration and development companies.

Oyu Tolgoi Project

The Oyu Tolgoi project is a major copper and gold development project located in the south Gobi region of Mongolia, approximately 550 kilometres south of Ulaanbaatar and 80 kilometres north of the Chinese-Mongolian border. The project has estimated proven and probable reserves of 930 million tonnes grading 0.5% copper and 0.36 g/t gold and measured and indicated resources (inclusive of reported reserves) of 1.15 billion tonnes grading 1.27% copper and 0.48 g/t gold at a 0.60% copper equivalent cut-off grade. The project also has estimated inferred resources of 1.44 billion tonnes grading 1.11% copper and 0.28 g/t gold at the same cut-off.

- 6 -

In September 2005, Ivanhoe released its Integrated Development Plan, which envisions the staged development of the Oyu Tolgoi project over a 15 year period as a major copper and gold project having an ultimate mine life of in excess of 40 years. The Integrated Development Plan contemplates the development of the Southern Oyu deposits through open pit mining and the Hugo Dummett deposits through underground block cave mining and establishes engineering and production parameters for mining and processing operations. The Integrated Development Plan contemplates average annual production of 1 billion pounds of copper and 330,000 ounces of gold for at least 35 years and, at its operating peak, annual production of up to 1.6 billion pounds of copper and 900,000 ounces of gold.

Nariin Sukhait Coal Project

The Nariin Sukhait coal project is located in the southwest corner of the Omnogovi Aimag (Province) of Mongolia 320 kilometres southwest of the provincial capital of Dalanzadgar and 950 kilometres south of Ulaanbaatar.

The project's estimated total coal resources currently consist of 124 million tonnes of measured and indicated resources and 33.8 million tonnes of inferred resources. Exploration on the property is expected to resume during April 2006, with plans for between 25,000 and 30,000 metres of drilling in 100 to 120 drill holes during 2006. The results of this drilling program will be incorporated in ongoing mine planning of a surface mining operation at Nariin Sukhait.

For a more detailed description of the business of Ivanhoe, including the Oyu Tolgoi project and the Nariin Sukhait coal project, please refer to the "Description of the Business" at pages 24 through 67 of the AIF which is incorporated by reference in and forms part of this short form prospectus.

- 7 -

USE OF PROCEEDS

The aggregate net proceeds received by Ivanhoe from the sale of the Common Shares pursuant to this Offering (assuming the Over-Allotment Option is not exercised), after deducting the Underwriters' commission and paying the expenses of the Offering (including preparation of this short form prospectus) estimated to be Cdn.\$8,152,000 (approximately U.S.\$6,984,000), will be approximately Cdn.\$156,328,000 (approximately U.S.\$133,946,000). Ivanhoe intends to allocate substantially all of the net proceeds to its Mongolian operations. These expenditures will include development costs for the Oyu Tolgoi Project, including engineering costs, activities required to complete feasibility and pre-feasibility studies and development costs to sink a shaft on the Hugo Dummett deposits and will include costs associated with exploration, development and investment in other Mongolian projects, including in particular copper-gold exploration projects identified to date and coal projects. To the extent that the Over-Allotment Option is exercised in full or in part, the net proceeds from the sale of the Additional Common Shares will also be allocated to Ivanhoe's Mongolian operations.

PLAN OF DISTRIBUTION

Pursuant to an underwriting agreement (the Underwriting Agreement) dated as of April 4, 2006 between the Corporation and the Underwriters, as underwriters, the Corporation has agreed to sell and the Underwriters have agreed to purchase on the Closing Date 16,000,000 Common Shares at a price of Cdn.\$10.28 per Common Share payable in cash against delivery of certificates representing the Common Shares. The total gross proceeds of the Offering will be Cdn.\$164,480,000. The obligations of the Underwriters under the Underwriting Agreement may be terminated at their discretion on the occurrence of certain stated events. The Underwriters are, however, obligated to take up and pay for all of the Common Shares offered hereby if any are purchased under the Underwriting Agreement. Pursuant to the Underwriting Agreement, the Corporation also granted to the Underwriters the Over-Allotment Option to purchase the Additional Common Shares at the Offering Price, exercisable in whole or in part for a period of 30 days following the Closing Date. This short form prospectus qualifies both the grant of the Over-Allotment Option and the distribution of the Additional Common Shares on the exercise of the Over-Allotment Option.

The Offering Price was determined by negotiation between the Corporation and the Underwriters with reference to the market price of the Common Shares. Pursuant to the Underwriting Agreement the Corporation has agreed to pay to the Underwriters a commission equal to Cdn.\$0.46 per Common Share (4.5% of the Offering Price) for the services rendered by the Underwriters in connection with the Offering.

The Corporation has agreed to indemnify the Underwriters and their respective directors, officers, agents and employees against certain liabilities and expenses, including liabilities under the United States securities laws and under Canadian securities legislation, and to contribute to payments that the Underwriters may be required to make in respect thereof.

The TSX has conditionally approved a listing of the Common Shares to be distributed pursuant to the Offering. Listing will be subject to the Corporation fulfilling all of the listing requirements of the TSX on or before July 3, 2006. The Common Shares have also been approved for listing on the NYSE and NASDAQ, subject to official notices of issuance.

The Corporation has agreed not to reserve, allot, create or issue, or enter into an agreement or publicly announce any intention to reserve, allot, create or issue any Common Shares or any securities convertible into or exchangeable for Common Shares without the prior written consent of the Underwriters, such consent not to be unreasonably withheld, until the date which is 90 days after the Closing Date, except pursuant to this Offering or: (i) the grant or exercise of stock options or other equity incentives pursuant to Ivanhoe's equity incentive plan; or (ii) the exercise or conversion of outstanding warrants or other outstanding convertible securities or similar rights.

The Underwriters propose to offer the Common Shares initially at the Offering Price. After the Underwriters have made a reasonable effort to sell all of the Common Shares at the Offering Price, the Offering Price may be decreased

- 8 -

and may be further changed from time to time to an amount not greater than the Offering Price, and the compensation realized by the Underwriters will be decreased by the amount that the aggregate price paid by the purchasers for the Common Shares is less than the proceeds paid by the Underwriters to Ivanhoe.

Pursuant to policy statements of the Ontario Securities Commission and the Autorité des marchés financiers, the Underwriters may not, throughout the period of distribution under this short form prospectus, bid for or purchase Common Shares. The foregoing restriction is subject to certain exceptions, on the condition that the bid or purchase not be engaged in for the purpose of creating actual or apparent active trading in or raising the price of the Common Shares. These exceptions include a bid or purchase permitted under the Universal Market Integrity Rules for Canadian Marketplaces of Market Regulation Services Inc. relating to market stabilization and passive market making activities and a bid or purchase made for or on behalf of a customer where the order was not solicited during the period of distribution. Under the first-mentioned exception, in connection with the Offering and subject to the foregoing, the Underwriters may over-allot or effect transactions which stabilize or maintain the market price of the Common Shares at levels above that which would otherwise prevail in the open market. Such transactions, if commenced, may be discontinued at any time.

U.S. Sales

The Common Shares have not been and will not be registered under the U.S. Securities Act or any state securities laws, and accordingly may not be offered or sold within the United States or to U.S. persons; except that the Underwriters may, through certain of their qualified U.S. broker-dealer affiliates, offer Common Shares in transactions that comply with exemptions from registration under the U.S. Securities Act and applicable state securities laws.

This short form prospectus does not constitute an offer to sell, or a solicitation of an offer to buy, any of the Common Shares in the United States. The Underwriters have agreed that, except in certain transactions exempt from the registration requirements of the U.S. Securities Act, they will not offer or sell within the United States or to, or for the account or benefit of, U.S. persons, the Common Shares as part of their distribution. The Underwriters have further agreed that all offers and sales of the Common Shares will be made in compliance with Rule 903 of Regulation S under the U.S. Securities Act, or in compliance with an exemption from registration thereunder. The Common Shares may be resold on the TSX pursuant to Rule 904 of Regulation S under the U.S. Securities Act, which requires among other things, that neither the seller of the Common Shares nor any person acting on its behalf is aware of the fact that: (i) the offeree or the buyer is in the United States, or (ii) the transaction has been pre-arranged with a buyer in the United States. Terms used in this paragraph have the meanings ascribed to them by Regulation S under the U.S. Securities Act.

In addition, until 40 days after the commencement of this Offering, an offer or sale of the Common Shares within the United States by any dealer, whether or not participating in this Offering, may violate the registration requirements of the U.S. Securities Act if such offer or sale is made otherwise than in accordance with an available exemption under the U.S. Securities Act.

Certificates representing any Common Shares which are sold in the United States or, in certain circumstances, to or for the account or benefit of a U.S. person will bear a legend to the effect that the Common Shares represented thereby are not registered under the U.S. Securities Act and may only be offered pursuant to certain exemptions from the registration requirements of the U.S. Securities Act.

DESCRIPTION OF SHARE CAPITAL

The authorized share capital of Ivanhoe consists of an unlimited number of Common Shares without par value and an unlimited number of Preferred Shares. As of the date of this short form prospectus, there are 316,718,682 Common Shares and no Preferred Shares issued and outstanding. Rights and restrictions in respect of the Common Shares and the Preferred Shares are set out in Ivanhoe's articles of continuance, Ivanhoe's by-laws and in the *Business Corporations Act* (Yukon), and its regulations.

- 9 -

The holders of Common Shares are entitled to one vote per Common Share at all meetings of shareholders except meetings at which only holders of another specified class or series of shares of the Corporation are entitled to vote separately as a class or series. Subject to the prior rights of the holders of Preferred Shares, the holders of Common Shares are entitled to receive dividends as and when declared by the directors, and to receive a pro rata share of the remaining property and assets of the Corporation in the event of liquidation, dissolution or winding up of the Corporation. The Common Shares have no pre-emptive, redemption, purchase or conversion rights. Neither the *Business Corporations Act* (Yukon) nor the constating documents of the Corporation impose restrictions on the transfer of Common Shares on the register of the Corporation, provided that the Corporation receives the certificate representing the Common Shares to be transferred together with a duly endorsed instrument of transfer and payment of any fees and taxes which may be prescribed by the Board of Directors from time to time. There are no sinking fund provisions in relation to the Common Shares and they are not liable to further calls or to assessment by the Corporation. The *Business Corporations Act* (Yukon) provides that the rights and provisions attached to any class of shares may not be modified, amended or varied unless consented to by special resolution passed by a majority of not less than two-thirds of the votes cast in person or by proxy by holders of shares of that class.

The Preferred Shares as a class rank senior to the Common Shares as to the payment of dividends and the distribution of property and assets on the liquidation, dissolution or winding-up of the Corporation. Holders of Preferred Shares are not entitled to any voting rights as a class except as may be provided under the *Business Corporations Act* (Yukon) except those voting rights which attach to any series of Preferred Shares as determined by the directors of the Corporation from time to time.

The Preferred Shares are issuable in one or more series, each consisting of such number of Preferred Shares as may be fixed by the Corporation's directors. The Corporation's directors may from time to time, by resolution passed before the issue of any Preferred Shares of any particular series, alter the constating documents of the Corporation to determine the designation of the Preferred Shares of that series and to fix the number of Preferred Shares therein and alter the constating documents to create, define and attach special rights and restrictions to the shares of that series, including, without limitation, the following: (i) the nature, rate or amount of dividends and the dates, places and currencies of payment thereof; (ii) the consideration for, and the terms and conditions of, any purchase of the Preferred Shares for cancellation or redemption; (iii) conversion or exchange rights; (iv) the terms and conditions of any share purchase plan or sinking fund; and (v) voting rights and restrictions.

Registered holders of both the Preferred Shares and Common Shares are entitled, at their option, to a certificate representing their shares of the Corporation.

RISK FACTORS

Investment in securities of Ivanhoe involves a significant degree of risk and should be considered speculative due to the nature of Ivanhoe's business and the present stage of its development.

Risks related to the Common Shares and this Offering

Investors should give careful consideration to the following risks related to the Common Shares and this Offering:

Further equity financing may substantially dilute the interests of Ivanhoe's shareholders. Ivanhoe will require additional funds to fund the development of the Oyu Tolgoi project. If it raises additional funding by issuing additional equity securities, such financing may substantially dilute the interests of its shareholders.

Ivanhoe's Common Shares may experience price and volume fluctuations and the market price for its Common Shares after this Offering may drop below the price investors pay. In recent years, the securities markets have experienced a high level of price and volume volatility, and the market price of securities of many companies has experienced wide fluctuations which have not necessarily been related to the

- 10 -

operating performance, underlying asset values or prospects of such companies. There can be no assurance that such fluctuation will not affect the price of Ivanhoe's securities after this Offering, and may decline below the public offering price. As a result of this volatility, investors may not be able to sell the Common Shares at or above the offering price.

Ivanhoe does not expect to pay dividends on its Common Shares in the foreseeable future. Ivanhoe has not paid any dividends on its outstanding Common Shares since its incorporation and does not anticipate that it will do so in the foreseeable future. The declaration of dividends on the Common Shares is, subject to certain statutory restrictions described below, within the discretion of the Board of Directors based on their assessment of, among other factors, Ivanhoe's earnings or lack thereof, its capital and operating expenditure requirements and its overall financial condition. Under the *Business Corporations Act* (Yukon), the Board of Directors has no discretion to declare or pay a dividend on the Common Shares if they have reasonable grounds for believing that Ivanhoe is, or after payment of the dividend would be, unable to pay its liabilities as they become due or that the realizable value of its assets would, as a result of the dividend, be less than the aggregate sum of its liabilities and the stated capital of the Common Shares.

Risks related to Ivanhoe's Business

Investors should give careful consideration to the risk factors described in "General Development of the Business – Risk Factors" on pages 15 through 23 of the AIF, which is incorporated by reference in and forms part of this short form prospectus. These risk factors include:

there can be no assurance that Ivanhoe will be capable of raising the additional funding that it needs to carry out its exploration and development objectives;

Ivanhoe may be unsuccessful in obtaining the taxation and fiscal concessions and legal and investor protection assurances it is seeking from the Government of Mongolia in its negotiations for a stability agreement in respect of the Oyu Tolgoi Project;

future amendments to Mongolian laws could adversely affect Ivanhoe's mining rights in the Oyu Tolgoi Project or make it more difficult or expensive to develop the Project and carry out mining;

Ivanhoe's ability to carry on business in Mongolia is subject to political risk;

Ivanhoe's business in Mongolia may be harmed if the country fails to complete its transition from state socialism and a planned economy to political democracy and a free market economy;

Ivanhoe may be unable to enforce its legal rights in certain circumstances;

the mineral resources identified on the Oyu Tolgoi Project do not have demonstrated economic viability and the feasibility of mining has not been established;

lack of infrastructure in proximity to the Oyu Tolgoi Project could adversely affect mining feasibility;

Ivanhoe may experience difficulties with its joint venture partners;

changes in, or more aggressive enforcement of, laws and regulations could adversely impact Ivanhoe's business;

Ivanhoe is subject to substantial environmental and other regulatory requirements and such regulations are becoming more stringent. Non-compliance with such regulations, either through current or future operations or a

pre-existing condition could materially adversely affect Ivanhoe;

- 11 -

previous mining operations may have caused environmental damage at Ivanhoe's mining sites, and if Ivanhoe cannot prove that it was caused by such prior operations its indemnities and exemptions from liability may not be effective;

mining projects are sensitive to the volatility of metal prices;

illegal mining is prevalent in Mongolia and Myanmar;

there can be no assurance that the interest held by Ivanhoe in its exploration, development and mining properties is free from defects or that material contractual arrangements between Ivanhoe and entities owned or controlled by foreign governments will not be unilaterally altered or revoked;

economic sanctions imposed by the United States, the European Union and Canada against Myanmar may adversely affect the Monywa Copper Project. No proceeds from the Offering will be used, directly or indirectly, for investing in or trading with Myanmar. See Use of Proceeds ;

the proceeds from the sale of the Savage River iron ore project are dependent on iron ore prices and the remaining supply of ore on the property;

competition for new mining properties by larger, more established companies may prevent Ivanhoe from acquiring interests in additional properties or mining operations;

Ivanhoe has a limited operating history, and there is no assurance that it will be capable of consistently producing positive cash flows;

a substantial portion of Ivanhoe's operations involve exploration and development and there is no guarantee that any such activity will result in commercial production of mineral deposits;

Ivanhoe does not maintain insurance over certain of its business operations;

mining operations are subject to numerous hazards that could have a material adverse effect on the financial position of Ivanhoe;

Ivanhoe is exposed to risks of changing political stability and government regulation in the countries in which it operates;

Ivanhoe's prospects depend on its ability to attract and retain key personnel; and

certain directors of Ivanhoe are directors or officers of, or have significant shareholdings in, other mineral resource companies and there is the potential that such directors will encounter conflicts of interest with Ivanhoe. If any of the foregoing events, or other risk factor events as described in the AIF occur, Ivanhoe's business, financial condition or results of operations may be materially adversely affected. In that event, the market price of Ivanhoe's securities could decline and investors could lose all or part of their investment.
