☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2019

or

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 0-26640

POOL CORPORATION

(Exact name of registrant as specified in its charter)

Delaware	36-3943363
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

109 Northpark Boulevard, Covington, Louisiana	70433-5001
(Address of principal executive offices)	(Zip Code)

985-892-5521
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulations S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.
Large accelerated filer ☒ Accelerated filer ☐

Non-accelerated filer ☐ Smaller reporting company ☐

Emerging growth company ☐

Edgar Filing: POOL CORP - Form 10-Q

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

As of April 25, 2019, there were 39,749,282 shares of common stock outstanding.

POOL CORPORATION

Notes to Consolidated Financial Statements

(Unaudited)

Note 1 – Summary of Significant Accounting Policies

Pool Corporation (the Company, which may be referred to as we, us or our) prepared the unaudited interim Consolidated Financial Statements following U.S. generally accepted accounting principles (GAAP) and the requirements of the Securities and Exchange Commission (SEC) for interim financial information. As permitted under those rules, we have condensed or omitted certain footnotes and other financial information required for complete financial statements.

The Consolidated Financial Statements include all normal and recurring adjustments that are necessary for a fair presentation of our financial position and operating results. All significant intercompany accounts and intercompany transactions have been eliminated.

A description of our significant accounting policies is included in our 2018 Annual Report on Form 10-K. You should read the interim Consolidated Financial Statements in conjunction with the Consolidated Financial Statements and accompanying notes in our 2018 Annual Report on Form 10-K. The results for our three month period ended March 31, 2019 are not necessarily indicative of the expected results for our fiscal year ending December 31, 2019.

Newly Adopted Accounting Pronouncements

On January 1, 2019, we adopted Accounting Standards Update (ASU) 2016-02, Leases (Topic 842) and all the related amendments, which are codified into Accounting Standards Codification (ASC) 842. The adoption of ASU 2016-02 significantly increased assets and liabilities on our Consolidated Balance Sheets as we recorded a right-of-use asset and corresponding liability for each of our existing operating leases. We adopted this guidance using the modified retrospective approach by recognizing a cumulative adjustment to retained earnings on the adoption date, which was not material. Additionally, we elected to apply the practical expedient that allows us to exclude comparative presentation; thus, we did not restate our prior period balance sheets to reflect the new guidance.

We recorded operating lease assets and operating lease liabilities of approximately \$175.7 million and \$181.6 million, respectively, as of January 1, 2019. The difference between the operating lease assets and operating lease liabilities primarily represents our straight-line rent liability of \$5.1 million recorded under previous accounting guidance. Under ASU 2016-02, this liability is considered a reduction of the operating lease asset. We recorded the remaining difference between our operating lease assets and operating lease liabilities, net of the deferred tax impact, as an adjustment to retained earnings. Additionally, we reclassified prepaid rent of \$4.9 million as of January 1, 2019 to our operating lease asset resulting in a balance of \$180.6 million as of the adoption date.

The adoption of this guidance did not materially impact our results of operations or cash flows. See Commitments and Contingencies within this note below for additional information regarding our adoption of this new guidance.

On January 1, 2019, we adopted ASU 2017-12, Derivatives and Hedging (Topic 815), Targeted Improvements to Accounting for Hedging Activities. This new standard expands and refines hedge accounting for both financial and non-financial risk components, aligns the recognition and presentation of the effects of hedging instruments and hedge items in the financial statements and includes certain targeted improvements to ease the application of current guidance related to the assessment of hedge effectiveness. The adoption of this guidance did not impact our results of operations, statement of financial position or cash flows.

Commitments and Contingencies

We lease facilities for our corporate and administrative offices, sales centers and centralized shipping locations under operating leases that expire in various years through 2032. Most of our leases contain five-year terms with renewal options that allow us to extend the lease term beyond the initial period, subject to terms agreed upon at lease inception. Based on our leasing practices and contract negotiations, we determined that we are not reasonably certain to exercise the renewal options and, as such, we have not included optional renewal periods in our measurement of operating lease assets, liabilities and expected lease terms.

We elected to apply the package of practical expedients available within ASU 2016-02, which is intended to provide some relief to issuers. Electing this option allowed us to retain our existing assessment of whether an arrangement is or contains a lease, is classified as an operating or financing lease and contains initial direct costs. We also elected the practical expedients that allow us to exclude short-term leases from our Consolidated Balance Sheets and to combine lease and non-lease components.

For leases with step rent provisions whereby the rental payments increase incrementally over the life of the lease, we recognize expense on a straight-line basis determined by the total lease payments over the lease term. To the extent we determine that future obligations related to real estate taxes, insurance and other lease components are variable, we exclude them from the measurement of our operating lease assets and liabilities.

Some of our real estate agreements include rental payments adjusted periodically for inflation. Our lease agreements do not contain any material residual value guarantees or material restrictive covenants.

The table below presents expense associated with facility and vehicle operating leases (in thousands):

		Three Months Ended March 31,	
Lease Cost	Classification	2019	2018
Operating lease cost ⁽¹⁾	Selling and administrative expenses	\$ 15,070	\$ 14,553
Variable lease cost	Selling and administrative expenses	3,259	3,021

⁽¹⁾ Includes short-term lease cost, which is not material

Based on our lease portfolio as of March 31, 2019, the table below sets forth the approximate future lease payments related to operating leases with initial terms of one year or more (in thousands):

2019	\$ 38,389
2020	50,443
2021	39,184
2022	29,883
2023	18,089
Thereafter	17,554
Total lease payments	193,542
Less: interest	15,028
Present value of lease liabilities	178,514

To calculate the present value of our lease liabilities, we determined our incremental borrowing rate based on the effective interest rate on our unsecured syndicated senior credit facility (the Credit Facility) adjusted for a collateral feature similar to that of our leased properties. The table below presents the weighted-average remaining lease term (years) of our operating leases and the weighted-average discount rate used in the above calculation:

	March 31, 2019
Lease Term and Discount Rate	
Weighted-average remaining lease term (years)	
Operating leases	5.21
Weighted-average discount rate	
Operating leases	3.5 %

The table below presents the amount of cash paid for amounts included in the measurement of lease liabilities (in thousands):

	Three Months Ended March 31, 2019
Operating cash flows for lease liabilities	\$14,080

We lease corporate and administrative offices from Northpark Corporate Center, LLC (NCC), an entity in which we have held a 50% ownership interest since May 2005. NCC owns and operates an office building in Covington, Louisiana. As of March 31, 2019, we occupy approximately 60,293 square feet of office space and we pay rent of \$97,976 per month. Our lease term ends in May 2025. We recorded rent expense of \$0.3 million for each of the three month periods ended March 31, 2019 and March 31, 2018.

Income Taxes

We reduce federal and state income taxes payable by the tax benefits associated with the exercise of nonqualified stock options and the lapse of restrictions on restricted stock awards. To the extent realized tax deductions exceed the amount of previously recognized deferred tax benefits related to share-based compensation, we record an excess tax benefit. We record all excess tax benefits as a component of income tax benefit or expense on the Consolidated Statements of Income in the period in which stock options are exercised or restrictions on awards lapse. We recorded excess tax benefits of \$8.8 million in the first three months of 2019 compared to \$9.0 million in the same period of 2018.

Retained Deficit

We account for the retirement of treasury shares as a reduction of retained earnings (deficit). As of March 31, 2019, the Retained deficit on our Consolidated Balance Sheets reflects cumulative net income, the cumulative impact of adjustments for changes in accounting pronouncements, treasury share retirements since the inception of our share repurchase programs of \$1,449.9 million and cumulative dividends of \$512.9 million.

Accumulated Other Comprehensive Loss

The table below presents the components of our Accumulated other comprehensive loss balance (in thousands):

	March 31, 2019	March 31, 2018	December 31, 2018
Foreign currency translation adjustments	\$(12,208)	\$(6,528)	\$(12,422)
Unrealized gains on interest rate swaps, net of tax ⁽¹⁾	1,156	974	1,425
Accumulated other comprehensive loss	\$(11,052)	\$(5,554)	\$(10,997)

⁽¹⁾ In February 2018, the Financial Accounting Standards Board (FASB) issued guidance that allows entities the option to reclassify the tax effects related to items in accumulated other comprehensive income (loss) to retained earnings (deficit) if deemed to be stranded in accumulated other comprehensive income (loss) due to U.S. tax reform. We do not have any material amounts stranded in Accumulated other comprehensive loss as a result of

U.S. tax reform.

Recent Accounting Pronouncements Pending Adoption

The following table summarizes the recent accounting pronouncements that we plan to adopt in future periods:

Standard	Description	Effective Date	Effect on Financial Statements and Other Significant Matters
ASU 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments	Changes the way companies evaluate credit losses for most financial assets and certain other instruments. For trade and other receivables, held-to-maturity debt securities, loans and other instruments, entities will be required to use a new forward-looking “expected loss” model to evaluate impairment, potentially resulting in earlier recognition of allowances for losses. The new standard also requires enhanced disclosures, including the requirement to disclose the information used to track credit quality by year of origination for most financing receivables. The guidance must be applied using a cumulative-effect transition method.	Annual periods beginning after December 15, 2019	We are currently evaluating the effect this will have on our financial position, results of operations and related disclosures.
ASU 2017-04, Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment	Eliminates the requirement to calculate the implied fair value of goodwill to measure a goodwill impairment charge (commonly referred to as Step 2 under the current guidance). Rather, the measurement of a goodwill impairment charge will be based on the excess of a reporting unit’s carrying value over its fair value (Step 1 under the current guidance). This guidance should be applied prospectively.	Annual and interim impairment tests performed in periods beginning after December 15, 2019	We are currently evaluating the effect this will have on our financial position, results of operations and related disclosures.

Note 2 – Earnings Per Share

We calculate basic earnings per share (EPS) by dividing Net income by the weighted average number of common shares outstanding. We include outstanding unvested restricted stock awards of our common stock in the basic weighted average share calculation. Diluted EPS reflects the dilutive effects of potentially dilutive securities, which include in-the-money outstanding stock options and shares to be purchased under our employee stock purchase plan. Using the treasury stock method, the effect of dilutive securities includes these additional shares of common stock that would have been outstanding based on the assumption that these potentially dilutive securities had been issued.

Stock options with exercise prices that are higher than the average market prices of our common stock for the periods presented are excluded from the diluted EPS calculation because the effect is anti-dilutive.

The table below presents the computation of EPS, including the reconciliation of basic and diluted weighted average shares outstanding (in thousands, except EPS):

	Three Months Ended March 31,	
	2019	2018
Net income	\$32,637	\$31,339
Weighted average shares outstanding:		
Basic	39,479	40,370
Effect of dilutive securities:		
Stock options and employee stock purchase plan	1,217	1,492
Diluted	40,696	41,862
Earnings per share:		
Basic	\$0.83	\$0.78
Diluted	\$0.80	\$0.75
Anti-dilutive stock options excluded from diluted earnings per share computations	65	85

Note 3 – Acquisitions

In January 2019, we acquired the distribution assets of W.W. Adcock, Inc., a wholesale distributor of swimming pool products, equipment, parts and supplies adding two locations in Pennsylvania, one location in North Carolina and one location in Virginia.

In November 2018, we acquired the distribution assets of Turf & Garden, Inc., a wholesale distributor of irrigation products and landscape maintenance equipment, parts and supplies with three locations in Virginia and one location in North Carolina.

We have completed our acquisition accounting for these acquisitions, subject to adjustments for standard holdback provisions per the terms of the purchase agreements, which are not material.

In January 2018, we acquired the distribution assets of Tore Pty. Ltd. (doing business as Pool Power), a wholesale distributor of pool and spa equipment in South Australia, with one distribution center in Adelaide, Australia. We have completed our acquisition accounting for this acquisition.

These acquisitions did not have a material impact on our financial position or results of operations, either individually or in the aggregate.

Note 4 – Fair Value Measurements and Interest Rate Swaps

Our assets and liabilities that are measured at fair value on a recurring basis include the unrealized gains or losses on our interest rate swap contracts and contingent consideration related to recent acquisitions. The three levels of the fair value hierarchy under the accounting guidance are described below:

Level 1

Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2 Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability; or

inputs that are derived principally from or corroborated by observable market data by correlation or other means. Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The table below presents the estimated fair values of our interest rate swap contracts, our forward-starting interest rate swap contract and our contingent consideration liabilities (in thousands):

	Fair Value at March 31, 2019 2018	
Level 2		
Unrealized gains on interest rate swaps	\$1,785	\$2,451
Level 3		
Contingent consideration liabilities	\$833	\$1,617

Interest Rate Swaps

We utilize interest rate swap contracts and forward-starting interest rate swap contracts to reduce our exposure to fluctuations in variable interest rates for future interest payments on our unsecured syndicated senior credit facility (the Credit Facility).

For determining the fair value of our interest rate swap and forward-starting interest rate swap contracts, we use significant other observable market data or assumptions (Level 2 inputs) that we believe market participants would use in pricing similar assets or liabilities, including assumptions about counterparty risk. Our fair value estimates reflect an income approach based on the terms of the interest rate swap contracts and inputs corroborated by observable market data including interest rate curves. We include unrealized gains in Prepaid expenses and other current assets and unrealized losses in Accrued expenses and other current liabilities on the Consolidated Balance Sheets.

We recognize any differences between the variable interest rate payments and the fixed interest rate settlements from our swap counterparties as an adjustment to interest expense over the life of the swaps. If determined to be effective cash flow hedges, we record the changes in the estimated fair value of the swaps to Accumulated other comprehensive loss on our Consolidated Balance Sheets. To the extent our interest rate swaps are determined to be ineffective, we recognize the changes in the estimated fair value of our swaps in Interest and other non-operating expenses, net on our Consolidated Statements of Income.

We currently have three interest rate swap contracts in place, which became effective on October 19, 2016. These swaps were previously forward-starting contracts that were amended in October 2015 to bring the fixed rates per our forward-starting contracts in line with current market rates at that time and extend the hedged period for future interest payments on our Credit Facility. As amended, these swap contracts terminate on November 20, 2019. In the first three months of 2019, we recognized a loss of \$0.2 million as a result of ineffectiveness.

The following table provides additional details related to each of these amended swap contracts:

Derivative	Amendment Date	Notional Amount (in millions)	Fixed Interest Rate
Interest rate swap 1	October 1, 2015	\$75.0	2.273%
Interest rate swap 2	October 1, 2015	\$25.0	2.111%
Interest rate swap 3	October 1, 2015	\$50.0	2.111%

For the three interest rate swap contracts in effect at March 31, 2019, a portion of the change in the estimated fair value between periods relates to future interest expense. Recognition of the change in fair value between periods attributable to accrued interest is reclassified from Accumulated other comprehensive loss on the Consolidated Balance Sheets to Interest and other non-operating expenses, net on the Consolidated Statements of Income. These amounts were not material in the three month periods ended March 31, 2019 and March 31, 2018.

In July 2016, we entered into an additional forward-starting interest rate swap contract to extend the hedged period for future interest payments on our Credit Facility to its maturity date at that time. This swap contract will convert the variable interest rate to a fixed interest rate on borrowings under the Credit Facility. This contract becomes effective on November 20, 2019 and terminates on November 20, 2020. The following table provides additional details related to this swap contract:

Derivative	Inception Date	Notional Amount (in millions)	Fixed Interest Rate
Forward-starting interest rate swap	July 6, 2016	\$150.0	1.1425%

Failure of our swap counterparties would result in the loss of any potential benefit to us under our swap agreements. In this case, we would still be obligated to pay the variable interest payments underlying our debt agreements. Additionally, failure of our swap counterparties would not eliminate our obligation to continue to make payments under our existing swap agreements if we continue to be in a net pay position.

Our interest rate swap and forward-starting interest rate swap contracts are subject to master netting arrangements. According to our accounting policy, we do not offset the fair values of assets with the fair values of liabilities related to these contracts.

Other

The carrying values of cash, receivables, accounts payable and accrued liabilities approximate fair value due to the short maturity of those instruments (Level 1 inputs). The carrying value of long-term debt approximates fair value (Level 3 inputs). Our determination of the estimated fair value reflects a discounted cash flow model using our estimates, including assumptions related to borrowing rates (Level 3 inputs).

Note 5 – Debt

The table below presents the components of our debt (in thousands):

	March 31,	
	2019	2018
Variable rate debt		
Short-term borrowings	\$ 13,714	\$ 12,263
Current portion of long-term debt:		
Australian credit facility	8,020	8,523
Short-term borrowings and current portion of long-term debt	21,734	20,786
Long-term portion:		
Revolving credit facility	503,073	388,762
Receivables securitization facility	175,100	160,000
Less: financing costs, net	930	1,438
Long-term debt, net	677,243	547,324
Total debt	\$698,977	\$568,110

Our accounts receivable securitization facility (the Receivables Facility) provides for the sale of certain of our receivables to a wholly owned subsidiary (the Securitization Subsidiary). The Securitization Subsidiary transfers variable undivided percentage interests in the receivables and related rights to certain third-party financial institutions in exchange for cash proceeds, limited to the applicable funding capacities.

We account for the sale of the receivable interests as a secured borrowing on our Consolidated Balance Sheets. The receivables subject to the agreement collateralize the cash proceeds received from the third-party financial institutions. We classify the entire outstanding balance as Long-term debt on our Consolidated Balance Sheets as we intend and have the ability to refinance the obligations on a long term basis. We present the receivables that collateralize the cash proceeds separately as Receivables pledged under receivables facility on our Consolidated Balance Sheets.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion in conjunction with Management's Discussion and Analysis included in our 2018 Annual Report on Form 10-K.

For a discussion of our base business calculations, see the Results of Operations section below.

Cautionary Statement for Purposes of the "Safe Harbor" Provisions of the Private Securities Litigation Reform Act of 1995

This report contains forward-looking information that involves risks and uncertainties. Our forward looking statements express our current expectations or forecasts of possible future results or events, including projections of earnings and other financial performance measures, statements of management's expectations regarding our plans and objectives and industry, general economic and other forecasts of trends, future dividend payments and share repurchases, and other matters. Forward-looking statements speak only as of the date of this filing, and we undertake no obligation to update or revise such statements to reflect new circumstances or unanticipated events as they occur. You can identify these statements by the fact that they do not relate strictly to historic or current facts and often use words such as "anticipate," "estimate," "expect," "intend," "believe," "will likely result," "outlook," "project," "may," "can," "target," "potential," "should" and other words and expressions of similar meaning.

No assurance can be given that the expected results in any forward-looking statement will be achieved, and actual results may differ materially due to one or more factors, including the sensitivity of our business to weather conditions, changes in the economy and the housing market, our ability to maintain favorable relationships with suppliers and manufacturers, competition from other leisure product alternatives and mass merchants, excess tax benefits or deficiencies recognized under ASU 2016-09 and other risks detailed in our 2018 Annual Report on Form 10-K. For these statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act.

OVERVIEW

Financial Results

We produced solid results in the first quarter of 2019 despite wetter and cooler conditions throughout most of the quarter in some of our major markets. Our team's strong execution, coupled with modest top line growth, delivered favorable results in the quarter.

Net sales increased 2% to \$597.5 million in the first quarter of 2019 compared to \$585.9 million in the first quarter of 2018, while base business sales grew 1%. Cooler and wetter weather, particularly in the western United States, combined with a later Easter holiday adversely impacted first quarter sales. Pool openings and normal spring early buys from customers in seasonal markets are influenced by the timing of the Easter holiday. In addition, sales were negatively impacted approximately 2% by the loss of a selling day compared to the first quarter of 2018 and 1% from unfavorable foreign currency exchange rate fluctuations.

Gross profit increased 5% to \$174.6 million in the first quarter of 2019 from \$166.1 million in the same period in 2018. Base business gross profit improved 4% over the first quarter of 2018, including a negative currency exchange impact of 1%. Gross margin increased 90 basis points to 29.2% in the first quarter of 2019 compared to 28.3% in the first quarter of 2018, reflecting benefits from our strategic inventory purchases in 2018 and lower customer early buys in the first quarter of 2019.

Selling and administrative expenses (operating expenses) increased 3% to \$136.2 million in the first quarter of 2019 compared to the first quarter of 2018. Base business operating expenses were up 1% over the comparable 2018 period including a 1% currency benefit. As a percentage of net sales, base business operating expenses increased to 22.6% in the first quarter of 2019 compared to 22.5% in the first quarter of 2018.

Operating income for the first quarter of 2019 increased to \$38.4 million, up 14% compared to the same period in 2018. Operating margin was 6.4% in the first quarter of 2019 and 5.7% in the same period in 2018, while base business operating margin improved 90 basis points from the prior year to 6.7% in the first quarter of 2019.

We recorded an \$8.8 million tax benefit from Accounting Standards Update (ASU) 2016-09, Improvements to Employee Share-Based Payment Accounting, in the quarter ended March 31, 2019 compared to a tax benefit of \$9.0 million realized in the same period of 2018.

Net income was \$32.6 million in the first quarter of 2019 compared to \$31.3 million in the first quarter of 2018. Earnings per share increased 7% to \$0.80 per diluted share in the three months ended March 31, 2019 compared to \$0.75 per diluted share in the same period of 2018. The benefit from ASU 2016-09 increased diluted earnings per share by \$0.21 and \$0.22 in the first quarters of 2019 and 2018, respectively. Excluding the impact from ASU 2016-09 in both periods, earnings per diluted share increased 11% to \$0.59 in the first quarter of 2019 compared to \$0.53 in the first quarter of 2018.

References to product line and product category data throughout this report generally reflect data related to the North American swimming pool market, as it is more readily available for analysis and represents the largest component of our operations.

Financial Position and Liquidity

As of March 31, 2019, total net receivables, including pledged receivables, remained flat compared to March 31, 2018. Our days sales outstanding (DSO), as calculated on a trailing four quarters basis, was 29.8 days at March 31, 2019 and 30.1 days at March 31, 2018. Our allowance for doubtful accounts balance was \$5.6 million at March 31, 2019 and \$4.0 million at March 31, 2018.

Net inventory levels grew 16% compared to levels at March 31, 2018. The increase of \$111.9 million in inventory reflects strategic inventory purchases we made in the second half of 2018 in advance of greater than normal vendor price increases, inventory from acquired businesses and normal business growth, as well as the slower start to the season. The inventory reserve was \$8.5 million at March 31, 2019 and \$7.4 million at March 31, 2018. Our inventory turns, as calculated on a trailing four quarters basis, were 3.1 times at March 31, 2019 and 3.5 times at March 31, 2018.

Total debt outstanding at March 31, 2019 was \$699.0 million, up 23% compared to total debt at March 31, 2018 primarily to fund business driven working capital growth, acquisitions and share repurchases over the past 12 months.

Current Trends and Outlook

For a detailed discussion of trends through 2018, see the Current Trends and Outlook section of Management's Discussion and Analysis included in Part II, Item 7 of our 2018 Annual Report on Form 10-K.

As a result of the additional tax benefits realized from ASU 2016-09 in the first quarter of 2019 beyond what was included in our initial earnings guidance range, we are updating our 2019 earnings guidance to a range of \$6.09 to \$6.39 from \$6.05 to \$6.35 per diluted share. Other than the additional \$0.04 per diluted share tax benefit, our earnings expectation for 2019 remains unchanged.

Consistent with our original 2019 projections, we expect base business sales growth of approximately 7% to 9% for 2019 and expect gross margin will be similar to 2018. Unfavorable weather impacts, the loss of a selling day and a later Easter holiday in 2019 led to delayed pool openings, lower customer early buys and lower construction and remodeling activity. We believe these factors negatively impacted our first quarter of 2019 sales by an estimated \$30.0 to \$45.0 million but will lead to increased sales growth later in the year, depending on customer capacity and weather.

We expect a slight improvement in our gross margin in the second quarter of 2019 as we sell through the strategic inventory purchases we made in the second half of 2018; we expect margins to decline in the fourth quarter of 2019 in comparison to the same quarter in the prior year due to a difficult comparison.

We expect base business operating expenses will grow at a rate of approximately 60% of gross margin growth for the year, which will enable us to achieve operating margin improvement of approximately 20 to 40 basis points for the full year of 2019 compared to 2018.

As discussed further in Results of Operations below, our average outstanding debt for the three months ended March 31, 2019 increased 31% over the same period last year, and given the increase in the 30-Day LIBOR, our effective interest rate increased approximately 70 basis points between periods. Based on these trends, we expect Interest and other non-operating expenses, net will increase for the full year of 2019 compared to 2018.

We expect our annual effective tax rate (excluding the benefit from ASU 2016-09) for 2019 will approximate 25.5%, which is consistent with 2018 and a reduction compared to our historical rate of approximately 38.5% due to the impact of U.S. tax reform.

Our effective tax rate is dependent on our results of operations and may change if actual results differ materially from our current expectations, particularly any significant changes in our geographic mix. Due to ASU 2016-09, we expect our effective tax rate will fluctuate from quarter to quarter, particularly in periods when employees elect to exercise their vested stock options or when restrictions on share-based awards lapse. We recorded an \$8.8 million tax benefit from ASU 2016-09 for the three months ended

March 31, 2019. Additional tax benefits could be recognized related to stock option exercises in 2019 from grants that expire in years after 2019, for which we have not included any expected benefits in our guidance. The estimated impact related to ASU 2016-09 is subject to several assumptions which can vary significantly, including our estimated share price and the periods in which our employees will exercise vested stock options.

Excluding the impact of timing differences from our strategic inventory purchases made in the second half of 2018, we expect cash provided by operations will approximate net income for the 2019 fiscal year. We anticipate that we may use approximately \$150.0 million to \$200.0 million in cash for share repurchases in 2019, subject to additional authorization by our Board of Directors.

RESULTS OF OPERATIONS

As of March 31, 2019, we conducted operations through 369 sales centers in North America, Europe, South America and Australia.

The following table presents information derived from the Consolidated Statements of Income expressed as a percentage of net sales:

	Three Months Ended March 31, 2019 2018	
Net sales	100.0%	100.0%
Cost of sales	70.8	71.7
Gross profit	29.2	28.3
Operating expenses	22.8	22.6
Operating income	6.4	5.7
Interest and other non-operating expenses, net	1.1	0.6
Income before income taxes and equity earnings	5.3 %	5.1 %

We have included the results of operations from the acquisitions in 2019 and 2018 in our consolidated results since the acquisition dates.

Three Months Ended March 31, 2019 Compared to Three Months Ended March 31, 2018

The following table breaks out our consolidated results into the base business component and the excluded component (sales centers excluded from base business):

(Unaudited) (in thousands)	Base Business Three Months Ended March 31, 2019 2018		Excluded Three Months Ended March 31, 2019 2018		Total Three Months Ended March 31, 2019 2018	
Net sales	\$587,320	\$582,822	\$10,136	\$3,078	\$597,456	\$585,900
Gross profit	171,706	165,334	2,925	739	174,631	166,073
Gross margin	29.2 %	28.4 %	28.9 %	24.0 %	29.2 %	28.3 %
Operating expenses	132,548	131,250	3,697	1,282	136,245	132,532
Expenses as a % of net sales	22.6 %	22.5 %	36.5 %	41.7 %	22.8 %	22.6 %
Operating income (loss)	39,158	34,084	(772)	(543)	38,386	33,541

Edgar Filing: POOL CORP - Form 10-Q

Operating margin	6.7	%	5.8	%	(7.6)%	(17.6)%	6.4	%	5.7	%
------------------	-----	---	-----	---	------	----	-------	----	-----	---	-----	---

15

In our calculation of base business results, we have excluded the following acquisitions for the periods identified:

Acquired	Acquisition Date	Net Sales Centers Acquired	Periods Excluded
W.W. Adcock, Inc. ⁽¹⁾	January 2019	4	January - March 2019
Turf & Garden, Inc. ⁽¹⁾	November 2018	4	January - March 2019
Tore Pty. Ltd. (Pool Power) ⁽¹⁾	January 2018	1	January - March 2019 and January - March 2018
Chem Quip, Inc. ⁽¹⁾	December 2017	5	January - March 2019 and January - March 2018
Intermark	December 2017	1	January - February 2019 and January - February 2018

⁽¹⁾ We acquired certain distribution assets of each of these companies.

When calculating our base business results, we exclude sales centers that are acquired, closed, or opened in new markets for a period of 15 months. We also exclude consolidated sales centers when we do not expect to maintain the majority of the existing business and existing sales centers that are consolidated with acquired sales centers.

We generally allocate corporate overhead expenses to excluded sales centers on the basis of their net sales as a percentage of total net sales. After 15 months of operations, we include acquired, consolidated and new market sales centers in the base business calculation including the comparative prior year period.

The table below summarizes the changes in our sales center count during the first three months of 2019:

December 31, 2018	364
Acquired locations	4
New locations, existing markets	2
Consolidated location	(1)
March 31, 2019	369

Net Sales

	Three Months Ended March 31,		
(in millions)	2019	2018	Change
Net sales	\$597.5	\$585.9	\$11.6 2%

Net sales increased 2% in the first quarter of 2019 compared to the first quarter of 2018, with base business sales up 1% for the period. Cooler and wetter weather, particularly in the western United States, combined with a later Easter holiday adversely impacted first quarter sales. Pool openings and normal spring early buys from customers in seasonal markets are influenced by the timing of the Easter holiday. In addition, sales were negatively impacted approximately 2% by the loss of a selling day compared to the first quarter of 2018 and 1% from unfavorable foreign currency exchange rate fluctuations.

The following factors benefited our sales (listed in order of estimated magnitude):

- inflationary product cost increases (estimated at approximately 2% above our historical average of 1% to 2%);

strong demand for discretionary products, as evidenced by improvements in sales growth rates for product offerings such as building materials (see discussion below);

acquisitions; and

market share gains, particularly in building materials and commercial products (see discussion below).

We believe that sales growth rates for certain product offerings, such as equipment and building materials, evidence increased spending in traditionally discretionary areas, such as pool construction, pool remodeling and equipment upgrades. In the first quarter of 2019, sales for equipment, which includes swimming pool heaters, pumps, lights and filters, remained relatively flat compared to the same period last year. These products collectively represented approximately 30% of net sales for the period. Sales of building materials grew 8% compared to the first quarter of 2018 and represented approximately 13% of net sales in the first quarter of 2019.

Sales to customers who service large commercial swimming pools such as hotels, universities and community recreational facilities are included in the appropriate existing product categories, and growth in this area is reflected in the numbers above. Sales to these customers represented approximately 6% of our consolidated net sales for the first quarter of 2019 and increased 2% compared to the first quarter of 2018.

Gross Profit

	Three Months Ended March 31,		
(in millions)	2019	2018	Change
Gross profit	\$174.6	\$166.1	\$8.5 5%
Gross margin	29.2 %	28.3 %	

The increase in gross margin between periods primarily reflects benefits from strategic inventory purchases in the second half of 2018 and lower customer early buys in the first quarter of 2019.

Operating Expenses

	Three Months Ended March 31,		
(in millions)	2019	2018	Change
Operating expenses	\$136.2	\$132.5	\$3.7 3%
Operating expenses as a % of net sales	22.8 %	22.6 %	

Operating expenses increased 3% in the first quarter of 2019 compared to the first quarter of 2018, with base business operating expenses up approximately 1% compared to the same period last year. This increase is largely due to growth-driven increases in labor expenses and increased facility costs offset by a 1% benefit from foreign currency exchange rate fluctuations.

Interest and Other Non-Operating Expenses, Net

Interest and other non-operating expenses, net for the first quarter of 2019 increased \$3.1 million compared to the first quarter of 2018. The increase mostly reflects higher debt levels and higher interest rates between periods. Our weighted average effective interest rate increased to 3.7% for the first quarter of 2019 from 3.0% for the first quarter of 2018 on higher average outstanding debt of \$674.6 million versus \$515.9 million for the respective periods.

Income Taxes

Our effective income tax rate was a 2.5% benefit for the three months ended March 31, 2019, compared to a 4.3% benefit for the three months ended March 31, 2018. We recorded an \$8.8 million tax benefit from ASU 2016-09 in the quarter ended March 31, 2019 compared to a benefit of \$9.0 million realized in the same period last year. Excluding the benefits from ASU 2016-09, our effective tax rate was 25.1% and 25.7% for the first quarters of 2019 and 2018,

respectively.

Net Income and Earnings Per Share

Net income increased 4% to \$32.6 million in the first quarter of 2019 compared to the first quarter of 2018. Earnings per diluted share increased to \$0.80 in the first quarter of 2019 versus \$0.75 per diluted share for the comparable 2018 period. The benefit from ASU 2016-09 increased diluted earnings per share by \$0.21 and \$0.22 in the first quarters of 2019 and 2018, respectively. Excluding the impact from ASU 2016-09 in both periods, earnings per diluted share increased 11% to \$0.59 in the first quarter of 2019 compared to \$0.53 in the first quarter of 2018.

Seasonality and Quarterly Fluctuations

Our business is highly seasonal. In general, sales and operating income are highest during the second and third quarters, which represent the peak months of both swimming pool use and installation and irrigation and landscape installations and maintenance. Sales are substantially lower during the first and fourth quarters, when we may incur net losses. In 2018, we generated approximately 62% of our net sales and 81% of our operating income in the second and third quarters of the year.

We typically experience a build-up of product inventories and accounts payable during the winter months in anticipation of the peak selling season. Excluding borrowings to finance acquisitions and share repurchases, our peak borrowing usually occurs during the second quarter, primarily because extended payment terms offered by our suppliers typically are payable in April, May and June, while our peak accounts receivable collections typically occur in June, July and August.

The following table presents certain unaudited quarterly data for the first quarter of 2019, the four quarters of 2018 and the fourth, third and second quarters of 2017. We have included income statement and balance sheet data for the most recent eight quarters to allow for a meaningful comparison of the seasonal fluctuations in these amounts. In our opinion, this information reflects all normal and recurring adjustments considered necessary for a fair presentation of this data. Due to the seasonal nature of our industry, the results of any one or more quarters are not necessarily a good indication of results for an entire fiscal year or of continuing trends.

(Unaudited) (in thousands)	QUARTER							
	2019 First	2018 Fourth	Third	Second	First	2017 Fourth	Third	Second
Statement of Income Data								
Net sales	\$597,456	\$543,082	\$811,311	\$1,057,804	\$585,900	\$510,183	\$743,401	\$988,163
Gross profit	174,631	160,442	235,003	308,655	166,073	145,398	216,606	289,664
Operating income	38,386	25,970	92,337	162,042	33,541	17,259	81,928	154,186
Net income	32,637	16,811	69,261	117,049	31,339	25,665	48,783	94,620
Balance Sheet Data								
Total receivables, net	\$313,127	\$207,801	\$287,773	\$404,415	\$314,596	\$196,265	\$262,796	\$370,285
Product inventories, net	815,742	672,579	609,983	606,583	703,793	536,474	484,287	542,805
Accounts payable	472,487	237,835	204,706	300,232	467,795	245,249	209,062	273,309
Total debt	698,977	666,761	580,703	657,120	568,110	519,650	564,573	553,480

We expect that our quarterly results of operations will continue to fluctuate depending on the timing and amount of revenue contributed by new and acquired sales centers. Based on our peak summer selling season, we generally open new sales centers and close or consolidate sales centers, when warranted, either in the first quarter before the peak selling season begins or in the fourth quarter after the peak selling season ends.

Weather is one of the principal external factors affecting our business. The table below presents some of the possible effects resulting from various weather conditions.

Weather	Possible Effects
Hot and dry	<ul style="list-style-type: none"> • Increased purchases of chemicals and supplies for existing swimming pools • Increased purchases of above-ground pools and irrigation products
Unseasonably cool weather or extraordinary amounts of rain	<ul style="list-style-type: none"> • Fewer pool and irrigation and landscape installations • Decreased purchases of chemicals and supplies • Decreased purchases of impulse items such as above-ground pools and accessories
Unseasonably early warming trends in spring/late cooling trends in fall (primarily in the northern half of the U.S. and Canada)	<ul style="list-style-type: none"> • A longer pool and landscape season, thus positively impacting our sales
Unseasonably late warming trends in spring/early cooling trends in fall (primarily in the northern half of the U.S. and Canada)	<ul style="list-style-type: none"> • A shorter pool and landscape season, thus negatively impacting our sales

Weather Impacts on 2019 and 2018 Results

Wetter and cooler-than-normal temperatures to begin the year hindered our first quarter of 2019 sales growth. Much of the western United States, particularly California and Arizona, experienced cold to record cold temperatures in January and February. The latter half of March benefited from warmer weather throughout most of the country and provided some relief from the slow start earlier in the year. The first quarter of 2018 experienced similar, though less significant, unfavorable weather in certain markets, leading to adverse conditions in 2019 compared to 2018.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity is defined as the ability to generate adequate amounts of cash to meet short-term and long-term cash needs. We assess our liquidity in terms of our ability to generate cash to fund our operating activities, taking into consideration the seasonal nature of our business. Significant factors which could affect our liquidity include the following:

- cash flows generated from operating activities;
- the adequacy of available bank lines of credit;
- the quality of our receivables;
- acquisitions;
- dividend payments;
- capital expenditures;
- changes in income tax laws and regulations;
- the timing and extent of share repurchases; and
- the ability to attract long-term capital with satisfactory terms.

Our primary capital needs are seasonal working capital requirements and other general corporate purposes, including acquisitions, dividend payments and share repurchases. Our primary sources of working capital are cash from operations supplemented by borrowings, which have historically been sufficient to support our growth and finance acquisitions. The same principles apply to funds used for capital expenditures and share repurchases.

We prioritize our use of cash based on investing in our business, maintaining a prudent debt structure, including a modest amount of debt, and returning cash to our shareholders through dividends and share repurchases. Our specific priorities for the use of cash are as follows:

- capital expenditures primarily for maintenance and growth of our sales center structure, technology-related investments and fleet vehicles;
- strategic acquisitions executed opportunistically;
- payment of cash dividends as and when declared by our Board of Directors (Board);
- repayment of debt to maintain an average total leverage ratio (as defined below) between 1.5 and 2.0; and
- repurchases of our common stock under our Board-authorized share repurchase program.

Capital expenditures were 1.1% of net sales in 2018 and 1.4% of net sales in both 2017 and 2016. Our higher capital spending in 2017 and 2016 related to expanding our facilities and purchasing delivery vehicles to address growth. Over the last five years, capital expenditures have averaged roughly 1.0% of net sales. Going forward, we project capital expenditures will continue to approximate this average.

Sources and Uses of Cash

The following table summarizes our cash flows (in thousands):

	Three Months Ended March 31, 2019 2018	
Operating activities	\$28,804	\$(44,149)
Investing activities	(16,109)	(15,217)
Financing activities	(2,050)	38,205

Cash provided by operating activities increased \$73.0 million during the first three months of 2019 compared to the first three months of 2018 primarily due to payments for pre-price increase inventory purchases in 2018 ahead of the 2019 season, which resulted in decreased inventory purchases in the first quarter of 2019.

Cash used in investing activities for the first three months of 2019 increased compared to the first three months of 2018 primarily due to the acquisition of W.W. Adcock, Inc. which we completed in January 2019.

Cash used in financing activities increased for the first three months of 2019 compared to the first three months of 2018, which reflects a \$20.5 million increase in share repurchases as well as a \$16.2 million decrease in amounts provided by net borrowings.

Future Sources and Uses of Cash

Revolving Credit Facility

Our Credit Facility provides for \$750.0 million in borrowing capacity under a five-year unsecured revolving credit facility and includes sublimits for the issuance of swingline loans and standby letters of credit. Pursuant to an accordion feature, the aggregate maximum principal amount of the commitments under the Credit Facility may be increased at our request and with agreement by the lenders by up to \$75.0 million, to a total of \$825.0 million. The Credit Facility matures on September 29, 2022. We intend to use the Credit Facility for general corporate purposes, for future share repurchases and to fund future growth initiatives.

At March 31, 2019, there was \$503.1 million outstanding, a \$4.8 million standby letter of credit outstanding and \$242.1 million available for borrowing under the Credit Facility. We utilize interest rate swap contracts and forward-starting interest rate swap contracts to reduce our exposure to fluctuations in variable interest rates for future interest payments on the Credit Facility. As of March 31, 2019, we had three interest rate swap contracts in place that became effective on October 19, 2016. These swap contracts were previously forward-starting and were amended in October 2015 to bring the fixed rates per our forward-starting contracts in line with current market rates and extend the hedged period for future interest payments on our Credit Facility. Now effective, these amended swap contracts convert the Credit Facility's variable interest rate to fixed rates of 2.273% on a notional amount of \$75.0 million and 2.111% on two separate notional amounts, one \$25.0 million and the other \$50.0 million, totaling \$75.0 million. Interest expense related to the notional amounts under these swap contracts is based on the fixed rates plus the applicable margin on the Credit Facility. These interest rate swap contracts will terminate on November 20, 2019. In July 2016, we entered into a forward-starting interest rate swap contract to extend the hedged period for future interest payments on our Credit Facility to its maturity date at that time. This swap contract will convert the Credit Facility's variable interest rate to a fixed rate of 1.1425% on a notional amount of \$150.0 million. The contract becomes effective on November 20, 2019 and terminates on November 20, 2020.

The weighted average effective interest rate for the Credit Facility as of March 31, 2019 was approximately 3.5%, excluding commitment fees.

Financial covenants on the Credit Facility include maintenance of a maximum average total leverage ratio and a minimum fixed charge coverage ratio. As of March 31, 2019, the calculations of these two covenants are detailed below:

Maximum Average Total Leverage Ratio. On the last day of each fiscal quarter, our average total leverage ratio must be less than 3.25 to 1.00. Average Total Leverage Ratio is the ratio of the trailing twelve months (TTM) Average Total Funded Indebtedness plus the TTM Average Accounts Securitization Proceeds divided by the TTM EBITDA (as those terms are defined in the Credit Facility). As of March 31, 2019, our average total leverage ratio equaled 1.80 (compared to 1.72 as of December 31, 2018) and the TTM average total debt amount used in this calculation was \$646.7 million.

Minimum Fixed Charge Coverage Ratio. On the last day of each fiscal quarter, our fixed charge ratio must be greater than or equal to 2.25 to 1.00. Fixed Charge Ratio is the ratio of the TTM EBITDAR divided by TTM Interest Expense paid or payable in cash plus TTM Rental Expense (as those terms are defined in the Credit Facility). As of March 31, 2019, our fixed charge ratio equaled 5.17 (compared to 5.33 as of December 31, 2018) and TTM Rental Expense was \$57.8 million.

The Credit Facility also limits the declaration and payment of dividends on our common stock to no more than 50% of the preceding year's Net Income (as defined in the Credit Facility), provided no default or event of default has occurred and is continuing, or would result from the payment of dividends. Additionally, we may declare and pay quarterly dividends notwithstanding that the aggregate amount of dividends paid would be in excess of the 50% limit described above so long as (i) the amount per share of such dividends does not exceed the amount per share paid during the most recent fiscal year in which we were in compliance with the 50% limit and (ii) our Average Total Leverage Ratio is less than 3.00 to 1.00 both immediately before and after giving pro forma effect to such dividends. Further, dividends must be declared and paid in a manner consistent with our past practice.

Under the Credit Facility, we may repurchase shares of our common stock provided no default or event of default has occurred and is continuing, or would result from the repurchase of shares, and our maximum average total leverage ratio (determined on a pro forma basis) is less than 2.50 to 1.00. Other covenants include restrictions on our ability to grant liens, incur indebtedness, make investments, merge or consolidate, and sell or transfer assets. Failure to comply with any of our financial covenants or any other terms of the Credit Facility could result in higher interest rates on our borrowings or the acceleration of the maturities of our outstanding debt.

Receivables Securitization Facility

Our two-year accounts receivable securitization facility (the Receivables Facility) offers us a lower cost form of financing, with a peak funding capacity of up to \$295.0 million between May 1 and June 30, which includes an additional seasonal funding capacity that is available between March 1 and July 31. Other funding capacities range from \$95.0 million to \$280.0 million throughout the remaining months of the year.

The Receivables Facility provides for the sale of certain of our receivables to a wholly owned subsidiary (the Securitization Subsidiary). The Securitization Subsidiary transfers variable undivided percentage interests in the receivables and related rights to certain third-party financial institutions in exchange for cash proceeds, limited to the applicable funding capacities. Upon payment of the receivables by customers, rather than remitting to the financial institutions the amounts collected, we retain such collections as proceeds for the sale of new receivables until payments become due.

The Receivables Facility contains terms and conditions (including representations, covenants and conditions precedent) customary for transactions of this type. Additionally, an amortization event will occur if we fail to maintain a maximum average total leverage ratio (average total funded debt/EBITDA) of 3.25 to 1.00 and a minimum fixed charge coverage ratio (EBITDAR/cash interest expense plus rental expense) of 2.25 to 1.00.

At March 31, 2019, there was \$175.1 million outstanding under the Receivables Facility at a weighted average effective interest rate of 3.3%, excluding commitment fees.

Compliance and Future Availability

As of March 31, 2019, we believe we were in compliance with all covenants and financial ratio requirements under our Credit Facility and our Receivables Facility. We believe we will remain in compliance with all covenants and financial ratio requirements throughout the next twelve months. For additional information regarding our debt arrangements, see Note 5 of “Notes to Consolidated Financial Statements,” included in Part II, Item 8 of our 2018 Annual Report on Form 10-K.

We believe we have adequate availability of capital to fund present operations and the current capacity to finance any working capital needs that may arise. We continually evaluate potential acquisitions and hold discussions with acquisition candidates. If suitable acquisition opportunities arise that would require financing, we believe that we have the ability to finance any such transactions.

As of April 25, 2019, \$49.2 million of the current Board-authorized amount under our share repurchase program remained available. We expect to repurchase additional shares on the open market from time to time depending on market conditions. We plan to fund these repurchases with cash provided by operations and borrowings under the Credit and Receivables Facilities.

CRITICAL ACCOUNTING ESTIMATES

We prepare our Consolidated Financial Statements in accordance with U.S. generally accepted accounting principles (GAAP), which require management to make estimates and assumptions that affect reported amounts and related disclosures. Management identifies critical accounting estimates as:

- those that require the use of assumptions about matters that are inherently and highly uncertain at the time the estimates are made; and
- those for which changes in the estimates or assumptions, or the use of different estimates and assumptions, could have a material impact on our consolidated results of operations or financial condition.

Management has discussed the development, selection and disclosure of our critical accounting estimates with the Audit Committee of our Board. For a description of our critical accounting estimates that require us to make the most difficult, subjective or complex judgments, please see our 2018 Annual Report on Form 10-K. We have not changed these policies from those previously disclosed.

Recent Accounting Pronouncements

See Note 1 of “Notes to Consolidated Financial Statements,” included in Item 1 of this Form 10-Q for detail.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

There have been no material changes during the three months ended March 31, 2019 from what we reported in our 2018 Annual Report on Form 10-K. For additional information on our interest rate risk, refer to “Quantitative and Qualitative Disclosures about Market Risk” included in Part II, Item 7A. in our 2018 Annual Report on Form 10-K.

Currency Risk

There have been no material changes during the three months ended March 31, 2019 from what we reported in our 2018 Annual Report on Form 10-K. For additional information on our currency risk, refer to “Quantitative and Qualitative Disclosures about Market Risk” included in Part II, Item 7A. in our 2018 Annual Report on Form 10-K.

Item 4. Controls and Procedures

The term “disclosure controls and procedures” is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (the Act). The rules refer to the controls and other procedures designed to ensure that information required to be disclosed in reports that we file or submit under the Act is (1) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms and (2) accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure. As of March 31, 2019, management, including the CEO and CFO, performed an evaluation of the effectiveness of our disclosure controls and procedures. Based on that evaluation, management, including the CEO and CFO, concluded that as of March 31, 2019, our disclosure controls and procedures were effective.

We maintain a system of internal control over financial reporting that is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. Based on the most recent evaluation, we have concluded that no change in our internal control over financial reporting occurred during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we are subject to various claims and litigation arising in the ordinary course of business, including product liability, personal injury, commercial, contract and employment matters. While the outcome of any litigation is inherently unpredictable, based on currently available facts we do not believe that the ultimate resolution of any of these matters will have a material adverse impact on our financial condition, results of operations or cash flows.

Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed in Part I, Item 1A “Risk Factors” in our 2018 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The table below summarizes the repurchases of our common stock in the first quarter of 2019:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan (2)	Maximum Approximate Dollar Value of Shares That May Yet be Purchased Under the Plan (3)
January 1 - 31, 2019	116,946	\$147.77	116,946	\$52,498,367
February 1 - 28, 2019	28,513	\$152.25	22,019	\$49,200,474
March 1 - 31, 2019	9,401	\$156.98	—	\$49,200,474
Total	154,860	\$149.15	138,965	

These shares may include shares of our common stock surrendered to us by employees in order to satisfy minimum tax withholding obligations in connection with certain exercises of employee stock options or lapses upon vesting

(1) of restrictions on previously restricted share awards, and/or to cover the exercise price of such options granted under our share-based compensation plans. There were 15,895 shares surrendered for this purpose in the first quarter of 2019.

In May 2018, our Board authorized an additional \$200.0 million under our share repurchase program for the

(2) repurchase of shares of our common stock in the open market at prevailing market prices or in privately negotiated transactions.

(3) As of April 25, 2019, \$49.2 million of the authorized amount remained available under our current share repurchase program.

Item 6. Exhibits

Exhibits filed as part of this report are listed below.

No.	Description	Filed/ Furnished with this Form 10-Q	Incorporated by Reference		
			Form	File No.	Date Filed
<u>3.1</u>	Restated Certificate of Incorporation of the Company.		10-Q	000-26640	8/9/2006
<u>3.2</u>	Amended and Restated Bylaws of the Company.		8-K	000-26640	2/8/2019
<u>4.1</u>	Form of certificate representing shares of common stock of the Company.		8-K	000-26640	5/19/2006
<u>31.1</u>	Certification by Mark W. Joslin pursuant to Rule 13a-14(a) and 15d-14(a), as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.	X
