ADVANCED SEMICONDUCTOR ENGINEERING, INC. REPORTS YEAR 2002 THIRD-QUARTER  
FINANCIAL RESULTS

Taipei, Taiwan, R.O.C., October 29th, 2002 - Advanced Semiconductor Engineering, Inc. (TAIEX: 2311, NYSE: ASX), ("ASE", or the "Company"), one of the world's largest independent providers of semiconductor packaging and testing services, today reported quarterly revenues<sup>1</sup> of NT\$11,861 million, up 10% sequentially and up 42% versus a year ago period.

Net income amounted to NT\$315 million in the third quarter ended September 30, 2002. Diluted earnings per share for the quarter was NT\$0.1, or US\$0.015 per ADS<sup>2</sup>. For the nine months ended September 30, 2002, the Company's net income totaled NT\$158 million, representing earnings per share of NT\$0.05 or earnings per ADS of US\$0.007.

"Despite the slower than expected industry recovery, the overall environment is very favorable for us," commented Mr. Jason Chang, Chairman of ASE. "We continue to benefit from the consolidation of IC backend manufacturing capacity worldwide. After the last industry downturn, our IDM customers have significantly cut back their investment in internal backend capacity. The industry recession and the depressed capital market have also weakened the competitiveness of many of our competitors. The demand for leading-edge assembly and test capacity continues to strengthen as new products are still being introduced to the market, despite a slow industry environment. ASE's commitment to R&D and expansion in advanced backend capacity have enabled us to win many new device qualifications from major IDM customers. We believe we are seeing the results of our effort as the revenues from our IDM customers continue to increase."

Dr. Leonard Liu, President of ASE added on to say: "The IC backend industry is going through a fundamental change. Our customers are looking for partners that can provide total solutions and support their strategic requirement both in capacity planning and technological development. The breadth of our services

## Edgar Filing: ADVANCED SEMICONDUCTOR ENGINEERING INC - Form 6-K

and solid financials should position us favorably against our competitors in the coming recovery."

### CONSOLIDATED FINANCIAL RESULTS

- o Net revenues amounted to NT\$11,861 million, up 10% sequentially and up 42% versus year ago quarter. Year-to-September revenues increased 16% versus the same period last year.
- o The revenue contribution can be broken down into - NT\$9,206 million from assembly operations and NT\$2,655 million from testing operations.
- o Revenues from the Company's IDM customers accounted for 54% of total revenues, up 4% sequentially and up 13% year-over-year. The Company's top 10 customers contributed 56% of its revenues during the quarter.
- o Costs of goods sold were NT\$9,976 million and included NT\$2,871 million in depreciation expenses.
- o Gross profit for the quarter was NT\$1,885 million, representing a gross margin of 16%, up 1% sequentially.
- o Total operating expenses were NT\$1,663 million, including NT\$541 million in research and development expenses. Goodwill amortization related to the acquisition of consolidated entities was NT\$201 million. Selling, general and administrative expenses totaled NT\$1,122 million. Operating profit amounted to NT\$222 million, representing an operating margin of 2%.
- o Net interest expense for the quarter was NT\$386 million. Foreign exchange gain amounted to NT\$4 million, as a result of the depreciation of the NT dollars, partially offset by Japanese yen's appreciation against NT dollars.
- o The Company recognized an investment loss of NT\$38 million from its minority-owned affiliates, including NT\$21 million from Hung Ching Construction, NT\$20 million from other invested companies and NT\$3 million investment income from Universal Scientific Industrial Co., LTD. ("USI"). The goodwill amortization related to non-consolidated affiliates of NT\$56 million remained unchanged compared to the previous quarter.
- o Loss before tax was NT\$270 million. The Company recognized an income tax benefit of NT\$288 million during the quarter.
- o Minority income adjustment for the quarter amounted to NT\$297 million.
- o Net income amounted to NT\$315 million in the third quarter ended September 30, 2002. For the nine months ended September 30, 2002, the Company's net income totaled NT\$158 million.
- o Effective January 1, 2002, ROC GAAP requires that the Company's stocks held and owned by its subsidiaries be presented as treasury stocks.
  - As a result of this ROC GAAP change, total number of outstanding shares used in calculating the Company's EPS has been reduced from 3,254,800,000 shares to 3,090,678,000 shares, reflecting a deduction of 164,122,000 shares representing Company's stock held by its subsidiaries.
  - After adjusting for this ROC GAAP change, the Company's earnings per share for the third quarter of 2002 was NT\$0.1, or US\$0.015 per ADS. Earnings per share for the first nine months of 2002 amounted to

## Edgar Filing: ADVANCED SEMICONDUCTOR ENGINEERING INC - Form 6-K

NT\$0.05, or US\$0.007 per ADS.

### CAPITAL EXPENDITURES AND LIQUIDITY

- o Capital expenditures in Q3 2002 totaled US\$153 million.
  - The breakdown of the capital expenditures by operations is as follows: US\$77 million for assembly operations, US\$53 million for testing operations and US\$23 million for material manufacturing operations.
  - As of September 30, 2002, the Company has spent US\$307 million in capital expenditures. The full year capital expenditures is forecasted at US\$350 million, an increase of US\$70 million compared to the original budget of US\$280 million.
- o EBITDA for the quarter totaled NT\$3,597 million.
- o As of September 30, 2002, the Company had cash on hand plus short-term investment of NT\$12,445 million, as compared to NT\$11,594 million as of June 30, 2002.
- o As of September 30, 2002, the Company has retired the remaining outstanding of its US\$200 million Convertible Bonds due in November 2002.
- o The Company's total short-term debt amounted to NT\$15,261 million, consisting of NT\$6,529 million of revolving working capital loan and NT\$8,732 million of current portion of

2

October 29, 2002

Advanced Semiconductor Engineering, Inc.

[GRAPHIC OMITTED]

long-term debt. Total unused banking facilities amounted to NT\$14,728 million.

- o Total number of employees reached 19,821 as of September 30, 2002.

### BUSINESS REVIEW

#### Assembly Operation

- o Revenues generated from the Company's assembly operations were NT\$9,206 million during the quarter, up 9% sequentially and an increase of 44% year-over-year. For the first nine months of 2002, assembly revenues increased 22% to NT\$25,458 million compared to the same period last year.
- o Total assembly volume reached 62.5 billion pins, up 10% from the previous quarter and up 65% year-over-year.
- o Average selling price (ASP) per pin remained flat compared to last quarter, and down 8% year-over-year.
- o Fine pitch assembly (i.e., bonding pad pitch below 60 micron) comprised 55% of total assembly revenues, up from 51% in the previous quarter and up from 43% year-over-year.
- o Revenues from BGA and other substrate-based packages comprised 53% of total assembly revenues, up from 47% from the previous quarter and remains flat in percentage term compared to one year ago. The sequential increase in the percentage of BGA revenue was mainly due to the volume increase in the PC sector as most high-end chipsets and graphic chips for PCs use BGA packages. The average number of pins per unit for the BGA packages was 267 in Q3 2002, compared to 238 pins in Q2 2002 and 241 in Q3 2001.
- o Volume from advanced leadframe based packages, including Low-profile Quad Flat Package (LQFP) and Thermal-enhanced Quad Flat Package (TQFP) decreased 12% sequentially and up 72% year-over-year. Revenues from QFP, LQFP and TQFP packages accounted for 27% of total assembly revenues, down

## Edgar Filing: ADVANCED SEMICONDUCTOR ENGINEERING INC - Form 6-K

from 33% in the previous quarter and remains flat in percentage term compared to same quarter last year.

- o Gross margin of the assembly operations was 17%, down 1% sequentially and up 4% year-over-year.
- o The average utilization rate of the assembly operations was around mid-70%. The fine pitch assembly and flip-chip assembly capacity operated at near-full utilization.
- o Capital spending on the assembly operations amounted to US\$77 million, of which US\$63 million was for the wirebonding assembly capacity, and US\$14 million was for wafer bumping and flip chip assembly capacity.
- o As of September 30, 2002, there were 4,179 wirebonders in operations, of which 2,801 wirebonders were capable of performing fine pitch wirebonding services. A total of 239 wirebonders were added and 92 wirebonders were rendered obsolete during the third quarter of 2002.

### Testing Operations

- o Revenues generated from the Company's testing operations were NT\$2,655 million, up 11% sequentially and up 35% year-over-year.
- o Of the total testing revenues, 83% was contributed by the Company's final test operations, 10% by the wafer sort operation, and 7% by the engineering test operation.
- o Testing volume (in terms of test time) increased by high single-digit percent sequentially, whereas ASP remained flat during the quarter.
- o Gross margin of the test operation was 11%, compared to 6% in the previous quarter and negative 7% in the third quarter of 2001.
- o The average utilization rate of the testing operation was above 60%, with higher utilization rates on advanced tester platforms.
- o As of September 30, 2002, the Company operated a total of 1,058 testers, including 32 testers added during the quarter.

3

October 29, 2002

Advanced Semiconductor Engineering, Inc.

[GRAPHIC OMITTED]

### Material Operations

- o Materials revenues were NT\$727 million for the quarter and consisted of NT\$192 million in QFP leadframe and NT\$535 million in PBGA substrates. The materials revenues were not reflected in the Company's consolidated revenues since they were inter-company sales transaction.

### BUSINESS OUTLOOK

The following statements are based on current expectations. These statements are forward-looking, and actual results may differ materially. Economic and industry conditions remain uncertain, and continue to make it particularly difficult to forecast product demand.

The Company expects in the fourth quarter of 2002, its

- o consolidated revenues to decline not more than 5% sequentially
- o gross margin and operating margin to maintain at similar level as the third quarter of this year

About ASE Inc.

## Edgar Filing: ADVANCED SEMICONDUCTOR ENGINEERING INC - Form 6-K

ASE Inc. is one of the world's largest independent providers of semiconductor packaging services and, together with its subsidiary ASE Test Limited (Nasdaq: ASTSF), one of the world's largest independent providers of semiconductor testing services, including front-end engineering testing, wafer probing and final testing services. The Company's international customer base of more than 200 blue-chip customers includes such leading names as Advanced Micro Devices, Inc., Cirrus Logic International Ltd., IBM Corporation, LSI Logic Corporation, Motorola, Inc. , Qualcomm Incorporated and VIA Technology. With advanced-process technological capabilities and a global presence spanning Taiwan, Korea, Hong Kong, Singapore, Malaysia and the United States, ASE Inc. has established a reputation for reliable, high quality products and services. For more information, visit the website, <http://www.aseglobal.com>

### Safe Harbor Notice

This press release contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Although these forward-looking statements, which may include statements regarding our future results of operations, financial condition or business prospects, are based on our own information and information from other sources we believe to be reliable, you should not place undue reliance on these forward-looking statements, which apply only as of the date of this press release. Our actual results of operations, financial condition or business prospects may differ materially from those expressed or implied in these forward-looking statements for a variety of reasons, including risks associated with the highly competitive nature of the semiconductor industry, our ability to introduce new packaging and testing technologies in order to remain competitive, our ability to successfully integrate future acquisitions, risks associated with international business activities, our business strategy, general economic and political conditions, possible disruptions in commercial activities caused by natural disasters or industrial accidents, our future expansion plans and capital expenditures, and fluctuations in foreign currency exchange rates. For a discussion of these risks and other factors, please see the documents we file from time to time with the Securities and Exchange Commission, including our Annual Report on Form 20-F filed on June 28, 2002.
